

CYCLOPÆDIA  
OF  
BIBLICAL,  
THEOLOGICAL, AND ECCLESIASTICAL  
LITERATURE.

PREPARED BY

THE REV. JOHN M'CLINTOCK, D.D.,

AND

JAMES STRONG, S.T.D.

VOL. III.—E, F, G.

PRIVATE LIBRARY  
RICHARD C. HALVERSON

NEW YORK:  
HARPER & BROTHERS, PUBLISHERS,  
FRANKLIN SQUARE.

1882.

Entered, according to Act of Congress, in the year one thousand eight hundred  
and seventy, by

HARPER & BROTHERS,

In the Clerk's Office of the District Court of the Southern District of New York.

## P R E F A C E T O V O L. I I I.

---

IN the Preface to the first volume of this work it was stated that the department of Biblical Literature is exclusively in the charge of Dr. STRONG, who is responsible for all the articles in that field. It may be proper to add that this department embraces not merely Bible names, but also all branches of Biblical Introduction, including such articles, for instance, as *Canon of Scripture, Commentary, Concordance, Criticism, Cross, I., II., Ethnology*, etc.; also, Biblical philology, manuscripts and versions, and many cognate subjects, such as *English Versions, Eschatology, Essenes, Ethiopic Language, Fortification, Geology, Government*, etc. In this department the Dictionaries of Kitto and Smith are freely used, all the important matter of both being incorporated into these pages, with references at the end to the authority cited. The range of this department, however, is greatly extended beyond the scope of these or any similar works heretofore published.

In Dr. McCLINTOCK'S department, all verbal citations are noted by quotation marks. If this is omitted in any case, it is by accident. In this department, also, the names of the writers of special articles are indicated by their initials in the list at the end of the volume, as follows:

- W. J. A.—WILLIAM J. ALLINSON, editor of *Friends' Review*, Burlington, N. J.  
G. F. C.—Professor G. F. COMFORT, Princeton College.  
D. D.—The Rev. DANIEL DE VINNE, New York.  
R. D.—The Rev. ROBERT DAVIDSON, D.D., Huntingdon, L. I.  
F. W. F.—The Rev. F. W. FLOCKEN, missionary of the Methodist Episcopal Church, Tultscha, Bulgaria.  
E. V. G.—The Rev. E. V. GERHART, D.D., professor in Mercersburgh Theological Seminary.  
J. T. G.—The Rev. J. T. GRACEY, missionary in India (Methodist Episcopal Church).  
H. G.—The Rev. HENRY GRAHAM, Lansingburgh, N. Y.  
H. H.—The Rev. H. HARBAUGH, D.D., late president of Theological Seminary, Mercersburgh, Pa.  
R. D. II.—Professor R. D. HITCHCOCK, D.D., Union Theological Seminary, New York.  
C. H.—The Rev. CHARLES HODGE, D.D., Princeton Theological Seminary.  
G. F. II.—Professor GEORGE F. HOLMES, University of Virginia.  
J. F. II.—The Rev. JOHN F. HURST, D.D., Mission Institute, Bremen, Germany.  
S. M. J.—SAMUEL M. JANNEY, Lincoln, Loudoun County, Va.  
O. J.—OLIVER JOHNSON, office of *The Independent*, New York.  
J. B. L.—The Rev. J. B. LOGAN, editor of *Western Cumberland Presbyterian*, Alton, Ill.  
J. W. M.—Professor J. W. MARSHALL, late of Dickinson College.  
B. H. N.—Professor B. H. NADAL, D.D., Drew Theological Seminary.  
E. A. P.—Professor E. A. PARK, D.D., Theological Seminary, Andover.  
J. N. P.—JULES N. PROESCHIEL, Paris, France.  
A. J. S.—Professor ALEXANDER J. SCHEM, New York.  
E. de S.—The Rev. E. DE SCHWEINITZ, editor of *The Moravian*, Bethlehem, Pa.  
L. E. S.—Professor L. E. SMITH, office of *Examiner and Chronicle*, New York.  
A. S.—The Rev. ABEL STEVENS, LL.D., Brooklyn.  
M. L. S.—Professor M. L. STOEVEY, Pennsylvania College, Gettysburg.  
G. L. T.—The Rev. GEORGE L. TAYLOR, New York.  
W. J. R. T.—The Rev. W. J. R. TAYLOR, D.D., Secretary of American Bible Society, New York.  
J. P. W.—The Rev. J. P. WESTERVELT, Paterson, N. J.  
C. P. W.—The Rev. C. P. WING, D.D., Carlisle, Pa.  
J. H. W.—J. H. WORMAN, A.M., librarian of Drew Theological Seminary.  
R. Y.—The Rev. R. YEAKEL, Cleveland, Ohio.

A considerable number of articles for this Cyclopædia are in part prepared, nearly up to the end of the alphabet; but there are numerous subjects that can only be treated advantageously at or near the time of printing. All the articles are revised *de novo* as the work goes through the press, and the latest literature, in new books as well as in the journals of all nations, is consulted in this revision. The succeeding volumes may therefore be expected as rapidly as they can be carried through the press.

# LIST OF WOOD-CUTS IN VOL. III.

Assyrian Eagle.....	Page 3	3 French Feuillant Monk.....	Page 541
Imperial Eagle.....	3	3 Italian Feuillant Monk.....	541
Egyptian Corn.....	4	4 Feuillant Nun.....	541
Early English Window.....	4	4 Fruit of the Fig.....	544
Early English Capital.....	5	5 Fig-tree.....	544
Early English Pediment.....	5	5 Fillets.....	561
Ancient Oriental Ear-rings.....	6	6 Finials.....	561
Ancient Egyptian Ear-rings.....	7	7 Ancient Egyptian refining Gold.....	562
Ancient Assyrian Ear-rings.....	7	7 Ancient Egyptians curing Fish.....	578
Modern Egyptian Ear-rings.....	7	7 Ancient Egyptian spearing Fish.....	579
Ancient <i>Triclinium</i> .....	15	15 Ancient Egyptian Fish-net.....	580
Modern Oriental Dinner-party.....	16	16 Ancient Assyrian Fishing.....	580
Branch of <i>Diospyrus Elurium</i> .....	23	23 <i>Nigella Sativa</i> .....	583
Plan of Echatana.....	25	25 <i>Cyperus Esculentus</i> .....	586
Map of Western Asia.....	55	55 Flamboyant Window.....	588
Hieroglyph for "Egypt".....	75	75 Flax-plant.....	591
Modern Egypt.....	76	76 Ancient Egyptian dressing Flax.....	591
Egypt under the Romans.....	77	77 Common Flax.....	592
Ancient Profiles.....	83	83 Etruscan Flesh-hook.....	595
Sign <i>Tau</i> .....	88	88 Ancient Egyptian Flesh-pot.....	595
<i>Propylon</i> of Temple at Luxor.....	103	103 Ancient Assyrian Floats.....	598
Asiatic Elephant.....	128	128 Modern Assyrian Raft.....	598
Temple at Ellora.....	168	168 Ancient Egyptian Flutes.....	606
Swathing a Mummy.....	174	174 Ancient Roman Flutes.....	606
Painting a Mummy-case.....	174	174 Modern Egyptian Flute.....	606
Mummy's Head in Coffin.....	174	174 Doric and Ionic Fluting.....	607
Mummy of Pen-amen.....	175	175 Silver Coin of Aradus.....	607
Ancient Egyptian Embroidery.....	176	176 <i>Tabanus Alpinus</i> .....	610
Ancient Assyrian Embroidery.....	176	176 Font at Swaton.....	610
Modern Oriental Embroidery.....	177	177 Font at St. Mildred's.....	610
Modern Arab Encampment.....	187	187 Nun of Fontevault.....	610
Ancient Egyptian <i>Testudo</i> .....	196	196 Monk of Fontevault.....	610
Roman <i>Catapult</i> .....	196	196 Oriental Marks in the Forehead.....	618
Roman <i>Balistæ</i> .....	196	196 Ancient Egyptians attacking a Fort.....	627
Assyrian War-engine.....	196	196 Ancient Assyrians attacking a Fort.....	627
Roman Battering-ram worked by hand.....	197	197 Modern Persian Fort.....	628
Roman covered Battering-ram on wheels.....	197	197 Fountain near Beyrout.....	631
Roman <i>Helepolis</i> .....	197	197 Fountain at Nazareth.....	632
Ancient Egyptian Ensigns.....	232	232 Ancient Egyptian Geese-rearing.....	634
Early Coin of Ephesus.....	241	241 Ancient Egyptian Fowling with the Throw-stick.....	634
Plan of Ephesus.....	242	242 Ancient Egyptian catching and pre-serving Geese.....	635
Roman Coin of Ephesus.....	243	243 Syrian Fox.....	636
"Diana of the Ephesians".....	244	244 Egyptian Dog-fox.....	636
Plan of Temple of Diana at Ephesus.....	244	244 Franciscan Friar.....	650
The Jewish Ephod.....	248	248 Conventual Franciscan.....	651
Ancient Egyptian Tunic.....	249	249 Observant Franciscan.....	651
Ancient Egyptian sacred Coat.....	249	249 <i>Bosvelia Serrata</i> .....	651
Specimen of the Ephraim MS.....	249	249 Assyrian Fringed Garments.....	651
Map of Ephraim.....	251	251 Egyptian Fringed Linen.....	651
Ancient Egyptians Writing.....	260	260 Assyrian Tassels and Fringes.....	657
Statue of Erasmus at Rotterdam.....	277	277 Original Form of the <i>Talith</i> .....	678
Tomb of Mordecai and Esther.....	307	307 Modified Form of the <i>Talith</i> .....	678
Ancient Ethiopians.....	327	327 Fritchold at Beverly.....	679
Specimen of Ethiopic MS.....	334	334 <i>Rana Punctata</i> .....	680
Ethnographic Map of the World.....	341	341 Jewish Frontlet.....	682
Oriental Ewer and Basin.....	383	383 Ancient Egyptian Fullers.....	691
Map of the Exode.....	408	408 Egyptian Funeral Rites.....	694
Assyrians Blinding a Prisoner.....	427	427 Mohammedan Bier.....	695
Modern Egyptian Face painted.....	428	428 Ancient Egyptian Funeral.....	695
Ancient Egyptian Boxes for Face-paint.....	428	428 Modern Egyptian Funeral.....	696
Tomb of Ezekiel.....	431	431 Brother of St. Gabriel.....	702
Tomb of Ezra.....	437	437 Map of Gad.....	704
Large Falcon.....	469	469 Coin of Gadara.....	706
Small Falcon.....	470	470 Coin of Galatia.....	710
Common Fallow-deer.....	475	475 Druidical Cairn and Kist-vaens.....	715
<i>Autolope Bubalis</i> .....	476	475 Map of the Dead Sea.....	719
Fan-tracery Vaulting.....	482	482 Ancient Assyrian Galley.....	724
Ancient Egyptian Farming.....	485	482 Egyptians lifting Bags of Sand.....	730
<i>Assarion</i> of Chios.....	486	485 Ancient Egyptians Fencing.....	730
Roman <i>As</i> .....	486	486 Egyptians swinging Women around.....	730
Roman <i>Quadrans</i> .....	486	486 Ancient Roman Beast-fighter.....	731
Ancient Egyptian Poulterers.....	505	486 Figure of a Roman Gladiator.....	731

# CYCLOPÆDIA

OF

## BIBLICAL, THEOLOGICAL, AND ECCLESIASTICAL LITERATURE.

### E.

**Eachard, John, D.D.**, an English divine, was born in Suffolk in 1636, and was admitted at Catharine Hall, Cambridge, in 1653. He became fellow of his college in 1658, and was chosen master in 1675. He died July 7, 1697. His *Works* were collected in 3 vols. 12mo (Lond. 1784), containing a *Sketch of his Life*, a *Discussion of Hobbes's State of Nature*, and an *Essay on the Grounds of the Contempt of the Clergy*.—*New Gen. Biog. Dict.* v, 53; *Kippis, Biog. Britannica*, v, 529.

**Eachard, Lawrence.** See **ECHARD**.

**Eadfrith**, bishop of Lindisfarne from 698 to 721. He is sometimes named as the first translator of the Bible into Anglo-Saxon, but this is a mistake. There is, however, a splendid manuscript, written by Eadfrith with his own hand, in the Cottonian Library. It is known as *The Durham Book*.—Wright, *Biog. Brit. Lit., Anglo-Saxon Period*, p. 242.

**Eadmer, or Edmer**, a monk of Canterbury (12th century), was elected bishop of St. Andrew's, in Scotland, 1120, which office he did not accept for the following reason: "The question of lay investiture of ecclesiastical benefices was then in its crisis; there was a controversy between Canterbury and York for jurisdiction over the see of St. Andrew's; that see, again, asserted its independence of either of the English metropolitans; and Eadmer seems to have added to all these perplexities a difficulty as to his monastic allegiance. 'Not for all Scotland,' he said to the Scottish king, 'will I renounce being a monk of Canterbury.' The king, on his side, was equally unyielding; and the issue was the return of Eadmer to his English monastery, unconsecrated indeed, but still claiming to be bishop of St. Andrew's. He was made precentor of Canterbury, and died, it is supposed, in January, 1124" (Chambers, *Encyclopædia*, s. v.). Eadmer is one of the most important of the early English historians. He wrote a history of the affairs of England of his own time, from 1077 to 1122 (*Historia Novorum sive sui sæculi*), in which many original papers are inserted, and many important facts, nowhere else to be found, are preserved. This work has been highly commended, both by old and modern writers, as well for its correctness as for regularity of composition and purity of style. The best edition is that by Selden in 1623. Eadmer wrote the life of Anselm (generally found printed with his works), and the lives of Wilfred, Oswald, Dunstan, and others, given in the *Acta Sanctorum*, and in Warton, *Anglia Sacra* (vol. ii). The *Vita Anselmi* is prefixed to Anselm's works (Benedictine edition; also in Migne's *Patrologia*). The *Historia Novorum* and Eadmer's minor writings are given also in Migne, *Patrologia Latina*, vol. clix, 347 sq.—Hook, *Ecol. Biog.* iv, 52; Cave, *Hist. Lit.* (Geneva, 1720) i, 574; Collier, *Ecol. Hist. of Great Britain* (Barham's edit.), ii, 183 sq.; Wright, *Biog. Brit. Lit., Anglo-Norman Period*, p. 82 sq.

III.—A

**Eagle** occurs in Scripture as the translation of the Heb. נֶשֶׁר (ne'sher, so called from tearing its prey with its beak: occurs Exod. xix, 4; Lev. xi, 13; Dent. xiv, 12; xxviii, 49; xxxii, 11; 2 Sam. i, 23; Job ix, 26; xxxix, 27; Psa. ciii, 5; Prov. xxiii, 5; xxx, 17, 19; Isa. xl, 31; Jer. iv, 13; xlvi, 40; xlix, 16, 22; Lam. iv, 19; Ezek. i, 10; x, 14; xvii, 3, 7; Hos. viii, 1; Obad. 4; Mic. i, 16; Hab. i, 8), with which all the designations of the kindred dialects agree, Chald. נֶשֶׁר (nesher', Dan. iv, 33; vii, 4), Sept. and N. T. ἀετός (Matt. xxiv, 28; Luke xvii, 37; Rev. iv, 7; xii, 14). As there are many species of eagles, the *nesher*, when distinguished from others, seems to have denoted the chief species, the golden eagle, χρυσαίετος, as in Lev. xi, 13; Dent. xiv, 12. The word, however, seems to have had a broader acceptation, and, like the Greek ἀετός and Arabic *nesr* (see Bochart, *Hiéroc.* ii, 312 sq.), sometimes comprehends also a species of vulture, especially in those passages where the *nesher* is said to be bald (Mic. i, 16), and to feed on carcases (Job xxix, 27; Prov. xxx, 17; Matt. xxiv, 28), which the true eagle is disinclined to do. See **GIER-EAGLE**; **HAWK**; **OSPREY**; **OSSIFRAGE**; **VULTURE**.

1. The characteristics of the eagle referred to in the Scriptures are, its swiftness of flight (Dent. xxviii, 49; 2 Sam. i, 23; Jer. iv, 13; xlix, 22; Lam. iv, 19, etc.); its mounting high into the air (Job xxxix, 27; Prov. xxiii, 5; xxx, 19; Isa. xl, 31; Jer. xlix, 16); its strength and vigor (in Psa. ciii, 5); its predaceous habits (Job ix, 26; Prov. xxx, 17; compare *Ælian, Anim.* x, 14); its setting its nest in high places (in Jer. xlix, 16; comp. Aristotle, *Anim.* ix, 22; Pliny, x, 4); the care in training its young to fly (in Exod. xix, 4; Dent. xxxii, 11); its powers of vision (in Job xxxix, 29; comp. Homer, *Il.* xvii, 674; *Ælian, Anim.* i, 42; Isidore, *Orig.* xii, 1; Pliny, xii, 88); and its moulting (Psa. ciii, 5). As king of birds, the eagle naturally became an emblem of powerful empires (Ezek. xvii, 3, 7), especially in the symbolical figures of Babylon (Dan. vii, 4), and the cherubim (Ezek. i, 10; x, 14; Rev. iv, 7), like the *griffin* of classical antiquity. See **CREATURE, LIVING**. Eaglets are referred to in Prov. xxx, 17 as first picking out the eyes of their prey.

The following is a close translation of a graphic description of raptorial birds of this class which occurs in the book of Job (xxxix, 26-30):

By thy understanding will [the] hawk tower,  
Spread his wings southward?  
Prelance on thy bidding [the] eagle will soar,  
Or [it is then] that he will make lofty his nest?  
A rock will he inhabit, and [there] roost.  
Upon the peak of a rock, even [the] citadel:  
Thence he has spied food,  
From afar his eyes will look;  
Then his brood will sip blood;  
Ay, wherever [are the] slain, there [is] he!

To the last line in this quotation our Saviour seems to allude in Matt. xxiv, 28. "Whosoever the carcase

is, there will the eagles be gathered together;" that is, wherever the Jewish people, who were morally and judicially dead, might be, there would the Roman armies, whose standard was an eagle, and whose strength and fierceness resembled that of the king of birds, in comparison with his fellows, pursue and devour them. The *âraoi* of Matt. xxiv, 28; Luke xvii, 37, may include the *Vultur fulvus* and *Neophron percnopterus*; though, as some eagles prey upon dead bodies, there is no necessity to restrict the Greek word to the *Vulturidae* (see Lucian, *Navig.* p. 1; comp. Seneca, *Ep.* 95; Martial, vi, 62). The figure of an eagle is now, and has long been, a favorite military ensign. The Persians so employed it, which fact illustrates the passage in Isa. xlvi, 11, where Cyrus is alluded to under the symbol of an "eagle" (אֶרְבֵּי) or "ravenous bird" (compare Xenoph. *Cyrop.* vii, 4). The same bird was similarly employed by the Assyrians and the Romans. Eagles are frequently represented in Assyrian sculptures attending the soldiers in their battles, and some have hence supposed that they were trained birds. Considering, however, the wild and intractable nature of eagles, it is very improbable that this was the case. The representation of these birds was doubtless intended to portray the common feature in Eastern battle-field scenery, of birds of prey awaiting to satisfy their hunger on the bodies of the slain. These passages have been by some commentators referred to the vulture, on the assumed ground that the eagle never feeds on carrion, but confines itself to that prey which it has killed by its own prowess. This, however, is a mistake (see Forskal, *Descript. Anim.* p. 12; compare Michaelis, *Oriental. Bibl.* ix, 37 sq., and new *Oriental. Bibl.* iii, 43 sq.); no such chivalrous feeling exists in either eagle or lion; both will feed ignominiously on a body found dead. Any visitor of the British zoological gardens may see that the habit imputed is at least not invariable. (See also Thomson, *Land and Book*, i, 491.) *Aquila bifasciata*, of India, was shot by Col. Sykes at the carcass of a tiger; and *A. rapax*, of South Africa, is "frequently one of the first birds that approaches a dead animal."

Of all known birds, the eagle flies not only the highest, but also with the greatest rapidity (comp. Homer, *Il.* xxii, 308). To this circumstance there are several striking allusions in the sacred volume. Among the evils threatened to the Israelites in case of their disobedience, the prophet names one in the following terms: "The Lord shall bring a nation against thee from far, from the end of the earth, as swift as the eagle flieth" (Deut. xxviii, 49). The march of Nebuchadnezzar against Jerusalem is predicted in the same terms: "Behold, he shall come up as clouds, and his chariots as a whirlwind; his horses are swifter than eagles" (Jer. iv, 13); as is his invasion of Moab also: "For thus saith the Lord, Behold, he shall fly as an eagle, and shall spread his wings over Moab" (chap. xlviii, 40); i. e. he shall settle down on the devoted country as an eagle over its prey. (See also Lam. iv, 19; Hos. viii, 2; Hab. i, 8.)

The eagle, it is said, lives to a great age, and like other birds of prey, sheds his feathers in the beginning of spring. After this season he appears with fresh strength and vigor, and his old age assumes the appearance of youth. To this David alludes when gratefully reviewing the mercies of Jehovah, "Who satisfieth thy mouth with good things, so that thy youth is renewed like the eagle's" (Psa. ciii, 5); as does the prophet, also, when describing the renovating and quickening influences of the Spirit of God: "They that wait upon the Lord shall renew their strength; they shall mount up with wings as eagles; they shall run and not be weary; and they shall walk and not faint" (Isa. xl, 31). Some Jewish interpreters have illustrated the former passage by a reference to the old fables about the eagle being able to renew his

strength when very old (see Bochart, *Hieroz.* ii, 747). But modern commentators for the most part are inclined to think that these words refer to the eagle after the moulting season, when the bird is more full of activity than before. Others prefer Hengstenberg's explanation on Psa. ciii, 5, "Thy youth is renewed, so that in point of strength thou art like the eagle."

The passage in Mic. i, 16, "Enlarge thy baldness as the eagle," has been understood by Bochart (*Hieroz.* ii, 744) and others to refer to the eagle at the time of its moulting in the spring. Oedman (*Vermischte Samml.* i, 64) erroneously refers the baldness spoken of by the prophet to point to the *Vultur barbatus* (*Gypatus*), the bearded vulture or lammergeyer, which he supposed was bald. It appears to us to be extremely improbable that there is any reference in the passage under consideration to eagles moulting. Allusion is here made to the custom of shaving the head as a token of mourning; but there would be little or no appropriateness in the comparison of a shaved head with an eagle at the time of moulting. But if the *washer* is supposed to denote the griffon vulture (*Vultur fulvus*), the simile is peculiarly appropriate; it may be remarked that the Hebrew verb *kârach* (כָּרַח) signifies "to make bald on the back part of the head;" the notion here conveyed is very applicable to the whole head and neck of this bird, which is destitute of true feathers. The direction of the prophet is to a token of mourning, which was usually assumed by making bald the *crown* of the head; here, however, it was to be enlarged, extended, as the baldness of the eagle. Exactly answering to this idea is Mr. Bruce's description of the head of the "golden eagle;" the crown of his head was bare; so was the front where the bill and skull joined. The meaning of the prophet, therefore, seems to be that the people were not to content themselves with shaving the *crown* of the head merely, as on ordinary occasions, but, under this special visitation of retributive justice, were to extend the baldness over the entire head.

With reference to the texts referred to above, which compare the watchful and sustaining care of his people by the Almighty with that exhibited by the eagle in training its young ones to fly, especially the spirited one in Deut. xxxii, 11, 12—

"As an eagle will rouse his nest;  
Over his fledgelings will hover;  
Will spread his wings, Will take it [i. e. his brood, or each of the young];  
Will bear it upon his pinions:  
[So] Jehovah, he alone would guide him [i. e. Israel];  
And there was not with him a strange god!"—

we may quote a passage from Sir Humphrey Davy, who says, "I once saw a very interesting sight above one of the crags of Ben Nevis, as I was going in the pursuit of black game. Two parent eagles were teaching their offspring, two young birds, the manoeuvres of flight. They began by rising from the top of the mountain, in the eye of the sun. It was about mid-day, and bright for this climate. They at first made small circles, and the young birds imitated them. They paused on their wings, waiting till they had made their first flight, and then took a second and larger gyration, always rising towards the sun, and enlarging their circle of flight so as to make a gradually ascending spiral. The young ones still and slowly followed, apparently flying better as they mounted; and they continued this sublime exercise, always rising, till they became mere points in the air, and the young ones were lost, and afterwards their parents, to our aching sight." The expression in Exod. and Deut., "beareth them on her wings," has been understood by Rabbinical writers and others to mean that the eagle does actually carry her young ones on her wings and shoulders. This is putting on the words a construction which they by no means are intended to convey; at the same time, it is not improbable that

the parent bird assists the first efforts of her young by flying under them, thus sustaining them for a moment, and encouraging them in their early lessons. (Comp. *Elian, Anim.* ii, 49; *Oppian, Cynege.* iii, 115; *Jerome in Jesa.* xlvi; *Naumann, Naturgesch. d. Vögel*, i, 215; on the contrary, *Aristotle, Anim.* ix, 22.)

Finally, the eagle was an Assyrian emblem, and hence probably the reference in *Iab.* i, 8. The eagle-headed deity of the Assyrian sculptures is that of the god *Nisroch* (q. v.); and in the representations of battles trained birds of this order are frequently shown accompanying the Assyrian warriors in their attacks, and in one case bearing off the entrails of the slain. From the Assyrians the use of the eagle

Eagle flying away with the entrails of those slain in Battle.—From the Assyrian Monuments.

as a standard (q. v.) descended to the Persians, and from them probably to the Romans. See *Wemyss, Symbol. Dict.* s. v. The following scientific descriptions are chiefly from *Kitto* and *Smith*, s. v.

2. The eagle, in zoology, forms a family of several genera of birds of prey, mostly distinguished for their size, courage, powers of flight, and arms for attack. The bill is strong, and bent into a plain pointed hook, without the notch in the inner curve which characterizes falcons; the nostrils are covered with a naked coré or skin of a yellow or a blue color; the eyes are lateral, sunken, or placed beneath an overhanging brow; the head and neck covered with abundance of longish, narrow-pointed feathers; the chest broad, and the legs and thighs exceedingly stout and sinewy. Eagles, properly so called, constitute the genus *Aquila*, and have the tarsi feathered down to the toes; they are clothed in general with brownish and rust-colored feathers, and the tail is black, grey, or deep brown. Sea-eagles (genus *Haliaeetus*) have the tarsi or legs half bare and covered with horny scales; not unusually the head, back, and tail more or less white. The larger species of both measure, from head to tip of tail, 3 feet 6 inches or more, and spread their wings above 7 feet 6 inches; but these are proportionably broad to their length, for it is the third quill feather which is the longest, as if the Creator intended to restrain within bounds their rapidity of flight, while by their breadth the power of continuing on the wing is little or not at all impeded. The claws of the fore and hind toe are particularly strong and sharp; in the sea-eagles they form more than half a circle, and in length measure from  $1\frac{1}{2}$  to  $1\frac{3}{4}$  of an inch. These majestic birds have their abode in Europe, on the shores of the Mediterranean, in Syria and Arabia, wherever there are vast woody mountains and lofty cliffs; they occupy each a single district, always by pairs, excepting on the coasts, where the sea-eagle and the osprey (*Pandion haliaeetus*) may be found not remote from the region possessed by the rough-legged eagles—the first because it seeks to subsist on the industry of the second, and does not interfere with the prey of the third. It is in this last genus, most generally represented by the golden eagle (*Aquila chrysaetos*) that the most powerful and largest birds are found. That species in its more juvenile plumage, known as the ring-tailed eagle, the imperial eagle, or mogilnick (*A. heliaca*), and the booted eagle (*A. pinnata*), is found in Syria; and at least one species of the sea-eagles (the *Hal. ossifragus*, *albicollis*, or *albicaudus*) frequents the coasts, and is even of stronger wing than the others. These build usually in the cliffs of Phœnicia, while the others are more commonly domiciliated within the mountains. According to their strength and habits, the former subsist on antelopes, hares, hyrax, bustard, stork, tortoises, and serpents; and the latter usually live on

fish; both pursue the catta (*pteroles*), partridge, and lizard. The osprey alone being migratory, retires to Southern Arabia in winter. None, excepting the last mentioned, are so exclusively averse to carrion as is commonly asserted: from choice or necessity they all, but in particular the sea-eagles, occasionally feed upon carcases of horses, etc.; and it is well known in the East that they follow armies for that purpose. Hence the allusions in *Job* and *Matt.* xxiv, 28, though vultures may be included, are perfectly correct. So again are those which refer to the eagle's eyrie, fixed in the most elevated cliffs. The swiftness of this bird, stooping among a flock of wild geese with the rushing sound of a whirlwind, is very remarkable; and all know its towering flight, suspended on its broad wings among the clouds with little motion or effort. Thus the predictions, in which terrible nations coming from afar are assimilated to eagles, have a poetical and absolute truth, since there are species, like the golden, which really inhabit the whole circumference of the earth, and the nations alluded to bore eagles' wings for standards, and for ornaments on their shields, helmets, and shoulders. In the northern half of Asia, and among all the Turkish races, this practice is not entirely abandoned at this day, and eagle ensigns were constantly the companions of the dragons. China, India, Bactria, Persia, Egypt, the successors of Alexandria, the Etruscans, the Romans, the Celts, and the Arabs had eagle signa of carved work, of metal, or the skins of birds stuffed, and set up as if they were living. These, named *ayit*, a "ravenous bird," *Isa.* xlvi, 1, whence *ἀετός*, *aquila*, *eryx*, *simurg*, *humma* or *humai-on*, *karakush* (the birds of victory of different nations and periods of antiquity), were always symbolical of rapid, irresistible conquest. A black eagle was the ensign of *Kalid*, general of *Mohammed*, at the battle of *Ainadin*, and the carved eagle still seen on the walls of the citadel of *Cairo*, set up by *Karakush*, the vizier of *Salah-ed-din*, to commemorate his own name and administration, indicates a species not here enumerated. At least four distinct kinds of eagles have been observed in Palestine, viz. the golden eagle (*Aquila Chrysaetos*), the spotted eagle (*A. nevia*), the common species in the rocky districts (see *Ibis*, i, 23), the imperial eagle (*Aquila Heliaca*), and the very common *Circætos gallicus*, which preys on the numerous reptilia of Palestine (see the vernacular Arabic names of different species of *Vulturidae* and *Falconidae* in *Loche's Catalogue des Oiseaux observ. en Algérie*; and

Imperial Eagle (*Aquila Heliaca*).

in *Ibis*, vols. i, ii, *Tristram's papers on the ornithology of North Africa*). The Heb. *nesher* may stand for any of these different species, though perhaps more partic-

ular reference to the golden and imperial eagles and the griffon vulture may be intended. The *Aq. heliaca*, here figured, is the species most common in Syria, and is distinguished from the others by a spot of white feathers on each shoulder. (See the *Penny Cyclopædia*, s. v. Falconidae; Hebenstreit, *Aquila natara e S.S. historia, e historia naturali et e Monument. vet. illustrata*, Lips. 1747.) See BIRD.

EAGLE, in the Church of England, the desk or lectern from which the lessons are read is often in the form of an eagle with outspread wings. The usage is probably derived from the fact that, in ecclesiastical symbolism, the eagle is the accompanying symbol of the apostle John (see Jamieson, *Sacred and Legendary Art*, i, 137).

É'ânès (Μάρης, Vulg. *Esses*, Syr. *Mani*), a name given (1 Esdr. ix, 21) as that of a third son of Emmer (Immer); apparently in place of Harim, and his first two sons Maaseiah and Elijah of the Heb. list (Ezra x, 21). Fritzsche suggests (*Exec. Handb.* in loc.) that *kai Mários* is a mistranslation of the מָרִים, "and of the sons of," of the Heb. text, the three names following having been omitted by the Greek translator.

Ear (properly אָזן, *o'zen, o'ez*), the organ of hearing. In Scripture the term is frequently employed figuratively. To signify the regard of Jehovah to the prayers of his people, the Psalmist says, "His ears are open to their cry" (Psalm xxxiv, 15). To "uncover the ear" is a Hebraism, and signifies to show or reveal something to a person (1 Sam. xx, 2). The Psalmist, speaking in the person of the Messiah, says, "Sacrifice and offering thou didst not desire; mine ears hast thou opened" (Psa. xl, 6). Ainsworth reads, "Mine ears hast thou digged open." The Sept., which Paul follows (Heb. x, 5), reads the passage thus: "A body hast thou prepared me." "Make the ears of this people heavy," occurs in Isaiah vi, 10, that is, render their minds inattentive and disobedient: with a similar meaning, the prophet Jeremiah speaks of "ears uncircumcised" (vi, 10). Among the Jews, the slave who renounced the privilege of being made free from servitude in the sabbatical year submitted to have his ear bored through with an awl, which was done in the presence of some judge or magistrate, that it might appear a voluntary act. The ceremony took place at his master's door, and was the mark of perpetual servitude (Exod. xxi, 6). See EAR-RING.

EARS, TOUCHING THE, an ancient ceremony in the baptism of catechumens, which consisted in touching their ears and saying *Ephphatha*, "Be opened." This was joined with the imposition of hands and with exorcism, and is supposed to have signified the opening of the understanding to receive instruction on the faith. Ambrose derives the custom from our Saviour's example in saying *Ephphatha*, when he cured the deaf and dumb. The practice never became general.—Bingham, *Orig. Eccles.* bk. x, ch. ii, § 13.

EARS OF CORN (אָזן מִן הַתְּבַשְׂתִּים, *melilah*), so called from being cut off, Deut. xxiii, 25; אָזן מִן הַתְּבַשְׂתִּים, *shibbo' leth*, from its growth, Gen. xli, 5 sq.; Ruth ii, 2; Job xxiv, 24; Isa. xvii, 5; אָזן מִן הַתְּבַשְׂתִּים, *karnel'*, prop. a cultivated field, as often; hence produce or ears therefrom, i. e. *grits*, Lev. ii, 14; xxiii, 14; 2 Kings iv, 42; אָזן מִן הַתְּבַשְׂתִּים, *abib'*, green ears, Exod. ix, 31; Lev. ii, 14; ἀράχνη, Matt. xii, 1; Mark ii, 23; iv, 28; Luke vi, 1). The remarkable productiveness of the cereals in Egypt has been proverbial from the days of Joseph (Gen. xli, 47) to the present time. Jowett states, in his *Christian Researches*, that when in Egypt he plucked up at random a few stalks out of the thick grain-fields. "We counted the number of stalks which sprouted from single grains of seed, carefully pulling to pieces each root in order to see that it was one plant. The first had seven stalks, the next three, then eighteen, then fourteen.

Each stalk would bear an ear." Even greater numbers than these are mentioned by Dr. Shaw, and still more by Pliny. It also often happens that one of the stalks will bear two ears, while each of these ears will shoot out into a number of lesser ears, affording a most plentiful increase. See CORN.

Ears of Egyptian Corn: *a*, Wheat (*Triticum Sativum*); *b*, Millet (*Holcus Sorghum*).

Ear, EARING, an old English agricultural term for *ploughing*, occurs in Gen. xlv, 6; Exod. xxxiv, 21; 1 Sam. viii, 12, as a translation of the term אָרַבְתִּי (*charish'*, *ploughing*, as it is elsewhere rendered). (See *Crítica Biblica*, iii, 210.) The same now obsolete word is used by our translators in Deut. xxi, 4; Isa. xxx, 24, to represent the Heb. word אָרַבְתִּי (*abad'*, to till, as it is often elsewhere rendered). See AGRICULTURE; EGYPT. So Shakspeare says "to ear the land that has some hopes to grow" (*Richard II*, iii, 2). It is etymologically connected with the Latin *aro*, to plough. It is directly derived from the Anglo-Saxon *arian*, "to plough," and is radically the same with *harrow*. What we call *arable* land was originally written *earable* land. The root *ar* is one of wide use in all the Indo-European languages (see Müller, *Science of Language*, p. 239). See PLOUGH.

Eardley, SIR CULLING, one of the founders of the Evangelical Alliance, was born in Hatfield in 1805. He was a son of sir Culling Smith, baronet, succeeded to the baronetcy in 1829, and in 1847 assumed by royal license his maternal name of Eardley, his mother having been a daughter of the last lord Eardley. He was educated at Oxford, but did not graduate, having scruples as to subscribing the oaths administered in taking the degree of A.B. He represented Pontefract in one short Parliament previous to the Reform Bill, and in 1846 was an unsuccessful candidate for Edinburgh in opposition to lord Macaulay, sir Culling basing his claim chiefly on his opposition to the Maynooth

grant. Sir Culling greatly distinguished himself for the active part he took in the work of the Evangelical Alliance and other religious associations, and the cause of religious toleration, in particular, found in him an indefatigable and most active champion.—*Ann. Amer. Cyclopaedia* for 1863, p. 358.

**Early**, WILLIAM, a Methodist Episcopal minister, was born in New Jersey, Oct. 17, 1770; was converted at about nineteen; entered the itinerancy in 1791; was superannuated in 1821, and died in June of the same year, having preached for thirty years. His first two years in the ministry were spent as missionary to New Brunswick, where he endured much hardship in zealously laboring for his Master's cause. His after ministry in Pennsylvania, Delaware, and Maryland was very useful to the Church.—*Min. of Conferences*, i, 380.

**Early English**, a title often given to the first pointed or Gothic style of architecture in England. It is also called the Lancet Style, and also (in the nomenclature of the Ecclesiological Society) the First Pointed Style. "It succeeded the Norman towards the end of the 12th century, and gradually merged into the Decorated at the end of the 13th. It first partook of the heaviness of the Norman, but soon manifested its own beautiful and peculiar characteristics. The arches are usually equilateral and lancet-shaped; the doorways are often divided into two by a single shaft or small pier; the windows are long and narrow, and, when gathered into a group, are frequently surmounted by a large arch, which springs from the extreme moulding of the window on each side. The space between this arch and the tops of the windows is often pierced with circles, or with trefoils or quatrefoils, which constituted the earliest form of tracery. Each window, however, is generally destitute of any tracery in itself" (Chambers, s. v.) The mouldings, says Parker, in general consist of alternate rounds and deeply-cut hollows, with a small admixture of fillets,

Hargrave, cir. A.D. 1260  
(Parker).

producing a strong effect of light and shadow. "Circular windows were more used in England during the prevalence of this style than in either the decorated or perpendicular, and fine specimens remain at York and Lincoln cathedrals, and at Beverley Minster. Groined ceilings are very common in this style; in general they have only cross springers and diagonal ribs, with sometimes longitudinal and diagonal ribs at the apex of the vaults, and good bosses of foliage at the intersections. The pillars usually consist of small shafts arranged round a larger circular pier, but others of different kinds are to be found, and a plain octagonal or circular pillar is common in country churches. The capitals consist of plain mouldings, or are enriched with foliage and sculpture characteristic of the style. The most prevalent base has a very close resemblance to the Attic base of the ancients, though the proportions are different, and the lower torus is worked with a considerably larger projection. The buttresses are often very bold and prominent, and are frequently carried up to the top of the building with but little diminution, and terminate in acutely-pointed peditments,

Chapter House, Southwell, cir.  
A. D. 1220 (Parker).

Westminster Abbey, cir. A.D. 1250 (Parker).

which, when raised above the parapet, produce in some degree the effect of pinnacles. Flying buttresses were first introduced in this style. Pinnacles are but sparingly used, and only towards the end of the style. The roofs appear always to have been high-pitched. The ornaments used in this style are by no means so various as in either of the others; occasionally small roses or other flowers, and bunches of foliage, are carved at intervals in the hollow mouldings, but by far the most common and characteristic is the toothed ornament, which is often introduced in great profusion, and the hollows entirely filled with it. The foliage is very remarkable for boldness of effect, and it is often so much undercut as to be connected with the mouldings only by the stalks and edges of the leaves; there is frequently considerable stiffness in the mode in which it is combined, but the effect is almost always good; the prevailing leaf is a trefoil. Towards the latter part of the style crockets were first introduced. The style may be said to begin in the later half of Richard the First's reign, about which time St. Hugh began his cathedral. During the reign of king John the Early English style had obtained the complete mastery; but the reign of Henry III was the great period of the Early English style, which had now obtained perfection. That king himself and his brother Richard were great builders. The most perfect example of the style is perhaps Salisbury Cathedral. Towards the end of the reign we have examples, such as the presbytery of Lincoln and the chapter-house of Salisbury, of what may be almost called the Decorated style, though the mouldings and many of the details are pure Early English. This kind of work may best be called Transitional."—Parker, *Glossary of Architecture*, s. v. See ARCHITECTURE.

**Earnest**. Ἀρραβών is evidently the Hebrew עֲרָבֹן (*erabon*), a pledge in Greek characters. It is a mercantile term which the Greeks and Romans appear to have adopted from the Phœnicians (kindred in dialect with the Hebrews) as the founders of commerce. With a slight alteration in the letters, but with none whatever in the sense, it becomes the Latin *arrabona*, contr. *arrha*; French *arres*; English *earles* (in the old English expression *Earl's* or *Arl's* money) and *earnest*. These three words occur in the Heb., Sept., and Vulg. in Gen. xxxviii, 17, 18, and in ver. 20, with the exception that the Vulg. there changes it to *pignus*. The use of these words in this passage clearly illustrates their general import, which is that of an earnest or pledge, given and received, to assure the fulfilment of an engagement. Hesychius explains *ἀρραβών* by *πρόδομα*, something given beforehand. The Hebrew word was used generally for *pledge* (Gen. xxxviii, 17), and in its cognate forms for *surety* (Prov. xvii, 18) and

*hostage* (2 Kings xiv, 14). The Greek derivative, however, acquired a more technical sense, as signifying the *deposit* paid by the purchaser on entering into an agreement for the purchase of anything (Suid. *Lex. s. v.*) This idea attaches to all the *particular* applications of the word, as anything given by way of warrant or security for the performance of a promise; part of a debt paid as an assurance of paying the remainder; part of the price of anything paid beforehand to confirm the bargain between buyer and seller; part of a servant's wages paid at the time of hiring, for the purpose of ratifying the engagement on both sides. The idea that the earnest is either to be returned upon the fulfilment of the engagement, or to be considered as part of the stipulation, is also included. A similar legal and technical sense attaches to *earnest*, the payment of which places both the vendor and purchaser in a position to enforce the carrying out of the contract (Blackstone, ii, 30). The payment of earnest-money under the name of *arrabon* is still one of the common occurrences of Arab life. Similar customs of paying down at the time of a contract "something to bind the bargain" have prevailed among all nations. (See Smith's *Dictionary of Class. Antiq. s. v. Arrha.*) See BARGAIN.

The word is used three times in the New Testament, but always in a figurative sense: in the first (2 Cor. i, 22) it is applied to the *gifts* of the Holy Spirit which God bestowed upon the *apostles*, and by which he might be said to have hired them to be the servants of his Son; and which were the earnest, assurance, and commencement of those far superior blessings which he would bestow on them in the life to come as the wages of their *faithful* services: in the two latter (2 Cor. v, 5; Ephes. i, 13, 14) it is applied to the gifts bestowed on *Christians generally* upon whom, after baptism, the apostles laid their hands, and which were to them an *earnest* of obtaining a heavenly habitation and inheritance, upon the supposition of their fidelity. This use of the term finely illustrates the augmented powers and additional capacities promised in a future state. Jerome, in his comment on the second passage, exclaims, "Si arrhabo tantus, quanta erit possessio—If the earnest was so great, how great must be the possession!" (See Kype, Macknight, and Middleton on these passages; Le Moine, *Not. ad Yar. Sacr.* p. 460-480.) In a spiritual sense, it denotes those gifts and graces which the Christian receives as the earnest and assurance of perfect happiness in a future world. (See Clauswitz, *De Arrhabone*, Halle, 1747; Winzer, *Comment. in loc.* Lips. 1836; Schulthess, in Keil and Tschirner's *Analekten*, II, i, 215 sq.) There is a marked distinction between *pledge* and *earnest* in this respect, that the latter is a *part-payment*, and therefore implies the *identity* in kind of the deposit with the future full payment; whereas a pledge may be something of a totally different nature, as in Gen. xxxviii, to be resumed by the depositor when he has completed his contract. Thus the expression "*earnest of the Spirit*" implies, beyond the idea of security, the *identity* in kind, though not in degree, and the *continuity* of the Christian's privileges in this world and in the next. Moreover, a pledge is taken back when the promise which it guaranteed is fulfilled; but whatever is given as earnest, being a part in advance of the whole, is of course retained. See PLEDGE.

**Ear-ring** stands in the Auth. Vers. as the rendering of three Heb. words of considerably different import. See RING.

1.  $\text{אָגִיל}$  (*agil'*, from its *roundness*), properly a *ring*, specially an *ear-ring* (Num. xxxi, 50; Ezek. xvi, 12), nearly all the ancient ear-rings exhibited in the sculptures of Egypt and Persepolis being of a circular shape. These are the *ἐνώτια* spoken of in Judith x, 4.

2.  $\text{נֶזֶם}$  (*ne'zem*, either from its *perforating*, or from its use to *muzzle* in the case of animals), a *ring*, spe-

cially a *nose-ring*, but also an *ear-ring*, which two do not seem, therefore, to have materially differed in form. It most certainly denotes an ear-ring in Gen. xxxv, 4; but in Gen. xxiv, 47; Prov. xi, 22; Isa. iii, 21, it signifies a nose-jewel, and it is doubtful which of the two is intended in Judg. viii, 24, 25; Job xlii, 11. See WOMAN. Hence also we find

3.  $\text{שִׁשְׁבִּיט}$  (*luck'ash*, properly a *whispering* or *incantation*), a *charm* or remedy against enchantment, i. e. a superstitious ornament, often a gem inlaid in a plate or ring of precious metal, on which certain magic formulas were inscribed, and which was worn suspended from the neck or in the ears of Oriental females (Isa. iii, 20). See ENCHANTMENT.

The "collars" or "chains" spoken of in Judg. viii, 26; Isa. iii, 19, may also have been a species of ear-drop. See those terms.

No conclusion can be formed as to the shape of the Hebrew ear-rings except from the signification of the words employed, and from the analogy of similar ornaments in ancient sculpture. The word  $\text{אָגִיל}$ , by which these ornaments are usually described, is unfortunately ambiguous, originally referring to the nose-ring (as its root indicates), and thence transferred to the ear-ring. The full expression for the latter is  $\text{אָגִיל אָזְנוֹתַי}$  (Gen. xxxv, 4), in contradistinction to  $\text{אָגִיל אָזְנוֹתַי}$  (Gen. xxiv, 47). In the majority of cases, however, the kind is not specified, and the only clew to the meaning is the context. The term occurs in this undefined sense in Judg. viii, 24; Job xlii, 11; Prov. xxv, 12; Hos. ii, 13. The material of which the ear-ring was made was generally gold (Exod. xxxii, 2), and its form circular, as we may infer from the name  $\text{אָגִיל}$ , by which it is described (Num. xxxi, 50; Ezek. xvi, 12): such was the shape usual in Egypt (Wilkinson's *Egyptians*, iii, 370). They were worn by women and by youth of both sexes (Exod. i. c.). It has been inferred from the passage quoted, and from Judg. viii, 24, that they were not worn by men: these passages are, however, by no means conclusive. In the former an order is given to the men in such terms that they could not be mentioned, though they might have been implicitly included; in the latter the *amount of the gold* is the peculiarity adverted to, and not the character of the ornament, a peculiarity which is still noticeable among the inhabitants of southern Arabia (Wellsted's *Travels*, i, 321). The mention of the *sons* in Exod. xxxii, 2 (which, however, is omitted in the Sept.), is in favor of their having been worn, and it appears unlikely that the Hebrews presented an exception to the almost universal practice of Asiatics, both in ancient and modern times. That they were not, however, usually worn by men is implied in Judg.

Ancient Oriental Ear-rings.

xiv, 24, where gold ear-rings are mentioned as distinctive of the Ishmaelitish tribes. The men of Egypt also abstained from the use of ear-rings; but how extensively they were worn by men in other nations is shown by the preceding group of heads of different foreigners, collected from the Egyptian monuments. By this also the usual forms of the most ancient ornaments of this description are sufficiently displayed. Those worn by the Egyptian ladies were large, round, single hoops of gold, from one inch and a half to two inches and one third in diameter, and frequently of still greater size, or made of six single rings soldered together. Such probably was the round *agil* of the Hebrews. Among persons of high or royal rank the ornament was sometimes in the shape of an asp, whose body was of gold set with precious stones. Silver ear-rings have also been found at Thebes, either plain hoops like the ear-rings of gold, or simple studs. The

Ancient Egyptian Ear-rings.

ancient Assyrians, both men and women, wore ear-rings of exquisite shape and finish, especially the kings, and those on the later monuments are generally in the form of a cross (Layard, *Nineveh*, ii, 234, 250).

Ancient Assyrian Ear-rings.

Lane thus describes those now worn by Egyptian females: "Of ear-rings (*halak*) there is a great variety. Some of the more usual kinds are here represented. The first is of diamonds set in silver. It consists of a drop suspended within a wreath hanging from a sprig. The back of the silver is gilt, to prevent its being tarnished by perspiration. The specimen here given is that for the right ear; its fellow is similar,

Modern Egyptian Ear-rings (each one half the real size).

but with the sprig reversed. This pair of ear-rings is suited for a lady of wealth; so also is the second, which resembles the former, excepting that it has a large pearl in the place of the diamond drop and wreath, and that the diamonds of the sprig are set in gold. No. 3 is a side view of the same. The next consists of gold, and an emerald pierced through the middle, with a small diamond above the emerald. Emeralds are generally pierced in Egypt, and spoiled by this process as much as by not being cut with facets. The last is of gold, with a small ruby in the centre. The ruby is set in fine filigree-work, which is surrounded by fifteen balls of gold. To the seven lower balls are suspended as many circular *bark*' (*Mod. Eg. ii, 404*). The modern Oriental ear-rings are more usually jewelled drops or pendants than circlets of gold, but sometimes they consist of a small round plate of silver or gold suspended from a small ring inserted into the ear (*Kitto, Pict. Bible*, note on Exod. xxxii, 2). This circular plate (about the size of a halfpenny) is either marked with fanciful figures or set with small stones. It is the same kind of thing which in that country (Mesopotamia) is worn as a nose-jewel, and in it we perhaps find the Hebrew ear-ring, which is denoted by the same word that describes a nose-jewel. Jewels were sometimes attached to the rings: they were called  $\text{רִיבִּיבִּיבִּי}$  (from  $\text{רָבַב}$ , to drop), a word rendered in *Judg.* viii, 26, Sept.  $\text{\rho\acute{o}\mu\mu\sigma\kappa\omicron\iota}$ , Vulg. *monilia*, A.V. "collars;" and in *Isa.* iii, 19,  $\text{\kappa\acute{\alpha}\theta\eta\mu\alpha}$ , *torques*, "chains." The size of the ear-rings still worn in Eastern countries far exceeds what is usual among ourselves (*Harmer's Observations*, iv, p. 311, 314), hence they formed a handsome present (*Job* xlii, 11) or offering to the service of God (*Num.* xxxi, 50). See **JEWEL**.

The ear-ring appears to have been regarded with superstitious reverence as an amulet: thus it is named in the Chaldee and Samaritan versions  $\text{רִיבִּיבִּיבִּי}$ , a holy thing; and in *Isa.* iii, 20 the word  $\text{רִיבִּיבִּיבִּי}$ , prop. *amulets*, is rendered in the A.V., after the Sept. and Vulg., *ear-rings*. On this account they were surrendered along with the idols by Jacob's household (*Gen.* xxxv, 4). Chardin describes ear-rings, with talismanic figures and characters on them, as still existing in the East (*Brown's Antiquities*, ii, 305). See **AMULET**.

**Ears.** See **EAR**.

**Earth**, properly the name of the planet on which we dwell. See **GEOGRAPHY**.

1. There are two Hebrew words thus rendered in the A.V., both of which are rendered by  $\text{\gamma\eta}$  in the Sept., and this  $\text{\gamma\eta}$  is rendered by "earth," "land," "ground," in the New Testament. See also **DUST**.

1.  $\text{אֲדָמָה}$ , *adamah*, is the earth in the sense of soil or ground, particularly as being susceptible of cultivation; hence the expression  $\text{אֲדָמָה אֲרִישׁ}$ , lit. "man of the ground," for an agriculturist (*Gen.* ix, 20). The earth supplied the elementary substance of which man's body was formed, and the terms *adam* and *adamah* are brought into juxtaposition, implying an etymological connection (*Gen.* ii, 7). See **ADAM**. The opinion that man's body was formed of earth prevailed among the Greeks (*Hesiod, Op. et Di.* 61, 70; *Plato, Rep.* p. 269), the Romans (*Virgil, Georg.* ii, 341; *Ovid, Met.* i, 82), the Egyptians (*Diod. Sic.* i, 10), and other ancient nations. It is evidently based on the observation of the material into which the body is resolved after death (*Job* x, 9; *Ecc.* xii, 7). The law prescribed earth as the material out of which altars were to be raised (*Exod.* xx, 24); *Bähr (Symb.* i, 488) sees in this a reference to the name *adam*: others, with more reason, compare the *ara de cespite* of the Romans (*Ovid, Trist.* v, 5, 9; *Horace, Od.* iii, 8, 4, 5), and view it as a precept of simplicity. Naaman's request for two mules' burden of earth

(2 Kings v, 17) was based on the idea that Jehovah, like the heathen deities, was a local god, and could be worshipped acceptably only on his own soil. See GROUND.

2. More generally  $\text{אֶרֶץ}$ , *erets*, which is explained by Von Bohlen (*Introduct. to Gen.* ii, 6) as meaning etymologically the *low* in opposition to the *high*, i. e. the heaven. It is applied in a more or less extended sense: 1, to the whole world (Gen. i, 1); 2, to land as opposed to sea (Gen. i, 10); 3, to a country (Gen. xxi, 32); 4, to a plot of ground (Gen. xxiii, 15); and, 5, to the ground on which a man stands (Gen. xxxiii, 3); also, in a more general view, 6, to "the inhabitants of the earth" (Gen. vi, 11; xi, 1); 7, to *heathen countries*, as distinguished from the land of Israel, especially during the theocracy; i. e. all the rest of the world excepting Israel (2 Kings xviii, 25; 2 Chron. xiii, 9, etc.); particularly the empire of Chaldea and Assyria (Ezra i, 2); 8, in the New Testament especially, "the earth" appears in our translation as applied to the land of Judæa. As in many of these passages it might seem as if the habitable globe were intended, the use of so ambiguous a term as "the earth" should have been avoided, and the original rendered by "the land," as in Lev. xxv, 23; Isa. x, 23, and elsewhere. This is the sense which the original bears in Matt. xxiii, 35; xxvii, 45; Mark xv, 33; Luke iv, 25; xxi, 23; Rom. ix, 28; James v, 17. 9. Finally, in a spiritual sense, the word is employed (in the N. T.) in contrast with heaven, to denote things earthly and carnal (John iii, 31; Colos. iii, 1, 2). See Wemyss, *Symbol. Dict.* s. v.; comp. WORLD.

To demand earth and water was a custom of the ancient Persians, by which they required a people to acknowledge their dominion; Nebuchodonosor, in the Greek of Judith (ii, 7), commands Holofernes to march against the people of the West, who had refused submission, and to declare to them that they were to prepare earth and water. Darius ordered his envoys to demand earth and water of the Scythians; and Megabysus required the same of Amyntas, king of Macedonia, in the name of Darius. Polybius and Plutarch notice this custom among the Persians. Some believe that these symbolical demands denoted dominion of the earth and sea; others, that the earth represented the food received from it, corn and fruits; the water, drink, which is the second part of human nourishment. Ecclus. xv, 16, in much the same sense, says, "The Lord hath set fire and water before thee; stretch forth thy hand unto whether thou wilt; and ch. xxxix, 26, "Fire and water are the most necessary things to life." Fire and water were considered by the ancients as the first principles of the generation, birth, and preservation of man. Proscribed persons were debarred from their use; as, on the contrary, wives in their nuptial ceremonies were obliged to touch them. See ELEMENT.

II. The idea which the ancient Hebrews had of the figure of the earth can only be conjectured from incidental hints occasionally given in Scripture (Isa. xl, 22; Prov. viii, 27; Job xxvi, 10; Psa. xxiv, 2; cxxxvi, 6). From these passages, taken together, says Rosenmüller (*Alterthumsk.* I, i, 133 sq.), we obtain the notion of the earth's disk as circular, rising out of the water, and surrounded with the ocean, the heaven being spread over it as a canopy. Though floating free in the boundless immensity of space, yet, through the Creator's might, it remains firmly fixed, without moving (1 Chron. xvii, 30; Psa. xciii, 1; civ, 5; cxix, 90). It is rather inconclusive, however, to infer the popular notions of the earth's figure from what may have been nothing more than the bold imagery of poets. Some have supposed that so long as the Hebrews were a nomadic race, they conceived of the earth as resembling a round tent, with the expanse as its covering; but that in later times, when domiciled in Palestine, they

spoke of it as a splendid palace resting upon its many pillars (2 Sam. xxii, 8; Psa. lxxxv, 3; civ, 5; Prov. viii, 25-29). The Greek and Roman writers (Hesiod, *Theogn.* 116 sq.; Ovid, *Metam.* i, 5 sq.; comp. Euseb. *Præp. Ev.* i, 10 [Sanchoniathon, ed. Orelli, p. 9 sq.]; Zendavesta, i, 170 sq.) also vary in their representations on this point, describing the earth sometimes as an oblong square, sometimes as a cube, sometimes as a pyramid, sometimes as a *chlamys*, or outspread mantle. (See Eichhorn, *Urgesch.* ed. Gabler, Nürnberg, 1790; Döderlein *Rel.-Unterr.* vii, 59 sq.; Beck, *Weltgesch.* i, 99 sq.; Bauer, *Hebr. Mythol.* i, 63 sq.; De Wette, *Bibl. Dogm.* p. 76 sq.; Baumgarten-Crusius, *Bibl. Theolog.* p. 264 sq.; Colln, *Bibl. Theol.* i, 166; Mignet, in the *Mémoires de l'Acad. des Inscr.* xxxiv, 352 sq.; Anquetil, *Oupnekhat*, i, 409 sq.; Johannsen, *Die kosmog. Ansichten d. Indier u. Hebr.* Altona, 1833; Dornedden, in Eichhorn's *Bibl.* x, 284 sq., 548 sq.; Gessner, in the *Commentt. Soc. Goett.* vol. ii; Corrodi, *Leitr. zum vern. Denken*, xviii, 15 sq.; Link, *Urcelt*, i, 268 sq.; Wagner, *Geschichte d. Urgesch.* p. 496 sq.; Umbreit, in the *Stud. u. Kritiken*, 1839, p. 189 sq.; Ballenstedt, *Die Urvwelt*, 3d ed. Quedlinb. 1819; Von Schrank, *Physik.-theolog. Erklär. der 6 Schöpfungstage*, Augsburg, 1829; Beke, *Researches in Primeval History*, London, 1834; Burton, *View of the Creation*, London, 1836; Tholuck, *Litær. Anzeig.* 1833, No. 67-78; Keil, *apologia Mos. traditionis*, Dorpat, 1839; Benner, *De censura Longini in verba Gen. i, 3*, Giess. 1759; Burmeister, *Gesch. d. Schöpfung*, Lips. 1843; Waterkeyn, *Kosmos Hieros* Grimma, 1846; Goguet, *Urspr. d. Gesetze*, ii, 227.) See COSMOGONY.

**Earthen VESSEL** or **EARTHENWARE**. See POTTERY.

**Earthquake** (אֶרֶץ רָעָה, *ra'ash*, a shaking, σεισμός).

The proximate cause of earthquakes, though by no means accurately defined, seems referable to the action of internal heat or fire. That the earth was once subject to the action of a vast internal power springing probably from the development of subterranean or central heat, the elevations and depressions, and the generally scarred and torn character of its exterior make sufficiently evident. A power similar in kind, but more restricted in degree, is still at work in the bowels of the earth, and occasionally breaks down all barriers and devastates certain parts of the world. There is good reason for holding that earthquakes are closely connected with volcanic agency. Both probably spring from the same cause, and may be regarded as one mighty influence operating to somewhat dissimilar results. Volcanic agency, therefore, is an indication of earthquakes, and traces of the first may be taken as indications of the existence (either present or past, actual or possible) of the latter. (See Hitchcock's *Geology*, p. 234 sq.) The manifestation of these awful phenomena is restricted in its range. Accordingly, geologists have laid down certain volcanic regions or bands within which this manifestation takes place. Over these regions various traces of volcanic agency are found, such as either gaseous vapors, or hot springs, or bituminous substances, and in some instances (occasionally) active volcanoes. Several sources of bitumen are found on the Tigris, in the Persian mountains, near the Kharun, and at Bushire, as well as along the Euphrates. At Hit, especially, on the last-mentioned river, it exists on a very large scale, and, having been much used from the earliest times, seems inexhaustible. Abundant traces of it are also to be seen amid the ruins and over the entire vicinity of Hillah, the ancient Babylon. Syria and Palestine abound in volcanic appearances. Between the river Jordan and Damascus lies a volcanic tract. The entire country about the Dead Sea presents indubitable tokens of volcanic agency. Accordingly, these places come within one of the volcanic regions. The chief of these are, (1) that which extends from the Caspian

Sea to the Azores; (2) from the Aleutian Isles to the Moluccas; (3) that of the Andes; (4) the African; (5) the Icelandic. Syria and Palestine are embraced within the first band, and these countries have not infrequently been subject to earthquakes. (See Stanley, *Palest.* p. 279, 283, 285, 363; Volney, *Trav.* i, 281; Kussenger, *Reisen*, p. 205). See PALESTINE.

That earthquakes were among the extraordinary phenomena of Palestine in ancient times is shown in their being an element in the poetical imagery of the Hebrews, and a source of religious admonition and devout emotion. An earthquake, when great, overturns and changes the surface of the earth, subverting mountains, hills, and rocks, sinking some parts, elevating others, altering the course of rivers, making ponds and lakes on dry lands, and drying up those that already existed; and is therefore a proper symbol of *great revolutions* or changes in the government or political world (Heb. xii, 26). See Wemyss, *Symbolical Dict.* s. v. In Psalm xviii, 7, we read, "Then the earth shook and trembled; the foundations also of the hills moved and were shaken, because he was wroth" (comp. Hab. iii, 6; Nah. i, 5; Isa. v, 25). It was not an unnatural transition that any signal display of the will, sovereignty, or goodness of Providence should be foretold in connection with, and accompanied as by other signs in the heavens above or on the earth below, so by earthquakes and their fearful concomitants (see Joel ii, 28; Matt. xxiv, 7, 29). Earthquakes are not infrequently attended with fissures of the earth's surface; instances of this are recorded in connection with the destruction of Korah and his company (Num. xvi, 32; comp. Josephus, *Ant.* iv, 3, 3), and at the time of our Lord's death (Matt. xxvii, 51); the former may be paralleled by a similar occurrence at Oppido, in Calabria, A. D. 1783, where the earth opened to the extent of 500 and a depth of more than 200 feet, and again by the sinking of the bed of the Tagus at Lisbon, in which the quay was swallowed up (Pfaff, *Schwüpfungsgesch.* p. 115). These depressions are sometimes on a very large scale; the subsidence of the valley of Siddim, at the southern extremity of the Dead Sea, may be attributed to an earthquake. Similar depressions have occurred in many districts, the most remarkable being the submersion and subsequent re-elevation of the temple of Serapis at Puteoli. The frequency of earthquakes about the Dead Sea is testified in the name Bela (Gen. xiv, 2; comp. Jerome ad Isa. xv). See SODOM. The awe which an earthquake never fails to inspire, "conveying the idea of some universal and unlimited danger" (Humboldt's *Kosmos*, i, 212), rendered it a fitting token of the presence of Jehovah (1 Kings xix, 11); hence it is frequently noticed in connection with his appearance (Judg. v, 4; 2 Sam. xxii, 8; Psa. lxxvii, 18; xevii, 4; eiv, 32; Amos viii, 8; Hab. iii, 10). Earthquakes, together with thunder, lightning, and other fearful phenomena of nature, form no small portion of the stock of materials which the interpreters of the German rationalistic school employ with no less liberality than confidence in order to explain after their manner events recorded in the Scriptures which have been commonly referred to the immediate agency of God. Hezel, Paulus, and other miracle-exploders would, but for this resource, find their "occupation gone." But, if there is reason for the statement that truth is sometimes stranger than fiction, it may with equal propriety be observed that their "natural" causes are most unnatural, unlikely, and insufficient. See MIRACLES.

The first visitation of the kind recorded as having happened to Palestine was in the reign of Ahab (about B. C. 905), when Elijah (1 Kings xix, 11, 12) was directed to go forth and stand upon the mountain before Jehovah: "And behold Jehovah passed by, and a great and strong wind rent the mountains, and brake in pieces the rocks before Jehovah; but Jehovah was not in the wind: and after the wind an earthquake; but

Jehovah was not in the earthquake: and after the earthquake a fire; but Jehovah was not in the fire: and after the fire a still small voice." A terrible earthquake took place "in the days of Uzziah, king of Judah" (B. C. 781), which Josephus (*Ant.* ix, 10, 4) says "shook the ground, and a rent was made in the Temple, so that the rays of the sun shone through it, which, falling upon the king's face, struck him with the leprosy," a punishment which the historian ascribes to the wrath of God consequent on Uzziah's usurpation of the priest's office. That this earthquake was of an awful character may be learned from the fact that Zechariah (xiv, 5) thus speaks respecting it: "Ye shall flee as ye fled from before the earthquake in the days of Uzziah, king of Judah:" and it likewise appears from Amos (i, 1) that the event was so striking, and left such deep impressions on men's minds, as to become a sort of epoch from which to date and reckon; the prophet's words are, "two years before the earthquake." See UZZIAH. From Zech. xiv, 4 we are led to infer that a great convulsion took place at this time in the Mount of Olives, the mountain being split so as to leave a valley between its summits. Josephus records something of the sort, but his account is by no means clear, for his words (*τὸ ὄρος ἀπορύγνυται τὸ ἕμισυ τοῦ κατὰ τὴν ὄσσαν*) can hardly mean the *western half of the mountain*, as Whiston seems to think, but the *half of the western mountain*, i. e. of the Mount of Evil Counsel, though it is not clear why this height particularly should be termed the *western mountain*. We cannot but think that the two accounts have the same foundation, and that the Mount of Olives was really affected by the earthquake. Hitzig (*Comm. in Zech.*) suggests that the name *רֶמְסֵס*, "corruption," may have originated at this time, the rolling down of the side of the hill, as described by Josephus, entitling it to be described as the *destroying mountain*, in the sense in which the term occurs in Jer. li, 25. See AZAL.

The only important or clear earthquake mentioned in the New Testament (except the doubtful one of Matt. xxviii, 2) is that which happened at the crucifixion of the Saviour of mankind (Matt. xxvii, 50-1; comp. Luke xxiii, 44-5; Mark xv, 33). The concomitant darkness is most naturally held to have been attendant on the earthquake. Earthquakes are not seldom attended by accompaniments which obscure the light of day during (as in this case from the sixth to the ninth hour, that is, from 12 o'clock at noon to 3 o'clock P. M.) several hours. If this is the fact, then the record is consistent with natural phenomena, and the darkness which sceptics have pleaded against speaks actually in favor of the credibility of the Gospel. Now it is well known to naturalists that such observations are by no means uncommon. It may be enough to give the following instances. A very remarkable volcanic eruption took place on the 19th of January, 1835, in the volcano of Coseguina, situated in the Bay of Fonseca (usually called the coast of Conchagua), in Central America. The eruption was preceded by a rumbling noise, accompanied by a column of smoke which issued from the mountain, increasing until it assumed the form and appearance of a large dense cloud, which, when viewed at the distance of thirty miles, appeared like an immense plume of feathers, rising with considerable velocity, and expanding in every direction. In the course of the two following days several shocks of earthquakes were felt; the morning of the 22d rose fine and clear, but a dense cloud of a pyramidal form was observed in the direction of the volcano. This gradually ascended, and by 11 o'clock A. M. it had spread over the whole firmament, entirely obscuring the light of day, the darkness equaling in intensity that of the most clouded night: this darkness continued with little intermission for three days; during the whole time a fine black pow-

der continued to fall. This darkness extended over half of Central America. The convulsion was such as to change the outline of the coast, turn the course of a river, and form two new islands. Precisely analogous phenomena were exhibited on occasions of earthquakes that took place at Cartago, in Central America, when there prevailed a dense black fog, which lasted for three days (*Recreations in Physical Geography*, p. 382). In the case of the volcanic eruption which overwhelmed Herculaneum and Pompeii (A. D. 79), we learn from the younger Pliny that a dense column of vapor was first seen rising vertically from Vesuvius, and then spreading itself out laterally, so that its upper portion resembled the head, and its lower the trunk of a pine. This black cloud was pierced occasionally by flashes of fire as vivid as lightning, succeeded by darkness more profound than night, and ashes fell even at Misenum. These appearances agree perfectly with those witnessed in more recent eruptions, especially those of Monte Nuovo in 1538, and Vesuvius in 1822. Indeed earthquakes appear to exert a very marked influence on our atmosphere; among other effects, Lyell (*Principles of Geology*, i, 400) enumerates sudden gusts of wind, interrupted by dead calms; evolution of electric matter or of inflammable gas from the soil, with sulphureous and mephitic vapors; a reddening of the sun's disk, and a haziness in the air often continued for months (Joel ii, 30, 31). Other interpreters, however, understand the earthquake in Matt. xxvii, 54 to have been merely some special and supernatural operation of God, in attestation of the marvellous work that was in progress, producing a tremulous motion in the immediate locality, and in connection therewith a sensible consternation in the minds of the immediate actors; hence there is no other historical allusion to it. This view is confirmed by its being in the second case connected with the angel's descent (Matt. xxviii, 2; comp. 1 Sam. xiv, 15). Like the one that occurred at Philippi (Acts xvi, 16), it is perhaps to be regarded as a somewhat exceptional phenomenon, wrought for a specific purpose, and consequently very limited as to its sphere of action. Nor does it appear from any notices of Scripture that the phenomena of earthquakes, in the ordinary and extensive sense of the term, played more than a very occasional and subordinate part in the scenes and transactions of sacred history. Treatises in Latin on the earthquake at our Saviour's passion have been written by Berger (Viteb, 1710), Posner (Jen. 1672), Schmerbauch (Lubben, 1756), Schmid (Jen. 1683). See DARKNESS.

An earthquake devastated Judæa some years (31) before the birth of our Lord, at the time of the battle of Actium, which Josephus (*Ant.* xv, 52) reports was such "as had not happened at any other time, which brought great destruction upon the cattle in that country. About ten thousand men also perished by the fall of houses." Jerome writes of an earthquake which, in the time of his childhood (about A. D. 315), destroyed Rabbath Moab (Jerome on *Isaiah*, xv). The writers of the Middle Ages also speak of earthquakes in Palestine, stating that they were not only formidable, but frequent. In 1834 an earthquake shook Jerusalem, and injured the chapel of the nativity at Bethlehem. In 1837 (Jan. 1) Jerusalem and its vicinity were visited by severe shocks of earthquake, yet the city remains without serious injury from these subterranean causes. This last earthquake totally overthrew the village of Safed, in Galilee (Thomson, *Land and Book*, i, 128 sq.). For a full account of these and others, affecting various parts of Syria, see Kitto, *Phys. Hist. of Palest.* vol. ii, ch. iv. Comp. Bulenger, in Graevii *Thesaur.* v, 515 sq.; Forbiger, *Handb. d. alt. Geogr.* i, 636 sq.

**East** is the rendering of the following terms in the English Bible. See GEOGRAPHY.

1.  $\text{מִצְרָח}$ , *mizrach*, properly denotes the *rising*, sc.

of the sun, and strictly corresponds with the Gr. *ἀνατολή*, and the Lat. *oriens*. It is used tropically for the east indefinitely (Psa. ciii, 12; Dan. viii, 9; Amos viii, 12, etc.); also definitely for some place in relation to others, thus, "The land of the east," i. e. the country lying to the east of Syria, the Elymais (Zech. viii, 7); "the east of Jericho" (Josh. iv, 19); "the east gate" (Neh. iii, 29), and adverbially "eastward" (1 Chron. vii, 28; ix, 24, etc.). Sometimes the full expression  $\text{שֶׁלֹּם־רִיבֹן־הַשָּׁמֶשׁ}$ , *sun-rise*, is used (indefinitely, Isa. xli, 25; definitely, Judg. xi, 18). See below.

2.  $\text{קִדְמָה}$ , *ke'dem* (with its modifications), properly means *what is in front of, before* (comp. Psa. cxxxix, 5; Isa. ix, 11 [12]). As the Hebrews, in pointing out the quarters, looked towards the east,  $\text{קִדְמָה}$ , *fore*, came to signify the east,  $\text{אֲחֵרָה}$ , *behind*, the west, and  $\text{יְמִינָה}$ , *the right hand*, the south. In this sense *kedem* is used (a) indefinitely, Gen. xi, 2; xiii, 11, etc.; (b) relatively, Num. xxvii, 11, etc.; (c) definitely, to denote the regions lying to the east of Palestine (Gen. xxix, 1; Num. xxiii, 7; Isa. ix, 11; sometimes in the full form,  $\text{אֶרֶץ־קִדְמָה}$ , "land of the east" (Gen. xxv, 6), the inhabitants of which are denominated  $\text{בְּנֵי־קִדְמָה}$ , "children of the east." See BENE-KEDEM.

Sometimes *kedem* and *mizrach* are used together (e. g. Exod. xxvii, 13; Josh. xix, 12), which is, after all, not so tautological as it appears to be in our translation "on the east side eastward." Bearing in mind this etymological distinction, it is natural that *kedem* should be used when the *four* quarters of the world are described (as in Gen. xiii, 14; xxviii, 14; Job xxiii, 8, 9; Ezek. xlvii, 18 sq.), and *mizrach* when the east is only distinguished from the *west* (Josh. xi, 3; Psa. l, 1; ciii, 12; cxiii, 3; Zech. viii, 7), or from some other one quarter (Dan. viii, 9; xi, 44; Amos viii, 12); exceptions to this usage occur in Psa. cvii, 3, and Isa. xliii, 5, each, however, admitting of explanation. Again, *kedem* is used in a strictly geographical sense to describe a spot or country immediately *before* another in an easterly direction; hence it occurs in such passages as Gen. ii, 8; iii, 24; xi, 2; xiii, 11; xxv, 6; and hence the subsequent application of the term, as a proper name (Gen. xxv, 6, *eastward, into the land of Kedem*), to the lands lying immediately eastward of Palestine, viz. Arabia, Mesopotamia, Babylonia, etc.; on the other hand, *mizrach* is used of the *far* east with a less definite signification (Isa. xli, 2, 25; xliiii, 5; xlvii, 11). In describing *aspect* or *direction*, the terms are used indifferently (comp. *kedem* in Lev. i, 16, and Josh. vii, 2, with *mizrach* in 2 Chron. v, 12, and 1 Chron. v, 10). See WEST, etc.

"The East" is the name given by the ancient Hebrews to a certain region, without any regard to its relation to the eastern part of the heavens, comprehending not only Arabia Deserta and the lands of Moab and Ammon, which really lay to the east of Palestine, but also Armenia, Assyria, Mesopotamia, Babylonia, and Chaldaea, which were situated rather to the north than the east of Judæa. Its geographical boundaries include Syria, the countries beyond the Tigris and Euphrates, and the shores of the Indian Ocean and of the Arabian Gulf. The name given to this entire region by the Hebrews was  $\text{אֶרֶץ־קִדְמָה}$  (*ἀνατολή*), or the land of Kedem or East; by the Babylonians it was called  $\text{אַרְבַּיָּת}$ , or *Arabia*, Arabia. Its miscellaneous population were called by the former "sons of the East," or *Oriental*, and by the latter either *Arabians*, or the "people of the West." The Jews themselves also apply to them the Babylonian name in some of their books written after the Captivity (2 Chron. xxii, 1; Neh. ii, 9). The Arabs anciently denominated themselves, and do to this day, by either of these names. To this region belong the "kings of the East" (Isa. xix, 11; Jer. xxv, 19-25,

Heb.). The following passages may suffice as instances showing the arbitrary application of the term "east" to this region. Balaam says that Balak, king of Moab, had brought him from the mountains of the east (Num. xxiii, 7), i. e. from Pethor on the Euphrates. Isaiah places Syria in the east (ix, 11), "the Syrians from the east" (bishop Lowth). The distinction seems evident in Gen. xxix, 1, "Jacob came unto the land of the children of the East." It occurs again in Judg. vi, 3, "Even the children of the East came against them" (Sept. *οι υιοι ανατολων*; Vulg. *cateri Orientalium nationum*). The preceding facts enable us to account for the prodigious numbers of persons sometimes assembled in war against the Israelites (Judg. vi, 5; vii, 12), "and the children of the East were like grasshoppers for multitude," and for the astonishing carnage recorded (Judg. viii, 10), "there fell a hundred and twenty thousand men that drew the sword." It seems that the inhabitants of this region were distinguished for their proficiency in the arts and sciences (comp. 1 Kings i, 4, 30), and were addicted in the time of Isaiah to superstition (Isa. xxvi). See ARABIA.

The east seems to have been regarded as symbolical of distance (Isa. xlvi, 11), as the land stretched out in these directions without any known limit. In Isa. ii, 6, the house of Jacob is said to be "replenished from the east" (עֲרֹבָה מִמְּזֻרָה), which some explain as referring to witchcraft, or the arts of divination practised in the East. While others, with greater probability, understand it of the men of the East, the diviners and soothsayers who came from the east (comp. Job xv, 2); the correct text may, however, be עֲרֹבָה מִמְּזֻרָה, with sorcery, which gives a better sense (Ges. *Thesaur.* p. 1193). See WITCHCRAFT.

3. *Ἀνατολή*, sun-rise. This word usually occurs in the plural, and without the article. When, therefore, we read, as in Matt. ii, 1, 2, that "μάγοι ἀπὸ ἀνατολῶν came to Jerusalem saying we have seen his star ἐν τῇ ἀνατολῇ," we are led to suspect some special reason for such a variation. The former phrase is naturally rendered as equivalent to Oriental Magi, and the indefinite expression is to be explained by reference to the use of עֲרֹבָה in the Old Test. The latter phrase offers greater difficulty. If it be taken—"in the east," the questions arise why the singular and not the customary plural should be used? why the article should be added? and why the wise men should have seen the star in the east when the place where the child was lay to the west of their locality (unless, indeed, ἐν τῇ ἀνατολῇ relates to the star, and not the wise men themselves, to whom it seems to refer). Pressed by the difficulties thus suggested, the majority of recent interpreters take ἐν τῇ ἀνατολῇ literally = *in its rise*, and trace a correspondence of this with the *τεχθείς* of the preceding clause: they inquired for the child, whom they knew to be born, because they had seen the rising of his star, the signal of his birth. Alford objects to this, that for such a meaning we should expect *ἀντὸν*, if not in ver. 2, certainly in ver. 9; but the construction falls under the case where the article, by indicating something closely associated with the subject, supersedes the use of the demonstrative pronoun. In the Sept. *ἀνατολαί* is used both for *kedem* and *mizrah*. It should be observed that the expression is, with but few exceptions (Dan. viii, 9; Rev. xxi, 13; comp. vii, 2; xvi, 12, from which it would seem to have been John's usage to insert *ἡλιου*), *ἀνατολαί* (Matt. ii, 1; viii, 11; xxiv, 27; Luke xiii, 29), and not *ἀνατολή*. It is hardly possible that Matthew would use the two terms indifferently in succeeding verses (ii, 1, 2), particularly as he adds the article to *ἀνατολή*, which is invariably absent in other cases (comp. Rev. xxi, 13). He seems to imply a definiteness in the locality—that it was the country called עֲרֹבָה, or *ἀνατολή* (comp. the modern *Anatolia*), as distinct from

the quarter or point of the compass (*ἀνατολαί*) in which it lay. In confirmation of this, it may be noticed that in the only passage where the article is prefixed to *kedem* (Gen. x, 30), the term is used for a definite and restricted locality, namely, Southern Arabia.—Kitto, s. v.; Smith, s. v. See STAR IN THE EAST.

The only other terms rendered "east" in the Scriptures are the following: *כַּרְסוּחַ* (*charsuh'*, pottery), applied to a gate of Jerusalem, improperly called "east gate" (Jer. xix, 2), but meaning the potters' gate (q. v.), i. e. one which led to the "potters' field" in the valley of Hinnom (see Strong's *Harmony and Exposition*, Appendix ii, p. 11). See JERUSALEM. מוֹצֵא ( *mosa'*, a going forth, as it is elsewhere usually rendered), applied poetically to sun-rise (Psa. lxxv, 6). For "east-wind," "east-sea," see below.

EAST, TURNING TOWARDS THE. 1. The earliest churches faced eastward; at a later period (4th or 5th century) this was reversed, and the sacramental table was placed at the east, so that worshippers facing it in their devotions were turned towards the east. The Jewish custom was to turn to the west in prayer. Socrates says (*Eccles. Hist.* bk. vi, ch. v) that the church of Antioch had its altar on the west, i. e. towards Jerusalem. 2. Many fanciful reasons are assigned, both by ancient writers and by modern ritualists, for worshipping towards the east. Among them are the following: "(1.) The rising sun was the symbol of Christ, the Sun of Righteousness; and, since people must worship towards some quarter of the heavens, they chose that which led them to Christ by symbolical representation (Tertullian, *Apol.* i, 16). (2.) The east was the place of paradise, our ancient habitation and country, which we lost in the first Adam by the Fall, and whither we hope to be restored again, as to our native abode and rest, in the second Adam, Christ our Saviour (*Apost. Const.* lib. ii, c. 57). (3.) The east was considered the most honorable part of the creation, being the seat of light and brightness. (4.) Christ made his appearance on earth in the east, and thence ascended into heaven, and there will appear again at the last day. The authority of many of the fathers has been adduced by ecclesiastical writers in support of these views. The author of the *Questions to Antiochus*, under the name of Athanasius, gives this account of the practice: 'We do not,' says he, 'worship towards the east, as if we thought God any way shut up in those parts of the world, but because God is in himself the true Light. In turning, therefore, towards the created light, we do not worship it, but the great Creator of it; taking occasion from that most excellent element to adore the God who was before all elements and ages in the world.' A little attention to geography shows that these are nothing but fancies. That part of the heavens, for example, which is east at six o'clock in the morning, is west at six o'clock in the evening, so that we cannot at both these periods pray towards 'that quarter of the heavens where (according to Wheatly) God is supposed to have his peculiar residence of glory,' unless, if we turn to the east at morning prayer, we turn to west at even song. Not only so, but two individuals on opposite sides of the globe, though both suppose that they are praying with their faces to the east, are, so far as it respects each other, or any particular 'quarter of the heavens,' praying in opposite directions, one east and the other west, one looking towards that 'quarter,' the other away from it. So that all such reasons are rendered futile by the geographical fact that, owing to the rotation of the earth on its axis, every degree of longitude becomes during the twenty-four hours both east and west."

3. *Turning East in Baptism*.—In the ancient baptisteries were two apartments: first, a porch or ante-room (*προαύλιος οἶκος*), where the catechumens made their renunciations of Satan and confessions of faith; and the inner room (*ἐσωτερικος οἶκος*), where the cere-

mony of baptism was performed. When the catechumens were brought into the former of these they were placed with their faces to the west, and were then commanded to renounce Satan with some gesture and rite expressing an indignation against him, as by stretching out their hands, or folding them, or striking them together, and sometimes by spitting at him as if he were present. The words generally used by the candidate were, "I renounce Satan, and his works, and his pomps, and his service, and his angels, and his inventions, and all things that belong to him, or that are subject to him." The reason assigned by Cyril (*Catech. Mystag.*) for standing with the face to the west during this adjuration is that the west is the place of darkness; and Satan is darkness, and his kingdom is darkness. That the candidate turned his face to the east, and made his solemn confession of obedience to Christ, generally in these words, "I give myself up to thee, O Christ, to be governed by thy laws." This was called *promissum, pactum, or votum*—a promise, a covenant, a vow. The face was turned to the east because, as Cyril tells his disciples, since they had renounced the devil, the paradise of God, which was planted in the east, and whence our first parents were driven for their transgression into banishment, was now laid open to them.—Bingham, *Orig. Eccles.* bk. xi, ch. vii, § 4; Farrar, *Eccles. Dict.* s. v.

4. It is "a curious instance of the inveteracy of popular custom that in Scotland, where everything that savored of ancient usage was set aside as popish by the reformers, the practice of burying with the feet to the east was maintained in the old churchyards; nor is it uncommon still to set down churches with a scrupulous regard to east and west. In modern cemeteries in England and Scotland no attention appears to be paid to the old punctilio of interring with the feet to the east, the nature of the ground alone being considered in the disposition of graves" (Chambers, *Encyclopædia*, s. v.).—Wheatly, *On Common Prayer*, ch. ii, § 2; Hook, *Eccles. Dict.* s. v.; Bingham, *Orig. Eccl.* xiii, viii, 15. See CHURCH EDIFICES.

**Eastburn**, JAMES WALLIS, A.M., a Protestant Episcopal minister, was born in London Sept. 26, 1797. In 1803 he came to New York, and in 1816 passed A.B. of Columbia College. In 1818 he became rector of St. George's, Accomac County, Va., where his ministry is still spoken of with great respect. In 1819 he sailed for Santa Cruz, and died on the 2d of December of the same year. He composed the beautiful *Trinity Sunday Hymn*; a lyric, entitled *The Summer Midnight*; a poem, *Yanoojen, a Tale of the Wars of King Philip*; and various anonymous essays.—Sprague, *Ann. v.*, 635.

**East, Christianity in the.** See ARABIA; ASIA; CHINA; INDIA; JAPAN.

**East Gate.** See under EAST.

**East Sea** (with the art. הַיָּם הַמִּזְרָגִי, *ha-yam hak-kadmou'i*, the forward sea; Sept. ἡ ἑσπέρια ἡ πρῶτη) is an epithet used in two passages (Joel ii, 20; Ezek. xlvii, 18) of the DEAD SEA (q. v.), because it lay on the eastern side of the Holy Land. The Mediterranean Sea, because lying in the opposite direction, was on a like account called the West Sea, or the sea on the western border (Num. xxxiv, 6; Josh. xv, 12, etc.). See SEA.

**East Wind** (קָדִימ', *kadim'*, prop. the east [as often rendered], i. e. eastern quarter; hence elliptically for the wind from that direction, Job xxvii, 21; Isa. xxvii, 8; Jer. xviii, 17; Ezek. xxix, 26; the full expression קָדִימ' מִן הַיָּם also occurs, Exod. x, 13, 14, 21; Psa. xlviii, 8; Ezek. xvii, 10). This is in Scripture frequently referred to as a wind of considerable strength, and also of a peculiarly dry, parching, and blighting nature. In Pharaoh's dream the thin ears of corn are represented as being blasted by an east wind, as, in a later age, Jonah's gourd was withered

and himself scorched by "a vehement east wind" (Gen. xli, 6; Jonah iv, 8); and often in the prophets, when a blighting desolation is spoken of, it is associated with the east wind, either as the instrumental cause or as a lively image of the evil (Ezek. xvii, 10; xix, 12; Hos. xiii, 15; Hab. i, 9, etc.). This arose from the fact that in Egypt, Palestine, and the lands of the Bible generally, the east wind, or a wind more or less from an eastern direction, blows over burning deserts, and consequently is destitute of the moisture which is necessary to promote vegetation. In Egypt it is rather a south-east than an east wind, which is commonly found most injurious to health and fruitfulness; but this also is familiarly called an east wind, and it often increases to great violence. Ukert thus sums up the accounts of modern travellers on the subject: "In the spring the south wind oftentimes springs up towards the south-east, increasing to a whirlwind. The heat then seems insupportable, although the thermometer does not always rise very high. As long as the south-east wind continues, doors and windows are closed, but the fine dust penetrates everywhere; everything dries up; wooden vessels warp and crack. The thermometer rises suddenly from 16-20° up to 30-36°, and even 38° of Reaumur. This wind works destruction upon everything. The grass withers, so that it entirely perishes if this wind blows long" (*Geogr.* p. 111). It is stated by another traveller, Wansleb, with special reference to the strong east wind employed on the occasion of the passage of the Israelites through the Red Sea, which took place shortly after Easter: "From Easter to Pentecost is the most stormy part of the year, for the wind commonly blows during this time from the Red Sea, from the east" (see in Hengstenberg's *Egypt and the Books of Moses*, p. 9 sq.). There is nothing, therefore, in the scriptural allusions to this wind which is not fully borne out by the reports of modern travellers; alike by sea and by land it is now, as it has ever been, an unwelcome visitant, and carries along with it many disagreeable effects.—Fairbairn, s. v. See WIND.

**Easter** (πάσχα, a Gr. form of the Heb. פֶּסַח, and so Latinized by the Vulgate *pascha*), i. e. *Passover*. *Easter* is a word of Saxon origin, and imports a goddess of the Saxons, or, rather, of the East, *Ester*, in honor of whom sacrifices being annually offered at the Passover time of the year (spring), the name became attached by association of ideas to the Christian festival of the resurrection, which happened at the time of the Passover; hence we say *Easter-day*, *Easter-Sunday*, but very improperly; as we by no means refer the festival then kept to the goddess of the ancient Saxons. So the present German word for Easter, *Ostern*, is referred to the same goddess, *Ester* or *Ostera*.—Calmet, s. v. The occurrence of this word in the A. V. of Acts xii, 4—"Intending after Easter to bring him forth to the people"—is chiefly noticeable as an example of the want of consistency in the translators. See AUTHORIZED VERSION. In the earlier English versions *Easter* had been frequently used as the translation of πάσχα. At the last revision *Passover* was substituted in all passages but this. It would seem from this, and from the use of such words as "robbers of churches" (Acts xix, 37), "town-clerk" (xix, 35), "sergeants" (xvi, 35), "deputy" (xiii, 7, etc.), as if the Acts of the Apostles had fallen into the hands of a translator who acted on the principle of choosing, not the most correct, but the most familiar equivalents (comp. Trench, *On the Authorized Version of the N. T.* p. 21).—Smith, s. v. For all that regards the nature and celebration of the feast referred to in Acts xii, 4, see PASSOVER.

**EASTER, CELEBRATION OF.** In the ancient Church the seventh day of Passion-week (q. v.), the great Sabbath, as it was called, was observed with rigorous precision as a day of fasting. Religious worship was

celebrated by night; and the vigils continued till cock-crowing, the hour at which it is supposed our Lord arose. At this hour the stillness of these midnight vigils was broken by the joyful acclamation, "The Lord is risen! The Lord is risen! The Lord is risen indeed!" The day of Easter was celebrated with every demonstration of joy as a second jubilee. There was a solemn celebration of the Lord's Supper; the baptism of catechumens; appropriate salutations, and demonstrations of joy; the liberation of prisoners, and the manumission of slaves. Charities were dispensed to the needy. Courts of justice were closed. The heathen were forbidden to celebrate public spectacles in order that the devotions of Christians might not be interrupted. The week following was considered as a continuation of the festival. During this time, those who had been baptized at Easter continued arrayed in white, in token of that purity of life to which they were bound by baptism. On the Sunday following they laid aside their garments of white, and were welcomed as members of the Church.—Bingham, *Orig. Eccles.* bk. xx, ch. v.

**EASTER CONTROVERSIES.** There was much controversy in the early Church as to the days on which our Lord's resurrection ought to be celebrated. The churches of Asia Minor celebrated the death of the Lord on the day corresponding to the 14th of the month Nisan, on which day, according to the opinion of the whole ancient Church, the crucifixion took place. The Western churches, on the other hand, were of opinion that the crucifixion should be annually commemorated on the particular day of the week on which it occurred, that is, Friday. The resurrection was accordingly commemorated by the former party on the day corresponding to the 16th of Nisan, and by the other party on the Sunday following Good Friday. The two parties also differed with regard to the fasting preceding Easter. The Western churches viewed the death-day of Christ exclusively as a day of mourning, and they did not terminate the time of fasting until the day of resurrection. The churches of Asia Minor, on the other hand, looking upon the death of Christ wholly as the redemption of mankind, terminated fasting at the hour of Christ's death (3 o'clock in the afternoon), and immediately after celebrated the Agape and the Lord's Supper. In addition to these two parties, both of which were within the old catholic Church, there was another, repudiated by the Church as heretical. This third party, an Ebionitic sect, agreed with the churches of Asia Minor in adhering to the commemoration of the day of the month (14th and 16th of Nisan), but differed from them in insisting upon the continuance of the obligatory character of the ancient law, and the consequent duty of Christians to celebrate the Jewish Passover. Both were called *Quartodecimani*, from the *fourteenth* (Latin *quartodecimus*) day of the month on which they commemorated the death of Christ. Eusebius mentions (*Hist. Eccles.* v, 23; *Vita Constant.* iii, 19) Palestine, Pontus, Gallia, Rome, Osroene, Corinth, Phœnicia, Alexandria, as churches following the Western practice. To these the emperor Constantine, in a circular enjoining the observance of a decree of the Nicene Council on the subject, adds all Italy, Africa, Spain, Britain, Greece. Thus the Western practice appears to have largely prevailed. Its adherents traced its origin to the apostles Peter and Paul, while the churches of Asia Minor rested their differing practice upon the authority of the apostle John. Both parties adhered to the name of *Pascha* (*Passover*), by which they understood sometimes the whole week commemorating the Passion, sometimes the specially festive days of this week. In the course of time (it is not known when) the death-day was distinguished as *πίσχα στανρώσιμον*, and the day of resurrection as *πίσχα ἀναστάσιμον*. Irenæus explicitly bears testimony that the bishops of Rome up to Xystus (at the beginning of the 2d century) kept peace

with the adherents of the other practice. The first effort to come to an agreement on the controversy was made by bishop Polycarp, of Smyrna, about the middle of the 2d century, when on a visit to bishop Anicet, of Rome. The two bishops received each other with the kiss of peace, but neither of them was willing to sacrifice the practice of his predecessors. Nevertheless they parted in kindness, and peace continued to reign between the two parties. A few years later, the Ebionitic Quartodecimani caused great trouble at Laodicea (about 170), at Rome (about 180), where a certain Blasius was at their head, and in other places. Books against them were written by Melito of Sardis and Apollinaris of Hierapolis, both of whom were adherents of the practice of Asia Minor; by Clement of Alexandria and Hippolytus (about the middle of the 3d century). Of all these books only fragments are left. That of Hippolytus shows that at this time the Jewish Quartodecimani were regarded by the Church as heretics. The first serious dispute between the parties within the old Catholic Church broke out about 196, when bishop Victor, of Rome, issued a circular to the leading bishops of the Church, requesting them to hold synods in their provinces, and to introduce the Western practice. Some complied with this request; but the synod held by bishop Polycrates, of Ephesus, emphatically refused, and approved the letter of bishop Polycrates, who, in defence of the Asiatic practice, referred Victor to the authority of the apostles Philip and John, to Polycarp, and to seven of his relations, who before him had been bishops of Ephesus. Victor at first intended to excommunicate the Asiatic churches, and therefore issued an encyclical to the Christians of those regions, but whether he really carried out his threat is not certain; the words of Eusebius (*Hist. Eccles.* v, 24) on the movements of Victor are by some understood as implying a real execution of the excommunication, while the more common opinion is, that, in consequence of the indignant remonstrances against such a usurpation of power by the Western bishops, especially by Irenæus, the threat was never executed.

Thus far the controversy between the Asiatic and the Western churches had only concerned two points, namely, (1) whether the day of the week or the day of the month on which the death of Christ occurred should be commemorated; (2) when the fasting ought to be terminated. Now a third point of dispute arose, as to the time when the 14th day of Nisan really occurred. Many of the Church fathers are of opinion that, according to the original calculation of the Jews up to the time of the destruction of Jerusalem, the 14th of Nisan had always been after the spring equinox, and that it was only in consequence of a miscalculation of the later Jews that the 14th of Nisan occasionally fell before the equinox. They therefore insisted that the 14th of Nisan, which for both parties within the Church determined the time of Easter, should always be after the equinox. As the year of the Jews is a lunar year, and the 14th of Nisan always a full-moon day, the Christians who adopted the above astronomical view, whenever the 14th of Nisan fell before the equinox, would celebrate the death of Christ one month later than the Jewish Passover. As the Christians could now no longer rely on the Jewish calendar, they had to make their own calculations of the time of Easter. These calculations frequently differed, partly from reasons already set forth, and partly because the date of the equinox was fixed by some at the 18th of March, by others at the 19th, by others at the 21st of March. The Council of Arles in 314 endeavored to establish uniformity, but its decrees do not appear to have had great effect. The subject was therefore again discussed and acted upon by the Œcumenical Council of Nice, which decreed that Easter should be celebrated throughout the Church after the equinox, on the Friday following the 14th of Nisan. It was also provided that the Church of Alexandria,

as being distinguished in astronomical science, should annually inform the Church of Rome on what day of the calends or ides Easter should be celebrated, and the Church of Rome should notify all the churches of the world. But even these decrees of the Council of Nice did not put a stop to all differences, and it was reserved to the calculation of Dionysius Exiguus (q. v.) to gradually introduce uniformity of practice into the whole Church. Some countries, like Great Britain, did not abandon their ancient practice until after a long resistance. At the time of Charlemagne uniformity seems to have been established, and no trace is to be found of the Quartodecimani. The revision of the calendar by Pope Gregory XIII, on the whole, retained the Dionysian era, but determined more accurately the Easter full moon, and made careful provision for avoiding any future deviation of the calendar from the astronomical time. By these minute calculations, however, the Christian Easter sometimes, contrary to the decrees of the Nicene Council, coincides with the Jewish Passover. This, for instance, was the case in 1825.—Mosheim, *Church Hist.* i, 68; Neander, *Church Hist.* i, 298; ii, 301, 302; Mosheim, *Comm.* i, 523; Weitzel, *Die christliche Paschafeyer der ersten Jahrhunderte* (1848); Rettberg, in *Zeitschrift für historische Theologie*, 1832, vol. ii; Hefele, in *Wetzer u. Welte, Kirchen-Lex.* iii, 871; Steitz, in *Herzog, Real-Encyclop.* xi, 140; Steitz, *Die Differenz der Occidentalen u. der Kleinasien* (in *Stud. u. Krit.* 1856). (A. J. S.)

**Easter, John**, a distinguished Methodist Episcopal minister. Dates of his early life are wanting. He joined the itinerancy in 1782, and located in 1792. His ministerial career was "brilliant," and "his success almost unparalleled." In 1787, on Brunswick Circuit, Va., eighteen hundred souls were added to the Church under his ministry. William M'Kendree and Enoch George, afterwards bishops in the Church, were brought to God through his preaching. See *Wakeley's Heroes of Methodism*, p. 219; *Life and Times of Jesse Lee*, p. 356 et al.

**Easter, John**, a Methodist Episcopal minister, was born in Norfolk Co., England, Sept. 21, 1800, and joined the Wesleyan Methodists in 1824. In 1830 he emigrated to America, and settled in Geneva, N. Y. He entered the itinerancy in 1852, and took a supernumerary relation in 1838. His death was caused by a rocket, at Geneva, on July 4, 1842. Mr. Easter was a man of great worth, and a useful and beloved preacher.—*Minutes of Conferences*, iii, 345.

**Eastern Church**, a designation given,

1. Specifically to what is commonly called the Greek Church, in distinction from the Western (or Latin Church). The title claimed by that Church itself is *καθολικὴ καὶ ἀποστολικὴ ἐκκλησία τῆς ἀνατολικῆς*: *The Catholic and Apostolic Eastern Church*. See **GREEK CHURCH**. Bishop Coxé, in the *Churchman's Calendar*, calls it the "Grand Trunk, or main stem of the Catholic Church."

2. The name *Eastern Church*, or, more properly, *Eastern churches*, is given to Eastern Christendom, divided into the churches named in the following list, which gives their statistics to the close of 1867, as far as they can be ascertained:

1. *The Greek Church*.—Russia (in Europe, 51,000,000; in Siberia, 2,600,000; in the provinces of the Caucasus no official account of the ecclesiastical statistics has yet been made; the total population of this part of the empire is 4,257,000, the population connected with the Greek Church may be estimated at about 1,500,000; hence total population of Russia connected with the Greek Church is about), 55,000,000; Turkey (inclusive of the dependencies in Europe and Egypt), about 11,500,000; Austria, 2,921,000; Greece (inclusive of the Ionian Islands), 1,220,000; United States of America (chiefly in the territory purchased in 1867 from Russia), 50,000; Prussia, 1500; China, 200; to-

tal, 69,692,700. The figures referring to Russia, Austria, and Prussia are from an official census; those concerning China are furnished by the Russian missionaries in Peking; those on Turkey and Greece are estimates almost generally adopted. See **GREEK CHURCH**; **RUSSIA**.

2. *The Armenian Church*.—According to Dr. Petermann (in *Herzog's Real-Encyclopädie*), the total number of Armenians scattered in the world is about 2,500,000. Of these, about 100,000 are connected with Rome, and are called United Armenians; 15,000 are Evangelical Armenians, and all others belong to the National (or "Gregorian") Armenian Church. The number of the latter may therefore be set down at about 2,400,000. The great majority of them (about 2,000,000) live in Turkey, about 170,000 in Russia, and 30,000 in Persia. See **ARMENIAN CHURCH**.

3. *The Nestorians*, including the *Christians of St. Thomas* in India, number about 165,000 souls, exclusive of those who have connected themselves with Rome, or have become Protestants. See **NESTORIANS**.

4. *The Jacobites* in Turkey and India are estimated at about 220,000, but the information concerning them is less definite than that about the preceding churches. See **JACOBITES**.

5. *The Copts and Abyssinians*.—The Copts may be roughly estimated at about 200,000, the Abyssinians at about 3,000,000. See **ABYSSINIAN CHURCH**; **COPTS**.

Together, therefore, the population connected with these Eastern communions embraces a population of about 76,500,000. All these bodies lay claim to having bishops of apostolical succession, and consequently all of them are embraced in the union scheme patronized by the High-Church Anglicans. Both the Low-Church and the Broad-Church parties dislike the idea of a union with the Greeks, Copts, Abyssinians, and the other Eastern communions; but the High-Churchmen, of all shades of opinion, are a unit on this subject. An important fact in the history of this movement is the official transmission of a Greek translation of the pastoral letter issued (1867) by the Pan-Anglican Synod to all the patriarchs and bishops of the Greek Church (Schem, in *Methodist Quarterly Review*, 1868, p. 280).

On the Eastern churches, besides the articles on the separate churches in this Cyclopædia, see Stanley, *Lectures on the History of the Eastern Church* (N. Y. 1867, 8vo); Neale, *History of the Holy Eastern Church* (London, 1847-1850, 4 vols. 8vo). A list of the patriarchates, sees, etc., of the Eastern churches is given in the *Churchman's Calendar*, 1868, p. 36 sq.

**Eating** (properly *ἔσθω*, *akal'*, *ἐσθίω*). The ancient Hebrews did not eat indifferently with all persons; they would have esteemed themselves polluted and dishonored by eating with those of another religion or of an odious profession. In Joseph's time they neither ate with the Egyptians nor the Egyptians with them (Gen. xliii, 32), nor in our Saviour's time with the Samaritans (John iv, 9). The Jews were scandalized at his eating with publicans and sinners (Matt. ix, 11). As there were several sorts of meats the use of which was prohibited, they could not conveniently eat with those who partook of them, fearing to contract pollution by touching such food, or if by accident any particles of it should fall on them. See **FOOD**. At their meals some suppose they had each his separate table; and that Joseph, entertaining his brethren in Egypt, seated them separately, each at his particular table, while he himself sat down separately from the Egyptians, who ate with him; but he sent to his brethren portions out of the provisions which were before him (Gen. xliii, 31 sq.). Elkanah, Samuel's father, who had two wives, distributed their portions to them separately (1 Sam. i, 4, 5). In Homer, each guest is supposed to have had his little table apart, and the master of the feast distributed meat to each

(*Olyss.* xiv, 446 sq.). We are assured that this is still practised in China, and that many in India never eat out of the same dish, nor on the same table with another person, believing they cannot do so without sin, and this not only in their own country, but when travelling and in foreign lands. This is also the case with the Brahmins and various castes in India, who will not even use a vessel after a European, though he may only have drank from it water recently drawn out of a well. The same strictness is observed by the more scrupulous among the Mohammedans, and instances have been known of every plate, and dish, and cup that had been used by Christian guests being broken immediately after their departure. The ancient manners which we see in Homer we see likewise in Scripture, with regard to eating, drinking, and entertainments. There was great plenty, but little delicacy; great respect and honor paid to the guests by serving them plentifully. Joseph sent his brother Benjamin a portion five times larger than those of his other brethren. Samuel set a whole quarter of a calf before Saul (1 Sam. ix, 24). The women did not appear at table in entertainments with the men; this would have been an indecency, as it is at this day throughout the East. See BANQUET.

The Hebrews anciently sat at table, but afterwards imitated the Persians and Chaldeans, who reclined on table-beds or divans while eating. (See Gier. *De vet. Ebr. ratione cœnandi*, Lips. 1635). This mode of reclining at meals was common in the East, and also among the Greeks and Romans. Under the Roman emperors the couches were sometimes made semicircular. See ACCUBATION. At the present day, in the East, the custom is to sit or recline upon the floor at meat, and at other times on cushions. Many of the Arabs use no knife, fork, spoon, or plate in eating their victuals (these being used only by foreigners, and that as a special privilege); they dip their hands into the milk which is placed before them in a wooden bowl,

by no means agreeable to a European, to which, however, I would willingly have endeavored to submit, but it was impossible to learn it in the short compass of twenty days' visit. There are set on the table, in the evening, two or three messes of stewed meat, vegetables, and sour milk. To me the privilege of a knife, and spoon, and plate was granted; but the rest all helped themselves immediately from the dish, in which it was no uncommon thing to see more than five Arab fingers at one time. Their bread, which is extremely thin, tearing and folding up like a sheet of paper, is used for the purpose of rolling together a large mouthful, or sopping up the fluid and vegetables. But the practice which was most revolting to me was this: when the master of the house found in the dish any dainty morsel, he took it out with his fingers and applied it to my mouth. This was true Syrian courtesy and hospitality, and had I been sufficiently well-bred, my mouth would have opened to receive it. On my pointing to my plate, however, he had the goodness to deposit the choice morsel there" (*Researches*, p. 210). Niebulr's account is as follows (*Descrip. of Arabia*, p. 52). "The table of the Orientals is arranged according to their mode of living. As they always sit upon the floor, a large cloth is spread out in the middle of the room upon the floor, in order that the bits and crumbs may not be lost, or the carpets soiled. (On journeys, especially in the deserts, the place of this cloth is supplied by a round piece of leather, which the traveller carries with him, *Travels*, ii, 372.) Upon this cloth is placed a small stool, which serves as a support for a large round tray of tinned copper; on this the food is served up in various small dishes of copper, well tinned within and without. Among the better class of Arabs, one finds, instead of napkins, a long cloth, which extends to all who sit at table, and which they lay upon their laps. Where this is wanting, each one takes, instead of a napkin, his own handkerchief, or rather small towel, which he always carries with him to wipe himself

Ancient Triclinium or Dinner-bed.

and lift it to their mouth in their palm. Dr. Russell states, "The Arabs, in eating, do not thrust their whole hand into the dish, but only their thumb and two first fingers, with which they take up the morsel, and that in a moderate quantity at a time." The present mode of eating in Syria and Palestine is thus described by Dr. Jowett: "To witness the daily family habits, in the house in which I lived at Deir el Kamr (not far from Beyrout), forcibly reminded me of Scripture scenes. The absence of the females at our meals has already been noticed. There is another

carries with him to wipe himself with after washing. Knives and forks are not used. The Turks sometimes have spoons of wood or horn. The Arabs are so accustomed to use the hand instead of a spoon, that they can do without a spoon even when eating bread and milk prepared in the usual manner. Other kinds of food, such as we commonly eat with a spoon, I do not remember to have seen. It is, indeed, at first, very unpleasant to a European, just arrived in the East, to eat with people who help themselves to the food out of the common dish with their fingers; but this is easily got over, after one has become acquainted with their mode of life. As the Mohammedans are required, by their religion, very often to wash themselves, it is therefore even on this account probable that

their cooks prepare their food with as much cleanliness as those of Europe. The Mohammedans are even obliged to keep their nails cut so short that no impurity can collect under them; for they believe their prayers would be without any effect if there should be the least impurity upon any part of the body. And since, now, before eating, they always wash themselves carefully, and generally too with soap, it comes at length to seem of less consequence whether they help themselves from the dish with clean fingers or with a fork. Among the sheiks of the desert, who require at

a meal nothing more than *yillav*, i. e. boiled rice, a very large wooden dish is brought on full, and around this one party after another set themselves till the dish is emptied, or they are satisfied. In Merdin, where I once ate with sixteen officers of the Waiwode, a servant placed himself between the guests, and had nothing to do but to take away the empty dishes, and set down the full ones which other servants brought in. As soon as ever the dish was set down, all the sixteen hands were immediately thrust into it, and that to so much purpose, that rarely could any one help himself three times. They eat, in the East, with very great rapidity; and at this meal in Merdin, in the time of about twenty minutes, we sent out more than fourteen empty dishes." See DINE.

"who did eat of my bread, even he hath lifted up his heel against me!" Hence, in part, no doubt, the conviviality that always followed the making of a covenant. Hence, also, the severity of some of the feelings acknowledged by the indignant man of patience, Job, as appears in several passages of his pathetic expostulations. It is well known that Arabs, who have given food to a stranger, have afterwards thought themselves bound to protect him against the vengeance, demanded by consanguinity, for even blood itself. (See Layard's *Nineveh*, 2d series, p. 217.) See HOSPITALITY.

To "eat" is frequently spoken metaphorically in Scripture of the enjoyment or partaking of temporal or spiritual blessings (Jer. xv, 16; Ezek. iii, 1; Rev. x, 9). Wemyss's *Symbol. Diet.* s. v. Comp. DRINK; TASTE.

Modern Oriental Party at Dinner.

The Hebrews, like the modern Orientals, rose early, about the dawn of the day, when they breakfasted. They were accustomed to take a slight repast about noon; and this to husbandmen and mechanics was probably the principal meal (1 Kings xx, 16; Ruth ii, 14; Luke xiv, 12). Wilkinson says, "That dinner was served up at midday among the ancient Egyptians may be inferred from the invitation given by Joseph to his brethren: 'Bring these men home, and slay and make ready, for these men shall dine with me at noon' (Gen. xliii, 16); but it is probable that, like the Romans, they also ate supper in the evening, as is still the custom in the East." Supper appears to have been the principal meal among the Hebrews, as it was among the Greeks and Romans. Among the Romans it anciently took place about three o'clock; but in the East, as at the present day in Persia, about six or seven in the evening, in order to avoid the enfeebling heat of the afternoon (Mark vi, 21; Luke xiv, 16, 24; John xii, 2). In 1 Sam. ix, 13, we read that the people would not eat of the feast until Samuel had arrived and consecrated the sacrifice. But this circumstance affords no evidence of the custom of asking a blessing on food. In the time of Christ, however, it was common before every meal to give thanks (Matt. xiv, 19; xv, 36). See MEAL-TIME.

In closing this subject, we may properly notice the obligations which are considered by Eastern people to be contracted by eating together. Niebuhr says, "When a Bedouin sheik eats bread with strangers, they may trust his fidelity and depend on his protection. A traveller will always do well, therefore, to take an early opportunity of securing the friendship of his guide by a meal." The reader will recollect the complaint of the Psalmist (xli, 9), penetrated with the deep ingratitude of one whom he describes, as having been his own familiar friend, in whom he trusted—

**Eaton, John**, was born at Kant in 1575, and studied at Oxford. In 1625 he was made rector of Wickham Market, Suffolk, where he died in 1641. His writings are Antinomian. They are, *The Discovery of a most dangerous dead Faith* (Lond. 1641, 12mo);—*The Honeycomb of free Justification* (Lond. 1642, 4to). He was imprisoned for this last work by the Long Parliament.—Wood, *Athenæ Oxonienses*; Hock, *Ecl. Biog.* iv, 526.

**Eaton, Samuel**, a Congregational minister, was a native of England, and took his degrees at Magdalen College, Cambridge. He entered into the ministry of the Est-

ablished Church, but, on account of his Puritanism, came to New England with the Rev. John Davenport in 1637, and was co-pastor with him at New Haven. He returned to England in 1640, and formed a Congregational church at Duckenfield, Cheshire. By the Act of Uniformity he was compelled to cease preaching in 1662, and died June 9, 1665. He published *A Defence of sundry Positions and Scriptures alleged to justify the Congregational Way* (1645; second part, 1646);—*The Mystery of God incarnate, or the Word made Flesh cleared up*, etc. (1650);—*Vindication, or further Confirmation of the Scriptures, produced to prove the Divinity of Jesus Christ, distorted and miserably wrested and abused by Mr. John Knowles*, etc. (1651);—*Treatise of the Oath of Allegiance and Covenant, showing that they oblige not* (replied to 1650);—*The Quakers Confuted*, etc. (1659).—Sprague, *Annals*, i, 98.

**E'bal** (Heb. *Eybal'*, עֵבֶל, *stone*), the name of one or two persons, and also of a hill.

1. (Sept. *Γεμίαν* [Vat. MS. omits], Vulg. *Hebal*.) A various reading for OEBAL (q. v.), the son of Joktan (1 Chron. i, 22; comp. Gen. x, 28).

2. (Γαυβήλ v. r. Ταυβήλ [1 Alex. MS. Γαυβήλ], Vulg. *Ebal*.) The fourth son of Shobal, son of Seir, the Horite of Idumæa (Gen. xxxvi, 23; 1 Chron. i, 40). B.C. ante 1694.

3. (Sept. Γαυβήλ, Josephus *Γίβαλος*, Vulg. *Hebal*.) A mountain on the northern part of the tribe of Ephraim, on the north-eastern side of the valley in which was situated the city of Shechem (now Nablous), in Samaria (q. v.). See Mills, *Three Months at Nablus* (London, 1864).

1. It was here that the Israelites were enjoined to erect an altar, setting up plastered stones, and respond to the imprecations uttered in the valley, according to the divinely prescribed formula, upon those

who should prove faithless to the Sinaitic law (Deut. xi, 29; xxvii, 4, 13), while the responses to the blessings were to be uttered by the other division of the tribal representatives stationed upon the opposite mountain, Gerizim. Both the benediction and the anathema were pronounced by the Levites, who remained with the ark in the centre of the interval (compare Deut. xxvii, 11-26, with Josh. viii, 30-35, with Joseph. *Ant.* iv, 8, 44, and with the comments of the Talmud, *Sota*, 36, quoted in Herxheimer's Pentateuch). But, notwithstanding the ban thus apparently laid on Ebal, it was further appointed to be the site of the first great altar to be erected to Jehovah: an altar of large unhewn stones, plastered with lime, and inscribed with the words of the law (Deut. xxvii, 2-8). On this altar peace-offerings were to be offered, and round it a sacrificial feast was to take place, with other rejoicings (ver. 6, 7). Scholars disagree as to whether there were to be two erections—a kind of cromlech and an altar; or an altar only, with the law inscribed on its stones. The latter was the view of Josephus (*Ant.* iv, 8, 44; v, 1, 19), the former is unhesitatingly adopted by the latest commentator (Keil, *Comment.* on Josh. viii, 32). The terms of Moses's injunction seem to infer that no delay was to take place in carrying out this symbolical transaction. It was to be "on the day" that Jordan was crossed (xxvii, 2), before they "went in unto the land flowing with milk and honey" (ver. 3). Accordingly Joshua appears to have seized the earliest practicable moment, after the pressing affairs of the siege of Jericho, the execution of Achan, and the destruction of Ai had been dispatched, to carry out the command (Josh. viii, 30-35). After this Ebal appears no more in the sacred story. By a corruption of the above-cited texts, the Samaritans transferred the site of the appointed altar to the opposite mountain, which has hence attained the greater notoriety. See GERIZIM.

2. The question now arises, where were Ebal and Gerizim situated? The all but unanimous reply to this is, that they are the mounts which form the sides of the fertile valley in which lies Nablus, the ancient SHECHEM—Ebal on the north and Gerizim on the south.

(1.) It is plain from the passages already quoted that they were situated near together, with a valley between.

(2.) Gerizim was very near Shechem (Judg. ix, 7), and in Josephus's time their names appear to have been attached to the mounts, which were then, as now, Ebal on the north and Gerizim on the south. Since that they have been mentioned by Benjamin of Tudela (Asher, i, 66) and Sir John Maundeville, and among modern travellers by Maundrell (*Mod. Trav.* p. 432).

The main impediment to our entire reception of this view rests in the terms of the first mention of the place by Moses in Deut. xi, 30: A. V. "Are they not on the other side Jordan, by the way where the sun goeth down, in the land of the Canaanites, which dwell in the champaign over against Gilgal, beside the plains of Moreh?" Here the mention of Gilgal, which was in the valley of the Jordan near Jericho, of the valley itself (*Arabah*, mistranslated here only, "champaign"), and of the Canaanites who dwelt there, and also the other terms of the injunction of Moses, as already noticed, seem to imply that Ebal and Gerizim were in the immediate neighborhood of Jericho. This is strengthened by the narrative of Joshua, who appears to have carried out the prescribed ceremonial on the mounts while his camp was at Gilgal (comp. vii, 2; ix, 6), and before he had (at least before any account of his having) made his way so far into the interior of the country as Shechem.

This is the view taken by Eusebius (*Onomasticon*, s. v.  $\text{Ἐβάλ}$ ). He does not quote the passage in Deut., but seems to be led to his opinion rather by the diffi-

culty of the mountains at Shechem being too far apart to admit of the blessings and cursings being heard, and also by his desire to contradict the Samaritans; add to this that he speaks from no personal knowledge, but simply from hearsay ( $\text{Ἀέγεται}$ ), as to the existence of two such hills in the Jordan valley. The notice of Eusebius is merely translated by Jerome, with a shade more of animosity to the Samaritans (*vehementer errant*), and expression of difficulty as to the distance, but without any additional information. Procopius and Epiphanius also followed Eusebius, but their mistakes have been disposed of by Reland (*Palest.* p. 503-4; *Miscell.* p. 129-133).

With regard to the passage in Deut., it will perhaps assume a different aspect on examination. (1.) Moses is represented as speaking from the east side of Jordan, before anything was known of the country on the west, beyond the exaggerated reports of the spies, and when everything there was wrapped in mystery, and localities and distances had not assumed their due proportions. (2.) A closer rendering of the verse is as follows: "Are they not on the other side the Jordan, beyond ( $\text{בְּאַחַד הַצִּדִּים}$ , the word rendered 'the backside of the desert' in Exod. iii, 1) the way of the sunset, in the land of the Canaanite who dwells in the Arabah over against Gilgal, near the terebinths of Moreh?" If this rendering is correct, a great part of the difficulty has disappeared. Gilgal no longer marks the site of Ebal and Gerizim, but of the dwelling of the Canaanites, who were, it is true, the first to encounter the Israelites on the other side of the river, in their native lowlands, but who, we have it actually on record, were both in the time of Abraham (Gen. xii, 6) and of the conquest (Josh. xvii, 18) located about Shechem. The word now rendered "beyond" is not represented at all in the A. V., and it certainly throws the locality much further back; and, lastly, there is the striking landmark of the trees of Moreh, which were standing by Shechem when Abraham first entered the land, and whose name probably survived in Morthia, or Mamorthia, a name of Shechem found on coins of the Roman period (Reland, *Miscell.* p. 137 sq.). See GILGAL.

In accordance with this is the addition in the Samaritan Pentateuch, after the words "the terebinths of Moreh," at the end of Deut. xi, 30, of the words "over against Shechem." This addition is the more credible because there is not, as in the case noticed afterwards, any apparent motive for it. If this interpretation be accepted, the next verse (31) gains a fresh force: "For ye shall pass over Jordan [not only to meet the Canaanites immediately on the other side, but] to go in to possess the land [the whole of the country, even the heart of it, where these mounts are situated (glancing back to ver. 29)], the land which Jehovah your God giveth you; and ye shall possess it, and dwell therein." It may also be asked whether the significance of the whole solemn ceremonial of the blessing and cursing is not missed if we understand it as taking place directly a footing had been obtained on the outskirts of the country, and not as acted in the heart of the conquered land, in its most prominent natural position, and close to its oldest city—Shechem.

This is evidently the view taken by Josephus. His statement (*Ant.* v, 1, 19) is that it took place after the subjugation of the country and the establishment of the tabernacle at Shiloh. He has no misgivings as to the situation of the mountains. They were at Shechem ( $\text{ἐπὶ Σικίμων}$ ), and from thence, after the ceremony, the people returned to Shiloh.

The narrative of Joshua is more puzzling. But even with regard to this something may be said. It will at once be perceived that the book contains no account of the conquest of the centre of the country, of those portions which were afterwards the mountain of Ephraim, Esdraelon, or Galilee. We lose Joshua at

Gilgal, after the conquest of the south, to find him again suddenly at the waters of Merom in the extreme north (x, 43; xi, 7). Of his intermediate proceedings the only record that seems to have escaped is the fragment contained in viii, 30-35. Nor should it be overlooked that some doubt is thrown on this in Josh. viii, 30-35, by its omission in both the Vat. and Alex. MSS. of the Sept.

The distance of Ebal and Gerizim from each other is not such a stumbling-block to us as it was to Eusebius; though it is difficult to understand how he and Jerome should have been ignorant of the distance to which the voice will travel in the clear elastic atmosphere of the East. Stanley has given some instances of this (*Sinai and Pal.* p. 13); others equally remarkable have been observed by those long resident in the neighborhood, who state that a voice can be heard without difficulty across the valley separating the two spots in question (see also Bonar, p. 371).

It is well known that one of the most serious variations between the Hebrew text of the Pentateuch and the Samaritan text is in reference to Ebal and Gerizim. In Deut. xxvii, 4, the Samaritan has Gerizim, while the Hebrew (as in A. V.) has Ebal, as the mount on which the altar to Jehovah and the inscription of the law were to be erected. Upon this basis the Samaritans ground the sanctity of Gerizim and the authenticity of the Temple and holy place, which have existed there. The arguments upon this difficult question will be found in Kennicott (*Dissert.* ii), and in the reply of Verschuir (Levard. 1775; quoted by Gesenius, *De Pent. Sam.* p. 61). Two points may merely be glanced at here which have apparently escaped notice. 1. Both agree that Ebal was the mount on which the cursings were to rest, Gerizim that for blessings. It appears inconsistent that Ebal, the mount of cursing, should be the site of the altar and the record of the law, while Gerizim, the mount of blessing, should remain unoccupied by sanctuary of any kind. 2. Taking into account the known predilection of Orientals for ancient sites on which to fix their sanctuaries, it is more easy to believe (in the absence of any evidence to the contrary) that in building their temple on Gerizim, the Samaritans were making use of a spot already enjoying a reputation for sanctity, than that they built on a place upon which the curse was laid in the records which they received equally with the Jews. Thus the very fact of the occupation of Gerizim by the Samaritans would seem an argument for its original sanctity. On the other hand, all critics of eminence, with the exception of Kennicott, regard this as a corruption of the sacred text; and when it is considered that the invariable reading in Hebrew MSS. and ancient versions, both in this passage and the corresponding one in Josh. viii, 30, is "Ebal," it seems strange that any scholar would for a moment doubt its correctness. Kennicott takes an opposite view, maintaining the integrity of the Samaritan reading, and arguing the point at great length; but his arguments are neither sound nor pertinent (*Dissertations on the Hebrew Text*, ii, 20 sq.). The Samaritans had a strong reason for corrupting the text, seeing that Gerizim was their sanctuary; and they desired to make it not merely the mountain of blessing, but the place of the altar and the inscribed law. See SAMARITANS.

3. Ebal is rarely ascended by travellers, and we are therefore in ignorance as to how far the question may be affected by remains of ancient buildings thereon. That such remains do exist is certain, even from the very meagre accounts published (Bartlett, *Walks about Jerusalem*, App. p. 251 sq.; and Narrative of Rev. J. Mills in *Trans. Pal. Archaeol. Assoc.* 1855), while the mountain is evidently of such extent as to warrant the belief that there is a great deal still to discover.

The report of the old travellers was that Ebal was more barren than Gerizim (see Benjamin of Tadmora, and Maundrell, in *Early Travels in Palestine*, p. 82,

433; Wilson, *Lands of the Bible*, ii, 71); but this opinion probably arose from a belief in the effects of the curse mentioned above. At any rate, it is not borne out by the latest accounts, according to which there is little or no perceptible difference. They are not isolated mountains, but culminating points of a chain. Their declivities facing the vale bear a singular resemblance to each other. They are equally rugged and bare; the limestone strata here and there project, forming bold bluffs and precipices; but the greater portion of the slopes, though steep, are formed into terraces, partly natural and partly artificial. For this reason both mountains appear more barren from below than they are in reality, the rude and naked supporting walls of the terraces alone being thus visible. The soil, though scanty, is rich. In the bottom of the vale are olive groves, and a few straggling trees extend some distance up the sides. The broad summits and upper slopes have no trees, yet they are not entirely bare. The steeper banks are here and there scantily clothed with dwarf shrubbery; while in spring and early summer, rank grass, brambles, and thistles, intermixed with myriads of bright wild flowers—anemones, convolvulus, tulips, and poppies—spring up among the rocks and stones. Ebal is "occupied from bottom to top by beautiful gardens" (Mills; see also Porter, *Leant-book*, p. 332). The slopes of Ebal towards the valley appear to be steeper than those of Gerizim (Wilson, p. 45, 71). It is also the higher mountain of the two. There is some uncertainty about the measurements, but the following are the results of the latest observations (Van de Velde, *Memoir*, p. 178):

Nablûs, above sea,	1672 ft.	
Gerizim do.	2600 "	..... above Nablûs, 928 ft.
Ebal do.	about 2700 "	..... do. 1028 "

According to Wilson (*Lands*, ii, 71; but see Robinson, ii, 277, 280, note), it is sufficiently high to shut out Hermon from the highest point of Gerizim. The structure of Gerizim is nummulitic limestone, with occasional outcrops of igneous rock (Poole, in *Geograph. Journ.* xxvi, 56), and that of Ebal is probably similar. At its base above the valley of Nablûs are numerous caves and sepulchral excavations. This was, doubtless, the necropolis of Shechem (Robinson, iii, 131; Van de Velde, ii, 290). The modern name of Ebal is *Sitti Salamiyah*, from a Mohammedan female saint, whose tomb is standing on the eastern part of the ridge, a little before the highest point is reached (Wilson, p. 71, note). By others, however, it is reported to be called 'Imâd ed-Dîn, "the pillar of the religion" (Stanley, p. 238, note). The tomb of another saint, called Amâd, is also shown (Ritter, p. 641), with whom the latter name may have some connection. On the south-east shoulder is a ruined site bearing the name of 'Askar (Robinson, iii, 132).—Smith, s. v. See SYCHAR.

**Ebbo**, archbishop of Rheims, was the son of a Saxon serf, and was born about 775, or, according to other accounts, about 786. While a boy he became known to the young king Louis, the son of Charlemagne, who sent him to a convent school, and had him educated for the ministry. As he belonged to a serf family, and could not receive orders, Louis set him free, after which he was ordained. After the accession of Louis to the throne, Ebbo's influence rapidly rose, and in 817 the king secured his election as archbishop of Rheims. Soon after, in 822, he placed himself at the head of a mission to the Danes. His plan highly pleased both the king and the Pope. The Danish king Harald allowed him to preach Christianity, but refused to become a Christian himself. Many Danes were baptized; but, owing to some threatening movements against Harald, Ebbo in 823 returned to the emperor, and at the Diet of Compiègne made a full report on his mission. Soon after he undertook a second missionary visit to Denmark, at which he dis-

posed the king favorably towards Christianity. In 826, the king, with his wife, his oldest son, his nephew, and a suite of 400 men, came to the emperor's court at Mayence and was baptized. The mission in Denmark was now placed under Ausgar, and Ebbo returned to his archbishopric. He took an active part in the affairs of the state, and in the war of the sons of Louis against their father, he, with most of the bishops, took side with the sons. He presided at the assembly of bishops which in 833 compelled Louis to do public penance, as such an act, according to the laws of the Church, made him unfit to bear arms. But when, in 834, Louis regained his power, Ebbo was arrested and kept a prisoner in the convent of Fulda. He was brought before the Diet of Diedenhofen in 835, and confessed himself guilty of offences which, in the opinion of the judges, made him unfit for any further administration of his office. He was again confined in the convent of Fulda, where he remained until the death of Louis in 840. He then prevailed upon Lothaire, who made an attempt to possess himself of the whole empire of his father, to reinstate him as archbishop of Rheims (Dec. 6, 840). In May, 841, king Charles, the brother of Lothaire, again expelled him; and as, at the conclusion of peace, Lothaire did not take a special interest in Ebbo, he lost his archbishopric forever. In the last years of his life, king Louis of Germany appointed him, with permission of the Pope, administrator of the diocese of Hildesheim. He died March 20th, 851. Ebbo compiled an *Indiculum Ebbonis de ministris Remensis ecclesie*, an instruction for the clergy of his diocese as to their mode of life, and an *Apologia Archiepiscopi Remensis cum ejusdem ad gentes septentrionales legatione*. They are of small size and no value.—Herzog, *Real-Encyklop.* xix, 447; Wetzler u. Welte, *Kirchen-Lex.* iii, 349. (A. J. S.)

**E'bed** (Heb. *id.* עֶבֶד, *servant* [q. v.], i. e. of God; comp. *Abda*), the name of two men.

1. (Many MSS., and the Syr. and Arab. Versions, have עֶבֶר, *Eber*; Sept. Ἰωβὴλ; Alexand. MS. Ἀβὲδ; Vulg. *Ebed* and *Obed*.) The father of Gaal (q. v.), who headed the insurgents at Shechem against Abimelech, tyrant judg. of the Israelites (Judg. ix, 26-35). B. C. ante 1321.

2. (Sept. Ωβὶθ v. r. Ωβὴν, Vulgate *Abed*.) Son of Jonathan, and family-head of the lineage of Adin; he returned with 50 males from the captivity (Ezra viii, 6). B. C. 459.

**Ebed-jesu**, surnamed **BAR-BEUCHA** (*Son of the Blessed*), an eminent Nestorian theologian, was born in Mesopotamia about the middle of the 13th century. After having been for five years bishop of Sigara, in Arabia, he was made Nestorian bishop of Soba or Nisibe in 1290. Where Ebed-Jesu pursued his studies is not known, but the works which he has left us show that he was fluent in the Arabic, well acquainted with the Greek, and his dogmatical writings especially display an extensive knowledge with philosophy and dialectics. He seems also to have been familiar with the works of the great Jacobite Bar-Hebraeus. His works, which are more than twenty, are mostly of a theological character; on the interpretation of the O. and N. T., on the Logos, sacraments of the Church, and a treatise on the truth of the Faith (pub. by A. Mai in Syriac and Lat., *Script. Vet.* x, 317:—*Epitome or Collection of the Canons of Councils* (also published by Mai):—*Canones xcv apostolici ab Ecclesie ordinationem*:—*Prima christiana doctrinae Diffusio*) (a Description of the Countries that permitted the preaching of the Apostles):—23 Canons of the Apostles, edited by St. Clement:—5 other Canons of the Apostles, published also by St. Clement:—*The Paradise Eden*, containing 50 poems, divided into two parts, called Henoch and Elias, beginning with the Trinity, and ending with the Resurrection. (Comp. Assemani, *Bibl. Or.* iii, 1, p. 325 sq.) Of literary importance is his catalogue of 200 Syr-

ian writers (ably edited by Assemani, *Bibl. Or.* iii, 1, p. 1-362), at the close of which his own writings are also given.—Hoefer, *Nouv. Biog. Gén.* xv, 594; Herzog, iii, 613; Assemani, *Bibl. Orient.* iii, part i. (J. H. W.)

**Ebed-Jesu**, a Chaldean patriarch and Syrian writer, lived about the middle of the 16th century. He received his education at Gozarta, and was afterwards bishop of that place. In 1554 he was elected as the successor of Sulaka, first patriarch of the Nestorians, and confirmed by the Pope in 1562. Ebed-Jesu was a man of great erudition; he was familiar with the writings of all the Greek and Latin fathers, and was also master of the Arabic, Chaldee, and the Syriac. Many of the Nestorians were converted by him, and the numbers of the Chaldees were augmented under his administration. He died a few years after his visit to Rome (1562), in a monastery at the village of Seert in Mesopotamia. We have from him a poem in three parts: *Sur le voyage à Rome, le retour et la mort de Sulaka; Poème à la louange de Pie IV.; a Confession of Faith*, read at the 22d session of the Council of Trent.—Assemani, *Bibl. Orient.* i. 538; iii, p. 3, 325; Hoefer, *Nouv. Biographie Générale*, xv, 595. (J. H. W.)

**E'bed-me'lech** (Heb. *E'bed-Me'lek*, עֶבֶד מֶלֶךְ, *servant of the king*, i. q. Arabic *Abd el-Mulek*, Sept. Ἀβὲμῆλεχ, Vulgate *Abdemelech*), an Ethiopian at the court of Zedekiah, king of Judah, who was instrumental in saving the prophet Jeremiah from death by famine (Jer. xxxviii, 7-13), and who, for his humanity in this circumstance, was promised deliverance when the city should fall into the enemy's hands (Jer. xxxix, 15-18). B. C. 589. See JEREMIAH. He is there styled a eunuch (עֲבָדֵי הַמֶּלֶךְ), and he probably had charge of the king's harem (comp. xxxviii, 22, 23), an office which would give him the privilege of free private access to the king; but his name seems to be an official title = *King's slave*, i. e. *minister*. See EUNUCH.

**Ebeh**. See REED.

**Ebel**. See TALMUD.

**Ebel**, JOHANN WILHELM, a Protestant mystic and theosophist, was born in 1784 at Passenheim, in the province of Eastern Prussia. In 1809, while a preacher in the Established Church of Prussia, he attracted the attention of his ecclesiastical superiors on account of his connection with the theosophist Schönher (q. v.). Subsequently he was appointed preacher at Königsberg, where he gathered around him a circle of enthusiastic followers, among them a few noble men and a larger number of noble women. Foremost among the latter were the countess of Kanitz and the countess von der Gröben. In 1837, at the request of the Consistory of that city, a suit was instituted against him and his friend Diestel, which belongs among the most remarkable trials of the kind in modern times. He was in 1842 acquitted from the chief charge of the establishment of a new sect, but deposed from office for violating his official duties by communicating to others theosophic and philosophical views differing from the doctrines of the Church. He died in 1861, at the villa of his friend the countess von der Gröben. Ebel wrote a number of works, chiefly of a mystic nature, among which are the following: *Die Weisheit von Oben* (1822):—*Der Tagesanbruch* (1824):—*Die geistliche Erziehung* (1825):—*Bibelworte u. Winke* (1827):—*Die Philosophie der heil. Urkunde* (1854-56). A full account of Ebel, his doctrines and followers, is given in Dixon, *Spiritual Wives* (London and Philadelphia, 1868), where is also printed for the first time a paper by professor Sachs, which was the chief evidence used against Ebel. See also Diestel, *Das Zengerverhör in d. Prozesse wider d. Prediger Ebel u. Diestel* (Leipzig, 1838), and Ernst count von Kanitz (follower of Ebel), *Aufklärung nach Actenquellen*, etc. (Basel, 1862). (A. J. S.)

**Eben-** (עֵבֶן, *e'ben, stone*), stands as a prefix in several geographical names, which designate monuments set up to commemorate certain events [see **STONE**]; e. g. **EBEN-BOHAN**; **EBEN-EZEL**; **EBEN-EZER**; **EBEN-ZOHELETH**.

**Eben-bohan.** See **BOHAN**.

**Eben-azel.** See **EZEL**.

**Eb'en-e'zer** (Heb. with the art. *E'ben ha-E'zer*, עֵבֶן עֶזֶר, *stone of the help*; Sept. Ἀβενεζερ; Josephus translates λιθὸς ἰσχυρός), the name given to a place marked by a monumental stone which Samuel set up as a memorial of the divine assistance in battle obtained against the Philistines (1 Sam. vii, 12). See **PILLAR**. Twenty years before this, the same spot (mentioned in the history under the same name by anticipation of its subsequent designation) witnessed the discomfiture of the Hebrew hosts, the death of the high-priest's sons, and the capture of the sacred ark by the Philistines (1 Sam. iv, 1; v, 1). Its position is carefully defined (1 Sam. vii, 12) as between Mizpeh—"the watch-tower," one of the conspicuous eminences a few miles N. of Jerusalem—and Shen, "the tooth" or "crag," apparently some isolated landmark. Neither of these points, however, has been identified with certainty—at least not the latter. According to Josephus's record of the transaction (*Ant.* vi, 2, 2), the stone was erected to mark the limit of the victory, a spot which he calls *Corrhæa*, but in the Hebrew **BETH-CAR** (q. v.). Eusebius and Jerome affirm (*Onomast.* s. v. Ἀβενεζερ, *Abenezzer*) that it lay between Jerusalem and Ashkelon, near (πλησίον, *juxta*) Bethshemesh. Now Bethshemesh stands on a low ridge on the south side of the rich valley of Sorar. On the opposite side of this valley, on a rising ground, about three miles north-west of Bethshemesh, are the ruins of an old village called *Beit-fur*. The situation answers in every respect to that assigned to Beth-car; and the name may possibly be an Arab corruption of the latter. It lies in the direct route from Mizpeh to the plain of Philistia, and is just on the borders of the latter province, where a pursuing army would halt (Porter, *Handbook for Syr. and Pal.* p. 283). But, as this is very far from the probable site of Mizpeh (Nehy-Samwil), it is hardly possible to fix the position of Eben-ezer at that of Beth-car. The monumental stone in question may rather have been set up at the point where the enemy began to flee, and we may therefore seek its locality nearer the Israelitish metropolis, possibly at the modern village *Bidlu*, a short distance west of Nehy-Samwil (Robinson, *Researches*, ii, 133, note). See **SIEN**.

**Eben-zoheleth.** See **ZOHELETH**.

**E'ber** (Heb. *id.* עֵבֶר, country *beyond*), the name of five men.

1. (Sept. Ἐβερ and Ἐβερ, Vulg. *Heber*.) Eber (as the name should be Anglicized) was the son of Salah, and father of Peleg, being the third post-diluvian patriarch after Shem (Gen. x, 24; xi, 14; 1 Chron. i, 18, 25). B. C. 2448-1984. He is claimed as the founder of the Hebrew race (Gen. x, 21; Num. xxiv, 24). See **HEBER**. In Luke iii, 35, his name (Ἐβερ) is Anglicized *Heber*.

2. (Sept. אֱבֵר, Vulg. *Heber*.) The youngest of the seven heads of families of the Gadites in Bashan (1 Chron. v, 13; A. V. "Heber"). B. C. 782.

3. (Sept. אֱבֵר, Vulg. *Heber*.) The oldest of the three sons of Elpal the Benjamite, and one of those who rebuilt Ono and Lod, with their suburbs (1 Chron. viii, 12). B. C. 535.

4. (Sept. אֱבֵר, Vulg. *Heber*.) One of the heads of the families of Benjamites resident at Jerusalem (1 Chron. viii, 22; A. V. "Heber"). B. C. 535.

5. (Sept. אֱבֵר, Vulg. *Heber*.) The head of the priestly family of Amok, in the time of the return from exile under Zerubbabel (Neh. xii, 20). B. C. 535.

**Eber, PAUL**, a companion of Luther and Melancthon, and an eminent Hebrew scholar and theologian, was born at Kissingen, Nov. 8, 1511. He received his first instruction from his father, and continued his studies at Anspach. The sudden death of his mother caused his father to recall Paul from Anspach, and while on his way home he was thrown from his horse and became lumbpacked. In 1526 he had so far recovered that he could resume his studies at Nuremberg, and in 1532 he entered the university at Wittenberg. Here he was employed as amanuensis to Melancthon, with whom he became so intimate that he consulted him on all important matters, and hence Eber received the name of Philip's Repository (*Repertorium Philippi*). He was also a faithful disciple of Luther. In 1536 he began to lecture on grammar and philosophy, and in 1541 he accompanied Melancthon to the Diet at Worms. In 1544 he was appointed professor of Latin grammar, in 1550 dean of the philosophical faculty, and in 1551 rector of the university. After the death of Förster (1556) he was appointed professor of Hebrew and chaplain to the royal chapel at Wittenberg. These positions he soon changed for others, and in 1559 he was made general superintendent of the electorate, and, as doctor of theology, a member of the theological faculty of the university. From this time to the day of his death, Dec. 16, 1569, he devoted himself entirely to theology and to the faithful discharge of his duties as general superintendent of the electorate. After the death of Melancthon he was regarded as the head of the university. He took large part in the Adiaphoristic and Crypto-Calvinistic controversies, but always showed himself moderate and learned. His principal works are: *Expositio Evangeliorum* (Franf. 1576);—*Calendarium historicum* (1551, 4to);—*Historia populi judæici a reditu ex Babilonico exilio usque ad ultimum exilium Jerosolymæ* (Witeb. 1458; new ed. 1562, and transl. into German, French, and Dutch);—*Unterricht u. Bekenntn. vom h. Sacrament des Leibs u. Bluts unsers Herrn* (Witth. 1562);—*Biblia Latina* (Vitæm. 1565);—*Expositio Evangelicorum Dominicalium* (Franf. 1576);—*Hofer, Novæ Biog. Génér.* xv, 599 sq.; *Hertzog, Real-Encycl.* iii, 618 sq.; *Plank, Gesch. der protest. Theol.* iv, Theil i (Lpz. 1798), 448-525; *Sixt, Paul Eber* (Heidel. 1843, and another book by the same author, Anspach, 1857); *Pressel, Paul Eber nach gleichzeitigen Quellen* (1862); *Bibl. Sacra*, xx, 644 sq.

**Eberhard, JOHANN AUGUST**, a Rationalistic theologian of Germany, was born in 1739 at Halberstadt. He studied theology at Halle, and was in succession preacher at Halberstadt, Berlin, and Charlottenburg. The latter position he obtained by express order of king Friedrich II. In 1778 he was appointed professor of philosophy at Halle, where he opposed the idealism of Kant and Fichte. He died in 1809. Eberhard is a representative of what is called "the vulgar Rationalistic school" (*Vulgär-Rationalismus*). He wrote a considerable number of theological, philosophical, historical, and other works. Among his theological works are: *Næve Apologie des Socrates* (Berlin, 1772, 8d ed. 1788);—*Vorbereitung zur natürl. Theologie* (Halle, 1781);—*Geist des Urchristenthums* (Halle, 1807-1808), and *Sittenlehre der Vernunft* (Berlin, 1781).—*Brockhaus, Conversations-Lex.* s. v. (A. J. S.)

**Eberlin, ANTON**, one of the German reformers, was born in Swabia towards the end of the 15th century. He entered the Franciscan order, and was chosen preacher of the Franciscan convent at Tübingen, from which, in consequence of some difficulties, he was, in 1519, transferred to Ulm. Here he became acquainted with Luther's writings, and having adopted his doctrines, had to leave Ulm in 1521. Repairing to Basle, he became very popular, but was driven away by the bishop of Basle. He found an asylum with Ulrich von Hutten and Francis of Sickingen, and wrote with them several works on ecclesiastical and monas-

tical abuses. In 1522 he came to Wittenberg, where he became personally acquainted with Luther and with Melancthon, under the influence of whose teaching he wrote in the same year his *Vom Missbrauche christlicher Freiheit*, breathing a charitable spirit. In 1524 he went to Erfurt, where he preached for some time, and thence to Wertheim on the Main (1526). He died soon after. His works, to the number of 34, were mostly of local interest; among the others, the most important one, entitled *Wie sich ein Diener Gottes worts im all seyden thun halten soll* (Wittenberg, 1525, 4to), has seen several editions, and can be found in A. H. Franke, *Monita pastoralia*. See Döllinger, *d. Reformation*, etc. i, 205; Strobel, *Liter. Museum*, i, 365; Herzog, *Real-Encyclop.* iii, 620.

**Ebert, Jacob**, an eminent Hebrew scholar, was born at Sprottau in 1549. He was professor of Hebrew and theology at the university then in Frankfort on the Oder, now in Berlin, and at one time its *rector magnificus*. So versed was he in Hebrew that he could write in that language. He died in 1614. His works are, *Historia Juramentorum* (Frankfort on the Oder, 1588, 8vo);—*Institutio intellectus cum elegantia* (ibid. 1597);—*Electa Hebraea 750 a libro Rabbinico Milchar Haphenimim* (1630, 12mo);—*Tetrasticha Hebraea in textus evangelicos*, etc.—Hoefler, *Nouv. Biog. Générale*, xv, 600 sq. (J. H. W.)

**Ebert, Theodor**, son of Jacob Ebert (q. v.), succeeded his father as professor of Hebrew at the university in Frankfort on the Oder. He shared also the honor of being rector with his father. Ebert died in 1630. Among his principal works are, *Vita Christi, tribus de curiis rhythmorum quadratorum hebraicorum* (Frankf. on the Oder, 1615, 4to);—*Animale psalticorum Centuria* (1619, 4to);—*Manueliones aphoristica ad discursum artium. sectiones xvi* (1620, 4to);—*Chronologia precipuorum Lingue Sancte Doctorum, ab O. C. ad suam usque aetatem* (1620, 4to);—*Eulogia jurisconsultorum et politiorum qui linguam hebraicam et reliquis orientales excoluerunt* (1628);—*Poetica Hebraica* (1638, 8vo), in which the Hebrew metres are more extensively exemplified than in any other work.—Hoefler, *Nouv. Biog. Gén.* xv, 610; Etheridge, *Intr. to Heb. Literature*, p. 374.

**Ebi'asaph** (Heb. *Elyasaph'*, עֵיזָאֵפֶן, prob. a contraction for עֵזְרָאֵלֶּךָ, *Abiasaph*; Sept. Ἀβιασαφ and Ἀβισαφ, Vulg. *Abiasaph*), the son of Elkanah and father of Assir, in the genealogy of the Kohathite Levites (1 Chron. vi, 23). B. C. cir. 1660. In ver. 37 he is called the son of Korah, from a comparison of which circumstance with Exod. vi, 24, most interpreters have identified him with the *Abiasaph* (q. v.) of the latter passage; but (unless we there understand not three sons of Korah to be meant, but only three in regular descent), the pedigrees of the two cannot be made to tally without violence. See ASSIR. From 1 Chron. ix, 19, it appears that he had a son named Kore. In 1 Chron. xxvi, 1, his name is abbreviated to אֶסָאֵפֶן.

**Ebionites**, a sect of Judaizing Christians who received the doctrines of the Gospel very partially, and denied the divine nature of Christ. They do not appear to have been at any time numerous, and it is doubtful whether they ever obtained such consistency as to have a definite creed.

1. *The Name*.—The name is derived from the Hebrew עֵיזָאֵפֶן, *poor*. This term was anciently applied in derision to Christians in general (Epiphanius, *adv. Haer.* xxix, 1), and came later to designate Jewish Christians (Origen, *cont. Celsum*, ii, 1). Fürst (*Lexicon*, s. v.) makes the derivation refer to Matt. v, 3, making "Ebionites" equivalent to "oppressed pious exiles" (Isa. xxv, 4). Eusebius (*Hist. Eccles.* iii, 27) fancifully derives the name from "the poverty and meanness of the Ebionite doctrine concerning Christ." Tertullian (*De Præscrip. Haeret.* c. xxxiii) derives it from a founder, *Ebion*, who maintained the authority

of the Jewish law, and rejected the miraculous conception and divine nature of spirit. The derivation first above given is now generally adopted.

2. *History*.—Dorner (*Person of Christ*, Edinb. transl. i, 189 sq.) traces the Ebionitish tendency as far back as the Epistle to the Hebrews. "From that zeal for the law with which Paul had to contend, the Judaizing spirit was led not at first to impeach the Christology, but rather the Soteriology, or the work of Christ. But the consequence of the legal stand-point soon showed itself. The party which the Epistle to the Hebrews had in view must have over-estimated the law of the O. T. regarding holy times, places, acts, and persons alike, and have been wanting in the Christian knowledge which knows how to secure to the O. T. its abiding significancy, which it has as a divine institute without imperilling the newness and conclusive completeness of Christianity." Epiphanius traces the origin of Ebionitism to the Christians who fled to Pella after the destruction of Jerusalem, A. D. 66 (*adv. Haer.* xxix, 1). According to Hegeppus (*Hist. Eccles.* iv, 22), one Thebutis, at Jerusalem, about the beginning of the second century, "began to corrupt the Church secretly on account of his not being made a bishop." "We find the sect of the Ebionites in Palestine and the surrounding regions, on the island of Cyprus, in Asia Minor, and even in Rome. Though it consisted mostly of Jews, Gentile Christians also sometimes attached themselves to it. It continued into the fourth century, but at the time of Theodoret was entirely extinct. It used a Hebrew Gospel, now lost, which was probably a corruption of the Gospel of Matthew" (Schaff, *Church History*, i, § 68, p. 214).

3. *Doctrines*.—Dr. Schaff sharply distinguishes Ebionism from Gnosticism as follows: "Ebionism is a Judaizing, pseudo-Petrine Christianity, or a Christianizing Judaism; Gnosticism is a paganizing or pseudo-Pauline Christianity, or a pseudo-Christian heathenism. The former is a particularistic contraction of the Christian religion; the latter a vague expansion of it" (*Church History*, i, § 67). According to the same writer, "the characteristic marks of Ebionism in all its forms are, degradation of Christianity to the level of Judaism, the principle of the universal and perpetual validity of the Mosaic law, and enmity to the apostle Paul. But, as there were different sects in Judaism itself, we have also to distinguish at least two branches of Ebionism, related to each other, as Pharisaism and Essenism, or, to use a modern illustration, as the older deistic and the speculative pantheistic rationalism in Germany, or the two schools of Unitarianism in England and America. (1.) The common Ebionites, who were by far the more numerous, embodied the Pharisaic legal spirit, and were the proper successors of the Judaizers opposed in the epistle to the Galatians. Their doctrine may be reduced to the following propositions: (a.) Jesus is, indeed, the promised Messiah, the son of David, and the supreme lawgiver, yet a mere man, like Moses and David, sprung by natural generation from Joseph and Mary. The sense of his Messianic calling first arose in him at his baptism by John, when a higher spirit joined itself to him. Hence Origen compared this sect to the blind man in the Gospel who called to the Lord without seeing him, 'Thou son of David, have mercy on me!' (b.) Circumcision and the observance of the whole ritual law of Moses are necessary to salvation for all men. (c.) Paul is an apostate and heretic, and all his epistles are to be discarded. The sect considered him a native heathen, who came over to Judaism in later life from impure motives. (d.) Christ is soon to come again to introduce the glorious millennial reign of the Messiah, with the earthly Jerusalem for its seat. (2.) The second class of Ebionites, starting with Essenic notions, gave their Judaism a speculative or theosophic stamp, like the errorists of the Epistle to the Colossians. They form the stepping-stone to Gnosticism.

Among these belong the Elkesaites" (Schaff, *Ch. Hist.* i, § 68, 214 sq.). The pseudo-Clementine homilies teach a speculative form of Ebionism, essentially Judaizing in spirit and aim [see CLEMENTINES, ii, p. 383]; and comp. Schaff, *Ch. History*, i, § 63; Dorner, *Person of Christ*, Edinb. transl., p. 203 sq.).

4. Ebionism has reappeared, since the Reformation, in Socinianism (q. v.), and in the other forms of what is called Unitarianism (q. v.). Some Unitarian writers have undertaken to show that Ebionism was the original form of Christian doctrine, and that the Church doctrine as to the person of Christ was a later development; so Priestley, in his *History of the Corruptions of Christianity* (Birmingham, 1782). Bishop Horsley replied to Priestley in his *Charge to the Clergy of St. Albans* (1783), and in other tracts, collected in *Tracts in Controversy with Dr. Priestley* (Dundee, 1812, 3d ed.). Horsley, in this controversy, made use of Bull's learned treatment of the subject in his reply to Zwicker (see Bull, *On the Trinity*, Oxford, 1855, 3 vols.: i, 116; ii, 376; iii, 175 et al. See also Waterland, *Works*, Oxf. 1843, 6 vols.: iii, 554 sq.). A far abler advocate of the Socinian view is Baur, in his *Christenthum d. drei ersten Jahrhunderte; Lehre v. d. Dreieinigkeit Gottes; Dogmengeschichte*, etc. Baur's position is clearly stated, and refuted by professor Fisher (*Am. Presb. and Theolog. Rev.* Oct. 1864, art. i). "Baur agrees with the old Socinians in the statement that the Jewish Christianity of the apostolic age was Ebionite. But, unlike them, he holds that we find within the canon a great departure from, and advance upon, this humanitarian doctrine of Christ's person. He professes to discover in the New Testament the consecutive stages of a progress which, beginning with the Unitarian creed, terminates in the doctrine of Christ's proper divinity. There occurred at the end, or before the end, of the apostolic age, a reaction of the Jewish Christianity, which with Baur is identical with the Judaizing or Ebionite element; and this type of Christianity prevailed through the larger part of the second century." (See Fisher, *l. c.*, for a criticism of this view, and for a brief but luminous sketch of Ebionism. On the other side, see *N. Amer. Rev.* April, 1864, p. 569 sq.).

*Literature.*—See, besides the works already cited, Irenæus, *Har.* i, 26 (Ante-Nicene Library, v, 97); Gieseler, *Ueber die Nazariër und Ebioniten*, in Archiv für A. & N. Kircheng., iv, 279 sq. (Leipzig, 1820); Mosheim, *Commentaries*, i, 220, 400; Neander, *Church Hist.* i, 344, 350; Herzmann, *Die Clementinen* (Hamb. 1844), p. 362 sq.; Schlegel, *Real-Encyclopædie*, iii, 621 sq.; Martensen, *Dogmatics* (Edinburgh, 1866), § 128; Shedd, *History of Doctrines*, i, 106 sq.; Burton, *Eccles. History*, Lect. xi; Burton, *Bampton Lectures* (Oxford, 1829), notes 73-84.

**Ebnerian Manuscript** (CODÆX EBNERIANUS, usually designated as No. 105 of the Gospels, 48 of the Acts, and 24 of the Pauline Epistles), a beautiful cursive Greek MS. of the entire N. T. except Rev., consisting of 425 quarto vellum leaves; assigned to the 12th century; formerly belonging to Jerome Ebner von Eschenbach, of Nuremberg, and now in the Bodleian Library (No. 136). A fac-simile and description are given by Tregelles, in Horne's *Introd.* p. 220. See MANUSCRIPTS, BIBLICAL.

**Ebōda** (Ἐβόδα), a city mentioned only by Ptolemy (xvii, 18) as situated in the sea-board quarter of Arabia Petraea (see Reland, *Palaest.* p. 463), in 65½° and 304°, and marked on the *Peutingier Table* as lying on the Roman road 23 Roman miles S. of Elusa (q. v.). Dr. Robinson (*Researches*, i, 287) discovered the site in the modern *el-Abdeh* (otherwise *Anfeh*, *ib.* p. 560), eight hours from the site of Elusa, at the junction of Wady es-Seram with Wady el-Bircin (*ib.* p. 284). It contains extensive ruins, situated on a rocky ridge from sixty to one hundred feet high; especially the remains of an acropolis, of a capacious castle, and of a

large Greek church, with numerous walls, columns, etc., still standing, and several wells or reservoirs, but no inhabitants (*ib.* p. 285, 286).

**Ebony** (עֵבֶן, *hobni'*, stony, q. d. stone-wood [comp. the Germ. *Steinholz*, "fossil-wood"], only in the plur. עֵבֶן עֵבֶן, *hobnim'* [text עֵבֶן עֵבֶן for עֵבֶן עֵבֶן, *hobenim'*], Sept. [by some confusion or misinterpretation, see Rosenmüller, *Schol.* in loc.] τῶν εἰσαγομένων, Symmachus ἐβένου, Vulg. [dentes] *hebeninos*) occurs only in one passage of Scripture, where the prophet Ezekiel (xxvii, 15), referring to the commerce of Tyre, says, "The men of Dedan were thy merchants; many isles were the merchandise of thine hand; they brought thee for a present horns of ivory and ebony." See **DRY-DAN**. The Hebrew word is translated "ebony" in all the European versions; but, as Bochart states (*Hù roz.* i, 20, part ii), the Chaldee version, followed by R. Scoloro and other Jews, as well as the Greek and Arabic versions, render it by *pearl-fur* (*parones*). Some of the Hebrew critics, however, as Kimchi, also acknowledge that Arabian *ebony* is meant. Of the correctness of this opinion there can now be no doubt. In the first place, we may allude to Dedan being considered one of the ports of Arabia on the Persian Gulf, or at least to the south of the Red Sea; and, secondly, as observed by Bochart, the terms *hobnim* and *ebony* are very similar, the latter word being variously written by ancient authors, as ἐβένη, ἐβένος, ἐβένου, *ebenus* and *hebenus*. The last form is used by Jerome in his Latin, and ἐβένος by Symmachus in his Greek version. The Arabs have *abnis*, which they apply to ebony, and by that name it is known in Northern India at the present day. Forskål mentions *abnis* as one of the kinds of wood imported in his time from India into Arabia. Whether the Arabic name be a corruption of the Greek, or the Greek a modification, as is most likely, of some Eastern name, we require some other evidence besides the occurrence of the word in Arabic works on materia medica to determine, since in these Greek words are sometimes employed as the principal terms for substances with which they are not well acquainted. *Bardus* is, however, given by some as the Arabic name, *abnis* as the Persian. Naturalists have found the latter applied to ebony in north-west India, as did Forskål on the Red Sea.

Ebony wood was highly esteemed by the ancients, and employed by them for a variety of purposes (*Theophr. Hist. Pl.* iv, 5; *Plin. II. N.* vi, 30, § 35; xii, 4, § 8, 9; *Strabo*, xv, 703; *Pausan.* i, 42, 5; viii, 17, 2; *Ovid. Met.* xi, 610; compare *Barhebr. Chron.* p. 181). It is very appropriately placed in juxtaposition with ivory, on account of the beautiful contrast in color. Ivory and ebony are probably, however, also mentioned together because both were obtained from the same countries, Ethiopia and India; and, among the comparatively few articles of ancient commerce, must, from this cause, always have been associated together, while their contrast of color and joint employment in inlaid work would contribute as additional reasons for their being adduced as articles characteristic of a distinct commerce. But it is not in Ezekiel only that ebony and ivory are mentioned together, for Diodorus, as quoted by Bochart, tells us that an ancient king of Egypt imposed on the Ethiopians the payment of a tribute of ebony, gold, and elephants' teeth. So Herodotus (iii, 97), as translated by Bochart, says, "Ἐθιοπίης Περσῶν προτριαννῶν τριβυτὸν ἔχοντων δύοσιν χενεϊκῶσιν αὐρῶν ἀπυρῶν (id est, ignem nondum expertis), et ducentas eburi phalangas, et magnos elephanti dentes viginti." Pliny, referring to this passage, remarks, "But Herodotus assigneth it rather to Ethiopia, and saith that every three years the Ethiopians were wont to pay, by way of tribute, unto the kings of Persia, 100 billets of the timber of that tree (that is, ebene), together with gold and yvorie;" and again, "From Syene (which

confineth and boundeth the lands of our empire and dominion) as farre as to the island Meroë, for the space of 996 miles, there is little ebene found: and that in all those parts betwene there be few other trees to be found but date-trees, which peradventure may be a cause that ebene was counted a rich tribute, and deserved the third place, after gold and ivory" (Holland's *Pliny*, xii, 4). It is sometimes stated that the ancients supposed ebony to come only from India. This arose probably from the passage of Virgil (*Georg.* ii, 117): "Sola India nigrum fert ebum." But the term "India" had often a very wide signification, and included even Ethiopia. Several of the ancients, however, mention both Indian and Ethiopian ebony, as Dioscorides and Pliny; while some mention the Indian, and others the Ethiopian only, as Lucan (*Phars.* x, 304): "Nigris Meroë fecunda colonis, læta comis ebeni."

The only objection to the above conclusion of any weight is, that *hobnim* is in the plural form. To this Bochart and others have replied, that there were two kinds of ebony, as mentioned by Theophrastus, Dioscorides, etc., one Ethiopian, the other Indian. Fuller and others maintain that the plural form is employed because the ebony was in pieces: "Refert ad ebeni palangas, quæ ex India et Æthiopia magno numero afferbantur. Φάλαγγας vocant Herodotus et Arrianus in Periplus. Plinius *palangas*, aut *phalangas*, variante scriptura. id est, fustes teretes, et qui navibus spinnuntur, aut quibus idem onus plures lajulant" (Bochart, *l. c.*). But the names of other valued foreign woods, as Shittim and Almuggim, are also used in the plural form. Besides *abnis*, Arab authors, as stated by Bochart (*l. c.*), mention other words as similar to and substituted for ebony: one of these is called *shiz*, *shizi*; also *susem* and *semsem*, in the plural form *sesamim*, described as "nigrum lignum ad patinas conficiendas." Hence, in the Koran, those who are tormented in Gehenna, it is said, will issue from the fire after a certain period of confinement in it: "They will go forth, I say, like the wood *sesamim*;" that is, black, from being burnt in the fire. That such a wood was known we have the testimony of Dioscorides: "Some sell *sesamine* or acanthine wood for ebony, as they are very similar." Some critics, and even Sprengel, in his late edition of Dioscorides, read *σικάνια* instead of *σητάμια*, for no other reason apparently but because *σικάνια* denotes a tree with which European scholars are acquainted, while *sesamina* is only known to those who consult Oriental writers, or who are acquainted with the products of the East. Bochart rightly reprehends this alteration as being unnecessary, in view of the existence of the words *sesamina*, *sasim*, or *semsem* among the modern Arabs, and cites a notice of Arrian to the same effect (Bochart, *l. c.*). The above word is by Dr. Vincent translated *scamum*; but this is an herbaceous oil-plant.

If we look to the modern history of ebony, we shall find that it is still derived from more than one source. Thus Mr. Holtzappel, in his recent work on Turning, describes three kinds of ebony. (1.) One from the Mauritius, in round sticks like scaffold poles, seldom exceeding fourteen inches in diameter, the blackest and finest in the grain, the hardest and most beautiful. (2.) The East Indian, which is grown in Ceylon and the Peninsula of India, and exported from Madras and Bombay in logs from six to twenty, and sometimes even twenty-eight inches in diameter, and also in planks. This is less wasteful, but of an inferior grain and color to the above. (3.) The African, shipped from the Cape of Good Hope in billets, the general size of which is from three to six feet long, three to six inches broad, and two to four inches thick. This is the least wasteful, as all the refuse is left behind; but it is the most porous, and the worst in point of color. No Abyssinian ebony is at present imported: this, however, is more likely to be owing to the different routes which commerce has taken, although it is

again returning to its ancient channels, than to the want of ebony in the ancient Ethiopia. From the nature of the climate, and the existence of forests in which the elephant abounds, there can be no doubt of its being well suited to the group of plants which have been found to yield the ebony of Mauritius, Ceylon, and India, the genus *Diospyrus* of botanists. Of this several species yield varieties of ebony as their heart-wood, as *D. ebenum* in the Mauritius, and also in Ceylon, where it is called *kaluwara*. It is described by Retz "foliis ovato-lanceolatis, acuminatis, geminis hirtis;" and he quotes as identical *D. glaberrima* (Fr. Rottb. *Nor. Act. Haon.* ii, 540, tab. 5). *D. ebenaster* yields the bastard ebony of Ceylon, and *D. hirsuta* the Calamander wood of the same island, described by Mr. Holtzappel as of a chocolate-brown color, with black stripes and marks, and stated by him to be considered a variety of ebony. *D. melanoxyylon* of Dr. Roxburgh is the ebony-tree of Coromandel, and is figured among Coromandel plants (i, No. 46); it grows to be a large tree in the mountainous parts of Ceylon, and in the Peninsula of India—in Malabar, Coromandel, and Orissa. The black part of the wood of this tree alone forms ebony, and is found only in the centre of large trees, and varies in quantity according to the size and age of the tree. The outside wood is white and soft, and is soon destroyed by time and insects, leaving the black untouched (Roxb. *Fl. Ind.* ii, 530). Besides these, there is in the Peninsula of India a wood called *blackwood* by the English, and *sit-sal* by the natives: it grows to an immense size, is heavy, close-grained, of a greenish-black color, with lighter-colored veins running in various directions. It is yielded by the *Dalbergia latifolia*. To the same genus belongs the *Sissu*, one of the most valued woods of India, and of which the tree has been called *Dalbergia sissu*. The wood is remarkably strong, of a light grayish hue, with darker-colored veins. It is called *sissu* and *shishum* by the natives of India. This is the name which we believe is referred to by Arab authors, and which also appears to have been the original of the *sesamina* of Dioscorides and of the Periplus. The name may be applied to other nearly allied woods, and therefore, perhaps, to that of the above *D. latifolia*. It is a curious confirmation of this that Forskål mentions that in his time *shishum*, with teak and ebony, was among the woods imported from India and Arabia. It is satisfactory to have apparently such competent confirmation of the general accuracy of ancient authors, when we fully understand the subjects and the products of the countries to which they allude (Kitto, s. v.). According to Sir E. Tennent (*Ceylon*, i, 116) the following trees yield ebony: *Diospyros ebenum*, *D. reticulata*, *D. ebenaster*, and *D. hirsuta*. The wood of the first-named tree, which is abundant throughout all the flat country to the west

Branch of *Diospyrus Ebenum*.

of Trincomali, "excels all others in the evenness and intensity of its color. The centre of the trunk is the only portion which furnishes the extremely black part which is the ebony of commerce; but the trees are of such magnitude that reduced logs of two feet in diameter, and varying from ten to twelve feet in length, can readily be procured from the forests at Trincomali" (*Ceylon*, l. c.) It bears a berry that is eaten by the natives when ripe. The leaves are elliptical, having numerous veins. The corolla or colored part is shaped like an antique vase, and bears eight stamens (Kitto, *Pict. Bible*, in loc. Ezek.). There is every reason for believing that the ebony afforded by the *Diospyros ebenum* was imported from India or Ceylon by Phœnician traders, though it is equally probable that the Tyrian merchants were supplied with ebony from trees which grew in Ethiopia (Smith, s. v.). See TYRE. (See Smith's *Dict. of Class. Antiq.* s. v. Ebenus; *Penny Cyclop.* s. v. Ebony; Geiger, *Pharmaceut. Botanik*, i, 697). See BOTANY.

**Ebraldines**, ORDER OF THE. See FONTÉVRAULD.

**Ebrardus**, an author and theologian of Béthune, in France, who lived during the latter part of the 12th century and the beginning of the 13th. He is known only by his writings. One of the principal of these, his *Græcismus*, a collection of rules of rhetoric, prosody, grammar, and logic, was for many years used as a text-book. His principal theological works are *Liber antihæresis* against the Cathari, which was first published under the title *Contra Waldenses* in Gretser's *Trias scriptorum contra Waldenses* (Inglstadt, 1614, 4to), and reprinted in *Bibl. Patr. Max.* (of Lyons, vol. xxiv), and lastly in Gretser's *Opera Omnia* (vol. xii, part ii).—Herzog, *Real-Encyclopædie*, iii, 625.

**Ebremar** or **Evermer**, the third Latin patriarch of Jerusalem, was born at Cikes, near Terouanne, towards the close of the 11th century. Admitted by Lambert, bishop of Arras, to the priesthood, he joined the first Crusaders, and was of the number appointed by Godfrey de Bouillon canon at the holy sepulchre. In 1103, on the deposition of Daimbert (q. v.), he was elevated to the patriarchate, in which, after much contention on the part of Daimbert, he was solemnly confirmed by the decree of a council. He was a member of the Council of Nablous (1120), and in 1123 signed the treaty between the crusading princes and the Venetians. A letter of this prelate, with the response by Lambert of Arras, is contained in the 5th vol. of the *Miscellanea* of Baluze.—Hoefler, *Nov. Elog. Générale*, xv, 618.

**Ebro'nah** (Heb. *Abrownâh*, עֲבְרֹנָה, *passage*, i. e. of the sea; Sept. *Ἐβρωνά*), the thirtieth station of the Israelites on their way from Egypt to Canaan (Num. xxxiii, 34, 35). Since it lay near Ezion-Gaber on the west, as they left Jotbathah, it was probably in the plain now known as the *Kû'a en-Nûkk*, immediately opposite the pass of the same name at the head of the Eleanitic branch of the Red Sea (see Robinson's Map in *Researches*, vol. i). Rømmel (in the *Holl. Encyclop.* i, 167) compares the *Avra* of Ptolemy (v. 17), in Arabia Petrea (66° 10' and 29° 40'), with the *Havarra* of the *P-nînger Table*; a very improbable supposition. Knobel thinks (*Ezreg. Handb.* in loc.) that the Ezion-Gaber in question cannot be the port of that name at the head of the Eleanitic Gulf; for, as the next station mentioned is Kadesh, this was too far from the north end of the gulf to be reached in one march; but this objection is of little force, as there is no uniformity in the intervals between the stations. Schwarz (*Palest.* p. 213) rightly regards Ebronah as merely the name of a "ferry," by which the people perhaps crossed this arm of the sea (!), or where travellers usually crossed it.

**Ebutius** (*Ἐβούτιος*), a decurion (*δικάροχος*), and a person distinguished for good judgment and prompt action, who was sent with Placidus by Vespasian to

invest Jotapata while garrisoned by Josephus (*Josephus War*, iii, 7, 3). He was slain while defending Vespasian from a furious sally during the siege of Gamala (*ib.* iv, 1, 5).

**Eca'nus** (Vulg. id., the Gr. text being lost), one of the five swift scribes who were selected to attend Esdras (2 Esdr. xiv, 24).

**Ecbat'ana** (1 Esdr. vi, 23) or "ECBAT'ANÈ" (τὰ Ἐκβάτανα, 2 Macc. ix, 3; Judith i, 1 sq.; Tob. v, 9, etc.; comp. Josephus, *Ant.* x, 11, 7; xi, 4, 6; Ἀγβάτανα in Ctesias i; Herod. i, 98; ii, 153), the metropolis of Media (Curt. v, 81), situated 88° and 37° 45', according to Ptolemy (vi, 2, 14), and after the time of Cyrus (Strabo, xi, 522 sq.; Pausan. iv, 24, 1; Xenoph. *Cyr.* viii, 6, 22; *Anab.* iii, 5, 15) two mouths in the year the residence of the Persian (later the Parthian) kings. It is somewhat doubtful whether the name of this place is really contained in the Hebrew Scriptures. Many of the best commentators understand the expression עֲבָתָנָא, in Ezra vi, 2, differently, and translate it *in arcæ*, "in a coffer" (see Buxtorf and others, and so our English Bible *in the margin*). The Sept., however, give ἐν πόλει, "in a city," or (in some MSS.) ἐν Ἀμαθὺ ἐν πόλει, which favors the ordinary interpretation. If a city is meant, there is little doubt of one of the two Ecbatanas being intended; for, except these towns, there was no place in the province of the Medes "which contained a palace" (עֲבָתָנָא), or where records are likely to have been deposited. The name *Achmetha*, too, which at first sight seems somewhat remote from Ecbatana, wants but one letter of *Haqmatana*, which was the native appellation. The earlier and more correct Greek form of the name, too, was *Agbatana* (see Steph. Byz. p. 19; comp. Wesseling ad Herod. iii, 65). Lassen (*Biblioth.* iii, 36) regards the name as Zendish, *Aghwa-Tana*, "land rich in horses." Hyde (*De rel. vet. Pers.* p. 541 sq.) compares it with the Persic *Abadan*, "cultivated place;" Hgen (on Tobit, l. c.) regards it as Shemitic; compare Syr. *Chamtana*, "fortress." For other etymologies, see Simonis *Onom.* V. T. p. 578 sq.; Gesenius, *Thest.* p. 70.

Two cities of the name of Ecbatana seem to have existed in ancient times, one the capital of Northern Media, the Media Atropatênè of Strabo; the other the metropolis of the larger and more important province known as Media Magna (see Sir H. Rawlinson's paper on the Atropatenian Ecbatana, in the 10th volume of the *Journal of the Geographical Society*, art. ii). The site of the former appears to be marked by the very curious ruins at *Takht-i-Sulciman* (lat. 36° 28', long. 47° 9'); while that of the latter is occupied by *Hamadân*, which is one of the most important cities of modern Persia. There is generally some difficulty in determining, when Ecbatana is mentioned, whether the northern or the southern metropolis is intended. Few writers are aware of the existence of the two cities, and they lie sufficiently near to one another for geographical notices in most cases to suit either site. The northern city was the "seven-walled town" described by Herodotus, and declared by him to have been the capital of Cyrus (Herod. i, 98-99, 153; comp. Mos. Choren. ii, 84); and it was thus most probably there that the roll was found which proved to Darius that Cyrus had really made a decree allowing the Jews to rebuild their Temple.

Various descriptions of the northern city have come down to us, but none of them is completely to be depended on. That of the Zendavesta (*Vendidad*, Fargard II) is the oldest and the least exaggerated. "Jemshid," it is said, "erected a *var*, or fortress, sufficiently large, and formed of squared blocks of stone; he assembled in the place a vast population, and stocked the surrounding country with cattle for their use. He caused the water of the great fortress to

flow forth abundantly. And within the var, or fortress, he erected a lofty palace, encompassed with walls, and laid it out in many separate divisions, and there was no place, either in front or rear, to command and overawe the fortress." Herodotus, who ascribes the foundation of the city to his king Deïoces, says: "The Medes were obedient to Deïoces, and built the city now called Agbatana, the walls of which are of great size and strength, rising in circles one within the other. The plan of the place is that each of the walls should out-top the one beyond it by the battlements. The nature of the ground, which is a gentle hill, favors this arrangement in some degree, but it was mainly effected by art. The number of the circles is seven, the royal palace and the treasuries standing within the last. The circuit of the outer wall is nearly the same with that of Athens. Of this outer wall the battlements are white, of the next black, of the third scarlet, of the fourth blue, of the fifth orange: all these are colored with paint. The last two have their battlements coated respectively with silver and gold. All these fortifications Deïoces caused to be raised for himself and his own palace. The people were required to build their dwellings outside the circuit of the walls" (Herod. i, 98, 99). Finally, the book of Judith, probably the work of an Alexandrian Jew, professes to give a number of details, which appear to be drawn chiefly from the imagination of the writer (Jud. i, 2-4).

The peculiar feature of the site of *Tukht-i-Suleiman*, which it is proposed to identify with the northern Ecbatana, is a conical hill rising to the height of about 150 feet above the plain, and covered both on its top and sides with massive ruins of the most antique and primitive character. A perfect enceinte, formed of large blocks of squared stone, may be traced round the entire hill along its brow; within there is an oval inclosure, about 800 yards in its greatest and 400 in its least diameter, strewn with ruins, which cluster round a remarkable lake. This is an irregular basin, about 300 paces in circuit, filled with water exquisitely clear and pleasant to the taste, which is supplied in some unknown way from below, and which stands uniformly at the same level, whatever the quantity taken from it for irrigating the lands which lie at the foot of the hill. This hill itself is not perfectly isolated, though it appears so to those who approach it by the ordinary route. On three sides—the south, the west, and the north—the acclivity is steep, and the height above the plain uniform; but on the east it abuts upon a hilly tract of ground, and here it is but slightly elevated above the adjoining country. It cannot, therefore, have ever answered exactly to the description of Herodotus, as the eastern side could not anyhow admit of seven walls of circumvallation. It is doubted whether even the other sides were thus defended. Although the flanks on these sides are covered with ruins, "no traces remain of any wall but the upper one" (*As. Jour.* x, 52). Still, as the nature of the ground on three sides would allow this style of defence, and as the account in Herodotus is confirmed by the Armenian historian, writing clearly without knowledge of the earlier author, it seems best to suppose that in the peaceful times of the Persian empire it was thought sufficient to preserve the upper enceinte, while the others were allowed to fall into decay, and ultimately were superseded by domestic buildings. With regard to the coloring of the walls, or, rather, of the battlements, which has been considered to mark especially the fabulous character of Herodotus's description, recent discoveries show that such a mode of

ornamentation was actually in use at the period in question in a neighboring country. The temple of the Seven Spheres at Borsippa was adorned almost exactly in the manner which Herodotus assigns to the Median capital (see BABEL, TOWER OF); and it does not seem at all improbable that, with the object of placing the city under the protection of the seven planets, the seven walls may have been colored nearly as described. Herodotus has a little deranged the order of the hues, which should have been either black, orange, scarlet, gold, white, blue, silver—as at the Borsippa temple—or black, white, orange, blue, scarlet, silver, gold—if the order of the days dedicated to the planets were followed. Even the use of silver and gold in external ornamentation—which seems at first sight highly improbable—is found to have prevailed. Silver roofs were met with by the Greeks at the southern Ecbatana (Polybius, x, 27, 10-12); and there is reason to believe that at Borsippa the gold and silver stages of the temple were actually coated with those metals. (See Rawlinson, *Herodotus*, i, 185.)

Plan of Ecbatana.

1. Remains of a Fire-Temple; 2. Ruined Mosque; 3. Ancient buildings with shafts and capitals; 4. Ruins of the Palace of Abakai Khan; 5. Cemetery; 6. Ridge of Rock called "the Dragon;" 7. Hill called "Tawilah," or "the Stable;" 8. Ruins of Kalisiah; 9. Rocky hill of Zindani-Suleiman.

The northern Ecbatana continued to be an important place down to the 13th century after Christ. By the Greeks and Romans it appears to have been known as Gaza, Gazaca, or Canzaca, "the treasure city," on account of the wealth laid up in it, while by the Orientals it was termed *Shiz*. Its decay is referable to the Mogul conquests, cir. A.D. 1200; and its final ruin is supposed to date from about the 15th or 16th century (*As. Soc. Journ.* x, pt. i, 49).

In the 2d book of Maccabees (ix, 3, etc.), the Ecbatana mentioned is undoubtedly the southern city, now represented both in name and site by *Hamadan*. This place, situated on the northern flank of the great mountain called formerly Oroutes, and now Elwend, was perhaps as ancient as the other, and is far better known in history. If not the Median capital of Cyrus, it was, at any rate, regarded from the time of Darius Hystaspis as the chief city of the Persian *satrapy* of Media, and as such it became the summer residence of the Persian kings from Darius downwards. It was occupied by Alexander soon after the battle of Arbela (Arrian, *Exp. Alex.* iii, 19), and at his decease passed under the dominion of the Seleucide. In the wars between his successors it was more than once taken and retaken, each time suffering largely at the hands of its conquerors (Polyb. x, 27). It was afterwards recognised as the metropolis of their empire by the Parthians (Oros. vi, 4). During the Arabian period, from the rise of Bagdad on the one hand and of Ispahan on the other, it sank into comparative insignificance; but still it has never descended below the rank

of a provincial capital, and even in the present depressed condition of Persia it is a city of from 20,000 to 30,000 inhabitants. The Jews, curiously enough, regard it as the residence of Ahasuerus (Xerxes?)—which is in Scripture declared to be Susa (Esth. i, 2; ii, 3, etc.)—and show within its precincts the tombs of Esther and Mordecai (Ker Porter, ii, 105–110). It is not distinguished by any remarkable peculiarities from other Oriental cities of the same size.

The Ecbatana of the book of Tobit is thought by Sir H. Rawlinson to be the northern city (see *As. Soc. Journ.* X, i, 137–141).—Smith, s. v. See ACIMETIA.

**Eccard.** See ECKHARD.

**Ecce Homo**, a name given in art to pictures representing the suffering Saviour as described in John xix, 5: "Then came Jesus forth, wearing the crown of thorns, and the purple robe. And Pilate saith unto them, Behold the man!" It is a comparatively recent subject in art, dating from the 15th century. There are two forms of it, viz. the devotional picture, which offers the single head, or half-figure of Christ, to our contemplation, as the "Man of Sorrows" of the Passion, and the more or less historical picture, which either places him before us attended by Pilate and one or more attendants, or gives the full scene in numerous figures. For an account of them, see Jamieson, *History of our Lord in Art*, ii, 92 sq.

**Echellensis** or **Echollensis**, ABRAHAM, a Maronite scholar, was born at Eckel, Syria, and was educated in Rome, where he afterwards taught the Syriac and Arabic languages. In 1630 he was called to Paris to assist in the preparation of the great Polyglot Bible of Le Jay. For this work Echellensis furnished *Ruth* in Syriac and Arabic, with a Latin translation, and the 3d book of *Maccabees* in Arabic. He undertook also the revision of the Syriac and Arabic texts, and the Latin versions contributed by Gabriel Sionita. He returned again to Rome to fill the chair of Oriental languages offered him in that city, and died there in 1664. Echellensis's writings are numerous; among the most important are, *Lingue Syriacæ sive Chaldaicæ perbrevis Institutio* (Rome, 1628, 4to):—*Synopsis propoſitorum sententiarum Arabum inscriptis speculum mundi repræsentans, ex arabico sermone latini juris facta* (Par. 1641, 4to):—*Sancti Antonii Magni Epistolæ viginti* (Par. 1641, 8vo):—*Conciliū Nicæni Profatio*, etc. (Par. 1645, 8vo):—*Sancti Antonii Magni Regule, sermones, documenta, admonitiones, responsiones, et vita duplex* (Paris, 1646, 8vo):—*Semita Sapientie, sive ad scientias comparandas methodus* (Paris, 1646):—*De Proprietatibus et virtutibus medicis animalium, plantarum et gemmarum, tractatus triplex Habdarrabman* (Paris, 1647, 8vo):—*Chronicon orientale nunc primum latinitate donatum cui accessit supplementum Historiæ orientalis* (Par. 1653, fol.):—*Catalogus librorum Chaldaeorum, tum ecclesiasticorum quam profanorum, auctore Habed-Jesu* (Rome, 1653, 8vo), with notes:—*Concordantia nationum christianarum orientaliū in fidei catholice dogmate* (Mayence, 1655, 8vo). In this book he seeks to harmonize the sentiments of the Orientals with those of the Roman Church. Leo Allatius assisted him in his work. *De Origine nominis Pape . . . adeo de ejus primatu*, etc. (Rome, 1660), and *Eutychiūſ rindicatus sive Responsio ad Selden Origines* (Rome, 1661, 4to), were works written in the controversy against the Protestants.—Hoefer, *Nouv. Biog. Générale*, v, 621.

**Ecclesia.** See CHURCH.

**Ecclesiæ Domus.** See DOMUS.

**Ecclesiæ Seniores.** See SENIORES.

**Ecclesiastēs**, the fourth of the poetical books in the English arrangement of the O. T., and one of those usually attributed to Solomon. In the Heb. Bible it is the seventh and last of the first part of the *Hagiographā*, עֲבֻדָּה, or fourth division of the Jewish Scriptures. In the Sept. and Vulg. it is placed be-

tween Proverbs and Canticles, as in the A. V. See BIBLE. It is the fourth of the five *Megilloth* (q. v.) or rolls, as they are called by the Jews, being appointed to be read at the Feast of Tabernacles. The form of the book is *poetico-didactic*, without the sublimity of the beautiful parallelism and rhythm which characterize the older poetic effusions of the inspired writings. The absence of vigor and charm is manifest even in the grandest portion of this book (xii, 1–7), where the sacred writer rises above his usual level. (See generally, Bergstr., in Eichhorn's *Bibliothek*, x, 955–84; Paulus, in his *Neues Repertorium*, i, 201–65; Zirkel, *Ueb. der Prediger*, Würzb., 1792; Umbreit, *Coheleth scepticus*, Gött. 1820; Stiebriz, *Vindiciæ Solomonis*, Halle, 1760; Henzi, *Eccles. argumentum*, Dorpat, 1827; Mullert, *Paliogr. Beiträge*, p. 182 sq.; Hartmann, in the *Wien. Zeitschr.* i, 29, 71; Ewald, *Ueb. d. Prediger*, Gött. 1826; Umbreit, in the *Stud. u. Krit.* 1849; Bruch, *Weisheits-Lehre der Hebräer*, Strasburg, 1851.) See SOLOMON.

I. *Title.*—The Heb. name is עֲבֻדָּה, *Kohe'leth*, and is evidently taken from the designation which the writer himself assumes (ch. i, 2, 2; vii, 27; xii, 8, 9, 10; Sept. ἐκκλησιαστής, Vulg. *ecclesiastes*, Auth. Vers. "preacher"). It is the participle of עָבַד, *kahal'* (cognate with עָבַד, *voice*, Greek καλέω, Eng. *call*), which properly signifies to *call together* a religious assembly (hence עָבַד, עֲבֻדָּה, a *congregation*). The apparent anomaly of the feminine termination הַ indicates that the abstract noun has been transferred from the office to the person holding it (so the Arab. *caliph*, etc.; see Gesenius, *Thes. Heb.* p. 1199, 1200), and has thus become capable of use as a masculine proper name, a change of meaning of which we find other instances in *Sophereth* (Neh. vii, 57), *Pochereth* (Ezra ii, 57); and hence, with the single exception of Eccles. vii, 27, the noun, notwithstanding its form, is used throughout in the masculine. Ewald, however (*Poet. Büch.* iv, 189), connects the feminine termination with the noun עָבַד (wisdom), understood, and supposes a poetic license in the use of the word as a kind of symbolic proper name, appealing to Prov. xxx, 1; xxxi, 1, as examples of a like usage. As connected with the root עָבַד, the word has been applied to one who speaks in an assembly, and there is, to say the least, a tolerable agreement in favor of this interpretation. Thus we have the comment of the Midrash, stating that the writer thus designates himself "because his words were spoken in the assembly" (quoted in Preston's *Ecclesiastes*, note on i, 1); the rendering Ἐκκλησιαστής by the Sept.; the adoption of this title by Jerome (*Pref. in Eccl.*), as meaning "qui cæcum, i. e. ecclesiam congregat, quem nos nuncupare possumus Concionatorem"; the use of "Prediger" by Luther, of "Preacher" in the A. V. On the other hand, taking עָבַד in the sense of collecting things, not of summoning persons, and led perhaps by his inability to see in the book itself any greater unity of design than in the chapters of Proverbs, Grotius (*in Eccl.* i, 1) has suggested Συναθροιστής (*compiler*) as a letter equivalent. In this he has been followed by Herder and Jahn, and Mendelssohn has adopted the same rendering (notes on i, 1, and vii, 27, in Preston), seeing in it the statement partly that the writer had compiled the sayings of wise men who had gone before him, partly that he was, by an inductive process, gathering truths from the facts of a wide experience. The title of the book, however, indicates that the author did not write only for a literary public, but that he had in view the whole congregation of the Lord; and that his doctrine was not confined within the narrow bounds of a school, but belonged to the Church in its whole extent (comp. *Psa.* xlix, 2–4). Solomon, who in 1 Kings viii is described as *gathering* (עָבַד) the people to hold communion

with the Most High in the place which he erected for this purpose, is here again represented as *the gatherer* (קִבֵּץ) of the people to the assembly of God. It must, however, be borne in mind that, though Solomon is animated by and represents Wisdom, he does not lose his individuality. Hence he sometimes describes his own experience (comp. i, 16, 17; ii, 9, 12; vii, 23, etc.), and sometimes utters the words of Wisdom, whose organ he is, just as the apostles are sometimes the organs of the Holy Ghost (comp. Acts xv, 28).

Against the common rendering of קִבֵּץ by *preacher* or *Ecclesiastes*, which is supported by Desvœux, Gesenius, Knobel, Herzfeld, Stuart, etc., it has been urged: (1.) The verb קִבֵּץ does not properly include the idea of *preaching*: such, however, would naturally be its derived import, inasmuch as popular assemblies are usually convened for the purpose of being addressed. (2.) It ascribes to Solomon the office of *preacher*, which is nowhere mentioned in the Bible; it is too modern a title, and is inconsistent with his character, if not with the contents of the book: this, however, only applies to the title in its modern sense, and not to the above generic view. (3.) It destroys the connection between the design of the book and the import of this symbolic name: this again depends upon the preconception as to the design of the book; the import, as above explained, is not unsuitable. Moreover, *a. Coheleth* is neither a name of *rank* nor of *office*, but simply describes the act of gathering the people together, and can, therefore, not come within the rule which the advocates of the rendering *preacher* or *Ecclesiastes* are obliged to urge. *b.* The construction of the feminine verb with it in vii, 27, is incompatible with this view. *c.* Abstracts are never formed from the *active participle*; and, *d.* There is not a single instance to be found where a *concrete* is first made an *abstract*, and then again taken in a *personal* sense. These objections are too minute to be of much force, and are overruled by the peculiar use and application of this word, which occurs nowhere else.

The other explanations of Koheleth, viz., *Gatherer* or *Acquirer of wisdom*, and Solomon is called by this name because he gathered much wisdom (Rashi, Rashbam, etc.); *Collector, Compiler*, because he collected in this book divers experience, views, and maxims for the good of mankind (Grotius, Mayer, Mendelssohn, etc.); *Eclectic*, ἐκλεκτικός, a name given to him in this place because of his skill in selecting and purifying from the systems of different philosophers the amassed sentiments in this book (Rosenthal); *Accumulated wisdom*—and this appellation is given to him because wisdom was accumulated in him (Aben-Ezra); *The Reunited, the Gathered Soul*—and it describes his readmission into the Church in consequence of his repentance (Cartwright, Bishop Reynolds, Granger, etc.); *The Penitent*—and describes the contrite state of his heart for his apostasy (Cocceius, Schultens, etc.); *An assembly, an academy*—and the first verse is to be translated “The sayings of the academy of the son of David” (Döderlein, Nachtigal, etc.); *An old man*—and Solomon indicates by the name Koheleth his weakness of mind when, yielding to his wives, he worshipped idols (Simonis *Lex. Heb.* s. v.; Schmilt, etc.); *Exclaiming voice*, analogous to the title assumed by John the Baptist—and the words of the inscription ought to be rendered, “The words of the voice of one exclaiming” (De Dieu); *Sophist*, according to the primitive signification of the word, which implied a combination of philosophy and rhetoric (Desvœux); *Philosopher or Moralist* (Spohn, Gaab, etc.); *The departed spirit of Solomon* introduced as speaking throughout this book in the form of a shadow (Augusti, *Einleit. in d. A. T.* p. 240); Koheleth is the feminine gender, because it refers to חַיָּה, *the intellectual soul*, which is understood (Rashi, Rashbam, Ewald, etc.); it is to show the great

excellency of the preacher, or his charming style which this gender indicates (Lorinus, Zirkel, etc.), because a preacher travails, as it were, like a mother, in the spiritual birth of his children, and has tender and motherly affection for his people, a similar expression being found in Gal. iv, 19 (Pineda, Mayer, etc.); it is to describe the infirmity of Solomon, who appears here as worn out by old age (Mercer, Simonis, etc.); it is used in a neuter sense, because departed spirits have no specific gender (Augusti); the termination קִבֵּץ is not at all feminine, but, as in Arabic, is used as an *acusis*; etc., etc., etc. We believe that the simple enumeration of these views will tend to show their vagueness, fancifulness, and inappropriateness. (See Dindorf, *Quomodo nomen Cohelet Salomoni tribuatur*, Lpz. 1791.)

II. *Author and Date.*—These have usually been regarded as determined by the account that the writer gives of himself in ch. i and ii, that it was written by the only “son of David” (i, 1), who was “king over Israel in Jerusalem” (i, 12). According to this, we have in it what may well be called the Confessions of king Solomon, the utterance of a repentance which some have even ventured to compare with that of the 51st psalm. This authorship is corroborated by the unquestionable allusions made throughout the book to particular circumstances connected with the life of the great monarch (compare chap. i, 16, etc., with 1 Kings iii, 12; chap. ii, 4–10, with 1 Kings v, 27–32; vii, 1–8; ix, 7–19; x, 14–29; ch. vii, 20, with 1 Kings viii, 46; chap. xii, 9, with 1 Kings iv, 32). Additional internal evidence has been found for this belief in the language of vii, 26–28, as harmonizing with the history of 1 Kings xi, 3, and in an interpretation (somewhat forced perhaps) which refers iv, 13–15 to the mourners of the people against Solomon, and the popularity of Jeroboam as the leader of the people, already recognised as their future king (Mendelssohn and Preston in loc.). The belief that Solomon was actually the author was, it need hardly be said, received generally by the Rabbinic commentators, and the whole series of Patristic writers. The apparent exceptions to this in the passages by Talmudic writers, which ascribe it to Hezekiah (*Baba Bathra*, c. i, fol. 15) or Isaiah (*Shvsh. Hakkab.* fol. 66 b. quoted by Michaelis), can hardly be understood as implying more than a share in the work of editing, like that claimed for the “men of Hezekiah” in Prov. xxv, 1. Grotius (*Pref. in Eccles.*) was indeed almost the first writer who called it in question, and started a different hypothesis.

It may seem as if the whole question were settled for all who recognise the inspiration of Scripture by the statement, in a canonical and inspired book, as to its own authorship. The book purports, it is said (Preston, *Proleg. in Eccles.* p. 5), to be written by Solomon, and to doubt the literal accuracy of this statement is to call in question the truth and authority of Scripture. To many it has appeared questionable, however, whether we can admit an *à priori* argument of this character to be decisive. The hypothesis that every such statement in a canonical book must be received as literally true, is, in fact, an assumption that inspired writers were debarred from forms of composition which were open without blame to others. In the literature of every other nation the form of personated authorship, where there is no *animus decipendi*, has been recognised as a legitimate channel for the expression of opinions or the quasi-dramatic representation of character. Hence it has been asked, Why should we venture on the assertion that, if adopted by the writers of the Old Testament, it would have made them guilty of a falsehood, and been inconsistent with their inspiration? The question of authorship does not involve that of canonical authority. A book written by Solomon would not necessarily be inspired and canonical. It is said that there is nothing that need startle us in the thought that an inspired writer might

use a liberty which has been granted without hesitation to the teachers of mankind in every age and country. Accordingly, the advocates of a different authorship for the book in question than that of Solomon feel themselves at liberty to discard these statements of the text as mere literary devices.

They argue that in like manner the book which bears the title of the "Wisdom of Solomon" asserts, both by its title and its language (vii, 1-21), a claim to the same authorship, and, though the absence of a Hebrew original led to its exclusion from the Jewish canon, the authorship of Solomon was taken for granted by all the early Christian writers who quote it or refer to it, till Jerome had asserted the authority of the Hebrew text as the standard of canonicity, and by not a few afterwards. But in reply to this it may justly be said that the traditional character of the two books is so different as to debar any comparison of this kind. See WISDOM, BOOK OF.

The following specific objections have been urged against the Solomonic and for the personated authorship of this book: 1. All the other reputed writings of Solomon have his name in the inscription (comp. Prov. i, 1; Song of Songs, i, 1; Psa. lxxvii), whereas in this book the name of Solomon is studiously avoided, thus showing that it does not claim him as its actual author. Yet he gives other equally decisive intimations of his identity, and the peculiar character of the work sufficiently accounts for this partial concealment. Moreover, in some of his other undoubted writings he employs similar *noms de plume* (Prov. xxx, 1; xxxi, 1). 2. The symbolic and impersonal name *Kohleth* shows that Solomon is simply introduced in an ideal sense as the representative of wisdom. On the other hand, it appears to have an equally tangible application to him historically. 3. This is indicated by the sacred writer himself, who represents Solomon as belonging to the *past*, inasmuch as he makes this great monarch say, "I was (אָנֹכִי מֶלֶךְ) king," but had long ago ceased to be king when this was written. That this is intended by the *præterite* has been acknowledged from time immemorial (comp. *Midrash Rabba*, *Midrash Jalkut* in loc.; Talmud, *Gittin*, 68 b; the Chaldee paraphrase, i, 12; *Midrash*, Maase, Bi-Shloma, Ha-Melech, ed. Jellinek in *Eth Ha-Midrash*, ii, 35; Rashi on i, 12). Yet it does not necessarily require that interpretation, but may naturally be understood as simply referring to past incidents, e. g. "I have been [and still am] king." The passage certainly gives no support to the idea of a fanciful authorship. 4. This is moreover corroborated by various statements in the book, which would otherwise be irreconcilable, e. g. *Kohleth* comparing himself with a long succession of kings who reigned over Israel in Jerusalem (i, 16; ii, 7): the term king in *Jerusalem* (*ibid.*) showing that at the time when this was written there was a royal residence in Samaria; the recommendation to *individuals* not to attempt to resent the oppression of a tyrannical ruler, but to wait for a *general revolt* (viii, 2-9)—a doctrine which a monarch like Solomon is not likely to propound; the description of a royal spendthrift, and of the misery he inflicts upon the land (x, 16-19), which Solomon would not give unless he intended to write a satire upon himself. These historical allusions are too vague to be thus pressed into service. As to the political references, we know (1 Kings xi, 14, 23) that insurrectionary manifestations did exist in Solomon's reign, and were aggravated by his rigid and exacting government (1 Kings xii, 4). It has been asked whether Solomon would have been likely to speak of himself as in i, 12, or to describe with bitterness the misery and wrong of which his own misgovernment had been the cause, as in iii, 16; iv, 1 (*Jahn*, *Einkl.* ii, 840). On the hypothesis that he was the writer, the whole book is an acknowledgment of evils which he had occasioned, while yet there is no

distinct confession and repentance. There are forms of satiety and self-reproach, of which this half sad, half scornful retrospect of a man's own life—this utterance of bitter words by which he is condemned out of his own mouth—is the most natural expression. Any individual judgment on this point cannot, from the nature of the case, be otherwise than subjective, and ought therefore to bias our estimate of other evidence as little as possible. 5. The state of oppression, sufferings, and misery depicted in this book (iv, 1-4; v, 7; viii, 1-4, 10, 11; x, 5-7, 20, etc.) cannot be reconciled with the age of Solomon, and unquestionably shows that the Jews were then groaning under the grinding tyranny of Persia. There are sudden and violent changes, the servant of to-day becoming the ruler of to-morrow (x, 5-7). All this, it is said, agrees with the glimpses into the condition of the Jews under the Persian empire in Ezra and Nehemiah, and with what we know as to the general condition of the provinces under its satraps. But we cannot suppose that these evils, which have been prevalent in all times, were alluded to as specially characteristic of the writer's day. 6. The fact that *Kohleth* is represented as indulging in sensual enjoyments, and acquiring riches and fame in order to ascertain what is good for the children of men (ii, 3-9; iii, 12, 22, etc.), making philosophical experiments to discover the *summum bonum*, is held to be at variance with the conduct of the historical Solomon, and to be an idea of a much later period. In like manner, the admonition not to seek divine things in the profane books of the philosophers (xii, 12) are thought to show that this book was written when the speculation of Greece and Alexandria had found their way into Palestine. In short, the doctrine of a future bar of judgment, whereby *Kohleth* solves the grand problem of this book, when compared with the vague and dim intimations respecting a future state in the pre-exilian portions of the O. T., is regarded as proving that it is a *post-exilian* production. But the untrustworthy character of these arguments is evinced by the parallel case of the book of Job (q. v.). It is also urged that the indications of the religious condition of the people, their formalism and much speaking (v, 1, 2), their readiness to evade the performance of their vows by casuistic excuses (v, 5), represent in like manner the growth of evils, the germs of which appeared soon after the captivity, and which we find in a fully-developed form in the prophecy of Malachi. In addition to this general resemblance, there is the agreement between the use of אֲנֹכִי מֶלֶךְ for the "angel" or priest of God (v, 6, Ewald, *in loc.*), and the recurrence in Malachi of the terms אֲנֹכִי מֶלֶךְ, the "angel" or messenger of the Lord, as a synonyme for the priest (Mal. ii, 7), the true priest being the great agent in accomplishing God's purposes. Significant, though not conclusive in either direction, is the absence of all reference to any contemporaneous prophetic activity or to any Messianic hopes. This might indicate a time before such hopes had become prevalent, or after they were for a time extinguished. It might, on the other hand, be the natural result of the experience through which the son of David had passed, or fitly take its place in the dramatic personation of such a character. The use throughout the book of *Elohim* instead of *Jehovah* as the divine name, though characteristic of the book as dealing with the problems of the universe rather than with the relations between the Lord God of Israel and his people, and therefore striking as an idiosyncrasy, leaves the question as to date nearly where it was. The indications of rising questions as to the end of man's life and the constitution of his nature, of doubts like those which afterwards developed into Sadduceism (iii, 19-21), of a copious literature connected with those questions, confirm, it is urged (Ewald), the hypothesis of the later date. It may be added, too, that the absence of any

reference to such a work as this in the enumeration of Solomon's writings in 1 Kings iv, 32, tends, at least, to the same conclusion. But such considerations drawn *a silentio* are highly inconclusive. 7. The strongest argument, however, against the Solomonic authorship of this book is its vitiated language and style. It is written throughout with peculiarities of phraseology which developed themselves about the time of the Babylonian captivity. So convincing is this fact, that not only have Grotius, J. D. Michaelis, Eichhorn, Döderlein, Spohn, Jahn, J. E. C. Schmidt, Nachtigal, Kaiser, Rosenmüller, Ewald, Knobel, Gesenius, De Wette, Noyes, Hitzig, Heiligstedt, Davidson, Meier, etc., relinquished the Solomonic authorship, but even such unquestionably orthodox writers as Umbreit, Hengstenberg, Gerlach, Vaihinger, Stuart, Keil, Elster, etc., declare most emphatically that the book was written after the Babylonian captivity; and there is hardly a chief rabbi or a literary Jew to be found who would have the courage to maintain that Solomon wrote Koheleth. Dr. Herzfeld, chief rabbi of Brunswick; Dr. Philippson, chief rabbi of Magdeburg; Dr. Geiger, rabbi of Breslau; Dr. Zunz, Professor Luzzatto, Dr. Krochmal, Steinschneider, Jost, Grätz, Fürst, and a host of others, affirm that this book is one of the latest productions in the O.-T. canon. We are moreover reminded that these are men to whom the Hebrew is almost vernacular, and that some of them write better Hebrew, and in a purer style, than that of Koheleth. With most readers, however, a single intimation of the text itself will weigh more than the opinion of these or all other learned men. On the other hand, the Rabbinical scholars, who certainly were not inferior in a knowledge of Hebrew, appear to have found no difficulty in attributing this book to Solomon. Most of those above enumerated are of very questionable sentiments on a point like this, and it must be borne in mind that a very large, if not equal, amount of learning has been arrayed on the opposite side. The last of the above objections, however, deserves a more minute consideration.

Many opponents of the Solomonic authorship of Ecclesiastes have certainly gone much too far in their assertions respecting the impurity of its language. The Grecisms which Zirkle thought that he had found have now generally been given up. The Rabbinisms likewise could not stand the proof. The words, significations, and forms which seem to appertain to a later period of Hebrew literature, and the Chaldaisms, an abundance of which Knobel gathered, require, as Herzfeld has shown (in his *Commentary*, published at Braunschweig, 1838, p. 13 sq.), to be much sifted. According to Herzfeld, there are in Ecclesiastes not more than between eleven and fifteen "young Hebrew" expressions and constructions, and between eight and ten Chaldaisms. Nevertheless, it is certain that the book does not belong to the productions of the first, but rather to the second period of the Hebrew language. This alone would not fully disprove the authorship of Solomon, for it would not necessarily throw the production into the latest period of Hebrew literature. We could suppose that Solomon, in a philosophical work, found the pure Hebrew language to be insufficient, and had, therefore, recourse to the Chaldaizing popular dialect, by which, at a later period, the book-language was entirely displaced. This supposition could not be rejected *a priori*, since almost every one of the Hebrew authors before the exile did the same, although in a less degree. It has been thought, however, that the striking difference between the language of Ecclesiastes and the language of the Proverbs renders that explanation quite inadmissible. This difference would prove little if the two books belonged to two entirely different classes of literature—that is, if Ecclesiastes bore the same relation to the Proverbs as the Song of Solomon does; but since Ecclesiastes and the Proverbs belong essentially to the same class,

the argument taken from the difference of style can only be avoided by attributing it to the effect of greater age in the writer. The occurrence of Chaldee words and forms in any Hebrew document is by no means a certain and invariable indication of lateness of composition. We must be careful to distinguish archaisms, and words and forms peculiar to the poetic style, from Chaldaisms of the later period. Moreover, the Hebrew writings which have been transmitted to us being so few in number, it is of course much more difficult to determine the period to which any of these writings belongs by the peculiar form of language which it presents, than it would have been had there been preserved to us a larger number of documents of different ages to assist us in forming our decision. Still, from the materials within our reach, scanty though they are, we would naturally draw a conclusion as to the age of the book of Ecclesiastes, not altogether certain, indeed, but decidedly unfavorable to an early date; for it needs but a cursory survey of the book to convince us that in language and style it not only differs widely from the other writings of the age of Solomon, but bears a very marked resemblance to the latest books of the Old Testament. (1.) One class of words employed by the writer of Ecclesiastes we find rarely employed in the earlier books of Scripture, frequently in the later, i. e. in those written during or after the Babylonish captivity. Thus *shalut'*, שָׁלוּט, *he ruled* (Eccles. ii, 19; v, 18; vi, 2; viii, 9), is found elsewhere only in Nehemiah and Esther. The derived noun שְׁלוּטָה, *shilton'*, *rule* (ch. iii, 4, 8), is found only in the Chaldee of Daniel; but שְׁלוּטָה, *shallit'*, *ruler*, appears once in the earlier Scriptures (Gen. xlii, 6). Under this head may also be mentioned שְׁמֵרָה, *malkuth'*, *kingdom* (ch. iv, 14), rare in the earlier Scriptures, but found above forty times in Esther and Daniel; and מְדִינָה, *medinah'*, *province* (ch. ii, 8; v, 7), which appears also in Esther, Daniel, Ezra, Nehemiah, Lamentations, Ezekiel, and likewise in 1 Kings xx, 14–19, where "princes of the provinces" are mentioned among the officers of king Ahab, but in none of the earlier Scriptures. (2.) A second class includes those words which are never found in any Hebrew writing of earlier date than the Babylonian captivity, but are found in the later books: as זְמַן, *zeman'*, *set time* (ch. iii, 1) = זְמַנִּי, which we meet with in Hebrew only in Neh. ii, 6 and Esth. ix, 27, 31, but in the biblical Chaldee and in the Targums frequently; מִשְׁפָּט, *piithgan'*, *sentence* (chap. vii, 11), which appears in Hebrew only in Esth. i, 20, but in Chaldee frequently. (If this word be, as is commonly supposed, of Persian origin, its appearance only in the later Jewish writings is at once accounted for. See Rödiger's *Additions* to Gesenius's *Thesaurus*.) מַדָּע, *madda'* (ch. x, 20), a derivation of מָדַע, *to know*, found only in 2 Chron. and Daniel, and also in Chaldee; and the particles אִלַּי, *illu'*, *if* (ch. vi, 6), and בְּעֵינַי, *beken'*, *then, so* (ch. viii, 10), found in no earlier Hebrew book than Esther. From this enumeration it appears that the book of Ecclesiastes resembles the book of Esther in some of the most distinctive peculiarities of its language. (3.) A third class embraces those words which are not found even in the Hebrew writings of the latest period, but only in the Chaldee of Daniel and Ezra, or in the Targums, as יִצְרוֹן, *yithron'*, *profit*, which is used nine times in Ecclesiastes, never in any other scriptural writing, but frequently in the Targums, under the slightly modified form *yuthran'*; so also כְּבָר, *kebar'*, *already, long ago*, which recurs eight times in this book; וְתַנְיָן, *takan'* (ch. i, 15; vii, 13; xii, 9), found also in Chaldee (Dan. iv, 33, etc.); רֵעוּת, *reuth'*, *desire*, recurring five times, and also in the Chaldee por-

tions of Ezra;  $\text{יָצַדְתִּי}$  (chap. i, 17, etc.),  $\text{יָצַדְתִּי}$  (ch. i, 13, etc.),  $\text{יָצַדְתִּי}$  (ch. x, 8). (1.) Other peculiarities, such as the frequent use of the participle, the rare appearance of the "eav consecutive," the various uses of the relative particle, concur with the characteristics already noted in affixing to the language and style of this book the stamp of that transition period when the Hebrew language, soon about to give place to the Chaldee, had already lost its ancient purity, and become debased by the absorption of many Chaldee elements. The prevalence of abstract forms again, characteristic of the language of Ecclesiastes, is urged as belonging to a later period than that of Solomon in the development of Hebrew thought and language. The answers given to these objections by the defenders of the received belief are (Preston, *Eccles.* p. 7), (a) that many of what we call Aramaic or Chaldee forms may have belonged to the period of pure Hebrew, though they have not come down to us in any extant writings; and (b) that so far as they are foreign to the Hebrew of the time of Solomon, he may have learned them from his "strange wives," or from the men who came as ambassadors from other countries. (See Davidson, *Horne's Introd.* new ed. ii, 787).

As to the date of Ecclesiastes, these arguments of recent criticism are stronger against the traditional belief than in support of any rival theory, and the advocates of that belief might almost be content to rest their case upon the discordant hypotheses of their opponents. On the assumption that the book belongs, not to the time of Solomon, but to the period subsequent to the captivity, the dates which have been assigned to it occupy a range of more than 500 years. Grotius supposes Zerubbabel to be referred to in xii, 11, as the "One Shepherd" (*Comm. in Eccles.* in loc.), and so far agrees with Keil (*Einführung in das A. T.*), who fixes it in the time of Ezra and Nehemiah. Ewald and De Wette conjecture the close of the period of Persian or the commencement of that of Macedonian rule; Bertholdt, the period between Alexander the Great and Antiochus Epiphanes; Hitzig, circ. B.C. 214; Hartmann, the time of the Maccabees, etc. The following table will show the different periods to which it has been assigned:

	B.C.
Nachtigal, between Solomon and Jeremiah . . . . .	975-588
Schmidt, Jahn, etc., between Manasseh and Zedekiah	69-588
Grotius, Kaiser, Eichhorn, etc., shortly after the exile	536-500
Umbreit, the Persian period . . . . .	538-333
Van der Hardt, in the reign of Xerxes II and Darius	464-404
Roemüller, between Nehemiah and Alexander the Great . . . . .	450-333
Hengstenberg, Stuart, Keil . . . . .	433
Ewald, a century before Alexander the Great . . . . .	450
Gerlach, about the year . . . . .	400
De Wette, Knobel, etc., at the end of the Persian and the beginning of the Macedonian period . . . . .	350-300
Bergst, during Alexander's sojourn in Palestine . . . . .	333
Bertholdt, between Alexander and Ant. Epiphanes . . . . .	333-164
Zirkel, the Syrian period . . . . .	312-164
Hitzig, about the year . . . . .	204

Supposing it were proved that Solomon is only introduced as the speaker, the question arises why the author adopted this form. The usual reply is, that Solomon, among the Israelites, had, as it were, the prerogative of wisdom, and hence the author was induced to put into Solomon's mouth that wisdom which he intended to proclaim, without the slightest intention of forging a supposititious volume. This reply contains some truth, but it does not exhaust the matter. The chief object of the author was to communicate wisdom in general; but next to this, as appears from ch. i, 12 sq., he intended to inculcate the vanity of human pursuits. Now, from the mouth of no one could more aptly proceed the proclamation of the nothingness of all earthly things than from the mouth of Solomon, who had possessed them in all their fulness; at whose command were wisdom, riches, and pleasures in abundance, and who had therefore full opportunity to experience the nothingness of all that is earthly.

On the other hand, if we adopt the traditionary view that Solomon was the author, we avoid all these doubtful expedients and pious frauds; and, as no other candidate appears, we shall be safest in coinciding with that ancient opinion. The peculiarities of diction may be explained (as in the book of Job) by supposing that the work was written by Solomon during a season of penitence at the close of his life, and edited in its present form, at a later period, perhaps by Ezra.

III. *Canonicity.*—The earliest catalogues which the Jews have transmitted to us of their sacred writings give this book as forming part of the canon (Mishna, *Yadain*, iii, 5; Talmud, *Baba Bathra*, 14). All the ancient versions, therefore—viz. the Septuagint, which was made before the Christian era; the versions of Aquila, Symmachus, and Theodotion, which belong to the second century of Christianity, as well as the catalogue of Melito, bishop of Sardis (fl. A.D. 170)—include Ecclesiastes. Some singular passages in the Talmud indicate, however, that the recognition was not altogether unhesitating, and that it was at least questioned how far the book was one which it was expedient to place among the Scriptures that were read publicly. Thus we find the statements (Mishna, *Shabbath*, c. x, quoted by Mendelssohn in Preston, p. 74; Midrash, fol. 114 a; Preston, p. 13) that "the wise men sought to secrete the book *Koheloth*, because they found in it words tending to heresy," and "words contradictory to each other;" that the reason they did not secrete it was "because its beginning and end were consistent with the law;" that when they examined it more carefully they came to the conclusion, "We have looked closely into the book *Koheloth*, and discovered a meaning in it." The chief interest of such passages is of course connected with the inquiry into the plan and teaching of the book, but they are of some importance also as indicating that it must have commended itself to the teachers of an earlier generation either on account of the external authority by which it was sanctioned, or because they had a clearer insight into its meaning, and were less startled by its apparent difficulties. (See *Bab. Megilla*, 7, a; *Bab. Talm. Sabbath*, 20, a; Midrash, *Vayikra Raba*, xxviii; Mishna, *Edayoth*, v, 3; Jerome, *Comment.* xii, 13.) Traces of this controversy are to be found in a singular discussion between the schools of Shammai and Hillel, turning on the question whether the book *Koheloth* were inspired, and in the comments on that question by R. Ob. de Bartenora and Maimonides (Surenhus, iv, 341).

Within the Christian Church, the divine inspiration of Ecclesiastes, the Proverbs, and the Song of Solomon was denied by Theodorus of Mopsuestia. In recent times, the accusers of Ecclesiastes have been Augusti, De Wette, and Knobel; but their accusations are based on mere misunderstandings. They are especially as follows: (1.) The author is said to incline towards a moral epicurism. All his ethical admonitions and doctrines tend to promote the comforts and enjoyments of life. But let us consider above all what tendency and disposition it is to which the author addresses his admonition, serenely and contentedly to enjoy God's gifts. He addresses this admonition to that speculation which will not rest before it has penetrated the whole depth of the inscrutable councils of God; to that murmuring which bewails the badness of times, and quarrels with God about the sufferings of our terrene existence; to that gloomy piety which wears itself in imaginary good works and external strictness, with a view to wrest salvation from God; to that avarice which gathers, not knowing for whom; making the means of existence our highest aim; building upon an uncertain futurity which is in the hand of God alone. When the author addresses levity he speaks quite otherwise. For instance, in ch. vii, 2, 4. "It is better to go to the house of mourning than to the house of feasting; for that is the end of all men; and the living will lay it to his heart. Sorrow is better than

laughter, for by the sadness of the countenance the heart is made better. The heart of the wise man is in the house of mourning, but the heart of fools is in the house of mirth." The nature of the joy recommended by the author is also misunderstood. Unrestrained merriment and giddy sensuality belong to those vanities which our author enumerates. He says to laughter, Thou art mad, and to joy, What art thou doing? He says, ch. vii, 5, 6, "It is better to hear the rebuke of the wise than for a man to hear the song of fools. For as the crackling of thorns under a pot, so is the laughter of a fool; this also is vanity." That joy which he recommends is joy in God. It is not the opposite, but the fruit of the fear of God. How inseparable these are is shown in passages like ch. v, 6; vii, 18; iii, 12: "I know that there is no good in them, but for a man to rejoice, and to do good in his life;" and in many similar passages, but especially ch. xi, 3, 10, and xii, 1, "Remember now thy Creator in the days of thy youth," etc. In reference to these passages Ewald says (p. 186), "Finally, in order to remove every doubt, and to speak with perfect clearness, he directs us to the eternal judgment of God, concerning all the doings of man, and inculcates that man, in the midst of momentary enjoyment, should never forget the whole futurity, the account and the consequences of his doings, the Creator and the Judge." Ewald adds (p. 227), in reference to the conclusion, "In order to obviate every possible misunderstanding of this writing, there is, ver. 13, once more briefly indicated that its tendency is not, by the condemnation of murmuring, to recommend an unbridled life, but rather to teach, in harmony with the best old books, the fear of God, in which the whole man consists, or that true singleness of life, satisfying the whole man, and which comprehends everything else that is truly human. It is very necessary to limit the principle of joy which this book recommends again and again in various ways and in the most impressive manner, and to refer this joy to a still higher truth, since it is so liable to be misunderstood. (2.) It is objected that in his views concerning the government of the world the author was strongly inclined to fatalism, according to which everything in this world progresses with an eternally unchangeable step; and that he by this fatalism was (3.) misled into a moral scepticism, having attained on his dogmatical basis the conviction of the inability of man, notwithstanding all his efforts, to reach his aim. However, this so-called fatalism of our author is nothing else but what our Lord teaches (Matt. vi, 25): 'Take no thought,' etc. And as to the moral scepticism, our author certainly inculcates that man with all his endeavors can do nothing; but at the same time he recommends the fear of God as the never-failing means of salvation. Man in himself can do nothing, but in God he can do all. It is quite clear from ch. vii, 16, 18, where both self-righteousness and wisdom, when separated from God, are described as equally destructive, and opposite to them is placed the fear of God, as being their common antithesis, that our author, by pointing to the sovereignty of God, did not mean to undermine morality: 'He that feareth God comes out from them all.' If our author were given to moral scepticism, it would be impossible for him to teach retribution, which he inculcates in numerous passages, and which are not contradicted by others, in which he says that the retribution in individual circumstances is frequently obscure and enigmatical. Where is that advocate for retribution who is not compelled to confess this as well as our author? (4.) This book has given offence also, by ch. iii, 21, and similar passages, concerning immortality. But the assertion that there is expressed here some doubt concerning the immortality of the soul is based on a wrong grammatical perception. The ׀ cannot, according to its punctuation, be the interrogative, but must be the ar-

ticule; and our author elsewhere asserts positively his belief in the doctrine of immortality (ch. xii, 7). How it happens that he did not give to this doctrine a prevailing influence upon his mode of treating his subject has lately been investigated by Heyder, in his essay entitled *Ecclesiaste de Immortalitate Animæ Sententiæ* (Erlangen, 1838)." (See Dr. Nordheimer, on *The Philosophy of Ecclesiastes*, in the *Amer. Bib. Repos.* July, 1838.)—Kitto, s. v.; Smith, s. v.; Fairbairn, s. v.

IV. *Plan and Contents.*—The book of Ecclesiastes comes before us as being conspicuously, among the writings of the O. T., the great stumbling-block of commentators. Elsewhere there are different opinions as to the meaning of different passages. Here there is the widest possible divergence as to the plan and purpose of the whole book. The passages already quoted from the Mishna show that some, at least, of the Rabbinical writers were perplexed by its teaching—did not know what to make of it—but gave way to the authority of men more discerning than themselves. The traditional statement, however, that this was among the Scriptures which were not read by any one under the age of thirty (*Crit. Sac. Amama in Eccles.*, but with a "nescio ubi" as to his authority), indicates the continuance of the old difficulty, and the remarks of Jerome (*Prof. in Eccles.*, *Comm. in Eccles.* xii, 13) show that it was not forgotten. Little can be gathered from the series of Patristic interpreters. The book is comparatively seldom quoted by them. No attempt is made to master its plan and to enter into the spirit of its writer. The charge brought by Philastrius of Brescia (circ. A. D. 380) against some heretics who rejected it as teaching a false morality, shows that the obscurity which had been a stumbling-block to Jewish teachers was not removed for Christians. The fact that Theodore of Mopsuestia was accused at the fifth general council of calling in question the authority and inspiration of this book, as well as of the Canticles, indicates that in this respect, as in others, he was the precursor of the spirit of modern criticism. But, with these exceptions, there are no traces that men's minds were drawn to examine the teachings of this book. When, however, we descend to the more recent developments of criticism, we meet with an almost incredible divergence of opinion. Luther, with his broad, clear insight into the workings of a man's heart, sees in it (*Prof. in Eccles.*) a noble "Politica vel Economica," leading men in the midst of all the troubles and disorders of human society to a true endurance and reasonable enjoyment. Grotius (*Prof. in Eccles.*) gives up the attempt to trace in it a plan or order of thought, and finds in it only a collection of many maxims, connected more or less closely with the great problems of human life, analogous to the discussion of the different definitions of happiness at the opening of the Nicomachean Ethics. Some (of whom Warburton may be taken as the type, *Works*, iv, 154) have seen in the language of ii, 18-21, a proof that the belief in the immortality of the soul was no part of the transmitted creed of Israel. Others (Patrick, *Des Vœux*, Davidson, Mendelssohn) contend that the special purpose of the book was to assert that truth against the denial of a sensual scepticism. Others, the later German critics, of whom Ewald may be taken as the highest and best type, reject these views as partial and one-sided; and, while admitting that the book contains the germs of later systems, both Pharisaic and Sadduceean, assert that the object of the writer was to point out the secret of a true blessedness, in the midst of all the distractions and sorrows of the world, as consisting in a tranquil, calm enjoyment of the good that comes from God (*Poet. Büch.* iv, 180).

The variety of these opinions indicates sufficiently that the book is as far removed as possible from the character of a formal treatise. It is simply what it professes to be—the confession of a man of wide experience looking back upon his past life, and looking out

upon the disorders and calamities which surround him. Such a man does not set forth his premises and conclusions with a logical completeness. While it may be true that the absence of a formal arrangement is characteristic of the Hebrew mind in all stages of its development (Lowth, *De Sac. Poet. Heb.* Præl. xxiv), or that it was the special mark of the declining literature of the period that followed the captivity (Ewald, *Poet. Bûch.* iv, 177), it is also true that it belongs generally to all writings that are addressed to the spiritual rather than the intellectual element in man's nature, and that it is found accordingly in many of the greatest works that have influenced the spiritual life of mankind. In proportion as a man has passed out of the region of traditional, easily-systematized knowledge, and has lived under the influence of great thoughts—possessed by them, yet hardly mastering them so as to bring them under a scientific classification—are we likely to find this apparent want of method. The true utterances of such a man are the records of his struggles after truth, of his occasional glimpses of it, of his ultimate discovery. The treatise *De Imitatione Christi*, the *Pensées* of Pascal, Augustine's *Confessions*, widely as they differ in other points, have this feature in common. If the writer consciously reproduces the stages through which he has passed, the form he adopts may either be essentially dramatic, or it may record a statement of the changes which have brought him to his present state, or it may repeat and renew the oscillations from one extreme to another which had marked that earlier experience. The writer of Ecclesiastes has adopted and interwoven both the latter methods, and hence, in part, the obscurity which has made it so pre-eminently the stumbling-block of commentators. He is not a didactic moralist writing a homily on virtue. He is not a prophet delivering a message from the Lord of Hosts to a sinful people. He is a man who has sinned in giving way to selfishness and sensuality, who has paid the penalty of that sin in satiety and weariness of life; in whom the mood of spirit, over-reflective, indisposed to action, of which Shakspeare has given us in Hamlet, Jaques, Richard II, three distinct examples, has become dominant in its darkest form, but who has through all this been under the discipline of a divine education, and has learnt from it the lesson which God meant to teach him. What that lesson was will be seen from an examination of the book itself.

Leaving it an open question whether it is possible to arrange the contents of this book (as Köster and Vaihinger have done) in a carefully balanced series of strophes and antistrophes, it is tolerably clear that the recurring burden of "Vanity of vanities" and the teaching which recommends a life of calm enjoyment, mark, whenever they occur, a kind of halting-place in the succession of thoughts. It is the summing up of one cycle of experience; the sentence passed upon one phase of life. Taking this, accordingly, as our guide, we may look upon the whole book as falling into four divisions, each, to a certain extent, running parallel with the others in its order and results, and closing with that which, in its position no less than its substance, is "the conclusion of the whole matter."

(1.) Ch. i and ii. This portion of the book, more than any other, has the character of a personal confession. The Preacher starts with reproducing the phase of despair and weariness into which his experience had led him (i, 2, 3). To the man who is thus satiated with life, the order and regularity of nature are oppressive (i, 4-7); nor is he led, as in the 90th Psalm, from the things that are transitory to the thought of One whose years are from eternity. In the midst of the ever-recurring changes he finds no progress. That which seems to be new is but the repetition of the old (i, 8-11). Then, having laid bare the depth to which he had fallen, he retraces the path by which he had

travelled thitherward. First he had sought after wisdom as that to which God seemed to call him (i, 13), but the pursuit of it was a sore travail, and there was no satisfaction in its possession. It could not remedy the least real evil, nor make the crooked straight (i, 15). The first experiment in the search after happiness had failed, and he tried another. It was one to which men of great intellectual gifts and high fortunes are continually tempted—to surround himself with all the appliances of sensual enjoyment, and yet in thought to hold himself above it (ii, 1-9), making his very voluptuousness part of the experience which was to enlarge his store of wisdom. This—which one may perhaps call the Goethean idea of life—was what now possessed him. But this also failed to give him peace (ii, 11). Had he not then exhausted all human experience and found it profitless? (ii, 12). If for a moment he found comfort in the thought that wisdom excelleth folly, and that he was wise (ii, 13, 14), it was soon darkened again by the thought of death (ii, 15). The wise man dies as the fool (ii, 16). This is enough to make even him who has wisdom hate all his labor and sink into the outer darkness of despair (ii, 20). Yet this very despair leads to the remedy. The first section closes with that which, in different forms, is the main lesson of the book—to make the best of what is actually around one (ii, 24)—to substitute for the reckless, feverish pursuit of pleasure the calm enjoyment which men may yet find both for the senses and the intellect. This, so far as it goes, is the secret of a true life; this is from the hand of God. On everything else there is written, as before, the sentence that it is vanity and vexation of spirit.

(II.) Ch. iii, 1-vi, 9. The order of thought in this section has a different starting-point. One who looked out upon the infinitely varied phenomena of man's life might yet discern, in the midst of that variety, traces of an order. There are times, and seasons for each of them, in their turn, even as there are for the vicissitudes of the world of nature (iii, 1-8). The heart of man, with its changes, is the mirror of the universe (iii, 11), and is, like that, inscrutable. And from this there comes the same conclusion as from the personal experience. Calmly to accept the changes and chances of life, entering into whatever joy they bring, as one accepts the order of nature, this is the way of peace (iii, 13). The thought of the ever-recurring cycle of nature, which before had been irritating and disturbing, now whispers the same lesson. If we suffer, others have suffered before us (iii, 15). God is seeking out the past and reproducing it. If men repeat injustice and oppression, God also in the appointed season repeats his judgments (iii, 16, 17). It is true that this thought has a dark as well as a bright side, and this cannot be ignored. If men come and pass away, subject to laws and changes like those of the natural world, then, it would seem, man has no pre-eminence above the beast (iii, 19). One end happens to all. All are of the dust and return to dust again (iii, 20). There is no immediate denial of this conclusion. It was to this that the Preacher's experience and reflection had led him. But even on the hypothesis that the personal being of man terminates with his death, he has still the same counsel to give. Admit that all is darkness beyond the grave, and still there is nothing better on this side of it than the temper of a tranquil enjoyment (iii, 22).

The transition from this result to the opening thoughts of ch. iv seems at first somewhat abrupt. But the Preacher is retracing the paths by which he had been actually led to a higher truth than that in which he had then rested, and he will not, for the sake of a formal continuity, smooth over its ruggedness. The new track on which he was entering might have seemed less promising than the old. Instead of the self-centred search after happiness he looks out upon the miseries and disorders of the world, and learns to

sympathize with suffering (iv, 1). At first this does but multiply his perplexities. The world is out of joint. Men are so full of misery that death is better than life (iv, 2). Successful energy exposes men to envy (iv, 4). Indolence leads to poverty (iv, 5). Here, too, he who steers clear of both extremes has the best portion (iv, 6). The man who heaps up riches stands alone without kindred to share or inherit them, and loses all the blessings and advantages of human fellowship (iv, 8-12). Moreover, in this survey of life on a large scale, as in that of a personal experience, there is a cycle which is ever repeated. The old and foolish king yields to the young man, poor and wise, who steps from his prison to a throne (iv, 13, 14). But he too has his successor. There are generations without limit before him, and shall be after him (iii, 15, 16). All human greatness is swallowed up in the great stream of time.

The opening thought of ch. v again presents the appearance of abruptness, but it is because the survey of human life takes a yet wider range. The eye of the Preacher passes from the dwellers in palaces to the worshippers in the Temple, the devout and religious men. Have they found out the secret of life, the path to wisdom and happiness? The answer to that question is that there the blindness and folly of mankind show themselves in their worst forms. Hypocrisy, unseemly prayers, idle dreams, broken vows, God's messenger, the Priest, mocked with excuses—that was what the religion which the Preacher witnessed presented to him (v, 1-6). The command "Fear thou God," meant that a man was to take no part in a religion such as this. But that command also suggested the solution of another problem, of that prevalence of injustice and oppression which had before weighed down the spirit of the inquirer. Above all tyranny of petty governors, above the might of the king himself, there was the power of the Highest (v, 8); and his judgment was manifest even upon earth. Was there, after all, so great an inequality? Was God's purpose, that the earth should be for all, really counteracted? (v, 9). Was the rich man with his cares and fears happier than the laboring man whose sleep was sweet without riches? (v, 10-12). Was there anything permanent in that wealth of his? Did he not leave the world naked as he entered it? And if so, did not all this bring the inquirer round to the same conclusion as before? Moderation, self-control, freedom from all disturbing passions, these are the conditions of the maximum of happiness which is possible for man on earth. Let this be received as from God. Not the outward means only, but the very capacity of enjoyment is his gift (v, 18, 19). Short as life may be, if a man thus enjoys, he makes the most of it. God approves and answers his cheerfulness. Is not this better than the riches or length of days on which men set their hearts? (vi, 1-5). All are equal in death; all are nearly equal in life (vi, 6). To feed the eyes with what is actually before them is better than the ceaseless wanderings of the spirit (vi, 9).

(III.) Chap. vi, 10-viii, 15. So far the lines of thought all seemed to converge to one result. The ethical teaching that grew out of the wise man's experience had in it something akin to the higher forms of Epicureanism. But the seeker could not rest in this, and found himself beset with thoughts at once more troubling and leading to a higher truth. The spirit of man looks before and after, and the uncertainties of the future vex it (vi, 12). A good name is better, as being more permanent, than riches (vii, 1); death is better than life, the house of mourning than the house of feasting (vii, 2). Self-command and the spirit of calm endurance are a better safeguard against vain speculations than any form of enjoyment (vii, 8, 9, 10). This wisdom is not only a defence, as lower things in their measure may be, but it gives life to them that have it (vii, 12). So far there are signs of

a clearer insight into the end of life. Then comes an oscillation which carries him back to the old problems (vii, 15). Wisdom suggests a half-solution of them (vii, 18), suggests also calmness, caution, humility in dealing with them (vii, 22); but this is again followed by a relapse into the bitterness of the sated pleasure-seeker. The search after wisdom, such as it had been in his experience, had led only to the discovery that, though men were wicked, women were more wicked still (vii, 26-29). The repetition of thoughts that had appeared before is perhaps the natural consequence of such an oscillation, and accordingly in ch. viii we find the seeker moving in the same round as before. There are the old reflections on the misery of man (viii, 6), and the confusions in the moral order of the universe (viii, 10, 11), the old conclusion that enjoyment (such enjoyment as is compatible with the fear of God) is the only wisdom (viii, 15).

(IV.) Chap. viii, 16-xii, 8. After the pause implied in his again arriving at the lesson of v, 15, the Preacher retraces the last of his many wanderings. This time the thought with which he starts is a profound conviction of the inability of man to unravel the mysteries by which he is surrounded (viii, 17), of the nothingness of man when death is thought of as ending all things (ix, 3-6), of the wisdom of enjoying life while we may (ix, 7-10), of the evils which affect nations or individual man (ix, 11, 12). The wide experience of the Preacher suggests sharp and pointed sayings as to these evils (x, 1-20), each true and weighty in itself, but not leading him on to any firmer standing-ground or clearer solution of the problems which oppress him. It is here that the traces of plan and method in the book seem most to fail us. Consciously or unconsciously the writer teaches us how clear an insight into the follies and sins of mankind may coexist with doubt and uncertainty as to the great ends of life, and give him no help in his pursuit after truth. In ch. xi, however, the progress is more rapid. The tone of the Preacher becomes more that of direct exhortation, and he speaks in clearer and higher notes. The conclusions of previous trains of thought are not contradicted, but are placed under a new law and brought into a more harmonious whole. The end of man's life is not to seek enjoyment for himself only, but to do good to others, regardless of the uncertainties or disappointments that may attend his efforts (xi, 1-4). His wisdom is to remember that there are things which he cannot know, problems which he cannot solve (xi, 5), and to enjoy, in the brightness of his youth, whatever blessings God bestows on him (xi, 9). But beyond all these there lie the days of darkness, of failing powers and incapacity for enjoyment; and the joy of youth, though it is not to be crushed, is yet to be tempered by the thought that it cannot last forever, and that it too is subject to God's law of retribution (xi, 9, 10). The secret of a true life is that a man should consecrate the vigor of his youth to God (xii, 1). It is well to do this before the night comes, before the slow decay of age benumbs all the faculties of sense (xii, 2, 6), before the spirit returns to God who gave it. The thought of that end rings out once more the knell of the nothingness of all things earthly (xii, 8); but it leads also to "the conclusion of the whole matter," to that to which all trains of thought and all the experiences of life had been leading the seeker after wisdom, that "to fear God and keep his commandments" was the highest good attainable; that the righteous judgment of God would in the end fulfil itself and set right all the seeming disorders of the world (xii, 13, 14). (See two articles on the *plan and structure of the book of Ecclesiastes*, in the *Method. Quart. Rev.* for April and July, 1849, modified by Dr. McClintock from Vaihinger, in the *Theol. Stud. u. Krit.* for July, 1848; also an article by Gurlitt in the *Stud. u. Krit.* for 1864, ii).

If one were to indulge conjecture, there would per-

haps be some plausibility in the hypothesis that xii, 8 had been the original conclusion, and that the epilogue of xii, 9-14 had been added, either by another writer, or by the same writer on a subsequent revision. The verses (9-12) have the character of a panegyric designed to give weight to the authority of the teacher. The two that now stand as the conclusion may naturally have originated in the desire to furnish a clew to the perplexities of the book, by stating in a broad intelligible form, not easy to be mistaken, the truth which had before been latent.

If the representation which has been given of the plan and meaning of the book be at all a true one, we find in it, no less than in the book of Job, indications of the struggle with the doubts and difficulties which in all ages of the world have presented themselves to thoughtful observers of the condition of mankind. In its sharp sayings and wise counsels it may present some striking affinity to the Proverbs, which also bear the name of the son of David; but the resemblance is more in form than in substance, and in its essential character it agrees with that great inquiry into the mysteries of God's government which the drama of Job brings before us. There are indeed characteristic differences. In the one we find the highest and boldest forms of Hebrew poetry, a sustained unity of design; in the other there are, as we have seen, changes and oscillations, and the style seldom rises above the rhythmic character of proverbial forms of speech. The writer of the book of Job deals with the great mystery presented by the sufferings of the righteous, and writes as one who has known those sufferings in their intensity. In the words of the Preacher, we trace chiefly the weariness or satiety of the pleasure-seeker, and the failure of all schemes of life but one. In spite of these differences, however, the two books illustrate each other. In both, though by very diverse paths, the inquirer is led to take refuge (as all great thinkers have ever done) in the thought that God's kingdom is infinitely great, and that man knows but the smallest fragment of it; that he must refrain from things which are too high for him, and be content with that which is given him to know—the duties of his own life, and the opportunities it presents for his doing the will of God.—Smith, s. v. There is probably a connection in the authorship or editorship of these two books that may to some extent account for this resemblance. See JOB (BOOK OF).

V. *Commentaries*.—The following is a full list of separate exegetical works on Ecclesiastes (the most important are indicated by an asterisk prefixed): Olym-piodorus, *Enarratio* (in the *Bibl. Max.* xviii, 490; Grynaeus, p. 933); Origen, *Scholia* (in *Bibl. Patr.* Gall. p. 14); Dionysius Alex., *Commentarius* (in *Opp.* i, 14; Append. to *Bibl. Patr.* Gall.); Gregory Thaum., *Metaphrasis* (in *Opp.* p. 77); Gregory Nyssen, *Conciones* (in *Opp.* i, 373); Gregory Nazianzen, *Metaphrasis* (in *Opp. Spm.* i, 874); (Eumenius, *Cateua* (in Gr., Verona, 1532); Jerome, *Commentarius* (in *Opp.* iii, 383); Salonius, *Explicatio* (in *Bibl. Max. Patr.* p. 8); Alcuin, *Commentarius* (in *Opp.* i, ii, 110); Rupert, *In Eccles.* (in *Opp.* i, 1118); Hugo, *Homilia* (in *Opp.* i, 53); Honorius, *Commentarius* (in *Opp.* i); Bonaventura, *Expositio* (in *Opp.* i, 303); Latif, *שׁוֹרֵי* (Constpl. n. d. 12mo); Schirwood, *Note* (Antw. 1523, 4to); Guidaer, *Commentarius* (Paris, 1531, 1540, 4to); Arboreus, *Commentarius* (Paris, 1531, 1537, fol.); Bucer, *Commentarius* (Argent. 1532, 4to); Moring, *Commentarius* (Antw. 1533, 8vo); \*Luther, *Adnotationes* (Wittemb. 1533, 8vo); Borrhous, *Commentarius* (Basil. 1539, 1564, fol.); Titelmann, *Commentarius* (8vo, Par. 1545, 1549, 1577, 1581; Antw. 1552; Lugd. 1555, 1575); Melancthon, *Enarratio* (Wittemb. 1559, 8vo); Zuingle, *Complanatio* (in *Opp.* iii); Brent, *Commentarii* (in *Opp.* viii); Cajetanus, *Commentarius* (Lugd. 1552, fol.); Striegel, *Scholia* (Lpz. 1555, 8vo); Sferno, *שׁוֹרֵי* (Ven. 1567, 4to);

Galante, *קְהֵלֵת הַמֶּלֶךְ* (4to, Safet, 1570; Freft. 1681); Sidonius, *Commentaria* (in Germ., Mogunt. 1571, fol.); De Pomis, *Discorso* (Ven. 1572, 8vo); Mercer, *Commentarius* (Genev. 1573, fol.); Taftazak, *פְּרִיֵת יוֹסֵף* (Ven. 1576, 4to); Jaisch, *עַל קְהֵלֵת הַמֶּלֶךְ*, etc. (Constpl. 1576, fol.); Id., *Commentarius* (Antw. 1580, 4to); Jansen, *Paraphrasis* (Leyd. 1578, fol.); Galicho, *עַל בְּנֵי הַמֶּלֶךְ* (Ven. 1578, 4to); Corranus, *Paraphrasis* (Lond. 1579, 1581, 8vo; ed. Scultet, Francf. 1618, Heidelberg. 1619, 8vo); Senan, *Commentarius* (Genev. 1580, 8vo; in Engl. by Stockwood, Lond. 1585, 8vo); Manse, *Explicatio* (Flor. 1580, 8vo; Colon. 1580, 12mo); Lavater, *Commentarius* (Tigur. 1584, 8vo); Beza, *Paraphrasis* (Genev. 1588, 1598, 8vo; in Germ., ib. 1599, 8vo); Gifford, *Commentarius* (Lond. 1589, 8vo); Strack, *Predigen* (4to, Cassel, 1590; Freft. 1618; Goth. 1663); Slangendorp, *Commentarius* (Hafn. 1590, 8vo); Greenham, *Brief Sum* (in *Works*, p. 628); Arepol, *הַמֶּלֶךְ* (Constpl. 1591, 4to); Arrivo, *קְהֵלֵת הַמֶּלֶךְ* (Salonica, 1597, 4to); Baruch ben-Baruch, *אֲדָם הַיְהוּדִי הַגָּדוֹל* (Ven. 1599, fol.); Alscheich, *הַמֶּלֶךְ שִׁבְרִים* (Ven. 1601, 4to); Leuchter, *Erklärung* (Frkft. 1603, 1611, 4to); Broughton, *Commentarius* (Lond. 1605, 4to); Lorinus, *Commentarius* (Lugd. 1606, 4to); Bardin, with various titles (in French, Par. 1609, 12mo; 1632, 8vo; in Germ., Guelph. 1662, 8vo); Fay, *Commentarius* (Genev. 1607, 8vo); Osorius, *Commentarius* (Lugd. 1611, 8vo); Amama, *Note* (in the *Crit. Sacri*); Sanchez, *Commentarius* (Barcin. 1619, 4to); \*De Pineda, *Commentarius* (Antw. 1620, fol.); Ferdinand, *Commentarius* (Rom. 1621, fol.); Granger, *Commentarius* (Lond. 1621, 4to); Egard, *Expositio* (Hamb. 1622, 4to); Pemble, *Exposition* (Lond. 1628, 4to); Dieterich, *Predigen* (fol., Ulm, 1632, 1655; Nürnberg. 1665); Drusius, *Annotationes* (Amst. 1635, 4to); Guillebert, *Paraphrasis* (Paris, 1635, 1642, 8vo); à Lapide, *In Eccles.* (Antw. 1638, fol.); Jermin, *Commentary* (Lond. 1638, fol.); Cartwright, *Metaphrasis* (4to, Amst. 1647; 4th edit. ib. 1663); Trapp, *Commentary* (Lond. 1650, 4to); \*Geier, *Commentarius* (4to, Lpz. 1653; 5th edit. 1730); Mercado, *פְּרִיֵת* (Amst. 1653, 4to); Cotton, *Exposition* (London, 1654, 8vo); Gorse, *Explication* (in French, Par. 1655, 3 vols. 12mo); Lusitano, *פְּרִיֵת הַמֶּלֶךְ* (Ven. 1656, 4to); Leigh, *Commentarius* (Lond. 1657, fol.); Varenius, *Gemma Salomonis* (Rost. 1659, 4to); Werenfels, *Uomilie* (Basle, 1666, 4to); \*Reynolds, *Annotations* (Lond. 1669, 8vo; in "Assembly's Annot. Works," iv, 33; also edit. by Washburn, Lond. 1811); De Sacy, *L'Ecclesiaste* (in his *Sainte Bible*, xiv); Anon., *Exposition* (Lond. 1680, 4to); Bossnet, *Libri Salomonis* (Par. 1693, 8vo); Nisbet, *Exposition* (Edinb. 1694, 4to); \*Smith, *Explicatio* (Amst. 2 vols. 4to, 1699, 1704); Leenhof, *Verklaaring* (te Zwolle, 1700, 8vo); Yeard, *Paraphrasis* (Lond. 1701, 8vo); Martianay, *Commentaire* (Par. 1705, 12mo); Seebach, *Erklärung* (Hal. 1705, 8vo); Tietzmann, *Erklärung* (Nürnberg. 1705, 4to); David ben-Ahron, *פְּרִיֵת הַמֶּלֶךְ* (Prague, 1708, 4to); \*Schmidl, *Commentarius* (Strasb. 1709, 4to); Mel, *Predigen* (Frkft. 1711, 4to); Zierold, *Bedeutung*, etc. (Lpz. 1715, 4to); Rambach, *Adnotationes* (Hal. 1720, 8vo); Waechter, *Uebers. m. Anm.* (Memmingen, 1723, 4to); Francke, *Commentarius* (Brandenb. 1724, 4to); Wolle, *Auslegung* (Lpz. 1729, 8vo); Hardouin, *Paraphrase* (Par. 1729, 12mo); Bauer, *Erläuterung* (Lpz. 1732, 4to); Hanssen, *Betrachtungen* (Lub. 1737, 1744, 4to); Lampe, *Adnotationes* (in his *Medit. Evng.* Gronig. 1741, 4to); Michaelis, *Entwickelung* (8vo, Gött. 1751; Brem. 1762); Anon., *Uebers. m. Anm.* (Halle, 1760, 8vo); Peters, *Append. to Crit. Diss.* (Lond. 1760, 8vo); \*Des Vaux, *Essay, Analytical Paraphrase*, etc. (Lond. 1760, 4to; in Germ., Halle, 1764, 4to); Carmeli, *Spiegamento* (Ven. 1765, 8vo); Judetnes, *פְּרִיֵת הַמֶּלֶךְ* (Amst. 1765, 4to); Anon., *Cohleth, a Poem* (Lond. 1768, 4to); \*Mendels

John, *D. Buch Koheleth*, etc. (Berlin, 1770, 8vo; 1789, 4to; tr. with notes by Preston, Camb. 1845, 8vo); De Poix, D'Arras, and De Paris, *L'Ecclesiaste*, etc. (Par. 1771, 12mo); Anon. *Traduct. et Notes* (Par. 1771, 8vo); Moldenhauer, *Übers. u. Erläut.* (Lpz. 1772, 8vo); Grotius, *Annotationes* (Halle, 1777, 4to); Kleuker, *Salomo's Schriften* (Lpz. 1777, 8vo); Zinck, *Commentarius* (Augsb. 1780, 4to); Struensee, *Uebersetzung* (Halberst. 1780, 8vo); Greenway, *Paraphrase* (Lond. 1781, 8vo); Van der Palm, *Ecl. illustratus* (Leyd. 1784, 8vo); Döderlein, *Uebersetzung* (8vo, Jen. 1784, 1792); Levison, *הַכֹּהֵלֶת* (Hamb. 1784, 8vo); Schleusner, *Auctarium* (Götting, 1785, 4to); Spohn, *Übers. m. Ann.* (Lpz. 1785, 8vo); Neunhöfer, *Versuch* (Weissenb. 1787, 8vo); Anon. *Paraphrase*, etc. (London, 1787, 8vo); Friedländer, *Abhandlung* (Berl. 1788, 8vo); Bode, *Erklärende Umschreibung* (Quedlinb. 1788, 8vo); Löwe, *הַכֹּהֵלֶת* (Berl. 1788, 8vo); Gregory II, *Explanatio* (Gr. and Lat., Ven. 1791, fol.); Pacchi, *Parafasi* (Modena, 1791, 8vo); Zirkel, *Übers. u. Erklär.* (Würzb. 1792, 8vo); Boaretti, *Valgarizz.* (Ven. 1792, 8vo); Hodgson, *Translation* (Lond. 1792, 8vo); Schmidt, *Versuch* (Gieß. 1794, 8vo); Loanz, *הַכֹּהֵלֶת* (4to, Amst. 1695; Berl. 1775); Goab, *Beiträge*, etc. (Tübing. 1795, 8vo); Nachtigal, *Koheleth* (Halle, 1798, 8vo); Bergst, *Bearbeitung* (1799, 8vo); Jacobi, *Predigerbuch* (Celle, 1799, 8vo); Fränkel, *הַכֹּהֵלֶת* (Dessau, 1800, 8vo); Middeldorp, *Symbola* (Fr. ad V. 1811, 4to); Kelle, *D. Salomon. Schriften* (Freib. 1815, 8vo); Katzenelnbogen, *הַכֹּהֵלֶת* (Wars. 1815, 4to); \*Umbreit, *Übers. u. Darstell.* (Gotha, 1818, 8vo; also his *Koheleth scepticus de summo bono*, Gott. 1820, 8vo); Wardlaw, *Lectures* (Lond. 1821, 2 vols. 8vo; new ed. Lond. 1838, 2 vols. 12mo); Holden, *Illustration* (Lond. 1822, 8vo); Kaiser, *Übers. u. Erläut.* (Erlang. 1823, 8vo); Henz, *Adumbratio* (Dorpat. 1827, 4to); Anon. *Übers. u. Erläut.* (Stuttg. 1827, 8vo); Rosenmüller, *Scholæ* (pt. ix, Lips. 1830, 8vo); Heinemann, *Commentar* (Berl. 1831, 8vo); Köster, *Stroph. Übers.* (Schlesw. 1831, 8vo); Ewald, *Koheleth* (in his *Poet. Bücher*, iv); \*Knobel, *Commentar* (Lpz. 1836, 8vo); Auerbach, *הַכֹּהֵלֶת*, etc. (Bresl. 1837, 8vo); \*Herzfeld, *Übers. u. Erläut.* (Braunsch. 1838, 8vo); Noyes, *Notes* (Bost. 1846 [3d ed. 1867], 12mo); Barham, *Ecclesiastes* (in his *Bible revised*, i); \*Hitzig, *Erklärung* (in the *Kurzgef. Ereg. Handb.*, Lpz. 1847, 8vo); Hamilton, *Lectures* (Lond. 1851, 12mo); \*Stuart, *Commentary* (N. Y. 1851; Andover, 1862, 12mo); Elster, *Commentar* (Götting. 1855, 8vo); Morgan, *Metrical Paraphrase* (Lond. 1856, 4to); Macdonald, *Explanation* (N. Y. 1856, 8vo); Weiss, *Exposition* (Lond. 1856, 12mo); Plungian, *הַכֹּהֵלֶת* (Wilna, 1857, 8vo); Wangenheim, *Auslegung* (Berlin, 1858, 8vo); \*Vaihinger, *Übersetz. u. Erklär.* (Stuttg. 1858, 8vo; his art. on the subject in the *Stud. u. Krit.* 1848, was translated in the *Meth. Quart. Review*, April and July, 1849); Rosenthal, *הַכֹּהֵלֶת*, etc. (Prague, 1858, 8vo); Buchanan, *Commentary* (Glasg. 1859, 8vo); Bridges, *Exposition* (London, 1859, 8vo); \*Hengstenberg, *Auslegung* (Berl. 1859, 8vo; tr. in Clarke's *Library*, Edinb. 1860, 8vo; also Phila. 1860, 8vo); Hahn, *Commentar* (Lpz. 1860, 8vo); Böhl, *De Aravisnis Koheleth* (Erlang. 1860, 8vo); \*Ginsburg, *Koheleth translated with a Commentary* (Lond. 1861, 8vo); Diederich, *Erläuterung* (Neu-Rup. 1865, 8vo); Castelli, *Tradotto e note* (Pisa, 1866, 8vo); Young, *Commentary* (Phila. 1866, 8vo). Others are embraced in the Rabbinical Bibles of Bomberg and Moses Frankfurter (q. v.). For those in general commentaries, see COMMENTARY.

**Ecclesiastic, Ecclesiastical**, of or belonging to the Church (*ecclesia*). In later times the word *ecclesiastic* came to be applied solely to clergymen as a name, and *ecclesiastical* is often confined in use, improperly, to the affairs of the clergy. In the early Church, Christians in general are spoken of by this

title, in opposition to Jews, infidels, and heretics. The word means *men of the Church*, and was applied to Christians as being neither of Jewish synagogues, nor heathen temples, nor heretical conventicles, but members of the Church of Christ; e. g. ἀνδρες ἐκκλησιαστικοί, Eusebius, iv, 7, cited by Bingham, *Orig. Eccles.* bk. i, ch. i, § 8.

**Ecclesiastical History** is that branch of historical theology (q. v.) which treats of the development of the kingdom of God among men on the earth by means of the Church.

**I. Idea and Scope of Ecclesiastical History.**—The title *Ecclesiastical History* (*Historia Ecclesiastica*) was used by all the older writers on this branch of science. German writers began the use, in its stead, of the title *Church History* (*Kirchengeschichte*), which has of late been adopted also by most English writers. Its idea and limits depend on the idea which is formed of the Church (*ecclesia*). See CHURCH.

1. If the Church be regarded as a divine institution, existing in all the ages before Christ as well as since, then the field of Church history reaches from the beginnings of the history of the first divine covenant with man down to the present time. It would then be divided into *Biblical Church History* and *Ecclesiastical History*, or simply *Church History*. Biblical Church history, again, could be divided into O. T. and N. T. The entire field of Church history, in its widest sense, would thus be, I. Old-Testament Church history. II. New-Testament Church History, including (1) the life of Christ; (2) the planting of Christianity by the apostles. III. Ecclesiastical history, beginning at the close of the canon, and extending to the present time (see Alexander, *Notes on N.-T. Literature and Ecclesiastical History*, N. Y. 1867, p. 156 sq.; Stanley, *Eastern Church*, Introduction).

2. If (as it generally is for convenience), on the other hand, the term Church be restricted to the Christian Church, then the field of Church history is limited to the development of the kingdom of God among men through and by means of the Christian Church. "Its proper starting-point is the incarnation of the eternal Word, who dwelt among us and revealed his glory, the glory as of the only-begotten of the Father, full of grace and truth; and next to this the miracle of the first Pentecost, when the Church took her place as a Christian institution, filled with the spirit of the glorified Redeemer, and intrusted with the conversion of all nations. Jesus Christ, the God-man and Saviour of the world, is the author of the new creation, the soul and the head of the Church, which is his body and his bride. In his person and work lies all the fulness of the Godhead and of renewed humanity, the whole plan of redemption, and the key of all history from the creation of man in the image of God to the resurrection of the body unto everlasting life" (Schaff, *Church Hist.* vol. i, § 1). Modern writers generally adopt this second view, not only for its practical convenience, but also on the theoretical ground that the sources of the O. and N. T. history are inspired; those of Church history, since the closing of the canon, are human. The former is therefore called *Sacred History*, constituting a department by itself. The relations of Christianity to Judaism and heathenism are generally treated by modern writers in an Introduction or in separate chapters, as the "Preparation for Christianity in the History of the World." The life of Jesus is so treated by some writers; by most others it is relegated to a separate work. Neander makes one work of "The life of Christ" as the ground of the existence of the Christian Church; another work treats of the apostolic Church, or "The Planting and Training of Christianity by the Apostles;" while his great *Church History* continues the development after the apostolic age. Nevertheless, in treating of "Church Discipline and Constitution," he

is compelled to go back to the apostolic age. Dr. Schaff makes "the Church under the Apostles" the first division of his *History of the Christian Church*, and gives the relations of Christianity to Judaism and heathenism in chap. i, as "Preparations for Christianity." Hinds (*History of the Christian Church, 1st Division, Encycl. Metropolitana*) treats in an Introduction of the religion of Jews, Gentiles, and Samaritans, and then makes part i the Ministry of Christ; part ii, the Apostolic Age; part iii, Age of the Apostolic Fathers.

3. As to the relations of Church history to general history, dean Stanley remarks: "To a great extent the two are inseparable; they cannot be torn asunder without infinite loss to both. . . . It is indeed true that, in common parlance, ecclesiastical history is often confined within limits so restricted as to render such a distinction only too easy. . . . Gibbon's *Decline and Fall of the Roman Empire* is, in great part, however reluctantly or unconsciously, the history of the 'rise and progress of the Christian Church.' . . . Never let us think that we can understand the history of the Church apart from the history of the world, any more than we can separate the interests of the clergy from the interests of the laity, which are the interests of the Church at large. . . . How to adjust the relations of the two spheres to each other is almost as indefinite a task in history as it is in practice and in philosophy. In no age are they precisely the same" (*Eastern Church, Introduction*). A book written from this point of view, however, would be rather a history of Christianity in its relations to the general development of man than a history of the Church. So Milman's *Latin Christianity* is, to great extent, a general history of the times rather than of the Christian Church, while, at the same time, the Church is the prominent feature of it. It is well that such a book should be written, and the work has been well done by dean Milman.

II. *Method of Church History.*—The order and arrangement of the material have varied greatly at different periods. The earliest writers (e. g. Eusebius) wrote generally without scientific method, and their arrangement was arbitrary and fortuitous. In the Church of the Middle Ages history was little studied, and what little was written was put in the form of simple chronicles. The first application of method was really made in the Magdeburg Centuries, projected by Matthias Flacius Illyricus (1559-1574). See CENTURIES. The history is divided into centuries, with a topical arrangement under each century of sixteen heads as rubrics, viz.: 1. General view; 2. Extent of the Church; 3. Its external condition; 4. Doctrines; 5. Heresies; 6. Rites; 7. Polity; 8. Schisms; 9. Councils; 10. Bishops and doctors; 11. Heretics; 12. Martyrs; 13. Miracles; 14. Jews; 15. Other religions; 16. Political changes affecting the condition of the Church. This centennial arrangement (combined with the rubrical subdivision) maintained its ground for two centuries: the last great work which follows it is Mosheim's *Institutes of Ecclesiastical History*. Mosheim divides the material under each century into external and internal history, and these again as follows: External events into prosperous and adverse; internal history into, 1. State of literature and science; 2. Government of the Church; 3. Theology; 4. Rites and ceremonies; 5. Heresies and schisms. The later historians divide the whole history into *periods*, determined by great events, and then arrange the material under each period by topics or rubrics. Each writer, of course, frames his periods according to his own views of the great epochal events of history, but most of them make three great periods—*ancient, mediæval, and modern*, the first beginning with the day of Pentecost; the second with Gregory the Great, A. D. 590 (acc. to others, with Constantine, 306 or 311, or the fall of the West Roman empire, 476, or Charlemagne, 800); the third with the Reformation, 1517.

Perhaps the best modern division is that of Schaff, who proposes nine periods, viz., three *ancient*, three *mediæval*, three *modern*, viz.: I. The Apostolic Church, A. D. 1-100. II. The Church persecuted as a sect, to Constantine, the first Christian emperor, A. D. 100-311. III. The Church in union with the Græco-Roman empire, and amid the storms of the great migration, to pope Gregory I, A. D. 311-590. IV. The Church planted among the Germanic nations, to Hildebrand, A. D. 590-1019. V. The Church under the papal hierarchy and the scholastic theology, to Boniface VIII, A. D. 1049-1294. VI. The decay of mediæval Catholicism, and the preparatory movements of Protestantism, A. D. 1294-1517. VII. The evangelical reformation and the Roman Catholic reaction, A. D. 1517-1600. VIII. The age of polemic orthodoxy and exclusive confession-alism, A. D. 1600-1750. IX. The spread of infidelity and the revival of Christianity in Europe and America, from 1750 to the present time (*Ch. Hist.* i, 14). Dr. J. A. Alexander (*Op. cit.* p. 214 sq.) objects to the minute and fixed rubrical arrangement on various grounds, and proposes to set it aside altogether "as a framework running through the history and determining its whole form, and to substitute a natural arrangement of the topics by combining a general chronological order with a due regard to the mutual relative importance of the topics themselves, so that what is prominent at one time may be wholly in the background at another, instead of giving all an equal prominence at all times, by applying the same scheme or formula to all alike. This natural method, so called to distinguish it from every artificial or conventional arrangement, far from being new, is recommended by the practice and example of the best historians in every language and in every age, affording a presumptive, if not a conclusive, proof both of its theoretical consistency and of its practical efficiency and usefulness, and, at the same time, a convenient means of keeping this and other parts of universal history in mutual connection and agreement with each other." See also Baur, *Epocheu d. kirchlichen Geschichtschreibung* (Tübingen, 1852).

III. *Branches of Church History.*—The number of branches into which the history is divided will of course depend upon the method adopted (see above; but the historian, besides setting forth the progress of Christianity in the world and its vicissitudes, must also treat, more or less fully, of the constitution and government of the Church (ecclesiastical polity); of the history of doctrines; of worship, religious usages, domestic life; of creeds, etc. Some of these are of so great importance as to justify treatment in separate books, and they have, in fact, grown to be independent branches of science: e. g. archaeology, history of doctrines, symbolics, patristics and patrology (the doctrine and literature of the fathers, etc.), history of councils, Church polity, etc.

IV. *Sources of Church History.*—For the history of the Jewish Church and of the Apostolic Church, we find our sources of information in the O. and N. Testaments. For the history since the closing of the Canon, the sources are given by Kurtz as follows: "They are partly primary (original), such as monuments and original documents; partly secondary (derived), among which we reckon traditions, and reported researches of original sources which have since been lost. Monuments, such as ecclesiastical buildings, pictures, and inscriptions, are commonly only of very subordinate use in Church history. But archives, preserved and handed down, are of the very greatest importance. To this class also belong the acts and decrees of ecclesiastical councils; the regesta and official decrees of the popes (decretals, briefs) and of bishops (pastoral letters); the laws and regesta issuing from imperial chancelleries, so far as these refer to ecclesiastical affairs; the rules of monastic orders, liturgies, confessions of faith, letters of personages influential in Church or State; reports of eye-witnesses; sermons and doctrinal

treatises of acknowledged theologians, etc. If the documents in existence are found insufficient, we must have recourse to earlier or later traditions, and to the historical investigations of those who had access to original documents which are now no longer extant" (*Text-book of Church History*, vol. i, § 3). "The private writings of personal actors in the history, the works of the Church fathers for the first six centuries, of the scholastic and mystic divines for the Middle Ages, and of the Reformers and their opponents for the 16th century, are the richest mines for the historian. They give history in its birth and actual movement; but they must be carefully sifted and weighed, especially the controversial writings, where fact is generally more or less adulterated with party spirit, heretical and orthodox" (Schaff, *Church History*, vol. i, § 3).

V. *Literature*.—(1.) *Apostolic Church*. The Acts of the Apostles may be regarded as the first Church history, for they describe the planting of the Church among Jews and Gentiles from Jerusalem to Rome. (In what follows we make free use of Dr. Schaff, vol. i.) (2.) *Greek Church*. Eusebius (q. v.) won by his Church history (εκκλησιαστική ιστορία, up to A.D. 324) the title of the Father of Church history, though he was able to make use of the work of a predecessor, Hege-sippus (about A.D. 150). Eusebius is learned, moderate, and truth-loving, and made use of many sources of information which are now lost. As a work of art his work is inferior to the classic historians. It was continued on the same plan and in a similar spirit by Socrates, Sozomen, and Theodoret in the fifth, and by the Arians Theodorus and Evagrius in the sixth centuries. Among the later Greek Church historians Nicephorus Callistus (about 1333) deserves mention. A Church history in the modern Greek Church was begun in 1866 by Const. Kontogonis (Εκκλησιαστική ιστορία από της ζείας συστάσεως της εκκλησίας μέχρι των κατ' ημάς χρόνων, vol. i, Athens, 1866). (3.) *The Latin Church before the Reformation* was long content with translations and extracts from Eusebius and his continuators, and but one work of consequence was produced during the Middle Ages. (4.) *The Roman Church after the Reformation*. At the head of Roman writers in Church history stands cardinal Baronius (†1607), whose *Annales Ecclesiastici* (Rome, 1588 sq., 12 vols. fol.) come down to the year 1188. They were continued, though with less ability, by Raynaldus, Bzovius, Spondanus, and very recently, from the year 1572, by Theiner (Rome, 1853 sq., fol.). The *Annales* were designed as a refutation of the Magdeburg Centuries (see CENTURIES), and were refuted in part not only by several Protestant writers, but also by Roman scholars, e. g. by Pagi. The work of Natalis Alexander († 1724), *Historia Ecclesiastica V. et N. T.* (Par. 1699 sq., 8 vols. fol.; Bingii, 1785–91, 20 vols.), is Gallican, learned, and, on the whole, a very valuable work. Fleury (*Histoire Ecclesiastique*, Par. 1691–1720, 20 vols. 4to) commends himself by mildness of spirit, fluency of style, and copiousness of material. Bossuet († 1704) wrote in a very elegant style a history of the world: *Discours sur l'Histoire Universelle depuis le commencement du monde jusqu'à l'empire de Charlemagne* (Paris, 1681). Tillemont († 1698) compiled, almost entirely in the words of the original authorities, his *Mémoires pour servir à l'histoire ecclésiastique des six premiers siècles* (Paris, 1693 sq., 4to), which is the most thorough of all the French Church histories. The first comprehensive work in Roman Catholic Germany was commenced by count Stolberg, *Geschichte der Religion Jesu Christi* (Hamburg, 1806–1818, 8vo). The 15 vols., which he completed bring the history down to the year 430. The work is very copious, and written with the enthusiasm of a poet, but is not critical. The continuation, by Kerz (vols. 16–38, 8vo, Mentz, 1824–51, to A.D. 1300) and Brischar (vol. 39 sq., 8vo), are still inferior. The work of Katerkamp (*Kirchengeschichte*) (1819–30 to 1073, 4 parts, 8vo) is by far more thorough.

Rohrbacher's *Histoire Universelle de l'Église* (Par. 1842–48, vol. 29, 8vo; a continuation containing the Church history from 1860–1866, by J. Chantrel, Corbeil, 1867) is written from an ultramontane stand-point, and has not made sufficient use of the recent investigations. The best Roman Catholic manuals of Church history are those of Dollinger (*Gesch. d. christl. Kirche*, vol. i, parts 1 and 2, Landshut, 1833–35; *Lehrbuch d. Kirchengesch.* vol. i, and part 1 of vol. ii, up to the Reformation, Ratisbon, 1836 sq.; 2d edit. 1843; *Kirchengeschichte*, vol. i, part 1, *Heidenthum u. Judenthum*, Ratisbon, 1857; part 2, *Christenthum u. Kirche in der Zeit ihrer Grundlegung*, 1860), Ritter (*Handbuch d. Kirchengesch.* Bonn, 1826–35, 3 vols.; 6th edit., 1856, 2 vols.), and especially Alzog (*Universalggeschichte der christlichen Kirche*, Mainz, 1843, 8vo; 8th edit. 2 vols., 1867–68). Posthumous lectures on Church history by Dr. Möhler (died 1838), the greatest Roman Catholic theologian of Germany in the 19th century, were published thirty years after his death by Dr. Gams (*Kirchengeschichte*, 3 vols. Ratisbon, 1868). (5.) *Protestant Writers*. The first comprehensive Church history from the Protestant stand-point was compiled by Mathias Flacius († 1575), surnamed Illyricus (*Ecclesiastica Historia Novi Testamenti*, usually called *Centurie Magdeburgenses*, Basil, 1559–74, fol.), assisted by ten other theologians. It followed the centurial arrangement, and treated of 13 centuries in as many folio volumes. It remained long the standard work of the Lutheran Church, though it is to a certain extent partial and often uncritical (see CENTURIES). Hottinger († 1667) published a similar work (from the stand-point of the Swiss Reformed Church), *Historia Ecclesiastica N. Testamenti* (Zurich, 1655–67, 9 vols.) extending to the 16th century, but it is inferior to that of Flacius. A thorough refutation of Baronius was furnished by Spanheim (*Summa Historie Ecclesiastica*, Lugd. Bat. 1689, 4to). An attempt to free Church history from the fetters of factionalism was made by J. G. Arnold (in his *Unparteiische Kirch- und Ketzerhistorie*, 1698–1700, 4 vols., to 1688), which, however, was often unjust towards the predominant churches through partiality towards the sects. Objective Church history was greatly advanced by Mosheim († 1755), a moderate and impartial Lutheran. His *Institutiones historice ecclesiasticæ antiquæ et recentioris* (Helmstadt, 1755, 4to) is, in the English translation of Murdock (N. Y., 1841, 3 vols., 3d edit.) and McLaine, a favorite text-book in England and America to the present day. Of the two, Murdock's is far the best. The work of Schröckh, *Christliche Kirchengeschichte* (45 vols., to the end of the 18th century, Leipzig, 1768–1812; the last 2 vols. are by Tzschirner), though leaning towards Rationalism, is very valuable for reference. The principal representative of Rationalism among Church historians is Henke, *Allgemeine Geschichte der christlichen Kirche* (Braunschweig, 1788–1823, 9 vols. 8vo, continued by Vater). The work of Gieseler († 1854), *Lehrbuch der Kirchengeschichte* (Bonn, 1824–1857) gives the history as much as possible in the very words of the sources. It is profoundly learned and impartial, but cold and dry. The best English translation of it is by Prof. H. B. Smith (New York, 1857 sq.). Neander († 1850) is generally considered as the father of modern Church history. His aim was to represent Church history as a continuous proof of the divine power of Christianity, and it is therefore prominently the inner side of ecclesiastical events and their religious significance which he unfolds. His *Allgemeine Geschichte der christlichen Religion und Kirche* (Hamburg, 1825–52, 11 vols. 8vo, extending to the council of Basle) has been translated into English by Ly Torrey (Boston, 1847–51, 5 vols. 8vo). Besides these larger works, Germany has produced a great number of excellent manuals. The most important of these are those of Niedner (1846, new ed. 1866), distinguished for fulness and thought; of Hase (9th edit. 1867, translated by Blumenthal and Wing, New York, 1855,

8vo), distinguished for copiousness combined with conciseness; and Guericke (9th edit. 1867, translated by Shedd, vol. i, 1857), who wrote the best historical work from the old Lutheran stand-point. More a sketch than a manual of Church history is the *Kirchengeschichte* of Schleiermacher, published after his death by Bonnell (Berlin, 1840, 8vo). The manual of Engelhardt, of Erlangen (*Handb. d. Kirchengeschichte*, Erlangen, 1832-34, 4 vols.), is an unpretending but valuable arrangement of the subject, as derived from the sources. The manual of Fricke, left incomplete (*Lehrbuch der Kirchengeschichte*, Leipz. 1850, 1 vol.), learned but stiff, is a production of the school of Schleiermacher. In Grfrörer's work on ecclesiastical history (*Allgemeine Kirchengeschichte*, 4 vols. Stuttgart, 1841-46 to 1305, Christianity is treated as the natural product of the time in which it originated. Clerical selfishness, political calculations and intrigues, appear the sole principles of ecclesiastical movements which this author can appreciate or discover. Still, the work is of importance; and those volumes especially which detail the history of the Middle Ages give evidence of original study, and contain much fresh information. The manual of Jacobi, a pupil of Neander (*Lehrb. der Kirchengeschichte*, Berlin, 1850, 1 vol., not completed), breathes the same spirit as that of his teacher. Its tone is elevated; nor is the author content merely to imitate Neander. The prelections of Hagenbach (*Die christl. Kirche der 3 ersten Jahrhunderte*, 2 vols. Leipz. 1853-55; *D. christl. K. vom 7<sup>ten</sup> bis zum 15<sup>ten</sup> Jahrhundert*, Leipz. 1860-61), originally delivered to an educated audience, are somewhat diffuse, but clear and attractive. They breathe throughout a warm Christian spirit, nor is the judgment of the lecturer warped by narrow sectarian prejudices. The works by J. A. Kurtz (*Lehrbuch der Kirchengeschichte*, Mitau, 1842, 5th ed. 1863; Engl. transl. in 2 vols., Philadelphia, 1860; *Handbuch der allgem. Kirchengesch.* vol. i in 3 parts, Mitau, 1853-54, vol. ii, pt. i, 1856) belong among the best productions of the Lutheran school. To the same school belong the manuals of W. B. Lindner (*Lehrbuch der christl. Kirchengeschichte*, Leipz. 1847-54) and H. Schmid (*Lehrb. der Kirchengeschichte*, Nördlingen, 1851). The manual of Ebrard (*Handbuch der christl. K.-u. Dogmengesch.* Erlangen, 1865-66, 4 vols.) is written from the stand-point of the United Evangelical Church, as is also the work of Prof. F. A. Hasse (*Kirchengesch.* Leipz. 1864-65, 3 vols.), published after the author's death by A. Köhler. The works published by F. C. Baur, the founder of the Tübingen school on the Church history of the first six centuries (*Das Christenthum u. d. christl. K. der drei ersten Jahrh.* Tüb. 1853, 3d ed. 1863, and *Die christl. K. des 4-6 Jahrh.* Tüb. 1859, 2d ed. 1863), were after his death completed, so as to form a continuous and complete Church history, by the publication of three volumes, treating severally of the Church history of the Middle Ages, of the time from the Reformation to the end of the 18th century, and of the 19th century. The five volumes appeared together, under the title *Geschichte d. christl. Kirche* (Tübingen, 1863-64, 5 vols.). A Church history in biographies was published by F. Böhringer (*Die Kirche Christi und ihre Zeugen*, Zurich, 1842-58).

Among the English works we mention Milner (+ 1797), *History of the Ch. of Christ to the 16th century* (revised edit. by Grantham, Lond. 1847, 4 vols. 8vo). It has been continued by Dr. Stebbing, *The Hist. of the Church of Christ from 1530 to the Eighteenth Century* (London, 1839 sq., 3 vols. 8vo), and a further continuation by Hawes (Edinb. 1834, 8vo); Waddington, *History of the Church from the earliest Ages to the Reformation* (Lond. 2d edit. 3 vols. 8vo), and *Hist. of the Reform. on the Continent* (Lond. 1841, 3 vols. 8vo), is neither accurate nor profound; Foulkes, *Manual of Ecclesiastical Hist.* (1851, to the 12th cent.); Robertson, *Hist. of the Church* (Lond. 2 vols. 1854-56, 8vo) to 1122; Milman, *Hist. of Christianity* (Lond. 1840, 3 vols.

8vo, reprinted in New York), and *Hist. of Latin Christianity* (Lond. 1854 sq. 6 vols. to Nicholas V; 4th ed. in 9 vols. 1867, reprinted in New York), an elaborate and at the same time brilliant work; Hardwick, *Hist. of the Christ. Church*, vol. i Middle Age, vol. ii Reformation (Cambridge, 1853 and 1856, 8vo), an admirable manual, but left unfinished by the sudden death of the author; Hinds, Jeremic, and others, *Church History*, in the *Encyclopædia Metropolitana*, and in a separate edition (Lond. 1850-58, 4 vols. 8vo); Killen, *The Ancient Church* (Belfast and New York, 1859, 8vo), an able work from the Presbyterian stand-point. The best works produced in this field in America are those by Prof. Schaff (*Hist. of the Apostolic Age*, New York, 1853, 8vo, and *Hist. of the Christian Ch.* vol. i to A.D. 311, New York, 1859, vols. ii and iii to Gregory the Great, New York, 1867). They have also appeared in a German edition, *Geschichte der christl. Kirche*, vol. i, Mercurburg, 1851, and Leipzig, 1854; vols. ii and iii, Leipz. 1867). They are distinguished by copiousness of material, philosophical arrangement, and attractive style. A brief work on the history of the Christian Church has been published by Dr. C. M. Butler (Phila. 1868). In Protestant France a luminous sketch of Church history was written by J. Matter (*Hist. Universelle de l'Église Chrétienne*), Strasburg, 1829, 2 vols.; 2d edit. Paris, 1838, 4 vols.).

In addition to the above works, which (unless the contrary is specially mentioned) embrace the whole history of the Christian Church, there is a very copious literature on special periods. The works treating of the primitive Church have been given in the article on the APOSTOLIC AGE. An able work on the history of the first three centuries has been published by Ed. de Pressensé (*Histoire des trois premiers siècles*, Paris, 1858, 2 vols.); also handbooks of modern Church history, by Dr. Nippold (Elberfeld, 1867) and Hagenbach (1865). For the ample literature on the period of the Reformation, see the article REFORMATION. The literature on branches of ecclesiastical history, such as history of heresies, councils, particular religious denominations, popes, saints, countries, monasticism, crusades, etc., and that on prominent men of Church history, is given in the special articles treating of those subjects. *Tables of Church history*, presenting in parallel columns the various departments of history, have been compiled in Germany by Vater (Halle, 6th ed. 1833), Danz (Jena, 1838), Lange (Jena, 1841), Douay (Leipzig, 1841), Uhlemann (to the Reformation, 2d edit. Berlin, 1865); in England, by Riddle (*Ecclesiastical Chronology*, London, 1840); in America, by H. B. Smith (*Hist. of the Ch. of Christ in chronol. Tables*, New York, 1859), which work has considerably improved the plan of all its predecessors, and, in fact, is the most thorough and complete work of the kind extant. Special dictionaries of Church history were compiled by W. D. Fuhrmann (*Handwörterbuch der christl. Religions- u. Kirchengesch.* Halle, 1826-29, 3 vols.) and Neudecker (*Allgem. Lex. der Religions- u. christl. Kirchengesch.* Weimar, 1834-37, 5 vols.). Periodicals specially devoted to ecclesiastical history have been published by Stäudlin, Tschirner, and Vater (*Magazin für Religions- u. Kirchengesch.*, by Stäudlin, 4 vols. Hanover, 1802-5; *Archiv für alte u. neue Kirchengesch.* by Stäudlin u. Tschirner, 1813-1822, 5 vols.; *Kirchenhist. Archiv*, by Stäudlin, Tschirner, u. Vater, 4 vols. Halle, 1823-26); by Ilgen, Niedner, and Kalmis (*Zeitschrift für hist. Theologie*, Leipz. 1832-1868; established by Ilgen; since 1845, by Niedner; since 1867, by Kalmis); by Kist and Royaards (*Archief voor Kerkelijke Geschiedenis*, Leyden, 1829 sq.). See Herzog, *Real-Encyklop.* vii, 622; Hagenbach, *Theol. Encyklop.* p. 212 sq.; Wetzer u. Welte, *Kirchen-Lex.* vi, 130; *Christian Remembrancer*, xliii, 62; Jortin, *Remarks on Ecclesiastical History*; *Princeton Rev.* xxvi, 300; xxix, 636; Stanlev, *Eastern Church (Introduction on the Study of Church History)*; Dowling, *Introduction*

to the *Critical Study of Ecclesiastical History attempted in an Account of the Progress, and a short Notice of the Sources, of the History of the Church* (Lond. 1838, 8vo).

**Ecclesiastical Polity** denotes the principles and laws of Church government. Personal religion is a matter between the individual man and his Maker. But religion necessarily involves social relations; that is to say, it involves society; and no society of men can exist without government. True, there can be no compulsion in religion; but government is not inconsistent with freedom; nay, it is necessary to all true enjoyment of freedom in any society, religious or other. The "two conditions essential to a good religious government are, first, a good system for the formation and organization of authority; and, second, a good system of security for liberty" (Guizot, *History of Civilization*, N. Y. 12mo, p. 121). So Richard Watson: "The Church of Christ being visible and permanent, bound to observe certain rites and to obey certain rules, the existence of government in it is necessarily supposed."

*Is any form of Church polity divinely ordained?* Perhaps the conclusion on this point most generally adopted at the present day is that, while certain fundamental principles of Church government are laid down in the N. T., no specific form of polity is there enjoined. Comp. Matt. xx, 20-28, with Mark x, 35-45, and Matt. xxiii, 1-11. These passages clearly prohibit all arbitrary rule in the Church, and are utterly inconsistent with hierarchical assumptions; there is "but one Master, and all are brethren." The doctrine of these passages is that the members of the Church are on one level in presence of Christ the Head. We gather some elements of polity from the practice of the apostles as recorded in their acts and writings. This polity is not presented as legislative enactments, but simply as facts, showing how the apostles acted in given cases. In the first account we find the Church composed of the apostles and other disciples, and then of the apostles and "the multitude of them that believed." Hence it appears that the Church was at first composed entirely of members standing on an equality with one another, and that the apostles alone held a higher rank, and exercised a directing influence over the whole body, which arose from the original position in which Christ had placed them (Neander, *Planting and Training*, p. 32). The Gospel is designed to extend to every climate, in every age, under every variety of race, of national life and character, and of civil institutions; accordingly, its settled, fundamental, necessary rules are few and simple; it establishes principles rather than rules; the very regulations which the apostles made were in many instances of local, temporary use only.

The claim of *divine right* on the part of the clergy to govern the Church grew up with the hierarchy. See **EPISCOPACY**. Even after the introduction of episcopacy, in the early Church, the bishops and teachers were chosen by the clergy and people; the bishop managed the ecclesiastical affairs of his diocese in council with the presbyters, and "with a due regard to the suffrages of the whole assembly of the people." "In whatever way the control of ecclesiastical affairs by the laity, or, rather, by the whole community, is exercised, there can be no question that it is in them that by the New Testament and by the first ages of Christendom the supremacy over the Church was vested. They elected their ministers. They chose their own faith, they moulded their own creed, they administered their own discipline, they were the Ecclesia, the Assembly, 'the Church'" (Dean Stanley, *Address on Church and State*, 1868). But the union of Church and State under Constantine consolidated the hierarchical power, and the rights of the laity gradually fell into abeyance. It is an essential doctrine of the hierarchical system that the duty of teaching includes also the power of ruling; and all Church authority

therefore belongs to the clergy, who constitute the *ecclesia docens*. In the Roman Church the government is entirely in the hands of the organized clerical hierarchy, at the head of which stands the pope (see below). At the Reformation, Luther adopted the doctrine of the universal priesthood (1 Pet. ii, 5, 9; Rev. i, 6), and this forms the basis of the Lutheran theory of Church polity, in which the rights of the laity are fairly regarded. "Properly, all Christians have a right to teach—every father his own family; and even to administer the sacraments, as even Tertullian truly observes. There is, therefore, truly a *jus laicorum sacerdotale*, as Grotius, Salmasius, Böhme, and Spener have maintained. Even among the Jews the teachers of the people were not priests, but laymen; and any one who had proper qualifications might teach in the synagogue or in the temple. Among the ancient Israelites the prophets were commonly not from the order of the priesthood, but, for the most part, from other tribes, classes, and orders of the people" (Knapp, *Lectures on Christian Theology*, Woods's translation, Phila., 1853, 8vo, p. 478). Calvin (*Institutes*, book iv) sets out from the idea of the Church as the body of Christ. He finds a certain "mode of government delivered to us by the pure word of God" (iv, 1), and traces this form of government in the early Church until its "subversion by the papal tyranny" (ch. v). In substance Calvin asserted the following principles: 1. That it is unwarrantable and unlawful to introduce into the government and worship of the Church anything which has not the positive sanction of Scripture. 2. That the Church, though it consists properly and primarily only of the elect or of believers, and though, therefore, visibility and organization are not *essential*, as Papists allege they are, to its existence, is under a positive obligation to be organized, if possible, as a visible society, and to be organized in all things, so far as possible—its office-bearers, ordinances, worship, and general administration and arrangements—in accordance with what is prescribed or indicated upon these points in the New Testament. 3. That the fundamental principles, or leading features of what is usually called Presbyterian Church government, are indicated with sufficient clearness in the New Testament, as permanently binding upon the Church. 4. That the Church should be altogether free and independent of civil control, and should conduct its own distinct and independent government by presbyters and synods, while the civil power is called upon to afford it protection and support. 5. That human laws, whether about civil or ecclesiastical things, and whether proceeding from civil or ecclesiastical authorities, do not, *per se*—i. e. irrespective of their being sanctioned by the authority of God—impose an obligation upon the conscience. Calvin professed to find all these principles more or less clearly taught in Scripture (*B. and F. Ev. Rev.* April, 1860, p. 464). On this principle Tulloch remarks (*Leaders of the Reformation*, p. 179 sq.) that Calvin went too far in asserting that Presbyterianism "is the form of the divine kingdom presented in Scripture." "Presbyterianism became the peculiar Church order of a free Protestantism. It rested, beyond doubt, on a true divine order, else it never could have attained this historical success. But it not merely asserted itself to be wise and conformable to Scripture, and therefore divine, but it claimed the direct impress of a divine right for all its details and applications. This gave it strength and influence in a rude and uncritical age, but it planted in it from the first an element of corruption. The great conception which it embodied was impaired at the root by being fixed in a stagnant and inflexible system, which became identified with the conception as not only equally but specially divine" (p. 181). "But were not these 'elements,' some will say, really Biblical? Did not Calvin establish his Church polity and Church discipline upon Scripture? and is not this a warrantable

ble course? Assuredly not, in the spirit in which he did it. The fundamental source of the mistake is here. The Christian Scriptures are a revelation of divine truth, and not a revelation of Church polity. They not only do not lay down the outline of such a polity, but they do not even give the adequate and conclusive hints of one; and for the best of all reasons, that it would have been entirely contrary to the spirit of Christianity to have done so; and because, in point of fact, the conditions of human progress do not admit of the imposition of any unvarying system of government, ecclesiastical or civil. The system adapts itself to the life, everywhere expands with it, or narrows with it, but is nowhere in any particular form the absolute condition of life. A definite outline of Church polity, therefore, or a definite code of social ethics, is nowhere given in the New Testament, and the spirit of it is entirely hostile to the absolute assertion of either the one or the other" (p. 182, 183). Dr. Tulloch, however, goes too far himself in saying that "Presbyterianism 'not merely asserted itself to be wise and conformable to Scripture, and therefore divine, but it claimed the direct impress of a divine right for all its details and applications.' This statement is untrue. There may be differences of opinion among Presbyterians as to the extent to which a divine right should be claimed for the subordinate features of the system, and some, no doubt, have gone to an extreme in the extent of their claims; but no Presbyterians of eminence have ever claimed 'the direct impress of a divine right for all the details and applications' of their system. They have claimed a divine right, or Scripture sanction, only for its fundamental principles, its leading features. It is these only which they allege are indicated in Scripture in such a way as to be binding upon the Church in all ages. And it is just the same ground that is taken by all the more intelligent and judicious among *jure divino* prelatists and Congregationalists" (*Brit. and For. Ev. Review*, April, 1860). Moreover, Calvin did not "unchurch" ecclesiastical bodies which should not choose to adopt the Presbyterian regimen. He introduced his scheme where he had influence to do so; and he employed all the vigor of his talents in pressing upon distant churches the propriety of regulating, in conformity with his sentiments, their ecclesiastical government. But, at the same time, he says, "Wherever the preaching of the Gospel is heard with reverence, and the sacraments are not neglected, there at that time there is a church." Speaking of faithful pastors, he describes them to be "those who by the doctrine of Christ lead men to true piety, who properly administer the sacred mysteries, and who preserve and exercise right discipline."

The Reformers and greatest writers of the Church of England held that no form of Church polity is enjoined in Scripture. Cramer explicitly declared that bishops and priests were of the same order at the commencement of Christianity; and this was the opinion of several of his distinguished contemporaries. "Holding this maxim, their support of episcopacy must have proceeded from views of expediency, or, in some instances, from a conviction which prevailed very generally at this early period, that it belonged to the supreme civil magistrate to regulate the spiritual no less than the political government; an idea involving in it that no one form of ecclesiastical polity is of divine institution. At a later period, during the reign of queen Elizabeth, we find the same conviction, that it was no violation of Christianity to choose different modes of administering the Church. Archbishop Whitgift, who distinguished himself by the zeal with which he supported the English hierarchy, frequently maintains that the form of discipline is not particularly, and by name, set down in Scripture; and he also plainly asserts "that no form of Church government is by the Scriptures prescribed or commanded to the Church of God" (Watson, s. v.). Hooker maintains this prin-

ciple with great vigor in his *Ecclesiastical Polity* (book iii), where the following principles are laid down: 1. The Scripture, though the only standard and law of doctrine, is not a rule for discipline. 2. The practice of the apostles, as they acted according to circumstances, is not an invariable rule for the Church. 3. Many things are left indifferent, and may be done without sin, although not expressly directed in Scripture. 4. The Church, like other societies, may make laws for her own government, provided they interfere not with Scripture. 5. Human authority may interpose where the Scripture is silent. 6. Hence the Church may appoint ceremonies within the limits of the Scriptures. Stillfleet indicates the same view at large in his *Irenicum*: "Those things may be said to be *jure divino* which are not determined one way or other by any positive law of God, but are left wholly as things lawful to the prudence of men, to determine them in a way agreeable to natural right and the general rules of the Word of God." His conclusion is that the reason or ground of Church government, the *ratio regiminis ecclesiastici*, is of divine right, but that the special mode or system of it is left to human discretion. In other words, it is a thing forever and immutably right that the Church should be under a definite form of government. This is undoubtedly *justum*. In no other way can the peace and unity of the Church be secured. But it is by no means equally indubitable what this form of government must be. The necessary end may be secured under diverse forms, as in the case of civil government. "Though the end of all be the same, yet monarchy, aristocracy, and democracy are in themselves lawful means for attaining the same common end. . . . So the same reason of Church government may call for an equality in the persons acting as governors of the Church in one place which may call for superiority and subordination in another" (*Irenicum*, p. 40 sq., Phila. 1840).

In the modern Church the Romanists and High Episcopalians claim divine right for their system of government. The Roman Catholic doctrine is thus stated (*The Catechism of the Council of Trent*, published by command of pope Pius V, Donovan's translation, Baltimore, n. d., 8vo): "Sitting in that chair in which Peter the prince of the apostles sat to the close of life, the Catholic Church recognises in his person the most exalted degree of dignity and the full amplitude of jurisdiction—a dignity and a jurisdiction not based on synodal or other human constitutions, but emanating from no less an authority than God himself. As the successor of St. Peter, and the true and legitimate vicar of Jesus Christ, he therefore presides over the universal Church, the father and governor of all the faithful, of bishops also, and of all other prelates, be their station, rank, or power what they may" (p. 222). And (p. 82), speaking of the power of the keys, "it is a power not given to all, but to bishops and priests only." The following extracts from bishop Forbes's *Explanation of the Thirty-nine Articles* (London and New York, 1867-8, 2 vols. 8vo) present a High-Church Episcopalian view of this subject: "Thus one department of the Church is to be called the *Ecclesia docens*. To the hierarchy, as distinguished from the great body of Christians, is committed the duty of handing down and communicating these truths" (Art. xix, p. 268 of vol. i). . . . "It having been shown in the preceding article that the *Ecclesia docens* hath power to decree rites and ceremonies, and hath authority in controversies of faith, we come to consider one great channel or organ of that power—the oecumenical council. Given that the Church has this power, by whom or how is it to be exercised? By whom but by the apostolical ministry, who are appointed 'for the perfecting of the saints, for the work of the ministry, for the edifying of the body of Christ;' by those to whom was committed the power of the keys, who had, among other duties connected with admission to communion,

to test the orthodoxy of applicants; by those whose important office it was to hand on the form of sound words which they had received to their successors" (Art. xxi, p. 288-9 of vol. i). . . . "Our Lord is the immediate founder of the hierarchy, because it was he who ordained the apostles bishops when he said to them, 'As my Father sent me, so send I you; receive the Holy Ghost: go ye into all the world and make disciples of every creature; whatsoever ye shall bind or loose on earth shall be bound or loosed in heaven.' These words denote a power without limit; its measure is the wants of humanity, its field of action the world. At the beginning of the Church there was one general episcopate" (Art. xxxvi, p. 699 of vol. ii). . . . "It is needless to add that the discipline as well as the doctrine of the Church was a purely internal matter, in which the state had no interest nor control. . . . The power of binding and loosing was the charter of all Church discipline, for it relegated the sanction of the visible Church into the unseen world. If salvation depended, *classe non errante*, upon Church membership, and Church membership, under certain laws, was in the hands of the hierarchy, it placed the control of the Church absolutely in their hands" (Art. xxxvii, p. 728-9 of vol. ii). The moderate Episcopalian (including Methodists and Moravians) generally hold that episcopacy is in harmony with Scripture, but is not divinely ordained as essential. For a temperate argument in favor of the conformity of the Episcopal Church organization to the Scriptures and the practice of the early Church, see Browne's *Exposition on the Thirty-nine Articles* (Amer. ed. N. Y. 1865, Art. xxiii, p. 549-576). Archbishop Whately (*The Kingdom of Christ*, 2d ed. N. Y. 1843, 12mo) says (p. 93): "Thus a further confirmation is furnished of the view that has been taken, viz., that it was the plan of the sacred writers to lay down clearly the principles on which Christian churches were to be formed and governed, leaving the mode of application of those principles undetermined and discretionary." And again (p. 213): "They," i. e. reformers compelled to separate, "have an undoubted right, according to the principles I have been endeavoring to establish, to appoint such orders of Christian ministers, and to allot to each such functions as they judge most conducive to the great ends of the society; they may assign to the whole, or to a portion of these, the office of ordaining others as their successors; they may appoint one superintendent of the rest, or several, under the title of patriarch, archbishop, bishop, moderator, or any other that they may prefer; they may make the appointment of them for life or for a limited period, by election or by rotation, with a greater or a less extensive jurisdiction." Mr. Wesley (*Works*, vii, 284, N. Y. 1835) says: "As to my own judgment, I still believe 'the episcopal form of Church government to be scriptural and apostolical.' I mean, well agreeing with the practice and writings of the apostles. But that it is prescribed in Scripture I do not believe." Some Presbyterian writers claim that the Presbyterian polity is the only one divinely ordained. (See especially *The Divine Right of Church Government*, wherein it is proved that the Presbyterian government, by preaching and ruling elders, in sessional, presbyterial, and synodical assemblies, may lay the only lawful claim to a divine right according to the holy Scriptures, by sundry ministers of Christ within the city of London. With an Appendix, containing extracts from some of the best authors who have written on Church government, N. Y. 1844, 12mo.) The same ground is taken by many of the advocates of the Congregational system (see especially Dexter, *On Congregationalism*, Boston, 1865, 8vo, ch. ii).

The special forms of ecclesiastical polity adopted by the various churches will be found stated under the name of each Church in its alphabetical place in this Cyclopædia. We only note, in conclusion, one or two points in which all forms are concerned.

1. *Synodical government* (by councils, synods, assemblies, conferences, etc.) prevails in all the great churches of the world except the Independent (including Congregationalists and Baptists). Synods have "been the most universally received type of Church government in all ages; even the fact that they have undergone so many modifications only serving to bring out more prominently the unanimity with which they have been upheld on all sides, in the midst of so much discordancy respecting almost every other question connected with ecclesiastical polity. The Greek Church, glorying in its agreement with antiquity, will decide nothing of consequence without them still; in the Latin Church it has never ceased to be customary to appeal to them from the pope; the Church of England, which upholds, and the Church of Geneva, which has abjured episcopacy, have made them part and parcel of their respective ideals; in Russia it is the Holy Governing Synod by which its national Church affects to be ruled. More than this, they were ecclesiastical synods that introduced the principle of representative government to mediæval Europe" (Ffoulkes, *Christendom's Divisions*, i, 11).

2. The right of the laity, as an integral part of the Church, to share in its government, is admitted by all churches except the great hierarchical bodies. In the Church of England, Parliament (a lay body) is the central power in the government of the Church. In the Protestant Episcopal Church lay delegates are admitted to the Diocesan and General Conventions. In the Presbyterian Church they find their place in Presbytery, Synod, and Assembly. In the Independent churches the equality of laymen and ministers as to ecclesiastical rights and powers is fundamental. In the Methodist Episcopal Church the supreme judicatory (the General Conference) is as yet (1869) an exclusively clerical body. But that body has itself admitted the rights of the laity to the fullest extent by submitting to a popular vote (held in June, 1869) the fundamental question whether lay delegation shall be practically incorporated into the ecclesiastical system or not. The vote is by a very large majority in favor of lay delegation, and now (July, 1869) only the concurrence in the proposed changes of the Restrictive Rules of three fourths of all the members of the Annual Conferences, present and voting thereon, is required for the admission of lay delegates to the next General Conference in 1872. In the Methodist Episcopal Church South, this change in its polity was, by the General Conference held in 1866, likewise submitted to the Annual Conferences, and, having received the requisite approval, lay delegation has been incorporated into its economy. This subject of controversy in the Methodist Episcopal churches of the United States seems, therefore, now on the eve of settlement. For other points related to ecclesiastical polity, see CHURCH; CHURCH AND STATE; DISCIPLINE; EPISCOPACY; LAITY.

Y. 12mo); Stevens, *Church Polity* (N. Y. 1852, 12mo); Coleman, *Primitive Church*, p. 38-50; Wilson, *On Church Government*; Davidson (Congregational), *Ecclesiastical Polity of the New Testament* (Lond. 1854, 12mo); Morris (Bishop), *On Church Polity* (18mo); Fillmore *Ecclesiastical Polity, its Forms and Philosophy*; Ripley (Congregational), *Church Polity* (Boston, 1867, 18mo); Garratt, *Inquiry into the Scriptural View of the Constitution of a Christian Church* (Lond. 1848); *New Englander*, August, 1860, art. vi (Congregational); Leicester A. Sawyer, *Organic Christianity, or the Church of God, with its Officers and Government, and its Divisions and Variations, both in ancient, mediæval, and modern Times* (Boston, 1854, 12mo; Congregational).

**Ecclesiasticus**, one of the most important of the apocryphal books of the O. T. (see ΑΠΟΚΡΥΦΑ), being of the class ranked in the second canon. See DEUTERO-CANONICAL.

I. *Title*.—The original Hebrew title of this book, according to the authority of the Jewish writings and St. Jerome (*Pref. in Libr. Sol.* ix, 1242), was סֵפֶר הַחִכְמָה, *Proverbs*, or, more fully, סֵפֶר הַחִכְמָה בְּיַד יֵשׁוּעַ בֶּן־סִרְחַי, *the Proverbs of Jesus, son of Sirach*, which was abbreviated, according to a very common practice, into סֵפֶר־חִכְמָה. *Ben-Sirach*; סִרְחַי, *Sirach*, which we find in a few later writers, evidently originated from a desire to imitate the Greek *Σωφάξ*. Hence all the quotations made from this book in the Talmud and Midrashim are under these titles. (Comp. Mishna, *Yadaim*, iii, 15; *Chagigā*, p. 15; *Midrash Rabba*, p. 6, b.; *Tanchuma*, p. 69, a, etc.) The Greek MSS. and fathers, however, as well as the prologue to this book, and the printed editions of the Sept., designate it *Σοφία Ἰησοῦ υἱοῦ Σωφάξ* (v. r. *Σωφάξ*, and even *Σωφάξ*), *The wisdom of Jesus, the son of Sirach*, or, by way of abbreviation, *Σοφία Σωφάξ*, *The wisdom of Sirach*, or simply *Sirach*; also *σοφία ἢ παράδειρος*, or simply *ἢ παράδειρος*, *The book of all virtues*, because of the excellency and diversity of the wisdom it propounds (Jerome, *l. c.*; comp. Routh, *Rel. Sacr.* i, 278). In the Syriac version the book is entitled *The book of Jesus, the son of Simon Asiro* (i. e. the bound); and the same book is called *the wisdom of the Son of Asiro*. In many authors it is simply styled *Wisdom* (Orig. in *Matt.* xiii, § 4; compare Clem. Al. *Pæd.* i, 8, § 69, 72, etc.), and *Jesus Sirach* (August. *ad Simplic.* i, 20). The name *Ecclesiasticus*, by which it has been called in the Latin Church ever since the second half of the fourth century (Rufinus, *Vers.*; Orig. *Hom.* in *Num.* xvii, 3), and which has been retained in many versions of the Reformers (e. g. the Zurich Bible, Coverdale, the Geneva version, the Bishops' Bible, and [together with the other titl.] the Auth. Version) is derived from the *old Latin version*, adopted by Jerome in the Vulgate, and is explained to mean *church reading-book*. Calmet, however, is of opinion (*Preface*) that this name was given to it because of its resemblance to *Ecclesiastes*. But as this explanation of the title is very vague, it is rightly rejected by Luther, and almost all modern critics. The word, like many others of Greek origin, appears to have been adopted in the African dialect (e. g. Tertull. *De pudic.* c. 22, p. 435), and thus it may have been applied naturally in the *Vetus Latina* to a *church reading-book*; and when that translation was adopted by Jerome (*Pref. in Libro Sol. juxta LXX.* x. 404, ed. Migne), the local title became current throughout the West, where the book was most used. The right explanation of the word is given by Rufinus, who remarks that "it does not designate the author of the book, but the character of the writing," as publicly used in the services of the Church (*Comm. in Symb.* § 38). The special application by Rufinus of the general name of the class (*ecclesiastici* as opposed to *canonici*) to the single book may be explained by its wide popularity. Athanasius, for instance, mentions the book (*Ep. Fest.* s. f.) as one of those "framed by the fathers to be read by those who wish to be instructed (*κατηχεῖσθαι*) in the word of godliness."

II. *Design and Method*.—The object of this book is to propound the true nature of wisdom, and to set forth the religious and social duties which she teaches us to follow through all the varied stages and vicissitudes of this life, thus exhibiting the practical end of man's existence by reviewing life in all its different bearings and aspects. Wisdom is represented here, as in Proverbs, as the source of human happiness, and the same views of human life, founded on the belief of a recompense, pervade the instructions of this book also, wherein, however, a more matured reflection is per-

ceptible (De Wette's *Einleitung*). It is, in fact, the composition of a philosopher who had deeply studied the fortunes and manners of mankind, and did not hesitate to avail himself of the philosophy of older moralists: xii, 8-xiii, 23; xv, 11-20; xvi, 26-xvii, 20; xix, 6-17; xxiii, 16-27; xxvi, 1-18; xxx, 1-13; xxxvii, 27; xxxviii, 15, 24-xxxix, 11, etc. (*ib.*). It abounds in grace, wisdom, and spirit, although sometimes more particular in inculcating principles of politeness than those of virtue (Cellerier, *Introd. à la Lecture des Liv. Saints*). It is not infrequently marked by considerable beauty and elegance of expression, occasionally rising to the sublimest heights of human eloquence (*Christian Remembrancer*, vol. ix). It has been observed of it by Addison (see Horne's *Introd.* vol. iv) that "it would be regarded by our modern wits as one of the most shining tracts of morality that are extant if it appeared under the name of a Confucius, or of any celebrated Grecian philosopher."

In addition to the fact that no Palestinian production, whether inspired or uninspired, can be reduced to a logically developed treatise according to Aristotelian rules, there are difficulties in tracing the plan of this book, arising from the peculiar circumstances of the author, as well as from the work itself. Ben-Sirach brings to the execution of his plan the varied experience of a studious and practical life, and in his great anxiety not to omit any useful lesson which he has gathered, he passes on, after the manner of an *Eastern* logic, from the nature of heavenly wisdom to her godly teachings, from temptation in her varied forms to filial duties; he discloses before the eyes of his readers the inward workings of the heart and mind, he depicts all passions and aspirations, all the virtues and vices, all the duties towards God and man, in proverbs and apothegms, in sayings which have been the property of the nation for ages, and in maxims and parables of his own creation, with a rapidity and suddenness of transition which even an Eastern mind finds it at times difficult to follow. Add to this that the original Hebrew is lost, that the Greek translation is very obscure, that it has been mutilated for dogmatic purposes, and that some sections are transposed beyond the hope of readjustment, and the difficulty of displaying satisfactorily the method or plan of this book will at once be apparent, and the differences of opinion respecting it will be no matter of surprise. The book (see Fritzsche's *proleg.* in his *Commentar*) is divisible into seven parts or sections: 1. Comprising chaps. 1-xvi, 21, describes the nature of wisdom, gives encouragements to submit to it, as well as directions for conducting ourselves in harmony with its teachings; 2. xvi, 22-xxiii, 17, shows God in the creation, the position man occupies with regard to his Maker, gives directions how he is to conduct himself under different circumstances, and how to avoid sin; 3. xxiv, 1-xxx, 24; xxxiii, 12-xxxvi, 16<sup>a</sup>; xxx, 25-27, describes wisdom and the law, and the writer's position as to the former, gives proverbs, maxims, and admonitions about the conduct of men in a social point of view; 4. xxx, 28-xxxiii, 11; xxxvi, 16<sup>b</sup>-22, describes the wise and just conduct of men, the Lord and his people; 5. xxxvi, 23-xxxix, 11, instructions and admonitions about social matters; 6. xxxix, 12-xlii, 14, God's creation, and the position man occupies with regard to it; 7. xlii, 11-1, 26, the praise of the Lord, how he had glorified himself in the works of nature, and in the celebrated ancestors of the Jewish people. Thereupon follows an epilogue, ch. l. 27-29, in which the author gives his name, and declares those happy who will ponder over the contents of this book, and act according to it; as well as an appendix, ch. li, 1-30, praising the Lord for deliverance from danger, describing how the writer has successfully followed the paths of wisdom from his very youth, and calling upon the uneducated to get the precious treasures of wisdom.

III. *Its Unity*.—The peculiar difficulties connected

both with the plan of the book and the present deranged condition of its text will have prepared the reader for the assertions made by some that there is no unity at all in the composition of this book, and that it is, in fact, a compilation of divers national sayings, from various sources, belonging to different ages (see Davidson, in Horne's *Introd.* ii, 1013 sq.). Encouragement is sought for these assertions from the statement in the spurious prologue of this book, *ὁ μόνον τὰ ἐτέρων τῶν πρὸ αὐτοῦ συνετῶν ἀνδρῶν ἀπαφθέγματα συνέγαγεν, ἀλλὰ καὶ αὐτὸς ἴδια τινα ἀπεφθέγγετο*, as well as from the remark of St. Jerome: "Quorum priorem [*πανάτορον* Jesu filii Sirach librum] Hebraicum reperi, non *Ecclesiasticum* ut apud Latinos, sed *Parabolus* prænatum, cui juncti erant *Ecclesiasticus* et *Canticum Canticorum*, ut similitudinem Salomonis non solum librorum numero, sed etiam materiarum genere cœquaret" (*Pref. in Libr. Solom.*), which seems to imply that the book of Ben-Sira was intended to answer to all the three reputed works of Solomon. So also Luther. Eichhorn can see in it three different books: the first book consists of chaps. i-xxiii, comprising desultory remarks upon life and morals, and is divisible into two sections, viz. (a) i-ix, and (b) x-xxiii; the second book comprises xxiv-xlii, 14, begins with a vivid description of wisdom, whereupon follow remarks and maxims without any order; and the third book, comprising xlii, 15-1, 24, is the only portion of Sirach carefully worked out, and contains praise of God and the noble ancestors of the Hebrews (*Einführung in d. Ap.* p. 50, etc.). Ewald, again, assures us that Ben-Sira made two older works on Proverbs the basis of his book, so that his merit chiefly consists in arranging those works and supplementing them. The first of these two books originated in the fourth century before Christ, extends from ch. i to xvi, 21, and contains the most simple proverbs, written with great calmness. The second book originated in the third century before Christ, extends from xvi, 22, to xxxvi, 22, and displays the excitement of passions as well as some penetrating observations, and has been greatly misplaced in its parts, which Ewald rearranges. The third book, which is the genuine work of Ben-Sira, extends from xxxvi, 23, to li, 50, with the exception of the song of praise contained in xxxix, 12-35, which belongs to the author of the second work (*Geschichte d. V. Isr.* iv, 300, etc.; *Jahrh.* iii, 131, etc.). These must suffice as specimens of the opinions entertained by some respecting the unity of this book. Against this, however, is to be urged—1. That the difference in form and contents of some of the constituent parts by no means precludes the unity of the whole, seeing that the writer brought to the illustration of his design the experience of a long life, spent both in study and travelling. 2. That this is evidently the work of the author's life, and was written by him at different periods. 3. That the same design and spirit pervade the whole, as shown in the foregoing section; and, 4. That the abruptness of some portions of it is to be traced to the Eastern style of composition, and more especially to the present deranged state of the Greek translation.

IV. *Author and Date.*—This is the only apocryphal book the author of which is known. The writer tells us himself that his name is *Jesús* (Ἰησοῦς, יֵשׁוּעַ, יְהוֹשֻׁעַ, i. e. *Jeshua*), the son of *Sirach*, and that he is of *Jerusalem* (1, 27). Here, therefore, we have the production of a Palestinian Jew. The conjectures which have been made to fill up this short notice are either unwarranted (e. g. that he was a physician, from xxxviii, 1-15) or absolutely improbable. There is no evidence to show that he was of priestly descent; and the similarity of names is scarcely a plausible excuse for confounding him with the Hellenizing high-priest Jason (2 Macc. iv, 7-11; Georg. Sync. *Chronogr.* p. 276). In the Talmud, the name of Ben-Sira (בְּנֵי סִרָּה) for which סִרָּה is a late error, Jost, *Gesch. d. Judenth.* p. 311)

occurs in several places as the author of proverbial sayings which in part are parallel to sentences in Ecclesiasticus, but nothing is said as to his date or person, and the tradition which ascribes the authorship of the book to Eliezer (B.C. 260) is without any adequate foundation (Jost, *ib.*; yet see note 1). The Palestinian origin of the author is, however, substantiated by internal evidence, e. g. xxiv, 10 sq. For the various speculations advanced about the personal character, acquirements, and position of the author, we must refer to the article *JESUS, SON OF SIRACH*. That the book should have been ascribed by the Latin Church to Solomon, notwithstanding this plain declaration of the book itself, the discreditable terms in which Solomon is spoken of, the reference to Solomon's successors, to prophets and other great men who lived before and after the Babylonish captivity, the mention of the twelve minor prophets (xlix, 10), the citation from the prophet Malachi (comp. xlviii, 10, with Mal. iv, 6), and the description of the high-priest Simon (chap. I), only shows what the fathers can do.

The age of the book has been, and still is, a subject of great controversy. The life-like description of the high-priest Simon, contained in chap. I, seems to indicate that the writer had seen this high functionary officiate in the Temple; but there were two high priests of the same name, viz. Simon, son of Onias, surnamed *the Just*, or *the Pious*, who lived B.C. cir. 370-300, and Simon II, son of Onias, who lived in the reign of Ptolemy Philopator, B.C. 217-195 (3 Macc. i, 2). See *Simon*. Some interpreters, therefore, are of opinion that Simon I is described by Ben-Sira, whilst others think that Simon II is intended. The lives and acts of these two pontiffs, however, as well as the esteem in which they were respectively held by the people, as recorded in their national literature, must show to which of these two high-priests the description of Ben-Sira is applicable. 1. The eucumiums show beyond doubt that one of Israel's *most renowned* high-priests is described, whereas Simon II was so little distinguished that Josephus cannot relate a single good thing about him. 2. Ben-Sira characterizes him as *the deliverer of his people from destruction*; whereas in the time of Simon II no deliverance of either the people or the Temple was necessary. 3. In the time of Simon II, Hellenism, the great enemy of Judaism, which was represented by the sons of Tobias, had made great progress; and if Ben-Sira had written about this time, we should have had some censures from this pious poet of these thoughtless and godless innovations, whereas there is no allusion to these throughout the whole of this book. This appears the more strange when it is borne in mind that Simon II himself sided with these faithless sons of Tobias, as Josephus distinctly declares (*Ant.* xii, 4, 11). 4. It is utterly impossible that such a man as Simon II should be described in such extraordinary terms in the catalogue of national benefactors, and that Simon I, the personification of goodness, nobility, and grandeur, whom the nation crowned with the title *the Just, the Pious*, should be passed over with silence. 5. No Jew, on reading so sublime a description of the high-priest, would ever think, with his national traditions before him, of applying it to any one else but *the Simon*, unless he were *distinctly told* that it was intended for another Simon. These considerations, therefore, show that Ben-Sira's life-like description refers to Simon I. Now as Simon I died B.C. cir. 300, Ben-Sira must have written his work not earlier than 290-280, as chap. I implies that this high-priest was dead. (See also *infra*, sec. vi.)

V. *The original Language of the Book.*—The translator of this work into Greek most distinctly declares in his preface that it was written in Hebrew, and St. Jerome assures us that he had seen the Hebrew original (*vide supra*, sec. iii). That by the term *Ἑβραϊστί* is meant *Hebrew*, and not *Aramaean*, is evident from

the numerous quotations made from this book both in the Talmud and the Mishramim. Compare

By some writers, however, it is thought that the *Sentences of Ben-Sirach*, cited in the Talmud (*Sanhed. Gem.* xi, 42; *Bereshith Rabba*, viii, f. 10; *Baba Kama*, f. 92, c. 2), and published in Latin by Paul Fagius (1542), and in Hebrew, Chaldee, and Latin by Drusius (1597), though so similar to those in Ecclesiastics, are, upon the whole, a different work (Eichhorn's and Bertholdt's *Introductions*).

Almost all of these quotations are in *Hebrew*, though the works in which they are found are in *Aramaean*, thus showing beyond doubt that the book of Ben-Sira was written in genuine Hebrew. Besides, some of the blunders in the Greek can only be accounted for from the fact that the original was Hebrew. Thus, for example, in xxiv, 25 we read, "He maketh knowledge to come forth as light, as Gihon in the days of vintage," where the parallelism Γήσων = גִּיחֹן (Gen. ii, 13), whereby the Nile was designated in later times, which the Sept. also understands by גִּיחֹן (Jer. ii, 28), shows that *ὡς φῶς* in the first hemistich originated from the translator's mistaking the Hebrew כְּנֵרִים, like a stream, for כְּנֵרִים, like light. Comp. also xlix, 9, which is most unintelligible in the Greek through the translator's mistaking the Hebrew בְּזָרִים בְּזָרִים. Bishop Lowth, indeed, went so far as to assert that the translator "seems to have numbered the words, and exactly to have preserved their order, so that, were it literally and accurately to be retranslated, I have very little doubt that, for the most part, the original diction would be recovered." The learned prelate has actually retranslated chap. xxiv into Hebrew (*Hebrew Poet. Lect.* xxiv, Oxford ed. 1821, p. 254). This retranslation is also printed by Fritzsche, who has added some corrections of his own, and who also gives a translation of chap. i.

VI. *The Greek and other Translations of this Book.*—The Greek translation incorporated in the Sept. was made by the grandson of the author (ὁ πάτριος μου Ἰησοῦς), who tells us that he came from Palestine into Egypt in his thirty-eighth year, "in the reign of Euergetes" (ἐν τῷ ὀγδόῳ καὶ τρακοστῷ ἔτει ἐπὶ τοῦ Ἐυεργέτου βασιλεύοντος). But there were two kings who have borne this name—Euergetes I, son and successor of Ptolemy II, Philadelphus, B.C. 247-222, and Euergetes II, i. e. Ptolemy VII, known by the nickname Physcon, the brother of Ptolemy VI, B.C. 145-116, and the question is, which of these two is meant? Now, if Ben-Sira wrote B.C. cir. 290-280, when an old man, and if we take ὁ πάτριος μου to mean *great-*

*grandfather*, a sense which it frequently has, and that the translator was born after the death of his illustrious ancestor, his arrival in Egypt in his thirty-eighth year would be B.C. cir. 230, i. e. in the reign of Euergetes I. On the other hand, the manner in which the translator speaks of the Alexandrine version of the Old Testament, and the familiarity which he shows with its language (e. g. xlv, 16, Ἐνώχ μετετέθη), Gen. v, 24; comp. Linde, ap. Eichhorn, p. 41, 42), is scarcely consistent with a date so early as the middle of the third century. Winer (*De utr. Sirac. etate*, Erlang. 1832) maintains that Simon the Just is the person referred to, but that it is not necessary to conclude that the author was his contemporary. He thinks that, although the grammatical construction rather requires *ἔτει τῷ ἐπὶ τοῦ Ἐυεργέτου* to refer to the age of the monarch's reign, Euergetes the Second was the king in whose reign the translation was made, and that the canon could not have been yet closed under the reign of the first Euergetes, as implied in the preface—"the law, the prophets, and the other books." As there appears to be no special reason for the translator's reference to *his own* age, the date has been taken to allude to that of the reigning Ptolemy by many critics since Eichhorn, e. g. by Bruch, Palfrey, Davidson, Ewald, Fritzsche, etc. The "thirty-eighth year of his reign," although not applicable to the first Euergetes, may refer to the second, if his regency be included. According to this, which De Wette conceives the most probable hypothesis, the translator would have lived B.C. 130, and the author B.C. 180. But if, with most interpreters, the chronological datum in question refers to the translator's own age, then the grandson of the author was already past middle-age when he came to Egypt: and if his visit took place early in the reign of Ptolemy Physcon, it is quite possible that the book itself was written while the name and person of the last of "the men of the great synagogue" was still familiar to his countrymen. Even if the date of the book be brought somewhat lower than the times of Simon the Just, the importance of the position which that functionary occupied in the history of the Jews would be a sufficient explanation of the distinctness of his portraiture; and the political and social troubles to which the book alludes (ii, 6, 12; xxxvi, sq.) seem to point to the disorders which marked the transference of Jewish allegiance from Egypt to Syria rather than to the period of prosperous tranquillity which was enjoyed during the supremacy of the earlier Ptolemies. On the whole, therefore, we may conclude that the book was probably written B.C. cir. 200, and translated B.C. cir. 140.

The present state of this translation, however, is very deplorable; the text as well as the MSS. are greatly disfigured by numerous interpolations, omissions, and transpositions. The *Old Latin* version, which Jerome adopted in the Vulgate without correcting it, was made from this Greek translation, and, besides being barbarous in style, is also greatly mutilated, and in many instances cannot be harmonized with its original. Even in the first two chapters the following words occur which are found in no other part of the Vulgate: *defunctio* (i, 13), *religiositas* (i, 17, 18, 26), *compartior* (i, 24), *inhonoratio* (i, 38), *obductio* (ii, 2; v, 1, 10), *receptibilis* (ii, 5). The Syriac alone is made direct from the Hebrew, and contains a quotation made by Jose ben-Jochanan about 150 B.C. (comp. *Aboth*, i, 5 with Ben-Sira ix, 12), which the secondary versions have not, because it was dropped from the Greek. Notwithstanding the ill treatment and the changes which this version has been subjected to, it is still one of the best auxiliaries for the restoration of the old text. The Arabic seems to have been made from the Syriac: whilst the old English version of Coverdale, as usual, follows the Zurich Bible and the Vulgate, the Bishops' Bible again copies Coverdale; the Geneva version, as is often the case, departs from the other

English version for the better. The present A. V. chiefly follows the Complutensian edition of the Greek and the Latin Vulgate. The arrangement, however, of chaps. xxx, 25-xxxvi, 17 in the Vatican and Complutensian editions is very different. The English version here follows the latter, which is supported by the Latin and Syriac versions against the authority of the Uncial MSS. The extent of the variation may be seen in the following table:

Compl., Lat., Syr., A. V.	Vat. MSS. "A, B, C."
xxx, 25	xxxiii, 13, λαμπρά καρδία, κ. τ. λ.
xxxii, xxxii	xxxiv, xxxv.
xxxiii, 16, 17, ἡγρόπνησα	xxxvi, 1-16.
xxxiii, 10 sq. ὡς καλαμώνες	xxxv, 25 sq.
xxxiv, xxxv	xxxii, xxxii.
xxxvi, 1-11, φολίς Ἰακώβ	xxxiii, 1-13.
xxxvi, 12 sq. καὶ κατεκλήρονόμησα.	xxxvi, 17 sq.

The most important interpolations are: i, 5, 7; 18b, 21; iii, 25; iv, 23b; vii, 26b; x, 21; xii, 6c; xiii, 25b; xvi, 15, 16, 22c; xvii, 5, 9, 16, 17a, 18, 21, 23c, 26b; xviii, 2b, 3, 27c, 33c; xix, 5b, 6a, 13b, 14a, 18, 19, 21, 25c; xx, 3, 14b, 17b, 32; xxii, 9, 10, 23c; xxiii, 3e, 4e, 5b, 28; xxiv, 18, 21; xxv, 12, 26c; xxvi, 19-27; 1, 29b. All these passages, which occur in the A. V. and the Compl. texts, are wanting in the best MSS. The edition of the Syro-Hexaplaric MS. at Milan, which is at present reported to be in preparation (since 1858), will probably contribute much to the establishment of a sounder text.

The name of the Greek translator is unknown. He is commonly supposed to have borne the same name as his grandfather, but this tradition rests only on conjecture or misunderstanding (Jerome, *Synops. S. Script.* printed as a Prologue in the Compl. ed. and in the A. V.).

VII. *Canonicity.*—Though this book has been quoted in the Jewish Church as early as B.C. 150 and 100, by Jose ben-Jochanan (*Aboth*, i, 5) and Simon ben-She-tach (*Nazir*, v, 3), and references to it are dispersed through the Talmud and Midrashim (*rile sup. sec. v*), yet these latter declare most distinctly that it is not canonical. Thus *Yadain*, c. ii, says *the book of Ben-Sira, and all the books written from its time and afterwards, are not canonical.* We also learn from this remark that Ben-Sira is the *oldest* of all apocryphal books, thus confirming the date assigned to it in section iv. Again, the declaration made by R. Akiba, that he who studies uncanonical books will have no portion in the world to come (*Mishna, Sanhed. x, 1*), is explained by the *Jer. Talmud* to mean the books of *Ben-Sira* and *Ben-Laiah* (comp. the Midrash on *Coheloth* xii, 12). It was never included by the Jews among their Scriptures; for though it is quoted in the Talmud, and at times like the Kethubim, yet the study of it was forbidden, and it was classed among "*the outer books*" (ספריים התיירים), that is, probably, those which were not admitted into the Canon (Dukes, *Rabb. Blumenlese*, p. 24 sq.).

Allusions to this book have been supposed to be not unfrequently discernible in the New Testament (compare, especially, *Eccles.* xxxiii, 13; *Rom.* ix, 21; xi, 19; *Luke* xii, 19, 20; v, 11; *James* i, 19, etc.; xxiv, 17, 18; *Matt.* xi, 28, 29; *John* iv, 13, 14; v, 35, etc.). The earliest clear coincidence with the contents of the book occurs in the epistle of Barnabas (c. xix=*Eccles.* iv, 31; compare *Const. Apost.* vii, 11), but in this case the parallelism consists in the thought and not in the words, and there is no mark of quotation. There is no sign of the use of the book in Justin Martyr, which is the more remarkable, as it offers several thoughts congenial to his style. The first distinct quotations occur in Clement of Alexandria; but from the end of the second century the book was much used and cited with respect, and in the same terms as the canonical Scriptures; and its authorship was often assigned to Solomon, from the similarity which it pre-

sented to his writings (*August. De Cura pro Mort.* 18). Clement speaks of it continually as *Scripture* (*Prod.* i, 8, § 62; ii, 2, § 34; 5, § 46; 8, § 69, etc.), as the work of Solomon (*Strom.* ii, 5, § 24), and as the voice of the great Master (παύλαγωγός, *Prod.* ii, 10, § 98). Origen cites passages with the same formula as the canonical books (γράφεται, in *Johann.* xxxii, § 14; in *Matt.* xvi, § 8), as *Scripture* (*Comm. in Matt.* § 44; in *Ep. ad Rom.* ix, § 17, etc.), and as the utterance of "*the divine word*" (c. *Cels.* vii, 50). The other writers of the Alexandrine school follow the same practice. Dionysius calls its words "*divine oracles*" (*Frag. de Nat.* iii, p. 1258, ed. Migne), and Peter Martyr quotes it as the work of "*the Preacher*" (*Frag.* i, § 5, p. 515, ed. Migne). The passage quoted from Tertullian (*De exhort. cast.* 2, "Sicut scriptum est: *Ecce posui ante te bonum et malum; gustasti enim de arbore agnitionis.*" etc.; compare *Eccles.* xv, 17, *Vulg.*) is not absolutely conclusive; but Cyriac constantly brings forward passages from the book as *Scripture* (*De bono pat.* 17; *De mortalitate*, 9, § 13), and as the work of Solomon (*Ep.* lxxv, 2). The testimony of Augustine sums up briefly the result which follows from these isolated authorities. He quotes the book constantly himself as the work of a prophet (*Serm.* xxxix, 1), the word of God (*Serm.* lxxxvii, 11), "*Scripture*" (*Lib. de Nat.* 33), and that even in controversy (c. *Jul. Pelag.* v, 36); but he expressly notices that it was not in the Hebrew Canon (*De Cura pro Mort.* 18), "though the Church, especially of the West, had received it into authority" (*De Civit.* xvii, 20; compare *Speculum*, iii, 1127, ed. Paris). Jerome, in like manner (*Præf. in Sap. Sir.* § 7), contrasts the book with "*the canonical Scriptures*" as "*doubtful,*" while they are "*sure;*" and in another place (*Prolog. Galeat.*) he says that it "*is not in the Canon,*" and again (*Prolog. in Libr. Sol.*) that it should be read "*for the instruction of the people (plebis), not to support the authority of ecclesiastical doctrines.*" The book is cited by Hippolytus (*Opp.* p. 192) and by Eusebius (*Opp.* iv, 21, etc.), but is not quoted by Irenæus; and it is not contained in the Canon of Melito, Origen, Cyril, Laodicea, Hilary, or Rufinus. See CANON.

But while the book is destitute of the highest canonical authority, it is a most important monument of the religious state of the Jews at the period of its composition. As an expression of Palestinian theology it stands alone; for there is no sufficient reason for assuming Alexandrine interpolations, or direct Alexandrine influence (Gröner, *Philo*, ii, 18 sq.). The translator may, perhaps, have given an Alexandrine coloring to the doctrine, but its great outlines are unchanged (comp. Dähne, *Relig. Philos.* ii, 129 sq.). The conception of God as Creator, Preserver, and Governor is strictly conformable to the old Mosaic type; but, at the same time, his mercy is extended to all mankind (xviii, 11-13). Little stress is laid upon the spirit-world, either good (xlviii, 21; xlv, 2; xxxix, 28?) or evil (xxi, 27?), and the doctrine of a resurrection fades away (xiv, 16; xvii, 27, 28; xlv, 14, 15. Yet comp. xlviii, 11). In addition to the general hope of restoration (xxxvi, 1, etc.), one trait only of a Messianic faith is preserved, in which the writer contemplates the future work of Elias (xlviii, 10). The ethical precepts are addressed to the middle class (Eichhorn, *Eint.* p. 44 sq.). The praise of agriculture (vii, 15) and medicine (xxxviii, 1 sq.), and the constant exhortations to cheerfulness, seem to speak of a time when men's thoughts were turned inwards with feelings of despondency and perhaps (Dukes, *u. s. p.* 27 sq.) of fatalism. At least the book marks the growth of that anxious legalism which was conspicuous in the sayings of the later doctors. Life is already imprisoned in rules; religion is degenerating into ritualism; knowledge has taken refuge in schools (compare Ewald, *Gesch. d. Volkes Isr.* iv, 298 sq.).—Kitto, s. v.; Smith, s. v.

VIII. *Commentaries, etc.*—Special exegetical works which have appeared on the whole of this book are the

following, of which the chief are designated by an asterisk prefixed: Rabanus Maurus, *In Ecclesiasticum* (in his *Opp.*); Anon. *Beschreib. u. Uebers.* (in Lorschach's *Archiv*, ii, 11 sq.); Alexander, *De libro Eccclus.* (in his *Hist. Eccles.* iii, 690); Bengel, *Muthmassliche Quelle*, etc. (in Eichhorn's *Bibliothek*, vii, 852-64); De Sacy, *L'Ecclesiastique* (in his *Sainte Bible*, xvi); Bossuet, *Liber Eccclus.* (in his *Œuvres*, xxii, 1 sq.); Couz, *Bemerkungen* (in Henke's *Mus.* ii, 177-243); \*Came-rarius, *Sententiæ J. S.* (Lips. 1570, 8vo); *Sapientia J. S.* (Lips. 1570, 8vo); Striegel, in his *Libri Sapientie* (Lpz. 1575, 12mo), p. 277 sq.; Drusius, *Eccclus. interpretatus* (Franeker, 1596, 4to); Höschel, *Sap. Sirachi* (Augsb. 1604, 4to); also in the *Crit. Sacri*, v; \*à Lapide, *Commentarius* (Antwerp, 1634, 1687, fol.); Stif-fer, *Homiliæ* (Lips. 1676, 4to); Calmet, *Commentaire* (Paris, 1707, fol.); in Latin, ed. Manse, Wirecb. 1792; viii, 351 sq.); \*Arnald, *Crit. Commentary* (Lond. 1748, fol., and often since); Koken, *Dus. B. Sirach* (Hildesheim, 1756, 12mo); Telens, *Disquisitiones* (Hafn. 1779, 8vo); Bauer, *Erläut. m. Anmerk.* (Bamberg, 1781, 1793, 8vo); Onymus, *Weisheit J. S.* (Würtzburg, 1788, 8vo); Sonntag, *De Jes. Siracide* (Riga, 1792, 4to); \*Linde, *Sententiæ Jes. Sir.* (Danz. 1795, 4to); also *Glaubens u. Sittenlehre Jes. Sir.* (Lpz. 1782, 1795, 8vo); Zange, *Denksprüche Jes. Sir.* (Amst. 1797, 8vo); Fed-dersen, *Jes. Sir. übers.* (Amst. 1797, 1827, 8vo); Ben-Seeb, *שִׁיר הַיֵּשׁוּעַ*, etc. (8vo, Breslau, 1798; Vienna, 1807, 1818, 1828); \*Bretschneider, *Lib. Jesu Sirac* (Ratisbon, 1806, 8vo); Gaab, *Diss. exegetica* (Tubing, 1809, 4to); Luther, *Das Buch J. S.* (Lpz. 1815, 1816, 12mo); Anon. *Jes. S. bearbeit.* (Lpz. 1826, 8vo); Howard, *Eccclus. tr. from the Vulg.* (Lond. 1827, 8vo); Anon. *Sirach, ein Spiegel* (Kreuznach, 1829, 8vo); Van Gilse, *Commentatio* (Grön. 1832, 4to); Grimm, *Commentar* (Lpz. 1837, 8vo); Gutmann, *Weisheits-Spruch J. S.* (Altona, 1841, 8vo); Dulk, *שִׁיר הַיֵּשׁוּעַ* (Warsaw, 1843, 8vo); Stern, *Weisheitsprüche J. S.* (Wien, 1844, 8vo); Hill, *Translation* (in the *Monthly Religious Mag.* Bost. 1852-53); \*Fritzsche, *Weish. J. S. erklärt u. übers.* (as part of the *Kurtz. Exeg. Handb. z. d. Apokr.* Lpz. 1860, 8vo); Cassel, *Uebers.* (Berl. 1866, 8vo). See also Rä-biger, *Ethica Apoc. V. T.* (Vratslav, 1838); Bruch, *Weisheits-Lehre der Hebräer* (Strasb. 1851); Geiger, in the *Zeitschr. d. Morgenl. Gesellsch.* 1858, p. 536 sq.; Horowitz, *Das Buch Sirach* (Bresl. 1865). Compare APOCRYPHA.

**Ecclesiology**, "a word of recent use, is the name which has been given in the British Islands to the study of Church architecture and decoration. Besides discriminating the various styles of ecclesiastical architecture, ecclesiology takes account of the ground-plan and dimensions of a church; of its orientation, or the deviation of its line from the true east; of its apse, or circular or polygonal east end; of its altar or communion-table, whether fixed or movable, stone or wood; of its reredos, dossel, or altar-screen; of its piscina, or basin and drain for pouring away the water in which the chalice was rinsed, or the priest washed his hands; of the sedilia, or seats for the priest, deacon, and sub-deacon, during the celebration of the Eucharist; of the ambry, or locker, for the preservation of the communion vessels and elements; of the 'Easter sepulchre,' or recess for the reception of the host from Good Friday till Easter day; of the altar-candlesticks; of the altar-steps; of the altar-rails; of the credence table, or shelf on which to place the communion elements before they were put upon the altar; of the 'misereres,' or elbowed stalls; of seats within and without the chancel walls; of the height of the chancel as compared with the nave; of the chancel arch; of the rood-screen, rood-staircase, rood-door, and rood-loft; of the piers or columns; of the triforium or blind-story; of the clerestory; of the windows; of the parvise-turret, or outside turret leading to the parvise; of the roof or groining; of the eagle-desks and lecturns;

of the pulpit; of the hour-glass stand, by which the preacher was warned not to weary the patience of the flock; of the reading pew; of the benches, pews, and galleries; of the aisles; of the shrine, fetour, or reliquary; of the benatura, or holy-water stoup; of the corbels, with special reference to the head-dress figured on them; of the pavement; of the belfry; of the baptismal font, with its accessories, the baptistery, the steps, the kneeling-stone, the chrismatory, the cover, and the desk; of the tower, with its lantern, parapet, pinnacles, louvres, windows, buttresses, and bells; of the porch and doors, with their niches and seats; of the parvise, or priest's chamber, above the porch; of the mouldings; of the pinnacle crosses; of the gurgoyles, or rain-spouts; of the church-yard or village cross; of the church-yard yew; of the lych-gate, or corpse-gate, where the corpse was met by the priest; of the crypt; of the confessional; of the hagioscope, or opening in the chancel arch through which the elevation of the host might be seen; of the lychoscope, or low window in the side wall of the chancel, the use of which is uncertain; of the chest for alms; of the table of the ten commandments; of the church plate; of the faldstool, or litany stool, of the embroidered work; of the images of saints; of the church well; of the sepulchral monuments and brasses, with their inscriptions; of the chapels or sacristies; of the vestry; of the dedication crosses. Ecclesiology has a literature of its own, including a monthly journal, called *The Ecclesiologist*. There are societies for promoting its study, one of which, 'The Ecclesiological, late Cambridge Camden Society,' has published *A Handbook of English Ecclesiology* (Lond. 1847).—Chambers, *Encyclopaedia*, s. v.

**Ecdippa**. See ACHIZIB.

**Echard, Jacques**, a learned Dominican, was born at Rouen September 22, 1644, and died at Paris March 15, 1724. He published *S. Thomæ Summa suo auctori vindicata, sive de V. P. Vincentii Bellouacensis scriptis dissertatio, in qui quid de speculo morali sententiarum aperitur* (1708, 8vo). He has contributed to illustrate his order by the "Library of Dominican Writers" (*Scriptores ordinis Prædicatorum recens. notisque illustrati, inchoavit J. Quetif, absolvit J. Echard* [Par. 1719-21, 2 vols. fol.]), which is held in high esteem by all bibliographers.—Hoefcr, *Nov. Biogr. Génér.* xv, 623.

**Echard, Lawrence**, A.M., archdeacon of Stowe, was born in Suffolk about 1671, and was educated at Christ's College, Cambridge. He was presented to the livings of Welton and Elkinton, Lincolnshire, and was made archdeacon of Stowe and prebendary of Lincoln in 1712. He died in 1730. In his *History of England*, written on High-Church principles, he relates facts with perspicuity; and the work is rendered entertaining by short characters of the most eminent literary men in the different periods of history. At present his writings are little valued. His chief works are, (1) *A general Ecclesiastical History, from the Nativity of our Saviour to the first Establishment of Christianity by human Laws under Constantine* (Lond. 1722, 2 vols. 8vo, 6th edit.);—(2) *The Roman History, from the building of the City to the removal of the imperial Seat by Constantine the Great* (Lond. 1707, 4 vols. 8vo);—(3) *The History of England to the end of the Revolution* (Lond. 1707-18, 3 vols. fol.).—Allibone, *Dictionary of Authors*, i, 540; Kippis, *Biographia Britannica*, v, 552.

**Eck** or **Eckius**, JOHANNES (Johann Mayr von Eck), one of the most capable and violent of Luther's opponents, was born in Suabia, Nov. 13, 1486, the son of a peasant. He was educated at Heidelberg and Tübingen, and in 1516 was made professor and vice-chancellor at Ingolstadt. His intense ambition for literary fame stimulated him to unwearied activity and industry. In 1512 he was made vice-chancellor of the University of Ingolstadt. In 1514 he published *Centuriæ vi de Prædestinatione*; and lectured and wrote

on all sorts of subjects from 1514 to 1518. Ranke describes him as follows: "Eck was one of the most eminent scholars of his time; a reputation which he had spared no pains to acquire. He had visited the most celebrated professors in various universities: the Thomist Sïstern at Cologne, the Scotists Sumenhard and Scriptoris at Tübingen; he had attended the law lectures of Zasius in Freiburg, those on Greek of Reuchlin, on Latin of Bebel, on cosmography of Reusch. In his twentieth year he began to write and to lecture at Ingolstadt upon Occam and Biel's canon law, on Aristotle's dialectics and physics, the most difficult doctrines of dogmatic theology, and the subtleties of nominalistic morality; he then proceeded to the study of the mystics, whose most curious works had just fallen into his hands: he set himself, as he says, to establish the connection between their doctrines and the Orphicoplatonic philosophy, the sources of which are to be sought in Egypt and Arabia, and to discuss the whole in five parts (*Eckii Epistola de ratione studiorum suorum*, in Strobel, *Miscellanea*, iii, 97). He was one of those learned men who held that the great questions which had occupied men's minds were essentially settled; who worked exclusively with the analytical faculty and the memory; who were always on the watch to appropriate to themselves a new subject with which to excite attention, to get advancement, and to secure a life of ease and enjoyment. His strongest taste was for disputation, in which he had made a brilliant figure in all the universities we have mentioned, as well as in Heidelberg, Mainz, and Basle: at Freiburg he had early presided over a class (the Bursa zum Pfauen) where the chief business was practice in disputation; he then took long journeys—for example, to Vienna and Bologna—expressly to dispute there. It is most amusing to see in his letters the satisfaction with which he speaks of his Italian journey: how he was encouraged to undertake it by a papal nuncio; how, before his departure, he was visited by the young markgrave of Brandenburg; the very honorable reception he experienced on his way, in Italy as well as in Germany, from both spiritual and temporal lords, who invited him to their tables; how, when certain young men had ventured to contradict him at one of these dinners, he had confuted them with the utmost case, and left them filled with astonishment and admiration; and lastly, how, in spite of manifold opposition, he had at last brought the most learned of the learned in Bologna to subscribe to his maxims" (Kiederer, *Nachrichten*, iii, 47).

With such antecedents, Eck was prepared to take up arms against Luther (as, indeed, he was ready to take up arms against any man). They had been good friends, and Luther sent him his *Theses*. See LUTHER. Against these, in 1518, Eck wrote animadversions under the title *Obelisci* (given in Löscher, *Vollst. Ref. Act.* ii, 333 sq.), which were freely circulated, though the writer declared they were not meant to be published. Eck was at that time inquisitor for Bavaria, and what he said and wrote had great weight in fixing upon a man the reputation of heresy. Carlstadt (q. v.), at Luther's request, replied in 406 theses, in which he assailed both the learning and the orthodoxy of Eck, and very satirically. The controversy ended in a public *Disputation*, to which Carlstadt challenged Eck. According to a letter of Luther, written to Eck Nov. 15, 1518, Luther seems to have cherished the hope of a friendly settlement of the difficulty; but Eck was only puffed up by this tenderness of Luther, and in February, 1519, he printed an outline for the expected disputation, in which he endeavored again to impeach the University of Wittenberg, but more especially Carlstadt and Luther, particularly the latter, as holding heretical doctrines on penitence and on the papal power. Malice only could have inspired Eck here, as Luther had at that very time promised to Miltitz to discontinue the dispute. Luther was, of course, relieved

from his promise, and he so declared to the elector Frederick on the 13th of March. He wrote at once a reply to Eck, so unanswerable in all its points, and so full of severity, that Eck could no longer remain in doubt as to the fate which awaited him at Leipzig. Eck's aim was undoubtedly not so much to gain the mastery over Carlstadt as over Luther. He published (February, 1519) 13 theses, which he professed himself willing to defend against Luther. They referred chiefly to the doctrine of penitence and absolution, and the thirteenth especially sought to provoke an answer from Luther which should make him liable to the Inquisition for heresy. It read: "*Romanam Ecclesiam non fuisse superiorem aliis Ecclesiis ante tempora Sybestrî, negamus. Sed eum, qui sedem beatissimi Petri habuit et fidem, successorem Petri et Vicarium Christi generalem semper agnovimus.*" Eck here really gained his object. Luther accepted the challenge, and answered it by the following: "*Romanam Ecclesiam esse omnibus aliis superiorem, probatur ex frigidissimis Rom. Pontificum decretis, intra quadringentos annos natis. CONTRA quæ sunt historie approbate mille et centum annorum, textus scripture divine et decretum Niceni Concilii omnium sacratissimi.*" Eck, eager to bring Luther into a still more inextricable position as heretic, advanced, March 14, 1519, the following: "*Excusatio adversus criminationes Fr. M. Lutheri, ordinis Eremitarum,*" with the accusation that Luther was a coward, and that he only endeavored to advance Carlstadt in order that he might himself safely retreat. To this Luther replied in another "*Excusatio Fr. Martini Lutheri adversus criminationes Dr. Jo. Eckii,*" and with the assertion ("*Ich fürchte mich weder vor dem Pabste und des Pabstes Namen noch vor Pabstchen und Puppen*") (I am neither afraid of the pope or the pope's name, nor of popelings or puppets"). But Eck succeeded at least in frightening some true friends of Luther, and it was no easy task to quiet Spalatinus, who had grown very doubtful as to the final result of the dispute. But Luther was already decided not to spare the Roman see. The Roman Church he calls (De Wette, *Luther's Briefe*, i, 260) "Babylon;" the power of the Roman pontiff he counts among *worldly* powers (*ib.* i, 264). Meanwhile many causes delayed disputation. At last the personal interference of duke George, who asked of the bishop "not to defend the lazy priests, but to oblige them to meet the battle manfully, unless the pope should interfere," removed all obstacles.

The session opened at Leipsic June 27, 1519, and from that date to July 3 Eck and Carlstadt were the disputants. Eck admitted that the Scriptures were the ultimate rule of doctrine, and maintained a synergistic doctrine as to grace and free-will. Carlstadt supported the doctrine of the impotency of the will, and that good works are from grace alone. The controversy led to no result. "On Monday, the 4th of July, at seven in the morning, Luther arose; the antagonist whom Eck most ardently desired to meet, and whose rising fame he hoped to crush by a brilliant victory. He stood in the prime of manhood, and in the fulness of his strength: he was in his thirty-sixth year; his voice was melodious and clear; he was perfectly versed in the Bible, and its aptest sentences presented themselves unbidden to his mind; above all, he inspired an irresistible conviction that he sought the truth. The battle immediately commenced on the question of the authority of the papacy, which, at once intelligible and important, riveted universal attention. It was immediately obvious that Luther could not maintain his assertion that the pope's primacy dated only from the last four centuries: he soon found himself forced from this position by ancient documents; and the rather, that no criticism had as yet shaken the authenticity of the false decretals. But his attack on the doctrine that the primacy of the pope (whom he still persisted in regarding as the œcumenical bishop) was founded on Scripture and by divine right, was far

more formidable. Christ's words, 'Thou art Peter; feed my sheep,' which have always been cited in this controversy, were brought forward. In the exposition by Nicolas Lyranus also, of which Luther made the most use, there occurs this explanation, differing from that of the curia, of the passage in Matthew, chap. xvi: '*Quia tu es Petrus, i. e. confessor vera petra qui est Christus factus; et super hanc petram, quam confessus es, i. e. super Christum, edificabo ecclesiam meam.*' Luther labored to support the already well-known explanation of them, at variance with that of the curia, by other passages which record similar commissions given to the apostles. Eck quoted passages from the fathers in support of his opinions, to which Luther opposed others from the same source. As soon as they got into these more recondite regions, Luther's superiority became incontestable. One of his main arguments was that the Greeks had never acknowledged the pope, and yet had not been pronounced heretics; the Greek Church had stood, was standing, and would stand without the pope; it belonged to Christ as much as the Roman. Eck did not hesitate at once to declare that the Christian and the Roman Church were one; that the churches of Greece and Asia had fallen away, not only from the pope, but from the Christian faith—they were unquestionably heretics: in the whole circuit of the Turkish empire, for instance, there was not one soul that could be saved, with the exception of the few who adhered to the pope of Rome. 'How?' said Luther; 'would you pronounce damnation on the whole Greek Church, which has produced the most eminent fathers, and so many thousand saints, of whom not one had even heard of a Roman primate? Would Gregory of Nazianzen, would the great Basil, not be saved? or would the pope and his satellites drive them out of heaven?' These expressions prove how greatly the omnipotence and exclusive validity of the forms of the Latin Church, and the identity with Christianity which she claimed, were shaken by the fact that, beyond her pale, the ancient Greek Church, which she had herself acknowledged, stood in all the venerable authority of her great teachers. It was now Eck's turn to be hard pressed: he repeated that there had been many heretics in the Greek Church, and that he alluded to them, not to the fathers—a miserable evasion, which did not in the least touch the assertion of his adversary. Eck felt this, and hastened back to the domain of the Latin Church. He particularly insisted that Luther's opinion—that the primacy of Rome was of human institution, and not of divine right—was an error of the poor brethren of Lyons, of Wickliffe and Huss; but had been condemned by the popes, and especially by the general councils wherein dwelt the spirit of God, and recently at that of Constance. This new fact was as indisputable as the former. Eck was not satisfied with Luther's declaration that he had nothing to do with the Bohemians, nay, that he condemned their schism; and that he would not be answered out of the collectanea of inquisitors, but out of the Scriptures. The question had now arrived at its most critical and important moment. Did Luther acknowledge the direct influence of the divine Spirit over the Latin Church, and the binding force of the decrees of her councils, or did he not? Did he inwardly adhere to her, or did he not? We must recollect that we are here not far from the frontier of Bohemia; in a land which, in consequence of the anathema pronounced in Constance, had experienced all the horrors of a long and desolating war, and had placed its glory in the resistance it had offered to the Hussites: at a university founded in opposition to the spirit and doctrine of John Huss: in the face of princes, lords, and commoners, whose fathers had fallen in this struggle; it was said that delegates from the Bohemians, who had anticipated the turn which this conflict must take, were also present. Luther saw the danger of his position. Should he really reject the prevailing

notion of the exclusive power of the Roman Church to secure salvation? oppose a council by which John Huss had been condemned to the flames, and perhaps draw down a like fate upon himself? Or should he deny that higher and more comprehensive idea of a Christian church which he had conceived, and in which his whole soul lived and moved? Luther did not waver for a moment. He had the boldness to affirm that, among the articles on which the Council of Constance grounded its condemnation of John Huss, some were fundamentally Christian and evangelical. The assertion was received with universal astonishment. Duke George, who was present, put his hands to his sides, and, shaking his head, uttered aloud his wrothed curse, 'A plague upon it!' Eck now gathered fresh courage. It was hardly possible, he said, that Luther could censure a council, since his grace the elector had expressly forbidden any attack upon councils. Luther reminded him that the Council of Constance had not condemned all the articles of Huss as heretical, and specified some which were likewise to be found in St. Augustine. Eck replied that all were rejected; the sense in which these particular articles were understood was to be deemed heretical; for a council could not err. Luther answered that no council could create a new article of faith; how, then, could it be maintained that no council whatever was subject to error? 'Reverend father,' replied Eck, 'if you believe that a council regularly convoked can err, you are to me as a heathen and a publican' (*Disputatio Excellentissimorum Theologorum Johannis Eccii et D. Martini Lutheri Augustiniani quæ Lipsiæ capta fuit iudie Julii aō 1519. Opera Lutheri, Jena, i, 231*). Such were the results of this disputation. It was continued for a time, and opinions more or less conflicting on purgatory, indulgences, and penance were uttered. Eck renewed the interrupted contest with Carlstadt: the reports were sent, after the solemn conclusion, to both universities; but all these measures could lead to nothing further. The main result of the meeting was, that Luther no longer acknowledged the authority of the Roman Church in matters of faith. At first he had only attacked the instructions given to the preachers of indulgences, and the rules of the later schoolmen, but had expressly retained the decretals of the popes; then he had rejected these, but with appeal to the decision of a council; he now emancipated himself from this last remaining human authority also; he recognised none but that of the Scriptures" (Ranke, *History of Reformation*, Austin's transi., bk. ii, ch. iii).

After the disputation, in which Eck's pride of intellect had been grievously wounded, he wrote (July 23) a letter to the elector of Saxony exhorting him to discourage the pernicious doctrines of his professor, and to cause his books to be burned. Frederick replied with some delay and great moderation, and Carlstadt with bitterness. A bitter controversy followed, in which Melancthon took part, and Eck got the worst of it. In February, 1520, Eck also completed a treatise on the primacy, in which he promises triumphantly and clearly to confute Luther's assertion that "it is not of divine right." "Observe, reader," says he, "and thou shalt see that I keep my word." Nor is his work by any means devoid of learning and talent. After obtaining a condemnation of Luther from the universities of Louvain and Cologne, Eck went to Rome (1520) to present his book (*De Primatu*) to the pope, and to stir up feeling against Luther. His exhortations animated the enemies of Luther, and they at length prevailed upon the pope to summon a congregation on the subject, which passed sentence of condemnation upon Luther. Leo X indiscreetly appointed Eck as his nuncio for the promulgation of his bull in Germany. Elated by vanity, Eck set out with puerile exultation to inflict, as he thought, a fatal blow on his devoted adversary. In September he caused the bull to be fixed up in public places in Meis-

sen, Merseburg, and Brandenburg. "Everywhere he contended with force and energy, and on more than one occasion with success. Germany was his usual arena, where the bruit of controversy was almost invariably sustained by him. But in Switzerland his voice was likewise heard; and there, indeed, the papal interests were never upheld by any advocate of talent or distinction except himself and Faber. He was confronted in a long series of combats, during a space of twenty years, with all the chieftains of the Reformation; and, though he was defending what we are wont to consider the feebler cause, he never defended it feebly, or was overthrown with shame." He died February, 1543. His works against Luther embrace five volumes (*Opera contra Lutherum*, Augsburg, 1530-35). Besides this, and the work *De Primatu* already mentioned, Eck published *Exchirium Controversiarum* (last edit. Cologne, 1600); *Apologia contra Bucerum* (Ingolstadt, 1543), and others.—Hook, *Eccles. Biog.* iv, 532; Ranke, *Hist. of Reformation*; D'Aubigne, *Hist. of Reformation*, vol. i; Mosheim, *Ch. Hist.* bk. iv, c. xvii, sec. i, ch. ii, § 9, and ch. iii, § 13; Herzog, *Real-Encyklop.* iii, 626 sq.

**Eckart or Eckhardt** (called *Master Eckart*), a Dominican monk, one of the most profound thinkers of the Middle Ages. Of the time or place of his birth we have no record. He is first mentioned as a teacher at the College of St. James, at Paris. Having gone to Rome, where he received the degree of D.D., he was appointed provincial of Saxony, the appointment being confirmed by a chapter of his order held at Toulouse in 1294. In 1307 he was appointed vicar-general of Bohemia, with power to reform the Dominican convents. We afterwards find him again in Strasburg, preaching in the nunneries, and making acquaintances among the "Brethren of the Free Spirit." Having preached in Cologne, where archbishop Heinrich had already, in 1322, condemned the Beghards, Eckart, who inclined to them, brought upon himself the displeasure of the Church. Cited before the Inquisition in January, 1327, Eckart disclaimed heretical doctrines, and professed his willingness to recant any such that could be found in his teachings. A total recantation, however, being demanded of him, he refused, and in consequence was condemned as a heretic. He appealed to the pope, who, out of 28 points acknowledged by Eckart, condemned 17 as heretical and the remainder as suspicious. Notwithstanding this condemnation, Henry Suso's autobiography, published in 1360, calls him "the holy Master Eckart," and praises his "sweet doctrine." Copies of his sermons were made and preserved in numerous monasteries. Eckart has been claimed both by speculative philosophers and orthodox theologians; both by Protestants and Romanists. He is perhaps properly to be considered as the father of the modern mystical pantheism. He upheld the doctrines of the Brethren of the Free Spirit, but yet was free from their practical aberrations, as also from their opposition to the rites of the Church and to moral law. His writings have latterly been collected by Pfeiffer (*Deutsche Mystiker des 14<sup>ten</sup> Jahrh.* 1857, 2d vol.); they consist of 110 sermons, 18 treatises, 70 theses, and the *Liber positionum*. Before this, some of his sermons and short treatises, appended to Tauler's collection, Basle, 1521, were the only ones of his writings which were generally accessible.

See Schmid, in *Theol. Stud. u. Kritik.* (1839); *Mémoires de l'Acad. des Sciences mor. et polit.* (Schmid's *Etud. sur le mysticisme allem. au XIV<sup>me</sup> siècle*, Paris, 1847); Martensen, *Meister Eckart* (Hamburg, 1842); Schmid, in Herzog's *Real-Encyklopädie*, iii, 638. All the writers here cited charge Eckart with pantheistic views. But Preger, in *Zeitschrift f. d. hist. Theol.* 1864, p. 163 sq., and 1866, p. 453 sq., publishes a new tract of Eckart's, not found in Pfeiffer's collection, and vindicates Eckart from the charge of pantheism. So also does Bach, in *Meister Eckhart, d. Vater d. deutschen*

*Speculation* (Wien, 1864), noticed in *Jahrb. f. deutsche Theologie*, 1867, p. 363.

**Eckermann, JACOB CHRISTOPH RUDOLPH**, was born September 6, 1754, at Wedendorf, in Mecklenburg-Schwerin. In 1782 he was appointed professor of theology at the University of Kiel, and Danish Church councillor. He died May 6, 1836. He is the author of *Erklärung aller dunklen Stellen des N. T.* (Kiel, 1806-1808, 3 vols. 8vo).—*Joel metrisch übersetzt mit einer neuen Erklärung* (Lüb. and Leipz. 1786, 8vo).—*Compend. theol. theor. bibl. histor.* (Altona, 1792, 8vo); a German edition of the same work, *Handb. für das systemat. Studium der Glaubenslehre*, in which he declares that the doctrines of Jesus are only a popular guide to a real adoration of the deity, and that whatever else the New Test. may contain is to be considered true only from an historical point of view (Altona, 1801-2, 4 vols. 8vo).—*Erinnerung an den unvergängl. u. unschätz. grossen Werth der Reformat. Iuthers* (Altona, 1817, 8vo), besides a number of other works, which have been collected in 6 vols. 8vo, under the title of *Theologische Beiträge* (Altona, 1790-99), and in two additional vols., *Vermischte Schriften* (ibid. 1799, 1800).—Wiener, *Theologische Literatur*; Kitto, *Cyclopaedia*, i, 725; Grässe, *Allgem. Literaturgeschichte*, vii, 872.

**Eclectics**, (1.) a sect of ancient philosophers, who professed to *select* (ἐκλέγειν) from all systems of philosophy what they deemed to be true. The *Eclectics* were chiefly *Neo-Platonists* (q. v.), and the philosophers chiefly *selected from* were Pythagoras, Plato, and Aristotle. "This union of the Aristotelian and Platonic philosophies was attempted first by Potamo of Alexandria, whose principles were taken up and maintained by Ammonius Saccas. It may be doubted, however, if the title of eclectics can be properly given to Potamo or Ammonius, the former of whom was in fact merely a Neo-Platonist, and the latter rather jumbled together the different systems of Greek philosophy (with the exception of that of Epicurus) than selected the consistent parts of all of them. The most eminent of the followers of Ammonius were Plotinus, Porphyry, Jamblichus, Proclus, and the ancient Eclecticism became at last little more than an attempt to reconcile Platonism with Christianity" (*Penny Cyclop.* ix, 265). See AMMONIUS.

Clemens Alexandrinus (*Strom.* i, 228) said: "By philosophy I mean neither the Stoic, nor the Platonic, nor the Epicurean, nor the Aristotelian, but whatever things have been properly said by each of these sects, inculcating justice and devout knowledge—*this whole selection I call philosophy.*" "The sense in which this term is used by Clemens" (of Alexandria), says Mr. Maurice (*Mor. and Metaphys. Phil.* ii, 53), "is obvious enough. He did not care for Plato, Aristotle, Pythagoras, as such; far less did he care for the opinions and conflicts of the schools which bore their names; he found in each hints of precious truths of which he desired to avail himself; he would gather the flowers without asking in what garden they grew, the prickles he would leave for those who had a fancy for them. *Eclectic*ism, in this sense, seemed only like another name for catholic wisdom. A man, conscious that everything in nature and art was given for his learning, had a right to suck honey wherever it was to be found; he would find sweetness in it if it was hanging wild on trees and shrubs; he could admire the elaborate architecture of the cells in which it was stored. The Author of all good to man had scattered the gifts, had imparted the skill; to receive them thankfully was an act of homage to him. But once lose the feeling of *devotion and gratitude*, which belonged so remarkably to Clemens—once let it be fancied that the philosopher was not a mere receiver of treasures which had been provided for him, but an ingenious chemist and compounder of various naturally unsociable ingredients, and the eclectic doctrine would lead to more self-con-

ceit, would be more unreal and heartless than any one of the sectarian elements out of which it was fashioned. It would want the belief and conviction which dwell, with whatever unsuitable companions, even in the narrowest theory. Many of the most vital characteristics of the original dogmas would be effaced under pretence of taking off their rough edges and fitting them into each other. In general the superficialities and formality of each creed would be preserved in the new system; its original and essential characteristics sacrificed" (Fleming, *Vocabulary of Philosophy*, s. v.).

(2.) "Modern eclecticism is conceived by some to have originated with Bacon and Descartes, but Hegel may be more properly considered its founder. In his *Philosophy of History* and other works he endeavors, among other things, to point out the true and false tendencies of philosophic speculation in the various ages of the world; but it is to the lucid and brilliant eloquence of Victor Cousin (q. v.) that modern eclecticism owes its popularity. This system, if it can be so called, may best be defined as an effort to expound, in a critical and sympathetic spirit, the previous systems of philosophy. Its aim is to apprehend the speculative thinking of past ages in its historical development, and it is the opinion of some that such a method is the only one possible in our day in the region of metaphysics" (Chambers, *Encyclopaedia*, s. v.).—Murdoch's Mosheim, *Ch. Hist.* bk. i, c. ii, pt. ii, ch. i; Neander, *Ch. Hist.* i, 658; Mosheim, *Commentaries*, ch. i, § 30. See AMMONIUS; PLATONISM.

**Eclipse.** An eclipse of the sun is caused by the intervention of the moon when new, or in conjunction with the sun, intercepting his light from the earth, either totally or partially. An eclipse of the moon is caused by the intervention of the earth, intercepting the sun's light from the moon when full, or in opposition to the sun, either totally or partially. An eclipse of either luminary can only take place when they are within their proper limits, or distances, from the nodes or intersections of both orbits. A total eclipse of the moon may occasion a privation of her light for an hour and a half, during her total immersion in the shadow; whereas a total eclipse of the sun can never last in any particular place above four minutes, when the moon is nearest to the earth, and her shadow thickest. See **SUN**; **MOON**.

No historical notice of an eclipse occurs in the Bible, but there are passages in the prophets which contain manifest allusion to this phenomenon. (Comp. *Lucan*, i, 540 sq.; *Virgil, Georg.* i, 466; *Curt.* iv, 3; *Evang. Nicod.* c. 11.) They describe it in the following terms: "The sun goes down at noon," "the earth is darkened in the clear day" (*Amos* viii, 9), "the day shall be dark" (*Mic.* iii, 6), "the light shall not be clear nor dark" (*Zech.* xiv, 6), "the sun shall be dark" (*Joel* ii, 10, 31; iii, 15). Some of these notices have been thought to refer to eclipses that occurred about the time of the respective compositions; thus the date of *Amos* nearly coincides with a total eclipse which occurred Feb. 9, B.C. 781, and was visible at Jerusalem shortly after noon (*Hitzig, Comm.* in Prop.); that of *Micah* with the eclipse of June 5, B.C. 716, referred to by *Dionys. Hal.* ii, 56, to which same period the latter part of the book of *Zechariah* has been assigned by some. A passing notice in *Jer.* xv, 9 nearly coincides in date with the eclipse of Sept. 30, B.C. 610, so well known from *Herodotus's* account (i, 74, 103). The Hebrews seem not to have philosophized much on eclipses, which they considered as sensible marks of God's anger (see *Joel* ii, 10, 31; iii, 15; *Job* ix, 7). *Ezekiel* (xxxii, 7) and *Job* (xxxvi, 32) speak more particularly, that God covers the sun with clouds when he deprives the earth of its light by eclipses. These passages, however, are highly figurative, and the language they present may simply be borrowed from the lurid look of the heavenly orbs as seen through a hazy atmosphere. Yet, when we read that "the sun shall

be turned into darkness, and the moon into blood," we can hardly avoid discerning an acquaintance with the appearance of those luminaries while under eclipse. The interruption of the sun's light causes him to appear black; and the moon, during a total eclipse, exhibits a copper color, or what Scripture intends by a blood color. See **ASTRONOMY**. The awe which is naturally inspired by an eclipse in the minds of those who are unacquainted with the cause of it rendered it a token of impending judgment in the prophetic books. See **EARTHQUAKE**.

The plague of darkness in Egypt has been ascribed by various neologistic commentators to non-miraculous agency, but no sufficient account of its intense degree, long duration, and limited area, as proceeding from any physical cause, has been given. See **PLAGUES OF EGYPT**.

*Josephus* mentions (*Ant.* xvii, 6, 4 s. f.) an eclipse of the moon as occurring on the night when Herod deprived Matthias of the priesthood, and burnt alive the seditious Matthias and his accomplices. This is of great importance in the chronology of Herod's reign, as it immediately preceded his own death. It has been calculated as happening March 13, B.C. 4. See **HEROD (THE GREAT)**.

The darkness ἐπι πᾶσαν τὴν γῆν of *Matt.* xxvii, 45, attending the crucifixion has been similarly attributed to an eclipse. See **CRUCIFIXION (OF CHRIST)**. *Phlegon* of Tralles, indeed, mentions an eclipse of intense darkness, and, beginning at noon, combined, he says, in Bithynia, with an earthquake, which, in the uncertain state of our chronology (see *Clinton's Fasti Romani*, *Olymp.* 202), more or less nearly synchronizes with the event. Nor was the account without reception in the early Church. See the testimonies to that effect collected by *Whiston (Testimony of Phlegon vindicated, London, 1732)*. *Origen*, however, ad loc. (*Latin commentary on Matthew*), denies the possibility of such a cause, arguing that by the fixed Paschal reckoning the moon must have been about full, and denying that *Luke* xxiii, 45, by the words ἰσκιώθη ὁ ἥλιος, means to allege that fact as the cause. The genuineness of this commentary has been impeached, nor is its tenor consistent with *Origen ad. Cel.* p. 80; but the argument, unless on such an assumption as that mentioned below, seems decisive, and has ever since been adhered to. He limits πᾶσαν τὴν γῆν to Judæa. *Dean Alford* (ad loc.), though without stating his reason, prefers the wider interpretation of all the earth's surface on which it would naturally have been day. That *Phlegon's* darkness, perceived so intense in Tralles and Bithynia, was felt in Judæa, is highly probable; and the evangelist's testimony to similar phenomena of a coincident darkness and earthquake, taken in connection with the near agreement of time, gives a probability to the supposition that the former speaks of the same circumstances as the latter. *Wieseler (Chron. Synop.* p. 388), however, and *De Wette (Comment.* on *Matt.*) consider the year of *Phlegon's* eclipse an impossible one for the crucifixion, and reject that explanation of the darkness. The argument from the duration (three hours) is also of great force, for an eclipse seldom lasts in great intensity more than six minutes. The darkness in this instance, moreover, cannot with reason be attributed to an eclipse, as the moon was at the full at the time of the Passover (q. v.). On the other hand, *Seyffarth (Chronolog. Sacr.* p. 58, 9) maintains that the Jewish calendar, owing to their following the sun, had become so far out that the moon might possibly have been at new, and thus, admitting the year as a possible epoch, revives the argument for the eclipse as the cause. He, however, views this rather as a natural basis than as a full account of the darkness, which in its degree at Jerusalem was still preternatural (*ib.* p. 138). The pamphlet of *Whiston* above quoted, and two by *Dr. Sykes, Dissertation on the Eclipse mentioned by Phlegon, and Defence of the*

same (London, 1733 and 1734), may be consulted as regards the statement of Philegon. Treatises on the phenomenon in question have been written in Latin by Baier (Regiom. 1718), Engeström (London, 1730), Fleischer (Viteb. 1692), Frick (Lips. 1692), Lauth (Argent. 1743), Pasch (Viteb. 1683), Posner (Jena, 1661), Schmid (Jena, 1683), Sommel (London, 1774), Töpfer (Jen. 1678), Wiedeberg (Helmst. 1687), Zeibich (Viteb. 1741), and in German by Grausbeck (Tübing. 1835). See DARKNESS.

**Economy**, "a term which properly means the arrangement of a household (*oikonomia*), but is also frequently employed by ecclesiastical writers for the practical measures adopted in order to give effect to a divine dispensation. The Jewish economy included all the details of spiritual and secular government, but the Christian economy, belonging to a 'kingdom not of this world,' has no direct reference to political arrangements" (Eden). See DISPENSATION.

**Ecthesis**, a proclamation or formula of faith, in the form of an edict, written by Sergius, patriarch of Constantinople, published A.D. 639 by the emperor Heraclius, to put an end to the troubles occasioned by the Eutychian heresy. It prohibited all controversies on the question, Whether in Christ there were one or two operations? though in the same edict the doctrine of one will was plainly inculcated. A considerable number of the Eastern bishops declared their assent to this law, which was also submissively received by Pyrrhus, the new patriarch of Constantinople. In the West the case was quite different. The Roman pontiff, John IV, assembled a council at Rome, A.D. 629, in which the ecthesis was rejected, and the Monothelites were condemned (Mosheim's *Eccles. Hist.* N. Y. ed. i, 453). A copy of it is given in Harduin, *Concilia*, iii, 791. See also Gieseler, *Church History*, i, § 126; Hefele, *Conciliengeschichte*, iii, 154 sq. See EUTYCHIANS.

**Ecuador** (the Spanish term for *Equator*), a republic in South America. In lat. it extends from 1° 40' N. to 5° 50' S., while in W. long. it stretches from 69° to 81° 20'. It measures, therefore, from north to south fully 500 miles, and from east to west nearly 850, presenting an area of about 300,000 square miles. It is bounded by the United States of Colombia, Brazil, Peru, and the Pacific. The population in 1857 (according to Vilavencio) was 1,108,042, composed as follows: Whites (Creoles), 100,000; descendants of whites and Indians, 501,200; civilized Indians, 462,400; negroes, 7840; descendants of negroes and whites or negroes and Indians, 36,000; uncivilized Indians, 200,000. Ecuador, until the beginning of the present century, belonged to the Spanish viceroyalty of New Granada. After the establishment of the independence of the Spanish colonies, Ecuador formed part, until 1830, of the federal republic of Colombia. Since 1830 it has been an independent republic. The chief cities are Quito, the capital, and Guayaquil, the emporium of foreign trade. The government appears to have been constituted on the model of the United States of North America, having a president and vice-president, with a Senate and a House of Representatives. All the inhabitants belong to the Roman Catholic Church, which contains the following dioceses: 1. The archbishopric of Quito, established as an episcopal see in 1545, erected into an archbishopric in 1861; 2. the bishopric of Guayaquil, established in 1838; 3. the bishopric of Nueva Cuenca. The public exercise of no other religion is allowed by the Constitution of the state. There were, in 1855, 277 parochial and 106 viceparochial churches, 534 secular priests, 262 monks in 36 and 202 nuns in 11 convents. The University of Quito, established in 1586 by the Jesuits, has 4 colleges and several seminaries. There were 11 high schools, called colleges or seminaries, and 200 primary schools, of which 30 were for girls. Nearly all the

scholars were the children of the whites and mulattoes; the Indian population grows up almost without education. — *Allgemeine Real-Encycl.* iv, 1018; Vilavencio, *Geographia de la Republica del Ecuador* (N. Y. 1858). (A. J. S.)

**Ed**, i. e. "witness" (for Heb. *id.* עֵד), supplied (apparently on the authority of a few MSS. and also of the Syr. and the Arab. versions) in the A. V. as the name of the altar erected by the three tribes east of Jordan in commemoration of their adhesion to the others (Josh. xxii, 34). The commonly received Heb. text is literally as follows: "And the sons of Reuben and the sons of Gad called the altar [עֵד לְרֵעֵינוּ וְלְרֵעֵיכֶם], Sept. ἐπιπρόμαρον καὶ ἕπαν, Vulg. vocaverunt]; for a witness is this [עֵד הָיָה עֵד, Sept. ὅτι μαρτύριον ἐστίν, Vulg. testimonium]," etc., or as it may be rendered (עֵד הָיָה being sometimes used absolutely thus), "gave a name to the altar, [saying]," etc. The gloss is unnecessary (see Maurer, *Comment.* in loc.), for the latter clause furnishes both the name and the explanation (Keil, *Comment.* in loc.), i. e. "they named the altar (as follows), that 'This is a witness,'" etc. See OREB.

**E'dar** (Heb. *E'der*, עֵדָר, flock, as often rendered), the name of a tower (עֵדָרָה), beyond (עֵדָרָה) which Jacob first halted between Bethlehem and Hebron (Gen. xxxv, 21, Sept. Γαδὴ, Vat. omits, Vulg. *Eder*). In Mic. iv, 8 (Sept., Vulg., and A. V. translate ποιμνιον, *grex*, "flock") it is put for the neighboring village Bethlehem itself, and hence tropically for the royal line of David as sprung thence. It perhaps derived its name from the fact of having been erected to guard [see ΜΙΘΡΟΛ-] flocks, or else from some individual of the name of Eder (q. v.). Jerome (who calls it *turris Ader*) says it lay 1000 paces from Bethlehem (*Onomast.* s. v. Bethlehem), and intimates that it contained a prophetic anticipation (comp. *Targum* of Pseudo-Jon. in loc.) of the birth of the Messiah in the same spot (Luke ii, 7, 8). (See Albert, *De turri Eder*, Lips. 1689.) See BETHLEHEM.

**Edayoth.** See TALMUD.

**Eddy**, JOHN REYNOLDS, a Methodist Episcopal minister, son of Rev. Augustus Eddy, was born in Xenia, Ohio, Oct. 10, 1829, obtained a liberal English education, and made some proficiency in the classics. He commenced the study of law, but determined to devote himself to the ministry, and was admitted on trial in the North-west Indiana Conference in 1856. After filling various appointments acceptably, he accepted in 1862 the chaplaincy of the 72d Indiana Regiment. He immediately joined his regiment at Murfreesborough, Tenn., and commenced his labors among the soldiers. Sunday, June 21, he preached from Prov. xvi, 32; Wednesday, June 24, during a fight between colonel Wilder's cavalry brigade and a rebel force he was instantly killed by a shell.—*Min. of Conferences*, 1863.

**Edelmann**, JOHANN CHRISTIAN, an infidel German writer, was born at Weissenfels in 1698, and studied theology at Jena. From his youth he evinced an unsteadiness of mind, which afterwards led him, after oscillating between the different Christian denominations, to forsake them all and become an opponent of all orthodoxy. He rejected the Christian doctrine, and considered reason as a part of the essence of God, in no way different from him. For some years he abstained from all animal food, in order, as he expressed it, not to eat a part of divinity. He had previously taken part in the translation of the Bible, published at Berleburg (q. v.). His principal works are his *Unschulhige Wahrheiten*, in which he attempts to prove that no religion is of any importance:—*Moses mit aufgedecktem Angesicht* (1740, 8vo):—*Christ und Belial* (1741, 8vo):—*die Göttlichkeit d. Vernunft* (1742, 8vo). He finally went to Berlin, where Friedrich II tolerated

his presence on the plea that he had to put up with many other fools. Edelmant died in Berlin Feb. 15, 1767. A selection of his works appeared at Berne in 1847 (*Auswahl aus E.'s Schriften*).

"What Edelmant wished was nothing new; after the manner of all adherents of Illuminism, he wished to reduce all positive religions to natural religion. The positive heathenish religions stand, to him, on a level with Judaism and Christianity. He is more just towards heathenism than towards Judaism, and more just towards Judaism than towards Christianity. Everything positive in religion is, as such, superstition. Christ was a mere man, whose chief merit consists in the struggle against superstition. What he taught, and what he was anxious for, no one, however, may attempt to learn from the New Testament writings, inasmuch as these were forged as late as the time of Constantine. All which the Church teaches of his divinity, of his merits, of the gracious influence of the Holy Spirit, is absurd. There is no rule of truth but reason, and it manifests its truths directly by a peculiar sense. Whatever this sense says is true. It is this sense which perceives the world. The reality of everything which exists is God. In the proper sense there can, therefore, not exist any atheist, because every one who admits the reality of the world admits also the reality of God. God is not a person, least of all are there three persons in God. If God be the substance in all the phenomena, then it follows of itself that God cannot be thought of without the world, and hence that the world has no more had an origin than it will have an end. One may call the world the body of God, the shadow of God, the son of God. The spirit of God is in all that exists. It is ridiculous to ascribe inspiration to special persons only; every one ought to be a Christ, a prophet, an inspired man. The human spirit, being a breath of God, does not perish; our spirit, separated from its body by death, enters into a connection with some other body. Thus Edelmant taught a kind of metempsychosis. What he taught had been thoroughly and ingeniously said in France and England; but from a German theologian, and that with such eloquent coarseness, with such a mastery in expatiating in blasphemy, such things were unheard of. But as yet the faith of the Church was a power in Germany!" (*Kahnis, German Protestantism*, bk. i, chap. ii, § 2). An autobiography of Edelmant was published by Klose (Berlin, 1849). See Pratzke, *Histor. Nachrichten* (Hamb. 1755, 8vo); Elster, *Erinnerungen an Edelmant* (Clausthal, 1839); Hurst, *History of Rationalism*, ch. v.

É'den (Heb. *id.*), the name of three places and of one or two men.

1. "The garden of EDEN" (עֵדֶן, *de'right*, and so Sept. *τοῦτοῦ*, Vulg. *voluptas*) is the most ancient and venerable name in geography, the name of the first district of the earth's surface of which human beings could have any knowledge.

1. *The Name.*—The word is found in the Arabic as well as in the Hebrew language. It is explained by Firuzabadi, in his celebrated Arabic lexicon (*Kamūs*), as signifying *delight, tenderness, loveliness* (see Morren, in *Edinb. Biblical Cabinet*, xi, 2, 48, 49). Major Wilford and professor Wilson find its elements in the Sanscrit. The Greek ἡδονή is next to identical with it in both sound and sense. It occurs in three places (Isa. xxxvii, 12; Ezek. xxvii, 23; Amos i, 5) as the name of some eminently pleasant districts, but not the Eden of this article. Of them we have no certain knowledge, except that the latter instance points to the neighborhood of Damascus. In these cases it is pointed, in the Hebrew text, with both syllables short (עֵדֶן); but when it is applied to the primitive seat of man, the first syllable is long. The passages in which it occurs in the latter sense are, in addition to Gen. ii, iii, iv, 16, the few following, of which we transcribe the

chief, because they cast light upon the primeval term: "He will make her wilderness like Eden, and her desert like the garden of Jehovah." "Thou hast been in Eden, the garden of God." "All the trees of Eden, that were in the garden of God, envied him." "This land which was desolate is become like the garden of Eden" (Isa. li, 3; Ezek. xxviii, 13; xxxi, 9, 16, 18; xxxvi, 35; Joel ii, 3). All this evidence goes to show that *Eden* was a tract of country, and that in the most eligible part of it was the *Paradise*, the garden of all delights, in which the Creator was pleased to place his new and pre-eminent creature, with the inferior beings for his sustenance and solace. See GARDEN.

The old translators appear to have halted between a mystical and literal interpretation. The word עֵדֶן is rendered by the Sept. as a proper name in three passages only, Gen. ii, 8, 10; iv, 16, where it is represented by Ἐδέη. In all others, with the exception of Isa. li, 3, it is translated *τοῦτοῦ*. In the Vulgate it never occurs as a proper name, but is rendered "*voluptas*," "*locus voluptatis*," or "*deliciae*." The *Targum* of Onkelos gives it uniformly עֵדֶן, and in the Peshito Syriac it is the same, with a slight variation in two passages. See PARADISE.

11. *Biblical Description.*—The following is a simple translation of the Mosaic account of the situation of the Adamic Paradise (Gen. ii, 8–17). See GENESIS.

Now Jehovah God had planted a garden in Eden eastward, and he placed there the man whom he formed; for Jehovah God had caused to spring from the ground every tree pleasant for sight or good for food; also the tree of life in the midst of the garden, and the tree of the knowledge of good and evil. Now a river issued from Eden to water the garden, and thence it was parted, and became four head-[streams]; the name of the first is Pi-hon; this [is the one] that surrounds all the land of the Chavilah, where [is] the [metal] gold (the gold too of that land [is] good); there [also is] the [substance called] *bedolach*, and a stone [called] the *shoham*; and the name of the second river [is] Gihon; this [is the one] that surrounds all the land of Cush; and the name of the third river [is] Chiddékél; this [is the one] that flows east of Ashshur; and the name of the fourth river, that [is] Perath.

Thus Jehovah God took the man, and settled him in the garden of Eden, to till it, and to keep it. Then Jehovah God enjoined upon the man, saying, "Of every tree of the garden thou mayest freely eat except of the tree of the knowledge of good and evil—thou shalt not eat of it; for in the day of thy eating of it, thou shalt surely die."

The garden of Paradise is here said to be to the east, i. e. in the eastern part of the tract of Eden (see Gesenius, *Heb. Lex.* s. v.). The river which flowed through Eden watered the garden, and thence branched off into four distinct streams. The first problem to be solved, then, is this: To find a river which, at some stage of its course, is divided into four streams, two of which are the Tigris and Euphrates. The identity of these rivers with the Hiddekel and Perath has never been disputed, and no hypothesis which omits them is worthy of consideration. Setting aside minor differences of detail, the theories which have been framed with regard to the explanation of the above description of the terrestrial paradise naturally divide themselves into two classes. The first class includes all those which place the main river of the garden of Eden below the junction of the Euphrates and Tigris, and interpret the names Pison and Gihon of certain portions of these rivers; the second, those which seek for it in the high table-land of Armenia, the fruitful parent of many noble streams. These theories have been supported by most learned men of all nations, of all ages, and representing every shade of theological belief; but there is scarcely one which is not based in some degree upon a forced interpretation of the words of the narrative. Those who contend that the united stream of the Euphrates and Tigris is the "river" which "goeth forth from Eden to water the garden," have committed a fatal error in neglecting the true meaning of עֵדֶן, which is only used of the course of a river from its source *downwards* (comp. Ezek. xlvii, 1). Following the guidance which this word supplies, the de-

scription in ver. 10 must be explained in this manner: the river takes its rise in Eden, flows into the garden, and from thence is divided into four branches, the separation taking place either in the garden or after leaving it. If this be the case, the Tigris and Euphrates before junction cannot, in this position of the garden, be two of the four branches in question. But, though they have avoided this error, the theorists of the second class have generally been driven into another but little less destructive. Looking for the true site of Eden in the highlands of Armenia, near the sources of the Tigris and Euphrates, and applying the names Pison and Gihon to some one or other of the rivers which spring from the same region, they have been compelled to modify the meaning of נָהָר, the "river," and to give to אֲרָצוֹת a sense which is scarcely supported by a single passage. In no instance is אֲרָצוֹת (lit. "head") applied to the *source* of a river. On several occasions (comp. Judg. vii, 16; Job i, 17, etc.) it is used of the detachments into which the main body of an army is divided, and analogy therefore leads to the conclusion that אֲרָצוֹת denotes the "branches" of the parent stream. There are other difficulties in the details of the several theories which may be obstacles to their entire reception, but it is manifest that no theory which fails to satisfy the above-mentioned conditions can be allowed to take its place among things that are probable. What, then, is the river which goes forth from Eden to water the garden? is a question which has often been asked, and still waits for a fully satisfactory answer. That the ocean stream which surrounded the earth was the source from which the four rivers flowed was the opinion of Josephus (*Ant.* i, 1, 3) and Johannes Damascenus (*De Orthod. Fid.* ii, 9). It was the *Shat el-Arab*, according to those who place the garden of Eden below the junction of the Tigris and Euphrates, and their conjecture would deserve consideration were it not that this stream cannot, with any degree of propriety, be said to rise in Eden. By those who refer the position of Eden to the highlands of Armenia, the "river" from which the four streams diverge is conceived to mean "a collection of springs," or a well-watered district. It is scarcely necessary to say that this signification of נָהָר (*mahar'*) is without a parallel; and even if it could, under certain circumstances, be made to adopt it, such a signification is, in the present instance, precluded by the fact that, whatever meaning we may assign to the word in ver. 10, it must be essentially the same as that which it has in the following verses, in which it is sufficiently definite. Siekler (Augusti, *Theol. Monatschrift*, i, 1), supposing the whole narrative to be a myth, solves the difficulty by attributing to its author a large measure of ignorance. The "river" was the Caspian Sea, which in his apprehension was an immense stream from the east. Bertheau, applying the geographical knowledge of the ancients as a test of that of the Hebrews, arrived at the same conclusion, on the ground that all the people south of the Armenian and Persian highlands place the dwelling of the gods in the extreme north, and the regions of the Caspian were the northern limit of the horizon of the Israelites (Knobel, *Genesis*). But he allows the four rivers of Eden to have been real rivers, and not, as Siekler imagined, oceans which bounded the earth east and west of the Nile. The modern Lake Van, or perhaps the ancient stream of which this is now the representative, appears to be the only body of water in this vicinity answering to the Mosaic description. Nor will it do to suppose that in former ages great changes had taken place, which have so disguised the rivers in question that their course, connection, and identity are not now traceable; for two of the rivers, at least, remain to this day essentially the same as in all historic times, and the whole narrative of Moses is evidently adapted

to the geography as it existed in his own day, being constantly couched in the *present tense*, and in terms of well-known reference as landmarks. See RIVER.

Some, ever ready to use the knife, have unhesitatingly pronounced the whole narrative to be a spurious interpolation of a later age (Granville Penn, *Min. and Mos. Geol.* p. 184). But, even admitting this, the words are not mere unmeaning jargon, and demand explanation. Ewald (*Gesch.* i, 331, *note*) affirms, and we have only his word for it, that the tradition originated in the far East, and that in the course of its wanderings the original names of two of the rivers at least were changed to others with which the Hebrews were better acquainted. Hartmann regards it as a product of the Babylonian or Persian period. Luther, rejecting the forced interpretations on which the theories of his time were based, gave it as his opinion that the garden remained under the guardianship of angels till the time of the Deluge, and that its site was known to the descendants of Adam; but that by the flood all traces of it were obliterated. But, as before remarked, the narrative is so worded as to convey the idea that the countries and rivers spoken of were still existing in the time of the historian. It has been suggested that the description of the garden of Eden is part of an inspired antediluvian document (Morren, Rosenmüller's *Geogr.* i, 92). The conjecture is beyond criticism; it is equally incapable of proof or disproof, and has not much probability to recommend it. The effects of the flood in changing the face of countries, and altering the relations of land and water, are too little known at present to allow any inferences to be drawn from them. (See below.)

Conjectures with regard to the dimensions of the garden have differed as widely as those which assign its locality. Ephraem Syrus maintained that it surrounded the whole earth, while Johannes Tostatus restricted it to a circumference of thirty-six or forty miles, and others have made it extend over Syria, Arabia, and Mesopotamia. But of speculations like these there is no end.

III. *Identifications of the Site.*—It would be difficult, in the whole history of opinion, to find any subject which has so invited, and at the same time so completely baffled conjecture, as the garden of Eden. The three continents of the Old World have been subjected to the most rigorous search; from China to the Canary Isles, from the Mountains of the Moon to the coasts of the Baltic, no locality which in the slightest degree corresponded to the description of the first abode of the human race has been left unexamined. The great rivers of Europe, Asia, and Africa have in turn done service as the Pison and Gihon of Scripture, and there remains nothing but the New World wherein the next adventurous theorist may bewilder himself in the mazes of this most difficult question. Upon the question of the exact geographical position of Eden dissertations innumerable have been written. Many authors have given descriptive lists of them, with arguments for and against each. The most convenient presentation of their respective outlines has been reduced to a tabulated form, with ample illustrations, by the Rev. N. Morren (annexed to his translation of the younger Rosenmüller's *Biblical Geography of Central Asia*, p. 91-98, Edinb. 1836). He reduces them to nine principal theories, as follows (numbered as in the following table; comp. Kalsch, *Genes's*, p. 100 sq.)

i. The opinion which fixes Eden in *Armenia* we have placed first, because it is that which has obtained most general support, and seems nearest the truth. (See No. vi.) For if we may suppose that, while Cain moved to the East (Gen. iv, 16), the posterity of Seth remained in the neighborhood of the primeval seat of mankind, and that Noah's ark rested not very far from the place of his former abode, then Mount Ararat in Armenia becomes a connecting point between the antediluvian and post-diluvian worlds (Gen. viii, 4), and

Names.	I.	II.	III.	IV.	V.	VI.	VII.	VIII.	IX.
EDEN.	Armenia.	Korneh, in Babylonia.	Country near the Caspian Sea.	Bactria.	Syria.	Country between the Ganges and Nile.	Babian.	India.	Cashmere.
PISHON.	The Phasis.	Western mouth of the Shat el-Arab.	The Araxes.	The Sihon, or Jaxartes.	The Chyrosorhous.	The Ganges.	The Nilah, or Lesser Sind.	The Irabatti.	The Phasia.
GIHON.	The Araxes.	Eastern mouth of the Shat el-Arab.	The Oxus, or Jihun.	The Oxus, or Jihun.	The Orontes.	The Nile.	The Hirmend.	The Ganges.	The Oxus.

the names of the Phrat, Hiddekel, etc., would readily be given to rivers, which, after the great deluge, seemed to flow in channels somewhat corresponding to the Paradisiacal streams. The opinion in question was first systematically propounded by Reland, and is held by Calmet, and by his American editor, Prof. Robinson, who, however, understands by Cush, Chusistan. Prof. Stuart takes the Pishon for the Kur, and Cush for Cushi-Capech, i. e. the northern part of the region between the Caspian Lake and the Persian Gulf (*Heb. Christ* on Gen. ii, 10-14). The Cossæi, whom Reland finds in Cush, lived near Media, in the tract now called Dilem, south-west of the Caspian Sea. Link takes the Gihon for the Cur or Cyrus, and Cush for the Caucasus. Verbrugge coincides with Reland, except that he takes the Gihon to be the Gyndes, which flowed between Armenia and Matiana.

ii. This opinion was most elaborately defended by Huet, bi-shop of Avranches; but it is also maintained by Calvin, Bochart, Wells, Steph. Morinus, Vorst, etc. Hales was of this sentiment in the first edition of his *Chronology*, but in the second he follows the opinion of Reland. The Shat el-Arab is the name of the united streams of the Euphrates and Tigris. Ainsworth says, "It is probable that the united rivers emptied themselves into the gulf at this period (in ancient times) by several distinct mouths, of which the first or greatest was at Teredon, the Ostium Tigris Occidentale of Ptolemy, and the mouth of the Euphrates, according to Nearehus; the second was the Pasitigris of Pliny, probably the Shat el-Arab, and the Ostium Tigris Orientale of the Alexandrian geographer." Cush they compare with the Cutlia of 2 Kings, xvii, 24; and Havilah with the Chaulataioi of Eratosthenes in Strabo, xvi, 767. Grotius thinks the Pishon is the Pasitigris, and the Gihon the Nahr Malikah, or the Chaboras. Hottinger agrees with Grotius as to the Pishon, but takes the Gihon for the Nahr Sura. Hopkinson makes the Pishon and Gihon to be the two canals of the Euphrates, the Nahr Malikah, and the Nahr Sares or Sura.

iii. The celebrated Göttingen professor, J. D. Michaelis, originated this hypothesis, though he is doubtful as to some of the points. Gatterer, in the main, agrees with him, only he understands the Hiddekel to be the Indus, and takes the Pishon for the Phasis. Cush is found by Michaelis in the name of the city Cath or Caths, the ancient capital of Chowrasmia, on the Oxus or Jihun, near the site of Balkh. He refers to Quint. Curtius as speaking of the Cusæi or Cusitani being in Bactria upon the Oxus. Wahl sees Cush in the Khousti of Moses of Chorene, meaning the large province between the Caspian and Persian Seas, as far as the Indus and Oxus. The land of Havilah Michaelis connects with the tribe of Chwaliski or Chwalisses, from whom the Russians call the Caspian Sea the Chwalinskole More.

iv. This theory has been proposed by the eminent Orientalist Von Hammer. The Sihon, he says, rises near the town of Cha, and compasses the land of Ilah, famous for the gold and precious stones of Turkistan.

v. That Paradise was in Syria was the opinion of

the voluminous Le Clerc, in his valuable Commentary. Havilah is the tract mentioned in 1 Sam. xv, 7. Cush is Cassiotis or Mount Casius, near Seleucia in Syria. This opinion is shared by Lakemacher, who, however, takes the Pishon to be the Jordan. Heidegger thinks the Jordan was the great river of Paradise, an idea adopted by the paradoxical Hardouin, in his *Ereursus to Pliny's Nat. Hist.* lib. vi. Others, who place Eden in Arabia Felix, transform the Pishon into the Persian Gulf, and the Gihon into the Red Sea.

vi. This is perhaps the most ancient opinion of any, being found in Josephus (*Ant. i, 1, 3*), and in several of the fathers, e. g. Theophilus Autol, ii, 24; Epiphanius (*Epp. ii, 60*); Philostorgius in Nicephorus, *Hist. Eccl.* ix, 19, though the latter takes the Pishon for the Indian river Hyphasis. The editor of Calmet observes that "the inhabitants of the kingdom of Goiam call the Nile the Gihon." Cush is naturally taken for Ethiopia. This view is embraced by the celebrated Gesenius, with the exception that he maintains the Pishon to be the Indus; in this he is followed in the main by Prof. Bush, who likewise observes: "This view of the subject, it is admitted, represents the ancient Eden as a very widely extended territory, reaching from the Indus on the east to the Nile and the Mediterranean on the west, and including the intermediate countries. If the view above given of the topography of Eden be correct, it will be seen that it embraced the fairest portion of Asia, besides a part of Africa, comprising the countries at present known as Cabul, Persia, Armenia, Kurdistan, Syria, Arabia, Abyssinia, and Egypt. The garden, however, which is said to have been 'eastward in Eden,' was probably situated somewhere in the neighborhood of the Euphrates, perhaps not far from the site of Babylon, a region nearer its eastern than its western limits; but the exact position it is apparently vain to attempt to determine." Among the most thorough scholars, the contest seems now to lie mainly between this view and that in No. i.

vii. Captain Wilford, well known for his profound acquaintance with Hindû antiquities, advanced the present view, as being founded upon the Indian Puranas (*Asiatic Researches*, vi, 455, Lond. edit.). It was partly adopted by a late ingenious but fanciful writer, Mr. C. Taylor, editor of *Calmet's Dictionary*, who, however, makes the Pishon the Nilab; the Gihon, the western branch of the Oxus; the Hiddekel, the eastern; and the Phrat, the Hirmend.

viii. This and the following are given as specimens of the views of the modern German school of neology, which regards the whole narrative as a *myth*, similar to the Greek tradition of the Hesperides, the Islands of the Blessed, etc. Philip Buttmann is the author of the hypothesis under the present number. The Pishon he compares with the Besynga, which is mentioned by Ptolemy as the most considerable river of India east of the Ganges. Ava was early known as a region of gold; and an anonymous geographer, in Hudson's collection, vol. iii, speaks of the Eviltae or Evilæi as being near the Senes or Chinese.

ix. Another neological theory—the author, A. T.

Hartmann, who looks upon the description as a product of the Babylonish or Persian period. The idea of Eden being the far-famed vale of Cashmere had been anticipated by Herler in his work on the History of Mankind. Appropriate accounts of Cashmere may be found in the travels of Burnes and Jacquemont.

Many of the Orientals think that Paradise was in the island of Serendib or Ceylon; while the Greeks place it at Beth-Eden, on Lebanon.

These, indeed, are but a few of the opinions that have been propounded; yet, though many more might be added, it is to be observed that most of them have much in common, and differ only in some of the details. To enumerate the vagaries of German and other writers on this subject would be endless. (See Kitto's *Scripture Laws*, p. 1-8.) The fact is that not one of them answers to all the conditions of the problem. It has been remarked that this difficulty might have been expected, and is obviously probable, from the geological changes that may have taken place, and especially in connection with the Deluge. This remark would not be applicable, to the extent that is necessary for the argument, except upon the supposition before mentioned, that the earlier parts of the book of Genesis consist of primeval documents, even antediluvian, and that this is one of them. There is reason to think, however, that *since the Deluge* the face of the country cannot have undergone any change approaching to what the hypothesis of a post-diluvian composition would require. But we think it highly probable that the principal of the immediate causes of the Deluge, the "breaking up of the fountains of the great deep," was a subsidence of a large part or parts of the land between the inhabited tract (which we venture to place in E. long. from Greenwich, 30° to 50°, and N. lat. 25° to 40°) and the sea which lay to the south, or an elevation of the bed of that sea. See DELUGE.

As nearly as we can gather from the Scriptural description, Eden was a tract of country, the finest imaginable, lying probably between the 35th and the 40th degree of N. latitude, of such moderate elevation, and so adjusted, with respect to mountain ranges, and watersheds, and forests, as to preserve the most agreeable and salubrious conditions of temperature and all atmospheric changes. Its surface must therefore have been constantly diversified by hill and plain. In the finest part of this land of Eden, the Creator had formed an enclosure, probably by rocks, and forests, and rivers, and had filled it with every product of nature conducive to use and happiness. Due moisture, of both the ground and the air, was preserved by the streamlets from the nearest hills, and the rivulets from the more distant; and such streamlets and rivulets, collected according to the levels of the surrounding country ("it proceeded from Eden") flowed off afterwards in four larger streams, each of which thus became the source of a great river.

Here, then, in the south of Armenia, after the explanation we have given, it may seem the most suitable to look for the object of our exploration, the *site* of Paradise.

That the Hiddekel (this name is said to be still in use among the tribes who live upon its banks—Col. Chesney, *Exp. to Tigris and Euphrates*, i, 13) is the Tigris, and the Phrath the Euphrates, has never been denied, except by those who assume that the whole narrative is a myth which originated elsewhere, and was adapted by the Hebrews to their own geographical notions. As the former is the name of the great river by which Daniel sat (Dan. x, 4), and the latter is the term uniformly applied to the Euphrates in the Old Testament, there seems no reason to suppose that the appellations in Gen. ii, 14 are to be understood in any other than the ordinary sense. One circumstance in the description is worthy of observation. Of the four rivers, one, the Euphrates, is mentioned by name only,

as if that were sufficient to identify it. The other three are defined according to their geographical positions, and it is fair to conclude that they were therefore rivers with which the Hebrews were less intimately acquainted. If this be the case, it is scarcely possible to imagine that the Gihon, or, as some say, the Pison, is the Nile, for that must have been even more familiar to the Israelites than the Euphrates, and have stood as little in need of a definition.

But the stringent difficulty is to find any two rivers that will reasonably answer to the predicates of the Pishon and the Gihon, and any countries which can be collocated as Havilah and Cush. The latter name, indeed, was given by the Hebrews and other Orientals to several extensive countries, and those very distant both from Armenia and from each other. As for Havilah, we have the name again in the account of the dispersion of the descendants of Noah (chap. x, 29); but whether that was the same as this Havilah, and in what part of Asia it was, we despair of ascertaining. Reland and others, the best writers upon this question, have felt themselves compelled to give to these names a comprehension which destroys all preciseness. So, likewise, the meaning of the two names of natural products can be little more than matter of conjecture—the *bedolach* and the stone *shoham*. The former word occurs only here and in Num. xi, 7. The Septuagint, our oldest and best authority with regard to terms of natural history, renders it, in our passage, by *anthrax*, meaning probably the ruby, or possibly the topaz; and in Numbers by *crystallos*, which the Greeks applied not merely to rock-crystal, but to any finely transparent mineral. Any of the several kinds of odoriferous gum, which many ancient and modern authorities have maintained, is not likely, for it could not be in value comparable to gold. The pearl is possible, but not quite probable, for it is an animal product, and the connection seems rather to confine us to minerals; and pearls, though translucent, are not transparent as good crystal is. Would not the diamond be an admissible conjecture? The *shoham* occurs in ten other places, chiefly in the book of Exodus, and in all those instances our version says onyx; but the Septuagint varies, taking onyx, sardius, sardonius, beryl, prase-stone, sapphire, and smaragdus, which is a green-tinctured rock-crystal. The preponderance seems to be in favor of onyx, one of the many varieties of banded agate; but the idea of *value* leads us to think that the emerald is the most probable. There are two remarkable inventories of precious stones in Exod. xxxix, 10-13, and Ezek. xxviii, 13, which may be profitably studied, comparing the Septuagint with the Hebrew. See HAVILAH. For attempted identifications of the Pison and Gihon, see those names respectively.

IV. For the *Literature* of the subject, see PARADISE.

2. (גֶּזֶן, Sept. Ἐδέμ, but omits in Isa. xxxvii, 12, and Ezek. xxvii, 23; Vulg. *Eden*), one of the marts which supplied the luxury of Tyre with richly embroidered stuffs. It is associated with Haran, Sheba, and Asshur; and in Amos i, 5, Beth-Eden, or "the house of Eden," is rendered in the Sept. by *Charran* (Χαῖρᾶν). In 2 Kings xix, 12, and Isa. xxxvii, 12, "the sons of Eden" are mentioned with Gozan, Haran, and Rezep, as victims of the Assyrian greed of conquest. Telassar appears to have been the head-quarters of the tribe; and Knobel's (*Comm. on Isaiah*) etymology of this name would point to the highlands of Assyria as their whereabouts. But this has no sound foundation, although the view which it supports receives confirmation from the version of Jonathan, who gives חֶדְרֵי (*Chudb*) as the equivalent of Eden. Bochart proved (*Phaleg*, pt. i, p. 274) that this term was applied by the Talmudic writers to the mountainous district of Assyria, which bordered on Media, and was known as *Adiabene*. But if Gozan be Gausanitis in Meso-

potamia, and Haran be Carrhæ, it seems more natural to look for Eden somewhere in the same locality. Keil (*Comm. on Kings*, ii, 97) thinks it may be *Ma'don*, which Assemani (*Bibl. Or.* ii, 224) places in Mesopotamia, in the modern province of Diarbekr. Bochart, considering the Eden of Genesis and Isaiah as identical, argues that Gozan, Haran, Rezep, and Eden are mentioned in order of geographical position, from north to south; and, identifying Gozan with Gausanitis, Haran with Carrhæ, a little below Gausanitis on the Chabor, and Rezep with Receph, he gives to Eden a still more southerly situation at the confluence of the Euphrates and Tigris, or even lower. According to him, it may be *Addan* or *Addana*, which geographers place on the Euphrates. Michaelis (*Suppl.* No. 1826) is in favor of the modern *Aden*, a port of Arabia (called by Ptolemy Ἀραβίαις ἐμπορίων), as the Eden of Ezekiel. —Smith, s. v. See VEDAN.

3. (יֶדֶן, Amos i, 5, "house of Eden"). See BETH-EDEN.

4. (Sept. Ἰωάν v. r. Ἰωαῶμ.) Son of Joab, and one of the Gershonite Levites who assisted in the reformation of public worship under Hezekiah (2 Chron. xxix, 12). B.C. 726. He is probably the same with the Levite appointed in the same connection one of the superintendents of the distribution of the free-will offerings (2 Chron. xxxi, 15, Sept. Ὅδομ v. r. ῥῶδων).

**Edenius**, **JORDAN NICOLAS**, a Swedish theologian, was born in 1624, and became professor of theology at Upsal in 1659. He died in 1666, leaving, among other works, *Dissertationes theologice de Christiana religionis veritate* (Abo, 1664): — *Epitome historice ecclesiasticæ*, published by bishop Gezelius at Abo in 1681. —Hoefer, *Nouv. Biog. Générale*, xv, 647.

**E'der** (Heb. יֶדֶר, a flock, as often), the name of a place and also of a man. See EDAR; ADER.

1. (Sept. Ἐδραῖν, Vat. MS. omits; Vulg. *Eder*.) A city in the extreme south of Judah, on the Idumean border, mentioned between Kabzeel and Jagur (Josh. xv, 21); therefore, doubtless, one of those afterwards assigned to Simeon. Schwarz suggests (*Palest.* p. 99) that it may be the same with ARAD (q. v.), by a transposition of letters; but this is doubtful. Possibly it was situated on the eminence north of the fountain marked as "water" on Van de Velde's *Map*, in wady el-Ernez, S. W. of the Dead Sea.

2. (Sept. Ἐδῶν, Vulg. *Eder*.) The second named of the three "sons" (i. e. descendants) of Mushi appointed to the Levitical offices in the time of David (1 Chron. xxiii, 23; xxiv, 30). B.C. 1013.

**E'dès** (rather *Ebis*, Ἰεῖαῖς, Vulg. *Esmi*), one of the "sons of Ethma," who had married foreign wives after the captivity (1 Esdr. ix, 35); evidently the *Jadai* (q. v.) of the Heb. list (Ezra x, 43).

**Edessa** (modern name *Urshû* or *Orfu*; Armenian name *Edessia*; Arab. *Er-Rohî*; Syrian, *Urhoi*), an ancient city of Mesopotamia, 78 miles S.W. from Diarbekir. An old legend attributes its origin to Nimrod, or to Khabiba, a female contemporary of Abraham. The Targums (followed by Jerome and Ephrem Syrus) make it the *Erech* of Gen. x, 10. Another tradition (Jewish and Arabic) makes it *Ur of the Chaldees* (Gen. xi, 28). "With the conquest of Persia by the Greeks the history of Edessa first becomes clear. Seleucus, in particular, is said to have done much for the aggrandizement of the city. Christianity was introduced into Edessa at an early period. In the reign of Trajan the place was made tributary to Rome, and in A.D. 216 became a Roman military colony, under the name of *Colonia Marcia Edessenorum*. During this period its importance in the history of the Christian Church continued to increase. More than 300 monasteries are said to have been included within its walls. With the extension of the religion of Islam,

Edessa fell into the hands of the Arabian caliphs. Christianity declined, and wars at home and abroad during the caliphate destroyed likewise its temporal splendor and prosperity, till, in 1040, it fell into the possession of the Seljuk Turks. The Byzantine emperors succeeded in recovering Edessa, but the viceroy contrived to make himself independent. He was, however, hard pressed by the Turks, and this rendered it easy for the crusader Baldwin, the brother of Godfrey of Bouillon, to gain possession of the city (A.D. 1097), and make it the capital of a Latin principality, and the bulwark of the kingdom of Jerusalem. Under the Frankish princes, Edessa held out valiantly against the Mussulmans, till at length Zengi, ruler of Mosul, succeeded in taking the town and citadel in the year 1144, when all the Christian churches were converted into mosques. After many vicissitudes, in the course of which Edessa fell successively into the hands of the sultans of Egypt, the Byzantines, the Mongols, Turkomans, and Persians, the city was finally conquered by the Turks, and has ever since formed a portion of the Turkish dominions. The population is variously estimated at from 25,000 to 50,000, of whom 2000 are Armenian Christians. The Jacobites, in the last century, had 150 houses and a church. The rest are Turks, Arabians, Kurds, and Jews. Edessa is regarded by the Easterns as a sacred city, because they believe it to have been the residence of Abraham" (Chambers, *Encyclopædia*, s. v.). It is still the seat of a Greek archbishop and an Armenian bishop. A dialect of the Aramaic is still spoken at Edessa (comp. Etheridge on the *Aramaic Dialects*, p. 10).

The report of the introduction of Christianity by king Abgar (q. v.), a contemporary of Christ, is probably an unfounded legend; but it is certain that Christianity became firmly rooted in Edessa at a very early period. The twenty-sixth Osrhoënian king (152-187) was, if not a Christian himself, a patron of Christianity, and the Gnostic Bardesanes is said to have been highly esteemed by him. Edessa was an early episcopal see, and in the 4th century became the chief seat of Syrian ecclesiastical learning. The emperor Julian threatened to distribute the large treasure of the churches of Edessa among his soldiers, but his death saved the churches from the execution of this threat. In 363, Ephrem (q. v.), the Syrian, came from Nisibis to Edessa, and by his preaching, teaching, and prolific writings, greatly distinguished himself in the defence of the orthodox doctrines of the Church. After the death of Ephrem, the Arians took possession of all the churches of Edessa, but after five years the ascendancy of the orthodox school was restored. Different from the Edessene school established by Ephrem was the Persian school at Edessa, which was intended to be a seminary for the Christian subjects of the Persian king. It attained its highest prosperity in the time of Ephrem, became subsequently a stronghold of Nestorianism, and was on that account dissolved in 489. — Herzog, *Real-Encykl.* iii, 645; Wetzer und Welte, *Kirchen-Lex.* iii, 391; *Chronicon Edessenum*, in Assemani, *Biblioth. Oriental.* i, 387-428; Cureton, *Ancient Syriac Documents relative to Edessa*, etc. (Lond. 1866); Etheridge, *The Syrian Churches* (Lond. 1846), p. 35 sq. See NESTORIANS.

**Edgar, John, D.D.**, a Presbyterian minister of Ireland, was born in County Down, Ireland, in 1797, and entered the ministry in 1820. His life from the outset of his ministry in 1820 was one of ceaseless toil. "His energy of character was immense, and his name became a tower of strength to all the Christian enterprises with which he was identified. Upon the union of Presbyterians in 1840 he was made one of the professors of Divinity for the Assembly, and the influence he wielded over its students was very great, and he put forth strenuous and successful efforts for the erection and equipment of its theological college in Belfast. He fired the hearts of his students with his own

zeal in the work of the evangelization of their country, and spent much of his vacation in personal labors for it. His spirit in church extension was remarkable. His last great effort was in undertaking to raise about \$100,000 for erecting additional manse among the churches. By far the greater part of this had been secured before his death." At least fifty of the houses of worship belonging to the Presbyterian Church in Ireland owe their existence to his persevering efforts. He died in Dublin August 26, 1866. See Killen, *Memoirs of John Edgar* (Belfast and London, 1867); *American Annual Cyclopaedia* for 1866, p. 277.

**Edgar, John Todd, D.D.**, a Presbyterian minister, was born in Sussex County, Delaware, April 13, 1792. With the proverbial love for knowledge of the Scotch-Irish, his parents gave him the best education that could be obtained in Kentucky, to which state they removed soon after his birth. He graduated at Princeton in 1816, and was licensed by the New Brunswick Presbytery. In 1817 he was ordained pastor of the church at Flemingsburg, Ky. He was thence called to Maysville, where he labored unremittingly. In 1829 he was induced to accept a call from the church at Frankfort, Ky, where his eloquence soon gathered around him the leading men of the state. Henry Clay said of him, "If you want to hear eloquence, listen to John T. Edgar." In 1833 he became pastor of the First Presbyterian Church in Nashville, Tenn., and continued to discharge the duties of that office with great fidelity and success up to the year 1859, when an assistant was appointed to aid him. He was distinguished for power in the pulpit, and for a degree of liberality of feeling and public spirit which caused him to be regarded as belonging rather to the whole community than to his particular church. Mr. Edgar wrote little, though at one time he was editor of the *American Presbyterian*, published at Nashville. He died suddenly of apoplexy Nov. 13, 1860.

**Edge**, with reference to the sword, is the rendering of  $\text{פֶּה}$ , *peh*, *mouth* (like  $\sigma\tau\omicron\mu\alpha$ , Luke xxi, 24; Heb. xi, 34), or fem.  $\text{פֶּיחַ}$ , *peyah'* (Judg. iii, 16); also  $\text{פָּנִים}$ , *panim'*, *face* (Eccles. x, 10); poet.  $\text{צֶרֶף}$ , *tsur*, a *rock*, hence *sharpness* (Psa. lxxxix, 43); elsewhere, in the sense of *brink* or *margin*; it corresponds to  $\text{שֶׁפָּרַח}$ , *saphah'*, *lip*; and to  $\text{קֵצֶה}$ , *katsah'*,  $\text{קֵצֶה}$ , *kasteh'*, or  $\text{קֵצֶה}$ , *katsveh'*, *extremity* (Exod. xxviii, 7; xxxix, 4; xiii, 20; xxvi, 5; xxxvi, 12; Num. xxxiii, 6, 37; Josh. xiii, 27; Psa. xxxix, 4). To "set on edge" is an inaccurate rendering (Jer. xxxi, 29, 30; Ezek. xviii, 2) of  $\text{קָהַח}$ , *kahah'*, to be *blunt* (as in Eccles. x, 10). See **SWORN**.

**Ed(d)ias** ( $\text{Ἰεῦδιαι}$ , Alex. MS.  $\text{Ἰεῦδιαι}$ , Vulg. *Geddi-as*), the second named of the "sons of Phul," who took foreign wives after the captivity (1 Esdr. ix, 26); evidently the JEZIAH (q. v.) of the Heb. list (Ezra x, 25).

**Edict**, the technical name of a paper read in Presbyterian churches in Scotland, "as a species of guard on the purity of the Christian ministry. It is a public invitation to all who can say anything against the minister elect to come forward for the purpose. The form of the document authorized by the United Presbyterian Church is as follows: 'Whereas the presbytery of \_\_\_\_\_ of the United Presbyterian Church have received a call from this congregation, addressed to A. B., preacher (or minister) of the Gospel, to be their minister, and the said call has been sustained as a regular Gospel call, and been accepted of by the said A. B., and he has undergone trials for ordination; and whereas the said presbytery having judged the said A. B. qualified for the ministry of the Gospel and the pastoral charge of this congregation, have resolved to proceed to his ordination on the \_\_\_\_\_ day of \_\_\_\_\_, unless something occur which may reasonably impede it, notice is hereby given to all concerned that if they, or

any of them, have anything to object why the said A. B. should not be ordained pastor of this congregation, they may repair to the presbytery, which is to meet at \_\_\_\_\_ on the said \_\_\_\_\_ day of \_\_\_\_\_; with certification, that if no valid objection be then made, the presbytery will proceed without further delay. By order of the presbytery.'"—Eadie, *Eccles. Cyclopaedia*, s. v.

**Edict of Nantes.** See NANTES; FRANCE, REFORMED CHURCH OF.

**Edicts, Imperial.** See PERSECUTIONS.

**Edification**, "the process by which believers are built up, that is, progressively advanced in knowledge and holiness. (1.) The 'sacred writers perpetually employ this figure as their favorite illustration of the condition of Christians, as forming collectively the temple, succeeding that literal one on Mount Zion; the temple in which the Lord dwells by his holy Spirit; and as being, individually, 'living stones, builded up into an habitation for the Lord.'" 'The words 'edify' and 'edification' have so completely lost their literal signification in our tongue, that it would be reckoned even an impropriety to use them in speaking of the building of a literal edifice, and thus the reader loses the force and significance of the language of the sacred writers.' The word 'edify,' especially when applied to individual Christians, has often the sense of *instruct*; though in the 'Preface to the 'Order of Confirmation' in the English Prayer-book, 'To the end . . . . to the more edifying,' the word is probably used in the sense already explained, not in the especial sense of 'instruct' (Eden).

(2.) "To perceive the full force and propriety of the term as used by the apostles, it is quite necessary to keep in mind the similitudes by which they generally describe a Christian church. All those spiritual gifts, which were bestowed on the Christians were for the building and edifying of the members of the Church. The apostolical power in Church censures was for edification, not for destruction (2 Cor. x, 8); to build, and not to pull down; that is, to preserve the unity of the Church entire, and its communion pure. And we may observe that this edification is primarily applied to the Church; that the Church may receive edifying; that ye may excel to the edifying of the Church; for the edifying of the body of Christ (1 Cor. xiv, 5, 12; Ephes. iv, 12). And it is very observable wherein the apostle places the edification of the body of Christ, viz. in unity and love: till we all come in the unity of the faith, and of the knowledge of the Son of God, to a perfect man, unto the measure of the stature of the fullness of Christ (Ephes. iv, 12, 13). Till we are united by one faith unto one body, and perfect man. And speaking the truth in love, may grow up into him in all things, which is the head, even Christ; from whom the whole body fitly joined together, and compacted by that which every joint supplieth, according to the effectual working in the measure of every part, maketh increase of the body unto the edifying of itself in love (Ephes. iv, 15, 16). This is an admirable description of the unity of the Church, in which all the parts are closely united and compacted together, as stones and timber are to make one house; and thus they grow into one body, and increase in mutual love and charity, which is the very building and edification of the Church, which is edified and built up in love, as the apostle adds, that knowledge puffeth up, but charity edifieth (1 Cor. viii, 1). This builds up the Church of Christ; and that not such a common charity as we have for all mankind, but such a love and sympathy as is peculiar to the members of the same body, and which none but members can have for each other" (Hook, *Ch. Dict.* s. v.).

(3.) "Many professors, and even teachers of religion, not greatly liking such union and its obvious consequences, yet finding much said in the New Testament of the attainments and comforts of the first Christians have studied to devise means of enjoying these com

forts separately. Instead of the objects that chiefly drew the attention of the first believers, they have endeavored to fix the attention of Christians on a multitude of rules respecting the particular conduct of each in his devout exercises, his attendance on ordinances, and the frame of his heart therein. But this is a scheme of religion of mere human device. Nothing can be plainer from the whole tenor of the Acts of the Apostles, and their epistles to the churches, than that it is the will of Christ his disciples should unite together, holding fellowship in the institutions of the Gospel; and also that, as he in his infinite wisdom and grace has made abundant provision for their comfort, establishment, and edification, so these blessings can only be effectually enjoyed in proportion as they obey his will in this respect" (Buck, *Theol. Dictionary*, s. v.).

**Edifice.** See ARCHITECTURE; HOUSE; TEMPLE; CHURCH.

**Eðilthryda** or **Etheldrida**, St., daughter of the Anglo-Saxon queen Anne. She made a vow of chastity in her youth, but was afterwards compelled to marry earl Tondbert, who, at her request, respected her vow. After his death she desired to retire to the island of Ely, but was eventually obliged to marry Egfrid, son of the king of Northumbria. This marriage was dissolved, and in 671 she retired to the convent of Coldingham, and afterwards to the island of Ely, where she erected a convent, of which Wilfrid named her abbess. Here she led a life of asceticism until her death in 679.—Herzog, *Real-Encykl.* iii, 618; Butler, *Lives of Saints*, June 23.

**Edinburgh**, the capital of Scotland, and seat of a bishop of the Scotch Episcopal Church. The diocese of Edinburgh had in 1867 24 churches, 2 missions, 33 clergymen, and 20 schools. The population of the city was, in 1861, 168,098. Edinburgh is also the seat of a Roman Catholic vicar apostolic, whose district had in 1860 about 60 parishes and 70,000 Roman Catholics. See *Churchman's Calendar for 1868*; Neher, *Kirchl. Geogr.* i, 103. (A. J. S.)

**Editions, PRINTED, OF THE ORIGINAL TEXTS OF THE BIBLE.** See SCRIPTURES, HOLY; CRITICISM, BIBLICAL.

**Edmund I** of England, king and martyr, succeeded in 855, when but fifteen years of age, to his father Offa, king of the East Angles. Edmund reigned in meekness, and his whole life was a preparation for martyrdom. About 870 the heathen Danes invaded the kingdom, and, after violating the nuns, killing the priests, and laying waste the country, made him a prisoner. Unwilling to offend God by submitting to the terms of his captors, he was tortured, and finally beheaded (870). In 1122 his anniversary was placed among the English holidays, and the kings of England took him for patron. See his *Life* by Abbo, and another by John Lydgate.—Herzog, *Real-Encykl.* iii, 618.

**Edmund, St.**, EDMUND RICH, archbishop of Canterbury in the thirteenth century, studied at Paris, where he became doctor of theology. Returning to England, he preached for the Crusades with such success as to command the approval of the Pope. He was consecrated archbishop of Canterbury April 2, 1234. It fell to his lot as prelate to resist the will of the Pope, and also that of the king of England, and he did resist manfully. He died at the monastery of Soissy, in France, Nov. 16, 1242. The English people, who admired and loved him, demanded his canonization; the papal court at first refused, but finally yielded, and he was canonized by pope Innocent IV in 1249. His *Speculum Ecclesie* is published in the *Bibliotheca Patrum*.—Hofer, *Nouv. Biog. Générale*, xv, 660; Hook, *Lives of the Archbishops of Canterbury* (1865, vol. iii); Wright, *Biographia Literaria* (Anglo-Norman period).

**Ed'na** (עֲדָנָה, i. e. עֲדָנָה, *pleasure*; Vulg. *Anna*), the wife of Ragnel and mother of Sara, the bride of Tobias (Tob. vii, 2, 8, 14, 16; x, 12; xi, 1).

**E'dom** (Heb. *Edom'*, עֲדוֹם or עֲדוֹמִים, so called from his red hair, Gen. xxv, 25, or from the red potage for which he bartered his birthright, ver. 30; Sept. *Ἐδῶμ*), the later name of Isaac's son, elder twin-brother of Jacob; more frequently called **ESAU** (q. v.). See also **OBEDE-EDOM**.

**EDOM** (Sept. *Ἰδομαία*) stands also collectively for the *Edomites*, the posterity of Edom or Esau; and likewise for their country. See **EDOMITE**.

**E'domite** (Heb. *Adomi'*, עֲדוֹמִי, Sept. *Ἰδομαίος*, fem. plur. *Ἰδομαίαι*, 1 Kings xi, 1, Sept. *Ἰδομαία*; but usually *עֲדוֹם*, *Edom*, put collectively for the Edomites). The name Edom (fully written *עֲדוֹם*, *red*; see Gesenius, *Heb. Thesaur.* i, 26) was originally the secondary name of Esau (Gen. xxv, 30, comp. ver. 25; xxxvi, 8), but is used ethnographically in the O. T., his descendants ("children of Edom," *בְּנֵי עֲדוֹם*) being the race who had settled in the south of Palestine, and who at a later period came into conflict with the kindred nation of the Israelites (Deut. xxiii, 7; Num. xx, 14). Comparatively seldom are the appellations *children of Esau* (Deut. ii, 4, 8; 1 Macc. v, 3), *house of Esau* (Obad. 18), *mount Esau* (Obad. 8, 9, 19, 21), or simply *Esau* (Jer. xlix, 8, 10; Obad. 6), used in Scripture for the Edomites or Idumæa; the people and country are often called merely *Edom* (Num. xxiv, 18; Josh. xv, 1; 2 Sam. viii, 14; 1 Kings xi, 14; and especially by the prophets), hence, more fully, *land of Edom* (Gen. xxxvi, 16, 21; Num. xxxiii, 37), or *field of Edom* (Gen. xxxii, 3; Judg. v, 4). The territory of the Edomites was mountainous (Obad. 8, 9, 19, 21), situated at the southern (Josh. xi, 17; xii, 7), i. e. south-eastern border of Palestine (Num. xxxiv, 5), or more particularly of the tribe of Judah (Josh. xv, 1, 21), in the neighborhood of the Moabites (Judg. xi, 18; Isa. xi, 14; 2 Kings iii, 8), and was properly called the land or mountain of *Seir* (עֵיִר, Gen. xxvi, 20; xxxii, 4; Josh. xxiv, 2; Ezek. xxxv, 3, 7, 15; comp. Deut. ii, 4, 29). See **SEIR**. Lofty and intersected by chasms in the rocks, it formed a natural fastness (Jer. xlix, 16 sq.; Obad. 3 sq.), yet it was by no means unfruitful (Gen. xxvii, 30). It contained, among other cities, the famous rock-hewn Sela (2 Kings xiv, 7), and extended from the Ælantic Gulf to the Red Sea (1 Kings ix, 26; 2 Chron. viii, 17). Hence it admits of no doubt that the cleft and craggy region traversed by fruitful valleys, now called *el-Shira*, which stretches from the southern extremity of the Dead Sea to the eastern arm of the Red Sea, and is separated on the west by the long sandy plain el-Ghór from the desert et-Tib (Sectzen, xviii, p. 90, 434; Burekhardt, *Trav.* ii, 683), and bounded on the north by the wady el-Ahsa, which separates it from the land of Moab, near Kerak, in the district of Jebel, is the ancient land of Edom, as Saadias has long ago perceived, for he renders Seir in Gen. xxxvi, 8 by the same Arabic name SHERA (comp. Raumer in Berghaus's *Annal. d. Erd. u. Völkerkunde*, i, 562 sq.). See SELA; TEMAN; UZ; BOZRAH. According to the division in Greek authors, the territory of Edom, *Idumæa* (Ἰδομαία, a name evidently derived from the Heb.), was reckoned as a part of Arabia Petraea (see Anthon's *Class. Dict.* s. v.). The early inhabitants of Mount Seir, who were called *Horites*, were destroyed by the Edomites (Deut. ii, 12, 22), or rather supplanted and absorbed by them. See **HORITE**. Already, in the time of Moses, the Edomites showed a hostile feeling towards the Israelites by forbidding them to pass through their territories, and thus subjecting them to the hardship of journeying around it (Num. xx, 15-21; xxi, 4; comp. Judg. xi, 17 sq.; see Hengstenberg, *Pent.* ii, 283); an act which Saul successfully

avenged (1 Sam. xiv, 47), while David subjugated them (2 Sam. viii, 14; comp. 1 Kings xi, 15 sq.; Psa. lx, 2, 10), and his successor Solomon fitted out a merchant fleet in the Edomitish harbors (1 Kings ix, 26), although under his reign a partially successful revolt took place (1 Kings xi, 14 sq.). In the division of the Hebrew commonwealth the Edomites continued under the sway of Judah (probably by means of viceroys, 2 Kings iii, 9, 12, 26; but compare 1 Kings xxii, 48; 2 Kings viii, 20), so that their ports were at the disposal of Jewish commerce to the time of Joram (1 Kings xxii, 49), under whose reign (B.C. 885) they threw off their allegiance (2 Kings viii, 20), and maintained their independence by force of arms against several succeeding princes of the weak kingdom of Judah (2 Kings viii, 21). Amaziah (2 Kings xv, 7; 2 Chron. xxv, 11), in B.C. cir. 836, and also Uzziah (2 Kings xv, 22; 2 Chron. xxv, 11), in B.C. cir. 802, again reduced the Edomites to subjection; but under Ahaz (B.C. cir. 738) they invaded Judæa (2 Chron. xxviii, 17), while, at the same time, the harbor of Elath was wrested from the Jewish dominions by the Syrians (2 Kings xvi, 6). From this time forward, the Edomites, favored by the increasingly formidable attitude of Assyria, and later of Chaldaea, remained in merely nominal connection with the kingdom of Judah, enjoying real independence, until they too at last were forced to succumb to the Chaldaean power (Jer. xxvii, 3, 6). The early prophets, nearly contemporary with these events, had already announced Judah's future triumph over these rebellious subjects and persistent enemies (Isa. xi, 14; Joel iii, 19; Amos i, 11); but, after they had made common cause with the foes of Israel at the capture of Jerusalem (Ezek. xxxv, 15; xxxvi, 5; Obad. 10, 13 sq.), the denunciations of the prophets became still more decisive (Jer. xlix, 8, 20; Lam. iv, 21 sq.; Ezek. xxv, 12 sq.—compare 35; Obad. pass.; Psa. cxxxvii, 7; comp. Isa. xxxiv, 5 sq.; lxiii, 1 sq.). The Edomites, it is true, likewise felt the ravages of the Chaldaean march (Mal. i, 3 sq.), but they were left in their own land (in opposition to the view of Eichhorn, *Hebr. Proph.* ii, 618, 624; Bertholdt, *Einleit.* iv, 1440, 1626, who maintain that the Idumæans were politically annihilated by Nebuchadnezzar; see Gesenius, *Comm.* on Isa. i, 906: nor are the predictions of the utter desolation of Edom, e. g. Jer. xlix, 17 sq., to be pressed to their extreme fulfilment; see Heinrich, *De Idumæa ejusque vastatione*, Lips. 1782), and they even rent away a portion of southern Palestine (comp. Ezek. xxxv, 10), including the town of Hebron (1 Macc. v, 65). During the Syrian rule they continued to evince their old ill will against the Jews (1 Macc. v, 3, 65; 2 Macc. x, 15; xii, 32 sq.), until they were wholly subdued by John Hyrcanus (B.C. cir. 129), and, by a compulsory circumcision, were merged in the Jewish state (Josephus, *Ant.* xiii, 9; xv, 7, 9; comp. *War.* iv, 5, 5; yet they were invidiously termed *half-Jews*, *Ant.* xiv, 15, 2). From that time Idumæa continued under a Jewish prefect (σπαρταγός, Joseph. *Ant.* xiv, 1, 3). One of these, Antipater, managed so to ingratiate himself with the Jewish court, and, during the disputes concerning the Macabæan succession, yielded the procuratorship of all Judæa, with which the friendship of the emperor had invested him, with such efficiency (B.C. 47), that he eventually secured the supreme power instead of Hyrcanus II (Joseph. *Ant.* xiv, 8, 5). His son Herod became the acknowledged king of the Jews, and founded an Idumæan dynasty in Palestine. Idumæa formed a province of his dominions, and was under the administration of a special governor (ἀρχων, Joseph. *Ant.* xv, 7, 9). Concerning the farther history of this people, we can here only remark, that the Idumæans in the last Jewish contest acted the same ruinous part with the Jews themselves (Joseph. *War.* iv, 4, 1 and 5; vii, 8, 1). The name of Edom or Edomite is to this day hateful to the Jews (Otho, *Lex. Rab.* p. 196; Lightfoot, *Hor. Heb.* p. 693). From the time of

the overthrow of the Jewish nation, the name of Idumæa no longer occurs, but passes away in the wider denomination Arabia (comp. Steph. Byz. p. 334, 341; Strabo xvi, 760, 749); since already for a long period the southern part of the ancient land of the Edomites was reckoned, together with its metropolis Petra, to Arabia, and entitled separately from (the Jewish province) Idumæa (Joseph. *Ant.* xiv, 1, 3; xvii, 3, 2; *War.* i, 13, 8); so that Idumæa, while on the north it included in addition a Jewish district (comp. the term Idumæan for Jew, especially among the Roman poets, Celsii *Hierob.* ii, 469 sq.), at the same time was contracted in its southern boundary (comp. Ptol. v, 16, 10; v, 17; Strabo, xvi, 760; Jerome in *Obad.* 1); but this does not affect Biblical geography, and it would be difficult to reduce the point to full historical and topographical clearness (see Reland, *Palæst.* p. 69 sq.). See ARABIA; PETRA.

The form of government among the Edomitish people was, like that of surrounding nations, tribal (comp. Gen. xxxvi, 15 sq.), yet they originally (or at least earlier than the Israelites) had kings (Gen. xxxvi, 32 sq.; Num. xx, 14; see Tuch on Gen. xxxvi, 9 sq.; Bertheau, *Israel. Gesch.* p. 207), who appear to have been freely chosen from among the clan-chieftains (princes, Gen. xxxvi, 40; Ezek. xxxii, 29; comp. Isa. xxxiv, 12, and Gesenius, in loc.; Hengstenberg, *Pent.* ii, 299 sq.), until (in the time of Solomon) a hereditary dynasty had established itself (1 Kings xi, 14 sq.). While the country remained under Israelitish sway, the native royal government was nearly superseded (1 Kings xxii, 48); although under Jehoshaphat mention is made (2 Kings iii, 9, 26) of a king (viceroy) of the Edomites (in alliance with him), and from this time they seem to have had an uninterrupted line of kings (Amos ii, 1; Jer. xxvii, 3; Ezek. xxxii, 29). The principal mode of livelihood and employment of the Edomites were commerce by land by means of caravans (Heeren, *Ideen*, i, 1, p. 107; Lengerke, *Ken.* i, 298; compare Ezek. xxviii, 16, where, however, the true reading is *Aram*; see Hävernick in loc.), probably to Elath and Ezion-geber, on the Red Sea; the raising of cattle, agriculture, and the cultivation of vines (Num. xx, 17; Ezek. xxv, 13); according to Jerome (*Onom.* s. v. Fenon), also mining (see C. G. Flade, *De re metall. Mōtanit., Edomit., et Phœnic.*, Lips. n. d.). Respecting their religion the Old Test. is entirely silent, except that it was some form of polytheism (2 Chron. xxv, 20); Josephus (*Ant.* xv, 7, 9) mentions one of their gods by the name of Coze (Κοζῆ, ἡ Πύξῆ), the *destroyer or ender*; see Hitzig, *Philist.* p. 265; and comp. Epiphani. *Her.* 55; Lengerke, *Ken.* i, 298). From the earliest times the wisdom of the Edomites, namely, of the Temanite branch, was celebrated (Obad. 8; Jer. xlix, 7). See Uz. (On the subject generally, see Van Iperen, *Hist. crit. Edomæor. et Amalck.* Leonard. 1768; Hoffmann, in the *Hull. Encyclop.* II, xv, 146). —Winer, i, 292. See IDUMÆA.

Ed'rei (Heb. *Edr'ei*, עֲדְרַי, *mighty*; Sept. Ἐδραεῖν and Ἐδραῖν), the name of two cities.

1. One of the metropolitan towns (Ashtaroth being the other) of the kingdom of Bashan, beyond the Jordan (Josh. xii, 4, 5; xiii, 12; Dent. xiii, 10). It was here that Og, the gigantic king of Bashan, was defeated by the Israelites, and lost his kingdom (Num. xxi, 33-35; Dent. i, 4; iii, 1-8). Edrei afterwards belonged to eastern Manasseh (Josh. xiii, 31; Num. xxxii, 33). It is probable that Edrei did not remain long in possession of the Israelites. May it not be that they abandoned it in consequence of its position within the borders of a wild region infested by numerous robber bands? The Lejah is the ancient Argob, and appears to have been the stronghold of the Geshurites; and they perhaps subsequently occupied Edrei (Josh. xii, 4, 5). It was the seat of a bishop in the early ages of Christianity (Reland, *Palæst.* p. 517), and a bishop of

*Adraa* sat in the Council of Seleucia (A.D. 381) and of Chalcedon (A.D. 451). In A.D. 1142 the Crusaders under Baldwin III made a sudden attack upon *Adraa*, or *Adratum*, then popularly called also *Civitas Bernardi de Stampis*, but they encountered such obstacles in the difficult nature of the ground, the scarcity of water, and the valor of the inhabitants, that they were compelled to retreat (Will. Tyr. p. 895, 896, 1031). Abulfeda calls it *Adsvaat* (*Tab. Syr.* 79).

There are two ancient towns in Bashan which now claim the honor of being the representatives of Edrei. The one is called *Edhra*, and is situated on the south-west angle of the rocky district of Lejah, the Argob of the Hebrews, and the Trachonitis of the Greeks. The ruins of *Edhra* are among the most extensive in Hauran. The site is a strange one. It is a rocky promontory projecting from the Lejah [see TRACHONITIS], having an elevation of some thirty feet above the plain, which spreads out beyond it smooth as a sea, and of unrivalled fertility. The ruins are nearly three miles in circuit, and have a strange, wild look, rising up in black shattered masses from the midst of black rocks. A number of the ancient houses still remain, though half buried beneath heaps of more modern ruins. Their walls, roofs, and doors are all of stone; they are low, massive, and simple in plan; and they bear the marks of the most remote antiquity. Some of them are doubtless as old as the time of the Rephaim, and they are thus specimens of primeval architecture such as no other country could produce. At a later period *Edhra* was adorned with many public edifices, now mostly in ruins. A large church still stands at the northern end of the town. A Greek inscription over the door informs us that it was originally a heathen temple, was converted into a church, and dedicated to St. George in A.D. 516. There are the walls of another church of St. Elias; and in the centre of the town a cloistered quadrangle, which appears to have been at first attached to a forum, and afterwards to a cathedral. On the public buildings and private houses are many Greek inscriptions. Some were copied by Burckhardt, and some by Rev. J. L. Porter. At the time of the visit of the latter in 1854 the population amounted to about fifty families, of which some eight or ten were Christian, and the rest Mohammedan. A full account of the history and antiquities of Edrei is given in Porter's *Five Years in Damascus*, ii, 220 sq., and *Handbook for Syria and Palestine*, p. 532 sq.; also in his *Giant Cities of Bashan*, p. 94 sq. See also Burckhardt's *Travels in Syria*, p. 57 sq.; Buckingham's *Travels among the Arab Tribes*, p. 274.

The other place with which Edrei has been identified is called *Dera*, and stands in a shallow wady in the open plain of Hauran, about fourteen miles south of *Edhra*. The following reasons have been assigned in favor of the other site. 1. The name *Edrei*, which signifies "strength," and the fact that it was the capital of an ancient and warlike nation, naturally lead to the belief that it was a very strong city. Ancient cities were always, when possible, built on the tops of hills, or in rocky fastnesses, so as to be easily defended. *Edhra* stands on a ridge of jagged rocks, and is so encompassed with cliffs and defiles as to be almost inaccessible. *Dera*, on the contrary, is in the open plain, and has no traces of old fortifications (G. Robinson, *Travels in Palestine*, ii, 168). It is difficult to believe that the warlike Rephaim would have erected a royal city in such a position. 2. *Dera* has neither well nor fountain to attract ancient colonists to an undefended site. Its supply of water was brought by an aqueduct from a great distance (Ritter, *Palest. und Syr.* ii, 834). 3. The ruins of *Edhra* are more ancient, more important, and much more extensive than those of *Dera*. The dwellings of *Edhra* possess all the characteristics of remote antiquity—massive walls, stone roofs, stone doors. The monuments now existing seem to show that it must have been an important

town from the time the Romans took possession of Bashan; and that it, and not *Dera*, was the episcopal city of *Adraa*, which ranked next to Bostra (Reiland, *Pal.* p. 219, 223, 548). None of the buildings in the latter seem older than the Roman period (Dr. Smith, in Robinson's *Bib. Res.* iii, App. p. 155, 1st ed.). On the other hand, the identification of *Dera* and Edrei can be traced back to Eusebius and Jerome, who say that Edrei was then called *Adara* (*Ἀδάρᾶ*), and was a noted city of Arabia, twenty-four miles from Bostra (*Onomast.* s. v. *Ἐσδραῖ*, Esdrai). In another place they give the distance at twenty-five miles from Bostra and six from Ashtaroth (*ib.* s. v. *Ἀστραθῶς*, Astaroth, where the place in question is called *Ἀδρᾶα*, *Adra*). *Adara* is laid down in the Peutinger Tables as here indicated (Reiland, *Palest.* p. 547; comp. Ptolemy, v, 17; 7). There can be no doubt that the city thus referred to is the modern *Dera*; and the statement of Eusebius is too explicit to be set aside on the supposition that he has confounded the two sites in dispute. Moreover, it is improbable that the boundaries of Manasseh East extended so far as the locality of *Edhra*. Most modern geographers have therefore concluded that *Dera* marks the real site of Edrei (Reiland, *Palest.* p. 547; Ritter, *Palest. und Syr.* ii, 834; Burckhardt, *Syria*, p. 241; Buckingham, *Arab Tribes*, p. 168; Schwarz, however, declares for the other position, *Palest.* p. 222).—Kitto, s. v.; Smith, s. v.

2. A fortified town of northern Palestine, allotted to the tribe of Naphtali, and situated near Kedesh and Hazor (Josh. xix, 37). About two miles south of Kedesh is a conical rocky hill called *Tell Khurabeh*, the "Tell of the ruin," with some remains of ancient buildings on the summit and a rock-hewn tomb in its side. It is evidently an old site, and it may be that of the long-lost Edrei. The strength of the position, and its nearness to Kedesh, give probability to the supposition. Dr. Robinson (*Bib. Res.* iii, 365) suggests the identity of Tell Khurabeh with Hazor (q. v.). For the objections to this theory, see Porter's *Handbook for Syria and Palestine*, p. 442.—Smith, s. v.

**EDUCATION, HEBREW.** Although nothing is more carefully inculcated in the Law than the duty of parents to teach their children its precepts and principles (Exod. xii, 26; xiii, 8, 14; Dent. iv. 5, 9, 10; vi, 2, 7, 20; xi, 19, 21; Acts xxii, 3; 2 Tim. iii, 15; Susanna, 3; Josephus, *Ap.* ii, 16, 17, 25), yet there is little trace among the Hebrews in earlier times of education in any other subjects. The wisdom, therefore, and instruction, of which so much is said in the book of Proverbs, is to be understood chiefly of moral and religious discipline, imparted, according to the direction of the Law, by the teaching and under the example of parents (Prov. i, 2, 8; ii, 2, 10; iv, 1, 7, 20; viii, 1; ix, 1, 10; xii, 1; xvi, 22; xvii, 24; xxxi). Implicit exceptions to this statement may perhaps be found in the instances of Moses himself, who was brought up in all Egyptian learning (Acts vii, 22); of the writer of the book of Job, who was evidently well versed in natural history and in the astronomy of the day (Job xxxviii, 31; xxxix, xl, xli); of Daniel and his companions in captivity (Dan. i, 4, 17; and, above all, in the intellectual gifts and acquirements of Solomon, which were even more renowned than his political greatness (1 Kings iv, 29, 34; x, 1-9; 2 Chron. ix, 1-8), and the memory of which has, with much exaggeration, been widely preserved in Oriental tradition. The statement made above may, however, in all probability, be taken as representing the chief aim of ordinary Hebrew education, both at the time when the Law was best observed, and also when, after periods of national decline from the Mosaic standard, attempts were made by monarchs, as Jehoshaphat or Josiah, or by prophets, as Elijah or Isaiah, to enforce, or at least to inculcate reform in the moral condition of the people on the basis of that standard (2 Kings xvii, 13; xxii, 8-20; 2 Chron. xvii, 7, 9; 1 Kings xix, 14; Isa. i sq.).

In later times the prophecies, and comments on them as well as on the earlier Scriptures, together with other subjects, were studied (Prol. to *Eccles.*, and *Eccles.* xxxviii, 24, 26; xxxix, 1-11). St. Jerome adds that Jewish children were taught to say by heart the genealogies (Jerome on *Titus*, iii, 9; Calmet, *Dict.* s. v. *Généalogie*). Parents were required to teach their children some trade, and he who failed to do so was said to be virtually teaching his child to steal (Mishna, *Kid-dush*, ii, 2, vol. iii, p. 413; Surenhus; Lightfoot, *Chron. Temp.* on Acts xviii, vol. ii, p. 79).

The sect of the Essenes, though themselves abhorring marriage, were anxious to undertake, and careful in carrying out the education of children, but confined its subject matter chiefly to morals and the divine law (Josephus, *War*, ii, 8, 12; Philo, *Quod omnis probus liber*, ii, 458; ed. Mangey; § 12, Tauchn.).

Previous to the captivity, the chief depositaries of learning were the schools or colleges, from which, in most cases (see Amos vii, 14), proceeded that succession of public teachers who, at various times, endeavored to reform the moral and religious conduct of both rulers and people. (See Werkmeister, *De prima scholarum ap. Hebr. origine*, Jesnit. 1735; Hegewisch, *Ob bei den Alten öffentl. Erziehung war*, Altona, 1811.) In these schools the Law was probably the chief subject of instruction; the study of languages was little followed by any Jews till after the Captivity, but from that time the number of Jews residing in foreign countries must have made the knowledge of foreign languages more common than before (see Acts xxi, 37). From the time of the outbreak of the last war with the Romans, parents were forbidden to instruct their children in Greek literature (Mishna, *Sotah*, c. ix, 15, vol. iii, p. 307, 308, Surenhus). Nor had it ever been generally pursued by the Jews (Origen, *con'tra Celsum*, ii, 34).

Besides the prophetic schools, instruction was given by the priests in the Temple and elsewhere, but their subjects were doubtless exclusively concerned with religion and worship (Lev. x, 11; Ezek. xlv, 23, 24; 1 Chron. xxv, 7, 8; Mal. ii, 7). Those sovereigns who exhibited any anxiety for the maintenance of the religious element in the Jewish polity were conspicuous in enforcing the religious education of the people (2 Chron. xvii, 7, 8, 9; xix, 5, 8, 11; 2 Kings xxiii, 2).

From the time of the settlement in Canaan there must have been among the Jews persons skilled in writing and in accounts. Perhaps the neighborhood of the tribe of Zebulun to the commercial district of Phœnicia may have been the occasion of their reputation in this respect. The "writers" of that tribe are represented (Judg. v, 14) by the same word, *סופרים*, *sopher*, used in that passage of the levying of an army, or, perhaps, of a military officer (Gesenius, s. v.) as is applied to Ezra in reference to the Law (Ezra vii, 6); to Seraiah, David's scribe or secretary (2 Sam. viii, 17); to Shebna, scribe to Hezekiah (2 Kings xviii, 37); Shemaiah (1 Chron. xxiv, 6); Baruch, scribe to Jeremiah (Jer. xxxvi, 32), and others filling like offices at various times. The municipal officers of the kingdom, especially in the time of Solomon, must have required a staff of well-educated persons in their various departments under the recorder, *מזכיר*, *mazkir*, or historiographer, whose business was to compile memorials of the reign (2 Sam. viii, 16; xx, 24; 2 Kings xviii, 18; 2 Chron. xxxiv, 8). Learning, in the sense above mentioned, was at all times highly esteemed, and educated persons were treated with great respect, and, according to Rabbinical tradition, were called "sons of the noble," and allowed to take precedence of others at table (Lightfoot, *Chr. Temp.* Acts xvii, vol. ii, 79, fol.; *Ilor. Hebr.* Luke xiv, 8-24; ii, 540). The same authority deprecates the degeneracy of later times in this respect (Mishna, *Sotah*, ix, 15, vol. iii, 308, Surenhus).

To the schools of the prophets succeeded, after the Captivity, the synagogues, which were either them-

selves used as schools, or had places near them for that purpose. In most places there was at least one, and in Jerusalem, according to some, 394, according to others, 460 (Calmet, *Dict.* s. v. *Ecoles*). It was from these schools, and the doctrines of the various teachers presiding over them, of whom Gamaliel, Sammai, and Hillel were among the most famous, that many of those traditions and refinements proceeded by which the Law was in our Lord's time encumbered and obscured, and which may be considered as represented, though in a highly exaggerated degree, by the Talmud. After the destruction of Jerusalem, colleges, inheriting and probably enlarging the traditions of their predecessors, were maintained for a long time at Japhne in Galilee, at Lydda, at Tiberias, the most famous of all, and at Sepphoris. These schools, in process of time, were dispersed into other countries, and by degrees destroyed. According to the principles laid down in the Mishna, boys at five years of age were to begin the Scriptures, at ten the Mishna, at thirteen they became subject to the whole Law (see Luke ii, 46), at fifteen they entered the Gemara (Mishna, *Pirk. Ab.* iv, 20; v, 21, vol. iv, p. 460, 482, 486, Surenhus.). Teachers were treated with great respect, and both pupils and teachers were exhorted to respect each other. Physical science formed part of the course of instruction (*ib.* iii, 18). Unmarried men and women were not allowed to be teachers of boys (Mishna, *Kid-dush*, iv, 13, vol. iii, p. 383). In the schools the Rabbins sat on raised seats, and the scholars, according to their age, sat on benches below or on the ground (Lightfoot on Luke ii, 46; Philo, *ut sup.* 12, ii, 458, Mangey).

Of female education we have little account in Scripture, but it is clear that the prophetic schools included within their scope the instruction of females, who were occasionally invested with authority similar to that of the prophets themselves (Judg. iv, 4; 2 Kings xxii, 14). Needlework formed a large, but by no means the only subject of instruction imparted to females, whose position in society and in the household must by no means be considered as represented in modern Oriental—including Mohammedan—usage (see Prov. xxi, 16, 26; Hist. of Sus. 3; Luke viii, 2, 3; x, 33; Acts xiii, 50; 2 Tim. i, 5).

Among modern Mohammedans, education, even of boys, is of a most elementary kind, and of females still more limited. In one respect it may be considered as the likeness or the caricature of the Jewish system, viz. that besides the most common rules of arithmetic, the Koran is made the staple, if not the only subject of instruction. In Oriental schools, both Jewish and Mohammedan, the lessons are written by each scholar with chalk on tablets, which are cleaned for a fresh lesson. All recite their lessons together aloud; faults are usually punished by stripes on the feet. Female children are, among Mohammedans, seldom taught to read or write. A few chapters of the Koran are learned by heart, and in some schools they are taught embroidery and needlework. In Persia there are many public schools and colleges, but the children of the wealthier parents are mostly taught at home. The Koran forms the staple of instruction, being regarded as the model not only of doctrine, but of style, and the text-book of all science. In the colleges, however, mathematics are taught to some extent (Norberg, *Opusc.* ii, 144 sq.; Shaw, *Travels*, p. 194; Rauwolff, *Travels*, vii, 60; Burckhardt, *Syria*, p. 326; *Travels in Arabia*, i, 275; Porter, *Damascus*, ii, 95; Lane, *Mod. Egypt.* i, 89, 93; *English in Eg.* ii, 28, 31; Wellsted, *Arabia*, ii, 6, 395; Chardin, *Voyages*, iv, 224, Langles; Olearius, *Travels*, p. 214, 215; Pietro della Valle, *Viaggi*, ii, 188).—Smith, s. v. On the subject generally, see Jahn, *Bibl. Arch.* § 106, 166; Ursini, *Antiquit. Hebr. scholastic. acad.* (Hafn. 1702; also in Ugolini *Thesaur.* xxi); Dnmor, *De scholis et academiis vet. Hebr.* (Wirceb. 1782; uncritical); Purnmann, *De re scholastica Judæor.* (Fref. 1779); Seiferheld, in Beye'schlag's *Sylloge var. opusc.* i,

582 sq.; Wolf, *Bibl. Hebr.* ii, 917 sq.; Hartmann, *Verbind. des A. T. mit den Neuen*, p. 377 sq.; Gfrörer, *Gesch. d. Urchristenth.* i, 109 sq.; Beer, *Skizzen einer Gesch. der Erziehung u. des Unterr. bei den Israeliten* (Prague, 1832; a superficial work). See SCHOOL.

EDUCATION FOR THE MINISTRY. See MINISTRY; THEOLOGICAL EDUCATION.

**Edumia**, a place thus described by Eusebius and Jerome (in the *Onomasticon*, s. v. Ἐδουμία, Edomia): "of the tribe of Benjamin; and there is still a village *Eduma*, Ἐδουμία, in Acrabatie, about twelve miles east of Neapolis." From this language, Leclerc (*not. in loc.*) infers that *Adummim* is meant; but this lay farther south. Van de Velde finds the locality in the modern village *Dammeh*, S.E. of Nablous (*Narrat.* ii, 308); a coincidence first pointed out by Robinson (*Researches*, iii, 103), as lying in the prescribed position, although not within the tribe of Benjamin (apparently a conjecture of Euseb.). It is situated on the tableland overlooking the Jordan valley, and contains a fountain and ancient sepulchres in the outskirts (Robinson, *Later Researches*, p. 292, 293).

**E'duth** (עֲדוּת, *eduth'*, *precept*), as it is often rendered; Sept. and Vulg. translate accordingly) stands (besides being translated elsewhere in its ordinary acception) as a part (in connection with "Shushan" either sing. or plur.) of the inscription of certain poetical compositions, indicating that the contents were of a *revealed* or sacred character (title of *Psa.* lx, lxxx). See SHOSHANNIM.

**Edward III**, CONFESSOR, king of the Anglo-Saxons, was born in Oxfordshire in 1004, and died Jan. 5, 1066. He was canonized by Pope Alexander III, and styled "Confessor" in the bull of canonization. The only ground for this was the fact that when, in 1044, he married Editha, daughter of earl Godwin, he informed her that he would make her his queen, but that she should not share his bed. He kept this unnatural vow, and for it, in spite of a licentious life, he was sainted by the Pope.

**Edward VI**, king of England, son of Henry VIII by his wife Jane Seymour, was born at Hampton Court, October 12, 1537. He is mentioned here rather for the great events of his reign than for his personal qualities, though these were excellent. He was crowned in 1547, and his uncle, Edward Seymour, afterwards earl of Somerset, became Protector of the kingdom. "He was attached to the principles of the Reformation, and during his rule great strides were made towards the establishment of Protestantism in England. The images were removed from the churches; refractory Roman Catholic bishops were imprisoned; the laity were allowed the cup at the ceremony of the Lord's Supper; all ecclesiastical processes were ordered to run in the king's name; Henry's famous six articles (known as the Bloody Statute) were repealed; a new service-book, compiled by Crammer and Ridley, assisted by eleven other divines, was drawn up, and ordered to be used, and is known as the *First Prayer-book of Edward VI* (see COMMON PRAYER-BOOK); and the celibacy of the clergy ceased to be obligatory" (Chambers, *Encyclopedia*, s. v.). The young king was in full sympathy with the Reformation; but his plans, and those of his counsellors, were arrested by his death, July 6, 1553.

**Edwards, Bela Bates**, D.D., was born in Southampton, Mass., July 4, 1802, and graduated at Amherst College in 1824, and at Andover Theological Seminary in 1830. He served as a tutor in Amherst College during the years 1827-28, and as assistant secretary of the American Education Society during the years 1828-33. In 1837 he was ordained as a minister of the Gospel, and was also appointed professor of Hebrew in Andover Theological Seminary; and in 1848 he was elected associate professor of sa-

cred literature, as successor of Professor Moses Stuart, in the same institution. From 1828 to 1842 he edited the *American Quarterly Register*. He established in 1833 the *American Quarterly Observer*. After publishing two volumes of it, he united it with the *Biblical Repository*, and was sole editor of the combined periodicals from January, 1835, to January, 1838. From 1844 to 1852 he was the senior editor of the *Bibliotheca Sacra*. For twenty-three years he was employed in superintending periodical literature, and, with the assistance of several associates, has left thirty-one octavo volumes as the monuments of his enterprise and industry in this department of labor. He also edited several duodecimo volumes, among which are the *Eclectic Reader*, the *Biography of Self-taught Men*, the *Memoir of Henry Martyn*, to which he prefixed an Introductory Essay. He published many articles in the religious newspapers, various pamphlets, and important parts of several volumes, such as the *German Selections*, by professors Edwards and Park; *Classical Studies*, by professors Edwards, Sears, and Felton. He injured his constitution by his unremitting toils, and was compelled to make the tour of Europe for his health, and to spend two winters in the South. He died at Athens, Ga., April 20, 1852, in the fiftieth year of his age. He was distinguished not only for his poetic sentiment, large erudition, soundness of judgment, skill as an instructor, and eloquence as a preacher, but also for his delicacy of taste, his tender sensibilities, and, above all, his deep, earnest, and uniform piety. Some of his discourses and essays, with a memoir of his life by E. A. Park, were published in Boston in 1853 in two duodecimo volumes. (E. A. P.)

**Edwards, John**, D.D., one of the strongest Calvinistic divines the Church of England has produced. He was born at Hertford Feb. 26, 1639, and was educated at Merchant-Taylor's School, London. In 1653 he entered St. John's College, Cambridge, where he became scholar and fellow. He was minister of Trinity Church, Cambridge, from 1664 to about 1676, when he was made rector of St. Peter's, Colchester. He returned to Cambridge in 1679, and there wrote industriously on controversial theology. He died April 16, 1716. "It may be questioned whether, since the days of Calvin himself, there has existed a more decided Calvinist than Dr. Edwards. He has been termed the Paul, the Augustine, the Bradwardine, the Calvin of his age. Such was his abhorrence of Arminianism that he contended, with the old Puritans, that there is a close connection between it and popery." His principal writings are, *Theologia reformativa*, or the *Body and Substance of the Christian Religion, comprised in distinct Discourses or Treatises upon the Apostles' Creed, the Lord's Prayer, and the Ten Commandments* (Lond. 1713-26, 3 vols. fol.);—*A complete History or Survey of all the Dispensations or Methods of Religion* (Lond. 1699, 2 vols. 8vo);—*The Arminian Doctrines condemned by the Scriptures* (Lond. 1711, 8vo);—*Authority of the O. and N. T.* (Lond. 1693, 3 vols. 8vo);—*Exercitations, critical, theological, etc., on important places in the O. and N. T.* (Lond. 1702, 8vo);—*Socialism unmasked* (Lond. 1697, 8vo);—*The Doctrine of Faith and Justification* (Lond. 1708, 8vo);—Jones, *Christ. Biography*, s. v.; Kippis, *Biographia Britannica*, vol. v.

**Edwards, Jonathan**, was born at East Windsor, Conn., on the 5th of October, 1703. His great-grandfather on the paternal side was the Rev. Richard Edwards, a clergyman in London in the time of queen Elizabeth. His great-grandfather, William Edwards, was born in England, came to America about the year 1640, and was an honorable trader in Hartford, Conn. His grandfather, Richard Edwards, was born at Hartford, and spent his life there as a respectable and wealthy merchant. His father, Rev. Timothy Edwards, was born in Hartford May 14, 1669. He entered Harvard College in 1687, and received the

two degrees of Bachelor and Master of Arts on the same day, July 4, 1691, one in the morning and the other in the afternoon, 'an uncommon mark of respect paid to his extraordinary proficiency in learning.' He was ordained pastor of the church at East Windsor in May, 1694. In 1711 he was appointed, by the Legislature of Connecticut, chaplain of the troops sent on an important expedition to Canada. He was distinguished for his scholarship, devoutness, and general weight of character. He generally preached extempore, and until he had passed his seventieth year he did not often write the heads of his discourses. He lived to enjoy the fame of his son, and died January 27, 1758. On the maternal side, the great-grandfather of President Edwards was Anthony Stoddard, Esq., who emigrated from the west of England to Boston, and was a member of the General Court from 1665 to 1684. The grandfather of Edwards was the Rev. Solomon Stoddard, of Northampton, Mass., one of the most erudite and powerful clergymen of New England. Edwards's mother was Esther, the second child of the Northampton pastor, a lady of excellent education and rare strength of character.

The history of President Edwards cannot be fully understood without considering that both on the paternal and maternal side he was allied with families belonging to the ecclesiastical aristocracy of New England. He was an only son, and had ten sisters, some of whom became the wives of eminent men. He was trained by his father and his four eldest sisters (all of whom were proficient in learning) for Yale College, which he entered in 1716, just before he was thirteen years of age. During the next year his favorite study was Locke on the Human Understanding. "Taking that book into his hand upon some occasion not long before his death, he said to some of his select friends who were then with him, that he was beyond expression entertained and pleased with it when he read it in his youth at college; that he was as much engaged, and had more satisfaction and pleasure in studying it, than the most greedy miser in gathering up handfuls of silver and gold from some new-discovered treasure." When about twelve years of age he wrote a paper which indicates that he had been thoroughly interested in the question of Materialism. At about the same age he composed some remarkable papers on questions in natural philosophy. Having distinguished himself at college as an acute thinker, and also as an impassioned writer, he took his Bachelor's degree in 1720, and delivered the "salutatory, which was also the valedictory oration."

When he was a boy, probably about the age of seven or eight years, he began to develop his religious character. He writes: "I was then very much affected for many months, and concerned about the things of religion and my soul's salvation, and was abundant in religious duties. I used to pray five times a day in secret, and to spend much time in religious conversation with other boys, and used to meet with them to pray together. I experienced I know not what kind of delight in religion. I, with some of my schoolmates, joined together and built a booth in a swamp, in a very retired spot, for a place of prayer; and, besides, I had particular secret places of my own in the woods where I used to retire by myself, and was from time to time much affected. My affections seemed to be lively and easily moved, and I seemed to be in my element when engaged in religious duties." Reflecting on these fervid emotions, Edwards afterward regarded them as no signs of genuine piety. He was keen in his analysis of character, and was wont to encourage, not only in others, but also in himself, the habit of severe self-examination, and of jealous watchfulness against the influence of self-love. Although from his earliest childhood he had been dutiful, docile, and exemplary in his outward demeanor, yet he writes concerning his boyhood and youth: "I

was at times very uneasy, especially towards the latter part of my time at college, when it pleased God to seize me with a pleurisy, in which he brought me nigh to the grave, and shook me over the pit of hell. And yet it was not long after my recovery before I fell again into my old ways of sin. But God would not suffer me to go on with any quietness. I had great and violent inward struggles, till, after many conflicts with wicked inclinations, repeated resolutions, and bonds that I laid myself under by a kind of vows to God, I was brought wholly to break off all former wicked ways, and all ways of known outward sin, and to apply myself to seek salvation, and practice many religious duties, but without that kind of affection and delight which I had formerly experienced." With his characteristic fidelity in scrutinizing his motives, he looked with distrust on his seeking the Lord after this "miserable manner, which," he says, "has made me sometimes since to question whether it ever issued in that which was saving, being ready to doubt whether such miserable seeking ever succeeded." At length, however, but precisely at what period he does not state, he began to entertain an abiding confidence in his having been regenerated by the Holy Ghost. In the poetic and fervid style which often characterizes his writings, he says: "I began to have a new kind of apprehensions and ideas of Christ, and the work of redemption, and the glorious way of salvation by him. This I know not how to express otherwise than by a calm, sweet abstraction of soul from all the concerns of this world, and sometimes a kind of vision, or fixed ideas and imaginations of being alone in the mountains or some solitary wilderness, far from all mankind, sweetly conversing with Christ, and rapt and swallowed up in God." On one occasion "I walked abroad alone in a solitary place in my father's pasture for contemplation. As I was walking there, and looking upon the sky and clouds, there came into my mind so sweet a sense of the glorious *majesty* and *grace* of God as I know not how to express. I seemed to see them both in a sweet conjunction, majesty and meekness joined together; it was a sweet, and gentle, and holy majesty, and also a majestic meekness, an awful sweetness, a high, and great, and holy gentleness. After this my sense of divine things gradually increased, and became more and more lively, and had more of that inward sweetness. The appearance of every thing was altered; there seemed to be, as it were, a calm, sweet cast or appearance of divine glory in almost every thing. God's excellency, his wisdom, his purity, and love, seemed to appear in every thing—in the sun, moon, and stars; in the clouds and blue sky; in the grass, flowers, trees; in the water and all nature—which used greatly to fix my mind. I often used to sit and view the moon for a long time, and in the day spent much of my time in viewing the clouds and sky, to behold the sweet glory of God in these things, in the mean time singing forth with a low voice my contemplations of the Creator and Redeemer, and scarce any thing in all the works of nature was so sweet to me as thunder and lightning; formerly nothing had been so terrible to me. Before, I used to be uncommonly terrified with thunder, and to be struck with terror when I saw a thunder-storm rising; but now, on the contrary, it rejoiced me. I felt God, if I may so speak, at the first appearance of a thunder-storm, and used to take the opportunity at such times to fix myself in order to view the clouds, and see the lightnings play, and hear the majestic and awful voice of God's thunder, which oftentimes was exceedingly entertaining, leading me to sweet contemplations of my great and glorious God. While thus engaged it always seemed natural for me to sing or chant forth my meditations, or to speak my thoughts in soliloquies with a singing voice."

The sharpness of his intellect, the activity of his imagination, the liveliness of his sensibilities, and the

depth of his piety, were regarded as signs of his being called of God to the ministry of the Gospel. Having been a resident scholar nearly two years at Yale College after his graduation, and having pursued his theological studies during that period, he was "approbated" as a preacher in June or July, 1722, several months before he was nineteen years of age. From August, 1722, until April, 1723, he preached to a small Presbyterian church in New York city. His eloquence fascinated his hearers, but he felt compelled to decline their urgent invitations to become their pastor. In his solitary walks along the silent banks of the Hudson he learned more and more of "the bottonless depths of secret corruption and deceit" belonging to his heart, and of the beauty and amiableness of true holiness. "Holiness, as I then wrote down some of my contemplations on it, appeared to me to be of a sweet, pleasant, charming, serene, calm nature, which brought an inexpressible purity, brightness, peacefulness, and ravisment to the soul. In other words, that it made the soul like a field or garden of God, with all manner of pleasant flowers, enjoying a sweet calm, and the gentle, vivifying beams of the sun. The soul of a true Christian, as I then wrote my meditations, appeared like such a little white flower as we see in the spring of the year, low and humble on the ground, opening its bosom to receive the pleasant beams of the sun's glory; rejoicing, as it were, in a calm rapture; diffusing around a sweet fragraney; standing peacefully and lovingly in the midst of other flowers round about, all in like manner opening their bosoms to drink in the light of the sun." It was during his residence in New York that he wrote the first thirty-four of his well-known "Resolutions" for the government of his life.

In September, 1723, he was called to a tutorship in Yale College. Having passed the preceding winter and spring in severe study at the college, he entered on his tutorship in June, 1724, and left it in September, 1726. After having declined various invitations to take the oversight of churches, he was ordained February 15, 1727, as pastor of the church in Northampton, a colleague with his celebrated grandfather, Solomon Stoddard. He rose at once into eminence as a preacher, especially as a preacher of the divine law, of the divine sovereignty, of man's entire sinfulness by nature, of justification by faith, and of eternal punishment. He often spoke *extempore*; he seldom made a gesture; his voice was not commanding; his power was that of deep thought and strong feeling. Dr. Trumbull says that when Mr. Edwards was preaching at Enfield, Conn., "there was such a breathing of distress and weeping that the preacher was obliged to speak to the people and desire silence that he might be heard." A gentleman remarked to President Dwight that when, in his youth, he heard Mr. Edwards describe the day of judgment, he fully supposed that immediately at the close of the sermon "the Judge would descend, and the final separation take place." During the delivery of one of his most overwhelming discourses in the pulpit of a minister unused to such power, this minister is said to have forgotten himself so far as to pull the preacher by the coat, and try to stay the torrent of such appalling eloquence by the question, "Mr. Edwards! Mr. Edwards! is not God a merciful Being?"

In February, 1729, in consequence of the death of Mr. Stoddard, the entire charge of the congregation at Northampton was devolved on Mr. Edwards. In 1734 and 1735 occurred a remarkable "awakening" of religious feeling in his parish; another occurred in 1740, at which period he became a bosom friend of George Whitefield. During both these developments of religious activity he preached with a force which overawed his hearers. While his parochial labors were multifarious and earnest, he studied the phenomena of the revival with the keenness of a philosopher, and they prompted him to write some of his most acute

disquisitions. Indeed, nearly all the works which he published during his ministry at Northampton indicate the degree in which he labored for the promotion or the regulation of those religious "awakenings" for which his ministry was distinguished. Some of these works are merely sermons, others are larger treatises. They bear the following titles: *God glorified in Man's Dependence* (1731):—*A divine and supernatural Light imparted to the Soul by the Spirit of God* (1734); a sermon noted for its spiritual philosophy):—*Curse ye Meroz* (1735):—*A faithful Narrative of the surprising Work of God in the Conversion of many hundred Souls in Northampton*, etc. (London, 1736):—*Five Discourses prefixed to the American Edition of this Narrative* (1738):—*Sinners in the Havils of an angry God* (1741); one of his most terrific sermons):—*Sorrows of the bereaved spread before Jesus* (1741):—*Distinguishing Marks of a Work of the true Spirit* (1741):—*Thoughts on the Revival in New England*, etc. (1742):—*The Watchman's Duty and Account* (1743):—*The true Excellency of a Gospel Minister* (1744):—*A Treatise concerning religious Affections* (1745); one of his most spiritual and analytical works):—*An humble Attempt to promote explicit Agreement and visible Union among God's People in extraordinary Prayer* (1746):—*True Saints, when absent from the Body, present with the Lord* (1747):—*God's awful Judgments in breaking the strong Rods of the Community* (1748):—*Life and Diary of the Rev. David Brainerd* (1749); a volume which exerted a decisive influence on Henry Martyn, and has affected the missionary spirit of the English as well as American churches):—*Christ the Example of Gospel Ministers* (1749):—*Qualifications for full Communion in the visible Church* (1749); a treatise of historical as well as theological importance):—*Farewell Sermon to the People of Northampton* (1750); called "the best farewell sermon ever written").

The last two publications suggest the most sorrowful event of President Edwards's life. He was dismissed from his Northampton pastorate on the 22d of June, 1750. As early as 1744 he had offended many, and among them some of the most influential families in his congregation, by certain stringent measures which he adopted in regard to alleged immoralities prevalent at Northampton. The whole parish was shaken by his resolute and uncompromising reproofs, and was predisposed to resist any subsequent innovation which he might make. His grandfather, Mr. Stoddard, had favored the principle that unconverted persons who are not immoral have a right to partake of the Lord's Supper. The authoritative influence of Mr. Stoddard had induced not only the Northampton Church, but also many other churches, to adopt that principle. Mr. Edwards, after prolonged deliberation, opposed it. The entire community was aroused by his boldness in controverting the teachings of a man like Solomon Stoddard, "whose word was law." After a prolonged and earnest controversy, he was ejected from the office which he had adorned for more than twenty-three years. He never saw occasion to change the opinions which were so obnoxious to his people; and two years after his dismissal he published a work entitled *Misrepresentation corrected and Truth vindicated in a Reply to Mr. Solomon Williams's Book on Qualifications for Communion*; to which is added a *Letter from Mr. Edwards to his late Flock at Northampton* (1752). After his death, and after a disastrous controversy through the land, his principles prevailed among the evangelical churches.

At the present day, when the dismissal of pastors is so frequent, we cannot easily imagine the mortification and injury which Edwards suffered in consequence of his difficulties with his parish. He was in his forty-seventh year, and had accumulated no property for the support of his large and expensive family. He was compelled to receive pecuniary aid from his friends in remote parts of this country and in Great

Britain. His wife was a descendant from the earls of Kingston, and was a lady of rare accomplishments. The description which he wrote of her in her girlhood was pronounced by Dr. Chalmers to be one of the most beautiful compositions in the language. He was married to her on the 27th of July, 1727, and at the time of his dismission, his eldest son, afterwards judge Timothy Edwards, was about twelve years of age; his second son, afterwards Dr. Jonathan Edwards, was about five years of age; and his youngest son, afterwards judge Pierpont Edwards, was an infant of two or three months; his third daughter, afterwards the mother of Aaron Burr, was in her eighteenth year; and his fourth daughter, afterwards the mother of president Timothy Dwight, was in her sixteenth year. He had a family of three sons and seven daughters—another daughter, Jerusha, having died three years before his dismission. She was betrothed to David Brainerd, who had been a cherished inmate of her father's family.

In July, 1751, about a year after his dismission, Edwards was installed pastor of the small Congregational church in Stockbridge, Mass., and missionary of the Housatonic tribe of Indians at that place. He preached extemporaneously to the Indians through an interpreter. In this uncultivated wilderness he was sadly afflicted with the fever and ague, and other disorders incident to the new settlements. He published a characteristic sermon in 1752, entitled *True Grace distinguished from the Experience of Devils*. In 1754 he published the most celebrated of his works—his *Essay on the Freedom of the Will*. Of this essay there are conflicting interpretations. One school of interpreters contend that he believed in a *literal* inability of the soul to act otherwise than it does act; another school contend that he did not believe in an inability which is *natural and literal*, but only in one which is *moral, figurative*, “an inability improperly so called.” One school contend that he believed liberty to consist in the mere power of doing what the soul has previously willed, of outwardly executing what the soul has antecedently chosen; another school contend that he believed liberty to consist in the power of electing either of two or more objects—such a power that men are not “at all hindered by any fatal necessity from doing, and even willing and choosing as they please, with full freedom; yea, with the highest kind of liberty that ever was thought of, or that ever could possibly enter into the heart of any man to conceive” (Letter to a Scotch theologian). One school regard Edwards as agreeing with those Calvinists who suppose that “man, in his state of innocence, had freedom and power to do that which is good and well-pleasing to God, but yet mutably so that he might fall from it,” and that “man, by his fall into a state of sin, hath wholly lost all ability of will to any spiritual good accompanying salvation;” another school regard Edwards as denying this proposition in its *literal*, and affirming it only in its *figurative* sense, and believing that since the Fall man has all the freedom or liberty which he ever had, or can be imagined to have. One class of critics suppose him to believe that motives are the efficient or the necessitating causes of volitions; another class suppose him to believe that the volition is the *result* of motive as an *occasion*, rather than the necessary *effect* of motive as a *cause*. The latter class interpret his whole theory of the will in the light of the following remark of Edwards to the Scotch divine: “On the contrary, I have largely declared that the connection between antecedent things and consequent ones, which takes place with regard to the acts of men's wills, which is called moral necessity, is called by the name of *necessity* improperly, and that all such terms as *must, cannot, impossible, unable, irresistible, unavoidable, invincible, etc.*, when applied here, are not applied in their proper signification, and are either used nonsensically and with perfect insignificance, or

in a sense quite diverse from their original and proper meaning, and their use in common speech, and that such a necessity as attends the acts of men's wills is more properly called certainty than necessity, it being no other than the certain connection between the subject and predicate of the proposition which affirms their existence.” It is asserted by many that Edwards makes no distinction between the will and the sensibilities; it is thought by some that he does make a distinction; the acts of the will being acts of moral *choice*, the processes of the sensibilities being what he elsewhere terms “*natural or animal feelings or affections.*”

During his virtual banishment to the Stockbridge wilderness he wrote another of his more noted works, entitled *The great Christian Doctrine of Original Sin defended, etc.* The work was finished May 26, 1757, but was not published until 1758, several months after his death. Perhaps the distinctive peculiarity of this treatise is his defence of the doctrine that there was a constituted *oneness* or *identity* of Adam and his posterity; “that they constituted, “as it were, *one* complex person, or *one* moral whole;” that as a tree, when a century old, is *one* plant with the little sprout from which it grew—as the body of a man, when forty years old, is *one* with the infant body from which it grew—as the body and soul are *one* with each other, so there is a divine “constitution” according to which Adam and his posterity are “*looked upon as one*, and dealt with accordingly;” that in his descendants “the *first existing* of a corrupt disposition is not to be looked upon as sin belonging to them, *distinct* from their participation in Adam's first sin;” that “the *guilt* a man has upon his soul at his first existence is *one* and simple, viz. the guilt of the original apostasy, the guilt of the sin by which the species first rebelled against God. This, and the guilt arising from the first corruption or depraved disposition of the heart, are not to be looked upon as *two* things distinctly imputed and charged upon men in the sight of God,” but are one and the same thing, according to an arbitrary constitution, like that which causes the continued identity of a river which is constantly flowing, or of an animal body which is constantly fluctuating. “When I call this an *arbitrary constitution*, I mean that it is a constitution which depends on nothing but the *divine will*, which divine will depends on nothing but the *divine wisdom.*” During his retirement at Stockbridge, Edwards wrote his *Dissertation concerning the End for which God created the World*, and also his *Dissertation concerning the Nature of true Virtue*. On the former of these treatises he had expended much, and on the latter a life-long study. One class of his interpreters suppose that he wrote the first of these treatises with the design, and that the treatise has been followed with the result, of modifying the popular aspect of Calvinism, and of thereby removing some of the popular objections to the system as formerly held. They suppose that he designed to make the sovereignty of God appear the more amiable by showing that it is intent on the highest interests of his creatures; that the glory of God and the well-being of the universe are one and the same thing, and therefore, when God is said to govern the universe for his own glory, he is also said to govern it for its own well-being. In the second of the two last-named treatises, a treatise which, like the first, and like many of his other essays, was designed to reconcile reason with faith—a treatise the rudiments of which were written in his boyhood, and are found scattered through many of his published works—he reduces all moral goodness to “the love of being in general,” and this love he considers an act of the will as distinct from “animal or natural feeling.” Those Calvinistic divines who believe that all the virtues, such as faith, justice, etc., are in their nature active, and are mere forms of benevolence, and that all sin is equally active, and is the elective preference of

an inferior above a superior good, appeal to Edwards's *Dissertation on Virtue* as having given a marked impulse to what has been called by various names, such as the new, or the New England, or the Hopkinsian divinity. The two last-named dissertations were not published until 1788, thirty years after his death. In 1764 eighteen of Edwards's sermons were published in a volume, to which was prefixed his memoir by Dr. Samuel Hopkins. In 1777 his celebrated *History of Redemption*, in 1788 a new volume of his sermons, in 1789 another new volume of his sermons, in 1793 his *Miscellaneous Observations on important Theological Subjects*, in 1796 his *Remarks on important Theological Controversies*, were all published at Edinburgh, Scotland. His published works were collected and printed in eight volumes at Worcester, Mass., under the editorship of Dr. Samuel Austin, in 1809, and have been republished repeatedly in England and America. A larger edition of his writings, in ten volumes, including a new memoir, and much new material, especially his *Notes on the Bible*, was published at New York in 1829, under the editorial care of Rev. Dr. Sereno Edwards Dwight. Parts of this edition have been republished in England. In 1852, his work entitled *Charity and its Fruits* was published for the first time, and more recently a volume of his writings has been printed in England, which has never been reprinted in America.

One of most interesting aspects in which president Edwards may be viewed is that of his influence over Whitefield, Brainerd, and two of his theological pupils, Bellamy and Hopkins. Another is that of his influence over European scholars and divines. Several of his treatises were published in Great Britain before they were published in America, and the estimate formed of him by Dr. Erskine, Dr. Chalmers, Robert Hall, Dugald Stewart, Sir Henry Moncrief, Sir James Mackintosh, Dr. Priestley, Dr. George Hill, Isaac Taylor, and others, is higher than that expressed by men of the same relative position in this country. It is a remarkable fact that, while living in a kind of exile as a missionary among the Indians at Stockbridge, he was invited to the presidency of the college at Princeton, New Jersey. He was elected to the office on the 26th of September, 1757. In his first response to the trustees he expressed his great surprise at their appointment, and, among other reasons for declining it, he said, with his characteristic simplicity, "I have a constitution in many respects peculiarly unhappy, attended with flaccid solids, vapid, sisy, and scarce fluids, and a low tide of spirits, often occasioning a kind of childish weakness and contemptibleness of speech, presence, and demeanor, with a disagreeable dulness and stiffness much unfitting me for conversation, but more especially for the government of a college." He was dismissed from his Stockbridge pastorate January 4, 1758, after having labored in it six years and a half. He spent a part of January and all of February at Princeton, performing some duties at the college, but was not inaugurated until the 16th of February, 1758. He was inoculated for the small-pox on the 23d of the same month; and after the ordinary effects of the inoculation had nearly subsided, a secondary fever supervened, and he died on the 22d of March, 1758. He had then resided at Princeton about nine weeks, and had been the inaugurated president of the college just five weeks. His age was 54 years, 5 months, and 17 days. His father died in his 89th year, only two months before him; his son-in-law, president Burr, died in his 42d year, only six months before him; his daughter, Mrs. President Burr, died in her 27th year, only sixteen days after him; his wife died in her 49th year, only six months and ten days after him. The three last named are interred in the same burial-ground at Princeton. (E. A. P.)

Edwards, Jonathan, D.D., the second son and ninth child of the President whose history has been sketched in the preceding article, was born at North-

ampton, Mass., May 26th, 1745. Although each was the president of a college, yet, as the father was not a doctor of divinity, he is familiarly termed the President, and the son is distinguished from him as the Doctor. In his early childhood young Edwards was afflicted with an ocular disease, and therefore did not learn to read at so early an age as his powers and instincts would have inclined him. In consequence also of his father's ecclesiastical troubles at Northampton, he was deprived of some important facilities for his education. "When I was but six years of age," he writes in 1788, "my father removed with his family to Stockbridge, which at that time was inhabited by Indians almost solely, as there were in the town but twelve families of whites, or Anglo-Americans, and perhaps one hundred and fifty families of Indians. The Indians being the nearest neighbors, I constantly associated with them; their boys were my daily schoolmates and playfellows. Out of my father's house I seldom heard any language spoken but the Indian. By these means I acquired the knowledge of that language, and a great facility in speaking it. It became more familiar to me than my mother-tongue. I knew the names of some things in Indian that I did not know in English. Even all my thoughts ran in Indian; and, though the true pronunciation of the language is extremely difficult to all but themselves, they acknowledged that I had acquired it perfectly, which, as they said, had never been done before by any Anglo-American. On account of my skill in their language in general, I received from them many compliments applauding my superior wisdom. This skill in their language I have in a good measure retained to this day."

Although the pastor at Stockbridge was nominally the teacher of the Housatonucks, yet, in fact, he often gave instruction to families of the Mohawks, Oneidas, and Tuscaroras, who had gone to his parish for the sake of its educational advantages. He was a patron and also an intimate companion of Gideon Hawley, a man highly revered as a preacher to the Indian tribes. The elder Edwards desired that his son Jonathan should be trained for a missionary among the aborigines, and he therefore sent the boy, not then eleven years old, to a settlement of the Oneida Indians on the banks of the Susquehanna. The faithful friend, Gideon Hawley, travelled with the boy, and took the charge of him, but, in consequence of the French and Indian war, was obliged to return with him, after a residence of about six months among the Oneidas. Young Edwards endeared himself to the Oneida tribe, and on one occasion, when they expected an attack from the French, the Indians took the boy upon their shoulders, and bore him many miles through the wilderness to a place of safety. At that early age he exhibited the traits which afterwards distinguished him—courage, fortitude, and perseverance. While travelling through the wilderness in the depths of winter he was sometimes compelled to sleep on the ground in the open air, and he endured the hardness as a good soldier. He spent the two years 1756, 1757, under the parental roof in Stockbridge, but in January, 1758, his father removed to Princeton, and in October, 1758, both his father and mother were removed from the world, and thus, in his fourteenth year, he was left an orphan. He had no pecuniary means for pursuing his education; but, having received promises of aid from the friends of his parents, he entered the Grammar School at Princeton in February, 1760, was admitted to Princeton College in September, 1761, and was graduated there in September, 1765. During the presidency and under the preaching of Dr. Finley, he became, as he thought, a true servant of Christ, and in September, 1763, he became a member of the Church. After having studied theology with Dr. Joseph Bellamy, he was appointed as a preacher in October, 1766, by the Litchfield County Association. In 1767 he was ap-

pointed to the office of tutor at Nassau Hall, and was continued in the office two years. He was also offered, but he declined to accept, the professorship of languages and logic in the same institution. He had distinguished himself as a linguist and as a logician at Nassau Hall, and at a later day he received the doctorate of divinity from that college. Thus in his earlier years he was honored by his Alma Mater as a man of uncommon promise, and in his maturer years as a man of uncommon attainments. His contemporaries speak of him as indefatigably diligent while at college, and as ever afterwards an eager aspirant for knowledge in its various branches.

He was also an instructive and sometimes an eloquent preacher. Accordingly, he was invited to the pastorate of an important church in New Haven, Conn., and was ordained there Jan. 5, 1769. It is stated in his memoir, that the ordaining council were so intensely interested in his preparatory examination that they continued it for their own pleasure and profit several hours after the time which had been previously appointed for the public exercises of the ordination. Several members of his church were advocates of the "half-way covenant;" he, like his father, was decidedly hostile to it. This divergence of views occasioned much trouble to him in his pastorate. The extravagances which had been connected with the "great awakening" in 1740-2 were followed by a disastrous reaction among the New England churches, and the ministry of Dr. Edwards was made in some degree uncomfortable by it. His pastorate was also disturbed by the demoralizing influences of the Revolutionary war. That war introduced a flood of errors among the people. Dangerous heresies were adopted by some members of his parish. The result of all these untoward events was that he was dismissed from his office May 19, 1795, after having labored in it more than twenty-six years. *The Connecticut Evangelical Magazine* stated that the principal cause "of his dismissal was the departure of some of his parishioners from their former faith, but the ostensible cause assigned by the society was their inability to support a minister."

He had already acquired a great reputation as a philosopher and as a philanthropist. He was well known and much beloved by divines in Great Britain, with some of whom he maintained an active correspondence. Such a man could not long remain without some official relations. In January, 1796, he was installed pastor of the church in Colebrook, Conn. Here, in the bosom of an intelligent, affectionate, and confiding parish, he persevered in his rigorous system of study, and prepared himself for works which he did not live to execute. Having enjoyed his busy retreat a little more than three years, he was surprised by being called in May, 1799, to the presidency of Union College, Schenectady, N. Y. After a prolonged examination of his duty, he applied to an ecclesiastical council for their advice, and in accordance with their counsel he accepted the new office. He entered on its duties in the summer of 1799, and was welcomed with unusual demonstrations of joy. Rev. Dr. Andrew Yates, who was associated with Dr. Edwards in the government of the college, says of him: "His discipline was mild and affectionately parental, and his requirements reasonable. Such a character for government in president Edwards was unexpected to some who professed to know his disposition, and had formed their opinions of him in this respect. It was therefore the more noticed. There was an apparent austerity and reserve in his manner, which no doubt arose from the retirement of study and from habits of close thought, and would leave such an impression after a slight acquaintance; but in his domestic intercourse, and with his intimate friends, while conscientiously strict and prompt in his duties, and while he acted with decision, he was mild and affectionate. The

same spirit characterized his government of the college. It was probably conducted with greater mildness and affection than would have been exercised had not the prevailing expectations of some intimated the danger of his erring on the side of severity. His pupils, like a well-regulated family under faithful discipline, were respectfully attached to him."

On August 1, 1801, after an illness of about a fortnight, he died, at the age of fifty-six years, two months, and six days. "The blood of Christ is my only ground of hope" were among his last words. A highly eulogistic sermon was preached at his funeral in the Reformed Dutch Church at Schenectady by his friend, Rev. Robert Smith, of Savannah. Dr. Edwards had been greatly affected by the loss of his first wife, who, in June, 1782, was drowned. He had also been bereaved of one child; but three of his children survived him.

The influence of Dr. Edwards in the pulpit, although not equal to that of his father, was yet greater than might have been expected from his analytic habits. His eye was piercing, his whole manner was impressive, his thoughts were clear and weighty, and his general character was itself a sermon. He was known to be honest, and a hearty lover of the truth as it is in Jesus. Although not a talker, in the superficial meaning of that phrase, yet he was powerful in conversation with men of letters, and was a prince among disputants; therefore his influence over his theological pupils was perhaps as important as his power in moulding the character of his parishioners. He instructed many young men for the Christian ministry, and his influence is yet apparent in the writings of some of them. One of these pupils was his nephew, president Dwight, of Yale College, who was wont to speak of him with filial reverence; another was Dr. Griffin, president of Williams College, who bore frequent testimony to the power of his teacher. A large part of Dr. Edwards's influence arose from his interpretations of his father's writings. He often said that he had spent his life on those writings, although, in fact, he had a more various learning than belonged to his father. He studied the published and the unpublished works of the elder president with peculiar care. He was an early and confidential friend of Dr. Bellamy, one of the most intimate associates of the elder president, and he learned from Bellamy the exact shadings of the father's system. He was also a lifelong friend of Dr. Samuel Hopkins, another of president Edwards's bosom companions, and he obtained from Hopkins many nice discriminations in regard to the president's theories as expounded in his conversations. He was thus well fitted to be an editor of his father's works, and he did prepare for the press the *History of the Work of Redemption*, two volumes of sermons, and two volumes of *Miscellaneous Observations on important Theological Subjects*. He was also well fitted to write a commentary on his father's doctrinal system, as that system was originally published by the President, or afterwards modified by Hopkins, Bellamy, Smalley, and others. In this aspect there is great value belonging to Dr. Edwards's treatise entitled *Improvements in Theology made by President Edwards and those who have followed his Course of Thought*. In 1797, while he was at Colebrook, he published *A Dissertation concerning Liberty and Necessity; in reply to the Rev. Dr. Samuel West*. This volume may be regarded as perhaps the fairest exponent of the elder president's theory of the will. It led Dr. Emmons to say that, of the two, the father had more reason than the son, yet the son was a better reasoner than the father. It is accordingly in his published works that the influence of Dr. Edwards has been most conspicuous. He printed numerous articles in the *New York Theological Magazine*; various sermons, one in 1783, at the ordination of Rev. Timothy Dwight, at Greenfield, Conn.; one in 1791, on the Injustice and Impolicy of

the Slave-trade; one in 1791, on Human Depravity; one in 1792, at the ordination of Rev. Dan Bradley, at Hamden; one in 1792, at the ordination of Rev. William Brown, at Glastenbury; one in 1792, the Concio ad Clerum, preached in the chapel of Yale College on the marriage of a deceased wife's sister; one in 1793, on the death of Roger Sherman; an election sermon in 1794; in 1797, a sermon on the Future State of Existence and the Immortality of the Soul; in 1799, a Farewell Sermon to the people of Colebrook. The most celebrated of his discourses are the three *On the Necessity of the Atonement and its Consistency with Free Grace in Forgiveness*. They were "preached before his excellency the governor and a large number of both houses of the Legislature of the State of Connecticut, during their sessions at New Haven, in October, 1785, and published by request." They have been frequently republished, and they form the basis of that theory of the atonement which is sometimes called the "Edwardean theory," and is now commonly adopted by what is termed the "New England school of divines." These discourses have great historical as well as theological importance, and they serve to illustrate the fact that some of the most profound treatises in the science of divinity have been originally preached in sermons. One ultimate design of his volume on the Atonement was to refute the argument which some were deriving from that doctrine in favor of universal salvation. Intimately connected with this volume was another larger work, originally published in 1789, but frequently republished, and entitled, *The Salvation of all Men strictly examined, and the endless Punishment of those who die impenitent argued and defended against the Reasonings of Dr. Chaucy in his book entitled "The Salvation of all Men."* This work alone would have established the fame of Dr. Edwards as a divine of singular acuteness, deep penetration, accuracy and precision of thought and style. At the present day it is more suggestive of the true and the decisive modes of reasoning on this subject than is perhaps any other volume. The preceding works illustrate the metaphysical acumen and the profound judgment of Dr. Edwards; he published one essay which indicates his tact as a philologist, and which elicited the enthusiastic praises of Humboldt. This is his *Observations on the Language of the Muhhekanew Indians, in which the Extent of that Language in North America is shown, its Genus grammatically traced, and some of its Peculiarities, and some Instances of Analogy between that and the Hebrew are pointed out*. These observations were "communicated to the Connecticut Society of Arts and Sciences, and published at the request of the society." One of the most accomplished of American linguists, Hon. John Pickering, who edited one edition of this paper, says of it: "The work has been for some time well known in Europe, where it has undoubtedly contributed to the diffusion of more just ideas than once prevailed respecting the structure of the Indian languages, and has served to correct some of the errors into which learned men had been led by placing too implicit confidence in the accounts of hasty travellers and blundering interpreters. In the *Mithridates*, that immortal monument of philological research, professor Vater refers to it for the information he has given upon the Mohegan language, and he has published large extracts from it. To a perfect familiarity with the Muhhekanew dialect, Dr. Edwards united a stock of grammatical and other learning which well qualified him for the task of reducing an unwritten language to the rules of grammar." Nearly all of Dr. Edwards's published writings were collected and reprinted in two octavo volumes, each of above 500 pages, in 1842. They were edited, and a memoir was prefixed to them, by his grandson, Rev. Tryon Edwards, D.D.

Although the two Edwardses were in various particulars dissimilar, yet in many respects there was a

striking resemblance between them. Dr. Samuel Miller, of Princeton, says "the son greatly resembled his venerable father in metaphysical acuteness, in ardent piety, and in the purest exemplariness of Christian deportment." The son, like the father, was a tutor in the college where he had been a student; was first ordained over a prominent church in the town where his maternal grandfather had been the pastor; was dismissed on account of his doctrinal opinions; was afterwards the minister of a retired parish; was then president of a college, and died soon after his inauguration. His memoir states that both the father and the son preached on the first Sabbath of the January preceding their death from the text, "This year thou shalt die." (E. A. P.)

**Edwards, Justin, D.D.**, an eminent Congregational minister, was born at Westhampton, Mass., April 25, 1787. He graduated at Williams College 1810; entered the Theological Seminary in Andover March, 1811, and was installed pastor of the South Church in the same place December 2, 1812. In 1825 he was one of the sixteen who founded the "American Society for the Promotion of Temperance." He was installed pastor of the Salem-Street Church, Boston, January 1, 1828, but resigned August 20, 1829, and entered the service of the American Temperance Society as secretary. His zeal, wisdom, and activity contributed, perhaps more than any other agency, to diffuse the principles of the Temperance reform in the United States. He was elected Professor of Theology in the Seminary in New York in February, 1836, and President of the Seminary at Andover, 1837. He accepted the latter appointment. In 1842 he was chosen secretary of the newly-formed American and Foreign Sabbath Union, and in this service he spent several laborious and eminently useful years. He died July 24, 1853. He published *An Address before the Rhetorical Society in the Theological Seminary at Andover* (1824):—*An Address at the laying of the corner-stone of the new meeting-house in Andover* (1826):—*A Letter to the friends of Temperance in Mass.* (1836):—*Permanent Temperance Documents*, a series of papers (1830-36):—*Permanent Documents*, a series of papers on *The Sabbath*; and numerous tracts for the American Tract Society, and a compendious *Commentary* (N. T. and part of O. T.; Amer. Tract Society). His life was full of varied but always consecrated labor, and few men have contributed more largely to promote Christian ethics in America by laying their foundation wisely in true religion. See Halleck, *Life of Justin Edwards* (Amer. Tract Society); and Sprague, *Annals*, ii, 572.

**Edwards, Morgan**, a Baptist minister, was born in Treveithin parish, Wales, May 9, 1722. He commenced preaching in 1738, supplied for seven years a small congregation in Boston, Lincolnshire, and thence removed to Cork, Ireland, where he was pastor for nine years. After spending one year more at Rye, in Sussex, he emigrated to America, and in May, 1761, became pastor of the Baptist Church in Philadelphia. In 1772 he removed to Newark, Del., and preached to several vacant churches until the commencement of the Revolution. After the war he delivered lectures on divinity in Philadelphia and other parts of Pennsylvania, as well as in New Jersey, Delaware, and New England. He died January 28, 1795. Besides various manuscripts, he left behind him forty-two volumes of sermons. He published a number of occasional sermons, addresses, pamphlets, etc.—Sprague, *Ann.* vi, 82.

**Edwards, Thomas**, an English divine, was educated at Trinity College, Cambridge, where he passed A.B. in 1605, and A.M. in 1609. He did not become a Nonconformist, but yet was always a Puritan in theology. "I never," says he, "had a canonical coat, declined subscription for many years before the Parliament, though I practised the old conformity; much less did I bow to the altar and at the name of Jesus,"

etc. He was lecturer at Hertford, and afterwards in London. When the Long Parliament declared against Charles I he sided with them, but when the Independents came into power he opposed them with great virulence both by writing and acting. He published *Reasons against the Independent Government of particular Congregations* (1641, 4to):—*Antapologia, or a full answer to the apologetical Narration of Mr. Goodwyn. Mr. Nye, Mr. Symson, Mr. Burroughs, Mr. Bridge, Members of the Assembly of Divines, wherein are handled many of the Controversies of these Times* (1644, 4to): the chief design of this work we learn from himself, in the preface to it: "This *Antapologia*," says he, "I here recommend to you for a true glass to behold the faces of Presbytery and Independency in, with the beauty, order, and strength of the one, and the deformity, disorder, and weakness of the other":—*Gangrana, or a Catalogue and discovery of many of the Errors, Heresies, Blasphemies, and pernicious Practices of the Secretaries of this Time* (1645, 4to):—*Gangrana*, part ii (1646, 4to):—*Gangrana*, part iii:—*The casting down of the last and strongest hold of Satan, or a Treatise against Toleration* (part i, 1647):—*Of the particular Visibility of the Church:—A Treatise of the Civil Power in Ecclesiasticals, and of Suspension from the Lord's Supper*. The time and place of his death are unknown. He professed himself "a plain, open-hearted man, who hated tricks, reserves, and designs; zealous for the Assembly of Divines, the Directory, the use of the Lord's Prayer, singing of psalms, etc., and so earnest for what he took to be the truth that he was usually called in Cambridge young Luther."—*Kippis, Biog. Brit.* vol. v.

**Edwards, Thomas, D.D.**, a learned Arminian divine, born at Coventry, England, in 1729; entered Clare Hall, Cambridge (of which he became fellow), in 1747; master of the Free School, and rector of St. John the Baptist, Coventry, in 1758; vicar of Nuneaton, Warwickshire, in 1770; and died in 1785. His principal writings are, (1.) *The Doctrine of irresistible Grace proved to have no Foundation in the Writings of the New Testament* (Camb. 1759, 8vo):—(2.) *Prolegomena in libros veteris Testamenti poeticos* (Cantab. 1762, 8vo).

**Edwards, Timothy**, a Congregational minister, was born May 14, 1669, at Hartford, Conn. He graduated at Harvard College July 4, 1691, and was ordained May, 1694, as pastor in East Windsor, which relation he sustained until his death, Jan. 27, 1758. Mr. Edwards was father of the distinguished Jonathan Edwards. He published but one sermon (*Election Sermon*, 1732).—*Sprague, Annals*, i, 230.

**Edwy**, surnamed the Fair, eldest son of king Edmund, succeeded his uncle Eldred as king of England in 955, while his brother Edgar became viceroy of Mercia. Edwy had married Alfriga, the daughter of a noble matron, and was affectionately attached to his young wife. The monks, at the head of whom were Dunstan and archbishop Odo, had, during the reign of Eldred, exerted a great influence at the court; but the young king rejected their councils, and this appears to have made them jealous of Alfriga, believing her to be the cause of this change; and when, on the occasion of his coronation, the king left his court for a time, Dunstan, who had watched for an opportunity to revenge himself on the queen, rushed to her chamber, tore the king from her arms, and brought him back to his courtiers. In revenge for this indignity, Edwy not only banished Dunstan (956), but extended his hatred to the monks generally. Odo declared the marriage unlawful, carried the queen a prisoner to Ireland, and ordered her face to be branded with a red-hot iron. Her wounds soon healing, she recovered her former beauty, and returned to Gloucester. Here she was discovered by Odo's emissaries, and was treated with such cruelty as to cause her

death. When Edwy attempted to resist this violence of the monks, Odo formed a conspiracy against him with Edgar, supported by the Mercians and Northumbrians, and he was deprived of the larger part of his kingdom—all England north of the Thames. He survived the partition of his kingdom only a few months, and died before the end of the year 959. While the monks represent king Edwy as licentious and a mal-administrator, Huntingdon, who was no party in the quarrel, gives him a handsome character, reports that the country flourished under his administration, and that Odo and Dunstan became his enemies because he was unwilling to submit to the severity of monastic rulers.—*Hoefer, Nouv. Biog. Génér.* xv, 692; Mackintosh, *History of England*, i, 55 sq.; Wright, *Biographia Brit. Lit.* (A. S. P.) 430 sq.; Collier, *Eccles. History*, i, 430 sq.; *Edinb. Rev.* xxv and xlii.

**Edzardi, Esra**, a great Hebrew scholar, was born at Hamburg June 28, 1629. He pursued his studies at Leipzig, Wittenberg, and Tübingen, and, in order to become still more proficient, visited many of the larger cities, as Zwickau, where he studied under Daum; Basle, where he enjoyed the instruction of Buxtorf (q. v.); Strasburg, Giessen, Greifswald, and also Rostock, where he was made a licentiate. On his return to Hamburg he gave instruction in Hebrew, and became famous not only for his learning in the Oriental tongues, his thorough acquaintance with Talmudic literature and Hebrew antiquities, but also for his zeal in the conversion of Jews and Romanists. He died January 1, 1708. Most of the works of Edzardi remain in MS. form. The only book mentioned by Grässe is *Consensus Antiquit. Judaicæ c. explicat. christianorum super Jerem. xxvii*, 5, 6, *Hebr. Rab. (Hamb. 1670, fol.)*.—*Hoefer, Nouv. Biograph. Générale*, xv, 693; Grässe, *Allgem. Literär-geschichte*, vi, 886. (J. H. W.)

**Edzardi, Esra Heinrich**, a theologian and historian, son of Sebastian Edzardi, was born at Hamburg Jan. 28, 1703. Although his life was very short (he died Feb. 4, 1733), he left a number of works, of which the principal are, *Schwedische Kirchengeschichte* (Altona, 1720, 8vo):—*Ordnung der zehn Gebote in Lutheri Catechismo* (Hamburg, 1721, 8vo):—*Disputatio de Cycno ante mortem non canente* (Wittenb. 1722, 4to):—*Wahre Lehre von der Gnadenwahl* (1721, 4to).—*Hoefer, Nouv. Biog. Générale*, xv, 694. (J. H. W.)

**Edzardi, Georg Elieser**, son of Esra Edzardi, known, like his father, as a great Hebrew scholar, was born at Hamburg January 22, 1661. He studied at the universities of Giessen, Frankfurt on the Oder, and Heidelberg, and resided for some time at Worms, where he held many disputations with the Rabbis. After a journey through Germany, he was appointed professor of Greek and history at the gymnasium in Hamburg. In 1717 he was appointed professor of Hebrew, and in this department became the worthy successor of his father, and, like him, was zealous in the conversion of the Jews. He died July 23, 1727. Besides treatises on the Talmud, we have from him *Excerpta Gemaræ Babylonicæ*.—*Hoefer, Nouv. Biog. Génér.* xv, 693; Grässe, *Literär-geschichte*, vi, 886. (J. H. W.)

**Edzardi, Johann Esra**, a German historian, brother of the distinguished Hebraist Georg Elieser, was born at Hamburg June 23, 1662. He studied at his own native place, at Giessen, and at the leading universities of Germany and Switzerland. He was for a time an instructor at Rostock, and on his return to Hamburg was called to London to preside as pastor over the evangelical Church of the Holy Trinity. He died Nov. 15, 1713. Besides a *Funeral Oration to Queen Mary*, he left in MS. a *History of the Church of England*.—*Hoefer, Nouv. Biog. Génér.* xv, 693. (J. H. W.)

**Edzardi, Sebastian**, youngest son of Esra, was born at Hamburg August 1, 1673. When only eighteen years old he went to Holland and England, and soon after entered the University of Wittenberg,

where he received his M.A. degree in 1695. He then entered upon the study of theology, but in 1696 was appointed professor of logic and metaphysics at the Hamburg Gymnasium. He was a man of vast learning, but his zeal for the Lutherans and his hatred of the Reformed, whom he believed insincere in their professions, engaged him in long and violent controversies. The king of Prussia, Friedrich I (in 1705), ordered five of Edzardi's dissertations written against the Reformed to be burned at Berlin by the hand of the sheriff (Walch, *Ketzer-Historie*, i, 512 sq.; iii, 1087 sq.). But this punishment was of no avail with Edzardi. He even went so far as to impeach the character of the University of Halle, which he called *Hölle* (Tartarus). After the death of his father he aided his brother Georg Elisier in his efforts for the conversion of the Jews. He died June 10, 1736. A complete catalogue of his numerous polemical writings may be found in Thiessen, *Versuch e. Gelehrt. Gesch. von Hamburg*, Th. i, 139-154, and in Moller's *Cimbria Litterata*, i, 147-151. His leading dissertations against a union with the Reformed were, *Dissertat. de unione cum Reformatis hodiernis judicanda* (Hamb. 1703, 4to);—*Diatr. de caus. unionis a Calvinianis quesite* (Hamb. 1704, 4to);—*Pelagianismus Calvinianorum commonstratus* (Hamb. [Viteb.] 1705, 4to);—*Manichæismus Calvinianorum commonstratus, una cum consecratio: nullum esse eocl. c. Calvin. unioni locum* (Hamb. 1705, 4to).—Hoefler, *Nov. Biogr. Génér.* xv, 694; Fuhrmann, *Handwörterb. d. Kirchengesch.* i, 672; Asehbach, *Allgem. Kirchen-Lexikon*, ii, 495; Schröckh, *Kirchengeschichte s. d. Reform.* viii, 231, 232; Grässe, *Allgem. Literaturgeschichte*, vi, 886. (J. H. W.)

**Effectual Calling.** See CALL.

**Effectual PRAYER** is the rendering of an expression which occurs James v, 16; "The *effectual fervent* (ἐνεργουμένη) prayer of a righteous man availeth much." The verb ἐνεργῶ (the root of the English *energy*), thus translated, signifies to *work in*, produce, effect (intransitively, Matt. xiv, 2; Mark vi, 15; or transitively, 1 Cor. xii, 6; Gal. iii, 5; Ephes. i, 11; Phil. ii, 13; or in the "middle voice," Rom. vii, 5; 2 Cor. i, 6; iv, 12; Gal. v, 6; Ephes. iii, 20; Col. i, 29; 1 Thess. ii, 13; 2 Thess. ii, 7). The participle here, if regarded as used in a neuter sense, adjectively, would signify *operative, effective*, and such is the interpretation of most commentators (see Wolli's *Cure*, in loc., for the views and discussions of the older writers); but this produces a tautology with the context (πολλὸν ἰσχύει, "availeth much"), which all efforts have failed to remove (such as that of Meyer, who renders adverbially, "The prayer of a righteous man avails much, *in that it works* [indem es wirkt]," i. e. in its efficiency (so Alford, in loc.). It is better (with Vatablus, Hammond, Whitley, Macknight, Doddridge, and Clarke, to regard it as *passive*, in its literal sense, *inwrought*, implying both earnest unction and divine influence, not full inspiration (although the example of Elijah adduced in the following verse would almost warrant that), but such an afflatus as accompanies the supplications of the believing suppliant. See PRAYER.

**Efficacious Grace.** See GRACE; JANSENISM.

**Effrontes**, an obscure Transylvanian sect of the sixteenth century, who not only denied the Holy Ghost, but, among other fooleries, cut their foreheads and anointed them with oil as a mode of initiation. Hence their name "*effrons*"—out of the brow (Eadie, *Ecol. Cyclop.* s. v.).

**Effusion of the Holy Spirit.** See PENTECOST.

**Egbert or Ecbert**, archbishop of York, was a brother of Eadbert, king of Northumberland, and a pupil, and later a friend, of Beda. As teacher at the cathedral school of York, he became celebrated for extensive knowledge and for his Christian character. Among those who were educated at this school were Alcuin and Aelbert. He became bishop of York in

731, and soon after, in 735, York was made an archbishopric, with metropolitan power over all bishoprics north of the river Humber. Even as bishop and archbishop he continued to give instruction at the cathedral school. He founded a library at York which gained great reputation, but was destroyed by fire in the reign of Stephen. He died in 767, leaving a *Dialogus de Ecclesiastica Institutione* (Dublin, 1664; Lond. 1693; also in Galland's *Bibl. Patr.* xiii, 266), and a collection of canonical prescriptions, *De jure sacerdotali*, of which only a few fragments are extant (Mansi, xii, fol. 411-431). The treatise *De Remedii peccatorum* (Mansi, xii, 489) is probably an extract from the work just named by some other writers. Some penitential books have also been ascribed to Egbert, but falsely.—Mosheim, *Ch. Hist.* ii, 15; Collier, *Ecol. Hist. of England*, vol. i; Wright, *Biog. Brit. Lit. Anglo-Saxon Period*, p. 297; Herzog, *Real-Encykl.* iii, 658; Hoefler, *Biographie Générale*, xv, 700.

**Egbert, Saint**, was born in the 7th century. He was a monk in the convent of Rathmelsing, and in 644, when seized with the plague, he made a vow that, in case of recovery, he would leave his country and preach the Gospel among the pagans. He accordingly set out as a missionary for Germany, but was by a tempest compelled to return. He then took up his abode among the monks of the island of Hy, from where he sent as missionaries to Friesland, first, the learned monk Wictbert, and, when this one returned after two years of fruitless labor, twelve Anglo-Saxons. Egbert had a prominent share in kindling that remarkable missionary zeal which distinguished the Anglo-Saxons in the 8th century. He introduced, in 716, into the monastery of Hy the Roman manner of celebrating Easter, and the Roman tonsure. He died in 729.—Beda, *Hist. Ecol. Angl.* iii, 27; v, 10, 11, 23; Herzog, *Real-Encykl.* iii, 658. (A. J. S.)

**Egede, Hans**, an eminent Danish missionary, called the "apostle of Greenland," was born at Harstad, Norway (which at that time belonged to Denmark), Jan. 31, 1686, and became pastor at Drontheim in 1707. Here he conceived the project of a mission to Greenland, having derived from a history of Norway the impression that formerly there had been Christians in Greenland, where now there were only heathens. "Egede, after receiving some suggestions to this effect from a friend in Bergen, became so enthusiastic on the subject that he wrote to the bishops of Bergen and Drontheim in 1710, proposing an expedition to convert the Greenlanders; and on its striking him that such a recommendation would come with an ill grace from one who did not offer to undertake it himself, he made the offer, supposing, however, as he himself tells us, that as it was war-time, and the expedition would require some money, the proposal would not be accepted. He received in reply a strange letter from the bishop of Drontheim, Krog, in which the prelate suggested that 'Greenland was undoubtedly a part of America, and could not be very far from Cuba and Hispaniola, where there was found such abundance of gold;' concluding that it was very likely that those who went to Greenland would bring home 'incredible riches.' Egede had made this offer; very oddly, without acquainting his wife; and as soon as she became aware of it, by the receipt of the bishop's letters, she, with her mother and his mother, assailed Egede with such strong remonstrances, that, he says in his own account, he was quite conquered, and repulsed his folly with a promise to remain in the land which 'God had placed him in' (*Eng. Cyclop.*). Soon after, his wife, however, gave her consent. In 1717 he threw up his benefice at Vaagen, and went with his family to Bergen, endeavoring to find a company to trade with Greenland. The merchants did not receive this project favorably, and Egede determined to lay his plans before the king at Copenhagen. "Fred-

erick IV of Denmark, who had already, in 1714, founded a college for the propagation of the Gospel, sent Egede back to Bergen with his approbation: a company was formed, to which Egede put down his name for the first subscription of 300 dollars, and finally, on May 3, 1721, a ship called 'Haabet,' or 'The Hope,' set sail for Greenland, with forty-six souls on board, including Egede and his family. On the 3d of July, after a dangerous voyage, they set foot on shore at Baalrevier, on the western coast, and were, on the whole, hospitably received by the natives. The very appearance of the Greenlanders at once put a negative on the supposition that they were descended from the Northmen, and their language, which it was now the missionary's business to learn, was found to be entirely of a different kind, being, in fact, nearly related to that spoken by the Esquimaux of Labrador. The climate and the soil were both harsher and ruder than the Norwegians had expected, and the only circumstance that was in their favor was the character of the inhabitants, which, though at first excessively phlegmatic, so as to give the idea that their feelings had been frozen, was neither cruel, nor, as was found by further experience, unadapted to receive religious impressions. For some years the mission had a hard battle for life. The settlers, unable to obtain sufficient food by fishing and the chase, were entirely dependent on the supply of provisions sent them by annual store-ships from Denmark, and when this supply was delayed, were reduced to short rations and the dread of starvation. On one occasion even Egede's courage gave way, and he had made up his mind to abandon the mission and return to Europe unless the provisions arrived within fourteen days. His wife alone opposed the resolution, and refused to pack up, persisting in predicting that the store-ship would arrive in time; and, ere the time had elapsed, the ships, which had missed the coast, found their way, and brought tidings that, rather than give up the attempt to Christianize Greenland, the king had ordered a lottery in favor of it, and, on the lottery's failing, had imposed a special tax on Denmark and Norway under the name of the Greenland Assessment. In 1727 the Bergen company for trading with Greenland was dissolved, from the losses it had sustained, and the Danish government then resolved on founding a colony in Greenland, and sent in 1728 a ship of war, with a body of soldiers under the command of a Major Paars. The soldiers grew mutinous when they saw to what a country they had been sent, and Egede found his life in more danger from his countrymen than it had ever been from the natives. The death of king Frederick IV, in 1731, occasioned a change of affairs. The new king, Christian IV, determined to break up the colony and recall all his subjects from Greenland, with the exception of such as chose to remain of their own free-will, to whom he gave directions that provisions were to be allowed for one year, but that they were to be led to expect no further supply. Egede had then been ten years in Greenland, and his labors were beginning to bear fruit. His eldest son Paul, who was a boy of twelve when they landed, had been of much assistance in learning the language and in other ways; his wife and the younger children had aided greatly in producing a favorable effect on the natives, who had seen no Europeans before except the crews of the Dutch trading-vessels. The angekokks, or conjurers, who might almost be called the priests of the native religion, had been awed, some into respect and others into silence, by the mildness and active benevolence of the foreign angekok; the natives had seen with wonder the interest he took in their welfare, and, if they refused to believe the new doctrines themselves, had not forbidden them to their children, of whom Egede had a hundred and fifty baptized. The elder Greenlanders, when Egede told them of the efficacy of prayer, asked him to pray that there should be no winter; and when he

spoke of the torment of fire, said they should prefer it to frost. Egede, confirmed by his wife, resolved to remain, and this resolution greatly increased his influence over the Greenlanders, who knew that it could only proceed from zeal in their behalf. The king of Denmark, unable to resist his constancy, sent another year's provision beyond what he had promised, and finally, in 1733, announced that he had changed his mind, and determined to devote a yearly sum to the Greenland mission. A dreadful trial was approaching. The Greenland children, of whom some had occasionally been sent to Denmark, almost all died of the small-pox. Two of them were returning home from Copenhagen in the vessel which came in 1733; one of them died on the voyage, the other brought the disorder to Greenland, and the mortality was dreadful. From September, 1733, to June, 1734, the contagion raged to a degree that threatened to depopulate Greenland. When the trading-agents afterwards went over the country, they found every dwelling-house empty for thirty leagues to the north of the Danish colony, and the same devastation was said to have extended still farther south: the number of the dead was computed at 3000. That winter in Greenland offered a combination of horrors which could seldom be equalled, but they were met with admirable constancy by Egede and his indefatigable wife. The same ship that brought the small-pox had brought the assistance of some Moravian missionaries. In the year 1734 his son Paul Egede returned from Copenhagen, whither he had been sent to study, and the elder Egede, finding his health begin to fail, applied for leave to return home. The permission reached him in 1735, but his return was delayed from the illness of his wife, who longed to see her native land again, but was denied that gratification, dying finally in Greenland on the 21st of December, 1735, at the age of 62. Egede carried her coffin with him to Denmark, and she was buried in Copenhagen, where she was followed to the grave by the whole of the clergy of the city. A seminary for the Greenland mission was established there in 1740, and Egede was appointed superintendent, with the title of bishop. In the same year he preferred a memorial for an expedition to be sent out to discover the lost 'eastern colony' of the old Norwegians, and offered to accompany it in person, but the proposal was not adopted. In 1747 Egede retired from his office at Copenhagen, and spent most of the remainder of his life at the house of his daughter Christine, who was married to a clergyman of the island of Falster. While he was at Copenhagen he had married a second wife, who accompanied him to Falster, but before his last illness he expressed his wish that he should be buried by the side of his first wife at Copenhagen, and said that if they would not promise to carry this wish into effect, he would go to Copenhagen to die there. He died at Falster on the 5th of November, 1758" (*Eng. Cyclop.*). He wrote two books on the history of his life's labors. The first was, *Relation angaaende den Grønlandske Missions Begyndelse og forsøttelse* (Copenh. 1738; German, Hamb. 1748). It is rich in materials, but dry in style. Its chief recommendation is its sincerity. The reader is disposed to give entire confidence to the missionary, who not only tells him that on one occasion he labored earnestly in his vocation, but that on another he occupied himself for days in the study of alchemy; who not only speaks of the ardor of his faith at times, but tells us that at others he was seized with a hatred of his task and of religion altogether. *Den gamle Grønlands nye Perlestrat* (Copenh. 1741-4) was translated into French (1763), and into English in 1745, under the title of *A Description of Greenland*. The translation was reprinted in 1818. It comprises his observations on the geography and natural history of Greenland, and the manners of its inhabitants. See *Engl'sh Cyclopaedia*, s. v.; Herzog, *Real-Encycl.* iii, 639; Voelfer, *Nouv. Biog. Générale*, xv, 702; Brauer, *Leitrag zur*

*Gesch. der Heidenbekehrung* (part iii, 1839); Rudelbach, *Christl. Biogr.* (part vi).

**Egede, Paul**, son of Hans, was born at Waagen, Norway; went to Greenland in 1720, in his twelfth year; afterwards studied at Copenhagen; returned to Greenland in 1734; finally left it in 1740, and was, in reward for his labors, appointed chaplain of the hospital of the Holy Ghost, member of the College of Missions, director of the Hospital of Orphans, and finally (1776) bishop of Greenland. Having retired to the house of his son-in-law, pastor Saabye, he did not cease to urge the Danish government to send new expeditions to that colony, and had the joy of seeing his wishes finally complied with. He died June 3, 1789. He wrote and published a Greenland grammar (*Grammatica Grœnlandico-Lat.-Dan.*, Copenh. 1760) and dictionary (*Dictionarium Grœnlandicum-Dano-Latinum*, Copenh. 1751), which have since been improved by Fabricius; translated the New Testament into the language, and was the author of a work, *Ejterretninger om Grønland* (*Information on Greenland*, Copenh. 1789), which is one of the most interesting in Danish literature. It gives a history of the mission from 1720 to 1788 in a more interesting style than his father was master of.—*Hoefer, Nouv. Biogr. Génér.* xv, 705.

**Egel.** See HEIFER.

**Egg** (אֵי, *beytsah'*, so called from its whiteness, *óóv*) occurs, in the plur., of eggs deserted (Isa. x, 14), of the eggs of a bird (Deut. xxii, 6), of the ostrich (Job xxxix, 14), or the cockatrice (Isa. lix, 5). See FOWL; OSTRICH; COCKATRICE. It is apparently in this last sense that an egg is contrasted with a scorpion in Luke xi, 12, as a desirable article of food. The body of the scorpion is said to be very like an egg; the head can scarcely be distinguished, as it appears to be joined and continued to the breast. Bochart adduces authorities to prove that scorpions in Judea were about the size of an egg (Job xxxix, 14; Isa. x, 14; lix, 5). The passage in Deut. xxii, 6, humanely prohibits the taking away of a brooding bird from a nest, and is similar in its nature to the provision respecting other animals and their young (Lev. xxii, 28).

Eggs are usually considered a great delicacy in the East, and are served up with fish and honey at their entertainments. Among the ancient Egyptians poultry seems to have been bred in abundance, and the most remarkable thing connected with it is the manner in which the eggs were hatched by artificial means, and which, from the monuments, we have reason to infer, was known and practised there at a very early period. At the present time there are as many as four hundred and fifty of these establishments, which, being heavily taxed, produce a large revenue to the government. The proprietors of these egg-ovens make the round of the villages in their vicinity, and collect eggs from the peasants, which are given in charge to the rearers, who, without any previous examination, place all they receive on mats strewn with bran, in a room eleven feet square, with a flat roof, and about four feet high, over which is a chamber of the same size, but with a vaulted roof, about nine feet high; a small aperture in the centre of the vaulted roof admitting light during the warm weather, and another of larger diameter immediately below, communicating with the oven, through whose ceiling it is pierced. By this the man descends to observe the eggs; but in the cold season both openings are closed, and a lamp is kept burning instead, another entrance at the front part of the oven being then used for the same purpose, and shut immediately on his quitting it. In the upper room, the fire is disposed along the length of two troughs, based with earthen slabs, reaching from one side to the other against the front and back walls. In the oven the eggs are placed in a line corresponding to and immediately below the fire, where they remain half a day. They are then removed to a warmer

place, and replaced by others, and so on, till all have taken their share of the warmest positions, to which each set returns, again and again, in regular succession, till the expiration of six days. They are then held up one by one towards a strong light, and if the egg appears clear, and of a uniform color, it is evident it has not succeeded; but if it shows an opaque substance within, or the appearance of different shades, the chicken is already formed; and these last are all returned to the oven for four days more, their positions being changed as before. At the expiration of the fourth day they are removed to another oven, over which, however, there are no fires, where they remain for five days in one heap, the aperture in the roof being closed with tow to exclude air; after which they are placed separately about one, two, or three inches apart, over the whole surface of the mats, which are sprinkled with a little bran. They are now continually turned and shifted from one part of the mats to another for six or seven days, all air being carefully excluded, and are constantly examined by one of the rearers, who applies each singly to his upper eyelid. Those which are cold prove the chickens to be dead; but warmth greater than that of the human skin is the favorable sign that the eggs have succeeded. The average temperature maintained is from 100° to 105°. The manager, having been accustomed to his art from his youth, knows from experience the exact temperature required for the success of the operation, without having any instrument like our thermometer to guide him. Each *ma'amal*, or set of ovens, receives about one hundred and fifty thousand eggs during the annual period of its being brought into use, which is only during about two or three months in the spring. Of this number, generally one quarter, or a third, fail to be productive; so that when the peasants bring their eggs to be hatched, the proprietor of the *ma'amal* returns one chicken for every two eggs. The fowls produced in this way are inferior both in size and flavor to those of Europe (Wilkinson's *Anc. Egyptians*, ii, 170, Am. ed.; Lane's *Mod. Egyptians*, ii, 5).

The word חֵלֶבֶת, *challamuth'*, in Job vi, 6, which our translators have rendered "the white of an egg," is so rendered by the Hebrew interpreters, and the Targum, or rather, "the slime of the yolk of an egg." The Syriac interpretation gives "a tasteless herb," which is there proverbially used for something unsavory or insipid. See PURSLAIN.

**Egidio Antonini**, surnamed of Viterbo, Latin patriarch of Constantinople, was born at Viterbo in the second half of the 15th century. He was received into the order of the hermits of St. Augustine at the early age of ten years; was professor of philosophy and theology in several towns of Italy, and became one of the most eloquent preachers of his epoch. Having become general of his order in 1507, he was appointed patriarch of Constantinople, and bishop of Viterbo, Nepi, Castro, and Sutri. In 1512 he opened, by order of pope Julius II, the Council of Lateran, and on this occasion severely censured the corruption prevailing in the Church, and, in particular, among the clergy. In 1517 pope Leo X sent him to Germany, and appointed him cardinal; in the following year he was sent as papal legate to Spain. Egidio was well versed in the Oriental languages, and a good Latin poet. He wrote a commentary to the first three chapters of Genesis and to several psalms, Latin dialogues, epistles, and poems, and a treatise *De ecclesie incremento*. Some of these works are given in Martene et Durand, *Amplissima Collectio veterum monumentorum*, tom. iii.—*Hoefer, Nouv. Biogr. Génér.* xv, 718. (A. J. S.)

**Egidius.** See ÆGIDIUS.

**Egidius.** See GIL JUAN.

**Eginhard** or **Einhard** (sometimes also called Agenhard or Ainhard), the biographer of Charle-

magne, was born about 770. The place of his birth is entirely unknown. At an early age he repaired to the court of Charlemagne, and became a pupil of Alcuin. Eginhard gained the favor of the emperor to a high degree, and an intimate friendship sprang up between him and the emperor's children, especially the emperor's oldest son and successor, Louis le Débonnaire. The emperor appointed him his private secretary, and superintendent of public buildings at Aix-la-Chapelle. Eginhard accompanied the emperor in all his marches and journeys, never separating from him excepting on one occasion (806), when he was dispatched by Charlemagne, on a mission to pope Leo, in order to obtain the signature of the pope for the document which divided the empire among the sons of Charlemagne. The emperor departed in his case, as in that of Alcuin, Angilbert, and some other friends, from his habit not to cumulate ecclesiastical benefices in one hand, and gave to him the abbeys of St. Bavo and Blandenberg in Ghent, St. Lerontius in Maestricht, Fritzlär in Germany, St. Wandregisil in France, and others. On the death of Charlemagne, he was appointed preceptor of Lothaire, son of Louis le Débonnaire. The latter presented him with a large tract of land in the Odenwald, the centre of which was Michelstadt. Here Eginhard spent the last years of his life in retirement. He was in 826 ordained presbyter, and in 827 assumed as abbot the direction of a monastery at Seligenstadt, which he had erected upon his estates. As his wife Emma was still alive at this time, he appears to have agreed with her to consider her only as a sister. The report that his wife was a daughter of Charlemagne is probably untrue. The year of his death is unknown. He was still alive in 848. He probably had no children, and the claim of the counts of Erbach, who trace their descent from him, and in whose castle the coffins of Eginhard and his wife are still shown, is probably unfounded. The reputation of Eginhard rests chiefly upon his life of Charlemagne (*Vita et Conversatio Gloriosissimi Imperatoris Karoli Regis Magni*, completed about 820), which is generally regarded as the most important historical work of a biographical nature that has come down to us from the Middle Ages. It frequently served as a model for other biographies, and was extensively used as a school-book. The best edition is that of Pertz (1829), in vol. ii. of the *Monumenta Germanicæ historica*; another edition, with valuable notes and documents, was published by Ideler, *Leben u. Wandel Karl's des Grossen* (Gotha, 1839, 2 vols.). Another work, the *Annales Regum Francorum, Pipini, Caroli Magni, Ludovici Imperatoris*, embraces the period from 741 to 829 (published in Pertz, *Monumenta*, vol. i). The first part (741-788) is based on the Annals of Lorsch; the second part is original. He also wrote an account of the transfer of the relics of St. Marcellin and St. Peter from Rome to his monastery in Seligenstadt (*Historia translationis St. Marcellini et Petri*, in *Acta Sanctorum*, June 2). His *Epistolæ*, 62 in number, are also of considerable value in a historical point of view. They are published in Weinkens, *Eginhardus vindicatus* (Franç. 1714). Another work, *Libellus de adoranda cruce*, is lost. The French consider the edition of Eginhard's works by M. Tenlot, with a translation and life of Eginhard (Paris, 1840-43, 2 vols.), to be the best and most complete.—Cave, *Hist. Lit.*, anno 814; Moshelm, *Ch. Hist.* cent. viii. chap. ii, note 43; Herzog, *Real-Encykl.* iii, 725; Dahl, *Ueber Eginhard und Emma* (Darmstadt, 1817). (A. J. S.)

**Eg'lah** (Heb. *Eglah*, עֵגְלָה, a heifer, as often; Sept. Αἴγλα and Ἀγλα), one of David's wives during his reign in Hebron, and the mother of his son Ithream (2 Sam. iii. 5; 1 Chron. iii. 3). B.C. 1045. In both lists the same order is preserved, Eglah being the sixth and last, and in both is she distinguished by the special title of David's "wife." According to the an-

cient Hebrew tradition preserved by Jerome (*Quæst. Hebr.* on 2 Sam. iii. 5; vi, 23), she was MICHAL (q. v.), the wife of his youth, and she died in giving birth to Ithream. A name of this signification is common among the Arabs at the present day.—Smith, s. v. See also EGLATH.

**Eg'taim** (Heb. *Eglā' yim*, עֵגְלַיִם, two ponds; Sept. Ἀγαλείμ, Vulg. *Gallim*), a place named in Isa. xv, 8, apparently as one of the most remote points on the boundary of Moab. It is probably the same as the EN-EGLAIM (q. v.) of Ezek. xlvii, 10. Eusebius and Jerome (*Onomast.* s. v. Ἀγαλλεῖμ, *Agallcim*) say that it still existed in their day as a village (Ἀγαλλεῖμ), eight miles south of Areopolis, i. e. Ar-Moab. Exactly in that position, however, stands Kerak, the ancient Kir-Moab. A town named *Agalla* (Ἀγάλλα) is mentioned by Josephus with Zoar and other places as in the country of the Arabians (*Ant.* xiv, 1, 4). Some have also confounded it with GALLIM (q. v.). De Saulcy conceives Eglaim to be the same with a place which he names *Wady Ajerrah*, not far north of the ruins of Rabbah, but on slender grounds (*Dead Sea*, i, 262, 270). See also EGLATH; EGLON 3.

**Eglath** or **Eglah** (q. v.), in the phrase עֵגְלַת הַשְּׁלִישִׁיָּה, *eglah' shelishiyah*, Isa. xv, 5; Jer. xlviii, 34, which literally signifies a heifer of the third year; Sept. ἑταῖα τρίτης (unt v. r. ἑταῖα Σαδισία in Jer.); Vulg. vitula tertians; A. V. "a heifer three years old;" and so the Targum, and most modern interpreters (Hitzig, Umbreit, etc.). Others (as Knobel, Winer, etc.) understand the term to be the proper name of a place on the border of Moab, mentioned in connection with Zoar, Luhith, and Horonaim (q. v. respectively), and so compare it with the *Agalla* of Josephus (*Ant.* xiv, 1, 4) and the *Necla* (or *Jecla*, Νέκλα or Ἰέκλα) of Ptolemy (v, 17, 5), which lay in this region (Lightfoot, *Hor.* Hebr. p. 931), and with the modern region *Ajlan* north of Jabbok (Abulfeda, *Syr.* 13, 93; Robinson, *Research.* iii, App. p. 162), as the last name has in Arab. the same signification as the Heb. See EGLAIM.

**Eglinus**, RAPHAEL, also called Iconius, a minister of the Reformed Church, was born at Rüssicon, in the Swiss canton of Zurich, Dec. 28, 1559. After studying theology at Zurich, Geneva, and Basel, he for some time taught school at Sonders, in the Veltlin (now part of Lombardy); but, with the Protestants generally, he had to leave this place in 1586. After working for some time as teacher and "diaconus" in Winterscheid, and as "pædagogus" at the college of the alumni at Zurich, he was, in 1592, appointed professor of the New Testament in the latter city. Becoming absorbed in the study of theosophy and alchemy, he spent his whole property in experiments, and in 1601 had to flee on account of debts which he had contracted. Through the intercession of his friends he obtained, however, permission to return, and an honorable dismissal. He went to Cassel, where landgrave Moritz, himself a great friend of alchemy, appointed him teacher at the court school, and later, June 13, 1606, professor of theology at Marburg. From the theological faculty of this university he received, in 1607, the title of D.D. Subsequently Moritz also appointed him court preacher at Marburg. He died May 20, 1622. Eglinus was one of the first Reformed theologians in Hesse where landgrave Moritz and his successors endeavored to supplant Lutheranism by the Reformed Church. He wrote in defence of his creed a number of small essays, the most important of which relate to the doctrine of predestination. He is one of those writers in whom the German reformed theology became more scholastic in its character, and was merged in the stricter Calvinistic tendency. In 1618 Eglinus wrote an apology of the Rosicrucians, of which association he had become an active member. He also wrote several books on alchemy and on the

Apocalypse. A complete list of his works is given by Strieder, *Grundlage zu einer Hess. Gelehrten-Gesch.*—Heppé, in Herzog, *Real-Encyclopädie*, xix, 456; Hagenbach, *History of Doctrines* (edited by Smith), ii, 175. (A. H. S.)

**Eg'lon** (Heb. *Eglon'*, עִגְלוֹן, place of heifers, q. d. *vituliné*), the name of a man, and also of two places.

1. (Sept. *'Eglómu*, Josephus *'Eglón*, Vulgate *Eglon*.) An early king of the Moabites (Judg. iii, 12 sq.), who, aided by the Ammonites and the Amalekites, crossed the Jordan and took "the city of palm-trees," or Jericho (Josephus). B.C. 1527. Here he built himself a palace (Josephus, *Ant.* v, 4, 1 sq.), and continued for eighteen years to oppress the children of Israel, who paid him tribute (Josephus). Whether he resided at Jericho permanently, or only during the summer months (Judg. iii, 20; Josephus), he seems to have formed a familiar intimacy (*συνήθης*, Josephus, not Judg.) with Ehud, a young Israelite (*νεανίας*, Josephus) who lived in Jericho (Josephus, not Judg.), and who, by means of repeated presents, became a favorite courtier of the monarch. Eglon subdued the Israelites beyond the Jordan, and the southern tribes on this side the river, and made Jericho the seat, or one of the seats, of his government. This subjection to a power always present must have been more galling to the Israelites than any they had previously suffered. At length (B.C. 1509) they were delivered, through the instrumentality of Ehud, who slew the Moabite king (Judg. iii, 12-33).—Kitto, s. v.; Smith, s. v. See **EHUD**.

2. (Sept. *'Eglómu* v. r. *Αἰλάμ*, but in Josh. x, 'Ὀδολάμ; Vulgate *Eglon*, *Aglon*.) A city in the maritime plain of Judah, near Lachish (Josh. xv, 39), formerly one of the royal cities of the Canaanites (xii, 12). Its Amoritic king Debir (q. v.) formed a confederacy with the neighboring princes to assist Adoni-zedek, king of Jerusalem, in attacking Gibeon, because that city had made peace with Joshua and the Israelites (Josh. x, 3, 4). Joshua met the confederated kings near Gibeon and routed them (Josh. x, 11). Eglon was soon after visited by Joshua and destroyed (x, 34, 35). Eusebius and Jerome (*Onomast.* s. v. *'Eglómu*, *Eglon*) erroneously identify it with *Odollam* or *ADULLAM* (q. v.), and say it was still "a large village," ten R. miles (Jerome, twelve) east of Eleutheropolis, being misled by the unaccountable reading of the Sept. as above. On the road from Eleutheropolis to Gaza, nine miles from the former and twelve from the latter, are the ruins of *Ajlan*, which mark the site of the ancient Eglon (Robinson, *Researches*, ii, 392). The site is now completely desolate. The ruins are mere shapeless heaps of rubbish, strewn over a low, white mound (Porter, *Handb. for Syria*, p. 262). The absence of more imposing remains is easily accounted for. The private houses, like those of Damascus, were built of sun-dried bricks; and the temples and fortifications of the soft calcareous stone of the district, which soon crumbles away. A large mound of rubbish, strewn with stones and pieces of pottery, is all we can now expect to mark the site of an ancient city in this plain (Van de Velde, *Narrative*, ii, 188; Thomson, *Land and Book*, ii, 356).

3. Another important place of this name (עִגְלוֹן), according to Schwarz (*Palest.* p. 235), is mentioned in Talmudical authorities as situated within the bounds of Gad. He identifies it with the present village *Ajlan*, one mile east of Kulat er-Rubud, or Wady Rejil, which runs parallel with Jebel Ajlun on the south (see Robinson's *Map*, and comp. *Researches*, ii, 121). The village is built on both sides of the narrow rivulet Jenne, and contains nothing remarkable except a few ancient mosques (Burckhardt, *Syria*, p. 266).

**Egoism.** See **SELFISHNESS**.

**Egypt** (or, more strictly, *Ægypt*, since the word

is but Anglicized from the Gr. and Lat. Αἴγυπτος, *Ægyptus*), a region important from the earliest times, and more closely identified with Bible incidents than any other, except the Holy Land itself. For a vindication of the harmony between Scripture history and the latest results of Egyptological research (Brugsch, *Aus dem Orient*, Berl. 1864), see Volck in the *Dorpater Zeitschrift*, 1867, ii, art. 2.

I. **Names.**—The common name of Egypt in the Heb. Bible is *Mizraim*, מִצְרַיִם, *Misra'yim* (or, more fully, "the land of Mizraim"). In form *Mizraim* is a dual, and accordingly it is generally joined with a plural verb. When, therefore, in Gen. x, 6, *Mizraim* is mentioned as a son of Ham, some conclude that nothing more is meant than that Egypt was colonized by descendants of Ham. See **MIZRAIM**. The dual number doubtless indicates the natural division of the country into an upper and a lower region, the plain of the Delta and the narrow valley above, as it has been commonly divided at all times. The singular *Mazor*, מִצֹר, *Matsor'*, also occurs (2 Kings xix, 24; Isa. xxxvii, 25; perhaps as a proper name in Isa. xix, 6; Mic. vii, 12; A. V. always as an appellative, "besieged city," etc.), and some suppose that it indicates Lower Egypt, the dual only properly meaning the whole country; but there is no sure ground for this assertion. See **Mazor**. The mention of *Mizraim* and *Pathros* together (Isa. xi, 11; Jer. xlv, 1, 15), even if we adopt the explanation which supposes *Mizraim* to be in these places by a late usage put for *Mazor*, by no means proves that, since *Pathros* is a part of Egypt, *Mizraim*, or rather *Mazor*, is here a part also. The mention of a part of a country by the same term as the whole is very usual in Hebrew phraseology. This designation, at all events, is sometimes used for Egypt indiscriminately, and was by the later Arabs extended to the entire country. Josephus (*Ant.* i, 6, 2) says that all those who inhabit the country call it *Mestre* (Μέστρη), and the Egyptians *Mestreaus* (Μέστραυοί). The natives of Modern Egypt invariably designate it by the name *Misr*, evidently cognate with its ancient Heb. appellation (Hackett's *Illustra. of Scripture*, p. 120).

Egypt is also called in the Bible מִצְרַיִם, "the land of Ham" (Psa. cv, 23, 27; comp. lxxviii, 51), referring to the son of Noah. See **HAM**. Occasionally (Psa. lxxxvii, 4; lxxxix, 10; Isa. li, 9) it is poetically styled *Ra'hab*, רַחַב, i. e. "the proud" or "insolent." See **RAHAB**. The common ancient Egyptian

name of the country is written in hieroglyphics 

**KEM**, which was probably pronounced *Chem*; the demotic form is **KEMI** (Brugsch, *Geographische Inschriften*, i, 73, No. 362); and the Coptic forms are *Chamē* or *Chemī* (Memphitic), *Kemē* or *Kēmē* (Sahidic), and *Kēni* (Bashmuric). This name signifies, alike in the ancient language and in Coptic, "black," and may be supposed to have been given to the land on account of the blackness of its alluvial soil (comp. Plutarch, *De Is. et Osir.* c. 33). It would seem, however, to be rather a representative of the original Heb. name *Ham* (i. e. *Cham*), which likewise in the Shemitic languages denotes *sun-burnt*, as a characteristic of African tribes. The other hieroglyphic names of Egypt appear to be of a poetical character.

The Greek and European name (ἡ Αἴγυπτος, *Ægyptus*), Egypt, is of uncertain origin and signification (Champollion, *L'Égypte*, i, 77). It appears, however, to have some etymological connection with the modern name *Copt*, and is perhaps nothing more than "land of the Copts" (the prefix *ai-* being perhaps for *aia*=*γαία* or *γη*). In Homer the Nile is sometimes (*Odys.* iv, 351, 355; xiv, 257, 258) called Egypt (Αἴγυπτος).

Modern Egypt.

II. *Extent and Population.*—Egypt occupies the north-eastern angle of Africa, between N. lat.  $31^{\circ} 37'$  and  $24^{\circ} 1'$ , and E. long.  $27^{\circ} 13'$  and  $34^{\circ} 12'$ . On the E. it is bounded by Palestine, Idumæa, Arabia Petrea, and the Arabian Gulf. On the W., the moving sands of the wide Libyan desert obliterate the traces of all political or physical limits. Inhabited Egypt, how-

ever, is restricted to the valley of the Nile, which, having a breadth of from two to three miles, is enclosed on both sides by a range of hills: the chain on the eastern side disappears at Mokattam, that on the west extends to the sea. Its limits appear to have always been very nearly the same. In Ezekiel (xxix, 10; xxx, 6), according to the obviously correct rendering

Egypt under the Romans.

(see MIGDOL), the whole country is spoken of as extending from Migdol to Syene, which indicates the same limits to the east and the south as at present. Egypt seems, however, to have always been held, except by the modern geographers, to include no more than the tract irrigated by the Nile lying within the limits we have specified. The deserts were at all times wholly different from the valley, and their tribes more or less independent of the rulers of Egypt. Syene, now Aswan, is also assigned by Greek and Arabian writers as the southern limit of Egypt. Here the Nile issues from the granite rocks of the cataracts, and enters Egypt proper. The length of the country, therefore, in a direct line, is 456 geographical miles. The breadth of the valley between Aswan and the Delta is very unequal; in some places the inundations of the river extend to the foot of the mountains; in other parts there remains a strip of a mile or two in breadth, which the water never covers, and which is therefore always dry and barren. Originally the name *Egypt* designated only this valley and the Delta; but

at a later period it came to include also the region between this and the Red Sea from Berenice to Suez, a strong and mountainous tract, with only a few spots fit for tillage, but better adapted to pasturage. It included also, at this time, the adjacent desert on the west, as far as to the oases, those fertile and inhabited islands in the ocean of sand. The name *Delta*, also, was extended so as to cover the districts between Pelusium and the border of Palestine, and Arabia Petraea; and on the west it included the adjacent tract as far as to the great deserts of Libya and Barca, a region of sand of three days' journey east and west, and as many north and south.

Egypt, in the extensive sense, contains 115,200 square geographical miles, yet it has only a superficies of about 9582 square geographical miles of soil, which the Nile either does or can water and fertilize. This computation includes the river and lakes as well as sandy tracts which can be inundated, and the whole space either cultivated or fit for cultivation is no more than about 5626 square miles. Anciently 2735 square

miles more may have been cultivated, and now it would be possible at once to reclaim about 1295 square miles. These computations are those of Colonel Jacotin and M. Estève, given in the Memoir of the former in the great French work (*Description de l'Égypte*, 2d ed. xviii, pt. ii, p. 101 sq.). They must be very nearly true of the actual state of the country at the present time. Mr. Lane calculated the extent of the cultivated land in A.D. 1375-6 to be 5590 square geographical miles, from a list of the cultivated lands of towns and villages appended to De Sacy's *Abd-Allatif*. He thinks this list may be underrated. M. Mengin made the cultivated land much less in 1821, but since then much waste territory has been reclaimed (Mrs. Poole, *Englishwoman in Egypt*, i, 85). The chief differences in the character of the surface in the times before the Christian era were that the long valley through which flowed the canal between the Nile and the Red Sea was then cultivated, and that the Gulf of Suez perhaps extended further north than at present.

As to the number of its inhabitants, nothing very definite is known. Its fertility would doubtless give birth to and support a teeming population. In very remote times as many as 8,000,000 souls are said to have lived on its soil. In the days of Diodorus Siculus they were estimated at 3,000,000. Volney made the number 2,300,000. A late government estimate is 3,200,000, which seems to have been somewhat below the fact (Bowring's *Report on Egypt and Candia*, p. 4). According to the census taken in 1867, the inhabitants are 4,911,619. Among them are half a million of Copts, descendants of the ancient occupants of the country; 400,000 Bedouins; 250,000 Europeans and Syrians; and 500,000 Turks. In Alexandria, at the close of the last century, scarcely 40,000 inhabitants were counted, whereas at present that city contains 300,000, about half of whom are Arabs and half Europeans. The nationality of the latter has been ascertained to be as follows (the figures represent thousands): Greeks, 25; Italians, 18; French, 16; Anglo-Maltese, 13; Syrians and natives of the Levant, 12; Germans and Swiss, 10; various, 6. Cairo, the capital, contains upwards of 400,000 inhabitants; within its walls are 140 schools, more than 400 mosques, 1166 cafés, 65 public baths, and 11 bazars. The other towns of importance, from their population, are, in Lower Egypt, Damietta, 45,000; Rosetta, 20,000; and in Upper Egypt, Syout, on the left bank of the Nile, numbering 20,000 souls.

III. *Geographical Divisions*.—Under the Pharaohs Egypt was divided into Upper and Lower, "the two regions" TA-TI? called respectively "the Southern Region" TA-RES, and "the Northern Region" TAME-III. There were different crowns for the two regions, that of Upper Egypt being white, and that of Lower Egypt red, the two together composing the *pschent*. The sovereign had a special title as ruler of each region: of Upper Egypt he was SUTEN, "king," and of Lower Egypt SHEBT, "bee," the two combined forming the common title SUTEN-SHEBT. The initial sign of the former name is a bent reed, which illustrates what seems to have been a proverbial expression in Palestine as to the danger of trusting to the Pharaohs and Egypt (1 Kings xviii, 21; Isa. xxxvi, 6; Ezek. xxix, 6); the latter name may throw light upon the comparison of the king of Egypt to a fly, and the king of Assyria to a bee (Isa. vii, 18). It must be remarked that Upper Egypt is always mentioned before Lower Egypt, and that the crown of the former in the *pschent* rises above that of the latter. In subsequent times the same division continued. Manetho speaks of it (ap. Josephus, *c. Apion*, i, 14), and under the Ptolemies it still prevailed. In the time of the Greeks and Romans, Upper Egypt was divided into the Heptanomis and the Thebais, making altogether three provinces, but the division of the whole country into two was even then the most usual. The Thebais

extended from the first cataract at Philæ to Hermopolis, the Heptanomis from Hermopolis to the point where the Delta begins to form itself. About A.D. 400 Egypt was divided into four provinces, Augustamnica Prima and Secunda, and Ægyptus Prima and Secunda. The Heptanomis was called Arcadia, from the emperor Arcadius, and Upper Egypt was divided into Upper and Lower Thebais.

From a remote period Egypt was subdivided into *nomes* (HESPU, sing. HESP), each one of which had its special objects of worship. The monuments show that this division was as old as the earlier part of the twelfth dynasty, which began cir. B.C. 1900. They are said to have been first 36 in number (*Diod. Sic.* i, 54; Strabo, xvii, 1). Ptolemy enumerates 44, and Pliny 46; afterwards they were further increased. There is no distinct reference to them in the Bible. In the Sept. version, indeed, הַמְּלָכּוּת (Isa. xix, 2) is rendered by *rómos*, but we have no warrant for translating it otherwise than "kingdom." It is probable that at that time there were two, if not three kingdoms in the country. Two provinces or districts of Egypt are mentioned in the Bible, Pathros (q. v.) and Caphor (q. v.); the former appears to have been part of Upper Egypt; the latter was evidently so, and must be represented by the Coptite nome, although no doubt of greater extent. The division into nomes was more or less maintained till the invasion of the Saracens. Egypt is now composed of 24 departments, which, according to the French system of geographical arrangement, are subdivided into *arrondissements* and *cantons* (Bowring's *Report*).

IV. *Surface, Climate, etc.*—The general appearance of the country cannot have greatly changed since the days of Mosès. The Delta was always a vast level plain, although of old more perfectly watered than now by the branches of the Nile and numerous canals, while the narrow valley of Upper Egypt must have suffered still less alteration. Anciently, however, the rushes must have been abundant; whereas now they have almost disappeared, except in the lakes. The whole country is remarkable for its extreme fertility, which especially strikes the beholder when the rich green of the fields is contrasted with the utterly-bare yellow mountains or the sand-strewn rocky desert on either side. Thus the plain of Jordan, before the cities were destroyed, was, we read, "well watered everywhere" . . . "[even] like a garden of the Lord, like the land of Egypt" (Gen. xiii, 10). The aspect of Egypt is remarkably uniform. The Delta is a richly-cultivated plain, varied only by the mounds of ancient cities and occasional groves of palms. Other trees are seldom met with. The valley in Upper Egypt is also richly cultivated. It is, however, very narrow, and shut in by low hills, rarely higher than 300 feet, which have the appearance of cliffs from the river, and are not often steep. They, in fact, form the border of the desert on either side, and the valley seems to have been, as it were, cut out of a table-land of rock. The valley is rarely more than twelve miles across. The bright green of the fields, the reddish-brown or dull green color of the great river, the tints of the bare yellow rocks, and the deep blue of the sky, always form a pleasant view, and often one of great beauty. The soil consists of the mud of the river, resting upon desert sands; hence this country owes its existence, fertility, and beauty to the Nile, whose annual overflow is indispensable for the purposes of agriculture. The country around Syene and the cataracts is highly picturesque; the other parts of Egypt, and especially the Delta, are exceedingly uniform and monotonous. The prospect, however, is extremely different, according to the season of the year. From the middle of the spring season, when the harvest is over, one sees nothing but a gray and dusty soil, so full of cracks and chasms that he can hardly pass along. At the time

of the autumnal equinox, the whole country presents nothing but an immeasurable surface of reddish or yellowish water, out of which rise date-trees, villages, and narrow dams, which serve as a means of communication. After the waters have retreated, which usually remain only a short time at this height, you see, till the end of autumn, only a black and slimy mud. But in winter nature puts on all her splendor. In this season, the freshness and power of the new vegetation, the variety and abundance of vegetable productions, exceed everything that is known in the most celebrated parts of the European continent; and Egypt is then, from one end of the country to the other, nothing but a beautiful garden, a verdant meadow, a field sown with flowers, or a waving ocean of grain in the ear.

The climate is very equable, and, to those who can bear great heat, also healthy; indeed, in the opinion of some, the climate of Egypt is one of the finest in the world. There are, however, unwholesome tracts of salt marsh which are to be avoided. Rain seldom falls except on the coast of the Mediterranean. At Thebes a storm will occur, perhaps, not oftener than once in four years. Cultivation nowhere depends upon rain or showers. This absence of rain is mentioned in Deut. (xi, 10, 11) as rendering artificial irrigation necessary, unlike the case of Palestine, and in Zech. (xiv, 18) as peculiar to the country. The atmosphere is clear and shining; a shade is not easily found. Though rain falls even in the winter months very rarely, it is not altogether wanting, as was once believed. Thunder and lightning are still more unfrequent, and are so completely divested of their terrific qualities that the Egyptians never associate with them the idea of destructive force. Showers of hail descending from the hills of Syria are sometimes known to reach the confines of Egypt. The formation of ice is very uncommon. Dew is produced in great abundance. The wind blows from the north from May to September, when it veers round to the east, assumes a southerly direction, and fluctuates till the close of April. The southerly vernal winds, traversing the arid sands of Africa, are most changeable as well as most unhealthy. They form the simoom or samiel, and have proved fatal to caravans and even to armies (*View of Ancient and Modern Egypt*, Edin. Cab. Library).

Egypt has been visited at all ages by severe pestilences, but it cannot be determined that any of those of ancient times were of the character of the modern plague. The plague with which the Egyptians are threatened in Zech. (l. c.) is described by a word, *מַדְבָּרָה*, which is not specially applicable to a pestilence of their country (see ver. 12). See BORCH. Cutaneous disorders, which have always been very prevalent in Egypt, are distinctly mentioned as peculiar to the country (Deut. vii, 15; xxviii, 27, 35, 60, and perhaps Exod. xv, 20, though here the reference may be to the plague of boils), and as punishments to the Israelites in case of disobedience, whereas if they obeyed they were to be preserved from them. The Egyptian calumny that made the Israelites a body of lepers and unclean (Joseph. c. *Apion.*) is thus refuted, and the traditional tale as to the Exodus given by Manetho shown to be altogether wrong in its main facts, which depend upon the truth of this assertion. Famines are frequent, and one in the Middle Ages, in the time of the Fatimite caliphate El-Mustansir-billah, seems to have been even more severe than that of Joseph. Mosquitoes, locusts, frogs, together with the small-pox and leprosy, are the great evils of the country. Ophthalmia is also very prevalent. See DISEASE.

V. *The Nile*.—Egypt is the land of the Nile, the country through which that river flows from the island of Philæ, situated just above the Cataracts of Syene, in lat. 24° 1' 36", to Damietta, in 31° 35' N., where

its principal stream pours itself into the Mediterranean Sea. In lat. 30° 15' the Nile divides into two principal streams, which, in conjunction with a third that springs somewhat higher up, forms the Delta, so called from its resemblance to the Greek letter Δ. At Khar-tum, 160 miles north of Sennâr, the Nile forks into two rivers, called Bahr el-Abiad and Bahr el-Azrak, or the white and blue river, the former flowing from the west, the latter from the east. The blue river is the smaller of these, but it possesses the same fertilizing qualities as the Nile, and is of the same color. The sources of this river were discovered by Bruce; those of the white river were, until quite recently, undiscovered. They are now known to flow from lakes situated among the mountains south of the equator (Beke, *Sources of the Nile*, Lond. 1860). Most ancient writers mention seven mouths of the Nile, beginning from the east: 1, Pelusiac or Bulastic; 2, Saitic or Tanitic; 3, Mendesian; 4, Bucolic or Phatmetic (now of Damietta); 5, Sebennitic; 6, Bolbitine (now of Rosetta); 7, Canopic or Heracleotic.

The Nile is called in the Bible *Shichor*, שִׁיחֹר, or "the black (river);" also *Yeor*, יְאוֹר, "the river." As to the phrases נַחַל מִצְרַיִם, "the river of Egypt," and נַחַל מִצְרַיִם, "the brook of Egypt," it seems unlikely that the Nile should be so specified; and נַחַל or נָהָר here more probably denotes a mountain stream, usually dry, on the borders of Egypt and Palestine, near the modern El-Arish (Num. xxxiv, 5; Josh. xiii, 3, etc.). See EGYPT, RIVER OF. Some have thought that נַחַל is the origin of the word Nile; others have been anxious to find it in the Sanscrit *Nīla*, which means dark blue. The Indus is called Nil-ab, or "the blue river;" the Sutlej also is known as "the blue river." It is to be observed that the Low Nile was painted blue by the ancient Egyptians. The river is turbid and reddish throughout the year, and turns green about the time when the signs of rising commence, but not long after becomes red and very turbid. The Coptic word is *iom*, "sea," which corresponds to the Arab name for it, *bahr*, properly sea; thus Nahum iii, 3, "Populous No (Thebes), whose rampart was the sea." In Egyptian the Nile bore the sacred appellation HAPI, or HAPI-MU, "the abyss," or "the abyss of waters." As Egypt was divided into two regions, we find two Niles, HAPI-RES, "the Southern Nile," and HAPI-MEHIT, "the Northern Nile," the former name being given to the river in Upper Egypt and in Nubia. The common appellation is ATUR, or AUR, "the river," which may be compared with the Heb. *Yeôr*.

The inundation, HAPI-UR, "great Nile," or "high Nile," fertilizes and sustains the country, and makes the river its chief blessing, a very low inundation or failure of rising being the cause of famine. The Nile was on this account anciently worshipped, and the plague in which its waters were turned into blood, while injurious to the river itself and its fish (Exod. vii, 21; Psa. cv, 29), was a reproof to the superstition of the Egyptians. The rise begins in Egypt about the summer solstice, and the inundation commences about two months later. The greatest height is attained about or somewhat after the autumnal equinox. The inundation lasts about three months. During this time, and especially when near the highest, the river rapidly pours along its red turbid waters, and spreads through openings in its banks over the whole valley and plain. The prophet Amos, speaking of the ruin of Israel, metaphorically says that "the land . . . shall be drowned, as [hy] the flood [river] of Egypt" (viii, 8; ix, 5). Owing to the yearly deposit of alluvial matter, both the bed of the Nile and the land of Egypt are gradually raised. The river proceeds in its current uniformly and quietly at the rate of two and a half or three miles an hour, always deep enough for

navigation. Its water is usually blue, but it becomes of a deep brick-red during the period of its overflow. It is salubrious for drinking, meriting the encomiums which it has so abundantly received. On the river the land is wholly dependent. If the Nile does not rise a sufficient height, sterility and dearth, if not famine, ensue. An elevation of sixteen fathoms is essential to secure the prosperity of the country. Such, however, is the regularity of nature, and such the faithfulness of God, that for thousands of years, with but few and partial exceptions, these inundations have in essential particulars been the same. The waters of the stream are conveyed over the surface of the country by canals when natural channels fail. During the overflow the land is literally inundated, and has the appearance of a sea dotted with islands. Wherever the waters reach abundance springs forth. The cultivator has scarcely more to do than to scatter the seed. No wonder that a river whose waters are so grateful, salubrious, and beneficial should in days of ignorance have been regarded as an object of worship, and that it is still revered and beloved. See NILE.

VI. *Geology*.—The fertile plain of the Delta and the valley of Upper Egypt are bounded by rocky deserts covered or strewn with sand. On either side of the plain they are low, but they overlook the valley, above which they rise so steeply as from the river to present the aspect of cliffs. The formation is limestone as far as a little above Thebes, where sandstone begins. The First Cataract, the southern limit of Egypt, is caused by granite and other primitive rocks, which rise through the sandstone and obstruct the river's bed. In Upper Egypt the mountains near the Nile rarely exceed 300 feet in height, but far in the eastern desert they often attain a much greater elevation. The highest is Jebel Gharib, which rises about 6000 feet above the sea. Limestone, sandstone, and granite were obtained from quarries near the river; basalt, breccia, and porphyry from others in the eastern desert between the Thebais and the Red Sea. A geological change has, it is thought, in the course of centuries raised the country near the head of the Gulf of Suez, and depressed that on the northern side of the isthmus. The Delta is of a triangular form, its eastern and western limits being nearly marked by the courses of the ancient Pelusiac and Canopic branches of the Nile: Upper Egypt is a narrow winding valley, varying in breadth, but seldom more than twelve miles across, and generally broadest on the western side. Anciently there was a fertile valley on the course of the Canal of the Red Sea, the Land of Goshen (q. v.), now called Wady Tumeilat: this is covered with the sands of the desert. To the south, on the opposite side, is the oasis now called the Feyum, the old Arsinoite Nome, connected with the valley by a neck of cultivated land.

VII. *Agriculture, etc.*—The ancient prosperity of Egypt is attested by the Bible, as well as by the numerous monuments of the country. As early as the age of the Great Pyramid it must have been densely populated and well able to support its inhabitants, for it cannot be supposed that there was then much external traffic. In such a climate the wants of man are few, and nature is liberal in necessary food. Even the Israelites in their hard bondage did "eat freely" the fish, and the vegetables, and fruits of the country, and ever afterwards they longed to return to the idle plenty of a land where even now starvation is unknown. The contrast of the present state of Egypt with its former prosperity is more to be ascribed to political than to physical causes. It is true that the branches of the Nile have failed, the canals and the artificial lakes and ponds for fish are dried up: that the reeds and other water-plants which were of value in commerce, and a shelter for wild-fowl, have in most parts perished; that the Land of Goshen, once, at least for pasture, "the best of the land" (Gen. xlvii, 6, 11), is now sand-strewn and unwatered, so as scarcely to be

distinguished from the desert around, and that the predictions of the prophets have thus received a literal fulfilment (see especially Isa. xix, 5-10), yet this has not been by any irresistible aggression of nature, but because Egypt, smitten and accursed, has lost all strength and energy. The population is not large enough for the cultivation of the land now fit for culture, and long oppression has taken from it the power and the will to advance.

Egypt is naturally an agricultural country. As far back as the days of Abraham, we find that when the produce failed in Palestine, Egypt was the natural resource. In the time of Joseph it was evidently the granary—at least during famines—of the nations around (Gen. xii, 10; comp. Exod. xvi, 3; Josephus, *Ant.* xv, 9, 2). The inundation, as taking the place of rain, has always rendered the system of agriculture peculiar; and the artificial irrigation during the time of low Nile is necessarily on the same principle. We read of the Land of Promise that it is "not as the land of Egypt, from whence ye came out, where thou sowest thy seed, and waterdest [it] with thy foot, as a garden of herbs; but the land whither thou goest in to possess it, [is] a land of hills and valleys, [and] drinketh water of the rain of heaven" (Deut. xi, 10, 11). Watering with the foot may refer to some mode of irrigation by a machine, but we are inclined to think that it is an idiomatic expression implying a laborious work. The monuments do not afford a representation of the supposed machine. That now called the sháduf, which is a pole having a weight at one end and a bucket at the other, so hung that the laborer is aided by the weight in raising the full bucket, is depicted, and seems to have been the common means of artificial irrigation (q. v.). There are detailed pictures of breaking up the earth, or ploughing, sowing, harvest, threshing, and storing the wheat in granaries. See AGRICULTURE. The threshing was simply treading out by oxen or cows, unmuzzled (comp. Deut. xxv, 4). The processes of agriculture began as soon as the water of the inundation had sunk into the soil, about a month after the autumnal equinox (Exod. ix, 31, 32). Vines were extensively cultivated, and there were several different kinds of wine, one of which, the Mareotic, was famous among the Romans. Of other fruit-trees, the date-palm was the most common and valuable. The gardens resembled the fields, being watered in the same manner by irrigation. See GARDEN; VINEYARD. On the tenure of land much light is thrown by the history of Joseph. Before the famine each city and large village—for "city" must be held to have a wider signification than our "city"—had its field (Gen. xli, 48); but Joseph gained for Pharaoh all the land, except that of the priests, in exchange for food, and required for the right thus obtained a fifth of the produce, which became a law (slvii, 20-26). The evidence of the monuments, though not very explicit, seems to show that this law was ever afterwards in force under the Pharaohs. There does not seem to have been any hereditary aristocracy, except perhaps at an earlier time, and it is not impossible that these lands may have been held during tenure of office or for life. The temples had lands which of course were inalienable. Diodorus Siculus states that all the lands belonged to the crown except those of the priests and the soldiers (i, 73). It is probable that the latter, when not employed on active service, received no pay, but were supported by the crown lands, and occupied them for the time as their own. See LAND.

The great lakes in the north of Egypt were anciently of high importance, especially for their fisheries and the growth of the papyrus. Lake Menzelen, the most eastern of the existing lakes, has still large fisheries, which support the people who live on its islands and shore, the rude successors of the independent Egyptians of the Bucolia. Lake Moeris, anciently so

celebrated, was an artificial lake between Beni-Suweif and Medinet el-Feynum. It was of use to irrigate the neighboring country, and its fisheries yielded a great revenue. See ANGLING. It is now entirely dried up. The canals are now far less numerous than of old, and many of them are choked and comparatively useless. The Bahr Yûsuf, or "river of Joseph"—not the patriarch, but the famous sultan Yusuf Salâh-ed-deen, who repaired it—is a long series of canals, near the desert on the west side of the river, extending northward from Farshut for about 350 miles to a little below Memphis. This was probably a work of very ancient times. There can be no doubt of the high antiquity of the canal of the Red Sea, upon which the Land of Goshen mainly depended for its fertility. It does not follow, however, that it originally connected the Nile and the Red Sea.

VIII. *Botany*.—The cultivable land of Egypt consists almost wholly of fields, in which are very few trees. There are no forests and few groves, except of date-palms, and in Lower Egypt a few of orange and lemon trees. There are also sycamores, mulberry-trees, and acacias, either planted on the sides of roads or standing singly in the fields. The Theban palm grows in the Thebais, generally in clumps. All these, except, perhaps, the mulberry-tree, were anciently common in the country. The two kinds of palm are represented on the monuments, and sycamore and acacia-wood are the materials of various objects made by the ancient inhabitants. The chief fruits are the date, grape, fig, sycamore-fig, pomegranate, banana, many kinds of melons, and the olive; and there are many others less common or important. These were also of old produced in the country. Anciently gardens seem to have received great attention, to have been elaborately planned, and well filled with trees and shrubs. Now horticulture is neglected, although the modern inhabitants are as fond of flowers as were their predecessors. The vegetables are of many kinds and excellent, and form the chief food of the common people. Anciently cattle seem to have been more numerous, and their meat, therefore, more usually eaten, but never as much so as in colder climates. The Israelites in the desert, though they looked back to the time when they "sat by the flesh-pots" (Exod. xvi, 3), seem as much to have regretted the vegetables and fruits, as the flesh and fish of Egypt. "Who shall give us flesh to eat? We remember the fish which we did eat in Egypt freely, the cucumbers, and the melons, and the leeks, and the onions, and the garlic" (Num. xi, 4, 5). The chief vegetables now are beans, peas, lentils, of which an excellent thick pottage is made (Gen. xxv, 14), leeks, onions, garlic, radishes, carrots, cabbages, gourds, cucumbers, the tomato, and the egg-fruit. There are many besides these. The most important field-produce in ancient times was wheat; after it must be placed barley, millet, flax, and, among the vegetables, lentils, peas, and beans. At the present day the same is the case; but maize, rice, oats, clover, the sugar-cane, roses, the tobacco-plant, hemp, and cotton, must be added, some of which are not indigenous. In the account of the plague of hail four kinds of field-produce are mentioned—flax, barley, wheat, and  $\text{לֶחֶם}$  (Exod. ix, 31, 32), which is variously rendered in the A. V. "rye" (l. c.), "spelt" (Isa. xxviii, 25), and "fitches" (Isa. xxviii, 27). It is doubted whether the last be a cereal or a leguminous product: we incline to the former opinion. See RYE.

It is clear from the evidence of the monuments and of ancient writers that, of old, reeds were far more common in Egypt than now. The byblus or papyrus is almost or quite unknown. Anciently it was a common and most important plant: boats were made of its stalks, and of their thin leaves the famous paper was manufactured. It appears to be mentioned under two names in the Bible, neither of which, however, can

be proved to be a peculiar designation for it. (1.) The mother of Moses made  $\text{אֲרֹן עֲבֹתַי}$ , "an ark" or "skiff" "of papyrus," in which to put her child (Exod. ii, 3), and Isaiah tells of messengers sent apparently from farthest Ethiopia in  $\text{אֲבִיבֵי-פָפִירוס}$ , "vessels of papyrus" (xviii, 2), in both which cases  $\text{פָּפִירוס}$  must mean papyrus, although it would seem in other places to signify "reeds" generically. (2.) Isaiah prophesies, "The papyrus-reeds ( $\text{רִבְרִיבֵי}$ ) in the river ( $\text{נַחַל}$ ), on the edge of the river, and everything growing [lit. sown] in the river shall be dried up, driven away [by the wind], and [shall] not be" (xix, 7). Gesenius readers  $\text{רִבְרִיבֵי}$  a naked or bare place, here grassy places on the banks of the Nile. Apart from the fact that little grass grows on the banks of the Nile, in Egypt, and that little only during the cooler part of the year, instead of those sloping meadows that must have been in the European scholar's mind, this word must mean some product of the river which with the other water-plants should be dried up, and blown away, and utterly disappear. Like the fisheries and the flax mentioned with it, it ought to hold an important place in the commerce of ancient Egypt. It can therefore scarcely be reasonably held to intend anything but the papyrus. See PAPER REED.

The marine and fluvial product  $\text{לֹטוֹס}$ , from which the Red Sea was called  $\text{יַם-סוּפִיר}$ , will be noticed under RED SEA. The lotus was anciently the favorite flower, and at feasts it took the place of the rose among the Greek and Arabs: it is now very rare.

IX. *Zoology*.—Anciently Egypt was far more a pastoral country than at present. The neat cattle are still excellent, but lean kine are more common among them than they seem to have been in the days of Joseph's Pharaoh (Gen. xli, 19). Sheep and goats have always been numerous. Anciently swine were kept, but not in great numbers; now there are none, or scarcely any, except a few in the houses of Copts and Franks. The Egyptian oxen were celebrated in the ancient world (Aristot. *Hist. Anim.* viii, 28).—Horses abounded (1 Kings x, 28); hence the use of war-chariots in fight (Isa. xxxi, 1; Diod. Sic. i, 45), and the celebrity of Egyptian charioteers (Jer. xlvi, 4; Ezek. xvii, 15). Under the Pharaohs the horses of the country were in repute among the neighboring nations, who purchased them as well as chariots out of Egypt. Thus it is commanded respecting a king of Israel: "He shall not multiply horses to himself, nor cause the people to return to Egypt, to the end that he should multiply horses: forasmuch as the Lord hath said unto you, Ye shall henceforth return no more that way" (Deut. xvii, 16), which shows that the trade in horses was with Egypt, and would necessitate a close alliance. "Solomon had horses brought out of Egypt, and linen yarn: the king's merchants received the linen yarn at a price. And a chariot came up and went out of Egypt for six hundred [shekels] of silver, and a horse for a hundred and fifty; and so for all the kings of the Hittites and for the kings of Syria did they bring [them] out by their hand" (1 Kings x, 28, 29). The number of horses kept by this king for chariots and cavalry was large (iv, 26; x, 26; 2 Chron. i, 14; ix, 25). Some of these horses came as yearly tribute from his vassals (1 Kings x, 25). In later times the prophets reproved the people for trusting in the help of Egypt, and relying on the aid of her horses and chariots and horsemen, that is, probably, men in chariots, as we shall show in speaking of the Egyptian armies. The kings of the Hittites, mentioned in the passage quoted above, and in the account of the close of the siege of Samaria by Benhadad, where we read, "The Lord had made the host of the Syrians to hear a noise of chariots, and a noise of horses, [even] the noise of a great host: and they said one to another, Lo, the king of Israel hath hired against us the kings

of the Hittites and the kings of the Egyptians to come upon us" (2 Kings vii, 6)—these kings ruled the Hittites of the valley of the Orontes, who were called by the Egyptians SHETA or KHETA. The Pharaohs of the 18th, 19th, and 20th dynasties waged fierce wars with these Hittites, who were then ruled by a great king and many chiefs, and whose principal arm was a force of chariots, resembling those of the Egyptian army.—Asses were anciently numerous: the breed at the present time is excellent.—Buffaloes are common, and not wild.—Dogs were formerly more prized than now; for, being held by most of the Moslems to be extremely unclean, they are only used to watch the houses in the villages.—Cats are as numerous, but less favored.—The camel has nowhere been found mentioned in the inscriptions of Egypt, or represented on the monuments. In the Bible Abraham is spoken of as having camels when in Egypt, apparently as a gift from Pharaoh (Gen. xii, 16), and before the Exodus the camels of Pharaoh or his subjects were to be smitten by the murrain (Exod. ix, 3; comp. 6). Both these Pharaohs may have been shepherds. The Ishmaelites or Midianites who took Joseph into Egypt carried their merchandise on camels (Gen. xxxvii, 25, 28, 36), and the land traffic of the Arabs must always have been by caravans of camels; but it is probable that camels were not kept in Egypt, but only on the frontier. On the black obelisk from Nimrud, now in the British Museum, which is of Shalmanubar, king of Assyria, contemporary with Jehu and Hazael, camels are represented among objects sent as tribute by Egypt. They are of the two-humped sort, which, though perhaps then common in Assyria, has never, so far as is known, been kept in Egypt.—The deserts have always abounded in wild animals, especially of the canine and antelope kinds. The wolf, fox, jackal, hyena, wild cat, weasel, ichneumon, jerboa, and hare are also met with.—Anciently the hippopotamus was found in the Egyptian Nile, and hunted. This is a fact of importance for those who suppose it to be the behemoth (q. v.) of the book of Job, especially as that book shows evidence of a knowledge of Egypt. Now this animal is rarely seen even in Lower Nubia.—The elephant may have been, in the remotest historical period, an inhabitant of Egypt, and, as a land animal, have been driven further south than his brother pachyderm, for the name of the island of Elephantine, just below the First Cataract, in hieroglyphics, AB . . . "Elephant-land," seems to show that he was anciently found there.—Bats abound in the temples and tombs, filling the dark and desecrated chambers and passages with the unearthly whirr of their wings. Such desolation is represented by Isaiah when he says that a man shall cast his idols "to the moles and to the bats" (ii, 20). See each animal in its place.

The birds of Egypt are not remarkable for beauty of plumage: in so open a country this is natural. The *Rapaces* are numerous, but the most common are scavengers, as vultures and the kite. Eagles and falcons also are plentiful. Quails migrate to Egypt in great numbers. The *Grallatores* and *Anseres* abound on the islands and sand-banks of the river, and in the sides of the mountains which approach or touch the stream.

Among the reptiles, the crocodile (q. v.) must be especially mentioned. In the Bible it is usually called תַּנִּינִי, תַּנִּינִי, "dragon," a generic word of almost as wide a signification as "reptile," and is used as a symbol of the king of Egypt. Thus, in Ezekiel, "Behold, I am against thee, Pharaoh, king of Egypt, the great dragon that lieth in the midst of his rivers, which hath said, My river [is] mine own, and I have made [it] for myself. But I will put hooks in thy jaws, and I will cause the fish of thy rivers to stick unto thy scales, and I will bring thee up out of the midst of thy rivers, and all the fish of thy rivers shall stick unto thy scales. And I will leave thee [thrown]

into the wilderness, thee and all the fish of thy rivers. . . . I have given thee for meat to the beasts of the field and to the fowls of the heaven" (xxix, 3, 4, 5). Here there seems to be a retrospect of the Exodus (which is thus described in Isa. li, 9, 10, and 15), and with a more close resemblance in Psa. lxxiv, 13, 14, "Thou didst divide the sea by thy strength: thou brakest the heads of the dragons (תַּנִּינִי) in the waters. Thou brakest the heads of leviathan (לֵוִיָּתָן) in pieces, [and] gavest him [to be] meat to the dwellers in the wilderness" (תַּנִּינִי, i. e. to the wild beasts; comp. Isa. xiii, 21). The last passage is important as indicating that whereas תַּנִּינִי is the Hebrew generic name of reptiles, and therefore used for the greatest of them, the crocodile, לֵוִיָּתָן is the special name of that animal. The description of leviathan in Job (xli) fully bears out this opinion, and it is doubtful if any passage can be adduced in which a wider signification of the latter word is required. In Job (xxvi, 12) also there is an apparent allusion to the Exodus in words similar to those in Isaiah (li, 9, 10, and 15?), but without mention of the dragon. In this case the division of the sea and the smiting of Rahab, רִהַב, the proud or insolent, are mentioned in connection with the wonders of creation (ver. 7-11, 13): so, too, in Isaiah (ver. 13, 15). The crossing of the Red Sea could be thus spoken of as a signal exercise of the divine power.—Frogs are very numerous in Egypt, and their loud and constant croaking in the autumn in "the streams," נְהַרֹת, "the rivers," יַאֲרֵרִים, and "the ponds" or "marshes," מַנְתְּשִׁים (Exod. viii, 1, A. V. 5), makes it not difficult to picture the Plague of Frogs.—Serpents and snakes are also common, including the deadly cerastes and the cobra di capello; but the more venomous have their home in the desert (comp. Deut. viii, 15).

The Nile and lakes have an abundance of fishes; and although the fisheries of Egypt have very greatly fallen away, their produce is still a common article of food.

Among the insects the locusts must be mentioned, which sometimes come upon the cultivated land in a cloud, and, as in the plague, eat every herb and fruit, and leaf where they alight; but they never, as then, overspread the whole land (Exod. x, 3-6, 12-19). They disappear as suddenly as they come, and are carried away by the wind (ver. 19). As to the lice and flies, they are now plagues of Egypt, but it is not certain that the words פְּתִימִים and קָרִיב designate them (Exod. viii, 16-31). The dangerous scorpion is frequently met with. Beetles of various kinds are found, including the sacred scarabæus. Bees and silkworms are kept, but the honey is not very good, and the silk is inferior to that of Syria.

X. *Ancient Inhabitants.*—The old inhabitants of Egypt appear from their monuments and the testimony of ancient writers to have occupied in race a place between the Nigritians and the Caucasians. The constant immigrations of Arab settlers have greatly diminished the Nigritian characteristics in the generality of the modern Egyptians. The most recent inquiries have shown that the extreme limit at Philæ was only of a political nature, for the natives of the country below it were of the same race as those who lived above that spot—a tribe which passed down into the fertile valley of the Nile from its original abode in the south. These Ethiopians and the Egyptians were not negroes, but a branch of the great Caucasian family. Their frame was slender, but of great strength. Their faces appear to have been oval in shape, and narrower in the men than in the women. The forehead was well-shaped, but small and retiring; the eyes were almond-shaped and mostly black; the hair was long, crisp, and generally black; the skin of the men

Ancient Profiles (from the Monuments): 1. Egypto-Ethiopian (the Tirlake of Scripture); 2, 4. Ethiopian; 3. Egyptian.

was dark brown, chiefly from exposure; that of the women was olive-colored or even lighter. The women were very fruitful (Strabo, xv, p. 695; Heeren, *Ideen*, xi, 2, 10). The ancient dress was far more scanty than the modern, and in this matter, as in manners and character, the influence of the Arab race is also very apparent. The ancient Egyptians, in character were very religious and contemplative, but given to base superstition, patriotic, respectful to women, hospitable, generally frugal, but at times luxurious, very sensual, lying, thieving, treacherous, and cringing, and intensely prejudiced, through pride of race, against strangers, although kind to them. This is very much the character of the modern inhabitants, except that Mohammedanism has taken away the respect for women. The ancient Egyptians are indeed the only early Eastern nation that we know to have resembled the modern Westerns in this particular; but we find the same virtue markedly to characterize the Nigritians of our day. That the Egyptians in general treated the Israelites with kindness while they were in their country, even during the oppression, seems almost certain from the privilege of admission into the congregation in the third generation, granted to them in the Law, with the Edomites, while the Ammonites and Moabites were absolutely excluded, the reference in three out of the four cases being to the stay in Egypt, and the entrance into Palestine (Deut. xxiii, 3-8). This supposition is important in its bearing on the history of the oppression.

XI. *Language*.—The ancient Egyptian language, from the earliest period at which it is known to us, is an agglutinate monosyllabic form of speech. It is expressed by the signs which we call hieroglyphics. The character of the language is compound: it consists of elements resembling those of the Nigritian languages and the Chinese language on the one hand, and those of the Shemitic languages on the other. All those who have studied the African languages make a distinct family of several of those languages, spoken in the north-east quarter of the continent, in which family they include the ancient Egyptian; while every Shemitic scholar easily recognises in Egyptian, Shemitic pronouns and other elements, and a predominantly Shemitic grammar. As in person, character, and religion, so in language we find two distinct elements, mixed but not fused, and here the Nigritian element seems unquestionably the earlier. Bunsen asserts that this language is "ante-historical Shemitism:" we think it enough to say that no Shemitic scholar has accepted his theory. For a full discussion of the question, see Poole, *The Genesis of the Earth and of Man*,

chap. vi. As early as the age of the 26th dynasty, a vulgar dialect was expressed in the demotic or enchorial writing. This dialect forms the link connecting the old language with the Coptic or Christian Egyptian, the latest phase. The Coptic does not very greatly differ from the monumental language, distinguished in the time of the demotic as the sacred dialect, except in the presence of many Greek words. See COPTIC LANGUAGE.

The language of the ancient Egyptians was entirely unknown until the discoveries made by Dr. Young from the celebrated Rosetta stone, now preserved in the British Museum. This stone is a slab of black marble, which was found by the French in August, 1799, among the ruins of Fort St. Julien, on the western bank, and near the mouth of the Rosetta branch of the Nile. It contains a decree in three different kinds of writing, referring to the coronation of Ptolemy V (Epiphanes), and is supposed to have been sculptured B.C. cir. 195. As part of the inscription is in Greek, it was easily deciphered, and was found to state that the decree was ordered to be written in sacred, enchorial, and Greek characters. Thence, by carefully comparing the three inscriptions, a key was obtained to the interpretation of the mysterious hieroglyphics. The language which they express closely resembles that which was afterwards called Coptic when the people had become Christians. It is monosyllabic in its roots, and abounds in vowels. There were at least two dialects of it, spoken respectively in Upper and Lower Egypt. See ROSETTA STONE.

"The wisdom of Egypt" was a phrase which, at an early period, passed into a proverb, so high was the opinion entertained by antiquity of the knowledge and skill of the ancient Egyptians (1 Kings iv, 30; Herod. ii, 160; Josephus, *Ant.* viii, 25; Acts vii, 22). Nor, as the sequel of this article will show, were there wanting substantial reasons for the current estimate. If, however, antiquity did not on this point exceed the bounds of moderation, very certain is it that men of later ages are chargeable with the utmost extravagance in the terms which they employed when speaking on the subject. It was long thought that the hieroglyphical inscriptions on the monumental remains of Egypt contained treasures of wisdom no less boundless than hidden; and, indeed, hieroglyphics were, in the opinion of some, invented by the priests of the land, if not expressly to conceal their knowledge from the profane vulgar, yet as a safe receptacle and convenient storehouse for their mysterious but invaluable doctrines. Great, consequently, was the expectation of the public when it was announced that a key had been discovered which opened the portal to these long-concealed treasures. The result has not been altogether correspondent, especially with regard to the presumed secrets of ancient lore. Men of profound learning, great acuteness of mind, and distinguished reputation have engaged and persevered in the inquiry: it is impossible to study without advantage the writings of such persons as Zoega, Akerblad, Young, Champollion, Spohn, Seyffarth, Kosegarten, Rühle; and equally ungrateful would it be to affirm that no progress has been made in the undertaking; but, after all, the novel conclusions and positions which have been drawn and set forth are only in a few cases (comparatively) definite and unimpeachable (Heeren, *Ideen*, ii, 2, 4; Quatremère, *Recherches sur la langue et la littérature de l'Égypte*). See HIEROGLYPHICS. The results in point of history and archaeology, as detailed by Lepsius, Brugsch, and other late Egyptologists, are far more important than in a purely scientific view. See below.

XII. *Religion*.—The basis of the religion was Nigritian fetishism, the lowest kind of nature-worship, differing in different parts of the country, and hence obviously indigenous. Upon this were engrafted, first, cosmic worship, mixed up with traces of primeval revelation, as in Babylonia; and then a system of per-

sonifications of moral and intellectual abstractions. The incongruous character of the religion necessitates this supposition, and the ease with which it admitted extraneous additions in the historical period confirms it. There were, according to Herodotus, three orders of gods—the eight great gods, who were the most ancient, the twelve lesser, and the Osirian group. They were represented in human forms, sometimes having the heads of animals sacred to them, or bearing on their heads cosmic or other objects of worship. The fetichism included, besides the worship of animals, that of trees, rivers, and hills. Each of these creatures or objects was appropriated to a divinity. There was no prominent hero-worship, although deceased kings and other individuals often received divine honors—in one case, that of Osirtasen II, of the 12th dynasty, the old Sesostris, of a very special character. The great doctrines of the immortality of the soul, man's responsibility, and future rewards and punishments, were taught. Among the rites, circumcision is the most remarkable: it is as old as the time of the 4th dynasty.

Wilkinson gives us the following classification of the Egyptian deities (*Materia Hieroglyphica*, p. 58, modified by himself in Rawlinson's *Herod.* ii, 241 sq.):

## I. FIRST ORDER.

1. Amen, or Amun-ra, "the king of all the gods."
2. Mant, or Mat (Sanchon. *mot*), the material principle, sometimes as Buto (=Latona).
3. Noutm, Nu, Nef, or Kneph=Mercury.
4. Sate=Juno.
5. Pthah, or Ptah, the creative power [a function assigned by others to Kneph]=Vulcan.
6. Neith, self-born and of masculine character=Minerva.
7. Khem, the generative principle (*phallus*).
8. Pshst=Diana.

## II. SECOND ORDER.

1. Re, Ra, or Phrah, the Sun, father of many deities, often combined with those of the others.
2. Seb, the Earth=Saturn, father of the inferior gods.
3. Netpé, wife of Seb, the Sky, mother of gods=Rhea.
4. Khous, son of Amun and Mant, the Moon=Hercules.
5. Anouké [Fire]=Vesta.
6. Atmu [? or Mat], Darkness, or Twilight.
7. Mui, or Sim, son of Re, Light [=Phœbus].
8. Taphne (Daphne), or Tafnet, a lion-headed goddess.
9. Thoth, the Intellect=Hermes and the Moon.
10. Sana-k-re, or Sebak.
11. Eilithyia=Lucina.
12. Mandu, or Munt=Mars.

## III. THIRD ORDER.

1. Osiris, } son and daughter of Seb and Netpé.
2. Isis, }
3. Akeris, the elder Iforus, son of Netpé.
4. Seth, or Typhon, the destructive principle [Death].
5. Nephthys (Nebet), "lady of the house"=Vesta.
6. Iforus the younger, god of Victory=Apollo.
7. Harpocrates, son of Osiris and Isis, emblem of Youth.
8. Anubis, son of Osiris.

## IV. MISCELLANEOUS.

1. Thmei, or Ma (*théus*), goddess of Truth and Justice, headless.
2. Athor (eit-Ilor)=Venus, another daughter of Ra.
3. Nophr-Atmu, perhaps a variation of Atmu above.
4. Hor-Ilat, a winged globe, as *ἀγλαόβαλλων*.
5. Hakté (Hecate), a lion-headed goddess.
6. Selk, a scorpion-headed goddess.
7. Toré, a god connected with Ptah.
8. Amunta, perhaps a female Amun.
9. The, "the heavens."
10. Hapi, or the god of the Nile.
11. Ranno, an asp-headed goddess, as *ἀσπασθοδαίμων*.
12. Hermes Trismegistus, a form of Thoth.
13. Asclepius, Moth, or Imoph, "son of Ptah."
14. Soph, the goddess of Speech.

Together with about 50 more, some of them local divinities, and personifications of cities, besides deified animals, etc.

*Nun, Nu, or Kneph*, was one of the most important of the gods, corresponding to the "soul" of the universe, to whom was ascribed the creation of gods, men, and the natural world. He is represented as a man with the head of a ram and curved horns. The chief god of Thebes was *Amen*, or *Amen-Ra*, or *Amen-Ra Khem*, also worshipped in the great oasis, and sometimes portrayed under the form of Kneph. He was the Jupiter Ammon of the classics. The goddess *Mut*, or "the mother," is the companion of Amen, and is

represented as a female wearing the crowns of Upper and Lower Egypt, and the vulture head-dress of a queen. *Khem* was the god by whom the productive-ness of nature was symbolized. His name reminds us of the patriarch Ham. The Greeks identified him with Pan, and called Chemmis, a city in the Thebais, where he was worshipped, Panopolis. He is accompanied by a tree or a flower on the sculptures, which may have been, as supposed by Mr. Poole, the *asherah* or sacred grove spoken of in the Bible. *Ptah* was the god of Memphis, and worshipped there under the form of a pigmy or child; but, as his temples have been destroyed, little is known of his worship. The goddess *Neit* or *Neith* is often associated with Ptah. She was the patron deity of Sais, in the Delta; and the Greeks say that Cecrops, leading a colony from thence to Athens, introduced her worship into Greece, where she was called Athene. This name may be derived from the Egyptian, if we suppose the latter to have been sometimes called Thenei, with the article prefixed like the name of Thebes. She is represented as a female with the crown of Lower Egypt on her head. *Ra*, or the sun, was worshipped at Heliopolis. His common figure is that of a man with a hawk's head, on which is placed the solar disk and the royal asp. *Thoth* was the god of science and letters, and was worshipped at Hermopolis Magna. His usual form is that of a man with the head of an ibis surmounted by a crescent. *Bast* was called Bubastis by the Greeks, who identified her with Artemis. She is represented as a lion or cat-headed female, with the globe of the sun on her head. There is a similar goddess called Pasht. *Athor* was the daughter of Ra, and corresponded to the Aphrodite of the Greeks; the town of Tentyra or Denderah was under her protection. *Shu* represented solar or physical light, and *Ma-t* or Thma (Themis) moral light, truth, or justice. *Sebak* was a son of Ra. He has a crocodile's head. *Osiris* is the most remarkable personage in the Egyptian Pantheon. His form is that of a mummied figure holding the crook and flail, and wearing the crown of Upper Egypt, generally with an ostrich feather on each side. He was regarded as the personification of moral good. He is related to have been on earth instructing mankind in useful arts; to have been slain by his adversary Typhon (Set or Seth), by whom he was cut in pieces; to have been bewailed by his wife and sister Isis; to have been embalmed; to have risen again, and to have become the judge of the dead, among whom the righteous were called by his name, and received his form—a wonderful fore-feeling of the Gospel narrative, and most likely symbolizing the strife between good and evil. *Isis* was the sister and spouse of Osiris, worshipped at Abydos and the island of Philæ. *Ilorus* was their son. *Apep*, Apophis of the Greeks, an enormous serpent, was the only representative of moral evil. The worship of animals is said to have been introduced by the second king of the second dynasty, when the bull Apis, at Memphis, and Mnevis, at Heliopolis, and the Mendesian goat, were called gods. The cat was sacred to Pasht, the ibis to Thoth, the crocodile to Sebak, the scarabæus to Ptah and a solar god Atmu. In their worship of the gods, sacrifices of animals, fruit, and vegetables were used, as well as libations of wine and incense. No decided instance of a human sacrifice has been found. After death a man was brought before Osiris: his heart weighed against the feather of truth. He was questioned by forty-two assessors as to whether he had committed forty-two sins about which they inquired. If guiltless, he took the form of Osiris, apparently after long series of transformations and many ordeals, and entered into bliss, dwelling among the gods in perpetual day on the banks of the celestial Nile. If guilty he was often changed into the form of some base animal, and consigned to a fiery place of punishment and perpetual night. From this abstract it may be seen that the Egyptian religion is to be re-

ferred to various sources. There is a trace of some primeval revelation in it; also a strong Sabæan element. (See a full discussion of the subject, with figures of the leading deities, in Kitto's *Pictorial Bible*, note on Deut. iv, 16). A more favorable view of the ancient Egyptian theology is taken by Wilkinson in his *Ancient Egyptians* (see his summary in the abridged ed. ii, 327 sq.); and it is probably true, as was the case with the polytheism of the Greeks and Romans likewise, that the more learned and philosophical classes were able to spiritualize to some extent a religion which could have been to the populace nothing but a gross idolatry.

The Israelites in Egypt appear, during the oppression, to have adopted to some extent the Egyptian idolatry (Josh. xxiv, 14; Ezek. xx, 7, 8). The golden calf, or rather steer,  $\text{𐀀𐀃𐀆}$ , was probably taken from the bull Apis, certainly from one of the sacred bulls. Remphan and Chiuu were foreign divinities adopted into the Egyptian Pantheon, and called in the hieroglyphics RENU (probably pronounced *Remphu*) and KEN. It can hardly be doubted that they were worshipped by the shepherds; but there is no satisfactory evidence that there was any separate foreign system of idolatry. See REMPHAN. Ashtoreth was worshipped at Memphis, as is shown by a tablet of Amenoph II, B.C. cir. 1415, at the quarries of Tura, opposite that city (Vyse's *Pyramids*, iii, "Tourah tablet 2"), in which she is represented as an Egyptian goddess. The temple of "the Foreign Venus," in "the Tyrian camp" in Memphis (Herod. ii, 112), must have been sacred to her. Doubtless this worship was introduced by the Phœnician shepherds.

As there are prominent traces of primeval revelation in the ancient Egyptian religion, we cannot be surprised at finding certain resemblances to the Mosaic law, apart from the probability that whatever was unobjectionable in common belief and usages would be retained. The points in which the Egyptian religion shows strong traces of truth are, however, doctrines of the very kind that the Law does not expressly teach. The Egyptian religion, in its reference to man, was a system of responsibility mainly depending on future rewards and punishments. The Law, in its reference to man, was a system of responsibility mainly depending on temporal rewards and punishments. All we learn, but this is of the utmost importance, is that every Israelite who came out of Egypt must have been fully acquainted with the universally recognised doctrines of the immortality of the soul, man's responsibility, and future rewards and punishments, truths which the law does not, and of course could not, contradict. The idea that the Mosaic law was an Egyptian invention is one of the worst examples of modern reckless criticism.

**XIII. Laws.**—We have no complete account of the laws of the ancient Egyptians either in their own records or in works of ancient writers. The passages in the Bible which throw light upon the laws in force during the sojourn of the Israelites in Egypt most probably do not relate to purely native law, nor to law administered to natives, for during that whole period they may perhaps have been under shepherd rulers, and in any case it cannot be doubted that they would not be subject to absolutely the same system as the Egyptians. The paintings and sculptures of the monuments indicate a very high degree of personal safety, showing us that the people of all ranks commonly went unarmed, and without military protection. We must therefore infer that the laws relating to the maintenance of order were sufficient and strictly enforced. The punishments seem to have been lighter than those of the Mosaic law, and very different in their relation to crime and in their nature. Capital punishment appears to have been almost restricted, in practice, to murder. Crimes of violence were more

severely treated than offences against religion and morals. Popular feeling seems to have taken the duties of the judge upon itself in the case of impiety alone. That in early times the Egyptian populace acted with reference to any offence against its religion as it did under the Greeks and Romans, is evident from the answer of Moses when Pharaoh proposed that the Hebrews should sacrifice in the land. "It is not meet so to do; for we shall sacrifice the abomination of the Egyptians to the Lord our God: lo, shall we sacrifice the abomination of the Egyptians before their eyes, and will they not stone us?" (Exod. viii, 26.)

**XIV. Government.**—The rule was monarchical, but not of an absolute character. The sovereign was not superior to the laws, and the priests had the power to check the undue exercise of his authority. The kings under whom the Israelites lived seem to have been absolute, but even Joseph's Pharaoh did not venture to touch the independence of the priests. Nomes and districts were governed by officers whom the Greeks called nomarchs and toparchs. There seems to have been no hereditary aristocracy, except perhaps at the earliest period, for indications of something of the kind occur in the inscriptions of the 4th and 12th dynasties.

**XV. Foreign Policy.**—This must be regarded in its relation to the admission of foreigners into Egypt and to the treatment of tributary and allied nations. In the former aspect it was characterized by an exclusiveness which sprang from a national hatred of the yellow and white races, and was maintained by the wisdom of preserving the institutions of the country from the influence of the pirates of the Mediterranean and the Indian Ocean, and the robbers of the deserts. Hence the jealous exclusion of the Greeks from the northern ports until Naueratis was opened to them, and hence, too, the restriction of Semitic settlers in earlier times to the land of Goshen, scarcely regarded as part of Egypt. It may be remarked as a proof of the strictness of this policy that during the whole of the sojourn of the Israelites they appear to have been kept in Goshen. The key to the policy towards foreign nations, after making allowance for the hatred of the yellow and white races balanced by the regard for the red and black, is found in the position of the great Oriental rivals of Egypt. The supremacy or influence of the Pharaohs over the nations lying between the Nile and the Euphrates depended as much on wisdom in policy as prowess in arms. The kings of the 4th, 6th, and 15th dynasties appear to have uninterruptedly held the peninsula of Sinai, where tablets record their conquest of Asiatic nomads. But with the 18th dynasty commences the period of Egyptian supremacy. Very soon after the accession of this powerful line most of the countries between the Egyptian border and the Tigris were reduced to the condition of tributaries. The empire seems to have lasted for nearly three centuries, from about B.C. 1500 to about 1200. The chief opponents of the Egyptians were the Hittites of the valley of the Orontes, with whom the Pharaohs waged long and fierce wars. After this time the influence of Egypt declined; and until the reign of Shishak (B.C. cir. 990-967), it appears to have been confined to the western borders of Palestine. No doubt the rising greatness of Assyria caused the decline. Thenceforward to the days of Pharaoh Necho there was a constant struggle for the tracts lying between Egypt, and Assyria, and Babylonia, until the disastrous battle at Carchemish finally destroyed the supremacy of the Pharaohs. It is probable that during the period of the empire an Assyrian or Babylonian king generally supported the opponents of the rulers of Egypt. Great aid from a powerful ally can indeed alone explain the strong resistance offered by the Hittites. The general policy of the Egyptians towards their eastern tributaries seems to have been marked by great moderation. The Pharaohs intermarried with them, and neither forced upon them

Egyptian garrisons, except in some important positions, nor attempted those deportations that are so marked a feature of Asiatic policy. In the case of those nations which never attacked them they do not appear to have even exacted tribute. So long as their general supremacy was uncontested they would not be unwise enough to make favorable or neutral powers their enemies. Of their relation to the Israelites we have for the earlier part of this period no direct information. The explicit account of the later part is fully consistent with what we have said of the general policy of the Pharaohs. Shishak and Zerah, if the latter were, as we believe, a king of Egypt or a commander of Egyptian forces, are the only exceptions in a series of friendly kings, and they were almost certainly of Assyrian or Babylonian extraction. One Pharaoh gave his daughter in marriage to Solomon, another appears to have been the ally of Jehoram, king of Israel (2 Kings vii, 6), So made a treaty with Hosea, Tirhakah aided Hezekiah, Pharaoh Necho fought Josiah against his will, and did not treat Judah with the severity of the Oriental kings, and his second successor, Pharaoh Hophra, maintained the alliance, notwithstanding this break, as firmly as before, and, although foiled in his endeavor to save Jerusalem from the Chaldeans, received the fugitives of Judah, who, like the fugitives of Israel at the capture of Samaria, took refuge in Egypt. It is probable that during the earlier period the same friendly relations existed. The Hebrew records of that time afford no distinct indication of hostility with Egypt, nor have the Egyptian lists of conquered regions and towns of the same age been found to contain any Israelitish name, whereas in Shishak's list the kingdom of Judah and some of its towns occur. The route of the earlier Pharaohs to the east seems always to have been along the Palestinian coast, then mainly held by the Philistines and Phœnicians, both of whom they subdued, and across Syria northward of the territories occupied by the Hebrews. With respect to the African nations a different policy appears to have been pursued. The Rebu (Lebu) or Lubim, to the west of Egypt, on the north coast, were reduced to subjection, and probably employed, like the Shayretana or Cherethim, as mercenaries. Ethiopia was made a purely Egyptian province, ruled by a viceroy, "the prince of Kesh (Cush)," and the assimilation was so complete that Ethiopian sovereigns seem to have been received by the Egyptians as native rulers. Further south the negroes were subject to predatory attacks like the slave-hunts of modern times, conducted not so much from motives of hostility as to obtain a supply of slaves. In the Bible we find African peoples, Lubim, Phut, Sukkiim, Cush, as mercenaries or supporters of Egypt, but not a single name that can be positively placed to the eastward of that country.

XVI. *Army.*—There are some notices of the Egyptian army in the O. T. They show, like the monuments, that its most important branch was the chariot-force. The Pharaoh of the Exodus led 600 chosen chariots, besides his whole chariot-force, in pursuit of the Israelites. The warriors fighting in chariots are probably the "horsemen" mentioned in the relation of this event and elsewhere, for in Egyptian they are called the "horse" or "cavalry." We have no subsequent indication in the Bible of the constitution of an Egyptian army until the time of the 22d dynasty, when we find that Shishak's invading force was partly composed of foreigners; whether mercenaries or allies cannot as yet be positively determined, although the monuments make it most probable that they were of the former character. The army of Necho, defeated at Carchemish, seems to have been similarly composed, although it probably contained Greek mercenaries, who soon afterwards became the most important foreign element in the Egyptian forces.

XVII. *Customs, Science, and Art.*—The sculptures

and paintings of the tombs give us a very full insight into the domestic life of the ancient Egyptians, as may be seen in Sir G. Wilkinson's work. What most strikes us in their manners is the high position occupied by women, and the entire absence of the harem system of seclusion. The wife is called "the lady of the house." Marriage appears to have been universal, at least with the richer class; and if polygamy were tolerated it was rarely practised. Of marriage ceremonies no distinct account has been discovered, but there is evidence that something of the kind was usual in the case of a queen (De Rougé, *Essai sur une Stele Egyptienne*, p. 53, 54). Concubinage was allowed, the concubines taking the place of inferior wives. There were no castes, although great classes were very distinct, especially the priests, soldiers, artisans, and herdsmen, with laborers. A man of the upper classes might, however, both hold a command in the army and be a priest; and therefore the caste-system cannot have strictly applied in the case of the subordinates. The general manner of life does not much illustrate that of the Israelites from its great essential difference. The Egyptians from the days of Abraham were a settled people, occupying a land which they had held for centuries without question, except through the aggression of foreign invaders. The occupations of the higher class were the superintendence of their fields and gardens, their diversions, the pursuit of game in the deserts or on the river, and fishing. The tending of cattle was left to the most despised of the lower class. The Israelites, on the contrary, were from the very first a pastoral people: in time of war they lived within walls; when there was peace they "dwelt in their tents" (2 Kings xiii, 5).

The Egyptian feasts, and the dances, music, and feasts which accompanied them for the diversion of the guests, as well as the common games, were probably introduced among the Hebrews in the most luxurious days of the kingdoms of Israel and Judah. The account of the noontide dinner of Joseph (Gen. xliii, 16, 31-34) agrees with the representations of the monuments, although it evidently describes a far simpler repast than would be usual with an Egyptian minister. The attention to precedence, which seems to have surprised Joseph's brethren (ver. 33), is perfectly characteristic of Egyptian customs.

The Egyptians were in the habit of eating much bread at table, and fancy rolls or seed-cakes were in abundance at every feast. Those who could afford it ate wheaten bread, the poor alone being content with a coarser kind, made of *dura* flour or millet. They ate with their fingers, though they occasionally used spoons. The table was sometimes covered with a cloth; and in great entertainments among the rich, each guest was furnished with a napkin. They sat on a carpet or mat upon the ground, or else on stools or chairs round the table, and did not recline at meat like the Greeks and Romans. They were particularly fond of music and dancing. The most austere and scrupulous priest could not give a feast without a good band of musicians and dancers, as well as plenty of wine, costly perfumes and ointments, and a profusion of lotus and other flowers. Tumblers, jugglers, and various persons skilled in feats of agility, were hired for the occasion, and the guests played at games of chance, at *mora*, and the game of *latrunculi*, resembling draughts. The latter was the favorite game of all ranks, and Rameses III is more than once represented playing it in the palace at Thebes. The number of pieces for playing the game is not exactly known. They were of different colors on the opposite sides of the board, and were not flat as with us, but about an inch and a half or two inches high, and were moved like chessmen, with the thumb and finger.

The religious festivals were numerous, and some of them were, in the days of Herodotus, kept with great merry-making and license. His description of that

of the goddess Bubastis, kept at the city of Bubastis, in the eastern part of the Delta, would well apply to some of the great Mohammedan festivals now held in the country (ii, 59, 60). The feast which the Israelites celebrated when Aaron had made the golden calf seems to have been very much of the same character: first offerings were presented, and then the people ate, and danced, and sang (Exod. xxxii, 5, 6, 17, 18, 19), and even, it seems, stripped themselves (ver. 25), as appears to have been not unusual at the popular ancient Egyptian festivals.

The funeral ceremonies were far more important than any events of the Egyptian life, as the tomb was regarded as the only true home. The body of the deceased was embalmed in the form of Osiris, the judge of the dead, and conducted to the burial-place with great pomp and much display of lamentation. The mourning lasted seventy-two days or less. Both Jacob and Joseph were embalmed, and the mourning for the former lasted seventy days.

The Egyptians, for the most part, were accustomed to shave their heads; indeed, except among the soldiers, the practice was probably almost universal. They generally wore skull-caps. Otherwise they wore their own hair, or wigs falling to the shoulders in numerous curls, or done up in the form of a bag. They also shaved their faces; kings, however, and other great personages had beards about three inches long and one inch broad, which were plaited. The crown of Upper Egypt was a short cap, with a tall point behind, which was worn over the other. The king often had the figure of an asp, the emblem of royalty, tied just above his forehead. The common royal dress was a kilt which reached to the ankles; over it was worn a shirt, coming down to the knees, with wide sleeves as far as the elbows: both these were generally of fine white linen. Sandals were worn on the feet, and on the person, armbands, bracelets, and necklaces. The upper and middle classes usually went barefoot; in other respects their dress was much the same as that of the king's, but of course inferior in costliness. The priests sometimes wore a leopard's skin tied over the shoulders, or like a shirt, with the fore legs for the sleeves. The queen had a particular head-dress, which was in the form of a vulture with expanded wings. The beak projected over the forehead, the wings fell on either side, and the tail hung down behind. She sometimes wore the uræus or asp. The royal princes were distinguished by a side-lock of hair elaborately plaited. The women wore their hair curled or plaited, reaching about half way from the shoulders to the waist.

The Egyptians were a very literary people, and time has preserved to us, besides the inscriptions on their tombs and temples, many papyri of a religious or historical character, and one tale. They bear no resemblance to the books of the O. T., except such as arises from their sometimes enforcing moral truths in a manner not wholly different from that of the book of Proverbs. The moral and religious system is, however, essentially different in its principles and their application. Some have imagined a great similarity between the O. T. and Egyptian literature, and have given a show of reason to their idea by dressing up Egyptian documents in a garb of Hebrew phraseology, in which, however, they have gone so awkwardly that no one who had not prejudged the question could for a moment be deceived. We find frequent reference in the Bible to the magicians of Egypt. The Pharaoh of Joseph laid his dream before the magicians, who could not interpret it (Gen. xli, 8); the Pharaoh of the Exodus used them as opponents of Moses and Aaron, when, after what appears to have been a seeming success, they failed as before (Exod. vii, 11, 12, 22; viii, 18, 19; ix, 11; 2 Tim. iii, 8, 9). The monuments do not recognise any such art, and we must conclude that magic was secretly practised, not because it was

thought to be unlawful, but in order to give it importance. See MAGIC; JAMBRES; JANNES.

In science, Egyptian influence may be distinctly traced in the Pentateuch. Moses was "learned in all the wisdom of the Egyptians" (Acts vii, 22), and probably derived from them the astronomical knowledge which was necessary for the calendar. His acquaintance with chemistry is shown in the manner of the destruction of the golden calf. The Egyptians excelled in geometry and mechanics: the earlier books of the Bible, however, throw no light upon the degree in which Moses may have made use of this part of his knowledge. In medicine and surgery, the high proficiency of the Egyptians was probably of but little use to the Hebrews after the Exodus: anatomy, practised by the former from the earliest ages, was repugnant to the feelings of Shemites, and the simples of Egypt and of Palestine would be as different as the ordinary diseases of the country. In the arts of architecture, sculpture, and painting, the former of which was the chief, there seems to have been but a very slight and material influence. This was natural, for with the Egyptians architecture was a religious art, embodying in its principles their highest religious convictions, and mainly devoted to the service of religion. Durable construction, massive and grand form, and rich, though sober color, characterize their temples and tombs, the abodes of gods, and "homes" of men. To adopt such an architecture would have been to adopt the religion of Egypt, and the pastoral Israelites had no need of buildings. When they came into the Promised Land they found cities ready for their occupation, and it was not until the days of Solomon that a temple took the place of the tent, which was the sanctuary of the pastoral people. Details of ornament were of course borrowed from Egypt; but, separated from the vast system in which they were found, they lost their significance, and became harmless until modern ecologists made them prominent in support of a theory which no mind capable of broad views can for a moment tolerate.

It is hardly needful to observe that the ancient Egyptians had attained to high degrees of civilization and mental culture. This is evidenced by many facts. For instance, the variation of the compass may even now be ascertained by observing the lateral direction of the pyramids, on account of their being placed so accurately north and south. This argues considerable acquaintance with astronomy. Again, we know that they were familiar with the duodecimal as well as the decimal scale of notation, and must therefore have made some progress in the study of mathematics. There is proof that the art of painting upon plaster and panel was practised by them more than 2000 years before Christ; and the sculptures furnish representations of inkstands that contained two colors, black and red; the latter being introduced at the beginning of a subject, and for the division of certain sentences, showing this custom to be as old as that of holding the pen behind the ear, which is often portrayed in the paintings of the tombs. Alabaster was a material much used for vases, and as ointment was generally kept in an alabaster box, the Greeks and Romans applied the name *alabastron* to all vases made for that purpose; and one of them found at Thebes, and now in the museum at Alnwick Castle, contains some ointment perfectly preserved, though from the queen's name in the hieroglyphics it must be more than 3000 years old. In architecture they were very successful, as the magnificent temples yet remaining bear evident witness, though in ruins. The Doric order is supposed to have been derived from columns found at Beni-Hassan, and the arch is at least as old as the 16th century B.C. In medical science, we know from the evidence furnished by mummies found at Thebes that the art of stopping teeth with gold, and probably cement, was known to the ancient Egyptians, and Cuvier found incontestible

proof that the fractured bone of an ibis had been set by them while the bird was alive.

Sacred music was much used in Egypt, and the harp, lyre, flute, tambourine, cymbals, etc., were admitted in divers religious services, of which music constituted an important element. Sacred dancing was also common in religious ceremonies, as it seems to have been among the Jews (Psa. cxlix, 3). Moses found the children of Israel dancing before the golden calf (Exod. xxxii, 19), in imitation probably of rites they had often witnessed in Egypt.

The industrial arts held an important place in the occupations of the Egyptians. The workers in fine flax and the weavers of white linen are mentioned in a manner that shows they were among the chief contributors to the riches of the country (Isa. xix, 9). The fine linen of Egypt found its way to Palestine (Prov. vii, 16). That its celebrity was not without cause is proved by a piece found near Memphis, and by the paintings (comp. Gen. xli, 42; 2 Chron. i, 16, etc.). The looms of Egypt were also famed for their fine cotton and woollen fabrics, and many of these were worked with patterns in brilliant colors, sometimes being wrought with the needle, sometimes woven in the piece. Some of the stripes were of gold thread, alternating with red ones as a border. Specimens of their embroidery are to be seen in the Louvre, and the many dresses painted on the monuments of the 18th dynasty show that the most varied patterns were used by the Egyptians more than 3000 years ago, as they were subsequently by the Babylonians, who became noted for their needle-work. Sir G. Wilkinson states that the secret of dyeing cloths of various colors by means of mordants was known to the Egyptians, as proved by the manner in which Pliny has described the process, though he does not seem to have understood it. They were equally fond of variety of patterns on the walls and ceilings of their houses and tombs, and some of the oldest ceilings show that the chevron, the checker, the scroll, and the guilloche, though ascribed to the Greeks, were adopted in Egypt more than 2000 years before our era.

A gradual progress may be observed in their choice of fancy ornament. Beginning with simple imitations of real objects, as the lotus and other flowers, they adopted, by degrees, conventional representations of them, or purely imaginary devices; and it is remarkable that the oldest Greek and Etruscan vases have a similarly close imitation of the lotus and other real objects. The same patterns common on Greek vases had long before been introduced on those in Egypt; whole ceilings are covered with them; and the vases themselves had often the same elegant forms we admire in the *exile* and others afterwards made in Greece. They were of gold and silver, engraved and embossed; those made of porcelain were rich in color, and some of the former were inlaid or studded with precious stones, or enamelled in brilliant colors. Their knowledge of glass-blowing is shown by a glass bead inscribed with the name of a queen of the 18th dynasty, which proves it to be as old as 3200 years ago. Among their most beautiful achievements in this art were their richly-colored bottles with waving lines and their small inlaid mosaics. In these last, the fineness of the work is so great that it must have required a strong magnifying power to put the parts together, especially the more minute details, such as feathers, the hair, etc. "They were composed," says Sir G. Wilkinson, "of the finest threads or rods of glass (attenuated by drawing them when heated to a great length), which, having been selected according to their color, were placed upright side by side, as in an ordinary mosaic, in sufficient number to form a portion of the intended picture. Others were then added until the whole had been composed; and when they had all been cemented together by a proper heat, the work was completed. Slices were then sawn off

transversely, as in our Tunbridge ware, and each section presented the same picture on its upper and under side."

The more wealthy Egyptians had their large town-houses and spacious villas, in which the flower-garden and pleasure-grounds were not the least prominent features. Avenues of trees shaded the walks, and a great abundance of violets, roses, and other flowers was always to be had, even in winter, owing to the nature of their climate and the skill of their gardeners. A part also was assigned to vines and fruit-trees; the former were trained on trellis-work, the latter were standards. It is a curious fact that they were in the habit of employing monkeys, trained for the purpose, to climb the upper branches of the sycamore-trees, and to gather the figs from them. The houses generally consisted of a ground floor and one upper story; few were higher. They were often placed round an open court, in the centre of which was a fountain or small garden. Large houses had sometimes a porch with a flight of steps before the street door, over which latter was painted the name of the owner. The wealthy landed proprietors were *grands* of the priestly and military classes (Mr. Birch and M. Ampère may be said to have proved the non-existence of castes, in the *Indian sense*, in Egypt); but those who tended cattle were looked down upon by the rest of the community. This contempt is often shown in the paintings, by their being drawn unshaven, and squalid, and dressed in the same covering of mats that were thrown over the beasts they tended. None would intermarry with swineherds. It was the custom for the men to milk, as it is still among some Arab tribes, who think it disgraceful for a woman to milk any animal.

Potters were very numerous, and the wheel, the baking of cups, and the other processes of their art were prominent on the monuments. It is singular, as affording illustration of Scripture language, that the same idea of fashioning the clay was also applied to man's formation; and the gods Ptah and Num, the creative agencies, are represented sitting at the potter's wheel turning the clay for the human creation. Pottery appears to have furnished employment to the Hebrews during the bondage (Psa. lxxxi, 6; lxxviii, 13; comp. Exod. i, 14).

The Egyptians were familiar with the use of iron from a very remote period, and their skill in the manufacture of bronze was celebrated. They were acquainted also with the use of the forceps, the blow-pipe, the bellows, the syringe, and the siphon. Gold mines were wrought in Upper Egypt (Diod. Sic. iii, 12).

Leather was sometimes used for writing purposes, but more frequently paper made from the papyrus, which grew in the marsh-lands of the Delta. The mode of making it was by cutting the pith into thin slices lengthwise, which being laid on a table were covered with similar layers at right angles, and the two sets, being glued together and kept under pressure a proper time, formed a sheet. The dried flower-heads of the papyrus have been found in the tombs.

As illustrating Scripture, it may be mentioned that the gods are sometimes represented in the tombs holding the *Tau* or sign of life () which was adopt-

ed by some of the early Christians in lieu of the cross, and is mentioned by Ezek. ix, 4, 6, as the "mark (Tau) set upon the foreheads of the men" who were to be preserved alive. Christian inscriptions at the great oasis are headed by this symbol; it has been found on Christian monuments at Rome.

Egyptian edicts seem to have been issued in the form of a *firmán* or written order; and from the word used by Pharaoh in granting power to Joseph ("According to thy word shall all my people be ruled;" Hebrew *kiss*, Gen. xli, 40, alluding evidently to the

custom of kissing a *firmân*), we may infer that the people who received that order adopted the usual Eastern mode of acknowledging their obedience to the sovereign. Besides the custom of kissing the signature attached to these documents, the people were doubtless expected to "bow the knee" (Gen. xli, 43) in the presence of the monarch and chiefs of the nation, or even to prostrate themselves before them. The sculptures represent them thus bowing with the hand stretched out towards the knee.

The account of brick-making in Exod. v, 7-19 is illustrated in a remarkable degree by a painting in a tomb at Thebes, in which the hardness of the work, the tale of bricks, the straw, and the native taskmasters set over foreign workmen, are vividly portrayed. The making of bricks was a monopoly of the crown, which accounts for the Jews and other captives being employed in such numbers to make bricks for the Pharaohs. SEE BRICK.

Certain injunctions of the Mosaic law appear to be framed with particular reference to Egyptian practices, e. g. the fact of false witness being forbidden by a distinct and separate commandment, becomes the more significant when we bear in mind the number of witnesses required by the Egyptian law for the execution of the most trifling contract. As many as sixteen names are appended to one for the sale of a part of certain properties, amounting only to 400 pieces of brass. It appears that bulls only, and not heifers, were killed by the Egyptians in sacrifice. Compare with this the law of the Israelites (Num. xix, 2), commanding them to "bring a red heifer, without spot, wherein was no blemish." It was on this account that Moses proposed to go "three days' journey into the desert," lest the Egyptians should be enraged at seeing the Israelites sacrifice a heifer (Exod. viii, 26); and by this very opposite choice of a victim they were made unequivocally to denounce and separate themselves from the rites of Egypt. The Egyptian common name for Heliopolis was AN, from which was derived the Hebrew On or Aon, pointed in Ezek. xxx, 17, Aven, and translated by Bethshemesh (Jer. xliiii, 13). So also the Pi-beseth of the same place in Ezekiel is from the Egyptian article *Pi*, prefixed to *Bast*, the name of the goddess there worshipped, and is equivalent to Bubastis, a city named after her, supposed to correspond to the Grecian Artemis. The Tahpanhes of Scripture (Jer. xliiii, 8; Ezek. xxx, 18) was perhaps a place called Daphnæ, sixteen miles from Pelusium.

XVIII. *Comparison with the Manners of the modern Inhabitants.*—The mode of life of the Egyptians has in all ages necessarily been more or less influenced by their locality: those who dwelt on high lands on the east, as well as those who dwelt on the marshy flat country in the Delta, have become shepherds, as their land does not admit of cultivation. The people who live along the Nile become fishermen and sailors. The cultivated part of the natives who live on the plains and over the surface of the country diligently and most successfully practise all the arts of life, and in former ages have left ever-during memorials of their proficiency and skill.

On this natural diversity of pursuits, as well as on a diversity of blood—for besides the master and ruling race of Ethiopians there were anciently others who were of nomade origin—was early founded the institution of so-called castes, which Egypt had, although less marked than India, and which pervaded the entire life of the nation. These, according to Herodotus (xi, 164), were seven in number (comp. Diod. Sic. i, 73). The priestly caste was the most honored and influential. It had in every large city a temple dedicated to the deity of the place, together with a high-priest, who stood next to the king and restricted his power. The priesthood possessed the finest portions of the country. They were the judges, physicians,

astrologers, architects—in a word, they united in themselves all the highest culture and most distinguished offices of the land, while with them alone lay tradition, literature, and the sacred writings. This class exerted the most decided and extensive influence on the culture not only of their own country, but of the world; for during the brightest periods of Grecian history the love of knowledge carried into Egypt men who have done much to form the character of after ages, such as Solon, Pythagoras, Archytas, Thales, Herodotus, Plato, and others (comp. Gen. xli, 8; Exod. vii, 11; viii, 11; xiii, 7; Josephus, *Ant.* ii, 9, 2).

The peculiarities of the ancient Egyptians of the lower castes seem to have survived best, and to be represented, at least in some particulars, by the Fellahs of the present day. These Fellahs discharge all the duties of tilling the country and gathering its rich abundance. They are a quiet, contented, and submissive race, always living, through an unjust government, on the edge of starvation, yet always happy, with no thought for the morrow, no care for, no interest in, political changes. "Of the Fellahs it may be said, as was said by Amrou of the ancient Egyptians, 'they are bees always toiling, always toiling for others, not themselves.' The love of the Fellah for his country and his Nile is an all-absorbing love. Remove him, and he perishes. He cannot live a year away from his village; his grave must be where his cradle was. But he is of all men most submissive: he will rather die than revolt; resignation is his primary virtue; impatience under any yoke is unknown to him; his life, his faith, his law is submission. 'Allah Kerim!' is his hourly consolation, his perpetual benediction. He was made for peace, not for war; and, though his patriotism is intense, there is no mingling in it of the love of glory or the passion for conquest. His nationality is in his local affections, and they are most intense. Upon this race, the race of bright eyes and beautiful forms, it is impossible to look without deep interest: of all the gay, the gayest; of all the beings made for happiness, the most excitable. If days of peace and prosperity could be theirs, what songs, what music, what joys!" (Bowring's *Report*, p. 7).

The ruling class consists of Arabs intermingled with Turks, who have been in succession the conquerors of the land, and may be regarded as representing the priestly and military castes.

The only other tribe we have room to notice is that of the Copts, equally with the preceding indigenous. They are Christians by hereditary transmission, and have suffered centuries of cruel persecutions and humiliations, though now they seem to be rising in importance, and promise to fill an important page in the future history of Egypt. In character they are amiable, pacific, and intelligent, having, of course, the faults and vices of dissimulation, falsehood, and meanness, which slavery never fails to engender. In office they are the scribes, the arithmeticians, the measurers, the clerks—in a word, the learned men of the country. The language which they use in their religious services is the ancient Egyptian, or Coptic, which, however, is translated into Arabic for the benefit of the laity (Bowring's *Report*). See below, EGYPT, CHRISTIAN; and COPTS.

XIX. *Technical Chronology.*—That the Egyptians used various periods of time, and made astronomical observations from a remote age, is equally attested by ancient writers and by their monuments. It is, however, very difficult to connect periods mentioned by the former with the indications of the same kind offered by the latter; and what we may term the recorded observations of the monuments cannot be used for the determination of chronology without a previous knowledge of Egyptian astronomy that we have not wholly attained. The testimony of ancient writers must, however, be carefully sifted, and we must not

take their statements as a positive basis without the strongest evidence of correctness. Without that testimony, however, we could not at present prosecute the inquiry. The Egyptians do not appear to have had any common era. Every document that bears the date of a year gives the year of the reigning sovereign, counted from that current year in which he came to the throne, which was called his first year. There is, therefore, no general means of testing deductions from the chronological indications of the monuments.

There appear to have been at least three years in use with the Egyptians before the Roman domination, the Vague Year, the Tropical Year, and the Sothic Year; but it is not probable that more than two of these were employed at the same time. The Vague Year contained 365 days without any additional fraction, and therefore passed through all the seasons in about 1500 years. It was used both for civil and for religious purposes. Probably the Israelites adopted this year during the sojourn in Egypt, and that instituted at the Exodus appears to have been the current Vague Year fixed by the adoption of a method of intercalation. See YEAR. The Vague Year was divided into twelve months, each of thirty days, with five *epagomenæ*, or additional days, after the twelfth. The months were assigned to three seasons, each comprising four months, called respectively the 1st, 2d, 3d, and 4th of those seasons. The names by which the Egyptian months are commonly known, Thoth, Paophi, etc., are taken from the divinities to which they were sacred. The seasons are called, according to our rendering, those of Vegetation, Manifestation, and the Waters, or the Inundation: the exact meaning of their names has, however, been much disputed. They evidently refer to the phenomena of a tropical year, and such a year we must therefore conclude the Egyptians had, at least in a remote period of their history. If, as we believe, the third season represents the period of the inundation, its beginning must be dated about one month before the autumnal equinox, which would place the beginning of the year at the winter solstice, an especially fit time in Egypt for the commencement of a tropical year. The Sothic Year was a supposed sidereal year of 365 $\frac{1}{4}$  days, commencing with the so-called heliacal rising of Sothis. The Vague Year, having no intercalation, constantly retreated through the Sothic Year, until a period of 1461 years of the former kind, and 1460 of the latter had elapsed, from one coincidence of commencements to another.

The Egyptians are known to have used two great cycles, the Sothic Cycle and the Tropical Cycle. The former was a cycle of the coincidence of the Sothic and Vague years, and therefore consisted of 1460 years of the former kind. This cycle is mentioned by ancient writers, and two of its commencements recorded, the one, called the Era of Menophres, July 20, B.C. 1322, and the other on the same day, A.D. 139. Menophres is supposed to be the name of an Egyptian king, and this is most probable. The nearest name is Mem-ptah, or Menephtah, which is part of that of Sethi Menptah, a title that seems to have been in one form or another common to several of the first kings of the 19th dynasty. Chronological indications seem to be conclusive in favor of Sethos I. The Tropical Cycle was a cycle of the coincidence of the Tropical and Vague years. We do not know the exact length of the former year with the Egyptians, nor, indeed, that it was used in the monumental age; but from the mention of a period of 500 years, the third of the cycle, and the time during which the Vague Year would retrograde through one season, we cannot doubt that there was such a cycle, not to speak of its analogy with the Sothic Cycle. It has been supposed by M. Biot to have had a duration of 1505 years; but the length of 1500 Vague Years is preferable, since it contains a number of complete lunations, besides that the Egyptians could scarcely have been more exact,

and that the period of 500 years is a subdivision of 1500. Ancient writers do not fix any commencements of this cycle. If the characteristics of the Tropical Year are what we suppose, the cycle would have begun B.C. 2005 and 507: two hieroglyphic inscriptions are thought to record the former of these epochs (Poole, *Hore Egyptiacæ*, p. 12 sq., pl. i, Nos. 5, 6). The return of the Phœnix has undoubtedly a chronological meaning. It has been supposed to refer to the period last mentioned, but Poole is of opinion that the Phœnix Cycle was of exactly the same character, and therefore length, as the Sothic, its commencement being marked by the so-called heliacal rising of a star of the constellation BENNU HESAR, "the Phœnix of Osiris," which is placed in the astronomical ceiling of the Rameseum of El-Kurneh six months distant from Sothis. The monuments make mention of Panegyric Months, which can only, it is supposed, be periods of thirty years each, and divisions of a year of the same kind. Poole has computed the following as dates of commencements of these Panegyric Years, in accordance with which he has adjusted his chronology: 1st, B.C. 2717, 1st dynasty, æra of Menes (not on monuments); 2d, B.C. 2352, 4th dynasty, Sûphis I and II; 3d, B.C. 1986 (12th dynasty, Osirtasen III? not on monuments); the last-mentioned date being also, according to him, the beginning of a Phœnix Cycle, which he thinks comprised four of these Panegyric Years. The other important dates of the system of panegyrics which occur on the monuments are, in his scheme: B.C. 1442, 18th dynasty, queen Amen-nem; and B.C. 1412, 18th dynasty, Thothmes III.

Certain phenomena recorded on the monuments have been calculated by M. Biot, who has obtained the following dates: Rising of Sothis in reign of Thothmes III, 18th dynasty, B.C. 1445; supposed vernal equinox, Thothmes III, B.C. cir. 1441; rising of Sothis, Rameses II, 19th dynasty, B.C. 1301; star-risings, Rameses VI and IX (? Menephtah I and II), 20th dynasty, B.C. cir. 1241. Some causes of uncertainty affect the exactness of these dates, and that of Rameses II is irreconcilable with the two of Thothmes III, unless we hold the calendar in which the inscription supposed to record it occurs to be a Sothic one, in which case no date could be obtained.

Egyptian technical chronology gives us no direct evidence in favor of the high antiquity which some assign to the foundation of the first kingdom. The earliest record which all Egyptologists are agreed to regard as affording a date is of the fifteenth century B.C., and no one has alleged any such record to be of an earlier time than the twenty-fourth century B.C. The Egyptians themselves seem to have placed the beginning of the 1st dynasty in the twenty-eighth century B.C., but for determining this epoch there is no direct monumental evidence, and a comparison with Scripture does not favor quite so early a date. See CHRONOLOGY.

XX. *Historical Chronology.*—The materials for this are the monuments and the remains of the historical work of Manetho. Since the interpretation of hieroglyphics has been discovered the evidence of the monuments has been brought to bear on this subject, but as yet it has not been sufficiently full and explicit to enable us to set aside other aid. We have still to look elsewhere for a general framework, the details of which the monuments may fill up. The remains of Manetho are now generally held to supply this want. A comparison with the monuments has shown that he drew his information from original sources, the general authenticity of which is vindicated by minute points of agreement. The information Manetho gives us, in the present form of his work, is, however, by no means explicit, and it is only by a theoretical arrangement of the materials that they take a definite form. The remains of Manetho's historical work consist of a list of the Egyptian dynasties and two considerable frag-

ments, one relating to the Shepherds, the other to a tale of the Exodus. The list is only known to us in the epitome given by Africanus, preserved by Syncellus, and that given by Eusebius. These present such great differences that it is not reasonable to hope that we can restore a correct text. The series of dynasties is given as if they were successive, in which case the commencement of the first would be placed full 5000 years B.C., and the reign of the king who built the Great Pyramid, 4000. The monuments do not warrant so extreme an antiquity, and the great majority of Egyptologists have therefore held that the dynasties were partly contemporary. A passage in the fragment of Manetho respecting the Shepherds, where he speaks of the kings of the Thebais and of the rest of Egypt rising against these foreign rulers, makes it almost certain that he admitted at least three contemporary lines at that period (Josephus, *Apion*, i, 14). The naming of dynasties anterior to the time of a single kingdom, and then of later ones, which we know generally held sway over all Egypt—in other words, the first seventeen, distinct from the 18th and following dynasties—lends support to this opinion. The former are named in groups: first a group of Thinites, then one of Memphites, broken by a dynasty of Elephantinites, next a Heracleopolite line, etc., the dynasties of a particular city being grouped together; whereas the latter generally present but one or two together of the same name, and the dynasties of different cities recur. The earlier portion seems therefore to represent parallel lines, the later a succession. The evidence of the monuments leads to the same conclusion. Kings who unquestionably belong to different dynasties are shown by them to be contemporary (see, for example, in Rawlinson's *Herod.* ii, 289). In the present state of Egyptology this evidence has led to various results as to the number of contemporary dynasties, and the consequent duration of the whole history. One great difficulty is that the character of the inscriptions makes it impossible to ascertain, without the explicit mention of two sovereigns, that any one king was not a sole ruler. For example, it has lately been discovered that the 12th dynasty was for the greatest part of its rule a double line; yet its numerous monuments in general give no hint of more than one king, although there was almost always a recognised colleague. Therefore, *à fortiori*, no notice would be taken, if possible, on any monument of a ruler of another house than that of the king in whose territory it was made. We can therefore scarcely expect very full evidence on this subject. Mr. Lane, as long ago as 1830, proposed an arrangement of the first seventeen dynasties based upon their numbers and names. The subjoined table, after Poole, contains the dynasties thus arranged, with the approximate dates B.C. which he assigns to their commencements.

I. Thinites 2717 Mænes.	III. Memphites. 2650				
II. 2470	IV. 2440	V. Elephantinites. 2440			
	VI. 2200		IX. Hermonthites. 2200	XI. Diospolites. 2200	
	VII. 1890			XII. 2080	XIV. Xoites. 2080
	VIII. 1800			XIII. 1920	XV. and XVI. 2080
			X. 1750		XVII. 1680
				XVIII. 1525	

The monuments will not justify any great extension of the period assigned in the table to the first seventeen dynasties. The last date, that of the commencement of the 18th dynasty, cannot be changed more than a few years. Some Egyptologists, indeed, place it much earlier (Bunsen, B.C. 1625; Böckh, 1655; Lepsius, 1684; Brugsch, 1706), but they do so in opposition to positive monumental evidence. The date of the beginning of the 1st dynasty, which Poole is disposed to place a little before B.C. 2700, is more doubtful, but a concurrence of ethnological evidence points

to the twenty-fifth century. The interval between the two dates cannot therefore be greatly more or less than nine hundred years, a period quite in accordance with the lengths of the dynasties according to the better text, if the arrangement here given be correct. Some have supposed a much greater antiquity for the commencement of Egyptian history (Bunsen, B.C. 3623; Lepsius, 3892; Brugsch, 4455; Böckh, 5702). Their system is founded upon a passage in the chronological work of Syncellus, which assigns a duration of 3555 years to the thirty dynasties (*Chron.* p. 51 r). It is by no means certain that this number is given on the authority of Manetho, but apart from this, the whole statement is unmistakably not from the true Manetho, but from some one of the fabricators of chronology, among whom pseudo-Manetho held a prominent place (*Encyc. Brit.* 8th edit., "Egypt," p. 452; *Quarterly Review*, No. 210, p. 395-7). If this number be discarded as doubtful or spurious, there is nothing definite to support the extended system so confidently put forth by those who adopt it.

The importance of this ancient list of Egyptian kings—it being, in fact, the only completely connected line extant—requires a fuller exhibit than we find in the dictionaries of Smith and Kitto, from which a large part of the other investigations of this article is derived. The dates given by us are essentially those assigned by Wilkinson in Rawlinson's *Herodotus*, vol. ii, chap. viii. The identifications are in part made by Kenrick (*Egypt under the Pharaohs*, vol. ii). The names of Manetho exhibit many striking coincidences with the elements afforded by the latest researches and discoveries, especially Mariette's "Apis list" on the tablet of Sakkarah, Dümichen's "Sethos list" on that of Abydos, and the "Turin papyrus," as these are given in detail by Unger (*Chronologie des Manetho*, Berlin, 1867), although we have not been able to adopt all the conclusions of this author, whose work is the most elaborate on the subject. The fact that the names in all these lists are in continuous order does not prove an unbroken succession of reigns, for such is the case in Manetho's list, although he expressly states that the several dynasties were of different localities. That the dynasties of the monumental lists likewise are not all consecutive is further proved by at least two conclusive circumstances: 1. The sum of the years of those 74 reigns, to which an explicit length is assigned in the Turin roll, is 1060; now if to this we add a corresponding number for the other 160 reigns whose duration is not specified in the same document, and also for the 10 subsequent names in the parallel lists down to Sethi I (B.C. 1322), we obtain a total of 3484 years for the first eighteen dynasties, or a date for Menes of B.C. 4806; but this would be 2144 years before the Flood, even according to the longest computation of the Biblical text. See AGES OF THE WORLD.

2. Several dynasties are wholly and designedly omitted in one of these monumental lists, which are given at length in the others (e. g. the 7th, 8th, 9th, 13th, 14th, and 15th), and at least one of them (the 11th) is absent in all of them, not to speak of numerous gaps and discrepancies: they must therefore, if at all trustworthy, be intended as contemporaneous lines in different sections of the empire, precisely as were those of Manetho, who frequently dispatches an entire dynasty without any details whatever, as being of local importance only. See MANETHO.

Conquest of Egypt by Alexander the Great.

XXI. History.—1. *Traditional Period.*—We have first to notice the indications in the Bible which relate to the earliest period. In Gen. x we find the colonization of Egypt traced up to the immediate children of Noah, for it is there stated that Mizraim was the second son of Ham, who was himself the second son of Noah. That Egypt was colonized by the descendants of Noah in a very remote age is further shown by the mention of the migration of the Philistines from Caphtor, which had taken place before the arrival of Abraham in Palestine (Gen. x, 14; compare Deut. ii, 23; Amos ix, 27). Before this migration could occur the Caphtorim and other Mizraites must have occupied Egypt for some time. Immediately after these genealogical statements, the sacred narrative (Gen. xii) informs us that the patriarch Abraham, pressed by famine, went down (B.C. 2087) into Egypt, where it appears he found a monarch, a court, princes, and servants, and where he found also those supplies of food which the well-known fertility of the country had led him to seek there; for it is expressly stated that the favor which his wife had won in the reigning Pharaoh's eyes procured him sheep and oxen, as well as heasses, and men-servants, and maid-servants, and sheasses, and camels. A remarkable passage points to a knowledge of the date at which an ancient city of Egypt was founded: "Hebron was built seven years before Zoan in Egypt" (Num. xiii, 22). We find that Hebron was originally called Kirjath-arba, and was a city of the Anakim (Josh. xiv, 15), and it is mentioned under that appellation in the history of Abraham (Gen. xxiii, 2); it had therefore been founded by the giant-race before the days of that patriarch. In Gen. xxi, 9, mention is made in the case of Ishmael, the son of Hagar the Egyptian, whose mother took him a wife out of the land of Egypt (B.C. cir. 2055), of a mixed

race between the Egyptians and the Chaldeans, a race which in after times became a great nation. From this mixture of races it has been supposed the Arabs (عرب, "mixed people") had their name (Sharpe's *Early Hist. of Egypt*, i, 11).

The evidence of the Egyptians as to the primeval history of their race and country is extremely indefinite. They seem to have separated mankind into two great stocks, and each of these again into two branches, for they appear to have represented themselves and the negroes, the red and black races, as the children of the god Horus, and the Semites and Europeans, the yellow and white races, as the children of the goddess Pesht (comp. Brugsch, *Geogr. Inschr.* ii, 90, 91). They seem, therefore, to have held a double origin of the species. The absence of any important traditional period is very remarkable in the fragments of Egyptian history. These commence with the divine dynasties, and pass abruptly to the human dynasties. The latest portion of the first may indeed be traditional, not mythical, and the earliest part of the second may be traditional and not historical, though this last conjecture we are hardly disposed to admit. In any case, however, there is a very short and extremely obscure time of tradition, and at no great distance from the earliest date at which it can be held to end we come upon the clear light of history in the days of the pyramids. The indications are of a sudden change of seat, and the settlement in Egypt of a civilized race, which, either wishing to be believed autochthonous, or having lost all ties that could keep up the traditions of its first dwelling-place, filled up the commencement of its history with materials drawn from mythology. There is no trace of the tradition of the Deluge which is found in almost every other country of the world. The

priests are indeed reported to have told Solon, when he spoke of one deluge, that many had occurred (Plat. *Tim.* 23), but the reference is more likely to have been to great floods of the Nile than to any extraordinary catastrophes. See DELUGE.

2. *Uncertain Period.*—The history of the dynasties preceding the 18th is not told by any continuous series of monuments. Except the bare lists indicated in the above table, there are scarcely any records of the age left to the present day, and thence in a great measure arises the difficulty of determining the chronology. From the time of Menes, the first king, until the Shepherd invasion, Egypt seems to have enjoyed perfect tranquillity. During this age the Memphite line was the most powerful, and by it, under the 4th dynasty, were the most famous pyramids raised. The Shepherds were foreigners who came from the east, and, in some manner unknown to Manetho, gained the rule of Egypt. Those whose kings composed the 15th dynasty were the first and most important. They appear to have been Phœnicians, and it is probable that their migration into Egypt, and thence at last into Palestine, was part of the great movement to which the coming of the Phœnicians from the Erythræan Sea, and the Philistines from Capthor, belong. It is not impossible that the war of the four kings—Chedorlaomer and his allies—was directed against the power of the kings of the 15th dynasty. Most probably the Pharaoh of Abraham was of this line, which lived at Memphis, and at the great fort or camp of Avaris on the eastern frontier. The period of Egyptian history to which the Shepherd invasion should be assigned is a point of dispute. It is generally placed after the 12th dynasty, for it is argued that this powerful line could not have reigned at the same time as one or more Shepherd dynasties. Poole is of the opinion that this objection is not valid, and that the Shepherd invasion was anterior to the 12th dynasty. It is not certain that the foreigners were at the outset hostile to the Egyptians, for they may have come in by marriage, and it is by no means unlikely that they may have long been in a position of secondary importance. The rule of the 12th dynasty, which was of Thebans, lasting about 160 years, was a period of prosperity to Egypt, but after its close those calamities appear to have occurred which made the Shepherds hated by the Egyptians. During the interval to the 18th dynasty there seems to have been no native line of any importance but that of the Thebans, and more than one Shepherd dynasty exercised a severe rule over the Egyptians. The paucity of the monuments proves the troubled nature of this period. See *HYKOSOS*.

Of these first seventeen dynasties, Menes, the first mortal king of Egypt, according to Manetho, Herodotus, Eratosthenes, and Diodorus, and preceded, according to the first, by gods, heroes, and Manes (?), *ἄνθρωποι*, is accepted on all hands as a historical personage. His hieroglyphic name reads MENIM or MENA, and is the first on the list of the Ramesium of el-Kurruh. It is also met with in the hieratic of the Turin Papyrus of Kings. Strong reasons are given by Mr. Stuart Poole for fixing the date of his accession at B.C. 2717 (*Horæ Ægyptiacæ*, p. 94-98); but even this date must be somewhat lowered; or, as it would precede that of the Flood (B.C. 2515), on the other hand, Unger (*ut sup.*) raises it to June 27, B.C. 5613. As one step in Poole's argument involves a very ingenious elucidation of a well-known statement of Herodotus, we cannot forbear to mention it. Herodotus says that, in the interval from the first king to Sethon, the priest of Hephestus, the priests told him that "the sun had four times moved from his wonted course, twice rising where he now sets, and twice setting where he now rises." Upon this Mr. Poole remarks: "It is evident that the priests told Herodotus that great periods had elapsed since the time of Menes, the first king, and

that, in the interval from his reign to that of Sethon, the solar risings of stars—that is to say, their manifestations—had twice fallen on those days of the Vague Year on which their settings fell in their time, and *vice versa*; and that the historian, by a natural mistake, supposed they spoke of the sun itself." Menes appears to have been a Thinite king, of the city of This, near Abydos, in Upper Egypt. Herodotus ascribes the building of the city of Memphis to him, while Manetho says that he made a foreign expedition and acquired renown, and that eventually he was killed by a hippopotamus. Menes, after a long reign, was succeeded by his son Athothis, who was the second king of the first dynasty. Manetho says that he built the palace at Memphis, that he was a physician, and left anatomical books; all of these statements implying that even at this early period the Egyptians were in a high state of civilization. About the time of Athothis, the 3d dynasty is supposed, according to the scheme which seems most reasonable, to have commenced, and Memphis to have become independent, giving its name to five dynasties of kings—3d, 4th, 6th, 7th, and 8th. The 1st Thinite dynasty probably lasted about two centuries and a half. Of the 2d very little has reached us; under one of the kings it was determined that women could hold the sovereign power; in the time of another it was fabled, says Manetho, that the Nile flowed mixed with honey for the space of eleven days. The duration of this dynasty was probably between 300 and 400 years, and it seems to have come to a close at the time of the Shepherd invasion. The 3d (Memphite) dynasty, after having lasted about 200 years, was succeeded by the 4th, one of the most famous of the lines which ruled in Egypt; while the 5th dynasty of Elephantine kings arose at the same time. This was emphatically the period of the pyramids, the earliest of which was probably the northern pyramid of Abû-Sir, supposed to have been the tomb of Soris or Shurai, the head of the 4th dynasty. He was succeeded by two kings of the name of Suphis, the first of whom, the Cheops of Herodotus, the Shuphu of the monuments, was probably the builder of the great pyramid. On these wondrous monuments we find traces at that remote period of the advanced state of civilization of later ages. The cursive character scrawled on the stones by the masons proves that writing had been long in common use. Many of the blocks brought from Syene are built together in the pyramids of Ghizeh in a manner unrivalled at any period. The same manners and customs are portrayed on them as on the later monuments. The same boats are used, the same costume of the priests, the same trades, such as glass-blowing and cabinet-making. At the beginning of the 4th dynasty, moreover, the peninsula of Sinai was in the possession of the Egyptians, and its copper mines were worked by them. The duration of this dynasty probably exceeded two centuries, and it was followed by the 6th. The 5th dynasty of Elephantines, as just remarked, began the same time as the 4th. The names of several of its kings occur in the Necropolis of Memphis. The most important of them is Saphres, the Shuphra of the monuments, the Chephren of Herodotus, and Chephren of Diodorus. This dynasty lasted nearly 600 years. Of the 6th dynasty, which lasted about 150 years, the two most famous sovereigns are Phiois or Pepi and queen Nitocris. The former is said to have ruled for a hundred years. With the latter the dynasty closed; for at this period Lower Egypt was invaded by the Shepherds, who entered the country from the north-east, about 700 years after Menes, and eventually drove the Memphites from the throne. Of the 7th and 8th dynasties nothing is known with certainty; they probably followed the 15th. To the former of them, one version of Manetho assigns a duration of 70 days, and 150 years to the latter. The 9th dynasty of Heracleopolites, or,

more properly, of Hermonthites, as Sir G. Wilkinson has suggested (Rawlinson's *Herod.* ii, 293), arose while the 6th was in power. Little is known of either the 9th or 10th dynasties, which together may have lasted nearly 600 years, ending at the time of the great Shepherd war of expulsion, which resulted in the overthrow of all the royal lines except the Diospolite or Theban. With the 11th dynasty commenced the Diospolite kingdom, which subsequently attained to greater power than any other. Amenemhet I was the last and most famous king of this dynasty, and during part of his reign he was co-regent of Osirtasen or Sesertesen I, head of the 12th. An epoch is marked in Egyptian history by the commencement of this dynasty, since the Shepherd rule, which lasted for 500 years, is coeval with it. The three Osirtasens flourished in this dynasty, the second of whom is probably the Sesostris of Manetho. It began about Abraham's time, or somewhat later. In ancient sculptures in Nubia we find kings of the 18th dynasty worshipping Osirtasen III as a god, and this is the only case of the kind. The third Osirtasen was succeeded by Amenemhet III, supposed to be the Mæris of Herodotus, who built the labyrinth. After the reigns of two other sovereigns, this dynasty came to a close, having lasted about 160 years. The 13th dynasty, which lasted some 400 years, probably began before the close of the 12th. The kings of this dynasty were of little power, and probably tributary to the Shepherds. The Diospolites, indeed, did not recover their prosperity till the beginning of the 13th dynasty. The 14th, or Xoite dynasty, seems to have risen with the 12th. It was named from Xoïs, a town of Lower Egypt, in the northern part of the Delta. It may have lasted for nearly 500 years, and probably terminated during the great Shepherd war. The 15th, 16th, and 17th dynasties are those of the Shepherds. Who these foreigners were who are said to have subdued Egypt without a battle is a question of great uncertainty. Their name is called Hyksôs by Manetho, which is variously interpreted to mean shepherd kings, or foreign shepherds. They have been pronounced to have been Assyrians, Scythians, Ethiopians, Phœnicians, and Arabs. The kings of the 15th dynasty were the greatest of the foreign rulers. The kings of the 16th and 17th dynasties are very obscure. Mr. Poole says there are strong reasons for supposing that the kings of the 16th were of a different race from those of the 15th, and that they may have been Assyrians. Having held possession of Egypt 511, or, according to the longest date, 625 years, the Shepherds were driven out by Ames, or Amosis, the first king of the 18th dynasty; and the whole country was then united under one king, who rightly claimed the title of lord of the two regions, or of Upper and Lower Egypt.

3. *Period of the Hebrew Sojourn.*—In Gen. xxxix begins the interesting story of Joseph's being carried down to Egypt, with all its important consequences for the great-grandchildren of Abraham. The productiveness of the country is the allurements, famine the impulse. Attendant circumstances show that Egypt was then famous also for its commercial pursuits; and the entire narrative gives the idea of a complex system of society (about B.C. 1890), and a well-constituted yet arbitrary form of government. As in Eastern courts at later periods of history, elevation to high offices was marked and sudden. The slave Joseph is taken from prison and from impending death, and raised to the dignity of prime vizier, and is intrusted with making provision for an approaching dearth of food, which he had himself foretold, during which he effects in favor of the ruling sovereign one of the greatest revolutions of property which history has recorded. The high consideration in which the priestly order was held is apparent. Joseph himself marries a daughter of the priest of On. Out of respect towards, as well as by the direct influence of Joseph, the He-

brews were well treated. The scriptural record, however, distinctly states (xlvii, 34) that before the descent of Israel and his sons "every shepherd" was "an abomination unto the Egyptians." The Hebrews, whose "trade had been about cattle," must have been odious in the eyes of the Egyptians, yet they are expressly permitted to dwell "in the best of the land" (xlvii, 6), which is identified with the land of Goshen, the place which the Israelites had prayed might be assigned to them, and which they obviously desired on account of the adaptation of its soil to their way of life as herdsmen. Having settled his father and family satisfactorily in the land, Joseph proceeded to supply the urgent wants of a hungry nation, and at the same time converted the tenure of all property from freehold into tenancy-at-will, with a rent-charge of one fifth of the produce, leaving the priests' lands, however, in their own hands; and thus he gave another evidence of the greatness of their power.

The richness of Goshen was favorable, and the Israelites "grew and multiplied exceedingly," so that the land was filled with them. But Joseph was now dead; time had passed on, and there rose up a new king (probably one of a new dynasty) "which knew (Exod. i, 8) not Joseph," having no personal knowledge, and, it may be, no definite information of his services; who, becoming jealous of the increase of the Hebrews, set about persecuting them with the avowed intention of diminishing their numbers and crippling their power. Severe task-masters are therefore set over them; heavy tasks are imposed; the Hebrews are compelled to build "treasure cities, Pithom and Raameses." It is found, however, that they only increase the more. In consequence, their burdens are doubled and their lives made bitter with hard bondage (Exod. i, 14), "in mortar and in brick, and in all manner of service in the field." See BRICK. Their first-born males, moreover, are doomed to destruction the moment they come into being. The deepest heart-burnings ensue; hatred arises between the oppressor and the oppressed; the Israelites seek revenge in private and by stealth (Exod. ii, 12). At last a higher power interferes, and the afflicted race is permitted to quit Egypt (B.C. 1658). At this time Egypt appears to have been a well-peopled and well-cultivated country, with numerous cities, under a despotic monarch, surrounded by officers of his court and a life-guard. There was a ceremonial at audience, a distinction of ranks, a state-prison, and a prime minister. Great buildings were carried on. There was set apart from the rest of the people an order of priests who probably filled offices in the civil government; the priest of Midian and the priest of On seem to have ruled over the cities so named. There was in the general class of priests an order—wise men, sorcerers, and magicians—who had charge of a certain secret knowledge; there were physicians or embalmers of the dead; the royal army contained chosen captains, and horsemen, and chariots. The attention which the people at large paid to agriculture, and the fixed notions of property which they in consequence had, made them hold the shepherd or nomade tribes in abhorrence, as freebooters only less dangerous than hunting-tribes. See PHARAOH.

According to the scheme of Biblical chronology, which we have adopted as the most probable, the whole sojourn in Egypt would belong to the period before the 18th dynasty. The Israelites would have come in and gone forth during that obscure age, for the history of which we have little or no monumental evidence. This would explain the absence of any positive mention of them on the Egyptian monuments. Some assert that they were an unimportant Arab tribe, and therefore would not be mentioned, and that the calamities attending their departure could not be commemorated. These two propositions are contradictory, and the difficulties are unsolved. If, as Lepsius sup-

poses, the Israelites came in under the 18th dynasty, and went out under the 19th, or if, as Bunsen holds, they came in under the 12th, and (after a sojourn of 1431 years!) went out under the 19th, the oppression in both cases falling in a period of which we have abundant contemporary monuments, sometimes the records of every year, it is impossible that the monuments should be wholly silent if the Biblical narrative is true. Let us examine the details of that narrative. At the time to which we should assign Joseph's rule, Egypt was under Shepherds, and Egyptian kings of no great strength. Since the Pharaoh of Joseph must have been a powerful ruler and held Lower Egypt, there can be no question that he was, if the dates be correct, a Shepherd of the 15th dynasty. How does the Biblical evidence affect this inference? Nothing is more striking throughout the ancient Egyptian inscriptions and writings than the bitter dislike of most foreigners, especially Easterns. They are constantly spoken of in the same terms as the inhabitants of the infernal regions, not alone when at war with the Pharaohs, but in time of peace and in the case of friendly nations. It is a feeling paralleled in our days by that of the Chinese alone. The accounts of the Greek writers, and the whole history of the later period, abundantly confirm this estimate of the prejudice of the Egyptians against foreigners. It seems to us perfectly incredible that Joseph should be the minister of an Egyptian king. In lesser particulars the evidence is not less strong. The Pharaoh of Joseph is a despot, whose will is law, who kills and pardons at his pleasure; who not only raises a foreign slave to the head of his administration, but through his means makes all the Egyptians, except the priests, serfs of the crown. The Egyptian kings, on the contrary, were restrained by the laws, shared the public dislike of foreigners, and would have avoided the very policy Joseph followed, which would have weakened the attachment of their fellow-countrymen by the loosening of local ties and complete reducing to bondage of the population, although it would have greatly strengthened the power of an alien sovereign. Pharaoh's conduct towards Joseph's family points to the same conclusion. He gladly invites the strangers, and gives them leave to dwell, not among the Egyptians, but in Goshen, where his own cattle seem to have been (Gen. xlv, 34; xlvii, 6). His acts indicate a fellow-feeling, and a desire to strengthen himself against the national party. See JOSEPH.

The "new king," "which knew not Joseph," is generally thought by those who hold with us as to the previous history, to have been an Egyptian, and head of the 18th dynasty. It seems at first sight extremely probable that the king who crushed, if he did not expel the Shepherds, would be the first oppressor of the nation which they protected. Plausible as this theory appears, a close examination of the Biblical narrative seems to us to overthrow it. We read of the new king that—"he said unto his people, Behold, the people of the children of Israel [are] more and mightier than we: come on, let us deal wisely with them, lest they multiply, and it come to pass that, when there falleth out any war, they join also unto our enemies, and fight against us, and [so] get them up out of the land" (Exod. i, 9, 10). The Israelites are therefore more and stronger than the people of the oppressor; the oppressor fears war in Egypt, and that the Israelites would join his enemies; he is not able at once to adopt open violence, and he therefore uses a subtle system to reduce them by making them perform forced labor, and soon after takes the stronger measure of killing their male children. These conditions point to a divided country and a weak kingdom, and cannot, we think, apply to the time of the 18th and 19th dynasties. The whole narrative of subsequent events to the Exodus is consistent with this conclusion, to which the use of universal terms does not offer any real objection.

When all Egypt is spoken of, it is not necessary either in Hebrew or in Egyptian that we should suppose the entire country to be strictly intended. If we conclude, therefore, that the Exodus most probably occurred before the 18th dynasty, we have to ascertain, if possible, whether the Pharaohs of the oppression appear to have been Egyptians or Shepherds. The change of policy is in favor of their having been Egyptians, but is by no means conclusive, for there is no reason that all the foreigners should have had the same feeling towards the Israelites, and we have already seen that the Egyptian Pharaohs and their subjects seem in general to have been friendly to them throughout their history, and that the Egyptians were privileged by the law, apparently on this account. It may be questioned whether the friendship of the two nations, even if merely a matter of policy, would have been as enduring as we know it to have been, had the Egyptians looked back on their conduct towards the Israelites as productive of great national calamities, or had the Israelites looked back upon the persecution as the work of the Egyptians. If the chronology be correct, we can only decide in favor of the Shepherds. During the time to which the events are assigned there were no important lines but the Theban, and one or more of Shepherds. Lower Egypt, and especially its eastern part, must have been in the hands of the latter. The land of Goshen was in the eastern part of Lower Egypt: it was wholly under the control of the oppressors, whose capital or royal residence, at least in the case of the Pharaoh of the Exodus, lay very near to it. Manetho, according to the transcript of Africanus, speaks of three Shepherd dynasties, the 15th, 16th, and 17th, the last of which, according to the present text, was of Shepherds and Thebans, but this is probably incorrect, and the dynasty should rather be considered as of Shepherds alone. It is difficult to choose between these three: a passage in Isaiah, however, which has been strangely overlooked, seems to afford an indication which narrows the choice. "My people went down aforetime into Egypt to sojourn there, and the Assyrian oppressed them without cause" (iii, 4). This indicates that the oppressor was an Assyrian, and therefore not of the 15th dynasty, which, according to Manetho, in the epitomes, was of Phœnicians, and opposed to the Assyrians (Josephus, *Apion*, i, 14). Among the names of kings of this period in the royal Turin papyrus (ed. Wilkinson) are two which appear to be Assyrian, so that we may reasonably suppose that some of the foreign rulers were of that race. Their exact date, however, is undecided. It cannot be objected to the explanation we have offered that the title Pharaoh is applied to the kings connected with the Israelites, and that they must therefore have been natives, for it is almost certain that at least some of the Shepherd kings were Egyptianized, like Joseph, who received an Egyptian name, and Moses, who was supposed by the daughters of Jethro to be an Egyptian (Exod. ii, 19). It has been urged by the opponents of the chronological schemes that place the Exodus before the later part of the fourteenth century B.C., that the conquests of the Pharaohs of the 18th, 19th, and 20th dynasties would have involved collisions with the Israelites had they been in those times already established in Palestine, whereas neither the Bible nor the monuments of Egypt indicate any such event. It has been overlooked by the advocates of the Rabbinical date of the Exodus that the absence of any positive Palestinian names, except that of the Philistines, in the lists of peoples and places subject to these Pharaohs, and in the records of their wars, entirely destroys their argument; for while it shows that they did not conquer Palestine, it makes it impossible for us to decide on Egyptian evidence whether the Hebrews were then in that country or not. Shishak's list, on the contrary, presents several well-known names of towns in Palestine, be-

sides that of the kingdom of Judah. The policy of the Pharaohs, as previously explained, is the key to their conduct towards the Israelites. At the same time, the character of the portions of the Bible relating to this period prevents our being sure that the Egyptians may not have passed through the country, and even put the Israelites to tribute. It is illustrative of the whole question under consideration that, in the most flourishing days of the sole kingdom of Israel, a Pharaoh should have marched unopposed into Palestine and captured the Canaanitish city Gezer, at no great distance from Jerusalem, and that this should be merely incidentally mentioned at a later time instead of being noticed in the regular course of the narrative (1 Kings ix, 15, 16). See EXODE.

4. *Definite Period.*—With the 18th dynasty, about B.C. 1520, a new and clearer epoch of Egyptian history begins, both as regards the numerous materials for reconstructing it, and also its great importance. In fact, the history of the 18th, 19th, and 20th dynasties is that of the Egyptian empire. Amosis, or Ahmes, the head of the first of these, overthrew the power of the Shepherds, and probably expelled them. No great monuments remain of the first king, but from various inscriptions we are warranted in supposing that he was a powerful king. During his reign we first find mention of the horse, and, as it is often called by the Semitic name *sais*, it seems probable that it was introduced from Asia, and possibly by the Shepherd kings. If so, they may have been indebted to the strength of their cavalry for their easy conquest of Egypt. It is certain that, while other animals are frequently depicted on the monuments, neither in the tombs near the pyramids, nor at Beni-Hassan, is there any appearance of the horse, and yet, subsequently, Egypt became the great dépôt for these animals, inasmuch that in the time of Solomon they were regularly imported for him, and for "all the kings of the Hittites, and for the Kings of Syria;" and when Israel was invaded by Sennacherib, it was on Egypt that they were said to put their trust for chariots and for horsemen. Amenoph I, the next king (B.C. cir. 1498), was sufficiently powerful to make conquests in Ethiopia and in Asia. In his time we find that the Egyptians had adopted the five intercalary days, as well as the twelve hours of day and night. True arches, not "arches of approaching stones," also are found at Thebes, bearing his name on the bricks, and were in common use in his time. See ARCU. Some of the more ancient chambers in the temple of Amen-ra, or El-Karnak, at Thebes, were built by him. In the reign of his successor, Thothmes I (B.C. cir. 1478), the arms of Egypt were carried into Mesopotamia, or the land of "Naharayn:" by some Naharayn is identified with the Nairi, a people south-west of Armenia. Libya also was subject to his sway. A monument of his reign is still remaining in one of the two obelisks of red granite which he set up at El-Karnak, or Thebes. The name of Thothmes II (B.C. cir. 1470) is found as far south as Napata, or Gebel Berkel, in Ethiopia. With him and his successor was associated a queen, Amense or Amen-nunt, who seems to have received more honor than either. She is thought to have been a Semiramis, that name, like Sesostris, probably designating more than one individual. Queen Amen-nemt and Thothmes II and III are the earliest sovereigns of whom great monuments remain in the temple of El-Karnak, the chief sanctuary of Thebes. Thothmes III (B.C. cir. 1463) was one of the most remarkable of the Pharaohs. He carried his arms as far as Nineveh, and reduced perhaps Babylon also to his sway, receiving a large tribute from Asiatic nations over whom he had triumphed. This was a common mode of acknowledging the supremacy of a conqueror, and by no means implied that the territory was surrendered to him; on the contrary, he may only have defeated the *army* of the nation, and that beyond

its own frontier. The *Punt*, a people of Arabia, the *Shupha*, supposed to be of Cyprus, and the *Ruten*, a people of the Euphrates or Tigris, thus confessed the power of Thothmes; and the monuments at Thebes are rich in delineations of the elephants and bears, camelopards and asses, the ebony, ivory, gold, and silver which they brought for tribute. Very beautiful specimens of ancient Egyptian painting belong to the time of this king; indeed his reign, with that of Thothmes II preceding it, and those of Amenoph II (B.C. cir. 1416), Thothmes IV (whose name is borne by the sphinx at the pyramids), and Amenoph III following it, may be considered as comprising the best period of Egyptian art; all the earlier time showing a gradual improvement, and all the later a gradual declension. In the reign of Thothmes IV (B.C. cir. 1410), according to Manetho, the Shepherds took their final departure. The conquests of Amenoph III (B.C. cir. 1403) were also very extensive; traces of his power are found in various parts of Ethiopia; he states on scarabæi, struck apparently to commemorate his marriage, that his northern boundary was in Mesopotamia, his southern in Kara (Choloë?). From his features, he seems to have been partly of Ethiopian origin. His long reign of nearly forty years was marked by the construction of magnificent temples. Of these, the greatest were two at Thebes; one on the west bank, of which little remains but the two great colossi that stood on each side of the approach to it, and one of which is known as the vocal Memnon. He likewise built, on the opposite bank, the great temple, now called that of El-Uksor, which Rameses II afterwards much enlarged. The tomb of this king yet remains at Thebes. For a period of about thirty years after the reign of Amenoph III, Egypt was disturbed by the rule of stranger kings, who abandoned the national religion, and introduced a pure sun-worship. It is not known from whence they came, but they were regarded by the Egyptians as usurpers, and the monuments of them are defaced or ruined by those who overthrew them. Sir G. Wilkinson supposes that Amenoph III may have belonged to their race; but, if so, we must date the commencement of their rule from the end of his reign, as then began that change of the state religion which was the great peculiarity of the foreign domination. How or when the sun-worshippers were destroyed or expelled from Egypt does not appear. Thobes, or Harem-heb, who succeeded them (B.C. cir. 1367), was probably the prince by whom they were overthrown. He was a son of Amenoph III, and continued the line of Diospolite sovereigns. The records of his reign are not important; but the sculptures at Silsili commemorate a successful expedition against the negroes. Horus was indirectly succeeded by Rameses I, with whom substantially commences the 19th dynasty, about B.C. 1324. His tomb at Thebes marks the new dynasty, by being in a different locality from that of Amenoph III, and being the first in the valley thenceforward set apart as the cemetery of the Theban kings. After a short and unimportant reign, he was succeeded by his son Sethi I, or Sethos (B.C. 1322). He is known by the magnificent hypostyle hall in the great temple of El-Karnak, which he built, and on the outside of the north wall of which are sculptured the achievements of his arms. His tomb, cruelly defaced by travellers, is the most beautiful in the Valley of the Kings, and shows that his reign must have been a long one, as the sepulchre of an Egyptian king was commenced about the time of his accession, and thus indicated the length of his reign. He conquered the *Kheta*, or Hittites, and took their stronghold Ketesh, variously held to be at or near Emesa, or near the Orontes, or Kadesh, or even Ashtaroth. His son Rameses II, who was probably for some time associated with him in the throne, became the most illustrious of the ancient kings of Egypt (B.C. cir. 1307). If he did not exceed all others in foreign conquests, he

far outshone them in the grandeur and beauty of the temples with which he adorned Egypt and Nubia. His chief campaign, as recorded on his numerous monuments, was against the *Khetu* or Hittites, and a great confederacy they had formed. He defeated their army, captured Ketesh, and forced them to conclude a treaty with him, though this last object does not seem to have been immediately attained. It is he who is generally intended by the Sesostris of classic writers. He built the temple which is erroneously called the Memnonium, but properly the Rameseum of El-Kurneh, on the western bank of the Nile, one of the most beautiful of Egyptian monuments, and a great part of that of El-Uksor, on the opposite bank, as well as additions to that of El-Karnak. Throughout Egypt and Nubia are similar memorials of the power of Rameses II, one of the most remarkable of which is the great rock-temple of Abu-Simbel, not far north of the second cataract. The temple of Ptah, at Memphis, was also adorned by this Pharaoh, and its site is chiefly marked by a very beautiful colossal statue of him, fallen on its face and partly mutilated through modern vandalism. He was succeeded by his son Menepthah, who is supposed by the advocates of the Rabbinical date of the Exodus to have been the Pharaoh in whose time the Israelites went out. The monuments tell us little of him or of his successor, which latter was followed by his son Rameses III, perhaps the head of the 20th dynasty (B.C. cir. 1200). With this sovereign the glories of the Theban line revived, and a series of great victories by land and sea raised Egypt to the place which it had held under Rameses II. He built the temple of Medinet-Habû, on the western bank at Thebes, the walls of which are covered with scenes representing his exploits. The most remarkable of the sculptures commemorating them represents a naval victory in the Mediterranean, gained by the Egyptian fleet over that of the *Tokkari*, probably the Carians, and *Shairetana* (Khairretana), or Cretans. Other *Shairetana*, whom Mr. Poole takes to correspond to the Cherethim of Scripture, served in the Egyptian forces. This king also subdued the *Pelesatu*, or Philistines, and the *Rebu* (Lebu), or Lubim, to the west of Egypt. Several kings bearing the name of Rameses succeeded Rameses II, but their tombs alone remain. Under them the power of Egypt evidently declined, and towards the close of the dynasty the country seems to have fallen into anarchy, the high-priests of Amen having usurped regal power at Thebes, and a Lower Egyptian dynasty, the 21st, arisen at Tanis. Of these, however, but few records remain.

With the succeeding dynasty occurs the first definite point of connection between the monumental and the scriptural history of Egypt. The ill feelings which the peculiar circumstances connected with the exode from Egypt had occasioned served to keep the Israelites and the Egyptians strangers, if not enemies, one to another during the lapse of centuries, till the days of David and Solomon, when (1 Kings iii, vii, ix, xi) friendly relations again spring up between the two countries. Solomon marries the daughter of Pharaoh, who burns the city of Gezer, and who, in consequence, must have been master of Lower Egypt (B.C. cir. 1010). "And Solomon had horses brought out of Egypt, and linen yarn;" six hundred shekels was the price of a chariot, and one hundred and fifty the price of a horse. Probably the Egyptian princess who became Solomon's wife was a daughter of a king of the Tanite dynasty. It was during the reign of a king of this age that "Hadad, being yet a little child," fled from the slaughter of the Edomites by David, and took refuge, together with "certain Edomites of his father's servants," at the court of Pharaoh, who "gave him to wife the sister of his own wife, the sister of Tahpenes the queen" (1 Kings xi, 17-19), B.C. cir. 1040-1000. The 22d dynasty was of Imbastite kings; the name of one of them has been found among the

sculptured remains of the temples of Bubastis; they were probably not of unmixed Egyptian origin, and may have been partly of Assyrian or Babylonian race. The first king was Sheshonk I (B.C. cir. 990), the contemporary of Solomon, and in his reign it was that "Jeroboam arose and fled into Egypt unto Shishak, king of Egypt, and was in Egypt until the death of Solomon" (1 Kings xi, 40), B.C. 973. In the 5th year of Rehoboam, B.C. 969, Sheshonk invaded Judea with an army of which it is said "the people were without number that came with him out of Egypt, the Lubims, the Sukkiims, and the Ethiopians;" and that, having taken the "fenced cities" of Judah, he "came up against Jerusalem, and took away the treasures of the house of the Lord, and the treasures of the king's house," and "the shields of gold which Solomon had made" (2 Chron. xii). "The record of this campaign," says Sir G. Wilkinson, "which still remains on the outside of the south wall of the great temple of Karnak, bears an additional interest from the name of *Yuda-Melehi* (kingdom of Judah), first discovered by Champollion in the long list of captured districts and towns put up by Sheshonk to commemorate his success." Perhaps it was by Jeroboam's advice that he thus attacked Judah. It is doubtful, however, whether Jeroboam did not suffer by the invasion as well as Rehoboam. See SHESHAK. The next king, Osorkon I, is supposed by some to have been the Zerah whom Asa defeated (2 Chron. xiv, 9); and in that view, as the army that Zerah led can only have been that of Egypt, his overthrow will explain the decline of the house of Sheshonk. According to others, Zerah was a king of Asiatic Ethiopia. See ZERAH. Of the other kings of this dynasty we know scarcely more than the names. It was followed by the 23d dynasty of Tanite kings, so called from Tanis, the Zoan of Scripture. They appear to have been of the same race as their predecessors. Bocchoris the Wise, a Saïte, celebrated as a lawgiver, was the only king of the 24th dynasty (B.C. cir. 734). He is said to have been burned alive by Sabaco the Ethiopian, the first king of the 25th or Ethiopian dynasty. Egypt therefore makes no figure in Asiatic history during the 23d and 24th dynasties; under the 25th it regained, in part at least, its ancient importance. This was a foreign line, the warlike sovereigns of which strove to the utmost to repel the onward stride of Assyria. It is not certain which of the Sabacos—Shebake, or his successor Shebateke—corresponded to the So or Seva of the Bible, who made a treaty with Hoshea, which, as it involved a refusal of his tribute to Sennacherib, caused the taking of Samaria, and the captivity of the ten tribes. See SO. The last king of this dynasty was Tirhakah, or Tehrak (B.C. 690), who, probably while yet ruling over Ethiopia or Upper Egypt only, advanced against Sennacherib to support Hezekiah, king of Judah, B.C. 713. It does not appear whether he met the Assyrian army, but it seems certain that its miraculous destruction occurred before any engagement had been fought between the rival forces. Perhaps Tirhakah availed himself of this opportunity to restore the supremacy of Egypt west of the Euphrates. See TIRHAKAH. With him the 25th dynasty closed. It was succeeded by the 26th, of Saïte or native kings. The first sovereign of importance was Psammetichus, or Psametik I (B.C. 664), who, according to Herodotus, had previously been one of a dodecarchy which had ruled Egypt. Rawlinson finds in Assyrian history traces of a dodecarchy before Psammetichus. This portion of the history is obscure. Psammetichus carried on a war in Palestine, and is said to have taken Ashdod, or Azotus, i. e., according to Wilkinson, *Shedid*, "the strong," after a siege of twenty-nine years (Herod. ii, 157; see Rawlinson in loc. ii, 204). It was probably held by an Assyrian garrison, for a Tartan, or general of the Assyrian king, had captured it apparently when garrisoned by Egyptians and Ethiopians in the

preceding century (Isa. xx). Psammetichus was succeeded by his son Neku, the Pharaoh-Necho of Scripture, B.C. 610. In his first year he advanced to Palestine, marching along the sea-coast on his way to Carchemish on the Euphrates, and was met by Josiah, king of Judah, whom he slew at Megiddo, B.C. 609. The remonstrance of the Egyptian king on this occasion is very illustrative of the policy of the Pharaohs in the East (2 Chron. xxxv, 21), no less than in his lenient conduct after the defeat and death of the king of Judah. Neku was probably successful in his enterprise, and on his return deposed Jehoahaz, the son of Josiah, and set up Jehoiakim in his stead. He apparently wished by this expedition to strike a blow at the falling power of the Assyrians, whose capital was shortly after taken by the combined forces of the Babylonians and Medes. The army, however, which was stationed on the Euphrates by Neku met with a signal disaster three years afterwards, being routed by Nebuchadnezzar at Carchemish (Jer. xli, 2). The king of Babylon seems to have followed up his success, as we are told (2 Kings xxiv, 7) that "the king of Egypt came not again any more out of his land, for the king of Babylon had taken from the river of Egypt unto the river Euphrates all that pertained to the king of Egypt." Neku either commenced a canal to connect the Nile and the Red Sea, or else attempted to clear one previously cut by Iameses II; in either case the work was not completed. See Necho. The second successor of Neku was the next sovereign of note, Rnaphrah, or Vaphrah, called Pharaoh-Hophra in the Bible, and by Herodotus Apries. He took Gaza and Sidon, and defeated the king of Tyre in a sea-fight. He also worsted the Cyrians. Having thus restored the power of Egypt, he succored Zedekiah, king of Judah, and when Jerusalem was besieged, obliged the Chaldeans to retire (Jer. xxxvii, 5, 7, 11). He was so elated by these successes that he thought "not even a god could overthrow him." In Ezek. xxix, 3, he is thought to be called "the great dragon (i. e. crocodile?) that lieth in the midst of his rivers, which hath said, My river is mine own, and I have made it for myself." At last, however, Amosis, or Ahmes II, who had been crowned in a military revolt, took him prisoner and strangled him (B.C. 569), so that the words of Jeremiah were fulfilled: "I will give Pharaoh-Hophra, king of Egypt, into the hand of his enemies, and into the hand of them that seek his life" (Jer. xli, 30). There seems little doubt that at the time of this rebellion, and probably in conjunction with the advance of Amosis, Egypt was invaded and desolated by Nebuchadnezzar. See HOPHRA. The remarkable prophecies, however, in Ezek. xxix-xxxii may refer for the most part to the invasion of Cambyses, and also to the revolt of Inarus under Artaxerxes. Amosis, the successor of Apries, reigned nearly fifty years, and, taking advantage of the weakness and fall of Babylon, he somewhat restored the weight of Egypt in the East. But the new power of Persia was to prove even more terrible to his house than Babylon had been to the house of Psammetichus. He was succeeded by his son Psammenitus, held to be the Psammetik III of the monuments, B.C. 525. Shortly after his accession this king was attacked by Cambyses, who took Pelusium, or "Sin, the strength of Egypt," and Memphis, and subsequently put Psammenitus to death.—With Cambyses (B.C. 525) began the 27th dynasty of Persians, and Egypt became a Persian province, governed by a satrap. The conduct of Darius Hystaspis (B.C. 521) to the Egyptians was favorable, and he caused the temples to be adorned with additional sculptures. The large temple in the Great Oasis was principally built by him, and in it is found his name, with the same honorary titles as the ancient kings. Before the death of Darius, however, the Egyptians rebelled, but were again subdued by Xerxes (B.C. 485), who made his brother Achæmenes governor

of the country. Under Artaxerxes Longimanus they again revolted, as above referred to, and in the 10th year of Darius Nohus contrived to throw off the Persian yoke, when Amyrtaeus the Saitte became the sole king of the 28th dynasty (B.C. 414). After having ruled six years, he was succeeded by the first king of the 29th or Mendesian dynasty. Of the four kings comprising it little is known, and the dates are uncertain. It was followed by the last, or 30th dynasty of Sebennyte kings. The first of these was Nectanebo, or Nekt-har-heb (B.C. 387), who successfully defended his country against the Persians, had leisure to adorn the temples, and was probably the last Pharaoh who erected an obelisk. His son Teos, or Tachos, was the victim of a revolt, from which he took refuge in the Persian court, where he died, while his nephew Nectanebo II, or Nekt-neb, ascended the throne as the last native king of Egypt (B.C. 361). For some time he successfully opposed the Persians, but eventually succumbed to Artaxerxes Ochus, about B.C. 343, when Egypt once more became a Persian province. "From that time till our own day," says Mr. Poole, "a period of twenty-two centuries, no native ruler has sat on the throne of Egypt, in striking fulfilment of the prophecy, 'There shall be no more a prince of the land of Egypt' (Ezek. xxx, 13)."

Egypt was governed by a Persian satrap till Persia itself was conquered by Alexander the Great, B.C. 332. When Alexander's army occupied Memphis, the numerous Greeks who had settled in Lower Egypt found themselves the ruling class. Egypt became at once a Greek kingdom, and Alexander showed his wisdom in the regulations by which he guarded the prejudices and religion of the Egyptians, who were henceforth to be treated as inferiors, and forbidden to carry arms. He founded Alexandria as the Greek capital. On his death, his lieutenant Ptolemy made himself king of Egypt, being the first of a race of monarchs who governed for 300 years, and made it the second chief kingdom in the world, till it sunk under its own luxuries and vices and the rising power of Rome. The Ptolemies founded a large public library and a museum of learned men. See ALEXANDRIA.

After the time of the exile the Egyptian Ptolemies were for a long while (from B.C. 301 to about 180) masters of Palestine, and during this period Egypt became as of old a place of refuge to the Jews, to whom many favors and privileges were conceded. This shelter seems not to have been for ages withdrawn (Matt. ii, 13). Yet it cannot be said that the Jews were held in esteem by the Egyptians (Philo, *c. Aïon*, ii, p. 521). Indeed, it was from an Egyptian, Manetho (B.C. 300), that the most defamatory misrepresentations of Jewish history were given to the world; and, in the days of Augustus, Chærenon took special pains to make the Jewish people appear despicable (Josephus, *Aïon*, i, 32; comp. Creuzer, *Com. Herod.* i, 270). See PTOLEMY.

In the reign of Ptolemy Philometor, Onias, whose father, the third high-priest of that name, had been murdered, fled into Egypt, and rose into high favor with the king and Cleopatra his queen. The high-priesthood of the Temple of Jerusalem, which belonged of right to his family, having passed from it to the family of the Maccabees, by the nomination of Jonathan to this office (B.C. 153), Onias used his influence with the court to procure the establishment of a temple and ritual in Egypt which should detach the Jews who lived there from their connection with the Temple at Jerusalem. The king complied with the request. To reconcile the Egyptian Jews to a second temple, Onias alleged Isa. xix, 18, 19. He chose for the purpose a ruined temple of Bubastis, at Leontopolis, in the Heliopolitan nome, one hundred and fifty stadia from Memphis, which place he converted into a sort of miniature Jerusalem (Josephus, *War*, i, 1), erecting an altar in imitation of that in the Temple, and

constituting himself high-priest. The king granted a tract of land around the temple for the maintenance of the worship, and it remained in existence till destroyed by Vespasian (Josephus, *Ant.* xiii, 3; xx, 9; *War.* vii, 11). The district in which this temple stood appears to have been, after Alexandria, the chief seat of the Jews in Egypt, and which, from the name of its founder, was called *Ὀρίων χώρα* (Josephus, *Ant.* xiv, 8; *Helen's Pilgrim.* p. 328). See ONIAS, CITY OF.

Under these Alexandrian kings the native Egyptians still continued building their grand and massive temples, nearly in the style of those built by the kings of Thebes and Saïs. The temples in the island of Philæ, in the Great Oasis, at Latopolis, at Ombos, at Dendera, and at Thebes, prove that the Ptolemies had not wholly crushed the zeal and energy of the Egyptians. An Egyptian phalanx had been formed, armed and disciplined like the Greeks. These soldiers rebelled unsuccessfully against Epiphanes, and then Thebes rebelled against Soter II, but was so crushed that it never again held rank among cities. But while the Alexandrians were keeping down the Egyptians, they were themselves sinking under the Romans. Epiphanes asked for Roman help; his two sons appealed to the senate to settle their quarrels and guard the kingdom from Syrian invasion. Alexander II was placed on the throne by the Romans, and Anletes went to Rome to ask for help against his subjects. Lastly, the beautiful Cleopatra, the disgrace of her country and the firebrand of the republic, maintained her power by surrendering her person, first to Julius Cæsar, and then to Mark Antony. On the defeat of Mark Antony by Augustus, B.C. 30, Egypt became a province of Rome, and was governed by the emperors with jealous suspicion. It was still a Greek state, and Alexandria was the chief seat of Greek learning and science. Its library, which had been burned by Cæsar's soldiers, had been replaced by that from Pergamus. The Egyptians yet continued building temples and covering them with hieroglyphics as of old; but on the spread of Christianity the old superstitions lost their sway, the animals were no longer worshipped, and we find few hieroglyphical inscriptions after the reign of Commodus. On the division of the Roman empire, A.D. 337, Egypt fell to the lot of Constantinople. See Smith's *Dict. of Class. Geogr.* s. v. *Ægyptus*.

Ever since its first occupancy by the Romans Egypt has ceased to be an independent state, and its history is incorporated with that of its different conquerors and possessors. In A.D. 618 it fell under the power of the Persians, but in 640 it was transferred to the Saracens by the victorious Amru, general of the caliph Omar, under whose successors it continued till about 1171, when the Turcomans expelled the caliphs; these again were in their turn expelled in 1250 by the Mamelukes. The latter raised to the throne one of their own chiefs with the title of sultan, and this new dynasty reigned over Egypt till 1517, when the Mamelukes were totally defeated, and the last of their sultans put to death by the Turkish sultan Selim. This prince established the government of Egypt in twenty-four beys, whose authority he subjected to a council of regency, supported by an immense standing army. The conqueror did not, however, entirely suppress the Mameluke government, who continued to be "the power behind the throne" until their massacre in 1811, which made the pacha virtually independent of the Sublime Porte. Great and rapid changes have taken place in this interesting country within the last fifty years. The campaign of the French army in 1800, undertaken with a view to subdue Egypt, and so secure to the French an important share of the East India trade, though it resulted unsuccessfully, was attended with important consequences to the interests of science and learning. Mohammed Ali, the late viceroi, though a perfect despot, did much to elevate

his dominions to a rank with civilized nations in arts, commerce, and industry. The works of internal improvement which he undertook, the extensive manufactories he established, and the encouragement he gave to literary institutions, have done much to change the political, if not the moral aspect of Egypt. His successors have carried out his enlightened views by establishing railroads and opening out canals, which, while they increase the commerce of the country, greatly facilitate communication with India by what is called the overland route—by the Mediterranean, Egypt, and the Red Sea, to Bombay. See M'Culloch's *Gazetteer*, s. v.

For the history of Christianity in Egypt, see EGYPT, CHRISTIAN.

XXII. *Monumental Localities.*—Of the towns on the northern coast the most western is Alexandria or El-Iskenderiyeh, founded B.C. 332 by Alexander the Great, who gave it the form of a Macedonian chlamys or mantle. Proceeding eastward, the first place of importance is Er-Rashid, or Rosetta, on the west bank of the branch of the Nile named after this town. In ascending the Rosetta branch the first spot of interest is the site of the ancient Saïs, on the eastern bank, marked by lofty mounds and the remains of massive walls of crude brick. It was one of the oldest cities of Egypt, and gave its name to the kings of the 26th dynasty. The goddess Neith, supposed to be the origin of Athene, was the local divinity, and in her honor an annual festival was held at Saïs, to which pilgrims resorted from all parts of Egypt. On the eastern side of the other branch of the Nile, to which it gives its name, stands the town Dimyât, or Damietta, a strong place in the time of the Crusades, and then regarded as the key of Egypt. It has now about 28,000 inhabitants. To the eastward of Damietta is the site of Pelusium, the Sin of Scripture, and the ancient key of Egypt, towards Palestine. No important remains have been found here. Between this site and the Damietta branch are the mounds of Tanis, or Zoan, the famous Avaris of the Shepherds, with considerable remains of the great temple, of which the most remarkable are several fallen obelisks, some of them broken. This temple was as ancient as the time of the 12th dynasty, and was beautified by Rameses II. Tanis was on the eastern bank of the Tanitic branch of the Nile, now called the canal of El-Moïz. A little south of the modern point of the Delta, on the eastern bank of the river, is the site of the ancient Heliopolis, or On, marked by a solitary obelisk, and the ruins of a massive brick wall. The obelisk bears the name of Osirtasen I, the head of the 12th dynasty. At a short distance south of Heliopolis stands the modern capital, Cairo, or El-Kâhîreh. The ancient city of Memphis, founded by Menes, stood on the western bank of the Nile, about ten miles above Cairo. The kings and people who dwelt there chose the nearest part of the desert as their burial-place, and built tombs on its rocky edge or excavated them in its sides. The kings raised pyramids, round which their subjects were buried in smaller sepulchres. The site of Memphis is marked by mounds in the cultivated tract. A few blocks of stone and a fine colossus of Rameses II are all that remains of the great temple of Ptah, the local deity. See MEMPHIS.

There is not space here for a detailed account of the pyramids; suffice it to say that the present perpendicular height of the great pyramid is 450 ft. 9 in., and its present base 746 ft. It is about 30 ft. lower than it was originally, much of the exterior having been worn off by age and man's violence. Like all the other pyramids, it faces the cardinal points. The surface presents a series of great steps, though when first built it was eased, and smooth, and polished. The platform on the summit is about 32 ft. square. The pyramid is almost entirely solid, containing only a few chambers, so small as not to be worthy of consideration in calcu-

lating its contents. It was built by Khufa (Cheops), or Shufu (Suphis). The second pyramid stands at a short distance south-west of the great pyramid, and is not of much smaller dimensions. It is chiefly remarkable for a great part of its casing having been preserved. It was built by Khafra or Shafra (Chephren), a king of the same period. The third pyramid is much smaller than either of the other two, though it is constructed in a more costly manner. It was built by Mycerinus or Mencheres, the fourth ruler of the 4th dynasty. Near the three pyramids are six smaller ones; three of them are near the east side of the great pyramid, and three on the south side of the third pyramid. They are supposed to be the tombs of near relatives of the kings who founded the great pyramid. To the east of the second pyramid is the great sphinx, 188 feet in length, hewn out of a natural eminence in the solid rock, some defects of which are supplied by a partial stone casing, the legs being likewise added. See PYRAMIDS.

In the tract between the pyramids of Sakkárah and Abú-Sir are the remains of the Serapeum, and the burial-place of the bulls Apis, both discovered by M. Mariette. They are inclosed by a great wall, having been connected, for the Serapeum was the temple of Apis. The tomb is a great subterranean gallery, whence smaller passages branch off, and contains many sarcophagi in which the bulls were entombed. Serapis was a form of Osiris, his name being Osir-hapi, or Osiris Apis. In ascending the river we arrive at the ancient Abnás, supposed by some to be the Hanes of Isaiah, and about sixty miles above Cairo, at Beni-Suweif, the port of the province of the Feyum. In this province are supposed to be the remains of the famous Labyrinth of Mæris, probably Amen-em-ha III, and not far off, also, may be traced the site of the Lake Mæris, near the ancient Arsinoë, or Crocodilopolis, now represented by Medinet el-Feyúm. The next objects of peculiar interest are the grottoes of Beni-Hassan, which are monuments of the 12th dynasty, dating about B.C. 2000. Here are found two columns of an order which is believed to be the prototype of the Doric. On the walls of the tombs are depicted scenes of hunting, fishing, agriculture, etc. There is also an interesting representation of the arrival of certain foreigners, supposed to be Joseph's brethren—at least illustrative of their arrival. In the town of Asyút, higher up the river, is seen the representative of the ancient Lycopolis. It was an important place 3500 years ago, and has thus outlived Thebes and Memphis, Tanis and Pelusium.

Further on, a few miles south-west of Girga, on the border of the Libyan desert, is the site of the sacred city of Abydos, a reputed burial-place of Osiris, near which, also, must have been situated the very ancient city of This, which gave its name to the 1st and 2d dynasties. About forty miles from Abydos, though nearly in the same latitude, is the village of Denderah, famous for the remains of the temple of Athor, the Egyptian Venus, who presided over the town of Teutyra, the capital of the Teutyrite nome. This temple dates from the time of the earlier Cæsars, and the names of the last Cleopatra, and Cæsarion her son, are found in it. See DENDERAH.

About twenty miles still higher up the Nile than Denderah, and on the western bank, are the ruins of Thebes, the No-Amón of the Bible. In the hieroglyphic inscriptions the name of this place is written AP-T, or with the article prefixed T-AP, and AMEN-HA, the abode of Amen. The Copts write the former name *Tape*, which becomes in the Memphitic dialect *Thaba*, and thus explains the origin of the Greek *Θήβαι*. The time of its foundation is unknown, but remains have been found which are ascribed to the close of the 11th dynasty, and it probably dates from the commencement of that first Diospolite line of kings. Under the 18th and two following dynasties it attained its highest prosperity, and to this period its greatest monuments belong. The following is a description of this celebrated locality by Mr. Poole: "The monuments of Thebes, exclusive of its sepulchral grottoes, occupy a space on both sides of the river, of which the extreme length from north to south is about two miles, and the extreme breadth from east to west about four. The city was on the eastern bank, where is the great temple, or, rather, collection of temples, called after El-Karnak, a modern village near by. The temple of El-Karnak is about half a mile from the river, in a cultivated tract. More than a mile to the south-west is the temple of El-Uksur, on the bank of the Nile. On the western bank was the suburb bearing the name Memmonia. The desert near the northernmost of the temples on this side almost reaches the river, but soon recedes, leaving a fertile plain generally more than a mile in breadth. Along the edge of the desert, besides the small temple just mentioned as the northernmost, are the Rameseum of El-Kurneh, and that of Medinet-Habú less than a mile farther to the south-west, and between them, but within the cultivated land, the remains of the Amenophium, with its two gigantic seated colossi. Behind these

Restoration of the Propylon, or Gate of the Temple of El-Uksur, or Luxor.

edifices rises the mountain, which here attains a height of about 1200 feet. It gradually recedes in a south-westerly direction, and is separated from the cultivated tract by a strip of desert in which are numerous tombs, partly excavated in two isolated hills, and two small temples. A tortuous valley, which commences not far from the northernmost of the temples on this bank, leads to those valleys in which are excavated the wonderful tombs of the kings, near the highest part of the mountain, which towers above them in bold and picturesque forms" (*Encyclop. Britannica*, art. Egypt, p. 506). At the entrance to the temple of El-Uksur stood two very fine obelisks of red granite, one of which is now in the centre of the Place de la Concorde, at Paris. There is also a portal with wings 200 feet in width, covered with sculptures of the highest interest, illustrating the time of Rameses II. Within is a magnificent avenue of 14 columns, having capitals of the bell-shaped flowers of the papyrus. They are 60 feet high, and elegantly sculptured. These are of the time of Amenoph III.—On a south portal of the great temple of El-Karnak is a list of countries subdued by Sheshonk I, or Shishak, the head of the 22d dynasty. Among the names is that of the kingdom of Judah, as before mentioned. The great hypostyle hall in this temple is the most magnificent work of this class in Egypt. Its length is 170 feet, its width 529; it is supported by 134 columns, the loftiest of which are nearly 70 feet in height and about 12 in diameter, and the rest more than 40 feet in height and about 9 in diameter. The great columns, 12 in number, form an avenue through the midst of the court from the entrance, and the others are arranged in rows very near together on each side. There is a transverse avenue made by two rows of the smaller columns being placed further apart than the rest. This great hall is therefore crowded with columns, and the effect is surpassingly grand. The forest of pillars seems interminable in whatever direction one looks, producing a result unequalled in any other Egyptian temple. This great hall was the work of Sethi I, the head of the 19th dynasty, who came to the throne B.C. cir. 1340, and it was sculptured partly in his reign and partly in that of his son and successor Rameses II.—The Rameseum remains to be briefly noticed. This temple on the edge of the desert is perhaps the most beautiful ruin in Egypt, as Karnak is the grandest. It also records the glories of Rameses II, of whom there is in one of its courts a colossal statue hewn out of a single block of red granite, supposed to weigh nearly 500 tons, and transported thither from the quarries of Syene. This temple is also noted for containing the celebrated astronomical ceiling, one of the most precious records of ancient Egyptian science. Not the least interesting among the monuments of Thebes are the tombs of the kings. The sepulchres are 20 or 21 in number. Nineteen are sculptured, and are the mausolea of kings, of a queen with her consort, and of a prince, all of the 18th, 19th, and 20th dynasties. The paintings and sculptures are almost wholly of a religious character, referring chiefly to a future state. Standing on the resting-places of kings and warriors who figured in the history of Egypt while the world was yet young, and long before the age of others whom we are accustomed to consider heroes of antiquity, it seems as though death itself were immortalized; and proudly indeed may those ancient Pharaohs, who labored so earnestly to preserve their memory on earth, look down upon the paltry efforts of later aspirants, and their slender claims to be regarded as either ancient or immortal. See THEBES.

About twenty miles further south of the site of Thebes is the village of Edfu, representing the town called by the Greeks Apollinopolis Magna, where is still found in a comparatively perfect state a temple of the Ptolemaic period. See TEMPLE. Above Edfu, at Jebel es-Silsileh, the mountains on either side, which have for some time confined the valley to a

narrow space, reach the river, and contract its course; and higher still, about thirty miles, is the town of Assuan, which represents the ancient Syene, and stands among the palm-trees on the eastern bank, opposite to the island of Elephantine. The bed of the river above this place is obstructed by numerous rocks and islands of granite, which form the rapids called the first cataract. During the inundation boats are enabled by a strong northerly wind to pass this cataract without aid, and, in fact, at other times the principal rapid has only a fall of five or six feet, and that not perpendicular. The roaring of the troubled stream, and the red granite islands and rocks which stud its surface, give the approach a wild picturesqueness till we reach the open stream, less than two miles further, and the beautiful island of Philæ suddenly rises before our eyes, completely realizing one's highest idea of a sacred place of ancient Egypt. It is very small, only a quarter of a mile long and 500 feet broad, and contains monuments of the time of the Ptolemies. In the desert west of the Nile are situate the great and little *wahs* (oases), and the valley of the Natron lakes, containing four Coptic monasteries, the remains of the famous anchorite settlement of Nitria, recently noted for the discovery of various Syrian MSS. In the eastern desert the chief town of importance is Es-Suveis, or Suez, the ancient Arsinoë, which gives its name to the western gulf of the Red Sea.

XXIII. *Prophecies*.—It would not be within the province of this article to enter upon a general consideration of the prophecies relating to Egypt; we must, however, draw the reader's attention to their remarkable fulfilment. The visitor to the country needs not to be reminded of them; everywhere he is struck by the precision with which they have come to pass. We have already spoken of the physical changes which have verified to the letter the words of Isaiah. In like manner we recognise, for instance, in the singular disappearance of the city of Memphis and its temples in a country where several primeval towns yet stand, and scarce any ancient site is unmarked by temples, the fulfilment of the words of Jeremiah: "Noph shall be waste and desolate without an inhabitant" (xvi, 19), and those of Ezekiel, "Thus saith the Lord God, I will also destroy the idols, and I will cause [their] images to cease out of Noph" (xxx, 13).

The principal passages relating to Egypt are as follows: Isa. xix; Jer. xliii, 8-13; xlv, 30; xlv, 1; Ezek. xxix-xxxii, inclusive. In the course of what has been said, several allusions have been made to portions of these prophecies; and it may here be observed that the main reference in them seems to be to the period extending from the times of Nebuchadnezzar to those of the Persians, though it is not easy to elucidate them to any great extent from the history furnished by the monuments. Nebuchadnezzar appears to have invaded Egypt during the reign of Apries, and Sir G. Wilkinson thinks that the story of Amasis's rebellion was invented or used to conceal the fact that Pharaoh-Hophra was deposed by the Babylonians. It is not improbable that Amasis came to the throne by their intervention. The forty years' desolation of Egypt (Ezek. xxix, 10) is a point of great difficulty, owing chiefly to the statements of Herodotus (ii, 161, 177) as to the unexampled prosperity of the reigns of Apries and Amasis (B.C. 588-25), during which the period in question must have fallen. That the Greek historian was misled by the accounts of the Egyptian priests, who wished to conceal the extent of the national humiliation by Nebuchadnezzar and Cambyses, is made evident by Browne (*Ordo Saculorum*, p. 191 sq.), who thus arranges the events: "Soon after B.C. 572, Nebuchadnezzar invades Egypt, conquers Apries, and puts him to death, and carries off the spoil of Egypt, together with its chief men, to some other part of his dominions: Amasis is appointed his viceroy. Cyrus,

about B. C. 532, 'turns the captivity of Egypt,' as he had before done that of the Jews. On his death Amasis revolts, and Cambyses invades and fully subjugates all Egypt, B. C. 525." See EZEKIEL.

XXIV. *Literature.*—For a very full classified list of works on Egypt, see Jolowicz's *Bibliotheca Aegyptiaca* (Lpz. 1858, 8vo), with the *Supplement* thereto (ib. 1861). The following are the most useful, excepting such as relate to the modern history. On Egypt generally: *Description de l'Égypte* (2d ed. Par. 1821-9); *Encyclopædia Britannica* (8th edit. art. Egypt). Description, Productions, and Topography: Abd-Allatif, *Relation de l'Égypte* (ed. Silvestre de Saey, Par. 1810); D'Anville, *Mémoires sur l'Égypte* (Par. 1766); Belzoni, *Narrative of Operations* (London, 1820); Brugsch, *Geographische Inschriften d. alt-ägyptischen Denkmäler* (Lpz. 1857); Id. *Reiseberichte aus Ägypten* (ib. 1855); Champollion le Jeune, *L'Égypte sous les Pharaons* (Par. 1814); Id. *Lettres écrites pendant son Voyage en Égypte* (2d edit. Par. 1833); Ehrenberg and Hemprich, *Naturgeschichtliche Reisen—Reisen in Ägypten*, etc. (Lpz. 1828); *Symbolæ Physicæ* (ib. 1829-1845); Forskäl, *Descriptiones animalium*, etc. (Hafn. 1775-6); Id. *Flora Aegyptiaco-arabica* (ib. 1775); Harris, *Hieroglyphical Standards* (London, 1852); Linant de Bellefonds, *Mémoire sur le lac de Mœris* (Paris, 1843); Quatremère, *Mémoires Géographiques et Historiques* (Paris, 1811); Russegger, *Reisen* (Lpz. 1811-8); Vyse and Perring, *Pyramids of Gizeh* (Lond. 1839-42); Perring, *58 Large Views, etc., of the Pyramids of Gizeh* (Lond. 1841); Wilkinson, *Modern Egypt and Thebes* (Lond. 1843); Id. *Hand-book for Egypt* (2d edit. Lond. 1858); Id. *Survey of Thebes* (plan); Id. on the *Eastern Desert* (in the *Jour. Geogr. Soc.* ii, 1832, p. 28 sq.); Hartmann, *Naturgesch. der Niländer* (Lpz. 1865); Kremer, *Ägypten* (modern, Lpz. 1863); Parthey, *Erk. des alten Ägyptens* (ib. 1859); Petherick, *Ägypt*, etc. (Lond. 1861). Monuments and Inscriptions: Champollion le Jeune, *Monuments* (Paris, 1829-47); Id. *Notices descriptives* (ib. 1844); Gliddon, *Lectures* (N. Y. 1843); Lepsius, *Denkmäler* (Lpz. 1849 sq.); Letronne, *Recueil des inscriptions grecques et latines d'Égypte* (Par. 1842); Rosellini, *Monumenti* (Pisa, 1832-44); Dümichen, *Altägypt. Inschriften* (in three series, Lpz. 1865-8); Brugsch, *Recueil de Monuments Égyptiens* (Par. 1862-63); Leemans, *Monuments Égyptiens* (ib. 1866); Rhind, *Thebes*, etc. (Lond. 1862). Language: Brugsch, *Grammaire Dénotique* (Berl. 1855); Id. *Hierog.-Dénot. Wörterb.* (Berl. 1867); Id. *Zwei bilingue Papyri* (ib. 1865); Birch, *Dictionary of Hieroglyphics* (in *Bunsen*, vol. v); Champollion le Jeune, *Grammaire Égyptienne* (Paris, 1836-41); *Dictionnaire Égyptien* (ib. 1841); *Encyclop. Brit.* (8th edit. art. Hieroglyphics); Parthey, *Vocabularium Coptico-Latinum*, etc. (Berl. 1844); Peyron, *Grammatica Linguae Coptice* (Turin, 1841); Id. *Lexicon* (ib. 1835); Schwartze, *Dis. Alte Aegypten* (Lpz. 1843). Ancient Chronology, History, and Manners: Bunsen, *Egypt's Place* (London, 1850-59); Cory, *Ancient Fragments* (2d edit. Lond. 1832); Herodotus (ed. Rawlinson, vols. i-iii, Lond. and N. Y. 1861); Hengstenberg, *Egypt and the Books of Moses* (Lond. 1843); Ideler, *Handbuch der Chronologie* (Lpz. 1825); Lepsius, *Chronologie der Aegypter* (vol. i, Lpz. 1849); Id. *Königsbuch der alten Aegypter* (ib. 1858); Poole, *Horæ Aegyptiacæ* (Lond. 1851); Wilkinson, *Manners and Customs of the Ancient Egyptians* (ib. 1837, 1841); Id. *Popular Account of the Ancient Egyptians* (Lond. and N. Y. 1855); Kenrick, *Egypt under the Pharaohs* (Lond. and N. Y. 1852); Osburn, *Monumental History* (Lond. 1854); Sharpe, *Hist. of Egypt* (Lond. 1846); Brugsch, *Histoire de l'Égypte* (Paris, 1859 sq.); Hincks, *Years of the Egyptians* (Lond. 1865); Lauth, *Der Dynast. Manetho's* (Leipzig, 1865); Unger, *Chronologie des Memten* (Berlin, 1867). Ancient Religion: Herodotus; Diodorus of Sicily; Plutarch; Porphyry; Iamblichus, etc.; Jablonski, *Pantheon aegypt.* (Frankf. 1750-52, 3 vols.); Schmidt, *De sacerdot. et sacrificiis Aegyptiorum* (Tüb. 1786); Hirt, *U. d. Bildung d. ägyptischen Gottheiten* (1821); Cham-

pollion, *Pantheon ägyptien* (Paris, 1832); Haymann, *Darstellung d. A.-u. M.* (Bonn, 1837); Röth, *Die äg. u. Zoroastrische Glaubenslehre* (Maih. 1846); Beauregard, *Les divinités Égyptiennes* (Paris, 1866); Sharpe, *Egyptian Mythology* (Lond. 1863); Lepsius, *D. Tottenbuch* (Lpz. 1867); Rougé, *Rituel des Égyptiens* (Paris, 1866); Birch, *The Funeral Ritual* (in Bunsen, vol. v); Pleyte, *La Religion des Pré-Israélites* (Par. 1862). Modern Inhabitants: Lane, *Modern Egyptians* (3d ed. 1860); Id. *Thousand and One Nights* (2d edit., by Poole, Lond. 1859); Mrs. Poole, *Englishwoman in Egypt* (Lond. and N. Y. 1844). The periodicals of Great Britain, France, and Germany contain many valuable papers on Egyptian history and antiquities, by Dr. Hincks, Mr. Birch, M. de Rougé, and others. There is a monthly *Zeitschrift*, devoted exclusively to Egyptological science and information, edited by Lepsius, with the aid of M. Brugsch, published at Berlin.

EGYPT, BROOK OR RIVER OF. This is frequently mentioned as the southern limit of the Land of Promise (Gen. xv, 18; 2 Chron. vii, 8; Num. xxiv, 5; Josh. xv, 4). See BROOK. Calmet is of opinion that this was the Nile, remarking that Joshua (xiii, 3) describes it by the name of Sihor, which is the true name of the Nile (Jer. ii, 18), "the muddy river;" and that Amos (vi, 14) calls it the river of the wilderness, because the eastern arm of the Nile adjoined Arabia, or the wilderness, in Hebrew *Arabah*, and watered the district by the Egyptians called Arabian. In answer to this, it is said that this stream was the limit of Judæa toward Egypt, and that the Sept. (Isa. xxvii, 12), "unto the river of Egypt," render "to *Rhinocorura*," an interpretation which is adopted by Cellarius, Bochart, Wells, and others, although that is the name of a town certainly not adjacent to the Nile. See NILE. Besides, it is extremely dubious whether the power of the Hebrew nation extended at any time to the Nile, and, if it did, it was over a mere sandy desert. But, as this desert is unquestionably the natural boundary of the Syrian dominions, no reason can be given why the political boundary should exceed it. Most geographers, therefore, understand by "the River of Egypt" the modern *Wady el-Arish*, which drains the middle of the Sinaitic desert; a few, however, take it to be the *brook Desor*, between Gaza and Rhinocorura. (See Josh. xv, 47.) See EGYPT.

EGYPT, CHRISTIAN.—1. *Church History.* The first seeds of Christianity were undoubtedly scattered in Egypt at the time of the apostles. According to some ancient historians, Peter founded the Church of Alexandria and several other Egyptian churches. Mark the Evangelist is said by an old tradition, preserved by Eusebius (*Eccles. Hist.* ii, 16), to have been "the first that was sent to Egypt, and first established churches at the city of Alexandria." See ALEXANDRIA. The testimony of Eusebius, that the first Christians of Egypt followed a rigidly ascetic school, is very doubtful, because Philo, to whom he refers, does not speak of Christians, but of a Jewish sect, the Therapeutæ, and expressly mentions that they lived, not in Alexandria, but on Lake Mœris. From Lower Egypt Christianity soon spread to Cyrene, Pentapolis, Libya, Central and Upper Egypt. There were at least twenty bishoprics in Egypt about the middle of the third century, for that number of bishops were assembled at a council in 235. Five councils of Egyptian bishops were held before 311; a great many in the fourth and following centuries. As Egypt had been in the times before Christ the seat of philosophy and mysticism, so it now became one of the chief seats of Christian literature. The Alexandrian school was the oldest of the higher class of institutions for Christian education. Jerome and others hold Mark the Evangelist to have been its founder, but the succession of catechists is differently stated. See ALEXANDRIAN SCHOOL. Among the scientific men whom it gave to

the Church were *Clement, Athanasius, Origen, Cyril*. Gnosticism found numerous adherents. Basilides, Valentinus, Hieracon, Ptolemæus, Carpocrates, were Egyptians. The Ophites and Doketism sprang up there; Sabellianism and Arianism were also products of Egypt. The influence of Egypt in the history of Monachism is equally marked; Pachomius, Anthony, and many other celebrated hermits, greatly contributed to the spreading of Monachism in the Christian Church. Monachism (q. v.), in fact, cannot be fully understood without a due appreciation of the Egyptian element. In the history of the constitution of the Christian Church Egypt has also had a considerable influence. In no other country of the East were hierarchical tendencies so early developed, for the patriarch of Alexandria soon sought to obtain privileges which no other of the superior bishops enjoyed. The Monophysites, who subsequently received the name of Copts, became in Egypt the predominant Church, and gradually wrested nearly all the churches from the orthodox Christians, who, as early as the end of the sixth century, were reduced to a very insignificant number. The patriarchal seat at Alexandria was occupied almost exclusively by Monophysite (Jacobite) patriarchs, with the exception of Cosmas (elected about 726) and Eutyclus (elected in 934). The orthodox (Greek) Christians received from their opponents the nickname Melchites (q. v.). In 615 Egypt was invaded by Chosroes, king of Persia, when few bishoprics were spared. The dominion of the Persians lasted only a few years, when the whole country, with the capital city of Alexandria, passed into the power of the Mohammedans in 635 (according to others in 640). Under them Christianity suffered incalculable injuries, and gradually declined so as to become a despised and oppressed sect. See *Copts*. Better prospects for Christianity did not open till the beginning of the 19th century, when Egypt, under the reign of the enlightened Mehemet Ali, was brought under the influence of European civilization. Since then the educated Egyptians have learned to appreciate the superiority of European nations, especially of England and France; many young men of talent have been sent to European schools; the native Christian population begins to rise from its degradation and despised condition; the large cities, especially Alexandria and Cairo, are filling up with an intelligent and influential population of foreign-born Christians; Christian schools, and other religious and charitable institutions, are multiplying; and the signs of the times seem to indicate that the prospects of Christianity are at present very bright.

An attempt to establish a Protestant mission in Egypt was made by the Moravians in 1769. A missionary, Hoeker, who previously had sought to open communication with the Abyssinian Church, but had been compelled to return to Europe in 1761, was in 1768 commissioned, together with a young man named Danke, a carpenter by trade, to return to Egypt, and await any opening that might present itself to penetrate into Abyssinia. "On March 5, 1769, they reached Cairo, Hoeker earning a livelihood by practising as a physician and Danke by working at his trade. The latter soon learned to converse tolerably in Arabic, and when an assistant arrived for Hoeker in the person of John Antes, a watchmaker, he set out on his first journey to the Copts, landing at Gizeh, in Upper Egypt. The state of the country at this time was exceedingly disturbed, the Mameluke beys having revolted against the Turkish government, and many of them being also at war with one another. Hoeker had been summoned to attend members of the household of Ali Bey (for a time the first chief in Egypt), and Danke's connection with the 'English physician,' as Hoeker was called, brought him into favor with the officers and soldiers at Gizeh, who treated him with the greatest kindness. He met a number of Copts in

this city, with whom he formed a very intimate friendship. At first several of them invited him to visit their native city, Behnesse, the population of which was exclusively Coptic, but afterwards they endeavored to deter him by describing the danger to which he would expose himself. Danke, however, refused to listen to them, and, after bidding the Copts at Gizeh farewell, he set out Sept. 13th. Danke made in all three visits to the Copts at Behnesse. His labors were by many eagerly accepted, by others they were viewed with suspicion or openly opposed. His testimony for Jesus was not without encouraging effect, and many of the priests even became his firm supporters, and begged him to remain amongst them. On his third visit he caught a severe cold, upon which followed an attack of malignant fever. Notwithstanding the most careful nursing on the part of the other brethren, the disease increased upon him, and on Oct. 6th, 1772, he died, aged only 38 years. By permission of the Greek patriarch, his body was interred in a vault of St. George's church, in the Old City of Cairo. In May, 1775, George Winiger arrived as Danke's successor. He proceeded to Behnesse, and labored faithfully in preaching the Gospel and instructing the people privately. Michael Baschara (the magistrate referred to above) remained faithful to his profession, and was an active and influential assistant. In 1780, three other brethren were sent from Herrnhut to reinforce the mission, but it had become evident before their arrival that in the present state of the country it would be impossible to continue the work amongst the Copts, and that an effort to penetrate into Alysinnia would be useless. The brethren remained at their post until the Synod of 1782 resolved to discontinue the mission. Hoeker, who had labored for its establishment ever since the year 1762, died at Cairo in August, 1781" (*Moravian* [newspaper], May 7, 1868).

In 1826, the "Church Missionary Society" of London sent out some German missionaries to labor among the Copts. After spending some time in studying the Arabic language, and distributing the Bible and religious tracts, the missionaries fixed the location of the mission at Cairo, where they had two schools, attended by Greek, Coptic, Armenian, Roman Catholic, and even pure Mohammedan children. In 1833 a boarding-school was commenced, designed for training teachers and catechists. In 1834 a chapel was constructed by subscriptions obtained on the spot. In 1835 the mission was interrupted by a terrible visitation of the plague. In 1840 it was reported by the missionaries that in the different quarters of the town no less than six religious meetings had been established by the native Copts for the purpose of reading the Scriptures; that the patriarch had sanctioned both these meetings and a plan for the establishment of an institution in Egypt for the education of the Coptic clergy. In 1841, a pupil of the missionary school of Cairo was appointed by the patriarch Abuna, or head of the Abyssinian Church. Bishop Gobat, who visited Egypt in 1849, expressed in a letter dated Jan. 9, 1850, the opinion that the plan on which this mission had been established, to seek the friendship of the higher clergy of the Eastern churches, and to induce them to reform their churches, had failed. The mission was subsequently abandoned.

A mission established by the American Missionary Association has also been again abandoned. The most successful of any of the Protestant missions has been that undertaken by the United Presbyterian Church. It organized a number of congregations and schools, and, through the liberality of the Maharajah Dhuleep Singh, who married a pupil of the mission school, it obtained a press, through which a large amount of useful reading has been scattered throughout the land. The growth of the Church was sufficiently encouraging to organize the churches into the Presbytery of Egypt, in connection with the General As-

sembly of the Church in the United States. A flourishing theological school has been established at Osioot, for which the Rev. Mr. Hogg, in 1866, raised in Great Britain about \$2500. In 1867 the patriarch of the Coptic Church manifested the fiercest hostility to the mission; and obtaining, it is believed, at least the tacit consent and authority of the civil government, he instituted proceedings that at one time threatened the mission churches with great disaster. Finally, however, the Egyptian government, chiefly in consequence of the remonstrances of the English and American consuls, stopped the persecution. The last annual report on this mission, made to the General Assembly of the United Presbyterian Church in May, 1868, states that in nearly all the churches gratifying accessions have been made to the membership during the past year, and that during the persecution only four shrunk back, all of whom subsequently returned. The Presbytery have taken the proper steps for each native church to have a native pastor duly called, ordained, and installed. The churches of Ghous and Cairo already have called native pastors, and taken steps for providing the necessary salaries. The Presbytery of Egypt, in 1867, also adopted strong resolutions against the slave-trade, which is still carried on in Egypt with the connivance of the government.

2. *Statistics.*—The large majority of the inhabitants are Mohammedans. The theological school connected with the mosque of Cairo is one of the most frequented schools of the Islam. All the elementary schools and higher institutions for the Mohammedan population are of a strictly religious character. Mehemet Ali established several schools after the European model, in which young Egyptians were to be educated, partly by European teachers, for civil and military offices. Such schools were the medical school at Abu-Zabel, the cadet school at Gizeh, the marine school at Alexandria, the school of engineers at Chanka, the medical college of Casr-el-Ayin, the artillery school of Turrah, and the musical institute in the Citadel of Cairo. A special college for young Egyptians was also established in Paris. Several of these schools were, however, suppressed under the reign of Abbas Pasha. The most numerous body of Christians are the Copts, who have a patriarch, four metropolitans, and seven other bishops, and a population estimated from 150,000 to 250,000 souls. See COPTS. The number of United Copts, who recognise the authority of the Pope, is about 10,000. They have a vicar apostolic at Cairo. For the Latin Roman Catholics there is another vicar apostolic at Alexandria, who is at the same time delegate for the United Orientals of other rites than the Coptic. According to letters of Roman Catholic missionaries, Alexandria had, in 1853, 7020 Latins, 600 United Copts, 240 Maronites, 350 Melchites (United Greeks), 50 Syrians, 60 Armenians—together 8320. The Roman Catholic population of Cairo at the same time consisted of 4148 Latins, 200 Melchites, 800 Copts, 300 Maronites, 300 Armenians, 200 Syrians, 100 Chaldees. Since then the Roman Catholic population of these two cities has undoubtedly largely increased in consequence of the rapid growth of the total population of the two cities; but no later trustworthy statistics are known. There are Franciscan monasteries at Alexandria, Danielta, Cairo, and two in Upper Egypt. The orthodox Greek Church has in Egypt a population of about 8000 souls. They are under the patriarch of Alexandria, who resides at Alexandria or Cairo, and whose official title is "The most Blessed and Holy Patriarch of the great City of Alexandria, and of all Egypt, Pentapolis, Libya, and Ethiopia, Pope, and Œcumenical Judge." Four metropolitan sees belong to the Greek patriarchate of Alexandria, viz.: 1, Libya; 2, Memphis; 3, Pelusium; 4, Metelis; but the last three appear to have been vacant for some time.

The mission of the American United Presbyte-

rian Church reported at the General Assembly for 1868 the following statistics: missionaries, 12, including one medical missionary; congregations, 5; organized out-stations, 9; communicants, 125. The mission occupies five central stations: Alexandria, Cairo, Osioot (the metropolis of Upper Egypt), Fayoum, and Ghous. The theological school at Osioot had in 1867 13 theological students. Schools for boys and girls are organized in connection with each of the five churches and at each of the out-stations. The distribution of the Bible is prosecuted by the agents of the British and Foreign Bible Society, by the American missionaries, by the Crischona mission, and by others. There were, in 1866, three dépôts in Cairo for the sale of the Bible, and the yearly sale of the Scriptures averaged from 7000 to 10,000 copies. The Crischona, or Pilgrim mission, at Basel, Switzerland, intended to establish a so-called "Apostles' Street," or series of twelve stations, from Alexandria far into the heart of Abyssinia. Of these, the following stations were, in 1866, in active operation in Egypt: St. Matthew's in Alexandria; St. Mark's in Cairo; St. Peter's at Assouan, at the falls of the Nile; St. Thomas at Khartoum, at the junction of the White and Blue Niles; and St. Paul's at Matammah, on the borders of Abyssinia. The deaconesses of Kaiserswerth have a hospital in Alexandria, and the first German Protestant church of Egypt was opened in 1866.—*Princeton Review*, 1850, p. 260; 1856, p. 715; Newcomb, *Cyclop. of Missions*, s. v.; Hardwick, *Christ and other Masters*, vol. ii; *Journal of Sac. Lit.* viii, ix; *Bibliotheca Sacra*, vi, 707; *Christian Year-book* for 1867, p. 289; the Annual Reports of the U. P. Foreign Mission Board, in July number of *Evangel. Repository* (1860-1868). (A. J. S.)

**Egypt'ian** (properly מִצְרַיִם, *Mitsrai'*, Αἰγύπτιος; but often in the plur. as a rendering in the A. V. of מִצְרַיִם, *Egypti*), a native of the land of Egypt (q. v.); found in the sing. masc. (Gen. xxxix, 1, etc.; Acts xxi, 38, etc.), fem. מִצְרַיִתָּה (Gen. xvi, 1), plur. masc. מִצְרַיִם (Gen. xii, 12, 14; Acts vii, 22, etc.), fem. מִצְרַיִתָּה (Exod. i, 19). The Egyptian insurrectionist of Acts xxi, 38, seems to have been a mountebank (*γόνε*, Josephus, *Jar*, ii, 13, 5), or pretended prophet (*Ant.* xx, 7, 6). See PAUL. That country was proverbial for such characters.

**EGYPTIAN PLAGUES.** See PLAGUES OF EGYPT.

**EGYPTIAN VERSIONS OF THE HOLY SCRIPTURES.** After the death of Alexander the Great the Greeks multiplied in Egypt, and obtained important places of trust near the throne of the Ptolemies. The Greek language accordingly began to diffuse itself from the court among the people, so that the proper language of the country was either forced to adapt itself to the Greek both in construction and in the adoption of new words, or was entirely suspended. In this way originated the Coptic, compounded of the old Egyptian and the Greek. (See Tattam, *Egyptian Grammar of the Coptic, Sahidic, and Bashmuric Versions*, 2d edit. Lond. 1863.) See COPTIC LANGUAGE. There is a version in the dialect of Lower Egypt usually called the *Coptic*, or, better, the *Memphitic* version; and there is another in the dialect of Upper Egypt, termed the *Sahidic*, and sometimes the *Thebaic*. See Davidson, *Bibl. Criticism*, ii, 206 sq.; Scrivener, *Introd. to N. T.*, p. 270 sq.; Westcott, *N.-T. Canon*, p. 322 sq.

1. The *Memphitic* version of the Bible.—The O. T. in this version was made from the Septuagint and not from the original Hebrew. It would appear from Münter (*Specim. vers. Dan. Copt.* Rome, 1786) that the original was the Hesychnan recension of the Sept. then current in the country. There is little doubt that all the O.-T. books were translated, though many of them have not yet been discovered. Although this version (not the Thebaic) seems to be that exclusively used

in the public services of the Copts, it was not known in Europe till Dr. Marshall, of Lincoln College, contributed some readings from it to bishop Fell's New Testament (Oxford, 1675). The Pentateuch has been published by Wilkins (London, 1751, 4to), by Fallet (Paris, 1854 sq.), and by De Lagarde (Leipzig, 1867, 8vo); the Psalms at Rome (1744 and 1749) by the Propaganda Society. In 1837 Ideler published the Psalter more correctly; and in 1844 the best critical edition, by Schwartz, appeared. The twelve minor prophets were published by Tattam (Oxon. 1836, 8vo), and the major prophets by the same (1852). Bardelli published Daniel (Pisa, 1849). A few pieces of other books were printed at different times by Mingarelli, Quatrenière, and Münter. The N. T., made from the original Greek, was published by Wilkins, with a Latin translation (Oxford, 1716). In 1846 a new and more correct edition was begun by Schwartz, and continued, but in a different manner, after his death, by Bötticher (1852, etc.). In 1848-52, the "Society for promoting Christian Knowledge" published the N. T. in Memphitic and Arabic (Lond. 2 vols. fol.). The text was revised by Lieder. The readings of this version, as may be inferred from the place where it was made, coincide with the Alexandrine family, and deserve the attention of the critic. Unfortunately, the version has not yet been adequately edited. It belongs perhaps to the 3d century. See Davidson, in Horne's *Introd.* ii, 66.

2. The *Thebaic*.—This version was also made from the Greek, both in the O. and N. T., and probably in the 2d century. Only some fragments of the O.-T. part have been printed by Münter, Mingarelli, and Zoega. In the N. T. it agrees generally, though not uniformly, with the Alexandrine family. Not a few readings, however, are peculiar; and some harmonize with the Latin versions. Fragments of it have been published by Mingarelli, Giorgi, Münter, and Ford.

3. The *Bashmuric*, or *Ammonian*.—Only some fragments of such a version in the O. and N. T. have been published, and very little is known concerning it. Scholars are not agreed as to the nature of the dialect in which it is written, some thinking that it does not deserve the name of a dialect, while others regard the Bashmuric as a kind of intermediate dialect between those spoken in Upper and Lower Egypt. Hug and De Wette are inclined to believe that it is merely the version of Upper Egypt transferred to the idiom of the particular place where the Bashmuric was spoken. The origin of this version belongs to the 3d or 4th century. See Tregelles, in Horne's *Introduet.* iv, 287-299.—Kitto, s. v. See VERSIONS (OF THE BIBLE).

E'hi (Heb. *Echî'*, עֲחִי, prob. a modified form of the name אֲחִי; Sept. Ἀγχίς; Vulg. *Echî*), one of the "sons" of Benjamin (Gen. xlvj, 21), apparently the grandson called אֲחִירָם (q. v.) in Num. xxvi, 38 (from which the name is perhaps contracted). In the parallel passage (1 Chron. viii, 6) he seems to be called EHUD (q. v.).

E'hud (Heb. *Ehud'*, עֲהוּד, *union*), the name of two or three Benjamites, and apparently hereditary in that tribe, like Gera (q. v.).

1. (Sept. Ἐδὺ v. r. Ἀώδ; Vulg. *Ahod*.) A descendant of Benjamin, progenitor of one of the clans of Geba that removed to Manahath (1 Chron. xiii, 10). The name is there written עֲהוּד, *Ehud'*, either for עֲחִי, as above, or altogether erroneously for עֲחִי, *Echî'*, i. e. EHI (q. v.), the grandson of Benjamin, which appears in the parallel list of Gen. xlvj, 21, and as a son of Belah according to the Sept. version of that passage. He seems to be the same as ANI-RAM, אֲחִירָם, in the list in Num. xxvi, 38, and, if so, *Ahiram* is probably the right name, as the family were called *Ahiraimites*. In 1 Chron. viii, 1, the same person seems to be called עֲחִי, אֲחִירָם, and perhaps also עֲחִי, אֲחִירָם, in

ver. 4 (Sept. Ἀχιά, and in Cod. Vatic. Ἀχράν), עֲחִי, אֲחִירָם (Ἀχιά), *Ahiash*, ver. 7, and עֲחִי (Ἀόρ), *Aher*, 1 Chron. vii, 12. See SHAHARAIM. These fluctuations in the orthography seem to indicate that the original copies were partly effaced by time or injury. See BÉCHER; CHRONICLES.

2. (Sept. Ἀμῖν v. r. Ἀώδ; Vulg. *Aod*.) The third named of the seven sons of Bilhan, the son of Jediael, and grandson of the patriarch Jacob (1 Chron. vii, 10). B. C. post 1856.

3. (Sept. Ἀώδ; Vulg. *Aod*; Josephus Ἡοδῆς.) The son of Gera (there were three others of this name, Gen. xlvj, 21; 2 Sam. xvi, 5; 1 Chron. viii, 3), of the tribe of Benjamin (Judg. iii, 16, marg. "son of Jemini," but vid. Gesenius, *Lex.* sub v. עֲחִי), the second judge of the Israelites, or, rather, of that part of Israel which he delivered from the dominion of the Moabites by the assassination of their king Eglon. These were the tribes beyond the Jordan, and the southern tribes on this side the river. In the Bible he is not called a judge, but a *deliverer* (l. c.); so Othniel (Judg. iii, 9), and all the judges (Neh. ix, 27). As a Benjamite he was specially chosen to destroy Eglon, who had established himself in Jericho, which was included in the boundaries of that tribe. See EGLON. In Josephus he appears as a young man (*νεανίας*). He was very strong, and left-handed. So A. V.; but the more literal rendering is, as in the margin, "shut of his right hand." The words are differently rendered: 1. left-handed, and unable to use his right; 2. using his left hand as readily as his right. For 1. Targum, Josephus, Syr. (*impotens*), Arab. (*aribum*), and Jewish writers generally; Cajet., Buxtorf, Parkh., Gesen. (*impeditus*): derivation of עֲחִי from עֲחִי, the latter only in Psa. lxix, 16, where it = to shut. For 2. Sept. (ἀμφοτέρωθεν), Vulg. (*quâ utraque manu pro dextrâ utebatur*), Corn. a Lap., Bonfrer., Patrick (comp. πεποιθῆτος, Hom. *Il.* xxi, 163; Hipp. *Aph.* 7, 43); Judg. xx, 16, sole recurrence of the phrase, applied to 700 Benjamites, the picked men of the army, who were not likely to be chosen for a physical defect. As regards Psa. lxix, 16, it is urged that עֲחִי may = *corono* = *aperio*; hence עֲחִי = *apertus* = *expeditus*, q. d. *expedita dextra*; or if "*clausus*," *clausus dextra* = *cinctus dextra* = *πεποιθῆτος*, *ambidexter* (vid. Poli *Sym.*). The feat of drawing the dagger from the right thigh (Judg. iii, 21) is consistent with either opinion. See AMBIDEXTER.

Ehud obtained access to Eglon as the bearer of tribute from the subjugated tribes, and being left-handed, or, rather, ambidextrous, he was enabled to use with a sure and fatal aim a dagger concealed under a part of his dress, where it was unsuspected, because it would there have been useless to a person employing his right hand. The circumstances attending this tragical event are somewhat differently given in Judges and in Josephus (see Winkler, *Unters. schererer Schriftst.* i, 45 sq.; Redlob, in the *Studien u. Krit.* ix, 912 sq.; Ewald, *Isr. Gesch.* ii, 375 sq.). That Ehud had the entrance of the palace is implied in Judges (iii, 19), but more distinctly stated in Josephus. In Judges the Israelites send a present by Ehud (iii, 15); in Josephus Ehud wins his favor by repeated presents of his own. Josephus represents this intimacy as having been of long continuance; but in Judges we find no mention of intimacy, and only one occasion of a present being made, viz., that which immediately preceded the death of Eglon. In Judges we have two scenes, the offering of the present and the death scene, which are separated by the temporary withdrawal of Ehud (ver. 18, 19); in Josephus there is but one scene. The present is offered, the attendants are dismissed, and the king enters into friendly conversation (*συλάειν*) with Ehud. In Judges the place seems to change from the reception-room into the "summer-parlor," where Ehud found him upon his return (comp. ver. 18, 20). In Josephus the entire ac-

tion takes place in the summer-parlor (*δωμάριον*). In Judges the king exposes himself to the dagger by rising apparently in respect for the divine message which Ehud professed to communicate (Patrick, ad loc.); in Josephus it is a *dream* which Ehud pretends to reveal, and the king, in delighted anticipation, springs up from his throne. The obesity of Eglon, and the consequent impossibility of recovering the dagger, are not mentioned by Josephus (vid. Judg. iii, 17, *ful. dōrōtōc*, Sept.; but "crassus," Vulg., and so Gesenius, *Lex.*). The "quarries that were by Gilgal," to which Ehud retired in the interval between the two interviews (iii, 19), are rendered in the margin better, as in Deut. vii, 25, "graven images" (Patrick, ad loc.; comp. Gesen. *Heb. Lex.* s. v. עֲבֹתֵי־בָרָז). See EGLON.

After this desperate achievement Ehud repaired to Seirah (improp. Seirath; see Gesen. *Lex.* s. v.), in the mountains of Ephraim (iii, 26, 27), or Mount Ephraim (Josh. xix, 50). To this wild central region, commanding, as it did, the plains east and west, he summoned the Israelites by sound of horn (a national custom according to Josephus; A.V. "a trumpet"). Descending from the hills they fell upon the Moabites, dismayed and demoralized by the death of their king (Josephus, not Judges). The greater number were killed at once, but 10,000 men made for the Jordan with the view of crossing into their own country. The Israelites, however, had already seized the *fords*, and not one of the unhappy fugitives escaped. As a reward for his conduct Ehud was appointed judge (Josephus, not Judges). The Israelites continued to enjoy for eighty years (B.C. 1509-1430) the independence obtained through this deed of Ehud (Judg. iii, 15-30).—Smith, s. v.; Kitto, s. v. See JUDGES.

**Ekdach.** See CARUNCLE.

**Eichhorn, Johann Gottfried**, a celebrated German Orientalist and theologian, was born Oct. 16, 1752, at Dörenzimmern, in the principality of Hohenzollern-Hechingen. He received his education at the gymnasium of Heilbronn and at the University of Göttingen, under Michaelis and Heyne. He became professor of Oriental literature at Jena in 1775, and was named court-councillor by the duke of Saxe-Weimar in 1783. In 1788 he succeeded Michaelis as professor of philosophy at the University of Göttingen, and in 1811 he was made professor of theology there, which post he retained until his death, June 25, 1827. Eichhorn was a thoroughly industrious student and a very voluminous writer. His first proof of Oriental knowledge was given in his *Geschichte des Ostindischen Handels vor Mohammed* (Gotha, 1775, 8vo). This was followed by *Monumenta antiquissima historie Arabum, post Ab. Schultens, arabice edidit, latine vertit, et annotationibus auct. J. G. Eichhorn* (Gotha, 1775, 8vo):—*De rei nummarie apud Arabos uetus* (Jena, 1776, 4to). At Jena he devoted himself to Biblical literature, and established, as a sort of organ, a magazine entitled *Repertorium für biblische und morgenländische Literatur*, which lasted from 1777 to 1786 (Leipzig), and was followed by the *Allgemeine Bibliothek d. biblischen Literatur* (Leipz. 1787-1803, 10 vols, 8vo). His professorship at Göttingen opened to him a wider field (1788) after the death of J. D. Michaelis. He lectured not only on Oriental literature, and on the exegesis of the O. and N. T., but also in the field of general history, in which he soon appeared as an author. In 1790-93 appeared his *Urgeschichte* (Primitive History), edited by Gabler from the *Repertorium* (Nuremb. 8vo). His more important works, in addition, are *Commentarius in Apocalypsin Joannis* (Götting, 1791, 2 vols. 8vo):—*Einkleitung ins A. T.: Einkleitung ins N. T.* (also published under the general title of *Kritische Schriften*, Leips. 1804-1814, 8vo, 7 vols.). He also published a number of historical writings, besides many essays, reviews, etc.; and all this time his lectures were kept up in the university. The zealous and continued indus-

try of Eichhorn is one of the marvels of modern literature.

As an interpreter of the Bible, Eichhorn, following Michaelis, transcended him in the boldness of his criticism and in his far-reaching Rationalism. The results of his criticism were that the Bible, *as we have it*, has only a moral and literary superiority over other books. The primeval history attributed to Moses was made up of ancient *sagas*, and gathered up, partly, by Moses into the Pentateuch. His system of interpretation multiplies paradoxes, and tends to uproot the Christian revelation, as such, entirely. In his view the Apocalypse is a prophetic drama, and he comments on it as he would on a play of Aristophanes or Terence. But his vast labors in Biblical literature retain great part of their reputation, while his method of interpretation is fast passing into oblivion, even in Germany.—*Saintes, History of Rationalism*, chap. xi; Herzog, *Real-Encyclop.* iii, 710.

**Eichhorn, Karl Friedrich**, son of Johann Gottfried Eichhorn (q. v.), was born at Jena in 1781. After completing his studies at the University of Göttingen, he became *privatdozent* of law at the University of Jena. In 1805 he was appointed professor at the University of Frankfort on the Oder, and in 1811 was transferred, with the university, to Berlin, where he edited, with Savigny, Göschen, and, later, with Rudorff, the *Zeitschrift für geschichtliche Rechtswissenschaft*. From 1817 to 1828 he was professor of Church law, and other branches, at Göttingen; from 1831 to 1833 professor at the University of Berlin. In 1833 he was appointed a member of the supreme state court, and subsequently filled some other high offices in the civil administration. He was regarded as the head of the historical school of German jurists. He died at Berlin July 4, 1854. Besides a number of law books, which still occupy a high rank in that literature, he wrote a work on Church law (*Grundsätze des Kirchenrechts der kathol. u. evangel. Religionsparteien*, Götting, 1831-1833).—Herzog, *Real-Encycl.* xi, 470. (A. J. S.)

**Einhard.** See EGINHARD.

**Einsiedeln** (*Maria-Einsiedeln, Deipare Virginis Erenus, Notre Dame des Ermites*), a Benedictine monastery in Switzerland, founded in the 9th century by Meinrad of Solcure, who was murdered by robbers A.D. 861. In 934, Eberhard, provost of the cathedral of Strasburg, built a monastery and church here, which the emperor Otto, in 946, endowed with the free right of election. The convent was to be consecrated September 14, 948, by the bishop of Constanz, but the latter claimed to have heard the preceding night the song of angels, and to have seen Christ himself, attended by angels, saying mass and consecrating the chapel; and when, the next morning, he prepared to perform the act of consecration, he was admonished by a voice saying, "Hold on, brother, God himself has dedicated the chapel." The story was believed, and on the sole strength of it the annual pilgrimage to Einsiedeln on September 14, to commemorate the "Angelic Consecration" (*Engel-Welt*), became, and still is, one of the most famous pilgrimages in the Church of Rome. The popes granted full absolution to all who went in pilgrimage to the church. The congregation consisted mostly of scions of noble families, and the convent steadily increased in power and riches. A new church was built in the beginning of the last century on the model of the Lateran Church, and contains Meinrad's cell and the image of the Virgin. In the time of the Reformation most of the monks left the convent, but it was subsequently reorganized by Ludwig Blarer, a Benedictine monk of St. Gall. In 1710 260,000 arc said to have visited Einsiedeln, and in 1851 the number was over 200,000. The vendors of blessed images, medals, etc., do a thriving business there, and at a large profit. There are at Einsiedeln confessionals for the people of different

nations and languages, each bearing an inscription by which it is recognised. In 1867 the convent had 75 priests, and 6 clerical and 17 lay brothers. The "Stiftsschule" ("Gymnasium" and Lyceum) numbered about 200 pupils. Until 1852 the convent had a second "gymnasium" in Bellizona, in the canton of Tessin, but in that year it was suppressed by the Liberal government of the canton. See Placidus, *Documenta archivii Einsiedlensis* (3 vols. folio); *Annales Heremi Deipurae matris* (Frib. Brigg. 1612, fol.); Herzog, *Real-Encyklop.* iii, 742; Landolt, *Ursprung u. erste Gestaltung des Klosters Einsiedeln* (Einsied. 1845); Brandes, *Der heil. Meinrad u. die Wallfahrt von Einsiedeln* (Einsiedeln, 1861).

**Eisenmenger**, JOHANN ANDREAS, a German Orientalist, was born at Mannheim in 1654, and studied at the University of Heidelberg, in which, after a journey to England and Holland, he became in 1700 professor of Oriental languages. He died in 1704. His principal work is entitled *Entdecktes Judenthum* (Frankf. 1700). The Jews opposed its publication by all means in their power, and even obtained an imperial edict against it. At the time of his death nearly the whole edition of the work still lay under arrest. The Jews shortly before offered him 12,000 florins for the surrender of all the copies, but he asked 30,000. Friedrich I of Prussia appealed, in behalf of the heirs of Eisenmenger, to the emperors Leopold and Joseph for permission to publish the book, and, when this led to no result, had the book reprinted and published at his own expense (Königsberg, 1711). Subsequently the Frankfurt edition was also permitted to see the light. Eisenmenger also compiled a *Lexicon Orientale harmonicum*, which has never been printed, and he published, conjointly with Leusden (q. v.), in 1694, an edition (without points) of the Heb. Bible.—Herzog, *Re.-Encyk.* iii, 744; Hofer, *Biog. Gén.* xv, 776; Wetzler u. Welte, *Kirchen-Lex.* xii, 311; Jost, *Gesch. der Juden.* vol. viii. (J. H. W.)

**E'ker** (Heb. *il.* עֵקֶר, a plant rooted up and transplanted, e. g. metaph. a resident foreigner, Lev. xxv, 47), the youngest of the three sons of Ram, the grandson of Hezron (1 Chron. ii, 27; Sept. Ἀκόρ, Vulg. Achar). B. C. post 1856.

**Ekkehard**, the name of several learned monks of St. Gall. The first of the name, about the middle of the 10th century, was the director of the convent school, and subsequently dean of the convent. He laid the foundation of the literary celebrity of St. Gall, wrote several ecclesiastical hymns, and is honorably mentioned in the history of German literature. Another *Ekkehard*, a nephew of the former, was also a director of the convent school, and subsequently a chaplain of emperor Otto II. He also composed ecclesiastical hymns, and is supposed to have been familiar with stenography. He died April 23, 990. A third *Ekkehard*, born about 980, was a pupil of Notker Labeo, and became distinguished for his knowledge of Latin, Greek, German, mathematics, astronomy, and music. Arlbo, archbishop of Mentz, appointed him superior of the cathedral school of that city. He continued the Annals of St. Gall, which a monk by the name of Ratpertus had begun and carried to the year 883. This work, *Casus Monasterii Sancti Galli* (printed in *Monumenta Germania histor. Scriptor.* ii, 74-163) is of great importance for the Church history of the 10th century. Ekkehard also compiled a collection of ecclesiastical hymns, under the title *Liber Benedictionum*. He wrote a poem, *De ornatu dictionis*, and translated a life of St. Gall, in German verses by Ratpertus, into Latin. He died in 1036. A fourth *Ekkehard*, who lived at the beginning of the 12th century, wrote a *Vita Sancti Notkeri*.—Herzog, *Real-Encyklop.* iii, 745. (A. J. S.)

**Ek'rebel** (Ἐκροβίλη; Pesh. *Ecerabat*; Vulg. omits), a place named in Jud. vii, 18 only, as "near to Chusi, which is on the brook Mochmur," apparently somewhere in the hill country to the south-east of the Plain

of Esdraelon and of Dothain. The Syriac reading of the word points to the place *Acrabbein*, mentioned by Eusebius in the *Onomasticon* as the capital of a district called *Acrabattine*, and still standing as *Akrabih*, about six miles south-east of Nablús (Shechem), in the Wady Makfariyeh, on the road to the Jordan valley (Van de Velde, ii, 304, and Map). Though frequently mentioned by Josephus (II'ar, ii, 20, 4; iii, 3, 5, etc.), neither the place nor the district are named in the Bible, and they must not be confounded with those of the same name in the south of Judah.—Smith, s. v. See AKRABEIN; ARABATTINE; MAALEH-ACRABEIN.

**Ek'ron** (Heb. *Ekrôn'*, עֶקְרוֹן, *eradication*; comp. Zeph. ii, 4, which apparently contains a play upon the word; Sept. [usually] and Josephus ἡ Ἀκκαρόν, Vulg. *Accaron*), one of the five towns belonging to the lords of the Philistines, and the most northerly of the five (Josh. xiii, 3). Like the other Philistine cities, its situation was in the maritime plain. In the general distribution of territory (unconquered as well as conquered) Ekron was assigned to Judah, as being upon its border (Josh. xiii, 3), between Bethshemesh and Jabneel (Josh. xv, 11, 45), but apparently was afterwards given to Dan, although conquered by Judah (Josh. xv, 11, 45; xix, 43; Judg. i, 18; comp. Josephus, *Ant.* v, 1, 22; v, 2, 4). But it mattered little to which tribe it nominally belonged, for before the monarchy it was again in full possession of the Philistines (1 Sam. v, 10). In Scripture Ekron is chiefly remarkable from the ark having been sent home from thence, upon a new cart drawn by two milk kine (1 Sam. v, 10; vi, 1-8). Ekron was the last place to which the ark was carried before its return to Israel, and the mortality there in consequence seems to have been greater than at either Ashdod or Gath. (The Sept. in both MSS., and Josephus [*Ant.* vi, 1, 1], substitute Ascalon for Ekron throughout this passage [1 Sam. v, 10-12]. In support of this it should be remarked that, according to the Hebrew text, the golden trespass-offerings were given for Ashkelon, though it is omitted from the detailed narrative of the journeyings of the ark. There are other important differences between the Sept. and Hebrew texts of this transaction. See especially v, 6.) From Ekron to Bethshemesh (q. v.) was a straight highway (Thomson, *Land and Book*, ii, 309). After David's victory over Goliath, the Philistines were pursued as far as this place (1 Sam. xvii, 52). Henceforward Ekron appears to have remained uninterruptedly in the hands of the Philistines (1 Sam. xvii, 52; 2 Kings i, 2, 16; Jer. xxv, 20). Except the casual mention of a noted sanctuary of Baalzebub (q. v.) existing there (2 Kings i, 2, 3, 6, 16), there is nothing to distinguish Ekron from any other town of this district. In later days it is merely named with the other cities of the Philistines in the denunciations of the prophets against that people (Jer. xxv, 20; Amos i, 8; Zeph. ii, 4; Zech. ix, 5). The name occurs in the cuneiform inscriptions (q. v.) of the Assyrian monuments. In the Apocrypha it appears as *Accaron* (Ἀκκαρόν, 1 Macc. x, 89, only), bestowed with its borders (τὰ ὅρια αὐτῆς) by Alexander Balas on Jonathan Maccabæus as a reward for his services. Eusebius and Jerome describe it (*Onomast.* s. v. Ἀκκαρόν, *Accaron*) as a large village of the Jews, between Azotus and Jammia towards the east, or eastward of a line drawn between these two places. The same name *Accaron* occurs incidentally in the histories of the Crusades (*Gesta Dei per Francos*, p. 404). The site of Ekron has lately been recognised by Dr. Robinson (*Bib. Researches*, iii, 24) in that of *'Akir*, in a situation corresponding to all that we know of Ekron. The radical letters of the Arabic name are the same as those of the Hebrew, and both the Christians and Moslems of the neighborhood regard the site as that of the ancient Ekron. It is a considerable Moslem village, about five miles south-west of Ram-

leh, and three due east of Yebna, on the northern side of the important valley Wady Surar. It is built of unburnt bricks, and, as there are no apparent ruins, the ancient town was probably of the same materials. It is alleged, however, that cisterns and the stones of hand-mills are often found at Akir and in the adjacent fields. The plain south is rich, but immediately round the village it has a dreary, forsaken appearance (hence perhaps the name = "wastiness"), only relieved by a few scattered stunted trees (Porter, *Handb.* p. 275; and see Van de Velde, ii, 169).—Kitto, s. v.; Smith, s. v.

**Ek'ronite** (Heb. *Ekroni'*, עֶקְרוֹנִי, Josh. xiii, 3, Sept. Ἀκκαρωνίτης, Vulg. *Accaronite*; plur. עֶקְרוֹנִי, 1 Sam. v, 10, Ἀκκαρωνίται, *Accaronite*), a native of the Philistine town EKRON (q. v.).

**EL-** (עֵל, *mighty*, hence *God*, either Jehovah or a false deity; sometimes a *hero* or *magistrate* [see **GOD**]) occurs as a prefix (and also as a suffix) to several Heb. names, e. g. EL-BETH-EL; EL-EL-OHI-ISRA-EL, all of which see in their place. Compare ELI.

**E'la** (חָלָא, Vulg. *Jolaman*), one of the heads of clans (or places) whose "sons" had taken foreign wives after the Babylonian exile (1 Esdr. ix, 27); evidently the ELAM (q. v.) of the Heb. text (Ezra x, 26). See also ELAM.

**El'adah** (Heb. *Eladah'*, עֵלְאָדָה, whom *God* has put on, i. e. fills with himself; Sept. Ἐλαῶα v. r. Ἐλαεῶα, Vulg. *Elada*), one of the sons (rather than grandson or later descendant, as the text seems to state) of Ephraim (1 Chron. vii, 20), perhaps the same as ELEAD (q. v.) of ver. 21, since several of the names [see **TAHATHI**] in the list appear to be repeated (compare Num. xxvi, 36, where the only corresponding name is ERAN). See BERIAH.

**E'lah** (Heb. *Elah'*, עֵלָה, *terebinth* or oak [q. v.]), the name of a place, and also of five men.

1. THE VALLEY OF ELAH (עֵלָה הַבְּקָעָה, *vale of the terebinth* or oak; Sept. ἡ κοιλία Ἰλά, but translates ἡ κοιλία τῆς ἐρυός in 1 Sam. xvii, 2, 19; Vulg. likewise *vallis terebinthi*), a valley in (not "by," as the A. V. has it) which the Israelites were encamped against the Philistines when David killed Goliath (1 Sam. xvii, 2, 19; xxi, 9). It lay somewhere near Shocoh of Judah, and Azekah, and was nearer Ekron than any other Philistine town (1 Sam. xvii). Shocoh has been with great probability identified with Shuweikeh, near Beit Netif, some 14 miles S.W. of Jerusalem, on the road to Beit Jibrin and Gaza, among the more western of the hills of Judah, not far from where they begin to descend into the great Philistine plain. The village stands on the south slopes of the *wady es-Sumt*, or *vally of the acacia*, which runs off in a N.W. direction across the plain to the sea just above Ashdod. Above Shuweikeh it branches into two other wadys, large, though inferior in size to itself, and the junction of the three forms a considerable open space of not less than a mile wide cultivated in fields of grain. In the centre is a wide torrent bed thickly strewn with round pebbles, and bordered by the acacia bushes from which the valley derives its present name. There seems to be no reason to doubt that this is the Valley of the Terebinth. It has changed its name, and is now called after another kind of tree (the *sumt*, or acacia), but the terebinth (*butm*) appears to be plentiful in the neighborhood, and one of the largest specimens in Palestine still stands in the immediate neighborhood of the spot, in wady Sur, the southernmost of the branch wadys. Four miles E. of Shuweikeh, along wady Musur, the other branch, is the klan and ruined site Akbeh, which Van de Velde proposes to identify with Azekah. These identifications are confirmed by that of Ephesdammin (q. v.), the site of the Philistine camp. Ekron is 17 miles, and Bethlehem 12 miles distant from Shocoh. (For the valley, see Robinson, *Researches*, ii,

350; Van de Velde, *Narrative*, ii, 191; Porter, *Handbook*, p. 249, 250, 280; Schwarz, *Palest.* p. 77.)

There is a point in the topographical indications of 1 Sam. xvii which it is very desirable should be carefully examined on the spot. The Philistines were between Shocoh and Azekah, at Ephesdammin, or Pasdammin, on the mountain on the S. side of the wady, while the Israelites were in the "valley" (עֵלָה) of the terebinth, or, rather, on the mountain on the N. side, and "the ravine" or "the glen" (עֵלָה) was between the two armies (ver. 2, 3). Again (ver. 52), the Israelites pursued the Philistines "till you come to 'the ravine'" (the same word). There is evidently a marked difference between the "valley" and the "ravine," and a little attention on the spot might do much towards elucidating this, and settling the identification of the place. In the above location, the distance between the armies was about a mile, and the vale beneath is flat and rich. The ridges rise on each side to the height of about 500 feet, and have a uniform slope, so that the armies ranged along them could see the combat in the vale. The Philistines, when defeated, fled down the valley towards Gath and Ekron.

The traditional "Valley of the Terebinth" is the *wady Beit-Hannua*, which lies about 4 miles to the N.W. of Jerusalem, and is crossed by the road to Nebi Samwil. The scene of David's conflict is pointed out a little N. of the "Tombs of the Judges," and close to the traces of the old paved road. In this valley olive-trees and carob-trees now prevail, and terebinth-trees are few; but the brook is still indicated whence the youthful champion selected the "smooth stones" wherewith he smote the Philistine. The brook is dry in summer, but in winter it becomes a mighty torrent, which inundates the vale (Kitto, *Pictorial Palestine*, p. 121). But this spot is in the tribe of Benjamin, and otherwise does not correspond with the narrative of the text (see Thenius, *Sächs. exeg. Stud.* ii, 151).—Smith, s. v.

2. (Sept. Ἰλάς, but Ἰλάς in Chron.; Vulg. *Ela*.) One of the Edomitish "dukes" or chieftains in Mount Seir (Gen. xxxvi, 41; 1 Chron. i, 52), B.C. post 1963. By Knobel (*Comment. zu Gen.* in loc.) he is connected with Elath (q. v.) on the Red Sea.

3. (Sept. Ἀδὰ v. r. Ἀνά.) The middle one of the three sons of Caleb the son of Jephunneh (1 Chron. iv, 15), B.C. 1618. In that passage his sons are called Kenaz or Uknaz, but the words may be taken as if Kenaz was, with Elah, a son of Caleb. It is a singular coincidence that the names of both Elah and Kenaz also appear among the Edomitish "dukes."

4. (Properly ELA, Heb. *Ela'*, עֵלָה; Sept. Ἰλά.) The father of Shimei ben-Ela, Solomon's commissariat officer in Benjamin (1 Kings iv, 18), B.C. 1013.

5. (Sept. Ἰλά, Josephus Ἰλαρος, Vulg. *Ela*.) The son and successor of Baasha, king of Israel (1 Kings xvi, 8-10); his reign lasted for little more than a year (comp. ver. 8 with 10), B.C. 928-7. He was killed while drunk by Zimri, in the house of his steward Arza, who was probably a confederate in the plot. This occurred, according to Josephus (*Ant.* viii, 12, 4), while his army and officers were absent at the siege of Gibbethon. He was the last king of Baasha's line, and by this catastrophe the predictions of the prophet Jehu were accomplished (1 Kings xvi, 6, 7, 11-14).

6. (Sept. Ἰλά.) The father of Hoshea, last king of Israel (2 Kings xv, 30; xvii, 1), B.C. 729, or ante.

7. (Sept. Ἰλά v. r. Ἰλάω, Vulg. *Ela*.) The son of Uzzi, and one of the Benjamite heads of families who were taken into captivity (1 Chron. ix, 8), or rather, perhaps, returned from it. B.C. 536.

**Elah.** See OAK; TEREBINTH.

**Elais** (Ἐλαίς), a Phœnician city mentioned by Dionysius (*Perieg.* 910) and other ancient authors as

lying between Joppa and Gaza, but apparently merely an appellative (see Reland, *Palaest.* p. 747) for some place noted for olives (*ἔλαια*), which abound in that entire region.

**E'lam** (Heb. *Eylam'*, עֵלָם, corresponding to the Pehlvi *Airjama* [see Gesenius, *Thesaur.* p. 1016]), the name of a man and of the region settled by his posterity, also of several Hebrews, especially about the time of the Babylonian captivity.

1. (Sept. *Ἐλάμ*; Josephus *Ἐλαμος*, *Ant.* i, 6, 4; Vulg. *Elam*.) Originally, like Aram, the name of a man—the son of Shem (Gen. x, 22; 1 Chron. i, 17), B.C. post 2514. Commonly, however, it is used as the appellation of a country (Gen. xiv, 1, 9; Isa. xi, 11; xxi, 2; Jer. xxv, 25; xlix, 34–39; Ezek. xxxii, 24; Dan. viii, 2). In Gen. xiv, 1, it is introduced along with the kingdom of Shinar in Babylon, and in Isa. xxi, 2, and Jer. xxv, 25, it is connected with Media. In Ezra iv, 9, the Elamites are described among the nations of the Persian empire; and in Dan. viii, 2, Susa is said to lie on the river Ulai (Euleus or Choaspes), in the province of Elam. This river was the modern Karun (Layard, *Nineveh and Bab.* p. 146), and the capital of Elam was Shushan (q. v.), one of the most powerful and magnificent cities of the primeval world. The name Elam occurs in the cuneiform inscriptions (q. v.) found on the bulls in Sennacherib's palace at Nineveh. The country was also called *Nu-vaki*, as we learn from the monuments of Khorsabad and Besutun (Layard, *Nin. and Bab.* p. 452).

The Elam of Scripture appears to be the province lying south of Assyria and east of Persia Proper, to which Herodotus gives the name of *Cissia* (iii, 91; v, 49, etc.), and which is in part termed *Susis* or *Susiana* by the geographers (Strab. xv, 3, § 12; Ptolem. vi, 3, etc.). It includes a portion of the mountainous country separating between the Mesopotamian plain and the high table-land of *Iran*, together with a fertile and valuable low tract at the foot of the range, between it and the Tigris. The passage of Daniel (viii, 2) which places Shushan (Susa) in "the province of Elam," may be regarded as decisive of this identification, which is further confirmed by the frequent mention of Elymeans in this district (Strab. xi, 13, § 6; xvi, 1, § 17; Ptolem. vi, 3; Plin. *H. N.* vi, 26, etc.), as well as by the combinations in which Elam is found in Scripture (see Gen. xiv, 1; Isa. xxi, 2; Ezek. xxxii, 24). It appears from Gen. x, 22, that this country was originally peopled by descendants of Shem, closely allied to the Arameans (Syrians) and the Assyrians; and from Gen. xiv, 1–12, it is evident that by the time of Abraham a very important power had been built up in the same region. Not only is "Chedor-laomer, king of Elam," at the head of a settled government, and able to make war at a distance of two thousand miles from his own country, but he manifestly exercises a supremacy over a number of other kings, among whom we even find Amraphel, king of Shinar, or Babylonia. It is plain, then, that at this early time the predominant power in Lower Mesopotamia was Elam, which for a while held the place possessed earlier by Babylon (Gen. x, 10), and later by either Babylon or Assyria. Discoveries made in the country itself confirm this view. They exhibit to us Susa, the Elamitic capital, as one of the most ancient cities of the East, and show that its monarchs maintained, throughout almost the whole period of Babylonian and Assyrian greatness, a quasi-independent position. Traces are even thought to have been found of Chedor-laomer himself, whom some are inclined to identify with an early Babylonian monarch, who is called the "Ravager of the West," and whose name reads as Kudur-mapula. The Elamitic empire established at this time was, however, but of short duration. Babylon and Assyria proved, on the whole, stronger powers, and Elam during the period of their

greatness can only be regarded as the foremost of their feudatories. Like the other subject nations she retained her own monarchs, and from time to time, for a longer or a shorter space, asserted and maintained her independence. But generally she was content to acknowledge one or other of the two leading powers as her suzerain. Towards the close of the Assyrian period she is found allied with Babylon, and engaged in hostilities with Assyria; but she seems to have declined in strength after the Assyrian empire was destroyed, and the Median and Macedonian arose upon its ruins. Elam is clearly a "province" of Babylonia in Belshazzar's time (Dan. viii, 2), and we may presume that it had been subject to Babylon at least from the reign of Nebuchadnezzar. The desolation which Jeremiah (xlix, 30–34) and Ezekiel (xxxii, 24, 25) foresaw was probably this conquest, which destroyed the last semblance of Elamitic independence. It is uncertain at what time the Persians added Elam to their empire. Possibly it only fell under their dominion together with Babylon; but there is some reason to think that it may have revolted and joined the Persians before the city was besieged. The prophet Isaiah in two places (xxi, 2; xxii, 6) seems to speak of Elam as taking part in the destruction of Babylon; and, unless we are to regard him with our translators as using the word loosely for Persia, we must suppose that, on the advance of Cyrus and his investment of the Chaldean capital, Elam made common cause with the assailants. She now became merged in the Persian empire, forming a distinct satrapy (Herod. iii, 91), and furnishing to the crown an annual tribute of 300 talents. Susa, her capital, was made the ordinary residence of the court, and the metropolis of the whole empire. This mark of favor did not, however, prevent revolts. Not only was the Magian revolution organized and carried out at Susa, but there seem to have been at least two Elamitic revolts in the early part of the reign of Darius Hystaspis (*Behistun Inscr.* col. i, par. 16, and col. ii, par. 3). After these futile efforts, Elam acquiesced in her subjection, and, as a Persian province, followed the fortunes of the empire. These historic facts illustrate the prophecy of Jeremiah (xlix, 35–39), "And upon Elam will I bring the four winds from the four quarters of heaven, and I will scatter them towards all these winds." The situation of the country exposed it to the invasions of Assyrians, Medes, and Babylonians; and it suffered from each in succession before it was finally embodied in the Persian empire. Then another part of the prophecy was also singularly fulfilled: "I will set my throne in Elam, and I will destroy from thence the king and princes." The present state of the Persian empire, in which Elam is included, may be a fulfilment of the concluding words of the passage: "But it shall come to pass in the latter days that I will bring again the captivity of Elam" (Vaux, *Nineveh and Persepolis*, p. 85 sq.). See PERSIA.

Herodotus gives the name *Cissia* to the province of which Susa was the capital (iii, 91); Strabo distinguishes between *Susiana* and the country of the Elymeans. The latter he extends northwards among the Zagros mountains (xi, 361; xv, 503; xvi, 507). Pliny says *Susiana* is separated from Elymais by the River Euleus, and that the latter province extends from that river to the confines of Persia (*Hist. Nat.* vi, 27). Ptolemy locates Elymais on the coast of the Persian Gulf, and regards it as part only of *Susiana* (*Geogr.* vi, 3). According to Josephus, the Elymeans were the progenitors of the Persians (*Ant.* i, 6, 4); and Strabo refers to some of their scattered tribes as far north as the Caspian Sea. From these various notices, and from the incidental allusions in Scripture, we may conclude that there was a little province on the east of the Lower Tigris called Elymais; but that the Elymeans, as a people, were anciently spread over and ruled a much wider district, to which their name was

often attached. They were a warlike people, trained to arms, and especially skilled in the use of the bow (Isa. xxi, 2; Jer. xlix, 35); they roamed abroad like the Bedawin, and like them, too, were addicted to plunder (Strabo, xi, 361). Josephus mentions a town called Elymais, which contained a famous temple dedicated to Diana, and rich in gifts and votive offerings (*Ant.* xxii, 9, 1); Appian says it was dedicated to Venus (Bochart, *Opp.* i, 70 sq.). Antiochus Epiphanes attempted to plunder it, but was repulsed (1 Macc. vi). It is a remarkable fact that little images of the goddess, whose Assyrian name was Anaitis, were discovered by Loftus in the mounds of Susa (*Chalvea*, p. 379). The Elamites who were in Jerusalem at the feast of Pentecost were probably descendants of the captive tribes who had settled in Elam (Acts ii, 9).

It has been repeatedly observed above that Elam is called Cissia by Herodotus, and Susiana by the Greek and Roman geographers. The latter is a term formed artificially from the capital city, but the former is a genuine territorial title, and probably marks an important fact in the history of the country. The Elamites, a Shemitic people, who were the primitive inhabitants (Gen. x, 22), appear to have been invaded and conquered at a very early time by a Hamitic or Cushite race from Babylon, which was the ruling element in the territory from a date anterior to Chedor-laomer. These Cushites were called by the Greeks *Cissians* (*Κίσσιοι*) or *Cosseans* (*Κοσσαιῶν*), and formed the dominant race, while the Elamites or Elymæans were in a depressed condition. In Scripture the country is called by its primitive title without reference to subsequent changes; in the Greek writers it takes its name from the conquerors. The Greek traditions of Memnon and his *Ethiopiens* are based upon this Cushite conquest, and rightly connect the Cissians or Cosseans of Susiana with the Cushite inhabitants of the upper valley of the Nile.

The fullest account of Elam, its physical geography, ruins, and history, is given in Loftus's *Chalvea and Susiana* (Lond. 1856; N. Y. 1857). The southern part of the country is flat, and towards the shore of the gulf marshy and desolate. In the north the mountain ranges of Backhtiari and Luristan rise gradually from the plain in a series of calcareous terraces, intersected by ravines of singular wildness and grandeur. Among these mountains are the sources of the Ulai (Loftus, p. 308, 347 sq.). The chief towns of Elymais are now Shuster ("little Shush") and Dizful; but the greater part of the country is overrun by nomad Arabs.—Kitto, s. v.; Smith, s. v. See ELAMITE.

2. (Sept. *Ἐλωνηλωάμ* v. r. *Ἰωλάμ*, also *Ἐλάμ* and *Αἰλάμ*; Vulg. *Elam*.) A Korhite Levite, fifth son of Mesheleiah, one of the Bene-Asaph, and superintendent of the fifth division of Temple wardens in the time of king David (1 Chron. xxvi, 3), B.C. 1014.

3. (Sept. *Ἀηλάμ* v. r. *Αἰλαμ*, Vulg. *Elam*.) A chief man of the tribe of Benjamin, one of the sons of Shashak, resident at Jerusalem at the captivity or on the return (1 Chron. viii, 24), B.C. 536 or ante.

4. (Sept. *Αἰλάμ*, *Ἠλάμ*, Vulg. *Elam*.) "Children of Elam," *Bene-Elam*, to the number of 1254, returned with Zerubbabel from Babylon (Ezra ii, 7; Neh. vii, 12; 1 Esdr. v, 12), and a further detachment of 71 men with Ezra in the second caravan (Ezra viii, 7; 1 Esdr. viii, 33). It was one of this family, Shechani-ah, son of Jehiel, who encouraged Ezra in his efforts against the indiscriminate marriages of the people (Ezra x, 2, text *בְּבָנָיו*, i. e. *בְּבָנָיו*, Olam), and six of the Bene-Elam accordingly put away their foreign wives (Ezra x, 26). The lists of Ezra ii and Neh. vii contain apparently an irregular mixture of the names of places and of persons. In the former, ver. 21-34, with one or two exceptions, are names of places; 3-19, on the other hand, are not known as names of places,

and are probably of persons. No such place as Elam is mentioned as in Palestine, either in the Bible or in the *Onomasticon* of Eusebius, nor has since been discovered as existing in the country, although Schwarz endeavors (*Palest.* p. 143) to give the word a local reference to the grave of a Samaritan priest Eli, at a village named by him as *Charim ben-Elim*, on the bay, 8 miles N.N.E. of Jaffa. See HARIM. Most interpreters have therefore concluded that it was a person. B.C. ante 536. It is possible, however, that this and the following name have been borrowed from No. 1, perhaps as designating Jews who resided in that region of the Babylonian dominions during the captivity.

5. In the same lists is a second Elam, whose sons, to the same number as in the former case, returned with Zerubbabel (Ezra ii, 31; Neh. vii, 34), and which, for the sake of distinction, is called "the other Elam" (*הַלְאָמִים הַשֵּׁנִי*; Sept. *Ἠλαράμ*, *Ἠλαμαάμ*, Vulg. *Elam alter*). The coincidence of the numbers is curious, and also suspicious, as arguing an accidental repetition of the foregoing name. B.C. ante 536.

6. (Sept. *Αἰλάμ*, Vulg. *Elam*.) One of the sacerdotal or Levitical singers who accompanied Nehemiah at the dedication of the new wall of Jerusalem (Neh. xii, 42). B.C. 446.

7. (Sept. *Ἠλάμ*, Vulg. *Elam*.) One of the chiefs of the people who signed the covenant with Nehemiah (Neh. x, 14), B.C. 410.

**E'lamite** (Chald. *Elemay'*, *אֵלַמַּי*, in the plural *אֵלַמַּיִם*; Gr. *Ἐλαμίται*, Strabo, Ptolemy; or *Ἐλαμίται*, Acts ii, 9; Vulg. *Elamite*). This word is found in the O. T. only in Ezra iv, 9, and is omitted in that place by the Sept. translators, who probably regarded it as a gloss upon "Susanchites," which had occurred only a little before. The Elamites were the original inhabitants of the country called Elam; they were descendants of Shem, and drew their name from an actual man, Elam (Gen. x, 22). It has been observed in the preceding article that the Elamites yielded before a Cossean or Cushite invasion. See ELAM. They appear to have been driven in part to the mountains, where Strabo places them (xi, 13, § 6; xvi, 1, § 17), in part to the coast, where they are located by Ptolemy (vi, 3). Little is known of their manners and customs, or of their ethnic character. (See Müller, in the *Journal Asiatique*, 1839, vii, 299; Wahl, *Asien*, p. 603; Mannert, *Geogr.* V, ii, 158; comp. Plutarch, *17. Pomp.* 36; Justin. xxxvi, 1; Tacit. *Annal.* vi, 44). Strabo says they were skilful archers (xv, 3, § 10; comp. Xenoph. *Cyrop.* ii, 1, 16; Livy, xxxv, 48; Appian, *Syr.* 32), and with this agree the notices both of Isaiah and Jeremiah, the latter of whom speaks of "the bow of Elam" (xlix, 35), while the former says that "Elam bare the quiver" (xxii, 6). Isaiah also adds in this place that they fought both on horseback and from chariots. They appear to have retained their nationality with peculiar tenacity, for it is plain from the mention of them on the day of Pentecost (Acts ii, 9) that they still at that time kept their own language, and the distinct notice of them by Ptolemy more than a century later seems to show that they were not even then merged in the Cosseans. (See Hassel, *Erdbeschr.* v. *Asien*, ii, 769 sq.; Assemani, *Bibl. Or.* III, ii, 419, 744; comp. Herod. i, 102; Arrian, *Ind.* 42; Pliny, vi, 31; Strabo, xv, 728.) In Judith i, 6, the name is given in the Greek form as ELYMÆANS, and in 1 Macc. vi, 1, mention is made of a city ELYMAIS (q. v.).—Smith, s. v.

**El'asah** [some *Ela'sah*] (Heb. *Elasah'*, *אֵלְאָשָׁה*, whom *God made*; Vulg. *Elasa*), the name of four men (variously Anglicized in the A. V.). See also ELEASA.

1. (Sept. *Ἐλεασά*.) The son of Helez, and father of Sisamai; one of the descendants of Judah, of the family of Hezron (1 Chron. ii, 39, A. V. "Elesah"). B.C. post 1046.

2. (Sept. Ἐλεασά v. r. Ἐλασά, A. V. "Elcasah.") A son of Rapha or Repharah, and father of Azel; descendant of king Saul through Jonathan and Meribbaal or Mephibosheth (1 Chron. viii, 37; ix, 43). B. C. considerably ante 588.

3. (Sept. Ἐλασάφ v. r. Ἐλασάφ, A. V. "Elasah.") The son of Shaphan; one of the two men who were sent on a mission by king Zedekiah to Nebuchadnezzar at Babylon after the first deportation from Jerusalem, and who at the same time took charge of the letter of Jeremiah the prophet to the captives in Babylon (Jer. xxix, 3). B. C. 594.

4. (Sept. Ἐλασά, A. V. "Elasah.") One of the Bene-Pashur, a priest, who renounced the Gentile wife whom he had married after the return from Babylon (Ezra x, 22). B. C. 458.

**Elath** (Heb. *Eylath'*, עֵילָת, *grove*, perhaps of TEREBINTH-trees; occurs in this form Deut. ii, 8; 2 Kings xiv, 22; xvi, 6; also in the plur. form עֵילָתִים, "EYLATH" [q. v.], 1 Kings ix, 26; 2 Chron. viii, 17; xxvi, 2; "Elath," 2 Kings xvi, 6; in the Sept. Ἐλάθ and Ἐλάθ; in Joseph. [*Ant.* viii, 6, 4] Ἐλάθ; in Jerome, *Ailath* [who says that in his day it was called *Ailath*, to which its appellation in Arabic writers corresponds]; by the Greeks and Romans, *Elana* or *Elana*, Ἐλάνα [Ptol. v, 17, [Ἰλανα [Strabo, xvi, 768; comp. Pliny, v, 12; vi, 32]; in Arabic authors *Ailah*], a city of Idumæa, having a port on the eastern arm or gulf of the Red Sea, which thence received the name of Sinus Elaniticus (Gulf of Akabah). According to Eusebius (*Onomast.* s. v. Ἐλάθ), it was ten miles east from Petra. It must have been situated at the extremity of the valley of El-Ghór, which runs at the bottom of two parallel ranges of hills, north and south, through Arabia Petraea, from the Dead Sea to the northern parts of the Elanitic Gulf; but on which side of the valley it lay has been matter of dispute (see McCulloch's *Geog. Dict.* s. v. Akabah). In the geography of Arabia it forms the extreme northern limit of the province of the Hijoz (El-Makrizi, *Khitat*; and *Marásid*, s. v.; comp. ARABIA), and is connected with some points of the history of the country. According to several native writers the district of Ailah was in very ancient times peopled by the Sameyda', said to be a tribe of the Amalekites (the first Amalek). The town itself, however, is stated to have received its name from Eylah, daughter of Midian (El-Makrizi's *Khitat*, s. v.; Caussin's *Essai sur l'Histoire des Arabes*, i, 23). The Amalekites, if we may credit the writings of Arabic historians, passed in the earliest times from the neighborhood of the Persian Gulf through the peninsula (spreading over the greater part of it), and thence finally passed into Arabia Petraea. Future researches may trace in these fragments of primeval tradition the origin of the Phœnicians. Herodotus seems to strengthen such a supposition when he says that the latter people came from the Erythrean Sea. Were the Phœnicians a mixed Cushite settlement from the Persian Gulf, who carried with them the known maritime characteristics of the peoples of that stock, developed in the great commerce of Tyre, and in that of the Persian Gulf, and, as a link between their extreme eastern and western settlements, in the fleets that sailed from Ezion-geber and Elath, and from the southern ports of the Yemen? See ARABIA; CAPHTOR; MIZRAIM. It should be observed, however, that Tyrian sailors manned the fleets of Solomon and of Jehoshaphat (see *Jour. Sac. Lit.* Oct. 1851, p. 153, n.).—Smith, s. v.

The first time that Elath is mentioned in Scripture is in Deut. ii, 8, in speaking of the journey of the Israelites towards the Promised Land: "When we passed by from our brethren the children of Esau, which dwelt in Seir, through the way of the plain from Elath, and from Ezion-geber." These two places are mentioned together again in 1 Kings ix, 26 (comp. 2 Chron. viii,

17), in such a manner as to show that Elath was more ancient than Ezion-geber, and was of so much repute as to be used for indicating the locality of other places; the passage also fixes the spot where Elath itself was to be found: "and king Solomon made a navy of ships in Ezion-geber, which is beside Elath, on the shore (Num. xxxiii, 35) of the Red Sea, in the land of Edom." See EZION-GEBER. The use which David made of the vicinity of Elath shows that the country was at that time in his possession. Accordingly, in 2 Sam. viii, 14, we learn that he had previously made himself master of Idumæa, and garrisoned its strong-holds with his own troops. Under Joram, however (2 Kings viii, 20), the Idumæans revolted from Judah, and elected a king over themselves. Joram thereupon assembled his forces, "and all the chariots with him," and, falling on the Idumæans by night, succeeded in defeating and scattering their army. The Hebrews, nevertheless, could not prevail, but "Edom revolted from under the hand of Judah unto this day;" thus exemplifying the striking language employed (Gen. xxvii, 40) by Isaac: "By thy sword shalt thou live, and shalt serve thy brother; and it shall come to pass, when thou shalt have the dominion, that thou shalt break his yoke from off thy neck." From 2 Kings xiv, 22, however, it appears that Uzziah recovered Elath, and, having so repaired and adorned the city as to be said to have built, that is, rebuilt it, he made it a part of his dominions. This connection was not of long continuance; for in chap. xvi, ver. 6 of the same book, we find the Syrian king Rezin interposing, who captured Elath, drove out the Jews, and annexed the place to his Syrian kingdom, and "the Syrians came to Elath, and dwelt there unto this day." At a later period it fell under the power of the Romans, and was for a time guarded by the tenth legion, forming part of *Palestina Tertia* (Jerome, *Onomast.* s. v. *Ailah*; Strabo, xxi, 4, 4; Reland, *Palest.* p. 556). It subsequently became the residence of a Christian bishop. Bishops of Elath were at the Council of Chalcedon (A. D. 451) and at that of Constantinople (A. D. 536). At the Council of Chalcedon, Beryllus thus wrote his designation as "Bishop of Ela of Third Palestine" (Ἐλάθ τῆς Παλαιστίνης τρίτης). In the days of its prosperity it was much distinguished for commerce, which continued to flourish under the auspices of Christianity (Cellarii *Notit.* ii. 686 sq.). In the 6th century it is spoken of by Procopius as being inhabited by Jews subject to the Roman dominion (*De Bell. Pers.* i, 19). In A. D. 630 the Christian communities of Arabia Petraea found it expedient to submit to Mohammed, when John, the Christian governor of Ailah, became bound to pay an annual tribute of 300 gold pieces (Abulfeda, *Ann.* i, 171). Henceforward, till the present century, Ailah lay in the darkness of Islamism. It is merely mentioned by the supposed Ibn-Haukal (Engl. translation of D'Arvieux, *Append.* p. 353), perhaps in the 11th century; and, after the middle of the 12th, Edrisi describes it as a small town frequented by the Arabs, who were now its masters, and forming an important point in the route between Cairo and Medina. In A. D. 1116, king Baldwin of Jerusalem took possession of it. Again it was wrested from the hands of the Christians by Saladin I, A. D. 1167, and never again fully recovered by them, although the reckless Rainald of Chatillon, in A. D. 1182, seized, and for a time held, the town. In Abulfeda's day, and before A. D. 1500, it was already deserted. He says, "In our day it is a fortress, to which a governor is sent from Egypt. It had a small castle in the sea, but this is now abandoned, and the governor removed to the fortress on the shore." Such as Ailah was in the days of Abulfeda, is *Akahab* now. Mounds of rubbish alone mark the site of the town, while a fortress, occupied by a governor and a small garrison under the pasha of Egypt, serves to keep the neighboring tribes of the desert in awe, and to minister to the wants and protection of the annual Egyptian Haj,

or pilgrim caravan. Under the Roman rule it lost its former importance with the transference of its trade to other ports, such as Berenice, Myos Hormos, and Arsinoë; but in Mohammedan times it again became a place of some note. It is now quite insignificant. It lies on the route of the Egyptian pilgrim-caravan, and the mountain-road or 'Akabah named after it was improved or reconstructed by Ahmad Ibn-Tulun, who ruled Egypt from A. D. cir. 840 to 848. This place has always been an important station upon the route of the Egyptian Haj. Such is the importance of this caravan of pilgrims from Cairo to Mecca, both in a religious and political point of view, that the rulers of Egypt from the earliest period have given it convoy and protection. For this purpose a line of fortresses similar to that of Akabah has been established at intervals along the route, with wells of water and supplies of provisions (Robinson's *Biblical Researches*, i, 250). The first Frank who visited this place in modern times was Ruppell, in 1822 (*Reise*, p. 248 sq.). Laborde (*Journey through Arabia Petraea*, London, 1836) was well received by the garrison and inhabitants of the castle of Akabah, of which he has given a view (i, 116). The fortress, he states, is built on a regular plan, and is in a pretty good condition, though within several good habitations have been suffered to fall to decay. It has only two guns fit for service (Bartlett, *Forty Days in the Desert*, p. 99 sq.). The ancient name of the place is indicative of groves in the vicinity, and Strabo speaks of its palm-woods (xvi, 776), which appear still to subsist (Niebuhr, *Beschr.* p. 400; Schubert, ii, 379).—Kitto, s. v.

**El-Beth'el** (Heb. *El Beyth-El*, **בֵּית אֱלֹהִים**, *God of Bethel*; Sept. simply *Baθ̄n̄n̄*, Vulg. *Domus Dei*), the name given by Jacob to the altar erected by him as a sanctuary (Gen. xxxv, 7), on the spot where he had formerly experienced the vision of the mystic ladder (chap. xxxi, 13; xxviii, 18). See **BETHEL**.

**Elcesaites.** See **ELKESAITES**.

**El'cia** (Ἐλκία), one of the forefathers of Judith, and therefore belonging to the tribe of Simeon (Jud. viii, 1); what Hebrew name the word represents is doubtful. Hilkiash is probably Chelkias, two steps back in the genealogy. The Syriac version has *Elkana*. In the Vulgate the names are hopelessly altered.—Smith, s. v.

**El'daäh** [some *Eld'ah*] (Heb. *Eldah'ah*, **אֵלְדָּאָה**, whom *God called*; Sept. Ἐλδαγιά, Ἐλδαά; Josephus Ἐλδαῖ, *Ant.* i, 15, 1), the last-named of the five sons of Midian, Abraham's son by Keturah (Gen. xxv, 4; 1 Chron. i, 33). B. C. post 2063.

**El'dad** (Heb. *Eldad*, **אֵלְדָּד**, whom *God has loved*; comp. *Theophilus*; Sept. Ἐλδαδ), one of the seventy elders who had been appointed under Moses to assist in the administration of justice among the people. B. C. 1658. He is mentioned along with Medad, another elder, as having on a particular occasion received the gift of prophecy, which came upon them in the camp, while Moses and the rest of the elders were assembled around the door of the tabernacle. The spirit of prophecy was upon them all; and the simple peculiarity in the case of Eldad and Medad was that they did not lose their share in the gift, though they abode in the camp, but they prophesied there. It appeared, however, an irregularity to Joshua, the son of Nun, and seems to have suggested the idea that they were using the gift with a view to their own aggrandizement. He therefore entreated Moses to forbid them. But Moses, with characteristic magnanimity, replied, "Enviest thou for my sake? Would God that all the Lord's people were prophets, and that the Lord would put his spirit upon them!" (Num. xi, 24-29).—Fairbairn, s. v. The great fact of the passage is the more general distribution of the spirit of prophecy, which had hitherto been concentrated in Moses; and

the implied sanction of a tendency to separate the exercise of this gift from the service of the tabernacle, and to make it more generally available for the enlightenment and instruction of the Israelites, a tendency which afterwards led to the establishment of "schools of the prophets." The circumstance is in strict accordance with the Jewish tradition that all prophetic inspiration emanated originally from Moses, and was transmitted from him by a legitimate succession down to the time of the captivity. The *mode* of prophecy in the case of Eldad and Medad was probably the extempore production of hymns, chanted forth to the people (Hammond); comp. the case of Saul, 1 Sam. x, 11. From Num. xi, 25, it appears that the gift was not merely intermittent, but a continuous energy, though only occasionally developed in action.—Smith, s. v. See **PROPHECY**.

**Elder** (properly **זֶנֶן**, *zaken'*; *πρεσβύτερος*, a term which is plainly the origin of our word "priest;" *Saxon prooster* and *preste*, then *priest*, High and Low Dutch *priester*, French *prestre* and *prêtre*, Ital. *prete*, Span. *presbytero*), literally, one of the older men; and because, in ancient times, older persons would naturally be selected to hold public offices, out of regard to their presumed superiority in knowledge and experience, the term came to be used as the designation for the office itself, borne by an individual of whatever age. (See Gesenius, *Heb. Lex.* s. v.) Such is the origin of the words *γερονσία* (a council of elders), *senatus*, *alderman*, etc.

1. *In the O. T.*—The term elder was one of extensive use, as an official title, among the Hebrews and the surrounding nations. It applied to various offices; Eliezer, for instance, is described as the "old man of the house," i. e. the *major-domo* (Gen. xxiv, 2); the officers of Pharaoh's household (Gen. i, 7), and, at a later period, David's head servants (2 Sam. xii, 17) were so termed; while in Ezek. xxvii, 9 the "old men of Gebal" are the *master-workmen*. But the term "elder" appears to be also expressive of respect and reverence in general, as *signore*, *seigneur*, *senior*, etc. The word occurs in this sense in Gen. i, 7, "Joseph went up to bury his father, and with him went up all the servants of Pharaoh, the elders of his house, and all the elders of the land of Egypt" (Sept. *πρεσβύτεροι*, Vulg. *senes*). These elders of Egypt were probably the various state officers. As betokening a political office, it applied not only to the Hebrews and Egyptians, but also to the Moabites and Midianites (Num. xxii, 7). The elders of Israel, of whom such frequent mention is made, may have been, in early times, the lineal descendants of the patriarchs (Exod. xii, 21). To the elders Moses was directed to open his commission (Exod. iii, 16). They accompanied Moses in his first interview with Pharaoh, as the representatives of the Hebrew nation (ver. 18); through them Moses issued his communications and commands to the whole people (Exod. xix, 7; Deut. xxxi, 9); they were his immediate attendants in all great transactions in the wilderness (Exod. xvii, 5); seventy of their number were selected to attend Moses, Aaron, Nadab, and Abihu, at the giving of the law (Exod. xxiv, 1), on which occasion they are called the *nobles* (**נְדָבִים**, lit. *deep-rooted*, i. e. of high-born stock; Sept. *ἐπιλεκτοι*) of the children of Israel, who did eat and drink before God, in ratification of the covenant, as representatives of the nation (ver. 11). In Num. xi, 16, 17, we meet with the appointment of seventy elders to bear the burden of the people along with Moses; these were selected by Moses out of the whole number of the elders, and are described as being already officers over the children of Israel. It is the opinion of Michaelis that this council chosen to assist Moses should not be confounded with the Sanhedrim, which, he thinks, was not instituted till after the return from the Babylonish captivity. See **SANHEDRIM**. He ob

serves that these seventy elders were not chosen to be *judges* of the people, who had already more than 60,000 judges. He also argues that the election of seventy additional *judges* would have done but little towards suppressing the rebellion which led Moses to adopt this proceeding; but that it seems more likely to have been his intention to form a supreme senate to take a share in the government, consisting of the most respectable persons, either for family or merit, which would materially support his power and influence among the people in general; would unite large and powerful families, and give an air of aristocracy to his government, which had hitherto been deemed too monarchical. He further infers that this council was not permanent, not being once alluded to from the death of Moses till the Babylonish captivity; that Moses did not fill up the vacancies occasioned by deaths, and that it ceased altogether in the wilderness. Wherever a patriarchal system is in force, the office of the *elder* will be found as the keystone of the social and political fabric; it is so at the present day among the Arabs, where the sheik (=the *old man*) is the highest authority in the tribe. That the title originally had reference to age is obvious; and age was naturally a concomitant of the office at all periods (Josh. xxiv, 31; 1 Kings xii, 6), even when the term had acquired its secondary sense. At what period the transition occurred, in other words, *when* the word *elder* acquired an official signification, it is impossible to say. The earliest notice of the *elders* acting in concert as a political body is at the time of the Exodus. We need not assume that the order was then called into existence, but rather that Moses availed himself of an institution already existing and recognised by his countrymen, and that, in short, "the elders of Israel" (Exod. iii, 16; iv, 29) had been the *senate* (Sept. *γεροντία*) of the people ever since they had become a people. The position which the elders held in the Mosaic constitution, and more particularly in relation to the people, is described under CONGREGATION; they were the representatives of the people, so much so that *elders* and *people* are occasionally used as equivalent terms (comp. Josh. xxiv, 1 with 2, 19, 21; 1 Sam. viii, 4 with 7, 10, 19). Their authority was undefined, and extended to all matters concerning the public weal; nor did the people question the validity of their acts, even when they disapproved of them (Josh. ix, 18). When the tribes became settled the elders were distinguished by different titles, according as they were acting as national representatives ("elders of Israel," 1 Sam. iv, 3; 1 Kings viii, 1, 3; "of the land," 1 Kings xx, 7; "of Judah," 2 Kings xxiii, 1; Ezek. viii, 1), as district governors over the several tribes (Deut. xxxi, 28; 2 Sam. xix, 11), or as local magistrates in the provincial towns, appointed in conformity with Deut. xvi, 18, whose duty it was to sit in the gate and administer justice (Deut. xix, 12; xxi, 3 sq.; xxii, 15; Ruth iv, 9, 11; 1 Kings xxi, 8; Judg. x, 6); their number and influence may be inferred from 1 Sam. xxx, 26 sq. They retained their position under all the political changes which the Jews underwent: under the judges (Judg. ii, 7; viii, 14; xi, 5; 1 Sam. iv, 3; viii, 4); in the time of Samuel (1 Sam. xvi, 4); under Saul (1 Sam. xxx, 26), David (1 Chron. xxi, 16), and the later kings (2 Sam. xvii, 4; 1 Kings xii, 6; xx, 8; xxi, 11); during the captivity (Jer. xxix, 1; Ezek. viii, 1; xiv, 1; xx, 1); subsequently to the return (Ezra v, 5; vi, 7, 14; x, 8, 14); under the Maccabees, when they were described sometimes as the senate (*γεροντία*; 1 Macc. xii, 6; 2 Macc. i, 10; iv, 41; xi, 27; Josephus, *Ant.* xii, 3, 3), sometimes by their ordinary title (1 Macc. vii, 33; xi, 23; xii, 35); and, lastly, at the commencement of the Christian era, when they are noticed as a distinct body from the Sanhedrim, but connected with it as one of the classes whence its members were selected, and always acting in conjunction with it and the other dominant classes.

See COUNCIL. Thus they are associated sometimes with the chief priests (Matt. xxi, 23), sometimes with the chief priests and the scribes (Matt. xvi, 21), or the council (Matt. xxvi, 59), and always taking an active part in the management of public affairs. Luke describes the whole order by the collective term *πρεσβυτήριον*, i. e. eldership (Luke xxii, 66; Acts xxii, 5). Like the scribes, they obtained their seat in the Sanhedrim by election, or nomination from the executive authority.—Smith, s. v.; Kitto, s. v. See AGE.

II. *In the New Testament and in the Apostolical Church.*—In the article BISHOP (i, 818 sq.), the origin and functions of the eldership in the N. T. and in the early Church are treated at some length, especially with regard to the question of the original identity of *bishops* and *presbyters* (or elders). Referring our readers to that discussion, we add here the following points.

1. *Origin of the Office.*—No specific account of the origin of the eldership in the Christian Church is given in the N. T. "The demand for it arose, no doubt, very early; as, notwithstanding the wider diffusion of gifts not restricted to office, provision was to be made plainly for the regular and fixed instruction and conduct of the rapidly multiplying churches. The historical pattern for it was presented in the Jewish synagogue, namely, in the college or bench of elders (*πρεσβύτεροι*, Luke vii, 3; *ἀρχισυνάγωγοι*, Mark v, 22; Acts xiii, 15), who conducted the functions of public worship, prayer, reading, and exposition of the Scriptures. We meet Christian presbyters for the first time (Acts xi, 30) at Jerusalem, on the occasion of the collection sent from the Christians of Antioch for the relief of their brethren in Judaea. From thence the institution passed over not only to all the Jewish-Christian churches, but to those also which were planted among the Gentiles. From the example of the household of Stephanas at Corinth (1 Cor. xvi, 15) we see that the first converts (*the ἀπαρχαί*) ordinarily were chosen to this office, a fact expressly confirmed also by Clemens Romanus" (1 Cor. c. xlii). Schaff, in *Meth. Quart. Rev.* Oct. 1851; *Apostolic Church*, § 182. "The creation of the office of elder is nowhere recorded in the N. T., as in the case of deacons and apostles, because the latter offices were created to meet new and special emergencies, while the former was transmitted from the earliest times. In other words, the office of elder was the only permanent essential office of the Church under either dispensation" (*Princeton Review*, xix, 61). The Jewish eldership, according to this view, was tacitly transferred from the Old Dispensation to the New, without express or formal institution, except in Gentile churches, where no such office had a previous existence (comp. Acts xi, 30; xiv, 23).

2. *Functions of the Elders.*—The "elders" of the N. T. Church were plainly the "pastors" (Eph. iv, 11), "bishops, or overseers" (Acts xx, 28, etc.); "leaders" and rulers" (Heb. xiii, 7; 1 Thess. v, 12, etc.) of the flock. But they were not only leaders and rulers, but also the "regular teachers" of the congregation, to whom pertained officially the exposition of the Scriptures, the preaching of the Gospel, and the administration of the sacraments. That this function was closely connected with the other is apparent, even from the conjunction of "pastors and teachers," Eph. iv, 11, where the terms, as we have already seen, denote the same persons. The same association of ruling and teaching occurs Heb. xiii, 7: "Remember them which have the rule over you (*ηγούμενοι*), who have spoken unto you the word of God (*οἰκτιρεῖς ἐλάλησαν ὑμῖν τὸν λόγον τοῦ Θεοῦ*), whose faith follow, considering the end of their conversation" (comp. ver. 17). Especially decisive, however, are the instructions of the pastoral epistles, where Paul, among the requirements for the presbyterate, in addition to a blameless character and a talent for business and government, expressly mentions also *ability to teach* (1 Tim. iii, 2): "A bishop must be blameless, the husband of one wife, vigilant, sober,

of good behavior, given to hospitality, *apt to teach* (ἑὺδασκῶν), etc.; so also Tit. i, 9, where it is required of a bishop that he shall "hold fast the faithful word as he hath been taught (ἀπτεχόμενον τοῦ κατὰ τὴν εὐαγγέλιον πιστοῦ λόγου), that he may be able by sound doctrine both to exhort and to convince the gainsayers" (Schaff, *l. c.*). It is not improbable (indeed, several passages in the New Test. seem clearly to favor the notion) that many persons were ordained elders in the apostolical age who were not, and could not be, separated from their temporal occupations. "At first, those who held office in the Church continued, in all probability, to exercise their former trades for a livelihood. The churches would scarcely be able (as they were mostly poor) to provide stipends at first for their pastors" (Neander). Nevertheless, men specially called and fitted for the work, and devoted to it, were *entitled* by the Christian law, as set forth by the apostles, to be supported by the people; but there was no distinction of rank, honor, or authority between those elders who had stipends and those who had none, unless, indeed, the latter, who, following Paul's example, "worked with their own hands" that they might not be chargeable to the churches, were held in greater honor for the time. The principle that full ministerial title may stand apart from stipend is fully recognised in modern times in the system of *local preachers* (q. v.) in the Methodist Episcopal Church (see Steward, *On Church Government*, Lond. 1853, p. 128).

"After the pattern of the synagogues, as well as of the political administration of cities, which from of old was vested in the hands of a senate or college of *decuriones*, every church had a number of presbyters. We meet them every where in the plural and as a corporation: at Jerusalem, Acts xi, 30; xv, 4, 6, 23; xxi, 18; at Ephesus, xx, 17, 28; at Philippi, Phil. i, 1; at the ordination of Timothy. 1 Tim. iv, 14, where mention is made of the laying on of the hands of the *presbytery*; and in the churches to which James wrote, James v. 14: 'Is any sick among you? let him call for the *presbyters* of the congregation, and let them pray over him,' etc. This is implied also by the notice (Acts xiv, 23) that Paul and Barnabas ordained elders for every church, several of them of course; and still more clearly by the direction given to Titus (Tit. i, 5) to ordain elders, that is, a presbytery of such officers, in every city of Crete. Some learned men, indeed, have imagined that the arrangement in the larger cities included several congregations, while, however, each of these had but one elder or bishop; that the principle of congregational polity thus from the beginning was neither democratic nor aristocratic, but monarchical. But this view is contradicted by the passages just quoted, in which the presbyters appear as a college, as well as by the associative tendency which entered into the very life of Christians from the beginning. The *household congregations* (ἐκκλησία κατ' οἶκον), which are often mentioned and greeted (Rom. xvi, 4, 5, 14, 15; 1 Cor. xvi, 19; Col. iv, 15; Philem. 2), indicate merely the fact that where the Christians had become very numerous they were accustomed to meet for edification at different places, and by no means exclude the idea of their organized union as a whole, or of their being governed by a common body of presbyters. Hence, accordingly, the apostolical epistles also are never addressed to a separate part, an *ecclesiola* in *ecclesia*, a conventicle, but always to the whole body of Christians at Rome, at Corinth, at Ephesus, at Philippi, at Thessalonica, etc., treating them in such case as a moral unity (comp. 1 Thess. i, 1; 2 Thess. i, 1; 1 Cor. i, 2; v. 1 sq.; 2 Cor. i, 1, 23; ii, 1 sq.; Col. iv, 16; Phil. i, 1, etc.). Whether a full parity reigned among these collegiate presbyters, or whether one, say the eldest, constantly presided over the rest, or whether, finally, one followed another in such presidency as *primus inter pares* by some certain rotation, cannot be decisively determined from the N. T. The

analogy of the Jewish synagogue leads here to no entirely sure result, since it is questionable whether a particular presidency belonged to its eldership as early as the time of Christ. Some sort of presidency, indeed, would seem to be almost indispensable for any well-ordered government and the regular transaction of business, and is thus beforehand probable in the case of these primitive Christian presbyteries, only the particular form of it we have no means to determine" (Schaff, *l. c.*).

III. *In the early Church (post-apostolic).*—Very soon after the apostolic age the episcopacy arose, first in the congregational form, afterwards in the diocesan episcopacy. See EPISCOPACY. Until the full development of the latter, elders or presbyters were the highest order of ministers. No trace of ruling elders, in the modern sense, is to be found in the early Church. There was a class of *seniores ecclesie* in the African Church, whom some writers have supposed to correspond to the ruling elder; but Bingham clearly shows the contrary. The name occurs in the writings of Augustine and Optatus. In the Diocletian persecution, when Mensurinus was compelled to leave his church, he committed the ornaments and utensils to such of the elders as he could trust, *fidelibus senioribus commendabit* (Optatus, lib. 1, p. 41). In the works of Optatus there is a tract called "the Purgation of Felix and Cæcilian," where is mention of these *seniores*. Augustine inscribes one of his epistles, *Clero, senioribus, et universæ plebi*: "To the clergy, the elders, and all the people" (Epist. 137). According to Bingham, some of these *seniores* were the civil *optimates* (magistrates, aldermen); the Council of Carthage (A. D. 403) speaks of *magistratus vel seniores locorum*. Others were called *seniores ecclesiastici*, and had care of the utensils, treasures, etc., of the church, and correspond to modern churchwardens or trustees (Bingham, *Orig. Eccles.* bk. ii, ch. xix, § 19; Hitchcock, in *Amer. Presb. Review*, April, 1868).

IV. *In the modern Church.*—1. In the Roman Catholic Church, the Church of England, and the Protestant Episcopal Church, the word "priest" is generally used instead of "presbyter" or "elder" to designate the second order of ministers (the three orders being bishops, priests, and deacons). See PRESBYTER; PRIEST.

2. In the Methodist Episcopal Church but two orders of ministers are recognised, viz. elders and deacons, the bishop being chosen as *primus inter pares*, or superintendent. See EPISCOPACY. For the election, ordination, duties, etc., of elders, see the *Discipline of the Methodist Episcopal Church*, pt. ii, ch. ii, § 15, and pt. iv, ch. vi, § 2. The *presiding elder* is appointed by the bishop, once in four years, to superintend a district. For the nature and functions of this office, see PRESIDING ELDER.

3. Among Congregationalists, the only Church officers now known are elders (or ministers) and deacons. Ruling elders were recognised in the Cambridge platform (q. v.), and their duties particularly pointed out; but neither the office itself nor the reasons by which it was supported were long approved. Ruling elders never were universal in Congregationalism, and the office was soon everywhere rejected (Upham, *Ratio Discipline*, 1844, § 38, 39; Dexter, *On Congregationalism*).

4. Among Presbyterian churches (i. e. all which adopt the Presbyterial form of government, whether designated by that name or not) there are generally two classes of elders, teaching and ruling elders. The teaching elders constitute the body of pastors; the ruling elders are laymen, who are set apart as assistants to the minister in the oversight and ruling of the flock. Together with the minister, they constitute "the Session," the lowest judicatory in the Church. See PRESBYTERIAN CHURCH. They cannot administer the sacraments, but aid at the Lord's Supper by distributing the elements to the communicants.

1. In Scotland, ruling elders constitute, with the ministers, the "Kirk Session." The *Form of Government* annexed to the *Confession of Faith* asserts that "as there were in the Jewish Church elders of the people, joined with the priests and Levites in the government of the Church, so Christ, who hath instituted government and governors ecclesiastical in the Church, besides the ministers of the Word, with gifts for government, and with commission to execute the same when called thereunto, who are to join with the minister in the government of the Church, which officers reformed churches commonly call *elders*." "These elders are chosen from among the members, and are usually persons of tried character. After their acceptance of office, the minister, in the presence of the congregation, sets them apart to their office by prayer, and sometimes by imposition of hands, and concludes the ceremony of *ordination* with exhorting both elders and people to discharge their respective duties. They have no right to teach or to dispense the sacraments. They generally discharge the office, which originally belonged to the deacons, of attending to the interests of the poor; but their peculiar function is expressed by the name "ruling elders;" for in every question of jurisdiction they are the spiritual court of which the minister is officially moderator, and in the presbytery—of which the pastors within the bounds are officially members—the elders sit as the representatives of the several sessions or consistories' (Hill's *Theology*, *Instit.*, pt. ii, sec. ii, p. 171). In the Established Church of Scotland elders are nominated by the Session, but in unestablished bodies they are freely chosen by the people" (Eadie, *Ecl. Cyclop.* s. v.). The *United Presbyterian Church* has the following rules on the subject: "1. The right of electing elders is vested solely in the members of the congregation who are in full communion. 2. No fixed number of elders is required, but two, along with the minister, are required to constitute a Session. 3. When the Session judge it expedient that an addition should be made to their number, the first step is to call a meeting of the congregation for the purpose of electing the required number. . . . 6. At the meeting for election a discourse is generally delivered suitable to the occasion. Full opportunity is first of all given to the members to propose candidates. The names are then read over, and, after prayer, the votes are taken, and the individuals having the greatest number of votes are declared to be duly elected. 7. After the election the call of the congregation is intimated to the elders elect, and on their acceptance the Session examines into their qualifications, and, if satisfied, orders an edict to be read in the church. 8. At the time mentioned in the edict, which must be read on two Sabbath days, the Session meets, the elders elect being present. After the Session is constituted, if no objections are brought forward, the day of ordination is fixed. If objections are made, the Session proceeds to inquire into and decide on them. 9. On the day of ordination, the moderator calls on the elders elect to stand forward, and puts to them the questions of the formula. Satisfactory answers being given, the minister proceeds to ordain or set them apart by prayer to the office of ruling elder. Immediately afterwards the right hand of fellowship is given to the persons thus ordained by the minister and by the other elders present, and the whole is followed by suitable exhortations" (Eadie, s. v.).

2. The *Form of Government* of the Presbyterian Church in the United States (bk. i, ch. v) contains the following: "Ruling elders are properly the representatives of the people, chosen by them for the purpose of exercising government and discipline, in conjunction with pastors or ministers. This office has been understood, by a great part of the Protestant reformed churches, to be designated in the holy Scriptures by the title of governments, and of those who rule well, but do not labor in the word and doctrine" (1 Cor. xii,

28). Chap. xiii gives the rules for the election and ordination of ruling elders. Each congregation elects "according to the mode most approved and in use in that congregation;" and the whole procedure is very similar to that of the U. P. Church recited above. The ordination is "by prayer" and the "right hand of fellowship," not by imposition of hands. The office is perpetual. The elders, with the pastor, constitute the *Session*; one elder from each church is a member of *Presbytery* and *Synod*; and one for every twenty-four ministers in each presbytery is sent to the *General Assembly*.

In the Reformed Church the elders are chosen for two years only, by the congregation or by the Consistory (*Constitution of the Ref. Dutch Church*, ch. i, art. iii). They are entitled to membership in Classis and Synod as delegates (*Constitution*, ch. ii, art. iii). There is a form given in the book for their ordination, without imposition of hands. So also in the new liturgy prepared for the German Reformed Church.

3. *Ruling Elders*.—The distinction between teaching and ruling elders originated with Calvin, and has diffused itself very widely among the churches which adopt the Presbyterian form of government; and the authority of the N. T. is claimed for it (see above, 2) in the Presbyterian "Form of Government" (bk. i, ch. v); in the Reformed Church *Form of Ordination* (Constit. p. 118); in the Lutheran Church *Formula of Government* (ch. iii, § 6). The Congregationalists of New England admitted this distinction for a while (see above), but soon abandoned it.

Calvin (*Institutes*, bk. iv, chap. iii, § 8) seeks a scriptural basis for lay eldership as follows: "Governors (1 Cor. xii, 2) I apprehend to have been persons of advanced years, selected from the people to unite with the bishops in giving admonition, and exercising discipline. No other interpretation can be given of 'He that ruleth, let him do it with diligence' (Rom. xii, 8). . . . Now that this was not the regulation of a single age experience itself demonstrates." This passage, however, occurs first in the 3d edition of the *Institutes*, 1543; it is not found in the editions of 1536 or 1539. The office of lay elders had existed before among the *Unitas Fratrum*, who were supposed to have borrowed it from the Waldenses; but these lay elders were only trustees or churchwardens. Calvin himself organized a lay eldership in Geneva, to be elected yearly, and seems afterwards to have sought a scriptural warrant for it. In so doing he formed a novel theory, viz. that of a *two-fold* eldership. "This cardinal assumption of a *dual presbyterate* was controverted by Blondel, himself a Presbyterian, in 1648, and again in 1696 by Vtringa, who, as Rothe says in his *Anfänge*, 'routed from the field this phantom of apostolic lay elders.' Even the Westminster Assembly, when, in 1643, it debated the question of Church government, as it did for nearly four weeks, was careful not to commit itself to Calvin's theory of lay presbyters, refused to call them ruling elders, and in its final report in 1644 spoke of them as 'other Church governors,' 'which reformed churches commonly call *elders*.' Calvin's theory has also been controverted by James P. Wilson in his *Primitive Government of Christian Churches* (1833), and by Thomas Smyth in his *Name, Nature, and Functions of Ruling Elders* (1845). The drift of critical opinion is now decidedly in this direction. It is beginning to be conceded, even among Presbyterians of the staunchest sort, that Calvin was mistaken in his interpretation of 1 Tim. v, 17; that two orders of presbyters are not there brought to view, but only one order, the difference referred to being simply that of service, and not of rank. And if this famous passage fails to justify the *dual presbyterate*, much less may we rely upon the *ὁ προϊστάμενος, ἐν σπουδῇ*, 'he that ruleth with diligence,' of Rom. xii, 8, or the *κυβερνήσεις*, 'governments,' of 1 Cor. xii, 28. In short, the *jure divino* theory of the lay eldership is

steadily losing ground. A better support is sought for it in the New-Testament recognition throughout of the right and propriety of lay participation in Church government; in the general right of the Church, as set forth by Hooker in his *Ecclesiastical Polity*, to govern itself by whatsoever forus it pleases, provided the great end of government be answered; and in the proved fitness and efficiency of our present Presbyterian polity, as compared either with prelacy on the one side, or Congregationalism on the other" (Hitcheck, in *Am. Presb. Rev.* 1868, p. 255). Dr. Thornwell (*Southern Presb. Review*, 1859; *Spirit of the XIXth Century*, Dec. 1843; reprinted in *Southern Presb. Rev.* July, 1867) sets forth a peculiar theory of the divine right of the ruling eldership, viz. that the ruling elder is the presbyter of the N. T., whose *only* function was to rule, while the *preachers* were generally selected from the class of elders. This view is also maintained by Breckinridge (*Knowledge of God, subjectively considered*, p. 629); and is refuted by Dr. Smyth, *Princeton Review*, vol. xxxiii (see also *Princeton Review*, xv, 313 sq.). Principal Campbell (*Theory of Ruling Elderships*, Edinb. and Lond. 1866) aims to show that "elder" in the N. T. always means pastor, and never means the modern "ruling elder" (see *Brit. and For. Evan. Review*, Jan. 1868, p. 222). He shows that the Westminster Assembly, after a long discussion, refused to sanction Calvin's view; but he seeks to find lay elders, under another name, in Rom. xii, 8; 1 Cor. xii, 28, etc., and also in early Church History. For a criticism of his view, and a luminous statement of the whole subject of lay eldership, with a conclusive proof that there is no trace of it in the N. T., see Dr. Hitcheck's article in the *Amer. Presb. Review*, April, 1868, p. 253 sq. See also an able critical and historical discussion of the subject in Dexter, *Congregationalism* (Boston, 1865), p. 120 sq. The scriptural right of lay elders is maintained in *The Divine Right of Church Government, with Dr. Owen's Argument in favor of Ruling Elders* (New York, 1844, 12mo); in Miller, *On Ruling Elders* (Presb. Board, 18mo). See also King, *Eldership in the Christian Church* (N. Y. 1851); Muhlenberg, *On the Office of Ruling Elders*; M'Kerrow, *Office of Ruling Elders* (London, 1846); Engles, *Duties of Ruling Elders* (Presb. Board); Smyth, *Name, Nature, and Functions of Ruling Elders* (N. Y. 1845, 12mo); Bingham, *Orig. Eccles.* bk. ii, ch. xx, § 19; Gieseler, *Church History*, vol. i, § 29; Neander, *Planting and Training*, bk. i, ch. ii; Davidson, *Ecc. Polity of N. T.*; Watson, *Theol. Institutes*, pt. iv, ch. i; Schaff, *Apostolic Church*, § 132, 133; Rothe, *Anfänge d. christlichen Kirche*, § 28, 29; Bilson, *Perpetual Government of Christ's Church*; Owen, *Works* (Edinb. 1851), xv, 504.

**El'eād** (Heb. *Elad*, עֵלֶאָד, whom *God has applauded*; Sept. 'Ελεάδ, Vulg. *Elad*), a descendant of Ephraim (1 Chron. vii, 21), but whether through Shuthelah (q. v.), or a son of the patriarch (the second Shuthelah being taken as a repetition of the first, and Elzer and Elead as his brothers), is not determined (see Bertheau, *Comment. zu Chronik*, p. 82). B. C. post 1856. Perhaps he is the same with ELADAI (q. v.) in the preceding verse, who appears to have survived, if identical with ERAN (Num. xxvi, 36).

**El'eā'leh** (Heb. *Elaleh*, עֵלֶאָלֵה, whither *God has ascended*, once *Elale'*, עֵלֶאָלֵה, Num. xxxii, 37; Sept. 'Ελεαλί), a place on the east of Jordan, in the pastoral country, taken possession of and rebuilt by the tribe of Reuben (Num. xxxii, 3, 37). We lose sight of it till the time of Isaiah and Jeremiah, by both of whom it is mentioned as a Moabitic town, and, as before, in close connection with Heshbon (Isa. xv, 4; xvi, 9; Jer. xlviii, 34). It apparently lay close to the border of Reuben and Gad (Josh. xiii, 26). On the decline of Jewish power, Elealeh, with the whole Mishor, fell into the hands of the Moabites, and is thus included in

the woes pronounced by Isaiah on Moab (xvi, 9): "I will water thee with my tears, O Heshbon and Elealeh; for the alarm is fallen upon thy summer fruits, and thy harvest." Elealeh was still a large village in the time of Eusebius and Jerome, one mile from Heshbon (*Onomast.* s. v. 'Ελεάλε, Eleale). The extensive ruins of the place are still to be seen, bearing very nearly their ancient name, *El-'Al'*, though with a modern signification, "the high," a little more than a mile north of Heshbon (Robinson, *Researches*, ii, 278). It stands on the summit of a rounded hill commanding a very extended view of the plain, and the whole of the southern Belka (Burekhardt, *Syria*, p. 265; Seetzen, 1854, p. 407). The whole surrounding plain is now desolate. The statements of all travellers who have visited it show how fully the prophetic curses had been executed (Irby and Mangles, 1st ed. p. 471; Ritter, *Pal. und Syr.* ii, 1172; G. Robinson's *Palest. und Syr.* ii, 180 sq.).—Kitto, s. v.; Smith, s. v.

**Ele'āsa** ('Ελεασά, Alex. MS. 'Αλασά; Vulg. *La'isa*), a place at which Judas Maccabæus encamped before the fatal battle with Bæchides, in which he lost his life (1 Macc. ix, 5). It was apparently not far from Azotus (comp. ver. 15). Josephus (*Ant.* xii, 11, 1) has *Bethætho* (Βηθεθώ), by which he elsewhere renders Bezeth. But this may be but a corrupt reading of Berzetha or Bethzetha, which is found in some MSS. for Berea in 1 Macc. ix, 4. Elsewhere (*War*, i, 1, 6), however, Josephus states that Judas lost his life in a battle with the generals of Antiochus Eupator at *Adasa* (q. v.), which is probably the correct reading here, since Adasa was where Judas had encamped on a former memorable occasion (1 Macc. vii, 40). It is singular that Bezeth should be mentioned in this connection also (see verse 19).—Smith, s. v.

**Ele'āsah** [many *Eleā'sah*], the name (in the A. V.) of two men (1 Chron. ii, 39; viii, 37; ix, 4), identical (in the Heb.) with that of two others (*Jer.* xxix, 3; *Ezra* x, 22), more properly Anglicized ELASAI (q. v.).

**Eleatic School**, the designation given to an early and brilliant sect of Greek philosophers. The name was bestowed in consequence of the residence or birth of the chiefs of the school at Elea or Velia, a town on the western coast of Italy, founded in 544 by the Phocæans, who abandoned their Ionian home rather than submit to the arms of Cyrus. The general characteristic of this type of speculation is the maintenance of a broad and irreconcilable distinction between the apparent and the intellectual universe—between transitory phenomena and eternal truth. It is thus contrasted with the earlier Ionic School, which assumed material principles as the origin of the world, and with the Pythagorean School, which assigned a mathematical basis for the creation. But it exhibited several points of contact with these more ancient doctrines, and hence both Empedocles and Democritus are sometimes enumerated among the Eleatics. In its wider acceptance, the Eleatic philosophy includes the pantheistic idealism of Xenophanes and Parmenides, and the sceptical materialism of Leucippus and Epicurus, embracing both extremes of metaphysical thought. It may thus be distributed into two main divisions:

I. The Eleatic School proper, which asserted a divine unity to be the origin and essence of all things, regarded multiplicity as only the manifestation of the incessant activity of this divine unity, considered all change as merely phenomenal, and all temporal facts as only the transitory and deceitful shows of things, believing that the only true existence was the one indelicate divine Essence, which underlay, determined, animated, and enclosed the whole sensible and intelligible order of the universe.

II. The Atomistic or Epicurean School, which confined attention to the earthly and material side of the problem, not denying the immaterial and spiritual, but

renouncing it as unattainable. Its position may be appreciated by comparing it with the modern schemes of Moleschott, Herbert Spencer, and Comte. It took note only of the temporal and perishable side of the universe, and established a foundation for its reasonings by supposing the eternity and indestructibility of the elementary constituents of matter.

*Esse immortali primordia corpore debent,  
Dissolvi quo quæ ne supremo tempore possint,  
Materies ut suppediet rebus reparandis.*

Thus the two branches of the school, or the two schools, starting from the same point, but pursuing divergent courses, arrived at exactly opposite conclusions. The Eleatics disregarded the sensible, the Epicureans the divine element; the former contemplated the imperishable, the latter the perishable aspects of the universe. But neither denied what they renounced. In the present article, the Eleatic School proper will alone be considered; for a notice of the other branch, reference is made to the title EPICUREAN PHILOSOPHY.

*History of the Eleatic Philosophy.*—The shadowy and impalpable character of the Eleatic doctrine renders it peculiarly difficult of determination, because it admits of many modifications, and of a great variety of expositions and limitations. Another difficulty arises from the fact that the sources of our knowledge are confined to a few metrical fragments of Xenophanes and Parmenides, to the statements of their adversaries, Plato and Aristotle, to Diogenes Laërtius, who is by no means a reliable witness, and to a few other relics of antiquity. There is, consequently, more uncertainty in regard to the tenets of this school, and to the interpretation given to them by their advocates, than in regard to any other of the Greek sects except the Pythagorean. After all the diligence of Fülleborn, Brandis, Karsten, Cousin, and other inquirers, there is much doubt whether we are ascribing to the Eleatic leaders positions which they deliberately held, or are imposing our own conjectural interpretations upon their doctrines. The general complexion of the school is, however, readily recognized.

The Eleatic School is rather united by a common principle than by agreement in the application of the principle (v. Aristotle, *Metaphysica*, i, v). Each distinguished philosopher of the sect creates his own scheme, and differs in procedure and in doctrine from the rest: hence it is impracticable to give any general exposition which will be true for its whole development, and it therefore becomes necessary to consider the peculiar modifications which it assumed in the hands of its successive teachers. The principal exponents of the Eleatic philosophy were Xenophanes, Parmenides, Zeno, and Melipus: the first of these was its founder. The period during which they flourished may be considered to extend over the century preceding the Peloponnesian War. But the chronological data are confused and uncertain.

*Xenophanes.*—Xenophanes of Colophon, in Asia Minor, an exile from his native land, migrated to Sicily, and may have resided in Elea, whose foundation he celebrated in verse. The dates are uncertain; but Cousin, in an elaborate essay, fixes his birth in the 40th Olympiad (B.C. 620-616), and he lived nearly a century. His philosophy was presented in a metrical form in his poem *On Nature*, of which fragments remain, though they are too broken and obscure to give any clear revelation of his tenets. His leading doctrines, as far as they can now be ascertained, appear to have constituted an indistinct, confused, and undeveloped idealism, remarkable at the period of their introduction, but requiring expansion and rectification before they could be arranged in any harmonious system. They are rather germs of thought than precise principles. They needed the acute logical intellect of Parmenides to give them consistency, as the Socratic speculations received definite form from Plato.

Parmenides probably deviated as far from the simple reveries of Xenophanes as Plato did from the practical maxims of Socrates. Xenophanes apparently adopted from Pythagoras, either directly or indirectly, the conviction that there must be an ultimate term of being, which was not the sensible universe, but the divine intelligence. But Pythagoras distinguished between God and nature; while Xenophanes, by exaggerating, confused this distinction, and resolved everything into a single divine essence. He denied all beginning, and therefore denied that anything could become what it had not always been. The doctrine *ex nihilo nihil fit* had with him a broader and deeper significance than it received from Epicurus, and his Roman expositor, Lucretius. If nothing commences and nothing becomes, then all things are eternal, and all things are one. The unity of the Godhead is thus asserted against polytheism; the individuality of the Deity against the dualism of conflicting forces. This antagonism to the current creed and prevalent speculations is developed in his attacks on Homer, Hesiod, and the whole Hellenic mythology, and by his earnest repudiation of all anthropomorphism. The substantial reality of the sensible world is necessarily rejected: God and the universe are identified, and a close approximation is made to Spinozism, though not without essential differences. The only reality is the divine intelligence, *σὺμπαντὰ τε εἶναι νοῖν καὶ φύσιν* (Diogenes Laërt. ix, xix). Everything cognizable by the human senses represents merely the accidents and shows of things. The sensible world is in an unceasing flux, but the divine essence is unchanging, unchangeable, unmoving, incapable of being moved, impassive, eternal, infinite, though possessing spherical dimensions, uncompounded, one (*αἰῶνον-ἄπειρον-πάν-ὄν-ἐν-μέτρον-ἀκίνητον-ἀνώγειον-ἀνάληγον-ἄνοσον-οὔτε ἑτεροούμενον εἶδει, οὔτε μινόμενον ἄλλῳ*, Aristot. *De Xenoph.* i: "unum esse omnia, neque id esse mutabile, et id esse Deum, neque natum unquam, et sempiternum, conglobata figura," Cicero, *Acad. Pr.* ii, xxxvii.). All change is but apparent—the restless play of colors on the surface of the immutable Existence—the incessant agitation of the waves on the bosom of the boundless and unalterable deep. There is no denial of the actuality of sensible facts and changes; there is a denial of their reality; they are shadows of the eternal, the mists and vapors that disguise and conceal the infinite One.

Unquestionably there are contradictions involved in this scheme, but the acceptance of antinomies is one of the most striking characteristics of the doctrines of Xenophanes. Naturally and necessarily he is brought to declare all things incomprehensible. Certain knowledge is thus impossible; all truth evaporates into opinion; scepticism is introduced—the scepticism which disregards the sensible as a delusion—the scepticism which excludes the eternal and the divine as unintelligible, or the scepticism which regards truth as unattainable. Thus the fundamental positions of the Eleatics prognosticate the age of the Sophists, and the theories of the Epicureans the Pyrrhonists and the Neo-Platonists.

It is not easy to discover the exact mode in which Xenophanes interpreted the order of the sensible creation. The remarkable feature in his cosmogony is that he anticipated geology, and made it the basis of some of his deductions. He thus contributed to science the commencement of that marvellous investigation, as Pythagoras contributed the theory of the geometrical harmonies of the universe, and divined the Copernican system. It may appear a remarkable incongruity that, after identifying God and the universe, and asserting the infinity, immutability, and eternity of the divine existence, Xenophanes and Parmenides should both have held the periodicity of the destruction of the world—the former by water, the latter by fire. This conclusion may have been suggested

to the earlier philosopher by the fossil remains which he recognised as aqueous deposits; but it also results from the dogma that all things are in a perpetual flux except the one eternal existence. The phenomena change recurrently, the One remains unchanged.

The Eleatic philosophy, in its first enunciation, was a crude idealism, extravagant in expression, if moderate in design. It was an anxious attempt to unite the operation of the omnipotence, omnipresence, and unity of the divine Intelligence with the recognition of his continual support and government of the creation. It was a protest alike against the vain abstractions, the materialistic tendencies, and the polytheistic creed of the Hellenic world; but in the endeavor to avoid popular and philosophical errors, it fell into the opposite extreme, and became in tendency, though not in purpose, distinctly pantheistic. It is impossible to explain the connection between the Creator and the creation—the distinction and the union of the intelligible and the sensible universe. To these heights the mind of man cannot soar. There is a truth of things sensible and a truth of things spiritual. Neither can be safely disregarded or misapprehended. The world of matter, with all its changes—the world of mind, with all its intuitions and reasonings, are as essentially real as the divine Being on whom they depend. But what the degree and mode of the dependence—when the dependence is interrupted and the laws imposed upon creation come into action—what is the hidden spring of natural forces, who shall define? If Xenophanes ran into errors as hazardous as those which he resisted, he is entitled to indulgent censure when it is considered that he was the first, or among the first, to introduce into Greek speculation worthy, if inadequate, conceptions of the grandeur and glory, and ineffable sovereignty of the divine Intelligence.

*Parmenides.*—The most illustrious name produced by the Eleatic School is that of Parmenides, the disciple, probably, of the founder of the sect. He was, by all accounts, a native of Elea (about 536 B.C.), and may have furnished, by his birthplace, the chief cause for the designation habitually bestowed upon this type of philosophy. He is frequently represented as the founder of dialectics, though this distinction is given by Aristotle to his pupil Zeno. He is, however, entitled to the credit of having given a more logical development to the views of his supposed teacher. So far as any authoritative exposition of his doctrines is concerned, we are in nearly as unfortunate a position as in the case of his predecessor. Insufficient fragments of his philosophical poem are preserved, but the rest of our knowledge must be obtained from the polemics of his adversaries, and from the statements of late compilers. He is commended by Aristotle for his perspicacity, and certainly gave greater coherence to the system espoused by him. In doing so he may have improved its form at the expense of its elevation. The divinity of the universal Existence disappears; for his point of departure is not the all-embracing Intelligence, but the abstract conception of being. In the main he agrees with Xenophanes, though he presents his tenets in a different order and connection. He states precisely the antagonism between the judgments of the senses and the conclusions of the reason, but he leaves it undeveloped. This has been regarded as his most important addition to the Eleatic metaphysics, though the principle is latent and presupposed in the whole speculations of the earlier philosopher. The fundamental position of his scheme is the contradiction of entity and nonentity. What is cannot be non-existent; what is non-existent is not. But everything that is, exists. Hence the universality and unity of existence must be admitted; and as nothing can spring from nothing, or proceed from non-existence to existence, all existence is eternal and unchangeable. There is nothing but being; therefore there is a *plenum* without any *vacuum*, and all being is

thought. Being is limited, but limited only by itself, and embodied in a perfect sphere. It is independent of time, space, and motion, all of which are denied to have any absolute existence. It is a state of everlasting repose. All changes and motions are apparent only; they are mere semblances. On this system being is indestructible—a dogma which has returned upon us unexpectedly in the philosophy of Herbert Spencer, and those with whom he coincides. There is no loss or cessation of existence, only variation of species, or change of apparent condition. Everything is determined by an indwelling necessity—a law which is involved in the existence by which it is revealed.

There is a singular accordance in the procedure of Parmenides and that of Des Cartes. The highest speculations of man roll, like the world on which he dwells, in one self-repeating orbit around the centre of attraction, deviating by slight deflections from the precisely-described track, but never departing so far as to destroy the uniformity of the course. Contrasted but connected schemes of thought succeed each other in each revolution like the seasons, and all "lead up the golden year."

In the physical application of his principles Parmenides recurred, like Xenophanes, to the procedure of the Ionic and Pythagorean schools, admitting antagonistic elements and forces, whose collisions and conjunctions produced the phenomena of the universe.

In all these speculations, one main cause of bewilderment and exaggeration is the oscitaney and impalpability of abstract terms. We are at the mercy of the *abracadabra* with which the enchantments are attempted. The perplexity and hallucination resulting from loose and elastic phrases was of course most perilous and least suspected before logical science arose, and before metaphysicians distinguished between rigorous thought and current expression.

Such defects exposed the doctrines of Parmenides to the attacks of acute contemporaries, and led to the recognition of the necessity of precision in statement, and to the consequent examination of the strict import of terms and of the validity of arguments. Hence they furnished to his disciple the occasion of inaugurating logic.

*Zeno.*—The relation of Zeno to Parmenides is the most certain fact connected with the filiation of the Eleatic School. He was pupil, friend, companion, and apologist. He was the only prominent member of the sect who was unquestionably a native of Elea. He defended and explained the dogmas of his preceptor; but the mode of his exposition led to notable changes in the career of philosophy, and prepared the way for the Socratic irony, the Platonic dialectics, the *Organon* of Aristotle, and other developments scarcely less important. He became the inventor of regular dialectic procedure, but his claims in this respect are limited by the remarkable declaration of the Stagyrrite in regard to his own labors, that his predecessors had only furnished examples of the forms of reasoning, while he had created the art (*Sophist. Elench.* sub fin.).

Increase of logical precision may give greater consistency and intelligibility to a philosophical system, but it renders its errors and dangers more prominent. This was the case with Zeno's presentation of the views of Parmenides. In urging the unreliability of the senses, and of inferences from observation, he arrayed experience against reason, and denied the validity of the former. He acknowledged, at the same time, the impossibility of recognising in things sensible the unity which was alone real existence, and thus invited scepticism and provoked the age of the Sophists.

*Melissus.*—There is no reason for believing that Melissus of Samos was directly or consciously connected with the Eleatic family, but he is habitually included in their number in consequence of substantial identity of doctrine. He confined his attention almost exclusively to the negative aspects of the system, endeavoring

oring to demonstrate the unreality of the phenomenal world, and the inconsistency of ascribing time, motion, change, divisibility or limitation to the solitary Existence. In representing being as infinite, he recoiled from the position of Parmenides and Zeno, and in some degree also from Xenophanes. He differed from them also in asserting that we can have no knowledge of the gods; and, according to Aristotle, inclined to materialism in his conception of the universal One. The Eleatic idealism was thus verging towards the form of doctrine propounded by Epicurus. It had completed its course, and had swung round nearly to the opposite extreme from the point where it started.

Whatever extravagances may be justly charged upon this celebrated school, its services to speculation and to the cause of truth should be neither denied nor underrated. It was surely a splendid and meritorious office, in the dawn of systematic philosophy, to awaken the minds of men to the recognition of the vain and evanescent character of all temporal things; to protest against the delusions of Polytheism; to direct attention to a supreme and omnipresent Intelligence, perfect in all attributes; to unveil the everlasting truth which was latent, but active, beneath all material and transitory forms; and to bring the reason of man into direct communion with the sovereign Power of the universe, in which he and all things else "lived, and moved, and had their being." In discharging this high function, the Eleatics promoted physical speculation, laid the foundations of logic, and perhaps of rhetoric, and introduced the argumentative dialogue which was employed with such consummate genius by Plato.

There is a most profound significance in the observation made by Aristotle in regard to Parmenides, that, "looking up to the whole heavens, he declared the one only Being to be God." This seems to have been the distinctive purport of the Eleatic School, though it was soon obscured, and ultimately discarded; but it propagated itself by a secret growth, and allied itself with other forms of speculation.

*Literature.*—Plato, *Sophista*, *Parmenides*; Aristotle, *De Xenophane, Zenone et Gorgia*; *Metaphysica*, lib. i, cap. v; Diogenes Laërtius; Bayle, *Dict. Cousin, *Nouveaux Essais Philosophiques* (Paris, 1828); Rosenberg, *De Eleaticis philo. primordiis* (Berl. 1829); Karsten, *Philosophorum Græc. veterum Reliquiæ* (Bruxelles, 1830); Mullach, *Aristotelis de Melisso lib. Disputationes* (Berol. 1846); Lewes, *Hist. of Philosophy* (Lond. 1867, i, 67 sq.); Ueberweg, *Gesch. d. Philosophie*, i, 47; and the various historians of Greek philosophy. (G. F. H.)

**Eleáz'zar** (Heb. *Elazar'*, אֵלְעָזָר, whom *God has helped*; Sept. and N. T. *Ἐλεάζαρ*; from the Græcized form *Ἐλεάζαρος* [found in Maccabees and Josephus], came by contraction the later name *Λάζαρος*, *Lazarus*), a common name among the Hebrews, being borne by at least six persons mentioned in Scripture, besides several in the Apocrypha and Josephus. See also **ELIEZER**.

1. The third son of Aaron, by Elishela, daughter of Aminadab, who was descended from Judah, through Pharez (Exod. vi, 23; xxviii, 1; for his descent, see Gen. xxxviii, 29; xlv, 12; Ruth i, 18, 20). He married a daughter of Putiel, who bore him Phinehas (Exod. vi, 25). After the death of Nadab and Abihu without children (Lev. x, 1; Num. iii, 4), Eleazar was appointed chief over the principal Levites, to have the oversight of those who had charge of the sanctuary

(Num. iii, 32). With his brother Ithamar he ministered as a priest during their father's lifetime, and immediately before the death of their father he was invested on Mount Hor with the sacred garments, as the successor of Aaron in the office of high-priest (Num. xx, 28). B. C. 1619. One of his first duties was, in conjunction with Moses, to superintend the census of the people (Num. xxvi, 3). He also assisted at the inauguration of Joshua, and at the division of spoil taken from the Midianites (Num. xxvii, 22; xxxi, 21). After the conquest of Canaan by Joshua, he took part in the distribution of the land (Josh. xiv, 1). The time of his death is not mentioned in Scripture; Josephus says it took place about the same time as Joshua's, 25 years after the death of Moses. He is said to have been buried in "the hill of Phinehas" his son (Josh. xxiv, 33), where Josephus says his tomb existed (*Ant.* v, 1, 29), or possibly a town called Gibeah-Phinehas (Gesenius, *Thesaur.* p. 260, b). The high-priesthood is said to have remained in the family of Eleazar until the time of Eli, a descendant of Ithmar, into whose family, for some reason unknown, it passed until it was restored to the family of Eleazar in the person of Zadok (1 Sam. ii, 27; 1 Chron. vi, 8; xxiv, 3; 1 Kings ii, 27; Josephus, *Ant.* viii, 1, 3).—Smith, s. v. See **HIGH-PRIEST**.

2. An inhabitant of Kirjath-jearim, on the "hill" (קִרְיַתְעֵזֶר), who was set apart by his fellow-townsmen to attend upon the ark, while it remained under the roof of his father Abinadab, after it had been returned to the Hebrews by the Philistines (1 Sam. vii, 1, 2). B. C. 1124. His service in this capacity was doubtless somewhat irregular, but justifiable under the circumstances; for there is no evidence that he belonged to the priestly order, although it is probable that he was of a Levitical family (who were not allowed to touch the ark, but had only the general charge of it, Num. iii, 31; iv, 15). He seems to have continued to exercise this sole care of the sacred deposit for the twenty years that intervened till the judgeship of Samuel (1 Sam. vii, 1), although the ark remained in the same place much longer (1 Chron. xiii, 7).

3. A Levite, son of Mahli, and grandson of Merari. B. C. cir. 1618. He is mentioned as having had only daughters, who were married by their "brethren" (i. e. their cousins) (1 Chron. xxiii, 21, 22; xxiv, 28).

4. The son of Dodo the Ahoite (אֲחֹיטָיִם), i. e. possibly a descendant of Ahoah, of the tribe of Benjamin (1 Chron. viii, 4); one of the three most eminent of David's thirty-seven distinguished heroes (1 Chron. xi, 12), who "fought till his hand was weary" in maintaining with David and the other two a daring stand against the Philistines after "the men of Israel had gone away." He was also one of the same three when they broke through the Philistine host to gratify David's longing for a drink of water from the well of his native Bethlehem (2 Sam. xxiii, 9, 10, 13). B. C. cir. 1046. See **DAVID**.

5. Son of Phinehas, and associated with the priests and Levites in taking charge of the sacred vessels restored to Jerusalem after the Exile (Ezra viii, 33). B. C. 459. He is probably the same with one of those who encompassed the walls of Jerusalem on their completion (Neh. xii, 42). B. C. 416. It does not appear from these passages, however, that he was necessarily a priest or even a Levite.

6. One of the descendants (or citizens) of Parosh, an Israelite (i. e. layman) who renounced the Egyptian wife whom he had married on returning from Babylon (Ezra x, 25). B. C. 410. Possibly he is the same with No. 5.

7. The first-named of the "principal men and learned" sent for by Ezra to accompany him to Jerusalem (1 Esd. viii, 43); evidently the **ELIEZER** (q. v.) of the Heb. text (Ezra viii, 16).

8. According to Josephus, the Jewish high-priest,

brother and successor of Simon the Just, and son of Onias I, whose correspondence with Ptolemy Philadelphus resulted in the Septuagint (q. v.) translation being made (*Ant.* xii, 2, 5 sq.; 4, 4). See HICUPRIEST.

9. Surnamed AVARAN (1 Macc. ii, 5, Ἀβαράν, or Ἀβάρ, and so Josephus, *Ant.* xii, 6, 1; 9, 4. In 1 Macc. vi, 43, the common reading ὁ Σαβαράν arises either from the insertion of C by mistake after O, or from a false division of Ἐλεύζαρος Ἀβαράν), the fourth son of Mattathias, who fell by a noble act of self-devotion in an engagement with Antiochus Eupator, being crushed to death by the fall of an elephant which he stabbed under the belly in the belief that it bore the king, B.C. 164 (1 Macc. vi, 43 sq.; Josephus, *Ant.* xii, 19, 4; *War.* i, 1, 5; Ambrose, *De offic. min.* 46). In a former battle with Nicanor, Eleazar was appointed by Judas to read "the holy book" before the attack, and the watchword in the fight—"the help of God"—was his own name (2 Macc. viii, 23).

The surname "Avaran" is probably connected with Arab. *hawar*, "to pierce an animal behind" (Michaelis, s. v.). This derivation seems far better than that of Rödiger (Ersch u. Gruber, s. v.) from Arab. *khawaran*, "an elephant-hide." In either case the title is derived from his exploit.

10. A distinguished scribe (Ἐλεάζαρος . . . τῶν πρωτεόντων γραμματίων, 2 Macc. vi, 18) of great age, who suffered martyrdom during the persecution of Antiochus Epiphanes (2 Macc. vi, 18-31). B.C. cir. 167. His death was marked by singular constancy and heroism, and seems to have produced considerable effect. Later traditions embellished the narrative by representing Eleazar as a priest (*De Macc.* 5), or even high-priest (Grimm, *ad Macc.* l. c.). He was also distinguished by the nobler title of "the proto-martyr of the old covenant," "the foundation of martyrdom" (Chrysost. *Hom. 3 in Macc.* init. Comp. Ambrose, *De Jacob.* ii, 10). For the general credibility of the history comp. Grimm, *Excurs. über 2 Macc.* vi, 18-viii, in *Exeg. Handb.*; also Ewald, *Gesch.* iv, 341, 532. See MACCABEES.

The name Eleazar in 3 Macc. vi appears to have been borrowed from this Antiochian martyr, as belonging to one weighed down by age and suffering, and yet "helped by God."—Smith, s. v.

11. The father of John, ambassador from Judas Maccabæus to Rome (1 Macc. viii, 18). B.C. 161.

12. Son of Eliud and father of Matthan, which last was the grandfather of Joseph, Christ's reputed father (Matt. i, 15). B.C. cir. 150.

13. A priest mentioned by Josephus as having charge of the Temple treasures, who sought to divert Crassus from pillaging the sanctuary by the largess of a beam of gold (*Ant.* xiv, 7, 1).

14. A son of Boëthus, whom Archelaus put into the high-priesthood in place of his brother Joazar, but soon displaced by Jesus the son of Sie (Josephus, *Ant.* xvii, 13, 1).

15. Son of Ananus (or Ananias), made high-priest in the room of Ishmael (son of Phabi) by Gratus, who deposed him after one year in favor of Simon son of Camithus (Josephus, *Ant.* xviii, 2, 2). While a youth, his boldness led him, as prefect of the Temple, to advise the Jews to refuse all foreign presents (Josephus, *War.* ii, 17, 2). He had been seized by the Sicarii as a hostage for ten prisoners of their own number (*Ant.* xx, 9, 3). He was one of the generals chosen by the Jews for Idumæa during the revolt under Cestius (*War.* ii, 20, 4).

16. Son of Dineus, a robber who for many years infested the mountains of Samaria, whose troop was at length broken up by Cumanus (Josephus, *Ant.* xx, 6, 1). He was himself captured by stratagem and sent to Rome by Felix (*ib.* 8, 5). He seems to be the same with the notorious rebel commander of Massada, at whose instigation the desperate garrison committed

suicide (*War.* vii, 8-9; comp. *Ant.* xx, 1, 1; *War.* ii, 13, 2).

17. A companion of Simon of Gerasa; sent by the latter to endeavor to persuade the garrison of Herodium to capitulate, but indignantly put to death by them (Josephus, *War.* iv, 9, 5).

18. A young Jew of great valor in the siege of Machærus by Bassus; captured by Rufus, but released by the Romans on condition of the surrender of the fortress (Josephus, *War.* vii, 6, 4).

19. A Jewish conjuror whom Josephus speaks of having seen exorcise demons in the presence of Vespasian and his officers by means of a magical ring (*Ant.* viii, 2, 5).

20. A son of Sameas, and born in Saab in Galilee, who performed a heroic act of valor and self-devotion during the final siege of Jerusalem (Josephus, *War.* iii, 7, 21).

21. Son of Simon, and ringleader of the Zealots in the final convulsions of the Jewish nation (Josephus, *War.* iv, 4, 1). He first appears as possessor of a large amount of plunder from the Romans under Cestius, which gave him control of public affairs (*ib.* ii, 20, 3). During the siege by Titus he held the Temple against the other factions (*ib.* v, 1, 2), being supplied by the sacred stores of provisions (*ib.* 3); but at length he formed a coalition with one of these opponents, John of Gischala, who occupied the remainder of the eastern part of the city (*ib.* v, 6, 1), having lost his vantage by a stratagem of the latter (*ib.* 3, 1). See the full account under JERUSALEM.

**Eleazar** (in Armenian *Eghlazar*), an Armenian patriarch, was born at Anthab, in Syria. In 1650, David, the patriarch of Constantinople, was ejected from his seat, and Eleazar elected in his place. He held this position only for two years, for in 1652 Philip, the patriarch of Etchmiadzin, and supreme head of the Church, arrived at Constantinople, expelled Eleazar, and consecrated John of Meghin, who, in turn, was soon ejected by the intrigues of Eleazar. The see then remained vacant for some time. Eleazar went to Jerusalem, in compliance with an invitation of the patriarch of that city, Azduadzadur, who wished his assistance in a quarrel with the Greeks, and promised to make him his successor. While residing in the convent of St. James, Eleazar discovered a treasure of 100,000 pieces of gold and 100,000 pieces of silver. After many troubles with Turkish officials and several imprisonments, he succeeded in obtaining possession of the convent. He built a church, called after the residence of the chief patriarch of the Armenians, Etchmiadzin, and caused himself to be elected independent patriarch of Jerusalem. He was expelled in 1664, and again, after having regained possession of the dignity, in 1668, when he was succeeded by a personal enemy, Martyr. The people, dissatisfied with this change, replaced Azduadzadur, after whose death Eleazar took forcible possession of the patriarchal see. He maintained himself in this position until 1680, when, after the death of James IV, the patriarch of Etchmiadzin, he assumed the title of patriarch of all the Armenians. A subsequent election confirmed him in this position, and in 1682 he took up his residence in Etchmiadzin. His chief aim as head of the Armenian Church was to put an end to internal dissensions. He died at Etchmiadzin in 1691.—Hoefler, *Nouv. Biog. Générale*, xv, 791. (A. J. S.)

**Eleazu'rus** (a strange rendering for Ἐλιάσζος, Alex. MS. Ἐλιάσζος, Vulg. *Ellisib*), one of the Levitical musicians who married a Gentile wife after the return from Babylon (1 Esdr. ix, 24); evidently the ELLASHIB (q. v.) of the Heb. text (Ezra x, 24).

**Elect**, a term sometimes applied in the ancient Church (1) to the whole body of baptized Christians, who were called ἅγιοι, ἐκλεκτοί, *saints, elect*; (2) to the highest class of catechumens *elected* to baptism;

(3) at other times to the newly baptized, as especially admitted to the full privileges of their profession, and sometimes called the elect.

Ascetics, who at one time were considered the most eminent of Christian professors, were called the *elect* of the *elect*.—Bingham, *Orig. Eccles.* bk. x, ch. ii, § 5. See CATECHUMENS.

**Electa** or **ELECTA** (Ἐλεκτή, Auth. Vers. "elect" lady). According to Grotius, Wetstein, and some other critics, this word is used as a proper name in the address of John's second epistle, Ὁ Ἡμεσιβύτερος Ἐλεκτῆς κυρία—"The Presbyter to the Lady Electa." This meaning is advocated by bishop Middleton, in his treatise on the *Doctrine of the Greek Article* (2d edit. Cambridge, 1828, p. 626-629). He adduces in support of it several epistolary inscriptions from Basil, in which the name precedes, and the rank or condition in life is subjoined, such as Ἐκσταθίου ἱατροῦ—Λευγίου σοφιστῆς—Βοσπορίου ἐπισκόπου—Μαγνημιανῶν κόμητι; none of these, however, are purely honorary titles. To meet the objection that the sister of the person addressed is also called Electa in verse 13, he suggests that the words τῆς Ἐλεκτῆς are a gloss, explanatory of σοῦ. But this is mere conjecture, unsupported by a single manuscript; and such a gloss, if occasioned (as bishop Middleton supposes) by the return to the singular number, would more naturally have been inserted after σε, in which position, however unnecessary, it would at least produce no ambiguity. Some writers, both ancient and modern, have adopted a mystical interpretation, though contrary to the *usus loquendi*, and to all apostolic usage, and suppose with Jerome that the term Ἐλεκτή referred to the Church in general, or with Cassiodorus, to some particular congregation. The last-named writer (born A. D. 470, died 562), in his *Complexiones in Epistolas*, etc. (London, 1722, p. 136), says, "Johannes—electe dominæ scribit ecclesiæ, filiisque ejus, quas sacro fonte generat." Clemens Alexandrinus, in a fragment of his *Adumbrationes*, attempts to combine the literal and the mystical meanings—"Scripta vero est ad quandam Babyloniam Electam nomine, significat autem electionem ecclesiæ sanctæ" (*Opera*, ed. Klotz, iv, p. 66). The Auth. Version translates the words in question "the elect lady," an interpretation approved by Castalio, Beza, Mill, Wolf, Le Clerc, and Macknight. Most modern critics, however—Schleuser and Breitschneider, in their lexicons; Bourger (1763), Vater (1824), Göschen, and Tischendorf (1841), in their editions of the N. Testament; Neander (*Planting of the Church*, ii, 71), De Wette (*Lehrbuch*, p. 339), and Lücke (*Commentary on the Epistles of St. John*, p. 314-320, Eng. transl.)—agree with the Syriac and Arabic versions in making Κυρία a proper name, and render the words "to the elect Cyria." (See Gruteri *Inscript.* p. 1127.) Lardner has given a copious account of critical opinions in his *History of the Apostles and Evangelists*, c. xx (*Works*, vi, 284-288).—Kitto, s. v. See also Heumann, *De Cyria* (Gotting, 1726); Rittmeier, *De Ἐλεκτῆ Κυρίᾳ* (Helmst. 1706); Knauer, *Ueber Ἐλεκτῆ Κυρία* (in the *Theol. Stud. u. Krit.* vi, 452 seq.); *Amer. Presb. Rev.*, Jan. 1867. See JOHN (THIRD EPISTLE OF).

**Election of Clergy.** How far the people had a right in the election of ministers in the early Church is a question that has been much disputed.

1. The account in Acts i, 15 of the choice of an apostle in place of Judas is cited as proof that even the apostles would not elect without the voice of the Church at Jerusalem. So in the choice of the deacons (Acts vi), the people "chose Stephen and set him before the apostles." On the other hand, the apostles themselves appointed elders, and St. Paul empowered Titus and Timothy to do the same (Acts xiv, 23; 2 Tim. ii, 1; Tit. i, 5); though some interpret the word *χειροτονῆν*, in these passages, as implying ordination only, and not excluding a previous election by the

people. Compare also Acts xv, 1; 1 Cor. v, 2; 2 Cor. viii, 19.

2. Clemens Romanus († 100) (*Epist. ad Corinth.* i, § 44) asserts that the apostles appointed bishops and deacons with the concurrence of the whole Church. It is clear, from Clement's statement, that in his time the Church had a share in the appointment of its ministers. Cyprian († 258) testifies to the share of the people in the election of bishops and elders, calling it matter of divine authority that "sacerdos plebe presente sub omnium oculis deligatur, et dignus atque idoneus publico judicio ac testimonio comprobetur" (*Epist.* 68). Bingham cites Lampridius (*Vit. Alex. Severi*, c. 45) as stating that the emperor (A. D. 222-235) gave the people a negative vote in the appointment of procurator, on the express ground that "what the Christians did in the election of their priests and ministers, should certainly be allowed the people in the appointment of governors of provinces."

3. Even after the establishment of the hierarchy, it seems to have been usual for the clergy or presbytery, or the sitting bishop or presbyter, to nominate a person to fill the vacant office, and then for the suffrages of the people—not merely testimonial, but really elective suffrages—to be taken. Bingham sums up the facts (*Orig. Eccles.* bk. iv, chap. ii) in substance as follows: 1. No bishop could be obtruded upon an orthodox people against their consent (in case a majority were heretics or schismatics, the case was otherwise provided for): when they agreed upon a deserving bishop, they were usually gratified in their choice. The emperor Valentinian III held it to be a crime in Hilary of Arles that "he ordained bishops against the consent and will of the people." 2. In many cases the voices of the people prevailed against the nominations of the bishops. 3. The modes of voting illustrate the power of the people in the elections; if they were unanimous for or against a man, they cried out "worthily" or "unworthily" (*ἄξιος, ἀνάξιος; dignus, indignus*). If they were divided, they expressed their dissent in accusations, or even in tumults. There are instances in which persons were brought by force to the bishop to be ordained, or were elected to the office by acclamation. It was decided by the fourth Council of Carthage, that as the bishop might not elect clerks without the advice of his clergy, so likewise he should secure the consent, co-operation, and testimony of the people. The popular elections, however, became scenes of great disorder and abuse. A remarkable passage from Chrysostom (*De Sacerd.*) has been frequently quoted, and applies more or less to such elections, not only in Constantinople, but also in Rome, Alexandria, Antioch, and other large cities. He says: "Go and witness the proceedings at our public festivals, in which, more especially, according to established rule, the election of ecclesiastical officers take place. You will find there complaints raised against the minister as numerous and as various in their character as the multitude of those who are the subject of Church government. For all those in whom the right of election is vested split into factions. It is evident that there is no good understanding, either among themselves, or with the appointed president, or with the presbytery. One supports one man, and one another; and the reason of this is, that they all neglect to look at that point which they ought to consider, namely, the intellectual and moral qualifications of the person to be elected. There are other points by which their choice is determined. One, for instance, says, 'It is necessary to elect a person who is of a good family.' Another would choose a wealthy person, because he would not require to be supported out of the revenues of the Church. A third votes for a person who has come over from some opposite party. A fourth uses his influence in favor of a relative or friend; while another lends his influence to one who has won upon him by fair speeches and plausible pretensions." In order to

set aside these abuses, some bishops claimed an exclusive right of appointing to spiritual offices. In this way they gave offence to the people. In the Latin and African churches an attempt was made to secure greater simplicity in elections by introducing *inter-ventors* or "visitors." This did not, however, long continue. Another plan was to vest the election in members of the lay aristocracy. But the determining who these should be was left to caprice or accident; and the result was, that the right of election was taken out of the hands of the people, and vested partly in the hands of the ruling powers, and partly with the clergy, who exercised their right, either by the bishops, their suffragans and vicars, or by collegiate meetings, and this very often without paying any regard to the Church or diocese immediately concerned. Sometimes the extraordinary mode of a bishop's designating his successor was adopted; or some one unconnected with the diocese, to whom a doubtful case had been referred for decision, was allowed to nominate. But in these cases the consent of the people was presupposed. Patronage has prevailed since the fifth century; but the complete development of this system was a work of the 8th and 9th centuries.—Bingham, *Origines Ecclesiasticæ*, bk. iv, chap. ii; Farrar, *Ecclesiastical Dict.* s. v.; Riddle, *Christian Antiquities*, bk. iii, chap. xv; Coleman, *Christian Antiquities*, chap. v. See PATRONAGE.

**Election of Grace.** On the history of the doctrine of Election, see ARMINIANISM; PREDESTINATION. We present here, I. A statement of the doctrine from the Augustinian or Calvinistic point of view, by the Rev. C. Hodge, D.D., of Princeton; II. A statement of the doctrine from the Methodist point of view; III. Some other conceptions of the doctrine.

I. *Election from the Calvinistic Point of View.*—The Scriptures speak, 1st, of the election of individuals to office, or to positions of honor and privilege. Thus Abraham was chosen to be the father of the faithful, and the depository of the promise of redemption. Thus Jacob was chosen, in preference to Esau, to be the progenitor of the chosen people. In like manner, Saul was chosen by God to be king over Israel, and subsequently David, and after him Solomon, were selected for the same high dignity. Thus also the prophets, and, under the new dispensation, the apostles, were chosen by God for the work assigned them. 2d. The Bible speaks of the election of nations to special privileges. The Hebrews were chosen from all the nations of the earth to be God's peculiar people. To them were committed the oracles of God. They were his inheritance. They received from him their laws and their religion, and were under his special guidance and protection. In Deut. vii, 6, it is said, "Thou art an holy people unto the Lord thy God: the Lord thy God hath chosen thee to be a special people unto himself, above all people that are upon the face of the earth;" xxxii, 9, "The Lord's portion is his people; Jacob is the lot of his inheritance;" Rom. ix, 4, "Who are Israelites; to whom pertaineth the adoption, and the glory, and the covenants, and the giving to the law, and the service of God, and the promises." 3d. Besides this election of individuals and of nations to external advantages, the Scriptures speak of an election to salvation: 2 Thess. ii, 13, "We are bound to give thanks always to God for you, brethren, beloved of the Lord, because God hath from the beginning chosen you to salvation, through sanctification of the Spirit and belief of the truth."

Of this election to eternal life all Augustinians teach, first, that its objects are not nations, nor communities, nor classes of persons, but individuals. 1. Because neither the nations nor communities, as such, are saved. God did not choose all the nation of the Jews to salvation. Neither does he choose the nations of Christendom to eternal life; nor any organized Church,

whether Papal or Protestant. The heirs of salvation are individual men.

2. Because those chosen to salvation are chosen to "sanctification of the Spirit and belief of the truth. They are chosen "to be holy and without blame before him in love" (Eph. i, 4). They are elect according to the foreknowledge of God the Father, through sanctification of the Spirit, unto obedience and sprinkling of the blood of Jesus Christ" (1 Pet. i, 2). But nations and communities are not sanctified, or obedient, or unblameable before God in love.

3. We accordingly find that the elect are always addressed as individuals. Paul, when writing to a number of persons residing in Thessalonica, says, "God hath chosen you to salvation." Writing to the Ephesians, he says, "God hath chosen us," "having predestinated us." Our Lord (John xiii, 18) says, "I speak not of you all; I know whom I have chosen;" and again (John vi, 37), "All that the Father giveth me shall come to me; and him that cometh to me I will in no wise cast out." John xvii, 2, "Thou hast given him power over all flesh, that he should give eternal life to as many as thou hast given him." Ver. 9, "I pray not for the world, but for those which thou hast given me." The Scriptures, therefore, clearly teach that the elect are certain individuals chosen out of the world to be the heirs of salvation.

*Secondly.* Augustinians hold that the ground of this election is the good pleasure of God. That is, that the reason why one person and not another is chosen to eternal life is to be found, not in what he is or does, distinguishing him favorably from his fellow-men, but simply because so it seems good in the sight of God. All being equally guilty and unworthy, God, for the manifestation of his glory, and for the attainment of the highest ends, chooses some, and not others, to be vessels of mercy prepared beforehand unto glory.

That such is the doctrine of the Scriptures on this subject is argued, 1. Because the Bible expressly says that election is of grace and not of works. It is not of works means that it is not what a man does that determines whether he is to be one of the elect or not. The apostle, in Rom. ix, 11, teaches that the choice of Jacob instead of Esau was made and announced before their birth, "that the purpose of God, according to election, might stand, not of works, but of him that calleth." It matters not whether the election here spoken of be to eternal life or to temporal advantages. The apostle refers to this incident in proof of God's sovereignty, and therefore he infers from it, "It is not of him that willeth, nor of him that runneth, but of God that showeth mercy" (ver. 16). In like manner, in ch. xi of the same epistle, he refers to the declaration made in the Old Test. to Elias: "I have reserved unto myself seven thousand men who have not bowed the knee to the image of Baal;" and adds, "Even so, then, at this present time there is a remnant according to the election of grace. And if by grace, then it is no more of works; otherwise grace is no more grace" (ver. 4-6). The mass of the Jews were cast off. A remnant was saved. That remnant consisted of those whom God chose. His choice was a sovereign one. It was of grace, and not of works. It was determined by the good pleasure of God, and not by what the objects of that choice had done. Paul himself belonged to that remnant. He was an illustrious example of the sovereignty of God in election. He had done nothing to secure the favor of God. He was chosen to eternal life not because he repented and believed. He was converted not because he had faithfully used the means of securing a knowledge of Christ. On the contrary, he was converted in the midst of his wicked career of persecution. He was brought to faith and repentance because, as our Lord says, "He was a chosen vessel unto me, to bear my name before the Gentiles, and kings, and the children of Israel" (Acts ix,

15). Paul's experience, as well as the teaching of the Holy Spirit, impressed upon his mind a deep conviction of the sovereignty of God in the salvation of men. He knew he had been chosen not for, but notwithstanding, his previous character and conduct. And he knew that, had he not been thus chosen, he would have perished forever. It is not surprising, therefore, that he valued this doctrine, or that he so often refers to himself as a monument of the grace of God in the election and salvation of sinners. In his epistle to the Galatians, after referring to the fact that he had "beyond measure persecuted the Church of God," he adds, "It pleased God, who separated me from my mother's womb, and called me by his grace, to reveal his Son in me" (Gal. i, 15). See also Acts xxii, 14; 1 Cor. xv, 9; 1 Tim. i, 15, 16: "Jesus Christ came into the world to save sinners, of whom I am chief. Howbeit for this cause I obtained mercy, that in me first Jesus Christ might show forth all suffering, for a pattern to them which should hereafter believe in him to life everlasting." Nothing could have pained the apostle more than that any one should attribute his conversion in any form or in any measure to himself. His constant and grateful acknowledgment was, "By the grace of God I am what I am." The negative statement that election is "not of works," is often, as in the passages above cited, connected with the positive assertion that it is of grace, or due to the sovereign pleasure of God.

2. It is not, however, merely in isolated passages that this doctrine is taught; it is elaborately proved and vindicated. Thus, in 1 Cor. i, 17-31, the opponents of Paul in Corinth had urged against him that he was neither a philosopher nor a rhetorician; he came neither with "the wisdom of men" nor with "enticing words." Paul's answer to this objection is twofold. First, he shows that philosophy, or the wisdom of men, had never led to the saving knowledge of God (i, 18-21); secondly, that when the true method of salvation was revealed, it was rejected by the wise. "Look at your calling, brethren," he says; see whom it is that God hath chosen. It is not the wise, the noble, or the great; but God hath chosen the foolish, the weak, and the base. This was done with the design that no flesh should glory in his presence; no man was to be allowed to refer his conversion to himself. It is of God ye are in Christ Jesus, that he that glorieth may glory in the Lord (i, 26-31).

Thus, also, in Eph. i, 3-6, the apostle reminds his readers that God had blessed them with every spiritual blessing (v. 3). This he had done because he had chosen them in Christ before the foundation of the world, to be holy and without blame before him in love (v. 4). He had thus chosen them to holiness, because he had, according to the good pleasure of his will, predestined them to the high dignity of sonship (v. 5). He had thus predestined them to be his sons, in order to glorify his grace or unmerited love (v. 6). In these few verses the whole Augustinian doctrine on this subject is stated with the utmost clearness and precision.

In the 8th chapter of the epistle to the Romans, the design of the apostle is to show the security of believers. Those who are in Christ shall never be condemned; because they are justified; because they have the principle of spiritual life through the indwelling of the Holy Ghost; because they are the children of God; because the Spirit makes intercession for them; because those whom God foreknows, he predestinates; whom he predestinates, he calls; whom he calls, he justifies; whom he justifies, he glorifies. This is a chain which cannot be broken. Those in whom he fixes his choice, he predestines, as said in the Ephesians, to be his sons and daughters; and those whom he thus predestinates, he effectually calls or regenerates; and those whom he regenerates, he will certainly save. All this the apostle confirms by a reference to

the infinite and immutable love of God. "If God se loved us," he argues, "that he spared not his own Son, but delivered him up for us, how shall he not with him freely give us all things? Who shall lay anything to the charge of God's elect? It is God that justified. Who is he that condemneth? It is Christ that died, yea, rather, that is risen again, who is even at the right hand of God, who also maketh intercession for us."

It was a natural objection to the apostle's doctrine that God had rejected the Jews and called the Gentiles; that it involved a violation of his promise to the patriarch Abraham. To this objection he gives, in the ninth chapter of his epistle to the Romans, a twofold answer. The one is, that the promise of salvation pertained not to the natural, but to the spiritual children of Abraham; not to the *Ἰσραὴλ κατὰ σάρκα*, but to the *Ἰσραὴλ κατὰ πνεῦμα*. The other is, that God acts as a sovereign in the dispensation both of temporal and of spiritual blessings. This he illustrates in the choice of Isaac instead of Ishmael, and of Jacob instead of Esau. Besides, he expressly claims this prerogative, saying to Moses, "I will have mercy on whom I will have mercy, and I will have compassion on whom I will have compassion."

To the objection that it is unjust thus to dispense or withhold mercy at his own good pleasure, Paul's answer is, that any attribute which the Scriptures ascribe to God, and any prerogative which he actually exercises, we must admit rightfully to belong to him. If God, in his Word, claims this prerogative of having mercy on whom he will have mercy, and if he actually exercises it in his providence, and in the dispensation of his grace, it is vain for us to deny or to protest. The judge of all the earth must do right.

Besides, as the inspired writer continues his argument, if the potter has the right of the same mass of clay to make one vessel to honor and another to dishonor, has not the infinite God the same right over his fallen creatures? Can any one complain if, to manifest his mercy, he saves some of the guilty children of men, and to manifest his justice he allows others to bear the just recompense of their sins? This is only doing what every good and wise human sovereign is expected and required to do.

It cannot fail to be noticed that the character of the apostle's doctrine is determined by the objections to it. Had he taught that God chooses as vessels of mercy those who he foresees will believe, and leaves to perish those who he foresees will reject the Gospel, there had been no pretext for the charge of injustice. It was because he taught that God gave repentance and faith to some and not to others that his opponents charged him with teaching what was inconsistent with impartial justice on the part of God.

3. That God is sovereign in the election of the heirs of salvation is plain, because men are chosen to holiness: faith and repentance are gifts of God, and fruits of his Spirit. If it is election to salvation which secures repentance and faith, repentance and faith cannot be the ground of election. The passages of Scripture already quoted distinctly assert that election precedes and secures the exercise of faith. In Eph. i, 4, it is said, We were chosen, before the foundation of the world, to be holy. In chap. ii, 8, of the same epistle, it is said, "Faith is the gift of God;" and in v. 10, that we were foreordained unto good works. In Colossians, faith is said to be "of the operation of God" (ii, 12). In Eph. i, 19, it is referred to "the mighty power of God," which wrought in Christ when he raised him from the dead. In 1 Pet. i, 2, it is said, we are elected "unto obedience and the sprinkling of the blood of Jesus Christ." Vocation, that is, regeneration, the fruits of which are faith and holy living, follows election, as taught in Rom. viii, 30, "whom he did predestinate, them he also called." In a preceding verse of that chapter, it is said, we are predestinated

"to be conformed to the image of his Son." But conformity to the image of Christ includes all that is good in us. Christ was exalted "to give repentance and forgiveness of sin" (Acts v, 31). "If God peradventure will give them repentance to the acknowledging of the truth" (2 Tim. ii, 25). "Hearken, my beloved brethren, hath not God chosen the poor of this world to be rich in faith" (James ii, 5). "It is of him ye are in Christ Jesus" (1 Cor. i, 30). It is, however, unnecessary to multiply quotations. The Bible is full of the doctrine that regeneration is the gift of God; that all holy exercises are due to the working of his Spirit. All Christians recognise this truth in their prayers. They pray earnestly for the conversion of those dear to them. This takes for granted that God can and does change the heart; that all that pertains to salvation, the means as well as the end, are his gifts. If he gives us repentance—if the fact be due to him that we, and not others, turn from our sins to the living God, then surely he does not choose us and not others because of such repentance.

4. Salvation is by grace. Grace is not mere benevolence, nor is it love in the form in which God loves the holy angels. It is love to the unholy, the guilty, to enemies. It is mysterious love. It is compared to the instinctive love of a mother for her child, which is independent of its attractions. This is the most wonderful, and, perhaps, the most glorious of all the known attributes of God. We are distinctly told that the special object of the redemption of man was the revelation of this divine perfection; it was for the manifestation "of the glory of the riches of his grace" (Eph. i, 6). He hath quickened us, raised us up, made us sit in heavenly places, "that in the ages to come he might show the exceeding riches of his grace in his kindness to us through Christ Jesus" (Eph. ii, 5-7). Such being the design of redemption, it must, in all its stages, be a work of grace. It was a matter of grace that redemption was provided for man and not for angels; it was a matter of grace that God gave his Son for our salvation. To make the mission of Christ a matter of justice, something to which our fallen race had a righteous claim, would alter the whole character of the Bible. The incarnation, sufferings, and death of the Son of God are everywhere set forth as manifestations of the unmerited and infinite love of God. But if a matter of grace that salvation was provided for the children of men, it was a matter of grace that the knowledge of the plan of salvation was communicated to some and not to others—to the Jews and not to the Gentiles. It is of grace that any sinner is justified, that he is sanctified and saved. From first to last salvation is of grace. To introduce the element of works or merit into any part of the plan vitiates its character. It is expressly taught that regeneration or conversion, the fact that one man is converted and not another, is a matter of grace. This is what the apostle specially insists upon in the first chapter to the Corinthians, already referred to. He calls upon his readers to look at their calling, to see who among them were called. It was not the wise or the great, but the foolish and the insignificant, whom God chose, for the very purpose that no flesh should glory in his presence. It was necessary that the subjects of salvation should feel and acknowledge that they were saved by grace; that it was not for any merit of their own, not for anything favorably distinguishing them from others, but simply that God, and the riches and sovereignty of his grace, should be magnified in them. Such is the form of apostolic Christianity, and such is the form in which it reveals itself in the heart of the believer. His theory may be one thing, but his inward and, it may be added, his delightful consciousness is that he owes his salvation to the grace of God alone.

5. The doctrines of the Bible are so related that one of necessity implies others. If the Scriptures teach that men, since the Fall, are born in a state of sin and

condemnation, and are spiritually dead until renewed by the Holy Ghost; if this death in sin involves entire helplessness, or inability to any spiritually good; if regeneration, or effectual calling, is effected, not by the moral influence of the truth, or by those divine influences common to all who hear the Gospel, but "by the mighty power of God," then of necessity the calling and consequently the election of those who are saved is a matter of sovereignty. If Christ, when on earth, raised some from the dead and not others, it was not anything in the state of one dead body as distinguished from others which determined which should rise and which should remain in their graves. As this connection between doctrines exists, all the evidence which the Bible contains of one of the truths just mentioned is so much evidence in favor of the others.

6. The system of doctrine with which these views are connected is frequently designated as Pauline. But this is a misnomer. Although clearly taught by the apostle Paul, these views are far from being peculiar to his writings. They not only pervade the Scriptures, but were inculcated with greater solemnity, clearness, and frequency by our blessed Lord himself than by any other of the messengers of God. He constantly addressed men as in a hopeless and helpless state of sin and misery, from which nothing but the almighty power of God could deliver them. Of the mass of mankind thus lying under the just displeasure of God, he speaks of those whom the Father had given him, who should certainly come to him, and whom he would without fail bring into his heavenly kingdom. He constantly refers to the good pleasure of God as the only assignable reason why one is saved and not another. "Many widows were in Israel in the days of Elias . . . but unto none of them was Elias sent save unto Sarepta, a city of Sidon, unto a woman, and she was a widow. And many lepers were in Israel in the time of Eliseus the prophet, and none of them was cleansed saving Naaman the Syrian" (Luke iv, 25-27). "At that time Jesus answered and said, I thank thee, O Father, Lord of heaven and earth, because thou hast hid these things from the wise and prudent, and hast revealed them unto babes. Even so, Father; for so it seemed good in thy sight" (Matt. xi, 25, 26). "To you it is given to know the mysteries of the kingdom of God, but to others in parables; that seeing they might not see, and hearing they might not understand" (Luke viii, 10). "All that the Father hath given me shall come to me; and him that cometh to me I will in no wise cast out. . . . And this is the Father's will which hath sent me, that of all which he hath given me I should lose nothing, but raise it up again at the last day" (John vi, 37, 39). "No man can come to me except the Father draw him; and I will raise him up at the last day" (v. 44). "No man can come to me except it were given unto him of my Father" (v. 65). "Ye are not of the world, but I have chosen you out of the world" (John xv, 19). "Ye believe not because ye are not of my sheep, as I said unto you. My sheep hear my voice, and I know them, and they follow me: and I give unto them eternal life; and they shall never perish, neither shall any man pluck them out of my hand. My Father, which gave them me, is greater than all; and no man is able to pluck them out of my Father's hand. I and my Father are one" (John x, 26-28). "Thou hast given him power over all flesh, that he might give eternal life to as many as thou hast given him" (John xvii, 2). "Thine they were, and thou gavest them me" (v. 6). "I pray not for the world, but for them which thou hast given me; for they are thine" (v. 9). "Holy Father, keep through thine own name those whom thou hast given me" (v. 11). "Father, I will that they also, whom thou hast given me, be with me where I am." Our Lord thus teaches that those who are saved are certain persons chosen out of the world and given

to him by the Father; that those thus given to him certainly come to him; that this certainty is secured by the drawing of the Father; and that those thus given to him are certainly saved.

7. There is an intimate relation between truth and Christian experience. The one accords with the other. What the Bible teaches of the sinfulness of man, the believer feels to be true concerning himself. What it teaches of the helplessness and dependence of the sinner, his own experience teaches him to be true; what is said of the nature and effects of faith answers to what he finds in his own heart. If, therefore, the Bible teaches that it is of God, and not of himself, that the believer is in Christ Jesus; that he, and not others, repent and believe; that he has been made to hear the divine voice, while others remain deaf—this will find a response in the bosom of the experienced Christian. We consequently find all these truths impressed upon the common consciousness of the Church, as it finds expression in its liturgies, its prayers, praises, and confessions. "Not unto us, not unto us, O Lord, but unto thy name be the glory," is the spontaneous language of the believer's heart. It is not in experimental religion, in the theology of the heart, that the children of God differ, but in the form in which the understanding undertakes to reduce these facts of Scripture experience to logical consistency.

8. As there is this correspondence between the truths of the Bible and religious experience, there is a like analogy between the providence of God and the dispensations of his grace. He is not more sovereign in the one than in the other. It is of him that we were born in a Christian land and not heathendom; among Protestants instead of in Spain or Italy; of Christian parents and in the bosom of the Church instead of being the children of the irreligious and immoral. It is the "Lord that maketh poor and maketh rich; he bringeth low and lifteth up" (1 Sam. ii, 7). "God putteth down one and setteth up another" (Psa. lxxv, 7). "It is he giveth power to get wealth" (Deut. viii, 18). "He giveth wisdom to the wise, and knowledge to them who know understanding" (Dan. ii, 12). "The Most High ruleth in the kingdom of men, and giveth it to whomsoever he wills" (iv, 17). The Bible is full of this doctrine. God governs all his creatures and all their actions. "He governs all things after the counsel of his own will" (Eph. i, 11). This is a truth of even natural religion; at least it is recognised by all Christians. They pray for favorable seasons, for protection from disease and accident, and from the malice of their enemies. When the pestilence sweeps over the land, and one is taken and another left, we all say, "It is the Lord, let him do what seemeth right in his sight." All that Augustinians teach concerning election is, that God acts in the dispensation of grace as he does in his providential government of the world. If sovereignty be consistent with justice and goodness in the one case, it must be in the other.

The difficulty which is usually felt on this subject arises from looking at only one aspect of the case. It is true that God gives health, wisdom, riches, power, the knowledge of the truth, saving grace, and life everlasting, according to his good pleasure. He exercises the prerogative of having mercy upon whom he will have mercy. It is true that what in fact occurs God intended to permit. Although he can, as all Christians admit, control the acts of free agents, he permitted the fall of man. He permits the present amount of sin and misery in the world. If so be that multitudes perish in their sins, it is undeniable that God intended, for wise reasons, to permit them to perish. While all this is true, it is no less true that he never interferes with the free agency of his rational creatures. If a man of the world determines to make the acquisition of wealth the end of his life, he is perfectly free in forming that determination. If he determines by diligence and honesty to accomplish his

object, or if he chooses to resort to deceit and fraud, he is in both cases free and responsible. On the other hand, if a man determines to make the salvation of his soul and the service of Christ the great end of his being, he also is perfectly free in the choice he makes. If God makes him willing, he does not act unwillingly. Paul was never more free in his life than when he made a complete surrender of himself to Christ, saying, "Lord, what wilt thou have me to do?" No man, we may well believe, ever sought Christ with the diligence and constancy, under the guidance of the Gospel, which the men of the world exhibit who failed of being saved. All who perish under the knowledge of the truth perish because they deliberately prefer the world to God.

The importance of the doctrine in question arises from the fact that, in the present state of human nature, if God by his almighty power did not convert some from the error of their way, no man would be saved. If he left all to themselves, and to those influences of the Spirit common to all who hear the Gospel, all would continue in their sins. Had not Christ by his omnipotence healed some lepers, none would have been healed; had he not opened some sightless eyes, all the blind would have continued in darkness.

The practical effect of the doctrine that we are entirely helpless in our sin and guilt, lying at the mercy of God, is to lead us to cast ourselves at his feet, saying, God be merciful to us sinners! As the deaf, and blind, and leprous, under a sense of helplessness and misery, crowded to Christ for healing, so souls burdened with the leprosy of sin are constrained to look to him for help, and those who come to him he will in no wise cast out. (C. H.)

11. *The Doctrine of Election from the Methodist Point of View.*—1. John Wesley sums up his view of election as follows: "I believe it commonly means one of these two things: (1.) A divine appointment of some particular men to do some particular work in the world. And this election I believe to be not only personal, but absolute and unconditional. Thus Cyrus was elected to rebuild the Temple, and St. Paul, with the twelve, to preach the Gospel. But I do not find this to have any necessary connection with eternal happiness. Nay, it is plain it has not; for one who is elected in this sense may yet be lost eternally. 'Have I not chosen (elected) you twelve,' saith our Lord, 'yet one of you hath a devil?' Judas, you see, was elected as well as the rest; yet is his lot with the devil and his angels. (2.) I believe election means, secondly, a divine appointment of some men to eternal happiness. But I believe this election to be conditional, as well as the reprobation opposite thereto. I believe the eternal decree concerning both is expressed in these words: 'He that believeth shall be saved; he that believeth not shall be damned.' And this decree, without doubt, God will not change, and man cannot resist. According to this, all true believers are in Scripture termed elect; as all who continue in unbelief are so long properly reprobates, that is, unapproved of God, and without discernment touching the things of the Spirit. Now God, to whom all things are present at once, who sees all eternity at one view, calleth the things that are not as though they were, the things that are not as yet as though they were now subsisting. Thus he calls Abraham 'the father of many nations' before even Isaac was born. And thus Christ is called 'the Lamb slain from the foundation of the world,' though he was not slain, in fact, till some thousands of years after. In like manner God calleth true believers 'elect from the foundation of the world,' although they were not actually elect or believers till many ages after, in their several generations. Then only it was that they were actually elected when they were made 'the sons of God by faith.' Then were they in fact chosen and taken out of the world; 'elect,' saith St. Paul, 'through belief of the truth;'

or, as St. Peter expresses it, 'elect according to the foreknowledge of God, through sanctification of the Spirit.' This election I as firmly believe as I believe the Scripture to be of God. But unconditional election I cannot believe; not only because I cannot find it in Scripture, but also (to waive all other considerations) because it necessarily implies unconditional reprobation. Find out any election which does not imply reprobation, and I will gladly agree to it. But reprobation I can never agree to while I believe the Scriptures to be of God, as being utterly irreconcilable to the whole scope of the Old and New Testaments" (*Works*, N. Y. edition, vi, 28, 29).

2. The following summary statement is from the Rev. Dr. Whedon: "All God's choices are elections. Some of these elections are unconditional, viz. those which relate to material objects, the absolute disposing of which violates no free agency. But there is also a class of conditional elections or predeterminations by God, which are so far contingent as that they are conditioned upon the actual performance of certain free acts by the finite agent as foreseen. Those free acts, required by God as conditions to this election, are by divine grace placed in the power of every responsible agent, so that the primary reason why any are not elected is that they do not exercise their power of meeting those conditions. And since every responsible agent has the power to make his own calling and election sure, and every elect person has full power to reject the conditions, so it is not true that the number of the elect can be neither increased nor diminished. Every man has gracious powers to be elected according to the eternal purpose of God. All men may be saved. Every individual, by grace divine, may place himself in the number of those who are chosen from before the foundation of the world. The reprobates are those who, abusing the conferred grace of God, resisting the Holy Spirit, reject the conditions of salvation, and so fail to present the necessary tests to their election. The elect are chosen *unto* good works, to holy faith, to persevering love, to a full manifestation of the power of the Gospel during their probationary life, and upon their full performance of this their work and mission, they attain, through grace divine, to a rich, unmerited salvation" (*Bibliotheca Sacra*, April, 1862, p. 268).

3. The following statement and argument is chiefly abridged from Watson, *Theological Institutes*, pt. ii, ch. xxvi. Three kinds of election are mentioned in Scripture, viz.:

i. *The election of individuals to perform some particular service*, which has no necessary connection with their salvation. Cyrus was God's chosen servant to promote the rebuilding of his Temple. The apostles of our Lord were elected to their office: "Have I not chosen you twelve?" This was an act of sovereign choice for which Christ gave no reason. He made no apologies to those disciples who were not chosen, and he never allowed any one who had the call to refer to anything meritorious in himself as the cause. It is the Lord of his Church. Great mischief has been done by confounding this election to office, which in its nature must be unconditional, with personal election to salvation, dependent upon faith and perseverance. St. Paul had an unconditional election to the same office from which Judas fell. He was a "chosen" vessel to be the apostle of the Gentiles.

ii. The second kind of election is that of *communities or bodies of people to eminent religious privileges* to accomplish, through their means, the merciful purposes of God in benefiting other nations. This was once applicable to the Jews, as it is now to the Christians. "You only have I chosen of all the families of the earth." "The Lord thy God hath chosen thee to be a peculiar people unto himself, above all people that are upon the face of the earth." This fact may in part account for the frequent and familiar use of

the terms *elect*, *chosen*, and *peculiar* in the New Testament, when the apostles are writing to the churches. This, however, does not explain fully the reason for the use of these terms. The abrogation of the *church-state* of the Jews, and the admission of Gentiles to an equality with Jews as the people of God, will account for the adoption of this phraseology. The reason of their peculiar existence as a nation ceased with the coming of Christ, for he was a light to lighten the Gentiles, as well as the glory of his people Israel. There was a new election of a new people of God, to be composed of Jews, not by virtue of their natural descent, but by faith in Christ; and of Gentiles of all nations, also believers, and placed on an equal ground with the believing Jews (see Rom. xi). It is easy, therefore, to see what is the import of the 'calling' and 'election' of the Christian Church, as spoken of in the New Testament. It was not the calling and the electing of one nation in particular to succeed the Jews, but it was the calling and the electing of believers in all nations, wherever the Gospel should be preached, to be in reality what the Jews typically, and therefore in an inferior degree, had been—the visible Church of God, 'his people,' under Christ 'the head,' with an authenticated revelation; with an appointed ministry, never to be lost; with authorized worship; with holy days and festivals; with instituted forms of initiation; and with special protection and favor.

Now what were the effects of this election? (1.) Plainly the ancient election of the Jews to be God's peculiar people did not secure the salvation of every Jew individually, nor did it exclude the non-elect Gentiles from adequate means of salvation; nay, the election of the Jews was intended for the benefit of the Gentiles—to restrain idolatry and diffuse spiritual truth. (2.) As to the election of the Christian Church, it does not infallibly secure the salvation of every member of the Church, nor does it conclude anything against the saving mercy of God being still exercised as to those who are out of the Church; nay, the very election of Christians (who are the "salt" of the earth) is intended to bring those who are still in "the world" to Christ.

This collective election is often confounded by Calvinists with personal election. This is especially done in the interpretation of Paul's argument in Romans ix–xi. But a just exegesis of these chapters shows that they can be interpreted only of collective election, not of personal election (see the full examination of this in Watson, *Institutes*, ii, 312–325). The apostle does, indeed, treat of unconditional election in this discourse, but it is of unconditional *collective* election.

iii. The third kind is *personal election of individuals to be the children of God*. Our Lord says, "I have chosen you out of the world." St. Peter says, "Elect according to the foreknowledge of God the Father, through sanctification of the Spirit, unto obedience and sprinkling of the blood of Jesus Christ." Then election must take place in time, and must be subsequent to the administration of the means of salvation. The "calling" goes before the "election," and the "sprinkling of the blood of Christ" before that "sanctification" through which they become "the elect" of God. In a word, "the elect" are the body of true believers; and personal election into the family of God is through personal faith. All who truly believe are elected; and all to whom the Gospel is sent have, through the grace that accompanies it, the power to believe placed within their reach; and all such might, therefore, attain to the grace of personal election. The doctrine of personal election is therefore brought down to its true meaning. *Actual* election cannot be eternal; for from eternity the elect were not actually chosen out of the world, and from eternity they could not be "sanctified unto obedience." The phrases "eternal

election' and "eternal decree of election" can therefore mean only "an eternal purpose" to elect, a purpose formed in eternity to choose and sanctify *in time* "by the Spirit and the blood of Jesus." But when Calvinists graft on this the doctrine that God hath from eternity chosen in Christ unto salvation a set number of men (*certain quorundam hominum multitudinem*) unto holiness and eternal life, without cause or condition except his arbitrary will, they assert a doctrine not to be found in the Word of God. It has two parts: (1) the choosing of a determinate number of men, which cannot be increased or diminished; (2) this choice is unconditional. Let us consider these two points.

a. As to the choosing of a *determinate number of men*, it is allowed by Calvinists that they have no express scriptural evidence for this tenet. And, (1.) As to God's *eternal* purpose to elect, we know nothing except from revelation, and that declares (a) that he willeth *all* men to be saved; (b) that Christ died for *all* men, in order to the salvation of all; and (c) the decree of God is, "He that believeth shall be saved, and he that believeth not shall be damned;" and if God be unchangeable, this must have been his decree from all eternity; (d) if the fault of men's destruction lies in *themselves*, then the number of the elect is capable of *increase and diminution*. (2.) This doctrine *necessarily* carries with it that of the *unconditional reprobation* of all mankind, except the elect, which cannot be reconciled with the moral attributes of God, i. e. with his love, wisdom, grace, compassion, justice, or sincerity; nor with the scriptural doctrine that *God is no respecter of persons*; nor with the scriptural doctrine of the *eternal salvation of infants*; nor, finally, with the proper end of *punitive justice*, which is, to deter men from sin, and to add strength to the law of God.

b. As to the second branch of this doctrine, viz. that personal election is *unconditional*. (1.) According to this doctrine, the Church of God is constituted on the sole principle of the divine purpose, not upon the basis of faith and obedience, which manifestly contradicts the Word of God, according to which Christ's Church is composed not merely of men, as Peter, James, and John, but of Peter, James, and John believing and obeying; while all who "believe not," and obey not, are of "the world," not of "the chosen." (2.) This doctrine of *election without respect to faith* contradicts the history of the commencement and first constitution of the Church of Christ. The first disciples became such by believing; and before baptism men were required to believe, so that their actual election had respect to faith. (3.) There is no such doctrine in Scripture as the election of individuals *unto* faith, and it is inconsistent with several passages which speak expressly of personal election, e. g. John xv, 19; 1 Pet. i, 2; 2 Thess. ii, 13, 14. (4.) There is another class of texts in which the term election occurs, referring to believers, not personally, but as a body forming the Church of Christ, which texts, containing the *word* election, are ingeniously applied to the support of the doctrine of unconditional personal election, when in fact they do not contain it. Such is Eph. i, 4, 5, 6. Now in regard to this text, it might be shown (a) that if personal election *were* contained in it, the choice spoken of is not of men merely, but of *believing* men; but (b) it does not contain the doctrine of personal election, but that of the eternal purpose of God to constitute his visible Church no longer upon the ground of descent from Abraham, but on that of *faith in Christ*. (5.) Finally, the Calvinistic doctrine has no stronger passage to lean upon. We conclude by asking, if this doctrine be true, (a) Why are we commanded "to make our election sure?" (b) Where does Scripture tell us of *elect unbelievers*? (c) and how can the Spirit of truth convince such of sin and danger, when they are, *in fact*, in no danger?

The fundamental objection made by Calvinists to

the Arminian doctrine is that it "subverts grace!" How? Because "it is not an act of grace for the Most High to do justice!" Does this mean that God cannot be at once gracious and just? Grace, in this discussion, is not opposed to God's justice, but to man's desert. If, indeed, human merit alone had entered into the question, the race would have ended with Adam; and it was only in virtue of the covenant of grace that descendants were born to him. Under that covenant God is bound, not, indeed, by any desert of man (for that would preclude grace), but by his own faithfulness, to offer salvation in Christ to all who fell in Adam. This is the doctrine of Arminians; this, too, is the doctrine of Scripture. The Gospel system is called by St. Paul the "grace of God, given to us in Christ Jesus." And he tells us that "the grace of God, which bringeth salvation to all men (*ἡ σωτηρία πάντων ἀνθρώπων*) hath appeared" (Tit. ii, 11); that "the living God is the Saviour of all men, especially those that believe" (1 Tim. iv, 10); that he "will have all men to be saved, and to come unto the knowledge of the truth" (1 Tim. ii, 4). According to the Gospel scheme, "As in Adam all die, so in Christ shall all be made alive." This *θέλημα Θεοῦ* is his determinate counsel—a decree "of his good pleasure." "Not, however, that it would have been consistent for God to desert the human race, and leave it to perish; the divine goodness forbids such a supposition. The simple meaning is that no external necessity compelled him to it, and that it was his free grace, without desert or worthiness on the part of man" (Knapp, *Theol.* § 88). Were God bound, *by any merit in man*, to restore freedom of will and moral power to man, there would be no grace in the act. But God may be bound by the perfections of his own character, and, in accordance with the scheme of human salvation which he in his infinite goodness has devised and announced, to do many things for man, which, so far as the recipient is concerned, are pure acts of grace. The Augustinian doctrine holds, in effect, that God displays his mercy in saving a portion of mankind by irresistible grace, and in "destroying the rest by the simple rule of his own sovereignty." The Methodist doctrine is that God, of his boundless philanthropy (*φιλανθρωπία*, Tit. iii, 4), provides means for the salvation of the whole human race, gives grace to enable each man to appropriate that salvation to himself, and destroys none but those who wilfully refuse that grace. The former, in its fatalistic elements, is as much the doctrine of Mohammed as of Christ; the latter is the very "grace of the Gospel." See GRACE.

III. *Other Views on Election.*—It is undeniable that the Augustinian doctrine has been held by many of the greatest and subtlest intellects from Augustine's time until now. It has a sort of fascination, especially for masculine and vigorous natures. Is not the explanation probably to be found in the fact that such natures find "a deep peace in the belief that their own greatest efforts are not really efforts at all, but the natural fruits of a divine necessity; that they can neither fail nor succeed so long as they obey implicitly, but only transmit the energies and register the decrees of a diviner might and wisdom? No doubt there is a great fascination in a mode of thought which almost obliterates the human instrument in the grandeur of the inevitable purpose. Calvinism is a personal and Christian way of merging the individual in the grandeur of a universal destiny" (*Spectator*, July 2, 1864). Perhaps the greatest danger in the tendencies of modern thought is that of the subversion of the moral freedom of man by the general acceptance of the doctrine that physical law is just as valid in the moral world as in the material. That the Calvinistic doctrine *tears in this direction* cannot be denied. And this tendency is doubtless one of the grounds, if not the chief ground, of the modern reaction against Augustinianism among spiritual thinkers (as distinguished

from materialists) on the one hand, and of the various schemes of modified Augustinianism which have been proposed within the theological sphere as substitutes for extreme Calvinism, as Baxterianism, the so-called moderate Calvinism (q. v.) and the New-England Theology (q. v.).

1. Dr. Nevin (*Mercersburgh Review*, April, 1857, *not* writing from the Arminian point of view) compares the New-Testament idea of election with the Calvinistic as follows: "Are the references to the idea of election in the New Testament such, as a general thing, that they may be fairly construed in the known and established sense of the Calvinistic dogma; or are they so circumstanced and conditioned as to require plainly a different interpretation? On this point there is no room for any serious doubt. The New-Testament doctrine of election, as it meets us, for instance, in the epistles of St. Peter, and rules continually the thinking and writing of St. Paul, is something essentially different from the doctrine of election which is presented to our view in Calvin's Institutes. The proof of this is found sufficiently in one single consideration. The Calvinistic election involves, beyond the possibility of failure, the full salvation at last of all those who are its subjects; there is no room to conceive of their coming short of this result in any single instance, made certain as it is in the form of a specific purpose and predetermination in the divine mind from all eternity. Election and glorification, the beginning and the end of redemption, are so indissolubly bound together that they may be considered different sides only of one and the same fact. The 'elect' in Calvin's sense have no power really to fall from grace, or come short of everlasting life. But, plainly, the 'elect' of whom the New Testament speaks, the 'chosen and called of God' in the sense of St. Peter and St. Paul, are not supposed to possess any such advantage; on the contrary, it is assumed in all sorts of ways that their condition carries with it, in the present world, no prerogative of certain ultimate salvation whatever. They may forget that they were purged from their old sins, lose the benefit of their illumination, make shipwreck of their faith, and draw back to everlasting perdition. They have it in their power to throw away the opportunities of grace, just as much as it lies in the power of men continually to waste in like manner the opportunities of mere nature. Their salvation is, after all, hypothetical, and suspended upon conditions in themselves which are really liable to fail in every case, and which with many do eventually fail in fact. Hence occasion is supposed to exist, in the sphere of this election itself, for all sorts of exhortation and warning to those who are the subjects of it, having the object of engaging them to 'make their calling and election sure.' The tenor of all is, 'Walk worthy of your vocation. Only such as endure unto the end shall be saved. So run that ye may obtain.' Plainly, we repeat, the two conceptions are not the same. The difference here brought into view is such as to show unanswerably that the Calvinistic dogma is one thing, and the common New-Testament idea of election altogether another. The Calvinistic election terminates on the absolute salvation of its subjects; that forms the precise end and scope of it, in such sort that there is no room to conceive of its failing to reach this issue in any single case. The N.-T. election, as it enters into the thinking of St. Peter and St. Paul, terminates manifestly on a state or condition short of absolute salvation. Whatever the distinction may involve, for those who are its subjects, in the way of saving grace, it does not reach out at once to the full issue of eternal life. The fact it serves to establish and make certain for them is of quite another character and kind; it sets them in the way of salvation, but it does not make their salvation sure."

2. Martensen (*Christian Dogmatics*, Edinb. 1866), a modern Lutheran divine, remarks that Calvin "con-

found predestination with the election of grace. The separation which is only temporal he made eternal, because he laid its foundations in the eternal counsel of God. God, according to him, made from eternity a twofold election, because he hath foreappointed certain persons to faith and to blessedness, and certain others to unbelief and everlasting damnation. This awful election he further maintained to be purely unconditional, and thus he mistook the true relations between the divine and the human. . . . From Calvin's point of view man has no *history*—at least so far as history includes the idea of a temporal and free life in which what is as yet undecided will be decided; all is decided beforehand—existence, life, destiny. . . . The true basis of the doctrine of election is given in the Lutheran doctrine of universal grace and conditional decrees" (§ 206-210).

3. Browne, bishop of Ely, in his *Exposition of the Thirty-nine Articles* (N. Y. 1865, 8vo), gives a pretty full history of the doctrine of election, and maintains, in substance, the theory of "ecclesiastical election," viz. that, as the "Jews of old were God's chosen people, so now is the Christian Church; that any baptized member of the Church is one of God's elect, and that this election is from God's irrelative and unsearchable decree. Here, therefore, election is to baptismal privileges, not to final glory; and the elect are identical with the baptized; and the 'election' constitutes the Church" (p. 402). His conclusion, from an examination of the passages of Scripture bearing on the question, is, "that the revelation which God has given us concerns his will and purpose to gather together in Christ a Church chosen out of the world, and that to this Church, and to every individual member of it, he gives the means of salvation. That salvation, if attained, will be wholly due to the favor of God, which first chooses the elect soul to the blessings of the baptismal covenant, and afterwards endues it with power to live the life of faith. If, on the other hand, the proffered salvation be forfeited, it will be in consequence of the faults and wickedness of him that rejects it. Much is said in Scripture of God's will that all shall be saved, and of Christ's death as sufficient for all men; and we hear of none shut out from salvation but for their own faults and demerits. More than this cannot with certainty be inferred from Scripture, for it appears most probable that what we learn there concerns only predestination to grace, there being no revelation concerning predestination to glory" (p. 442). See also, for views somewhat similar, Faber, *Primitive Doctrine of Election* (New York, 1840, 8vo); Fry, *Essay on Election* (Lond. 1864). For the further literature, see ARMINIANISM; PREDESTINATION.

**Election of Pope.** See CARDINALS; CONCLAVE; POPE.

**El-elo'he-'Is-ra'el** (Hebrew *El Elohey' Yisra'el*, מְלֹכֵינוּ אֱלֹהֵינוּ אֱלֹהֵי יִשְׂרָאֵל; Sept. ὁ θεός Ἰσραὴλ; Vulg. *Fortissimus Deus Israel*), the name bestowed by Jacob on the altar which he erected facing the city of Shechem, in the piece of cultivated land upon which he had pitched his tent, and which he afterwards purchased from the Bene-Hamor (Gen. xxxiii, 20). This compound term designates God as the being who can do whatever seems good to him, and who, in the recent experience of Jacob, had peculiarly manifested his power in overcoming the deep-rooted enmity of Esau, and thereby averting the most alarming evil which Jacob had ever been called to encounter. See JACOB.

**Elements** (στοιχεῖα). The etymon both of the English and Greek word conveys their primary meaning; thus, elements, from "elementa," the *alimenta* from which things are made, and στοιχεῖα, from στοιχεῖω, "to go up by steps"—the *first principles* whence the subsequent parts of things (στοιχεῖοσι) proceed in order. It seems to have been believed, from a very early period,

that all bodies consist of certain first, specific ingredients (*στοιχεῖα*), into which they are all resolvable, although different opinions prevailed respecting the number and nature of these primary constituents of things. Hesyechius explains *στοιχεῖα* by *πῦρ, ὕδωρ, γῆ, καὶ ἀήρ, ἀφ' ὧν τὰ σώματα*—fire, water, earth, and air, of which bodies are formed. This, which is the simplest, may be called the primary sense of the word. A secondary use of the word relates to the organized parts of which anything is framed, as the letters of the alphabet (Hesyechius gives also *γράμματα*), these being the elements of words; also the elements, rudiments, or first principles of any art or science.

The word occurs in its *primary* sense, Wis. vii, 17, *σύστασιν κόσμον καὶ ἐβέργειαν στοιχείων*, "the constitution of the world and the operation of the elements;" also xix, 18. It is used in the *same sense*, 2 Pet. iii, 10, *στοιχεῖα ἧ καυσούμενα λυθήσονται*, and ver. 12, *τίκται*, "the elements burning will be dissolved and melted." The Jews, in Peter's time, spoke of *four elements* (Josephus, *Ant.* iii, 7, 7).

The word occurs in a *secondary* sense in Gal. iv, 3-9, *τὰ στοιχεῖα τοῦ κόσμου*, "the elements or rudiments of the world," which the apostle calls *ἀσθενῆ καὶ πτωχὰ στοιχεῖα*, "weak and poor elements." He introduces the word to preserve the unity of his comparison of the law to a *pedagogue* (iii, 24), and of persons under it to children under tutors; and by the elements or rudiments of the world he evidently means that state of religious knowledge which had subsisted in the world, among Jews and Gentiles, before Christ; the weakness of which, among the Jews, may be seen in Heb. vii, 18, 19: x, 1; and among the Gentiles, in the epistle to the Romans, *passim*. "The elements of the world" occurs again, Col. ii, 8-20, in the same sense, as appears from the various allusions both to the terms used in Grecian philosophy, and the dogmas of the Judaizers in the subsequent verses; the phrase being possibly suggested to the apostle by his previous use of it to the Galatians. The word *στοιχεῖα*, in Heb. v, 12, is restricted, by the addition *πῶν λογίων τοῦ Θεοῦ*, to the rudiments of Christianity (see Rosenmüller and Benson on the passages).—Kitto, s. v.

II. *In the Sacraments*.—The materials used in the sacraments are called the *elements*. Water is the element of baptism, bread and wine are the elements of the Eucharist. "This use of the word 'elements' (*στοιχεῖα*) sprung from the philosophy of the school divines, and evidently had reference to the change supposed to take place after consecration. The Church of England has discarded the term in her services, and has introduced instead the word 'creatures' ('These thy creatures of bread and wine') in the communion service, though the word 'elements' is found in one of the rubrics of that office" (Eden). "In all the Jewish sacrifices of which the people were partakers, the viands or materials of the feast were first made God's by a pious oblation, and then afterwards eaten by the communicants, not as man's, but as God's provisions, who, by thus entreating them at his own table, declared himself reconciled, and again in covenant with them. And therefore our blessed Saviour, when he instituted the new sacrament of his own body and blood, first gave thanks and blessed the elements—that is, offered them up to God as Lord of the creatures, as the most ancient fathers expound that passage; who for that reason, whenever they celebrated the holy Eucharist, always offered the bread and wine for the communion to God upon the altar by this or some short ejaculation: 'Lord, we offer thee thine own out of what thou hast bountifully given us'" (Bishop Patrick, cited by Hook, *Church Dictionary*, s. v.).

**Elem-Recho'kim.** See JONATH-ELEM-RECHOKIM.

**E'leph** (Heb. with the art. *ha-E'leph*, עֵלֶף, Vulg. *Eleph*), one of the second group of towns allotted to

Benjamin, and named between Zelah and Jerusalem (Josh. xviii, 28). It is possibly the ruined site marked as *Katamon* on Van de Velde's "Map of the environs of Jerusalem," about one mile S.W. of Jerusalem. The Sept. unites the preceding name with this, under the compound form Σηλαλέφ (Vat. MS. Σελεκάρι), and accordingly assigns only *thirteen* (ἐκατρεῖς) cities to this group. Eusebius and Jerome (in their *Onomasticon*, s. v.) mention Sela (Σελά, φολῆς Βενιαμίν) as distinct from Eleph. The Peshito strangely renders the name as *Gebira*. From the occasional use of עֵלֶף in the *bucolic* sense of "ox," it has been conjectured that "Eleph and its villages" was a pastoral district. The extremely frequent *numerical* sense, however, of עֵלֶף, a *thousand*, points rather to the *populousness* of these towns, which lay in the neighborhood of Jebus or Jerusalem. Schultens (*Prov. Solom.* ii, 17) refers to the Arabic *alaph*, "union," in illustration of both the *numerical* and the *domestic* sense of the Heb. root. (See further Meier, *Heb. W.* v. b. p. 379.) Simon (in his *Onomasticon*, p. 141) refers to the name of the Cilician town *Μεφίαντρος* in illustration, and to Deut. i, 11; Psa. xci, 7, etc., for an indefinite use of עֵלֶף, to designate a *great multitude*. Fürst, in his *Hebräisches Wörterb.* (i, 91, 98), finds in Zech. ix, 7 another mention of our town Eleph, under the form עֵלֶף or עֵלֶף, *Alluph*; which, like *Sebusi*, he makes a frontier city belonging to Benjamin and Judah. He quotes from Jephth (or Jefet ben-Ali), a Jewish commentator who lived at Jerusalem in the 10th century, a statement that the words of Josh. xviii, 28, עֵלֶף עֵלֶף, are, in fact, the designation of but a single city—or still less, apparently, than even that, for he further quotes Jefet as saying that in his time a *ward* of Jerusalem bore that aggregate name, in which was the sepulchre of Zechariah. We reject this view as not only doing violence to the distinct enumeration of the group of cities given in Josh. xviii, 28, but as disturbing the sense of the passage in Zech. ix, 7 (see Hengstenberg, *Christology*, iii, 392-394). The phrase עֵלֶף עֵלֶף (tribe-prince in Judah), used by the prophet in this passage, is by him repeated twice (see Zech. xii, 5, 6). In the Pentateuch and 1 Chron. the same noun, עֵלֶף, in the plural, designates the chieftains or "dukes" of Edom. For some valuable remarks on the phrase, as indicating the *genuineness* of the passages in Zechariah, see also Hengstenberg, iv, 67, note.—Kitto, s. v.

**Elephant** (ἐλέφας) does not occur in the text of the canonical Scriptures of the A. V., except in the adj. *ἐλεφάντινος*, "of ivory," Rev. xviii, 12. But the animal is believed to be referred to in the Heb. עֵלֶף עֵלֶף, *elephant's tooth*, i. e. "ivory," 1 Kings x, 22; 2 Chron. ix, 21. See **IVORY**. Some have also regarded it as identical with the ΒΕΒΕΜΟΘΙ (q. v.), as in the margin of Job xl, 15. Elephants, however, are repeatedly mentioned in the 1st and 2d books of Maccabees as being used in warfare. The way in which they were used in battle, and the method of exciting them to fight, is described in 1 Macc. vi. The essential syllable of the Greek (and modern) name seems to be derived from that which all the nations of the south and west of Asia have for many ages generally used, namely, *fil, fecl, pheel, phil*, פִּיל; for we find it in the Chaldee (פִּילָא, *phila'*, Buxtorf, *Lex. Talm.* col. 1722), Syriac, Persian, Arabic, and Turkish, extending to the east far beyond the Ganges, where, nevertheless, in the indigenous tongues, *avei, waranam, and hattii* are existing names. See Cassel, *De variis eleph. denominationibus*, in the *Synbol. lit. Brem.* i, i, 136 sq.; *Zeitschr. f. Kunde des Morgenl.* IV, i, 12 sq.

It is well known that these animals were anciently employed in battles, originally in India (Aristotle,

*Anim.* ix, 1; Pliny, vi, 22; Ælian, *Anim.* xiii, 8, 22; comp. Ritter, *Erdk.* v, 903 sq.), where they are commonly stronger and more sagacious than in Africa (Diod. Sic. ii, 16; Pliny, vi, 22; Philostr. *Apoll.* ii, 12; Curtius, viii, 9, 17; Ælian, *Anim.* xvi, 15; yet see Herod. iv, 191; comp. Burmeister, in the *Hall. Encycl.* xxxiii, 265 sq.); next in Persia (although only indirectly before the times of Alexander, Arrian, *Alex.* iii, 11, 6); later also in Asia Minor and even in the West (Flor. i, 18; Livy, xxxi, 36; xxxvii, 40; xxxviii, 39; Iri-tius, *Bell. Afr.* xviii, 86; Pliny, viii, 5; Veget. *Mil.* iii, 24; comp. Pausanias, i, 12, 4); and the Maccabees had to contend with such trained elephants in the Syrian armies of the Selencidæ (comp. Plutarch, *Demetr.* xxviii sq.; Appian, *Syr.* 46; Polybius, xi, 32) in immense numbers (comp. Livy, xxxvii, 39; Pliny, vi, 22; Polybius, v, 53). Military elephants were accustomed to carry on their backs a wooden tower (Pliny, viii, 7; Philostr. *Apoll.* ii, 6; Juvenal, xii, 110; Livy, xxxvii, 40), in which were a number of soldiers (four in the Syrian army of Antiochus the Great, according to Livy, l. c.; according to Philostr. *Apoll.* ii, 12, about ten to fifteen; in India only three, Ælian, *Anim.* xiii, 19; comp. Pliny, l. c.; certainly not thirty-two, as is stated in 1 Macc. vi, 37; in modern India only four or five persons are placed in the elephant-tower, Munro, *Hist. of War in East India*, p. 91 [comp. Schlegel, *Ind. Bibl.* i, ii, 176; Bochart, i, 262; and see Wernsdorf, *De fide Macc.* p. 119 sq.], although an elephant can easily travel with 4000 pounds on his back); and their courage was artificially stimulated by wine (Ælian, *Anim.* xiii, 8; on the fondness of these animals for spirituous drinks, see Thevenot, *Voyage*, iii, 89). This illustrates 3 Macc. v, 2; also 1 Macc. vi, 34. Each equipped elephant was surrounded in battle by more than a hundred soldiers, to protect him on the side (1 Macc. vi, 35 sq.), and thus were these animals conveniently distributed along the whole line (1 Macc. vi, 35; comp. Livy, xxxvii, 40; Curtius, viii, 12, 7). Occasionally, however, the elephant, becoming frightened, did his master more harm than the enemy (Curtius, iii, 13, 15; viii, 14, 16; ix, 2, 20). The driver of a single armed elephant was called Ἰνδός, i. e. an Indian (1 Macc. vi, 37), while the commander of a battalion of such was styled ἑλεφαντάρχης, an elephantarch (2 Macc. xiv, 12; 3 Macc. v, 4). See generally Bochart, *Hieroz.* i, 233 sq.; Schlegel, *Indische Bibliothek*, I, ii, 129 sq.; Armandi, *Histoire militaire des éléphants* (Par. 1844); Oken, *Lehrb. der Naturgesch.* III, ii, 783 sq.; Tavernier, *Voyage*, ii, 72 sq.; Phil. a. S. Trinitate, *Reisebesch.* p. 386 sq.; fig. in Schreber's *Säugethiere*, vi, pl. 317.

The elephant's tusks, growing from the upper jaw (Aristotle, *Anim.* ii, 4; Ælian, *Anim.* xi, 37), which the ancients sometimes mistook for horns (Ælian, *Anim.* iv, 31; vii, 2; xi, 37; Pausan. v, 12, 1; Pliny, viii, 4; xviii, 1; Philostr. *Apoll.* ii, 13; perhaps the קַרְנֵי הַפֶּלֶאֱשֵׁת of Ezek. xxvii, 15; comp. Ludolf, *Hist. Ethiop.* i, 10, 29; but see Hävernick, in loc.) or ivory (קַרְנֵי הַפֶּלֶאֱשֵׁת, or simply קַרְנֵי הַפֶּלֶאֱשֵׁת), comp. Pott, in the *Zeitschr. f. Morgenl.* IV, i, 13 sq.), much earlier known in Asia Minor and Europe than the animal itself, were used by the Hebrews from the time of Solomon for ornamenting (overlying, Pliny, xvi, 84) furniture (especially the divan, Amos vi, 4; Philo, *Opp.* ii, 478;—1 Kings x, 18; Apulej. *Metam.* ii, p. 37, ed. Bip.) and chambers (1 Kings xx, 39; Amos iii, 15; Psa. xlv, 9; comp. Homer, *Odys.* iv, 73; Diod. Sic. iii, 47; Pausan. i, 12, 4; Petron. 135; Horace, *Od.* ii, 18, 1; Lucan, x, 119; Herodian, iv, 2, 3; Ælian, *Var. Hist.* xii, 39; Avien, 1200), also weapons (Curtius, viii, 5, 1). Likewise vessels and images of the gods (Pausan. v, 12, 1; ii, 17, 4; Virgil, *Georg.* i, 480; Pliny, xxxvi, 4; comp. Hermann, *Ad Lucian. conscrib. hist.* p. 303) were constructed of it (Rev. xviii, 12); while the Tyrians, who disposed of ivory as an article of commerce (Ezek.

xxvii, 15), carried luxury so far as to make the rowers' benches of their ships of boxwood inlaid with ivory. For the estimation in which ivory was anciently held, and its various uses among the Greeks and Romans, see Heyne, *Antiquar. Aufs.* ii, 149 sq. (also in the *Nov. commentat. Soc. Goetting.* I, ii, 96 sq.); Schlegel, *ut sup.* p. 137 sq.; Kype, *Observ.* ii, 461 sq.; Müller, *Archäol.* p. 418 sq.; Böttiger, *Archäol. Andeut.* i, 108 sq. Solomon brought it by sea from Ophir (1 Kings x, 22; comp. ver. 11).—Winer, i, 315.

Asiatic Elephant.

The animals of this genus consist at present of two very distinct species, one a native of Southern Asia, once spread considerably to the westward of the Upper Indus, and the other occupying southern and middle Africa to the edge of the great Sahara. In a fossil state, however, there are six more species clearly distinguished. The elephant is the largest of all terrestrial animals, sometimes attaining above eleven feet of vertical height at the shoulders, and weighing from five to seven thousand pounds; he is of a black or slaty-ash color, and almost destitute of hair. The head, which is proportionately large, is provided with two broad pendulous ears, particularly in those of the African species, which are occasionally six feet in length. This species has also two molar teeth on each side of the jaw, both above and below, and only three toe-nails on each of the hind feet, whereas the Asiatic species is provided with only one tooth on each side above and below, and, though both have tusks or defences, the last mentioned has them confined solely to the males: they are never of more than 70 pounds in weight, often much less, and in some breeds even totally wanting; while in the African both sexes are armed with tusks, and in the males they have been known seven feet in length, and weighing above 150 pounds each. The forehead of the African is low, that of the Asiatic high; in both the eyes are comparatively small, with a malevolent expression, and on the temples are pores which exude a viscous humor; the tail is long, hanging nearly to the heels, and distichous at the end. But the most remarkable organ of the elephant, that which equally enables the animal to reach the ground and to grasp branches of trees at a considerable height, is the proboscis or trunk—a cylindrical elastic instrument, in ordinary condition reaching nearly down to the ground, but contractile to two thirds of its usual length, and extensible to one third beyond it; provided with nearly 4000 muscles crossing each other in such a manner that the proboscis is flexible in every direction, and so abundantly supplied with nerves as to render the organ one of the most delicate in nature. Within is the double canal of the nostrils, and at the terminal opening a finger-like process, with which the animal can take up very minute objects and grasp others, even to a writing

pen, and mark paper with it. By means of the proboscis the elephant has a power of suction capable of raising nearly 200 pounds' weight; and with this instrument he gathers food from trees and from the earth, draws up drink to squirt it down his throat, draws corks, unties small knots, and performs numberless other minute operations; and, if necessary, tears down branches of trees more than five inches in diameter with no less dexterity than strength. The gait of an elephant is an enormous stride, performed with his high and ponderous legs, and sufficiently rapid to require brisk galloping on horseback to outstrip him. Elephants are peaceable towards all inoffensive animals; sociable among themselves, and ready to help each other; gregarious in grassy plains, but more inclined to frequent densely-wooded mountain glens; at times not unwilling to visit the more arid wastes, and fond of rivers and pools, where they wallow in mud and water among reeds and under the shade of trees. They are most assuredly more sagacious than observers, who, from a few visits to menageries, compare them with dogs, are able to appreciate, for on this question we must take into account, on the one hand, the physical advantages of the proboscis added to the individual experience gained by an animal slow in growth, and of a longevity exceeding a century, but still placed in contact with man after a birth free in every sense, where his powers expand without human education; while, on the other hand, dogs are the offspring of an immense number of generations, all fashioned to the will of a master, and consequently with innate dispositions to acquire a certain education. In Griffith's *Curier* are found several anecdotes illustrating the sagacity of these animals, to which we shall add only a single one, related by the late Captain Hobson, R.N., as observed by himself at Travancore, where several of these animals were employed in stacking teak-timber balk. They had scarcely any human aid or direction, but each beam being successively noosed and slung, they dragged it to the stack, raised one end up, contrived to shove it forward, nicely watching when, being poised by its own weight, the lower end would rise, and then, placing their foreheads against the butt end, they pushed it even on the stack; the sling they unfastened and carried back to have it fitted again. In a wild state no other animal has the sagacity to break off a leafy branch, hold it as a fan, and use it as a brush to drive away flies.

The Asiatic species, carrying the head higher, has more dignity of appearance, and is believed to have more sagacity and courage than the African, which, however, is not inferior in weight or bulk, and has never been in the hands of such experienced managers as the Indian mohants are, who have acquired such deep knowledge of the character of these beasts that they make them submit to almost incredible operations; such, for example, as suffering patiently the extraction of a decayed part of a tooth, a kind of chisel and mallet being the instruments used for the purpose. Elephants walk under water as long as the end of the proboscis can remain above the surface, but when in greater depth they float with the head and back only about a foot beneath it. In this manner they swim across the broadest streams, and guide themselves by the sense of smelling till they reach footing to look about them and land. They are steady, assiduous workmen in many laborious tasks, often using discretion when they require some dexterity and attention in the performance. Good will is all man can trust to in directing them, for correction cannot be enforced beyond their patience; but flattery, good treatment, kind words, promises, and rewards, even to the wear of finery, have the desired effect. In history they appear most conspicuous as formidable elements of battle. From the remotest ages they were trained for war by the nations of India, and by their aid they no doubt acquired and long held possession of several regions of

High Asia westward of the Indus. They are noticed in the ancient Mahabarata. According to Sauti, the relative force of elephants in an *akshauhini*, or great army corps, was one to each chariot of war, three horsemen, and five foot soldiers, or, rather, archers mounted on the animal's back within a defensible *howdah*—in the West denominated a castle. Thus one armed elephant, one chariot, and three horsemen, formed a *patti* or squad of at most eleven men, and, if there were other bodies of infantry in the army, they are unnoticed. This enumeration is sufficient to show that in India, which furnished the elephants and the model of arming them, there were only four or five archers, with or without the mohant or driver, and that, consequently, when the successors of Alexander introduced them in their wars in Syria, Greece, and even Italy, they could not be encumbered more than perhaps momentarily with one or two additional persons before a charge; for the weight carried by a war-elephant is less than that of one used for burden, which seldom equals £200 pounds. In order to ascend his back when equally required, the animal will hold out one of his hind legs horizontally, allowing a person to step upon it until he has grasped the crupper and crept up. In the West, where they were considered for a time of great importance, no doubt the squad or escort was more considerable than in the East, and may have amounted to thirty-two foot-soldiers, the number given, by some mistake, as if actually mounted, in 1 Macc. vi, 37. Although red colors are offensive to many animals, it may be observed that the use of mulberry-juice or grapes must have been intended as an excitement to their taste, for they are all fond of fruit. Wine, so as to cause an approach to intoxication, would render them ungovernable, and more dangerous than when in a state of fear. They do not require stimulants to urge them on in a modern battle, with all its flashes of fire, smoke, and explosion; and red colors usually employed for their trappings produce more of a satisfactory feeling than rage. Judicious and long-continued training is the only good remedy against sudden surprises caused by objects not yet examined by their acutely-judging senses, or connected with former scenes of danger, which are alone apt to make them turn. It is likely that the disciplined steadiness of well-armed ranks frightened them by their novelty more than the shouts of Macedonian thousands, which must have been feeble in the ears of elephants accustomed to the roar of hundreds of thousands of Indians. It is probable that the Carthaginians made the experiment of training African elephants in imitation of Ptolemy Philadelphus: they are noticed in their army only in the first Punic war; and, from what appears of the mode of managing them, there is reason to believe, as already noticed, that they were never so thoroughly subdued as the Indian elephants (see *Penny Cyclopaedia*, s. v.).—Kitto, s. v.

**Eleusinian Mysteries**, the sacred rites with which the annual festival of Ceres was celebrated at Eleusis, a town in Attica, situated to the north-west of Athens, and opposite the island of Salamis. They were the most ancient and most venerated mysteries of Greece, and were probably at first a national and harvest festival instituted to thank Demeter for the gift of fruit, to remember the barbaric times preceding the introduction of agriculture, and to rejoice at the progress made since. Both the founder of the mysteries and the time of their foundation are unknown. It is probable that the first foundation of them was laid by Thracians, who from Bœotia spread over Western Attica; and that they were farther developed by the Athenians themselves, especially at the time of the Pisistratide. The place in which they were celebrated was the temple of Demeter at Eleusis, a spacious, almost quadratic structure, which had been erected by the architect Iktinos, and was surrounded with a double vestibule (*peribolos*). At the time when Her-

acles came to Athens to be initiated into the mysteries it was not yet permitted to admit any foreign Greek. In order not to violate the traditional laws, and at the same time not to offend the great hero, who was not less feared than venerated, the lesser mysteries were transferred to Agræ, a suburb of Athens, and with them Heracles had to be content. From this time the lesser mysteries served as a preparation for the greater. The initiation into the mysteries was preceded by some devotional exercises, sacred rites, and symbolic actions, the object of which was to divert the candidates for initiation for a time from the world, its pleasures and occupations, and to bring about in them a change of mind, and a longing for the disclosures to be made to them. Between initiation into the lesser and initiation into the greater one year had to elapse. The lesser were celebrated from the 19th to the 21st of the month Anthesterion (beginning of April); the greater one, the Eleusinian mysteries, were celebrated from the 16th to the 25th of Boedromion (beginning of October). "On the first day (called *agurnos*, the assembling), the neophytes, already initiated at the preparatory festival, met, and were instructed in their sacred duties. On the second day (called *Ialadê*, *mystæ*, *To the sea, ye initiated!*), they purified themselves by washing in the sea. On the third day, sacrifices, comprising, among other things, the mullet-fish, and cakes made of barley from the Rharian plain, were offered with special rites. The fourth day was devoted to the procession of the sacred basket of Ceres (the *Kalathion*). This basket—containing pomegranates, salt, poppy seeds, etc., and followed by bands of women carrying smaller baskets similarly filled—was drawn in a consecrated cart through the streets, amid shouts of 'Hail, Ceres!' from the onlookers. The fifth day was known as the 'day of the torches,' and was thought to symbolize the wanderings of Ceres in quest of her daughter. On it the *mystæ*, led by the 'daduchus,' the *torch-bearer*, walked two by two to the temple of the goddess, and seem to have spent the night there. The sixth day, called *Iacchus*, in honor of the son of Ceres, was the great day of the feast. On that day the statue of *Iacchus* was borne in pomp along the sacred way from the Ceramieus at Athens to Eleusis, where the votaries spent the night, and were initiated in the last mysteries. Till this stage of the proceedings they had been only *mystæ*; but on the night of the sixth day they were admitted into the innermost sanctuary of the temple, and, from being allowed to behold the sacred things, became entitled to be called 'epoptæ,' or 'ephorî,' i. e. *spectators*, or *contemplators*. They were once more purified, and repeated their original oath of secrecy with an imposing and awful ceremonial, somewhat resembling, it is believed, the forms of modern free-masonry. On the seventh day the votaries returned to Athens with mirth and music, halting for a while on the bridge over the Cephissus, and exercising their wit and satire against the spectators. The eighth day was called *Epidauria*, and was believed to have been added to the original number of the days for the convenience of those who had been unable to attend the grand ceremonial of the sixth day. It was named in honor of Æsculapius, who arrived on one occasion from his native city of Epidaurus too late for the solemn rites, and the Athenians, unwilling to disappoint so distinguished a benefactor of mankind, added a supplementary day. On the ninth day took place the ceremony of the 'Plemochœ,' in which two earthen vessels filled with wine were turned one towards the east and the other towards the west. The attendant priests, uttering some mystic words, then upset both vessels, and the wine so spilt was offered as a libation. Slaves, prostitutes, and persons who had forfeited their citizenship were excluded from the rites. During the period of the festival, none of those taking part in it could be arrested for any offence. Lyeurgus, with a view to

destroying distinctions of class, forbade any woman to ride to the Eleusinia in a chariot, under a penalty of 6000 drachmæ. The mysteries were celebrated with the most scrupulous secrecy. No initiated person might reveal what he had seen under pain of death, and no uninitiated person could take part in the ceremonies under the same penalty. The priests were chosen from the sacred family of the *Eumolpidæ*, whose ancestor, *Eumolpus*, had been the special favorite of Ceres. The chief-priest was called the 'Hierophant,' or 'Mystagogue;' next in rank to him was the *Daduchus*, or *Torch-bearer*; after whom came the 'Hieroceryx,' or *Sacred Herald*, and the priest at the altar. Besides these leading ministers, there was a multitude of inferior priests and servants" (Chambers, *Cyclop.* s. v.). It was undoubtedly one chief aim of these mysteries to spread among the educated classes of the people more elevated religious ideas than were held by the mass of the people, especially with regard to the immortality of the soul, the punishment of the wicked, and the rewards of the good. The initiated were supposed to be especially protected by the gods, and to be sure of the joys of the future life. See Ouzwaroff, *Essai sur les Mystères d'Eleusis* (3d edit. Paris, 1816; Preller, *Demeter und Persephone* (Hamb. 1837); Mommsen, *Heortologie. Antiquar. Untersuchungen über die städtischen Feste der Athener* (Leipzig. 1864). (A. J. S.)

**Eleutheropolis** (Ἐλευθερόπολις, *free city*), a place not named in Scripture, but which was an episcopal city of such importance in the time of Eusebius and Jerome that they assumed it as the point whence to estimate the distances and positions of other cities in southern Palestine (*Onomast.* s. v. *Estherne*, *Sephela*, *Jermus*, etc.; see Reland, *Palæst.* p. 410, 411). It appears from these and many other notices that Eleutheropolis was the capital of a large province during the fourth and fifth centuries of our era. It was also an episcopal city of *Palestina Prima* (St. Paul, *Geogr. Sac.* p. 306; *Notitiæ Ecclesiasticæ*, p. 6). Its site remained unknown for many centuries, though defined by several ancient writers with much minuteness. Eusebius states that the plain of Shepheleh extends from Eleutheropolis westward and southward (*Onomast.* s. v. *Sephela*), and hence it must have stood at the south-western base of the mountains of Judah. He also states that Bethshemesh was ten miles distant from it, on the road to Nicopolis; and *Jedna*, six miles on the road to Hebron; and *Sochoh*, nine miles on the road to Jerusalem. All these places are now known, and the lines of road being traced and the distances measured, we find that the site indicated is *Beit Jibrin* (Robinson, *Bib. Res.* ii, 348, 359, 398, 404-420, 612-646). In the *Acta Sanctorum Martyrum*, published by Assemani in Syriae, Greek, and Latin, Peter Abtelama the martyr is said to have been born at *Anea*, which lay, according to the Syriae version, in the district of *Beth Gubrin*, while both the Greek and Latin read in the district of *Eleutheropolis* (*ib.* p. 66). This establishes the identity of *Beth Gubrin* and *Eleutheropolis*. Josephus mentions a town in this neighborhood called *Betaris*, which some copies read *Βήταβρις*, and it appears to be the same place (*War.* iv, 8, 1). Under its ancient name *Betogabra* (Βετογάβρα, i. e. *house of Gabra* or *Gabriel?*), it is enumerated by Ptolemy among the cities of Palestine (v, 16), and it is also laid down as *Betogabri* in the Peutinger tables (Reland, *Palæst.* p. 421). The name *Eleutheropolis* first appears on coins of this city inscribed to Julia Donna, the wife of Septimius Severus, in A. D. 202-3 (Eckhel, iii, 488). The emperor had been in Syria about that time, and had conferred important privileges on various cities, among which was *Betogabris*, which appears to have been then called *Eleutheropolis*, as being made a free city. Epiphanius, the well-known writer, was born in a village three miles from the city in the beginning of the 4th century, and is often called an *Eleutheropolitan* (Reland, p. 751, 752). In the year A. D. 796, little

more than a century and a half after the Saracenic conquest, Eleutheropolis was razed to the ground, and left completely desolate. The Greek language now gave place to the Arabic, and this city lost its proud name and its prouder rank together (Reland, p. 987). Like so many other cities, the old Aramaic name, which had probably never been lost to the peasantry, was revived among writers, and we thus find *Beigebirin*, or some form like it, constantly in use after the 8th century (Reland, *Palæst.* p. 222, 227; *Gesta Dei per Francos*, p. 1044). In the 12th century the Crusaders found it in ruins, and called by the Arabs *Bethgebrim* (doubtless a Frank corruption of *Beit Jibrin*). They built a strong fortress on the old foundations to guard against the incursions of the Moslems, the remains of which, and the chapel connected with it, still exist. After the battle of Hattin it fell into the hands of Saladin, but was retaken by Richard of England. It was finally captured by Bilars (see *Will. Tyr.* xiv, 22; *Jac. de Vit.* in *Gesta Dei*, p. 1070, 1071; Bohaeddin, *It. Salud.* p. 229). It has since crumbled to ruin under the blight of Mohammedan rule.

The modern village of Beit Jibrin is about twenty-five miles from Jerusalem, on the road to Gaza. It contains between two and three hundred inhabitants, and is situated in a little nook or glen in the side of a long green valley, which is shut in by low ridges of limestone partially covered with dark cope. The ancient ruins are scattered around it, and are of considerable extent. The principal one is a large irregular inclosure, formerly surrounded by a massive wall, still in part standing, and containing the remains of the Crusaders' castle. A great part of this outer wall is completely ruinous; but the north side, which skirts the bank of the valley, is still several feet high. The inclosure is about 600 feet in diameter. The fortress is about 200 feet square, and is of a much later date than the outer wall. In the castle, along the south side, are portions of the walls and the groined roof and clustered columns of a fine old chapel—the same, doubtless, which was built by the Crusaders. An Arabic inscription over the castle-gate bears the date A.H. 958=A.D. 1551—probably the time when it was last repaired. A short distance eastward are other massive ruins and a deep well; while about a mile up the valley are the picturesque remains of the church of St. Anne (Porter, *Handbook for Syr. and Pal.* p. 256 sq.). Several curious traditions have found a "local habitation" at Beit Jibrin. One places here the miraculous fountain which sprang from the jaw-bone Samson wielded with such success against the Philistines (Anton, *Mant. Itin.* p. 30, 32).

The valley, on the side of which the ruins of Eleutheropolis lie, runs up among the hills for two miles or more south-by-east. On each side of it are low ridges of soft limestone, which rises here and there in white bare crowns over the dark shrubs. In these ridges are some of the most remarkable caverns and excavations in Palestine, rivalling in extent and interest the catacombs of Rome and Malta. They are altogether different in character from the rock-tombs of Jerusalem and the grottos of Petra. They were examined and described by Dr. Robinson, and they have since been more fully explored by Mr. Porter. They are found together in clusters, and form subterranean villages. Some are rectangular, 100 feet and more in length, with smooth walls and lofty arched roofs. Others are bell-shaped—from 40 to 70 feet in diameter, by nearly 60 feet in height—all connected together by arched doorways and winding subterranean passages. A few are entirely dark, but most of them are lighted by a circular aperture at the top. They occur at short intervals along both sides of the whole valley, and may also be seen at several other neighboring villages. The origin and object of these singular excavations are easily ascertained. During the Babylonian captivity the Edomites overran and

occupied the whole of southern Palestine, which is hence called by Josephus Idumæa. Jerome calls the Idumæans Horites, and says they inhabited the whole country extending from Eleutheropolis to Petra and Elah, and that they dwell in caves—preferring them both on account of their security and their coolness during the heat of summer (*Comm. in Obad.* i). The original inhabitants of Edom were Horites, that is, *Troglochytes*, "dwellers in caves." The descendants of Esau adopted the habits of their predecessors, and when they took possession of southern Palestine excavated rock dwellings wherever practicable (see Robinson's *Biblical Researches*, 2d ed. ii, 23, 57 sq.; Van de Velde, *Narrative*, ii, 147 sq.; Thomson, *Land and Book*, ii, 358 sq.)—Kitto, s. v.; Smith, s. v.

**Eleu'therus** (Ἐλευθέριος, *free*; see Simonis, *Onom.* p. 58), a river of Syria mentioned in 1 Macc. xi, 7; xii, 30. In early ages it was a noted border stream (Pliny, v, 17; ix, 12; Ptolemy, v, 15, 4). According to Strabo, it separated Syria from Phœnicia (xvi, 753), and formed the northern limit of Cœle-Syria. Josephus informs us that Antony gave Cleopatra "the cities that were within the river Eleutherus, as far as Egypt, except Tyre and Sidon" (*Ant.* xv, 4, 1; *War.* i, 18, 5). A careful examination of the passages in Num. xxxiv, 8-10, and Ezek. xlvi, 15-17, and a comparison of them with the features of the country, lead Mr. Porter to the conclusion that this river also formed in part the northern border of the "Promised Land" (*Five Years in Damascus*, ii, 354 sq.). Pliny says that at a certain season of the year it swarmed with tortoise (ix, 10). Of the identity of the Eleutherus with the modern *Nahr el-Kebir*, "Great River," there cannot be a doubt. Its highest source is at the north-eastern base of Lebanon: it sweeps round the northern end of the range, through the opening called in Scripture "the entrance of Hamath" (Num. xxxiv, 8), and, after receiving several small tributaries from the heights of Lebanon, it falls into the Mediterranean about eighteen miles north of Tripolis. It still forms the boundary between the provinces of Akkâr and el-Husn. During summer and autumn it is but a small stream, easily forded, but in winter it swells into a large and rapid river (Maundrell, p. 33; Burckhardt, p. 270; Paulus, *Samml.* i, 35, 203).—Smith, s. v.

**Eleuthêrus** or **Eleutherius**, a native of Nicopolis, elected bishop of Rome after the death of Soter, May 3, 177. He is previously (168) mentioned as a deacon of bishop Anicetus of Rome. He opposed with much zeal the errors of the Valentinians during his tenure of office. Two events are reported to have rendered his pontificate memorable: the glorious death of the martyrs of Lyons and Vienne (Eusebius, *Hist. Eccl.* v, 4), and an embassy from Lucius, king of Great Britain, to demand a missionary to teach the Britons the Christian religion (Bede, *Hist. Eccl.* iii, 25; Collier, *Eccl. Hist.* i, 35). The churches of Lyons and Vienne sent to him the acts of those of their members who had just suffered martyrdom. Their messenger was the presbyter Irenæus, subsequently celebrated as one of the pillars of the Church in Gaul. As the letter of these churches to Eleutherus warns against the Montanists, some have inferred, though without being supported by any other proof, that Eleutherus was an adherent of the Montanist sect. The legend about the embassy of king Lucius, and the subsequent mission of two Roman missionaries to England, is doubted by many historians. Eleutherus died A.D. 192. He is commemorated in the Church of Rome as a saint on the 26th of May. See Mosheim, *Comment.* i, 273; Neander, *Planting and Training*, ii, 518; Smith, *Religion of Ancient Britain*, p. 121, 122; Herzog, *Real-Encykl.* iii, 753. (A. J. S.)

**Elha'nan** (Heb. *Elchanan'*, עֶלְחָנָן, whom God has graciously bestowed [compare *Hananeel*, *Hananavah*, *Johanan*, Phœn. *Hannibal*; also *Baal-hanan*, etc.];

Sept. Ἐλεανάν; Vulg. *Adeodatus*, but *Chanan*, *Elhanan*, in Chron.), a distinguished warrior in the time of king David, who performed a memorable exploit against the Philistines, though in what that exploit exactly consisted, and who the hero himself was, it is not easy to determine. B. C. cir. 1020.

1. 1 Sam. xxi, 19, says that he was the "son of Jaare Oregim the Bethlehemite," and that he "slew Goliath the Gittite, the staff of whose spear was like a weaver's beam." Here, in the A. V., the words "the brother of" are inserted, to bring the passage into agreement with,

2. 1 Chron. xx, 5, which states that "Elhanan, son of Jair (or Jaor), slew Lahmi, the brother of Goliath the Gittite, the staff of whose spear," etc.

Of these two statements the latter is probably the more correct, the differences between them being much smaller in the original than in English (see Kennicott, *Dissertation*, p. 78). See LAHMI.

(a.) The word *Oregim* (q. v.) exists twice in the verse in Samuel, first as a proper name, and again at the end—"weavers." The former has probably been taken in by an early transcriber from the latter, i. e. from the next line of the MS. To the end of the verse it certainly belongs, since it is found in the parallel passage of Chronicles, and also forms part of what seems to have been a proverbial description of Goliath (comp. 1 Sam. xvii, 7).

(b.) The statement in Samuel is in contradiction to the narrative of 1 Sam. xvii, according to which Goliath the Gittite was killed by David. True, Ewald (*Gesch.* iii, 91 sq.)—from the fact that David's antagonist is, with only three exceptions (one of them in the doubtful verses, xvii, 12-32), called "the Philistine," and for other linguistic reasons—has suggested that Elhanan was the real victor of Goliath, and that after David became king the name of Goliath was attached to the nameless champion whom he killed in his youth. But against this is the fact that Goliath is named thrice in 1 Sam. xvii and xxi—thrice only though it be; and also that Elhanan's exploit, from its position both in Samuel and in Chronicles, and from other indications, took place late in David's reign, and when he had been so long king, and so long renowned, that all the brilliant feats of his youth must have been brought to light, and well known to his people. It is recorded as the last but one in the series of encounters of what seems to have been the closing struggle with the Philistines. It was so late that David had acquired among his warriors the fond title of "the light of Israel" (2 Sam. xxi, 17), and that his nephew Jonathan was old enough to perform a feat rivaling that of his illustrious uncle years before. It was certainly after David was made king, for he goes down to the fight, not with his "young men," as when he was leading his band during Saul's life, but with his "servants," literally his "slaves," a term almost strictly reserved for the subjects of a king. The vow of his guard, on one of these occasions, that it would be his last appearance in the field, shows that it must have been after the great Ammonitish war, in which David himself had led the host to the storming of Rabbah (2 Sam. xii, 29). It may have been between this last event and the battle with Absalom beyond Jordan, though there are other obvious reasons why David staid within the walls of Mahanaim on that occasion. See DAVID.

Jerome, in his *Quest. Hebr.* on both passages—he does not state whether from ancient tradition or not—translates Elhanan into *ἰ' d'o-datus*, and adds *filius sultis Polymitarius Bethlehemites*—"the son of a wood, a weaver, a Bethlehemite." Adeodatus, he says, is David, which he argues not only by considerations drawn from the meaning of each of the above words, but also from the statement in the concluding verse of the record that all these giants "fell by the hand of David and by the hand of his servants," and as Elhanan slew Goliath, Elhanan must be David.

3. Elhanan is elsewhere called the son of Dodo of Bethlehem, one of "the thirty" of David's guard, and named first on the list (2 Sam. xxiii, 24; 1 Chron. xi, 26). See Kennicott's *Dissertation*, p. 179. Perhaps his father had both names.—Smith, s. v. See JAIR.

**Elevation of the Host.** See HOST and MASS.

**Elfege.** See ALPHAGE.

**Elfric.** See ELFRIC.

**E'li** (Heb. *Elí'*, עֲלִי, i. q. עֲלִי, *ascend*; Sept. Ἠλί [so N. T. see HELI], Josephus Ἠλεῖ, Vulg. *Heli*), the high-priest of the Jews when the ark was in Shiloh (1 Sam. i, 3, 9). He was descended from Aaron through Ithamar, the youngest of his two surviving sons (Lev. x, 1, 2, 12), as appears from the fact that Abiathar, who was certainly a lineal descendant of Eli (1 Kings ii, 27), had a son Ahimelech, who is expressly stated to have been "one of the sons of Ithamar" (1 Chron. xxiv, 3; comp. 2 Sam. viii, 17). With this accords the circumstance that the names of Eli and his successors in the high-priesthood up to and including Abiathar are not found in the genealogy of Eleazar (1 Chron. vi, 4-15; comp. Ezra vii, 1-5). As the history makes no mention of any high-priest of the line of Ithamar before Eli, he is generally supposed to have been the first of that line who held the office (Josephus, *Ant.* viii, 1, 3). From him, his sons having died before him, it appears to have passed to his grandson Abitub (1 Sam. xiv, 3; comp. however Josephus, *Ant.* v, 11, 2), and it certainly remained in his family till Abiathar, the grandson of Abitub, was "thrust out from being priest unto the Lord" by Solomon for his share in Adonijah's rebellion (1 Kings ii, 26, 27; i. 7), and the high-priesthood passed back again to the family of Eleazar in the person of Zadok (1 Kings ii, 35). How the office ever came into the younger branch of the house of Aaron we are not informed; perhaps it was through the incapacity or minority of the then sole representative of the elder line, for it is very evident that it was no unauthorized usurpation on the part of Eli (1 Sam. ii, 27, 28, 30). See ITHAMAR. Eli also acted as regent or civil judge of Israel after the death of Samson, being the immediate predecessor of his pupil Samuel (1 Sam. vii, 6, 15-17), the last of the judges. This function, indeed, seems to have been intended, by the theocratic constitution, to devolve upon the high-priest, by virtue of his office, in the absence of any person specially appointed by the divine King to deliver and govern Israel. He is said to have judged Israel 40 years (1 Sam. iv, 18); the Septuagint makes it 20. It has been suggested, in explanation of the discrepancy, that he was *sole* judge for 20 years, after having been co-judge with Samson for 20 years (*Judge*, xvi, 31). But the probability is that the number 40 is correct, but that it comprehends only the period of his administration as *judge*; for not only does the whole tenor of the narrative imply that this immediately succeeded the judgeship of Samson (as indeed Josephus evidently understood it; a fact apparent not only from his history, but also from the summing up of his numbers as computed by himself, *Ant.* v, 9; x, 3; title to book v), but this view is evidently taken by Paul in his assignment of the period of 450 years to the judges (*Acts* xiii, 20), a number that immediately results from simply adding together the items as given in the O.-T. history, including Samson and Eli as continuous to the others. See JUDGES. As Eli died at the age of ninety-eight (1 Sam. iv, 15), the forty years (B. C. 1165-1125) must have commenced when he was fifty-eight years old. (See *Lightfoot's Works*, i, 53, 907, fol. Lond. 1684; Selden, *De Success. in Pontif. Hebr.* lib. i, cap. 4). See HIGH-PRIEST.

Eli seems to have been a religious man, and the only fault recorded of him was an excessive easiness of temper, most unbefitting the high responsibilities of his official character. His sons Hophni and Phinehas, whom he invested with authority, misconducted

themselves so outrageously as to excite deep disgust among the people, and render the services of the tabernacle odious in their eyes (1 Sam. ii, 27-36; 1 Kings ii, 27). Of this misconduct Eli was aware, but contented himself with mild and ineffectual remonstrances (1 Sam. ii, 22-25), where his station required severe and vigorous action (1 Sam. iii, 13). For this neglect the judgment of God was at length denounced upon his house, through the young Samuel (q. v.), who, under peculiar circumstances, had been attached from childhood to his person (1 Sam. ii, 29; iii, 18). Some years passed without any apparent fulfilment of this denunciation, but it came at length in one terrible crash, by which the old man's heart was broken. The Philistines had gained the upper hand over Israel, and the ark of God was taken to the field, in the confidence of victory and safety from its presence. But in the battle which followed the ark itself was taken by the Philistines, and the two sons of Eli, who were in attendance upon it, were slain. The high-priest, then blind with age, sat by the wayside at Shiloh, awaiting tidings from the war, "for his heart trembled for the ark of God." A man of Benjamin, with his clothes rent, and with earth upon his head, brought the fatal news: and Eli heard that Israel was defeated—that his sons were slain—that the ark of God was taken—at which last word he fell heavily from his seat, and died (1 Sam. iv). According to Schwarz (*Palest.* p. 142), an erroneous tradition locates his grave in an elegant building at the village Charim ben-Elim, eight miles N.N.E. of Jaffa, on the shore. The ultimate doom upon Eli's house was accomplished when Solomon removed Abiathar (the last high-priest of this line) from his office, and restored the line of Eleazar, in the person of Zadok (1 Kings ii, 27). See ABIATHAR. Another part of the same sentence (1 Sam. ii, 31-33) appears to have been taking effect in the reign of David, when we read that "there were more chief men found of the sons of Eleazar than of the sons of Ithamar"—sixteen of the former, and only eight of the latter (1 Chron. xxiv, 4).—Kitto, s. v.; Smith, s. v.

E'li (*יְלִי*, for Heb. *יְלִי* [Psa. xxii, 2], *eli', my God*, as it is immediately rendered), an exclamation used by our Saviour on the cross, in appeal to his heavenly Father (Matt. xxvii, 46). See AGONY. In the parallel passage (Mark xv, 34) it is written *Ἐλωι, ELOI* (q. v.).

Eli- (*יְלִי*, an old form of the "construct state" of *יְלִי*, the *Mighty*, i. e. Almighty, the union vowel *i* being used as in *Abi-*, *Ahi-*, etc.) often occurs as the first element of proper names (comp. *Elihu*, *Elijah*, and many others here following), as referring to the highest notion of the Deity among the Shemitic races. As such epithet it is sometimes interchangeable with *Baal-* (q. v.) (see 2 Sam. v, 16; 1 Chron. xiv, 7), or even *Jeho-* (q. v.) (see 2 Kings xxiii, 34). This constructive form is also sometimes interchanged with the abbreviation of the simple *יְלִי* into *יְלִי* (1 Chron. iii, 6; xiv, 5; comp. Exod. vi, 22; Num. iii, 30), or it even exchanges places with the other element of the name, e. g. *Elium* (2 Sam. xi, 3) becomes *Amniel* (1 Chron. iii, 5). As in the words beginning with *Abi-*, *Ahi-*, etc., this element often melts into the other member, not strictly in a genitive sense, but as a sort of liturgical invocation or eulogium of the Deity, as is found to be the case with similar names used as religious formulae, especially among the ancient Phœnicians (see ELIHANAN).

E'liab [usually *Eli'ab*] (Heb. *Eliab'*, *יְלִי־אֵב*, to whom *God is father*; Sept. *Ἐλιὰβ*, Vulg. *Eliab*), the name of seven men.

1. A Reubenite, son of Pallu or Phallu, whose family was one of the principal in the tribe, and father or progenitor of Dathan and Abiram, the leaders in the revolt against Moses (Num. xxvi, 8, 9; xvi, 1, 12;

Deut. xi, 6). B.C. post. 1856. Eliab had another son named Nemuel; and the record of Num. xxvi is interrupted expressly to admit a statement regarding his sons.

2. A son of Helon, and phylarch of the tribe of Zebulun at the time of the census in the wilderness of Sinai (Num. i, 9; ii, 7; vii, 24, 29; x, 16). B.C. 1657.

3. An ancestor of Samuel (q. v.) the prophet, being a Kohathite Levite, son of Nahath and father of Jeroham (1 Chron. vi, 27 [12]). B.C. cir. 1250. In the other statements of the genealogy this name appears to be given as ELIHU (1 Sam. i, 1) and ELIEL (1 Chron. vi, 34 [19]).

4. The eldest son of Jesse and brother of David (1 Sam. xvi, 6; xvii, 13; 1 Chron. ii, 13). It was he that made the contemptuous inquiry, by which he sought to screen his own cowardice, when David proposed to fight Goliath, "With whom hast thou left those few sheep in the wilderness?" (1 Sam. xvii, 28.) B.C. 1063. His daughter Abihail married her second cousin Rehoboam, and bore him three children (2 Chron. xi, 18); although, taking into account the length of the reigns of David and Solomon, it is difficult not to suspect that the word "daughter" is here used in the less strict sense of granddaughter or descendant. In 1 Chron. xxvii, 18, we find mention of "ELIHU, of the brethren of David," as "ruler" (*יְרֵיב*) or "prince" (*יְרֵיב*) of the tribe of Judah. According to the ancient Hebrew tradition preserved by Jerome (*Quæst. Heb.* ad loc.), this Elihu was identical with Eliab. "Brethren" is, however, often used in the sense of kinsman, e. g. 1 Chron. xii, 2.—Smith, s. v.

5. The third of the Gadite heroes who joined David in his stronghold in the wilderness (1 Chron. xii, 9). B.C. 1061.

6. A Levite in the time of David, who was both a "porter" (*שְׁוֹרֵי*, *shōrē*, i. e. a door-keeper) and a musician of the "psaltery" (1 Chron. xv, 18, 20; xvi, 5). B.C. 1013.

7. Son of Nathanael, one of the forefathers of Judith, and therefore belonging to the tribe of Simeon (Judith viii, 1).

Eli'ada (Heb. *Elyada'*, *יְלִי־אָדָא*, whom *God has known*), the name of three men.

1. (Sept., in Kings, *Ἐλιὰδ*, and repeated, *Βααλ-μαϊθ*; in Chron. *Ἐλιαδᾶ*, v. r. *Ἐλιᾶδα*; Vulg. *Elioda*, *Elidada*.) One of David's sons; according to the list, the youngest but one of the family born to him after his establishment in Jerusalem (2 Sam. v, 16; 1 Chron. iii, 8). B.C. post 1033. From the latter passage it appears that he was the son of a wife and not of a concubine. In 1 Chron. xiv, 7, the name appears in the form of *יְלִי־בְעִלְיָדָא*, BEELIADA (q. d. whom the *Master has known*; see Simonis, *Onomast.* p. 460; *בְּעִלְיָדָא* being the Syriac form of *בְּעִלְיָדָא*, *Lord*). This curious reading of the Masoretic text is not, however, indisputable; De Rossi's *Cod.* 186 (*primū manu*) reads *יְלִי־אָדָא*, the Sept. *Ἐλιαδῆ*, and the Peshito *Elidada*. On the strength of these authorities, De Rossi (after Dathius, *Lit. Hist. V. T.* p. 654) pronounces in favor of assimilating this passage to the other two, and refers to the improbability of David's using the names *יְלִי* and *בְּעִלְיָדָא* promiscuously (see De Rossi's *Var. Lect. V. T. Hebraicæ*, iv). We must not, however, in the interest of careful criticism, too hastily succumb to arguments of this kind. As to MSS., the four or five which Kennicott adduces all support the text of 1 Chron. xiv, 7; the authority of the Sept. is neutralized by *Codd. Alex.* and *Friël. August.*, the former of which has *Βαλλιαδᾶ*, and the latter *Βαλεγᾶδῆ*, evidently corroborating the Masoretic text, as does the Vulg. *Baal-iadr*. As to the difficulty of David's using a name which contained *בְּעִלְיָדָא* for one of its elements, it is at

least very doubtful whether that word, which literally means *master, proprietor, husband*, and is often used in the earlier Scriptures inoffensively (see Gesenius, *Thes.* p. 224), in David's time had acquired the bad sense which *Baal*-worship in Israel afterwards imparted to it. It is much to the present point that in this very chapter (ver. 11) David does not object to employ the word בַּזְזִים in the name *Baal-perazim*, in commemoration of a victory vouchsafed to him by the Lord (see 2 Sam. v, 20, where the naming of the place is ascribed to David himself). It is possible that this appellation of his son might itself have had reference to that signal victory. The name appears to be omitted by Josephus in his list of David's family (*Ant.* vii, 3, 3), unless he be there called *Elien* (Ἐλιών).—Kitto, s. v.; Smith, s. v.

2. (Sept. Ἐλιαδά, v. r. Ἐλιαδαί; Vulg. *Eliada*.) Apparently an Aramite of Zobah, the father of Rezon, which latter was captain of a marauding band that annoyed Solomon (1 Kings xi, 23, where the name is Anglicized "Eliadah"). B. C. ante 975.

3. (Sept. Ἐλιαδά, Vulg. *Eliada*.) A mighty man of war (יְהוֹרָם בֶּן-יִשָּׁכָר), a Benjamite, who led 200,000 (?) archers of his tribe to the army of Jehoshaphat (2 Chron. xvii, 17). B. C. 945. See JEIOSHAPHAT.

**Eli'adah** (1 Kings xi, 23), a less correct mode of Anglicizing the name *Eliad* (q. v.).

**Eli'adas** (Ἐλιαδάς, Vulg. *Eliadas*), one of "the sons of Zanoth" who divorced his Gentile wife after the restoration from Babylon (1 Esdr. ix, 28); evidently the ἘΛΙΟΕΝΑΙ (q. v.) of the Heb. text (Ezra x, 27).

**Eli'adun** (Ἠλιαδοῦν v. r. Ἡλιαδοῦν, Vulg. omits), a name given as that of the father of Joda, whose sons and brethren assisted in rebuilding the Temple after the return from Babylon (1 Esdr. v, 58); apparently a corruption for the HENADAD (q. v.) of the Hebrew narrative (Ezra iii, 19).

**Eli'ah** (1 Chron. viii, 27; Ezra x, 26), a less correct mode of Anglicizing the name of ELIJAH (q. v.), but referring to others than the prophet.

**Eli'ahba** (Heb. *Elyachba'*, אֵלִיָּאָבָה, but in Chron. *Elyachba'*, אֵלִיָּאָבָה, whom *God will hide*; Sept. Ἐλιαβά, Vulg. *Eliabai*), a Shaalbonite; one of David's thirty chief warriors (2 Sam. xxiii, 32; 1 Chron. xi, 33). B. C. 1046.

**Eli'akim** (Heb. *Elyakim'*, אֵלִיָּאֲכִים, whom *God will raise up*; Sept. Ἐλιακίμ and Ἐλιακίμ; N. T. Ἐλιακίμ; Josephus, Ἐλιακίμος, *Ant.* x, 1, 2; Vulg. *Eliacim*), the name of five men.

1. The son of Melea and father of Jonan, in the genealogy (q. v.) of Christ (Luke iii, 30); probably the grandson of Nathan, of the private line of David's descent (Strong's *Harm. and Expos.* p. 16). B. C. considerably post 1013.

2. Son of Hilkiah, and prefect of the palace under king Hezekiah, who sent him to receive the message of the invading Assyrians, and report it to Isaiah (2 Kings xviii, 18; xix, 2; Isa. xxxvi, 3, 11, 22; xxxvii, 2). B. C. 713. He succeeded Shebna in this office after the latter had been ejected from it (Grotius thinks by reason of his leprosy) as a punishment for his pride (Isa. xxii, 15-20). Eliakim was a good man, as appears by the title emphatically applied to him by God, "my servant Eliakim" (Isa. xxii, 20), and as was evinced by his conduct on the occasion of Sennacherib's invasion (2 Kings xviii, 37; xix, 1-5), and also in the discharge of the duties of his high station, in which he acted as a "father to the inhabitants of Jerusalem and to the house of Judah" (Isa. xxii, 21). It was as a special mark of the divine approbation of his character and conduct, of which, however, no further details have been preserved to us, that he was raised to the post of authority and dignity which

he held at the time of the Assyrian invasion. What this office was has been a subject of some perplexity to commentators. The ancients, including the Sept. and Jerome, understood it of the priestly office, as appears by the rendering of אֲרֹן (Isa. xxxi, 15; A. V. "treasurer") by *παστοφόριον*, the "priest's chamber," by the former, and of אֲרֹן הַבַּיִת ("over the house," as Isa. xxxvi, 3) by "*propositus templi*," by the latter. Hence Nicephorus, as well as the author of the Alexandrian Chronicle, includes in the list of high-priests Somnas or Sobnas (i. e. Shebna), and Eliakim, identifying the latter with Shallum and Meshullam. But it is certain from the description of the office in Isa. xxii, and especially from the expression in ver. 22, "The key of the house of David will I lay upon his shoulder," that it was the king's house, and not the house of God, of which Eliakim was prefect, as Ahishar had been in the reign of Solomon (1 Kings iv, 6), and Azrikam in that of Ahaz (2 Chron. xxxvii, 7). With this agrees both all that is said, and all that is not said, of Eliakim's functions. The office seems to have been the highest under the king, as was the case in Egypt, when Pharaoh said to Joseph, "Thou shalt be over my house (אֲרֹן הַבַּיִת) . . . only in the throne will I be greater than thou" (Gen. xli, 40; comp. xxxix, 4). In 2 Chron. xxxviii, 7, the office is called "governor (אֲרֹן) of the house." It is clear that the "scribe" was inferior to him, for Shebna, when degraded from the prefecture of the house, acted as scribe under Eliakim (2 Kings xviii, 37). The whole description of it too by Isaiah implies a place of great eminence and power. This description is transferred in a mystical or spiritual sense to Christ the son of David in Rev. iii, 7, thus making Eliakim in some sense typical of Christ. The true meaning of אֲרֹן, *soken'*, is very doubtful. "Friend," i. e. of the king; and "steward of the provisions," are the two most probable significations. See TREASURER. Eliakim's career was a most honorable and splendid one. Most commentators agree that Isa. xxii, 25 does not apply to him, but to Shebna.—Smith, s. v.

3. The original name of Jehoikim (q. v.), king of Judah (2 Kings xxiii, 34; 2 Chron. xxxvi, 4).

4. Son of Abiud and father of Azor, of the posterity of Zerubbabel (Matt. i, 13). He is probably identical with the SHECHANIAM (q. v.) of 1 Chron. iii, 21 (Strong's *Harmony and Expos. of the Gospels*, p. 11). See GENEALOGY (OF CHRIST).

5. A priest in the days of Nehemiah, who assisted at the dedication of the new wall of Jerusalem (Neh. xii, 41). B. C. 446.

**Eli'ali** (Ἐλιαλί v. r. Ἐλιαλεί, Vulg. *Dielus*), one of "the sons of Maani" who divorced his Gentile wife after the exile (1 Esdr. ix, 34); apparently a corruption for the BISSUI (q. v.) of the Heb. text (Ezra x, 38).

**E'liam** [usually *El'am*] (Heb. *Eliam'*, אֵלִיָּאָם, *God is [his] people*, i. e. *friend*; Sept. Ἐλιαός, Vulg. *Eliam*), the father of Bathsheba, the wife of Uriah and afterwards of David (2 Sam. xi, 3). In the list of 1 Chron. iii, 5, the names of both father and daughter are altered, the former to the equivalent AMMIEL (q. v.), and the latter to Bathshua, both the latter names being also those of non-Israelite persons, while Uriah was a Hitite (comp. Gen. xxxviii, 12; 1 Chron. ii, 3; also 2 Sam. xvii, 27). The same name Eliam also occurs as that of a Gilonite, the son of Abithophel, and one of David's "thirty" warriors (2 Sam. xxiii, 34). It is omitted in the list of 1 Chron. xi, but is now probably discernible as "AMUJAM the Pelonite" (ver. 36) (see Kennicott, *Dissertation*, p. 207). The ancient Jewish tradition preserved by Jerome (*Qu. Hebr.* on 2 Sam. xi, 3, and 1 Chron. iii, 5) is that the two Eliams are the same person. An argument has been founded

on this to account for the hostility of Abithophel to king David, as having dishonored his house and caused the death of his son-in-law (Blunt, *Coincidences*, pt. ii, x). But he would perhaps have rather been proud of this alliance with royalty. B.C. 1046.—Smith, s. v.

**Eliāōnias** [many *Eliōnias*'] (*Ἐλιωνίας*, Vulg. *Morbilianus*, including the preceding name), a son of Zarahias of Pahath-Moab, leader of two hundred exiles from Babylon (1 Esdr. viii, 31); evidently the *ELIHOENAI* (q. v.) of the Heb. text (Ezra viii, 4).

**Eli'as** (*Ἠλιᾶς*, in Maccabees, elsewhere and in N. T. *Ἠλιᾶς*, Vulg. *Elias*, but in Cod. Amiat. *Heliōs*), the Græcized form in which the name of *ELIJAH* (q. v.) is given in the A. V. of the Apocrypha and N. T. (Ecclus. xlviii, 1, 4, 12; 1 Macc. ii, 58; Matt. xi, 14; xvi, 14; xvii, 3, 4, 10, 11, 12; xxvii, 47, 49; Mark vi, 15; viii, 28; ix, 4, 5, 11, 12, 13; xv, 35, 36; Luke i, 17; iv, 25, 26; ix, 8, 19, 30, 33, 54; John i, 21, 25; Rom. xi, 2; James v, 17). In Rom. xi, 2, the reference is not to the prophet, but to the portion of Scripture designated by his name, the words being *ἐν Ἠλιᾷ*, "in Elias," not as in A. V. "of Elias."—Smith, s. v.

**Elias Levita** (properly *ELIJAH the Levite, son of Asher*), one of the greatest Jewish scholars of modern times, was born in the latter half of the fifteenth century. Both the year and the place of his birth have been the subject of literary controversy. The former point seems to have been settled by the learned Rossi (see below), who showed that Elias was born in 1471 or 1472, not, as Hirt maintains, in 1469, or, as Nagel undertook to prove, in 1477. The second point is still a point of dispute, both Italians and Germans being desirous to claim this great writer for their country. The chief argument of the former is that Elias, in one of his works, speaks of Italy as "my country" and Venice as "my city;" the chief arguments of the Germans are that Elias, on the titles-pages of several of his books, calls himself *Ashkenazi* (*אַשכּנזי*), or "the German," and that, according to the express testimony of his friend and pupil, Sebastian Münster (q. v.), he was born at Neustadt, on the Aich, not far from Nuremberg. The margrave of Neustadt expelled Elias, together with several other Jews, from that town. He then went to Italy, lived in several places as teacher of the Hebrew language, especially (from 1504) at Padua, where he lectured on the Hebrew grammar of Moses Kimchi, and wrote a commentary on it. When Padua, in 1509, was captured and plundered, Elias lost all his property and went to Venice, which city, in 1512, he again left for Rome. There he met with a very friendly reception from cardinal Egidio of Viterbo, who even received him and his family into his own house. For many years Elias instructed the cardinal in the Hebrew language, who, in turn, made him better acquainted with the classical languages. Through Egidio, Elias entered into intimate relations with a number of other cardinals and bishops, who so warmly recommended him that he received an honorable call from king François I of France, which he, however, declined. When Rome, in 1527, was plundered by the troops of Karl V, Elias again lost his whole property. He again went to Venice, where he remained until 1540, when he accepted a call from Paul Fagius to assist him in the establishment of a new Hebrew printing-office, and in the publication of several Hebrew books, at Isny, in Suabia. He remained in Isny until 1547, when he returned to Venice, where he died in 1549. Elias rejected many of the Jewish traditions, and always spoke favorably of the Christians; but he expressly denied that he had secretly become a Christian, and averred that, "thanks to God, he was still a Jew." He was universally esteemed both for his character and his extraordinary scholarship; only some fanatical Jews hated him, as they suspected his fidelity to Judaism. His celebrated works on Hebrew

grammar procured him the surname of "the Grammarian" (*הַמְּדַבֵּר*). His first work was a commentary on the *מְחֻלָּקִים* (*Mahalak*), or grammar of the rabbi Moses Kimchi, first published by a certain Benjamin who had stolen the MS. (at Pesaro, 1508; frequently reprinted, with a Latin translation by Sebastian Münster, Basel, 1527, 1531; and another by L'Empereur, Leyd. 1631). This is a different work from his scholia on Kimchi's *פֶּתַח דְּבַרָּי* (*Pethach Debaray*), or brief grammatical introduction, the text of which had appeared at Naples in 1492, and Levita's scholia on it at Pesara in 1507, and later editions. At Rome he composed a grammar entitled *חֹב בַּחֹר* (*hab-Bachur*, Rome, 1518), and a work on "Composition" (*חֵבֶרֶת פְּתִיחָה*, Rome, 1519), in which he treats of the irregular words of the Bible. Both works were translated by Münster (the former first at Basel in 1518, and the latter in 1536). He also wrote a more extensive grammatical treatise in four parts, entitled *פְּתִיחַת אֲשֵׁרֵי*, "*Elijah's Sections*" (Soncino, 1520, and later elsewhere; trans. by Münster, Basel, 1527, and later). After his return to Venice he wrote a book on the accents (*טַבְּ טַבְּ טַבְּ*) *Tub Taam* (Ven. 1538, and other eds.; likewise translated by Münster, Basel, 1539), and, the most celebrated of all his works, a critical book on the Biblical text and its authors (*מַסֹּרֶת הַמִּסֹּרֶת*, *Masoreth ham-Masoreth* (Venice, 1538, 1546; Basel, 1539 [with a Latin summary of the work by Münster; Sulzläch, 1769 and 1771]). This work, remarkable alike for literary merit, although it anticipated the judgments of the highest modern criticism on the questions of which it treats, and although it was, in fact, the father of the great Buxtorf and Cappel controversy, which raged round the Hebrew Scriptures for more than a hundred years after Levita's death, had, until recently, never been actually translated either into Latin or any modern language. Nagel translated into Latin the three introductions (Aldorf, 1757-1771); and there is a so-called German translation of Levita's book, published at Halle in 1772, and commonly known as Semler's. But Semler was not really, as indeed he did not profess to be, the translator of Levita. The translation, such as it was, was executed by a young Jewish convert to Christianity of the name of Meyer, and all that Semler did was to supervise and annotate the German rendering. After all, the work was full of errors, and many valuable passages of the original are altogether omitted. A complete and very carefully executed translation into English, together with a critical edition of the original, was in 1867 published by Dr. Ginsburg (*The Masoreth ha-Masoreth of Elias Levita, in Hebrew, with an English Translation and Explanatory Notes*, London, 1867). Among the works compiled by him at Isny is a Chaldaic-Rabbinical Dictionary (*מִתְּחֵלָה*, *Methurgeman*, Isny, 1541; Ven. 1560). Elias also prepared a German translation of the Psalms (Ven. 1545), and was, according to Sabbai, the author of a Hebrew-German novel, *Baba*. A full list of these and other works of Elias, with their editions, translations, etc., also bibliographical treatises on them and their author, may be found in Fürst's *Bibliotheca Judaica*, ii, 239 sq. A valuable biography of Elias is found in Dr. Ginsburg's edition of *Masoreth ham-Masoreth*, cited above; see also Herzog, *Real-Encycl.* iii, 758; Hofer, *Nour. Biog. Gén.* xv, 810; Rossi, *Dizionario storico degli Autori Ebrei* (German transl. [*Hist. Handwörterbuch der jüd. Schriftsteller*] by Dr. Hammerger, Leipz. 1839); Hirt, *Oriental. und Exeget. Bibliothek*, pt. vii, Jena, 1755; Wolfii *Bibliotheca Hebraea*, Hamburg, 1715, i, 153. (A. J. S.)

**Eli'asaph** (Heb. *Elyasaph*, *אֵלְיָאֶשָׁף*, whom *God has added*; Sept. *Ἐλισάφ*), the name of two Israelites at the time of the Exode.

1. Son of Reuel or Deuel, and phylarch of the tribe of Dan (Num. i, 14; ii, 14; vii, 42, 47; x, 20). B.C. 1657.

2. Son of Lael, and chief of the family of the Gershonite Levites (Num. iii, 24). B.C. 1657.

**Eli'ashib** (Heb. *Elyashib'*, עֲלִישִׁיב, whom *God will restore*; Sept. Ἐλιασιβίων, Ἐλιασίβι, Ἐλιασιβ, Ἐλιασιβίβ, etc.; Josephus Ἐλιασίβος; Vulg. *Elyasub, Eliasib*), a common name of Israelites, especially at the later period of the O.-T. history.

1. A priest in the time of king David; head of the eleventh "course" in the order of the "governors" (עֲלִישִׁיב) of the sanctuary (1 Chron. xxiv, 12). B.C. 1013.

2. A Levitical singer who repudiated his Gentile wife after the exile (Ezra x, 24). B.C. 458.

3. An Israelite of the lineage of Zattu, who did the same (Ezra x, 27). B.C. 458.

4. An Israelite of the lineage of Bani, who did the same (Ezra x, 36). B.C. 458.

5. The high-priest of the Jews in the time of Nehemiah (Neh. xii, 28). B.C. 446. With the assistance of his fellow-priests, he rebuilt the eastern city wall adjoining the Temple (Neh. iii, 1). His own extensive mansion was doubtless situated in the same vicinity, probably on the ridge Ophel (Neh. iii, 20, 21). See JERUSALEM. Eliashib was in some way allied (עֲרִיב = near) to Tobiah the Ammonite, for whom he had prepared an ante-room in the Temple, a desecration which excited the pious indignation of Nehemiah (Neh. xiii, 4, 7). One of the grandsons of Eliashib had also married the daughter of Sanballat the Hironite (xiii, 28). There seems no reason to doubt that the same Eliashib is referred to in Ezra x, 6, as the father of Johanan, who occupied an apartment in the Temple (comp. Josephus, *Ant.* xi, 5, 4). He is evidently the same with the son of Joiakim and father of Joiada (Josephus, "Judas," *Ant.* xi, 7, 1), in the succession of high-priests (Neh. xii, 10, 22). See HIGH-PRIEST.

6. A son of Elioenai, and member of the latest family of the lineage of Zerubbabel, mentioned in the Old Test. (1 Chron. iii, 24). B.C. 406.

**Eli'asib** (Ἐλιασίβος), the Grecized form (1 Esdr. ix, 1) of the name of the high-priest ELIASHIB (q. v.).

**Eli'asis** (Ἐλιασίς v. r. Ἐλιάσις), a name given (1 Esdr. ix, 34) as that of one of the "sons of Maani" who divorced their Gentile wives after the captivity, and corresponding in position to MATTHENAI (q. v.) of the Heb. list (Ezra x, 33); but probably a merely erroneous repetition of EXASIBOS (q. v) preceding in the same verse.

**Eli'athah** (Heb. *Eliá' thah*, עֲלִיָּאֲתָה, 1 Chron. xxxv, 4, or *Eliya' thah*, עֲלִיָּיָה, ver. 27, to whom *God will come*; Sept. Ἐλιαθά v. r. Ἐλιάθ, Vulg. *Eliathah*), the eighth named of the fourteen sons of the Levite Heman, and a musician in the Temple in the time of king David (1 Chron. xxv, 4), who, with twelve of his sons and brethren, had the twentieth division of the Temple-service (xxv, 27). B.C. 1013. In Jerome's *Quest. Hebr.* on ver. 27, the name is given as *Eliaba*, and explained accordingly; but not so in the Vulgate.

**Eliberis**. See ELYVIRA.

**Eli'dad** (Hebrew *Eliáda'*, עֲלִידָד, whom *God has loved*; Sept. Ἐλάδ, Vulg. *Eldad*), the son of Chislon, and phylarch of the tribe of Benjamin, one of the commissioners appointed to portion out the promised land among the tribes (Num. xxxi, 7, 21). B.C. 1619.

**E'liel** (Heb. *Eliél'*, עֲלִיֵּל, to whom *God is might*), the name of some nine Israelites.

1. (Sept. Ἐλιήλ.) A valiant phylarch of the tribe of Manasseh east (1 Chron. v, 24). B.C. post 1612.

2. (Sept. Ἐλιήλ.) Son of Toah and father of Jerohan, ancestors of Heman the singer and Levite (1 Chron. vi, 34); probably identical with the ELIAB of 1

Chron. vi, 34, and the ELIHU of 1 Sam. i, 1. B.C. cir 1250. See SAMUEL.

3. (Sept. Ἐλιήλ.) One of the descendants of Shim' hi, and head of a Benjamite family in Jerusalem (1 Chron. viii, 20). B.C. between 1612 and 588.

4. (Sept. Ἐλιήλ.) One of the descendants of Shashak, and likewise head of a Benjamite family at Jerusalem (1 Chron. viii, 22). B.C. eod.

5. (Sept. Ἐλιήλ v. r. Ἐλιάβ.) The seventh of the Gadite heroes who joined David in his stronghold in the wilderness (1 Chron. xii, 11), possibly the same with No. 6 or 7. B.C. 1061.

6. (Sept. Ἐλιήλ v. r. Ἰελιήλ.) A Mahanite (q. v), and one of David's distinguished warriors (1 Chron. xi, 46). B.C. 1046.

7. (Sept. Ἰαλιήλ v. r. Δαλιήλ.) Another of David's distinguished warriors (1 Chron. xi, 47). B.C. eod.

8. (Sept. Ἐλιήλ.) Chief of the 80 Hebronite Levites assembled by David to assist in bringing the ark to Jerusalem (1 Chron. xv, 9, 11). B.C. 1043.

9. (Sept. Ἐλιήλ.) One of the Levites appointed by Hezekiah to have charge of the offerings for the Temple services (2 Chron. xxxi, 13). B.C. 726.

**Elié'nai** (Heb. *Eliénay'*, עֲלִינָי, perh. contracted for ELIOENAI [q. v.]; Sept. *Eliouyai* v. r. Ἐλιουναί, Vulg. *Elioenai*), one of the Bene-Shimhi Benjamite heads of families resident at Jerusalem (1 Chron. viii, 20). B.C. between 1618 and 588.

**Elié'zer** (Heb. *id.* עֲלִיזֵר, *God is his help*, a modification of the name *Elezar* [see LAZARUS]; Sept. Ἐλιέζερ and Ἐλιέζερ, N. T. Ἐλιέζερ), the name of eleven men.

1. "ELIEZER OF DAMASCUS," mentioned in Gen. xv, 2, 3, apparently as a house-born domestic [see SLAVE] and steward of Abraham, and hence likely, in the absence of direct issue, to become the patriarch's heir. B.C. 2088. The Sept. interprets the terms thus: "But the son of Masek, my house-born maid, is this Heliezer of Damascus." It appeared even thus early that the passage of Scripture in which the name of Eliezer occurs is one of some difficulty. Abraham, being promised a son, says, "I go childless, and the steward of my house is this Eliezer of Damascus (עֲלִיזֵר עַבְדִּי מֵדַמָּשְׁקַי, *he of Damascus, Eliezer*) . . . Behold, to me thou hast given no seed: and, lo, one born in mine house is mine heir" (Gen. xv, 2, 3). The common notion is that Eliezer was Abraham's house-born slave, adopted as his heir, and meanwhile his chief and confidential servant, and the same who was afterwards sent into Mesopotamia to seek a wife for Isaac (q. v.). This last point we may dismiss with the remark that there is not the least evidence that "the elder servant of his house" (Gen. xxiv, 2), whom Abraham charged with this mission, was the same as Eliezer. The obvious meaning is that Eliezer was born in Damascus, and how is this compatible with the notion of his being Abraham's house-born slave, seeing that Abraham's household never was at Damascus? It is true that there is a tradition, quoted by Josephus from Nicolaus of Damascus (*Ant.* i, 7, 4), that Abraham "reigned in Damascus;" but the tradition was probably founded on this very passage, and has no claim on our belief. The Mohammedans call him *Dameshak*, or *Damascennis*, and believe him to have been a black slave given to Abraham by Nimrod, at the time when he saw him, by virtue of the name of God, walking out of the midst of the flames (Ur), into which he had been cast by his orders. See ABRABAM. The expression, "the steward of mine house," in ver. 2, עֲבֵד בְּיַדְּךָ מֵבֵיתִי (note the alliteration between the obscure term *meshek* and *Dammesek*), literally translated, is "the son of possession of my house," i. e. one who shall possess my house, my property, after my death, and is therefore exactly the same as the phrase in the next verse, "the son of my house

(עֲבָדֵי הַבַּיִת, paraphrased by "one born in mine house") is mine heir." This removes every objection to Eliezer's being of Damascus, and enables us to dispense with the tradition; for it is no longer necessary to suppose that Eliezer was a house-born slave, or a servant at all, and leaves it more probable that he was some near relative whom Abraham regarded as his heir-at-law. It is by no means certain that "this Eliezer" was present in Abraham's camp at all; and we, of course, cannot know in what degree he stood related to Abraham, or under what circumstances he was born at, or belonged to Damascus. It is possible that he lived there at the very time when Abraham thus spoke of him, and that he is hence called "Eliezer of Damascus." This view removes another difficulty, which arises from the fact that, while Abraham speaks of Eliezer as his heir, his nephew Lot was in his neighborhood, and had until lately been the companion of his wanderings. If Eliezer was Abraham's servant, it might well occasion surprise that he should speak of him and not of Lot as his heir; but this surprise ceases when we regard Eliezer as also a relative, and if so, a nearer relative than Lot, although not, like Lot, the companion of his journeys. Some have supposed that Lot and Eliezer were, in fact, the same person; and this would be an excellent explanation if the Scriptures afforded sufficient grounds for it. (See Gesenius, *Theo. Heb.* s. v. עֲבָדֵי הַבַּיִת; Rosenmüller, on Gen. xv; Knobel, *Comment.* in loc.)—Kitto, s. v.

2. A son of Becher, and grandson of Benjamin (1 Chron. vii, 8). B.C. post 1856.

3. (Josephus *Ἐλεάζαρος*, *Ant.* ii, 13, 1.) The second of the two sons of Moses and Zipporah, born during the exile in Midian, to whom his father gave this name, "because, said he, the God of my fathers was my help, that delivered me from the sword of Pharaoh" (Exod. xviii, 4; 1 Chron. xxiii, 15, 17). B.C. cir. 1600. He remained with his mother and brother Gershom, in the care of Jethro his grandfather, when Moses returned to Egypt (Exod. iv, 18), she having been sent back to her father by Moses (Exod. xviii, 2), though she set off to accompany him, and went part of the way with him. Jethro brought back Zipporah and her two sons to Moses in the wilderness, after he heard of the departure of the Israelites from Egypt (xviii). Eliezer had one son, Rehabiah, from whom sprang a numerous posterity (1 Chron. xxiii, 17; xxvi, 25, 26). Shelomith, in the reigns of Saul and David (ver. 28), who had the care of all the treasures of things dedicated to God, was descended from Eliezer in the 6th generation, if the genealogy in 1 Chron. xxvi, 25, is complete.—Smith, s. v.

4. One of the priests who blew with trumpets before the ark when it was brought to Jerusalem (1 Chron. xv, 24). B.C. 1043.

5. Son of Zichri, and chief of the Reubenites under David (1 Chron. xxvii, 16). B.C. ante 1013.

6. A prophet (son of Dodavah of Mareshah), who foretold to Jehoshaphat (q. v.) that the merchant fleet which he fitted out in partnership with Abaziah should be wrecked, and thus prevented from sailing to Tarsish (2 Chron. xx, 37). B.C. 895.

7. Son of Jorim, and father of Joseph, of the private lineage of David prior to Salathiel (Luke iii, 29). B.C. ante 588.

8. One of the chiefs of the Jews during the exile, sent by Ezra, with others from Ahava, to Casiphia, to induce some Levites and Nethinim to join the party returning to Jerusalem (Ezra viii, 16). B.C. 459.

9. One of the priests (of the kindred of Joshua) who divorced his Gentile wife after the exile (Ezra x, 18). B.C. 458.

10. A Levite who did the same (Ezra x, 23). B.C. 458.

11. An Israelite of the lineage of Harim, who did the same (Ezra x, 31). B.C. 458.

**Eliezer ben-Elias Aschenazi** (i. e. *son of Elijah, the German*), a distinguished Rabbi, was born about the opening of the 16th century, and practiced medicine at Cremona. Obligated to leave that town, he went to Constantinople, and was intrusted with the care of the synagogue at Naxos, in the Archipelago. Finally he went to Poland, and was made chief Rabbi of the synagogue at Posen. His coreligionists regard him as one of the most learned men of the 16th century. He died at Cracow in 1586. He published *הַשְּׁמֵרָה הַשְּׁמֵרָה* (Cremona, 1576, and often), a commentary on Esther:—*עֲבָדֵי הַבַּיִת* (*Work of Jehovah*), in which he describes the historical events of the Pentateuch (Venice, 1583; Cracow, 1584, and later), and one or two less important works.—Hoefler, *Nouv. Biogr. Génér.* xv, 827. (J. H. W.)

**Eliezer ben-Hyrkanos**, surnamed the Great, was born about the middle of the 1st century. He was of a good family, but his early education was very much neglected, and at the age of 28, urged by an awakened impulse after knowledge, he left his father's house and became a disciple of Johanan ben-Zachai. Eliezer soon repaired his deficiencies, and became one of the distinguished Rabbins of his age. Profound in the *Cabala* (q. v.), he made many practical acquisitions in magical science, and became the thaumaturgist of the school. During the controversies between Gamaliel (q. v.) and the rival doctors at Jamnia, he founded a school at Lydda, where his teaching appears to have assumed so mystical a character as to involve him in difficulties with the rabbinical authorities. The Karaites regarded Eliezer as one of the defenders of their doctrines. He died about 73 A.D., at Cæsarea, in Palestine. His principal work is *Virke R. Eliezeris* (edit. Princ. Hebraice, Venet. 1544, 4to), translated into Latin with notes by Vorstius (Leyd. 1614, 4to), ed. by Abr. Aaron Broda, with a Heb. commentary (Wilna, 1838, 4to), and often republished. See *Boraiha der R. Eliezer*, by Leop. Zunz (Berlin, 1832), a critical account of the work and its author. He is regarded also as the author of *Ortocheilaim* (*The Way of Life*), which has been often reprinted.—Hoefler, *Nouv. Biogr. Génér.* xv, 825-6; Etheridge, *Introd. to Heb. Literature*, p. 60 sq.; Grässe, *Allgem. Literärgesch.* i, 1108 sq. (J. H. W.)

**Eliezer ben-Judah** (sometimes called ELEAZAR GARMIZA, but apparently without good reason), of Worms, the son of Kalonymos of Mentz, was one of the most distinguished Rabbins of the 13th century. He was a pupil of Judah the Saint, and died in 1238. He wrote thirty works, of which only a few have been printed. The principal ones are: *Yoreh Chataim* *יְוֵרֵה חַטָּאִים*, "he will instruct sinners" a liturgical and ascetic formulary (Venice, 1589, 8vo, and often):—*Yeyn ha-Rekach* *יַיִן הַרַקָּח*, "wine of spicery"), a cabalistic commentary on Canticles and Ruth (Lublin, 1608, 4to):—*Sypher Rokeach* *סֵפֶר רֹקַעַח*, "spiced book"), on the fear of God and repentance (Fano, 1505, fol., and often since):—*שְׁפָרַיִם*, etc., a commentary on the cabalistic book *Jezirah* (Mantua, 1562, 4to, and since):—*שְׁפָרַיִם*, etc., a cabalistic exposition of the Pentateuch (extracts in Azulai's *מִקְרָאֵי תַּלְמוּד*, Leghorn, 1800):—*רֵזִיזֵי רֵזִיזֵי*, on angelology (in part, Amst. 1701, 4to). Several of his works in MS. are at the *Bibliothèque de l'Oratoire* at Paris.—Hoefler, *Nouv. Biogr. Génér.* xv, 826-7; Grässe, *Allgem. Literärgesch.* iii, 521; Fürst, *Bibliotheca Judaica*, i, 228. (J. H. W.)

**Eliezer ben-Nathan**, sometimes also surnamed Metz, from his native place, was a contemporary of Rashi, and eminent in the cabalistic science. His renown is greatly due to a work on Talmudical law which he composed in 1152, under the title *אֲבֵן חֵץ* (*stone of help*), printed at Prague in 1610. The Rabbis Jachia and Wolf ascribe to him also the author-

ship of *Tsophnath Paaneach*, but Rossi asserts that Eliezer of Spain was the real author of that work. It appears to be only another title of the preceding work. He wrote also **רֵיבִּיבִּי פִּיטְיָה** (Constantinople, 1520, and later) and **פְּאָרִי הַשְּׂפֵל** (Cremona, 1554, and later); both relating to the Jewish ritual.—Hoefler, *Nouv. Biog. Génér.* xv, 826; Grässe, *Allgem. Literaturgesch.* iii, 502.

**Eligius, Eloï, or Eloysius** (Str.), bishop of Noyon, one of the most eminent names in the ecclesiastical history of France, was born at Cadillac, near Limoges, in or shortly before the year 588. He learned the trade of a goldsmith, and became the most skilful artist of the day, especially in ornaments for churches and tombs. He gained the confidence of Clotaire II, and stood high at his court. While working at his art, he always had an open Bible before him. He devoted his gains to works of piety, especially to the redemption of slaves from captivity, sometimes emancipating a hundred at one time. As a layman, he instructed the common people constantly. Dagobert, the son and successor of Clotaire, made him his treasurer, and employed him for important missions, in which he was always successful. Thus he brought about a treaty of peace between Dagobert and Judicahill, duke of Brittany. Eligius availed himself of his influence with the weak and licentious Dagobert to obtain large donations, which he used for the establishment of churches, monasteries, and hospitals. In 640, two years after the death of Dagobert, the major-domo Herchenoald, who was regent during the minority of Clodvig II, in order to get rid of the influence of Eligius, appointed him bishop of Noyon. In this office he was in labors abundant for eighteen years, preaching, taking missionary tours, and founding churches and monasteries. Eligius seems to have been a thoroughly converted man, and his life is indeed a light in a dark place. Eligius, together with his friend Autoenus (St. Ouen), archbishop of Rheims, had a predominant influence upon the churches of Gaul; and although most of the bishops disliked the rigor and severity of Eligius, they yielded to his zeal and authority. Thus, in 644, at a synod of Chalons sur Saone, very strict rules were given for the appointment of bishops and abbots; and the metropolitan Theodosius of Arles, who had violated many Church laws, was suspended from his office. When bishop Martin of Rome, in the Monothelitic controversy, was imprisoned and exiled by the emperor, the majority of the Gallic bishops, at a council held in Orleans, under the leadership of Eligius and Autoenus, declared for the pope and against the Monothelites, who were cruelly persecuted. After the death of Clodvig II and Herchenoald, Eligius was recalled by the queen dowager Bathilde to the court, where he remained until shortly before his death. He died at Noyon Nov. 30, 658 (or 659), and the people soon after began to venerate him as a saint. His life (*Vita S. Eligii*), written by his disciple Autoenus (St. Ouen), will be found in D'Achery, *Spicilegium*, ii, 76-123, and in Migne, *Patrol. Latín.* lxxxix, 474. The extracts from sermons of Eligius which are included in this biography are almost verbally taken from the sermons of Caesarius of Arles. In its present form this work is undoubtedly of a later origin. Sixteen homilies are given to him in *Bib. Max. Patr.* xii, 300; also in Migne, *Patrol. Latín.* lxxxvii, 595; but their genuineness is questioned. A letter from Eligius to bishop Desiderius of Cahors is given in Canisii *Antiquit. Lectión.* ed. Basnage, tom. i, and in Migne, lxxxvii, 657. See Herzog, *Real-Encyclop.* iii, 760; Hoefler, *Nouv. Biog. Génér.* xv, 904; Neander, *Ch. Hist.* iii, 41, 42; Neander, *Light in Dark Places*; Mosheim, *Ch. Hist.* bk. ii, ch. vii, pt. ii, ch. ii, n. 24.

**Elihoë'nai** (Heb. *Elychoë'nay'*, **אֵלִיחֹהַי**, toward Jehovah are my eyes), the name of two men. See also ELIOENAI and ELIENAI.

1. (Sept. *Ἐλιωνάϊ* v. r. *Ἐλιωνάϊ*, Vulg. *Elioenai*.) The seventh and youngest son of Meshelemiah (q. v.) the Levite, of the time of David (1 Chron. xxvi, 3, where the name is improperly Anglicized "Elioenai"). B. C. 1043-13.

2. (Sept. *Ἐλιαυά* v. r. *Ἐλιανά*, Vulg. *Elioenai*.) Son of Zeriahah of the "sons of Pahath-Moab," who returned with 200 males from the exile (Ezra viii, 4). B. C. 459.

**Eliho'reph** (Heb. *Eliho'reph*, **אֵלִיחֹרֵפֶת**, God is his recompense; Sept. *Ἐλιχόρεφ* v. r. *Ἐλάφ* and *Ἐναρόφ*), son of Shisha, and appointed, with his brother Abiah, royal scribe (**סֹפֵר**) by Solomon (1 Kings iv, 3). B. C. 1012.

**Eli'hu** (Heb. *Elihu*, **אֵלִיחִי** [but abbreviated **אֵלִיחִי** in Job xxxii, 4; xxxv, 1; 1 Chron. xxvi, 7; xxvii, 18], whose God is *Ie*, i. e. Jehovah), the name of five men.

1. (Sept. *Ἐλιούε*.) One of Job's friends, described as "the son of Barachel, a Buzite, of the kindred of Ram" (Job xxxii, 2). This is usually understood to imply that he was descended from Buz, the son of Abraham's brother Nahor, from whose family the city called Buz (Jer. xxv, 23) also took its name. The Chaldee paraphrase asserts that Elihu was a relation of Abraham. Elihu's name does not appear among those of the friends who came in the first instance to condole with Job, nor is his presence indicated till the debate between the afflicted man and his three friends had been brought to a conclusion. Then, finding there was no answer to Job's last speech, he comes forward with considerable modesty, which he loses as he proceeds, to remark on the debate, and to deliver his own opinion on the points at issue (Job xxxii, xxxvii). B. C. cir. 2200. It appears, from the manner in which Elihu introduces himself (Job xxxii, 3-7), that he was much the youngest of the party; and it is evident that he had been present from the commencement of the discussion, to which he had paid very close attention. This would suggest that the debate between Job and his friends was carried on in the presence of a deeply-interested auditory, among which was this Elihu, who could not forbear from interfering when the controversy appeared to have reached an unsatisfactory conclusion (see Kitto's *Daily Bible Illust.* in loc.). He expresses his desire to moderate between the disputants; and his words alone touch upon, although they do not thoroughly handle, that idea of the disciplinary nature of suffering, which is the key to Job's perplexity and doubt; but, as in the whole book, the greater stress is laid on God's unsearchable wisdom, and the implicit faith which he demands (see Velthuisen, *De Elia carmine*, Rotterdam, 1789-90). He does not enlarge on any supposable wickedness in Job as having brought his present distresses upon him, but controverts his replies, his inferences, and his arguments. He observes on the mysterious dispensations of Providence, which he insists, however they may appear to mortals, are full of wisdom and mercy; that the righteous have their share of prosperity in this life no less than the wicked; that God is supreme, and that it becomes us to acknowledge and submit to that supremacy, since "the Creator wisely rules the world he made;" and he draws instances of benignity from the constant wonders of creation, of the seasons, etc. His language is copious, glowing, and sublime; and it deserves notice that Elihu does not appear to have offended God by his sentiments; nor is any sacrifice of atonement commanded for him as for the other speakers in the poem. It is almost pardonable that the character of Elihu has been thought figurative of a personage interposed between God and man—a mediator—one speaking "without terrors," and not disposed to overcharge mankind. This sentiment may have had its influence on the ac-

ceptability and preservation of the book of Job (see Hodges's *Elihu*, Oxford, 1750). See JOB (Book of).

2. (Sept. 'Ελιού.) Son of Tohu, and grandfather of Elkanah, Samuel's father (1 Sam. i, 1). In the statements of the genealogy of Samuel in 1 Chron. vi the name ELIEL (q. v.) occurs in the same position—son of Toah, and father of Jeroham (vi, 34 [Heb. 19]); and also ELIAB (vi, 27 [Heb. 12]), father of Jeroham, and grandson of Zophai. The general opinion is that Elihu is the original name, and the two latter forms but copyists' variations of it.—Smith, s. v.

3. (Sept. 'Ελιούδ v. r. 'Ελιούδ.) One of the chiliarchs of Manasseh who joined David at Ziklag (1 Chron. xii, 20), after he had left the Philistine army on the eve of the battle of Gilboa, and who assisted him against the marauding band (777?) of the Amalekites (comp. 1 Sam. xxx). B. C. 1053.

4. (Sept. 'Ελιού.) One of the eminently able-bodied members of the family of Obed-edom (apparently a grandson by Shemaiah), who were appointed porters of the Temple under David (1 Chron. xxvi, 7). B. C. 1043. Terms are applied to all these doorkeepers which appear to indicate that they were not only "strong men," as in A. V., but also fighting men. (See ver. 6, 7, 8, 12, in which occur the words מַרְבָּזִים = army, and מַרְבָּזִים = warriors or heroes.)

5. (Sept. 'Ελιού.) A chief of the tribe of Judah, said to be "of the brethren of David" (1 Chron. xxvii, 18), and hence supposed by some to have been his oldest brother ELIAB (1 Sam. xvi, 6). B. C. 1013 or ante.

ELI'jah (Heb. *Eliyāh*, עֲלִיָּהוּ, whose God is Jehovah, 2 Kings i, 3, 4, 8, 12; 1 Chron. viii, 27; Ezra x, 21, 26; Mal. iv, 5; elsewhere in the prolonged form *Eliyāhu*, עֲלִיָּהוּ; Sept. 'Ηλιού v. r. 'Ηλιας; N. T. 'Ηλιας; Josephus, *Heliac*, *Ant.* viii, 13, 4; Vulg. *Elias*), the name of several men in the O. T., but the later ones apparently all namesakes of the famous prophet.

1. "ELIJAH THE TISHBITE," the "Elias" of the N. T., a character whose rare, sudden, and brief appearances, undaunted courage and fiery zeal—the brilliancy of whose triumphs—the pathos of whose despondency—the glory of whose departure, and the calm beauty of whose reappearance on the Mount of Transfiguration—throw such a halo of brightness around him as is equalled by none of his compeers in the sacred story.

1. *Origin.*—This wonder-working prophet is introduced to our notice like another Melchizedek (Gen. x, 4, 18; Heb. vii, 3), without any mention of his father or mother, or of the beginning of his days—as if he had dropped out of that cloudy chariot which, after his work was done on earth, conveyed him back to heaven. "Elijah the Tishbite, of the inhabitants of Gilead," is literally all that is given us to know of his parentage and locality (1 Kings xvii, 1). The Hebrew text is עֲלִיָּהוּ תִישְׁבִיטִי מִגִּלְעָד. The third word may be pointed (1), as in the present Masoretic text, to mean "from the inhabitants of Gilead," or (2) "from Tishbi of Gilead," which, with a slight change in form, is what the Sept. has (ὁ ἐκ Θάσσεβων). The latter is followed by Ewald (*Isr. Gesch.* iii, 486, note). Lightfoot assumes, but without giving his authority, that Elijah was from Jabesh-Gilead. By Josephus he is said to have come from Thesbon—ἐκ πόλεως Θασβώνης τῆς Γαλααδίτιδος χώρας (*Ant.* viii, 13, 2). Perhaps this may have been read as Heshbon, a city of the priests, and given rise to the statement of Epiphanius that he was "of the tribe of Aaron," and grandson of Zadok. (See also the *Chron. Pasch.* in Fabricius, *Cod. Pseudep.* I. T. p. 1070, etc.; and Quaresmius, *Ethioid.* ii, 605.) According to Jewish tradition—grounded on a certain similarity between the fiery zeal of the two—Elijah was identical with Phinehas, the son of Eleazar the priest. He was also the angel of Jehovah who appeared in fire to Gideon

(Lightfoot on John i, 21; Eisenmenger, i, 686). Arab tradition places his birthplace at Gilhad (Jalūd), a few miles north of es-Salt (Irby, p. 98), and his tomb near Damascus (Mislin, i, 490). The common assumption—perhaps originating with Hiller (*Onom.* p. 947) or Reland (*Pal.* p. 1035)—is that he was born in the town of Thisbe (q. v.), mentioned in Tob. i, 2. But, not to insist on the fact that this Thisbe was not in Gilead, but in Naphtali, it is nearly certain that the name has no real existence in that passage, but arises from a mistaken translation of the same Hebrew word which is rendered "inhabitants" in 1 Kings xvii, 1. See TISHBITE.

2. *Personal Appearance.*—The mention of Gilead, however, is the key-note to much that is most characteristic in the story of the prophet. Gilead was the country on the further side of the Jordan—a country of chase and pasture, of tent-villages and mountain-castles, inhabited by a people not settled and civilized like those who formed the communities of Ephraim and Judah, but of wandering, irregular habits, exposed to the attacks of the nomad tribes of the desert, and gradually conforming more and more to the habits of those tribes; making war with the Hagarites, and taking the countless thousands of their cattle, and then dwelling in their stead (1 Chron. v, 10, 19-22). See GILEAD. With Elijah this is seen at every turn. Of his appearance as he "stood before" Ahab—with the suddenness of motion to this day characteristic of the Bedouins from his native hills—we can perhaps realize something from the touches, few, but strong, of the narrative. Of his height little is to be inferred—that little is in favor of its being beyond the ordinary size. His chief characteristic was his hair, long and thick, and hanging down his back, and which, if not betokening the immense strength of Samson, yet accompanied powers of endurance no less remarkable. See HAIR. His ordinary clothing consisted of a girdle of skin round his loins, which he tightened when about to move quickly (1 Kings xviii, 46). But in addition to this he occasionally wore the "mantle" (q. v.), or cape, of sheep-skin, which has supplied us with one of our most familiar figures of speech. In this mantle, in moments of emotion, he would hide his face (1 Kings xix, 13), or when excited would roll it up as into a kind of staff. On one occasion we find him bending himself down upon the ground with his face between his knees. Such, so far as the scanty notices of the record will allow us to conceive it, was the general appearance of the great prophet—an appearance which there is no reason to think was other than uncommon even at that time. The solitary life in which these external peculiarities had been assumed had also nurtured that fierceness of zeal and that directness of address which so distinguished him. It was in the wild loneliness of the hills and ravines of Gilead that the knowledge of Jehovah, the living God of Israel, had been impressed on his mind, which was to form the subject of his mission to the idolatrous court and country of Israel.

3. *History.*—The northern kingdom had at this time forsaken almost entirely the faith in Jehovah. The worship of the calves had been a departure from him, it was a violation of his command against material resemblances; but still it would appear that even in the presence of the calves Jehovah was acknowledged, and they were at any rate a national institution, not directly imported from the idolatries of any of the surrounding countries. See CALF. They were announced by Jeroboam as the preservers of the nation during the great crisis of its existence: "Behold thy gods, O Israel, that brought thee up out of the land of Egypt" (1 Kings xii, 28). But the case was quite different when Ahab, not content with the calf-worship—"as if it had been a light thing to walk in the sins of Jeroboam, the son of Nebat"—married the daughter of the king of Sidon, and introduced on the

most extensive scale (Josephus, *Ant.* ix, 6, 6) the foreign religion of his wife's family, the worship of the Phœnician Baal. What this worship consisted of we are ignorant—doubtless it was of a gay, splendid, and festal character, and therefore very opposite to the grave, severe service of the Mosaic ritual. Attached to it and to the worship of Asherah (A. V. "Ashtaroth," and "the groves") were licentious and impure rites, which in earlier times had brought the heaviest judgments on the nation (Numb. xxv; Judg. ii, 13, 14; iii, 7, 8). But the most obnoxious and evil characteristic of the Baal religion was that it was the worship of power, of mere strength, as opposed to that of a God of righteousness and goodness—a foreign religion, imported from nations the hatred of whom was inculcated in every page of the law, as opposed to the religion of that God who had delivered the nation from the bondage of Egypt, had "driven out the heathen with his hand, and planted them in," and through whom their forefathers had "trodden down their enemies, and destroyed those that rose up against them." It is as a witness against these two evils that Elijah comes forward. (B. C. cir. 907.)

(1.) What we may call the first act in his life embraces between three and four years—three years and six months for the duration of the drought, according to the statements of the New Testament (Luke iv, 25; James v, 17), and three or four months more for the journey to Horeb and the return to Gilead (1 Kings xvii, 1-xix, 21). His introduction is of the most startling description: he suddenly appears before Ahab, as with the unrestrained freedom of Eastern manners he would have no difficulty in doing, and proclaims the vengeance of Jehovah for the apostasy of the king. This he does in the remarkable formula evidently characteristic of himself, and adopted after his departure by his follower Elisha—a formula which includes everything at issue between himself and the king—the name of Jehovah—his being the God of Israel—the Living God—Elijah being his messenger, and then—the special lesson of the event—that the god of power and of nature should be beaten at his own weapons. "As Jehovah, God of Israel, liveth, before whom I stand," whose constant servant I am, "there shall not be dew nor rain these years, but according to my word." Before, however, he spoke thus, it would seem that he had been warning this most wicked king as to the fatal consequences which must result both to himself and his people from the iniquitous course he was then pursuing, and this may account for the apparent abruptness with which he opens his commission. What immediate action followed on this we are not told; but it is plain that Elijah had to fly before some threatened vengeance, either of the king, or more probably of the queen (comp. xix, 2). Perhaps it was at this juncture that Jezebel "cut off the prophets of Jehovah" (1 Kings xviii, 4). We can imagine Ahab and Jezebel being greatly incensed against Elijah for having ferreted and prayed that such calamities might befall them. For some time they might attribute the drought under which the nation suffered to natural causes, and not to the interposition of the prophet; and, therefore, however they might despise him as a vain enthusiast, they would not proceed immediately to punish him. When, however, they saw the denunciation of Elijah taking effect far more extensively than had been anticipated, they would naturally seek to wreak their vengeance upon him as the cause of their sufferings. But we do not find him taking one step for his own preservation till the God whom he served interposed. He was directed to the brook Cherith, either one of the torrents which cleave the high table-lands of his native hills, or on the west of Jordan, more in the neighborhood of Samaria, perhaps the present wady Kelt. See CHERITH. There, in the hollow of the torrent-bed, he remained, supported in the miraculous manner with

which we are all familiar, till the failing of the brook obliged him to forsake it. How long he remained in the Cherith is uncertain. The Hebrew expression is simply "at the end of days;" nor does Josephus afford us any more information. A vast deal of ingenuity has been devoted to explaining away Elijah's "ravens." The Hebrew word, *orebim'*, has been interpreted as "Arabians," as "merchants," as inhabitants of some neighboring town of *Orbo* or *Orbi*. By others Elijah has been held to have plundered a raven's nest, and this twice a day regularly for several months! See RAVEN.

His next refuge, under the divine guidance (1 Kings xvii, 9), was at Zarephath, a Phœnician town lying between Tyre and Sidon, certainly the last place at which the enemy of Baal would be looked for. The widow woman in whose house he lived is thought, however, to have been an Israelite, and no Baal-worshipper, by some who take her adjuration by "Jehovah thy God" as an indication. But the obvious circumstances of the case, and her mention by our Saviour (Luke iv, 26), imply her heathen character. Here Elijah performed the miracles of prolonging the oil and the meal, and restored the son of the widow to life after his sudden death. The traditional scene of his meeting with the widow was in a wood to the south of the town (Mislin, i, 532, who, however, does not give his authority). In the time of Jerome the spot was marked by a tower (Jerome, *Ep. Paula*). At a later period a church dedicated to the prophet was erected over the house of the widow, in which his chamber and her kneading-trough were shown (Anton. Martyr and Phocas, in *Ireland*, p. 985). This church was called τὸ Χριστιῶν (*Acta Sanctorum*). The Jewish tradition, quoted by Jerome, was that the resuscitated boy was the servant who afterwards accompanied Elijah, and finally became the prophet Jonah (Jerome, *Pref. to Jonah*; and see the citations from the Talmuds in Eisenmenger, ii, 725).

The drought continued, and at last the full horrors of famine, caused by the failure of the crops, descended on Samaria. During this time the prophet was called upon passively to suffer God's will; now he must once again resume the more active duties of life; he must make one great public effort more to reclaim his country from apostasy and ruin. According to the word of the Lord, he returned to Israel; Ahab was yet alive, and unreformed; Jezebel, his impious consort, was still mad upon her idols; in a word, the prophets of Baal were prophesying lies, the priests were bearing rule by their means, and the people loved to have it so. The king and his chief domestic officer had divided between them the mournful duty of ascertaining that neither round the springs, which are so frequent a feature of central Palestine, nor in the nooks and crannies of the most shaded torrent-beds, was there any of the herbage left, which in those countries is so certain an indication of the presence of moisture. No one short of the two chief persons of the realm could be trusted with this quest for life or death—"Ahab went one way by himself, and Obadiah went another way by himself." It is the moment for the reappearance of the prophet. Wishing not to tempt God by going unnecessarily into danger, he first presented himself to good Obadiah (1 Kings xviii, 7). There, suddenly planted in his path, is the man whom he and his master have been seeking for more than three years. Before the sudden apparition of that wild figure, and that stern, unbroken countenance, Obadiah could not but fall on his face. Elijah requested him to announce to Ahab that he had returned. Obadiah, apparently stung by the unkindness of this request, replied, "What have I sinned, that thou shouldst thus expose me to Ahab's rage, who will certainly slay me for not apprehending thee, for whom he has so long and so anxiously sought in all lands and in confederate countries, that they

should not harbor a traitor whom he looks upon as the author of the famine," etc. Moreover, he would delicately intimate to Elijah how he had actually jeopardized his own life in securing that of one hundred of the Lord's prophets, and whom he had fed at his own expense. Satisfied with Elijah's reply to this touching appeal, wherein he removed all his fears about the Spirit's carrying him away (as 2 Kings ii, 11-16; Ezek. iii, 4; Acts viii, 39), he resolves to be the prophet's messenger to Ahab. Intending to be revenged on him, or to inquire when rain might be expected, Ahab now came forth to meet Elijah. He at once charged him with troubling Israel, i. e. with being the main cause of all the calamities which he and the nation had suffered. But Elijah flung back the charge upon himself, assigning the real cause to be his own sin of idolatry. Regarding, however, his magisterial position, while he reproved his sin, he requests him to exercise his authority in summoning an assembly to Mount Carmel, that the controversy between them might be decided by a direct miracle from heaven (comp. Matt. xvi, 1). Whatever were his secret motives, Ahab accepted this proposal. As fire was the element over which Baal was supposed to preside, the prophet proposes (wishing to give them every advantage), that, two bullocks being slain, and laid each upon a distinct altar, the one for Baal, the other for Jehovah, whichever should be consumed by fire must proclaim whose the people of Israel were, and whom it was their duty to serve. The people consent to this proposal, because, it may be, they were not altogether ignorant how God had formerly answered by fire (Gen. iv, 4; Lev. ix, 24; Judg. vi, 21; xiii, 20; 1 Chron. xxi, 26; 2 Chron. vii, 1). Elijah will have summoned not only all the elders of Israel, but also the four hundred priests of Baal belonging to Jezebel's court, and the four hundred and fifty who were dispersed over the kingdom. The former, however, did not attend, being, perhaps, glad to shelter themselves under the plea that Jezebel would not allow them to do so. Why Mount Carmel, which we do not hear of until now, was chosen in preference to the nearer Ebal or Gerizim, is not evident. Possibly Elijah thought it wise to remove the place of the meeting to a distance from Samaria. Possibly in the existence of the altar of Jehovah (xviii, 30)—in ruins, and therefore of earlier erection—we have an indication of an ancient sanctity attaching to the spot. On the question of the particular part of the ridge of Carmel which formed the site of the meeting, there cannot be much doubt. See CARMEL.

There are few more sublime stories in history than this. On the one hand the solitary servant of Jehovah, accompanied by his one attendant, with his wild shaggy hair, his scanty garb, and sheepskin cloak, but with calm dignity of demeanor, and the minutest regularity of procedure; on the other hand, the prophets of Baal and Ashtaroth, doubtless in all the splendor of their vestments (2 Kings x, 22), with the wild din of their "vain repetitions" and the maddened fury of their disappointed hopes, and the silent people surrounding all—these things form a picture which brightens into fresh distinctness every time we consider it. Having reconstructed an altar which had once belonged to God, with twelve stones—as if to declare that the twelve tribes of Israel should again be united in the service of Jehovah—and having laid thereon his bullock, and filled the trench by which it was surrounded with large quantities of water, lest any suspicion of deceit might occur to any mind, the prophet gives place to the Baalites—allows them to make trial first. In vain did these deceived and deceiving men call, from morning till evening, upon Baal—in vain did they now mingle their own blood with that of the sacrifice: no answer was given—no fire descended. Elijah having rebuked their folly and wickedness with the sharpest irony, and it being at last evident to all

that their efforts to obtain the wished-for fire were vain, now, at the time of the evening sacrifice, offered up his prayer. The Baalites' prayer was long, that of the prophet is short—charging God with the care of his covenant, of his truth, and of his glory—when, "behold, the fire came down, licked up the water, and consumed not only the bullock, but the very stones of the altar also." The effect of this on the mind of the people was what the prophet desired: acknowledging the awful presence of the Godhead, they exclaim, as with one voice, "The Lord, he is God; the Lord, he is God!" Seizing the opportunity while the people's hearts were warm with the fresh conviction of this miracle, he bade them take those juggling priests and kill them at Kishon, that their blood might help to fill that river which their idolatry had provoked God to empty by drought. All this Elijah might lawfully do at God's direction, and under the sanction of his law (Deut. xiii, 5; xviii, 20). Ahab having now publicly vindicated God's violated law by giving his royal sanction to the execution of Baal's priests, Elijah informed him that he may go up to his tent on Carmel to take refreshment, for God will send the desired rain. In the mean time he prayed earnestly (James v, 17, 18) for this blessing: God hears and answers: a little cloud arises out of the Mediterranean Sea, in sight of which the prophet now was, diffuses itself gradually over the entire face of the heavens, and now empties its refreshing waters upon the whole land of Israel! Here was another proof of the divine mission of the prophet, from which, we should imagine, the whole nation must have profited; but subsequent events would seem to prove that the impression produced by these dealings of God was of a very partial and temporary character. Impressed with the hope that the report of God's miraculous actings at Carmel might not only reach the ear, but also penetrate and soften the hard heart of Jezebel, and anxious that the reformation of his country should spread in and about Jezreel also, Elijah, strengthened, as we are told, from on high, now accompanies Ahab thither on foot. The ride across the plain to Jezreel was a distance of at least 16 miles; the prophet, with true Arab endurance, running before the chariot, but also, with true Arab instinct, stopping short of the city, and going no further than the "entrance of Jezreel."

So far the triumph had been complete; but the spirit of Jezebel was not to be so easily overcome, and her first act is a vow of vengeance against the author of this destruction. "God do so to me, and more also," so ran her exclamation, "if I make not thy life as the life of one of them by to-morrow about this time." It was no duty of Elijah to expose himself to unnecessary dangers, and, as at his first introduction, so now, he takes refuge in flight. The danger was great, and the refuge must be distant. The first stage on the journey was Beersheba—"Beersheba which belongeth to Judah," says the narrative, with a touch betraying its Israelitish origin. Here, at the ancient haunt of those fathers of his nation whose memory was so dear to him, and on the very confines of cultivated country, Elijah halted. His servant—according to Jewish tradition, the boy of Zarephath—he left in the town, while he himself set out alone into the wilderness—the waste uninhabited region which surrounds the south of Palestine. The labors, anxieties, and excitement of the last few days had proved too much even for that iron frame and that stern resolution. His spirit is quite broken, and he wanders forth over the dreary sweeps of those rocky hills wishing for death—"It is enough! Lord, let me die, for I am not better than my fathers." The man whose prayer had raised the dead, had shut and opened heaven, he who had been so wonderfully preserved by God at Cherith and Zarephath, and who dared to tax Ahab to his face with being Israel's troubler, is now terrified and disconsolate, thus affording a practical evidence of what the apostle James

says of him, that he was a man of like passions with us. His now altered state of mind would seem to have arisen out of an exaggerated expectation of what God designed to effect through the miracles exhibited to, and the judgments poured upon this guilty nation. He seems to have thought that, as complete success did not crown the last great effort he had made to reform Israel, there could not be the slightest use in laboring for this end any longer. It is almost impossible not to conclude from the terms of the story that he was entirely without provisions for this or any journey. But God, who had brought his servant into this difficulty, provided him with the means of escaping from it. He now, alone in the wilderness and at Mount Horeb, will at once touch his heart and correct his petulance by the ministrations of his angel, and by a fearful exhibition of his divine power. The prophet, in a fit of despair, laid himself down beneath a lone "juniper-tree" (Hebrew יְבֵרֵת, *one Rothen-tree*). See JUNIPER. The indented rock opposite the gate of the Greek convent Deir Mar-Elyas, between Jerusalem and Bethlehen, which is now shown to travellers as the spot on which the prophet rested on this occasion, appears at an earlier date not to have been so restricted, but was believed to be the place on which he was "accustomed to sleep" (Sandys, lib. iii, p. 176; Maundrell, *Ear. Trav.* p. 456), and the site of the convent as that where he was born (Gaysforde, 1506, in Bonar, p. 117). Neither the older nor the later story can be believed; but it is possible that they may have originated in some more trustworthy tradition of his having rested here on his southward journey, in all probability taken along this very route. (See a curious statement by Quaresmius of the extent to which the rock had been defaced in his own time "by the piety or impiety" of the Christian pilgrims, *Elucidatio*, ii, 605; comp. Doubdan, *Voyage*, etc. p. 144.) In this position the prophet was wakened from his despondent dream beneath the solitary bush of the wilderness, was fed with the bread and the water which to this day are all a Bedouin's requirements, and went forward, "in the strength of that food," a journey of forty days, "to the mount of God, even to Horeb." Here, in "the cave" (יְבֵרֵת), one of the numerous caverns in those awful mountains—perhaps some traditional sanctuary of that hallowed region, at any rate well known—he remained for certainly one night (יָמָא). In the morning came the "word of Jehovah"—the question, "What dost thou here, Elijah? Driven by what hard necessity dost thou seek this spot, on which the glory of Jehovah has in former times been so signally shown?" In answer to this invitation the prophet opens his griefs. He has been very zealous for Jehovah; but force has been vain; one cannot stand against a multitude; none follow him, and he is left alone, flying for his life from the sword which has slain his brethren. The reply comes in that ambiguous and indirect form in which it seems necessary that the deepest communications with the human mind should be couched to be effectual. He is directed to leave the cavern and stand on the mountain in the open air, face to face with Jehovah. Then, as before with Moses (Exod. xxxiv, 6), "the Lord passed by;" passed in all the terror of his most appalling manifestations. The fierce wind tore the solid mountains and shivered the granite cliffs of Sinai; the earthquake crash reverberated through the defiles of those naked valleys; the fire burnt in the incessant blaze of Eastern lightning. Like these, in their degree, had been Elijah's own modes of procedure, but the conviction is now forced upon him that in none of these is Jehovah to be known. Then, penetrating the dead silence which followed these manifestations, came the fourth mysterious symbol—"the still small voice." What sound this was—whether articulate voice or not, we cannot determine; but low and still as it was, it spoke in

louder accents to the wounded heart of Elijah than the roar and blaze which had preceded it. To him, no less unmistakably than to Moses centuries before, it was proclaimed that Jehovah was "merciful and gracious, long-suffering and abundant in goodness and truth." Elijah knew the call, and at once stepping forward and hiding his face in his mantle, stood waiting for the divine communication. It is in the same words as before, and so is his answer; but with what different force must the question have fallen on his ears, and the answer left his lips! "Before his entrance to the cave he was comparatively a novice; when he left it he was an initiated man. He had thought that the earthquake, the fire, the wind, must be the great witnesses of the Lord. But He was not in them; not they, but the still small voice had that awe in it which forced the prophet to cover his face with his mantle. What a conclusion of all the past history! What an interpretation of its meaning!" (Maurice, *Prophets and Kings*, p. 136). Not in the persecutions of Ahab and Jezebel, nor in the slaughter of the prophets of Baal, but in the 7000 unknown worshippers who had not bowed the knee to Baal, was the assurance that Elijah was not alone as he had seemed to be.

Three commands were laid on him—three changes were to be made. Instead of Ben-hadad, Hazael was to be king of Syria; instead of Ahab, Jehu the son of Nimsbi was to be king of Israel; and Elisha the son of Shaphat was to be his own successor. These persons shall revenge God's quarrels: one shall begin, another shall prosecute, and the third shall perfect the vengeance on Israel. Of these three commands, the first two were reserved for Elisha to accomplish; the last only was executed by Elijah himself. It would almost seem as if his late trials had awakened in him a yearning for that affection and companionship which had hitherto been denied him. His first search was for Elisha. Apparently he soon found him; we must conclude at his native place, Abel-meholah, probably somewhere about the centre of the Jordan valley. See ABEL-MEHOLOAH. Elisha was ploughing at the time, and Elijah "passed over to him"—possibly crossed the river—and, without uttering a word, cast his mantle, the well-known sheepskin cloak, upon him, as if, by that familiar action (which was also a symbol of official investiture), claiming him for his son. A moment of hesitation—but the call was quickly accepted; and then commenced that long period of service and intercourse which continued till Elijah's removal, and which after that time procured for Elisha one of his best titles to esteem and reverence—"Elisha the son of Shaphat, who poured water on the hands of Elijah." See ELISHA.

(2.) For about six years from this calling of Elisha we find no notice in the sacred history of Elijah, till God sent him once again to pronounce sore judgments upon Ahab and Jezebel for the murder of unoffending Naboth (1 Kings xxi, 17, etc.). How he and his associate in the prophetic office employed themselves during this time we are not told. We may conceive, however, that they were much engaged in prayer for their country, and in imparting knowledge in the schools of the prophets, which were at Jericho and Beth-el. Ahab and Jezebel now probably believed that their threats had been effectual, and that they had seen the last of their tormentor. At any rate, this may be inferred from the events of chap. xxi. See AHAH. Foiled in his wish to acquire the ancestral plot of ground of Naboth by the refusal of that sturdy peasant to alienate the inheritance of his fathers, Ahab and Jezebel proceed to possess themselves of it by main force, and by a degree of monstrous injustice which shows clearly enough how far the elders of Jezreel had forgotten the laws of Jehovah, how perfect was their submission to the will of their mistress. At her orders Naboth is falsely accused of blaspheming

God and the king, is with his sons (2 Kings ix, 26; comp. Josh. vii, 24) stoned and killed, and his vineyard then—as having belonged to a criminal—becomes at once the property of the king. See NABOTH.

Ahab loses no time in entering on his new acquisition. Apparently the very next day after the execution he proceeds in his chariot to take possession of the coveted vineyard. Behind him—probably in the back part of the chariot—ride his two pages Jehu and Bidkar (2 Kings ix, 26). But the triumph was a short one. Elijah had received an intimation from Jehovah of what was taking place, and rapidly as the accusation and death of Naboth had been hurried over, he was there to meet his ancient enemy, and as an enemy he does meet him—as David went out to meet Goliath—on the very scene of his crime; suddenly, when least expected and least wished for, he confronts the miserable king. Then follows the curse, in terms fearful to any Oriental—peculiarly terrible to a Jew, and most of all significant to a successor of the apostate princes of the northern kingdom—"I will take away thy posterity; I will cut off from thee even thy very dogs; I will make thy house like that of Jeroboam and Baasha; thy blood shall be shed in the same spot where the blood of thy victims was shed last night; thy wife and thy children shall be torn in this very garden by the wild dogs of the city, or as common carrion devoured by the birds of the sky"—the large vultures which in Eastern climes are always wheeling aloft under the clear blue sky, and doubtless suggested the expression to the prophet. How tremendous was this scene we may gather from the fact that after the lapse of at least twenty years Jehu was able to recall the very words of the prophet's burden, to which he and his companion had listened as they stood behind their master in the chariot. The whole of Elijah's denunciation may possibly be recovered by putting together the words recalled by Jehu, 2 Kings ix, 26, 36, 7, and those given in 1 Kings xxi, 19-25. Fearing that these predictions would prove true, as those about the rain and fire had done, Ahab now assumed the manner of a penitent; and, though subsequent acts proved the insincerity of his repentance, yet God rewarded his temporary abasement by a temporary arrest of judgment. We see, however, in after parts of this sacred history, how the judgments denounced against him, his abandoned consort, and children took effect to the very letter. See JEZEBEL.

(3.) A space of three or four years now elapses (comp. 1 Kings xxii, 1; xxii, 51; 2 Kings i, 17) before we again catch a glimpse of Elijah. The denunciations uttered in the vineyard of Naboth have been partly fulfilled. Ahab is dead, and his son and successor, Ahaziah, has met with a serious accident, after a troubled reign of less than two years (2 Kings i, 1, 2; 1 Kings xxii, 51). Fearing a fatal result, as if to prove himself a worthy son of an idolatrous parentage, he sends to an oracle or shrine of Baal at the Philistine town of Ekron to ascertain the issue of his illness. But the oracle is nearer at hand than the distant Ekron. An intimation is conveyed to the prophet, probably at that time inhabiting one of the recesses of Carmel, and, as on the former occasions, he suddenly appears on the path of the messengers, without preface or inquiry utters his message of death, and as rapidly disappears. The tone of his words is as national on this as on any former occasion, and, as before, they are authenticated by the name of Jehovah—"Thus saith Jehovah, Is it because there is no God in Israel that ye go to inquire of Baalzebub, god of Ekron?" The messengers returned to the king too soon to have accomplished their mission. They were possibly strangers; at any rate they were ignorant of the name of the man who had thus interrupted their journey. But his appearance had fixed itself in their minds, and their description at once told Ahaziah, who must have seen the prophet about his father's court or have heard

him described in the harem, who it was that had thus reversed the favorable oracle which he was hoping for from Ekron. The "hairy man" (עֵלִיָּא הַשֵּׂרֵפִי, *a man, a lord of hair*), with a belt of rough skin round his loins, who came and went in this secret manner, and uttered his fierce words in the name of the God of Israel, could be no other than the old enemy of his father and mother, Elijah the Tishbite. But, ill as he was, this check only roused the wrath of Ahaziah, and, with the spirit of his mother, he at once seized the opportunity of possessing himself of the person of the man who had been for so long the evil genius of his house. A captain was dispatched, with a party of fifty, to take Elijah prisoner. He was sitting on the top of "the mount" (הַרְרָם), i. e. probably of Carmel. The officer approached and addressed the prophet by the title which, as before noticed, is most frequently applied to him and Elisha—"O man of God, the king hath spoken: come down." "And Elijah answered and said, If I be a man of God, then let fire come down from heaven, and consume thee and thy fifty! And there came down fire from heaven, and consumed him and his fifty." A second party was sent, only to meet the same fate. The altered tone of the leader of a third party, and the assurance of God that his servant need not fear, brought Elijah down. But the king gained nothing. The message was delivered to his face in the same words as it had been to the messengers, and Elijah, so we must conclude, was allowed to go harmless. This was his last interview with the house of Ahab. It was also his last recorded appearance in person against the Baal-worshippers. It was this occasion to which the fiery sons of Zebedee alluded (Luke ix, 51-56) in a proposal that brought out from the lips of the Saviour the contrast with his own benign mission (Trench, *Miracles*, ch. iv).

(4.) It must have been shortly after the death of Ahaziah that Elijah made a communication with the southern kingdom. It is the only one of which any record remains, and its mention is the first and last time that the name of the prophet appears in the Books of Chronicles. Mainly devoted, as these books are, to the affairs of Judah, this is not surprising. The alliance between his enemy Ahab and Jehoshaphat cannot have been unknown to the prophet, and it must have made him regard the proceedings of the kings of Judah with more than ordinary interest. When, therefore, Jehoram, the son of Jehoshaphat, who had married the daughter of Ahab, began "to walk in the ways of the kings of Israel, as did the house of Ahab, and to do that which was evil in the sight of Jehovah," Elijah sent him a letter (עֵלִיָּא שָׁלַח, *a writing*, different from the ordinary word for an epistle, פָּתָר, *a book*), denouncing his evil doings, and predicting his death (2 Chron. xxi, 12-15). This letter has been considered as a great difficulty, on the ground that Elijah's removal must have taken place before the death of Jehoshaphat (from the terms of the mention of Elisha in 2 Kings iii, 11), and therefore before the accession of Joram to the throne of Judah. But, admitting that Elijah had been translated before the expedition of Jehoshaphat against Moab, it does not follow that Joram was not at that time, and before his father's death, king of Judah, Jehoshaphat occupying himself during the last eight or ten years of his life in going about the kingdom (2 Chron. xix, 4-11), and in conducting some important wars, amongst others that in question against Moab, while Joram was concerned with the more central affairs of the government (2 Kings iii, 7, etc.). That Joram began to reign during the lifetime of his father Jehoshaphat is stated in 2 Kings viii, 16. According to one record (2 Kings i, 17), which immediately precedes the account of Elijah's last acts on earth, Joram was actually on the throne of Judah at the time of Elijah's interview with Ahaziah; and though this is modified by the statements of other

places (2 Kings iii, 1; viii, 16), yet it is not invalidated, and the conclusion is almost inevitable that Joram ascended the throne as viceroy or associate some years before the death of his father. See JORAM; JEHOIAPHAT; JUDAH. The ancient Jewish commentators get over the apparent difficulty by saying that the letter was written and sent after Elijah's translation. Others believed that it was the production of Elisha, for whose name that of Elijah had been substituted by copyists. The first of these requires no answer. To the second, the severity of its tone, as above noticed, is a sufficient reply. Josephus (*Ant. ix, 5, 2*) says that the letter was sent while Elijah was still on earth. (See Lightfoot, *Chronicle*, etc., "Jehoram.") Other theories will be found in Fabricius, *Cod. Pseudepigr.* p. 1075, and Otho, *Lex. Rubb.* p. 167). In its contents the letter bears a strong resemblance to the speeches of Elijah, while in the details of style it is very peculiar, and quite different from the narrative in which it is imbedded (Bertheau, *Chronik*, ad loc.).

(5.) The prophet's warfare being now accomplished on earth, God, whom he had so long and so faithfully served, will translate him in a special manner to heaven. Conscious of this, he determines to spend his last moments in imparting divine instruction to, and pronouncing his last benediction upon, the students in the colleges of Bethel and Jericho; accordingly, he made a circuit in this region (2 Kings ii, 1, etc.). It was at Gilgal (q. v.)—probably not the ancient place of Joshua and Samuel, but another of the same name still surviving on the western edge of the hills of Ephraim—that the prophet received the divine intimation that his departure was at hand. He was at the time with Elisha, who seems now to have become his constant companion. Perhaps his old love of solitude returned upon him, perhaps he wished to spare his friend the pain of a too sudden parting, or perhaps he desired to test the affection of the latter; in either case he endeavors to persuade Elisha to remain behind while he goes on an errand of Jehovah. "Tarry here, I pray thee, for Jehovah hath sent me to Bethel." But Elisha will not so easily give up his master—"As Jehovah liveth, and as thy soul liveth, I will not leave thee." They went together to Bethel. The event which was about to happen had apparently been communicated to the sons of the prophets at Bethel, and they inquire if Elisha knew of his impending loss. His answer shows how fully he was aware of it. "Yea," says he, with emphasis, "indeed I do know it (עֵינַי רָאִתִּיךָ מֵהַיּוֹם הַזֶּה וְעַד הַיּוֹם הַבֹּאֵי) : hold ye your peace." But, though impending, it was not to happen that day. Again Elijah attempts to escape to Jericho, and again Elisha protests that he will not be separated from him. Again, also, the sons of the prophets at Jericho make the same unnecessary inquiries, and again he replies as emphatically as before. Elijah makes a final effort to avoid what they both so much dread. "Tarry here, I pray thee, for Jehovah hath sent me to the Jordan." But Elisha is not to be conquered, and the two set off across the undulating plain of burning sand to the distant river—Elijah in his mantle or cape of sheep-skin, Elisha in ordinary clothes (עֲרֵבָה, ver. 12). Fifty men of the sons of the prophets ascend the abrupt heights behind the town—the same to which a late tradition would attach the scene of our Lord's temptation—and which command the plain below, to watch with the clearness of Eastern vision what happens in the distance. Talking as they go, the two reach the river, and stand on the shelving bank beside its swift brown current. But they are not to stop even here. It is as if the aged Gileadite cannot rest till he again sets foot on his own side of the river. He rolls up (עָרַב) his mantle as into a staff, and with his old energy strikes the waters as Moses had done before him—strikes

them as if they were an enemy (רִיבֵי); and they are divided hither and thither, and they two go over on dry ground. What follows is best told in the simple words of the narrative. "And it came to pass when they were gone over, that Elijah said to Elisha, 'Ask what I shall do for thee before I be taken away from thee.' And Elisha said, 'I pray thee let a double portion of thy spirit be upon me.' And he said, 'Thou hast asked a hard thing: if thou see me taken from thee, it shall be so unto thee; but if not, it shall not be so.' And it came to pass as they still went on and talked, that, behold, a chariot of fire and horses of fire, and parted them both asunder, and Elijah went up by the whirlwind into the skies." (It was not in the chariot of fire that he went up into the skies. The fire served to part the master from the disciple, to show that the severance had arrived, but Elijah was taken up by the fierce wind of the tempest, רִיבֵי). Well might Elisha cry with bitterness (עָרַב), "My father, my father." He had gone who, to the discerning eye and loving heart of his disciple, had been "the chariot of Israel and the horsemen thereof" for so many years; and Elisha was at last left alone to carry on a task to which he must often have looked forward, but to which in this moment of grief he may well have felt unequal. He saw him no more; but his mantle had fallen, and this he took up—at once a personal relic and a symbol of the double portion of the spirit of Elijah with which he was to be clothed. Little could he have realized, had it been then presented to him, that he whose greatest claim to notice was that he had "poured water on the hands of Elijah" should hereafter possess an influence which had been denied to his master—should, instead of the terror of kings and people, be their benefactor, adviser, and friend, and that over his death-bed a king of Israel should be found to lament with the same words that had just burst from him on the departure of his stern and silent master, "My father, my father, the chariot of Israel and the horsemen thereof!" (2 Kings xiii, 14).

4. *Traditionary Views and Character.*—Elijah and Moses are the only men whose history does not terminate with their departure out of this world. Elijah appeared with Moses on Mount Hermon at the time of our Lord's transfiguration, and conversed with him respecting the great work of redemption which he was about to accomplish (Matt. xvii, 1-3). The author of the book of Ecclesiasticus (ch. xlvi) justly describes him as a prophet "who stood up as a fire, and whose word burned as a lamp." But, with the exception of the eulogiums contained in that catalogue of worthies, and 1 Mace. ii, 58, and the passing allusion in Luke ix, 54, none of the later references allude to his works of destruction or of portent. They all set forth a different side of his character from that brought out in the historical narrative. They speak of his being a man of like passions with ourselves (Luke v, 17); of his kindness to the widow of Sarepta (James iv, 25); of his "restoring all things" (Matt. xvii, 11); "turning the hearts of the fathers to the children, and the disobedient to the wisdom of the just" (Mal. iv, 5, 6; Luke i, 17). In the sternness and power of his reproofs, however, he was a striking type of John the Baptist, and the latter is therefore prophesied of under his name: "Behold, I will send you Elijah the prophet before the coming of the great and dreadful day of the Lord" (Mal. iv, 5, 6). Our Saviour also declares that Elijah had already come in spirit, in the person of John the Baptist. Many of the Jews in our Lord's time believed him to be Elijah, or that the soul of Elijah had passed into his body (Luke ix, 8). See JOHN THE BAPTIST. How deep was the impression which he made on the mind of the nation may be judged from the fixed belief which many centuries after prevailed that Elijah would again appear for the relief and restoration of his country. The prophecy of Mal-

acbi was possibly at once a cause and an illustration of the strength of this belief. Each remarkable person, as he arrives on the scene, be his habits and characteristics what they may—the stern John, equally with his gentle Successor—is proclaimed to be Elijah (Matt. xvi, 14; Mark vi, 15; John i, 21). His appearance in glory on the Mount of Transfiguration does not seem to have startled the disciples. They were “sore afraid,” but not apparently surprised. On the contrary, Peter immediately proposes to erect a tent for the prophet whose arrival they had so long been expecting. Even the cry of our Lord from the cross, containing as it did but a slight resemblance to the name of Elijah, immediately suggested him to the bystanders. “He calleth for Elijah.” “Let be, let us see if Elijah will come to save him.”

In the Talmud (see the passages cited by Hamburger, *Real-Encycl.* s. v. Eliabu) he is recorded as having often appeared to the wise and good rabbis—at prayer in the wilderness, or on their journeys—generally in the form of an Arabian merchant (Eisenmenger, i, 11; ii, 402-7). At the circumcision of a child a seat was always placed for him, that, as the zealous champion and messenger of the “covenant” of circumcision (1 Kings xix, 14; Mal. iii, 1), he might watch over the due performance of the rite. During certain prayers the door of the house was set open that Elijah might enter and announce the Messiah (Eisenmenger, i, 685). His coming will be three days before that of the Messiah, and on each of the three he will proclaim, in a voice which shall be heard all over the earth, peace, happiness, salvation, respectively (Eisenmenger, ii, 696). So firm was the conviction of his speedy arrival, that when goods were found and no owner appeared to claim them, the common saying was, “Put them by till Elijah comes” (Lightfoot, *Exercit.* Matt. xvii, 10; John i, 21). The same customs and expressions are even still in use among the stricter Jews of this and other countries (see *Revue des deux Mondes*, xxiv, 131, etc.).

Elijah has been canonized in both the Greek and Latin churches. Among the Greeks *Mar Elytis* is the patron of elevated spots, and many a conspicuous summit in Greece is called by his name (Clark, *Peloponnesus*, p. 190). The service for his day—Ἡλιαὺς μεγαλόνομος—will be found in the *Menaion* on July 20, a date recognised by the Latin Church also. (See the *Acta Sanctorum*, July 20). By Cornelius à Lapide it is maintained that his ascent happened on that day, in the 19th year of Jehoshaphat (Keil, *On Kings*, p. 331). The convent bearing his name, Deir Mar Elyās, between Jerusalem and Bethlehem, is well known to travellers in the Holy Land. It purports to be situated on the spot of his birth, as already observed. Other convents bearing his name once existed in Palestine: in Jebel Ajlūn, the ancient Gilead (Ritter, *Syrien*, p. 1023, 1066, etc.); at Ezra, in the Hauran (Burckhardt, *Syria*, p. 59), and the more famous establishment on Carmel.

It is as connected with the great Order of the barefooted Carmelites that Elijah is celebrated in the Latin Church. According to the statements of the Breviary (*Off. B. Mariæ Virginis de Monte Carmelo*, Julii 16), the connection arose from the dedication to the Virgin of a chapel on the spot from which Elijah saw the cloud (an accepted type of the Virgin Mary) rise out of the sea. But other legends trace the origin of the order to the great prophet himself, as the head of a society of anchorites inhabiting Carmel; and even as himself dedicating the chapel in which he worshipped to the Virgin! (St. John of Jerusalem, as quoted by Mislin, *Liens Saints*, ii, 49; and the bulls of various popes enumerated by Quaresimus, vol. ii.) These things are matters of controversy in the Roman Church, Baronius and others having proved that the order was founded in 1181, a date which is repudiated by the Carmelites (see extracts in Fabricius, *Codex Pseudepigraph.* p. 1077).

In the Mohammedan traditions *Ilyās* is said to have drank of the Fountain of Life, “by virtue of which he still lives, and will live to the day of judgment.” He is by some confounded with St. George, and with the mysterious *el-Khidr*, one of the most remarkable of the Moslem saints (see Lane’s *Arabian Nights*, Introd. note 2; also *Selections from the Kur’an*, p. 221, 222). The Persian *Sofis* are said to trace themselves back to Elijah (Fabricius, p. 1077); and he is even held to have been the teacher of Zoroaster (D’Herbelot, *Bib. Or.* s. v.).

Among other traditions, it must not be omitted that the words “Eye hath not seen,” etc., 1 Cor. ii, 9, which are without doubt quoted by the apostle from Isaiah lxiv, 4, were, according to an ancient belief, from “the Apocalypse, or mysteries of Elijah,” τὰ ἅλια ἀπόκρυφα. The first mention of this appears to be Origen (*Hom. on Matt.* xxvii, 9), and it is noticed with disapproval by Jerome, *ad Pammachium* (see Fabricius, p. 1072).

By Epiphanius, the words “Awake, thou that sleepest,” etc., Eph. v, 14, are inaccurately alleged to be quoted “from Elijah,” i. e. the portion of the O. T. containing his history—παρά τῷ Ἡλιαί (comp. Rom. xi, 2).—Smith, s. v.; Kitto, s. v.

5. *Literature*.—On the general subject, Anon, *Lectures on Elijah* (Lond. 1865); Kitto, *Daily Bible Illustrations*. Solomon and Kings, 45-47th week. Lit.* Jan. 1867. On his vision at Horeb, Verschuur, *De apparitione Elie* (*Dissert. phil.* p. 85 sq.). On his stay at Cherith, at Zarephath, *Jour. Sac. Literature*, 1860, p. 1; *Unters. einiger Verstorbenen* (Lips. 1793). On his ascension, Hergott, *De curru Elie* (Wittenb. 1676); Müller, *Elia ascensio* (Lpz. 17—); Pfaff, *De rapta Elie* (Tub. 1739). On his letter to Joram, Pfaff, *De litteris El. ad Jor.* (Tub. 1755); Berg, in the *Duisb. Wochenbl.* 1774, No. 5, 6.

2. (Sept. Ἡλία v. r. Ἐπία.) One of the “sons of Jeroham,” and heads of Benjaminite families resident at Jerusalem (1 Chron. viii, 27, where the name is inaccurately Anglicized “Eliah”). B. C. post 1612.

3. (Sept. Ἰαζα.) One of the “sons of Eliam” (q. v.), who divorced his Gentile wife on returning from the exile (Ezra x, 21, where the name is likewise wrongly Anglicized “Eliah”). B. C. 458.

Elī’ka [some *El’ika*] (Heb. *Elika’*, עֲלִיקָא, *God is his rejecter*; Sept. Ἐλικὰ v. r. Ἐρακὰ, Vulg. *Elīca*), a Harodite (q. v.), one of David’s thirty-seven distin-

guished warriors (2 Sam. xxiii, 25). B.C. 1046. His name is omitted in the parallel list of 1 Chron. xi, 27 (see Kennicott's conjecture, *Dissertation*, p. 182). See SHAMMOTH.

**Elimim.** See TALMUD.

**E'lim** (Heb. *Eylim'*, עֵלִים, *trees* [so called from their strength; see OAK]; perh. here *palm-trees*; Sept. *Alēip*), a place mentioned in Exod. xv, 27; Num. xxxiii, 9, as the second station where the Israelites encamped after crossing the Red Sea. (See Huldreich or Ulrich, *De fontibus in Elim repertis*, Brem. 1728). See also BEER-ELIM. It is distinguished as having had "twelve wells (rather "fountains," מְיֻנִּים) of water, and threescore and ten palm-trees." Laborde (*Geographical Commentary on Exod.* xv, 27) supposed *wady Useit* to be Elim, the second of four wadys lying between 29° 7' and 29° 20', which descend from the range of et-Tih (here nearly parallel with the shore) towards the sea. The route of the Israelites, however, cannot well be mistaken at this part. It evidently lay along the desert plain on the eastern shore of the Red Sea. Elim must consequently have been in this plain, and not more than about fifty miles from the place of passage. With these data, and in a country where fountains are of such rare occurrence, it is not difficult to identify Elim. Near the south-eastern end of this plain, and not far from the base of Jebel Hummam, the outpost of the great Sinai mountain-group, a charming vale, called *wady Ghurundel*, intersects the line of route. It is the first of the four wadys noticed above, and is, in fact, the most noted valley of that region, and the only one in the vicinity containing water (Robinson, *Researches*, i, 100, 105). In the dry season it contains no stream, but in the rainy season it becomes the channel of a broad and powerful mountain current, being bounded by high ridges, and extending far into the interior. It has no soil, but drifting sand, which has left but one of the "wells" remaining, the others anciently existing being doubtless tilled up. This principal fountain springs out at the foot of a sandstone rock, forming a pool of sparkling water, and sending out a tiny but perennial stream. This, in fact, is one of the chief watering-places in the peninsula of Sinai (Bartlett, *Forty Days in the Desert*, p. 33 sq.). There are no palm-trees at present here, but the place is fringed with trees and shrubbery, stunted palms, with their hairy trunks and dishevelled branches; tamarisks, their feathery leaves dripping with what the Arabs call manna; and the acacia, with its gray foliage and white blossoms (Stanley, *Palestine*, p. 68). These supply the only verdure, which, however, in contrast with the naked desert, is quite refreshing (Olin's *Travels*, i, 362). Well might such a wady, in the midst of a bare and treeless waste, be called emphatically *Elim*, "the trees." Lepsius takes another view, that Ghurundel is Mara, by others identified with Howara (2½ hours N.W. from Ghurundel, and reached by the Israelites, therefore, before it), and that Elim is to be found in the last of the four above named, *wady Shubeikeh* (*Travels*, Berlin, 1845, p. 27 sq.). See EXODE.

**Elim'elech** (Heb. *Elim'elek*, עֵלִים־עֶלֶךְ, *God is his king*; Sept. *Ἐλιμ᾽ελεκ*; Josephus, *Ἐλιμ᾽ελεχος*, *Ant.* v, 9, 1), a man of the tribe of Judah, and of the family of the Hezronites and kinsman of Boaz, who dwelt in Bethlehem-Ephrathah in the days of the judges. B.C. cir. 1368. In consequence of a great dearth in the land he went with his wife Naomi, and his two sons, Mahlon and Chilion, to dwell in Moab, where he and his sons died without posterity (Ruth i, 2, 3; ii, 1, 3; iv, 3, 9). See RUTH.

**Eliō'nai** (Heb. *Elyō'nay'*, עֵלְיוֹנָי, a contracted form of the name *Elihoenai*), the name of several men.

1. (Sept. *Ἐλιωνάϊ* v. r. *Ἐλιζενάϊ*, Vulg. *Elioenai*.)

Fourth son of Becher, son of Benjamin (1 Chron. vii, 8). B.C. post 1856.

2. (Sept. *Ἐλιωνάϊ* v. r. *Ἐλιωνάϊ*, Vulg. *Elioenai*.) A chief of the posterity of Simeon (1 Chron. iv, 36). B.C. post 1618.

3. (1 Chron. xxvi, 3.) See ELIHOENAI.

4. (Sept. *Ἐλιωνάϊ* v. r. *Ἐλιωνάϊ*, Vulg. *Elioenai*.) A priest of the sons of Pashur, who had married a foreign wife after the return from Babylon, but who, at Ezra's instigation, put her away with the children born of her, and offered a ram for a trespass offering (Ezra x, 22). B.C. 458. He is perhaps the same mentioned in Neh. xii, 41, as one of the priests who accompanied Nehemiah with trumpets at the dedication of the wall of Jerusalem. B.C. 446.

5. (Sept. *Ἐλιωνάϊ* v. r. *Ἐλιωνάϊ*, Vulg. *Elioenai*.) An Israelite of the sons of Zattu, who likewise divorced his Gentile wife after the exile (Ezra x, 27). B.C. 458.

6. (Sept. *Ἐλιωνάϊ*, v. r. *Ἐλιωνάϊ* and *Ἐλιζενάϊ*, Vulg. *Elioenai*.) Eldest son of Meariah, son of Shemaiah, of the descendants of Zerubbabel; his family are the latest mentioned in the Old Test. (1 Chron. iii, 23, 24). B.C. ante 280. He appears to be the same with ESLI, of the maternal ancestry of Christ (Luke iii, 25). (See Strong's *Harmony and Expos. of the Gosp.* p. 16.) According to the present Heb. text he is in the seventh generation from Zerubbabel, or about contemporary with Alexander the Great; but lord Hervey thinks that Shemaiah is identical with Shimei (ver. 19), Zerubbabel's brother (*Geneal. of our Lord*, p. 107-109, and ch. vii).

**Eliōnæ'us** (Ἐλιωνάϊος, doubtless a Græcized form of *Elioenai*), a high-priest of the Jews, who succeeded Matthias, son of Ananus (A.D. 42), and was the next year succeeded by Simon Cantheras (Josephus, *Ant.* xix, 8, 1). See HIGH-PRIEST.

**Eliō'nas**, the name of two men in the Apocrypha.

1. (*Ἐλιωνάϊ* v. r. *Ἐλιωνάϊ*, Vulg. omits.) One of the sons of "Phaisur," who divorced his Gentile wife after the exile (1 Esdras ix, 22); evidently the ELIOENAI (q. v.) of the Heb. text (Ezra x, 22).

2. (*Ἐλιωνάϊ*, Vulg. *Nonæus*.) One of the sons of "Annas," who did the same (1 Esd. ix, 32); doubtless the ELIEZER (q. v.) of the Heb. text (Ezra x, 31).

**Eliot, Andrew, D.D.**, a Congregational minister, was born in Boston Dec. 25, 1719 (O. S.), and graduated at Harvard College in 1737. In 1742 he was ordained pastor (as colleague with Mr. Webb) of the New North Church in Boston, in which service he remained until his death. In 1757 he was made D.D. by the University of Edinburgh. In 1773 he was elected president of Harvard College, but declined to leave his pastoral work. He died Sept. 13, 1778. Besides occasional sermons, he published a volume of *Discourses* (1774).—Sprague, *Annals*, i, 417.

**Eliot, John**, styled "the apostle of the Indians," was born in the county of Essex, England, in 1604, and studied at the University of Cambridge. Emigrating to New England in 1631, he joined the Church in Boston. He was settled over the Church in Roxbury Nov. 5, 1632. Here he studied the Indian language, with the view of converting the natives to Christianity. "The first Indian Church, established by the labors of Protestants in America, was formed at Natick in 1660, after the manner of the Congregational churches in New England. Those who wished to be organized into a Christian body were strictly examined as to their faith and experience by a number of the neighboring ministers, and Mr. Eliot afterwards administered to them baptism and the Lord's Supper. Other Indian churches were planted in various parts of Massachusetts, and he frequently visited them; but his pastoral care was more particularly over that which he first established. He made every exertion to promote the welfare of the Indian tribes; he stimulated many servants of Jesus to engage in the missionary

work; and, although he mourned over the stupidity of many who preferred darkness to light, yet he lived to see twenty-four of the copper-colored aborigines fellow-preachers of the precious Gospel of Christ. In 1661 he published the New Testament in the Indian language, and in a few years the whole Bible, and several other books best adapted for the instruction of the natives. When he reached the age of fourscore years he offered to give up his salary, and desired to be liberated from the labors of his office as a teacher of the Church at Roxbury. It was with joy that he received Mr. Walter as his colleague in 1688. When he was bending under his infirmities, and could no longer visit the Indians, he persuaded a number of families to send their negro servants to him once a week, that he might instruct them in the truths of God. He died May 20, 1690, saying that all his labors were poor and small, and exhorting those who surrounded his bed to pray. His last words were, "Welcome joy" (Allen). In 1649 Mr. Eliot published *The glorious Progress of the Gospel among the Indians*; in 1653, *Tears of Repentance*; in 1655, *A further Manifestation of the Progress of the Gospel among the Indians*; and in 1670, *A brief Narrative of the Progress of the Gospel*. Baxter says, in one of his letters, "There was no man on earth whom I honored above him." A handsome memorial to the "Apostle of the Indians, and the pastor for fifty-eight years of the first Church in Roxbury," has been erected in the Forest Hills Cemetery, Roxbury.—*Life and Death of John Eliot*, by Cotton Mather (1691); Mather's *Magnalia*, iii, 270; Francis, *Life of John Eliot* (Edinb. 1828); Sprague, *Annals*, i, 18; Allen, *American Biography*.

**Elipandus**, archbishop of Toledo in the 8th century. He shared the opinions of Felix, bishop of Urgel, with regard to the person of Christ, viz. that, with respect to his human nature, he was only the *adoptive* Son of God, thus giving rise to the sect of *Adoptianists*. Elipandus disseminated his views in Spain, France, and Germany. Adosinda, queen of Galicia, induced bishop Etherius of Osma and the priest Beatus to write against him. They published against him two books, the originals of which are said to be still extant in Toledo. Elipandus replied by several letters, but he was condemned at the council which Paulinus, patriarch of Aquileja, convened at Ciudad de Friuli in 791. In the following year the doctrines of Elipandus and Felix were again condemned at a synod which Charlemagne held at Ratisbon. Pope Adrian confirmed the sentence, to which Felix submitted; but Elipandus, and several other bishops of Spain, persisted in their views, and wrote against Felix. This letter was refuted, and condemned by Adrian in a council held in Italy, and in the Council of Frankfort in 794. Charlemagne himself wrote a letter (still extant) to Elipandus urging him to submit; but the letter seems to have had little effect, for shortly before his death (in 799) Elipandus wrote a reply maintaining his views.—Hoefler, *Nour. Biog. Génér.* xv, 832; Neander, *Ch. Hist.* iii, 156-158; Mosheim, *Ch. Hist.* bk. iii, c. viii, pt. ii, ch. v, § 3. See **ADOPTIANISM**.

**El'iphal** (Heb. *Eliphal'*, עִלְפָּחַל, *God is his judge*; Sept. Ἐλιφαὶλ v. r. Ἐλφάρ, Vulg. *Eliphal*), son of Ur (q. v.), and one of David's famous guard (1 Chron. xi, 35). B. C. 1046. In the parallel passage (2 Sam. xxiii, 34) he seems to be called "ELIPHELET, the son of Ahasbai (q. v.), the son of the Maachathite;" but the names are here greatly confused. See **DAVID**.

**Eliph'alat** (Ἐλιφαλάτ, Vulg. *Eliphalach*), one of the sons of "Asom," who divorced his Gentile wife after the exile (1 Esd. ix, 33); evidently the **ELIPHELET** (q. v.) of the Heb. text (Ezra x, 33).

**Eliph'alet**, a less correct mode of Anglicizing (2 Sam. v, 16; 1 Chron. xiv, 7) the name **ELIPHELET** (q. v.). It also occurs in the Apocrypha (Ἐλιφαλέτ) as the name of one of the sons of Adonican, who returned

from the exile (1 Esdr. viii, 39); the **ELIPHELET** of the Heb. text (Ezra viii, 13).

**El'iphaz** (Hebrew *Eliphaz'*, עִלְפָּז, *God is his strength*; Sept. Ἐλιφάζ, but in Gen. Ἐλιφάξ, Vulg. *Eliphaz*), the name of two men.

1. The leading one of the "three friends" who came to condescend with Job in his affliction (Job iv, 1), and who took part in that remarkable discussion which occupies the book of Job. B. C. cir. 2200. He is called "the Temanite;" hence it is naturally inferred that he was of the region substantially known as Teman (q. v.), in Idumea; and as Eliphaz, the son of Esau, had a son called Teman, from whom the place took its name, many have concluded that this Eliphaz was a descendant of the other Eliphaz. Some, indeed, even go so far as to suppose that the Eliphaz of Job was no other than the son of Esau. This view is of course confined to those who refer the age of Job to the time of these patriarchs. But it is doubtful whether even this gives a date sufficiently early. See **JOB**.

Eliphaz is the first of the friends to take up the debate, in reply to Job's passionate complaints. He appears to have been the oldest of the speakers, from which circumstance, or from natural disposition, his language is more mild and sedate than that of the others (see Eichler, *De visione El'iphazi* [iv, 12-31], l. p. 1781). He begins his orations with delicacy, and conducts his part of the controversy with considerable address (chap. iv, v, xv, xxii). On him falls the main burden of the argument, that God's retribution in this world is perfect and certain, and that consequently suffering must be a proof of previous sin. His words are distinguished from those of Bildad and Zophar by greater calmness and elaboration, and, in the first instance, by greater gentleness towards Job, although he ventures afterwards, apparently from conjecture, to impute to him special sins. The great truth brought out by him is the unapproachable majesty and purity of God (iv, 12-21; v, 12-16). But still, with the other two friends, he is condemned for having, in defence of God's providence, spoken of him "the thing that was not right," i. e. by refusing to recognise the facts of human life, and by contenting himself with an imperfect retribution as worthy to set forth the righteousness of God. On sacrifice and the intercession of Job all three are pardoned.—Kitto, s. v.; Smith, s. v. See **JOB**, **BOOK OF**.

2. The son of Esau by one of his first wives, Adah, and father of several Edomitish tribes (Gen. xxxv, 4, 10, 11, 16; 1 Chron. i, 35, 36). B. C. post 1963.

**Eliph'eleh** (Heb. in the prolonged form *Eliphel'e'lu*, עִלְפָּהֶלֶּה, *God will distinguish him*; Sept. Ἐλιφαλά and Ἐλιφαλόυ v. r. Ἐλιφενά and Ἐλιφαιλαίας; Vulg. *Eliphahel*), a Merarite Levite; one of the gatekeepers (עֲרֵבֵי הַיָּד, A. V. porters") appointed by David to play on the harp "on the Sheminith," on the occasion of bringing up the ark to the city of David (1 Chron. xv, 18, 21). B. C. 1043.

**Eliph'elet** (Hebrew *Eliph'elet*, עִלְפָּהֶלֶּט, in pause *Eliph'al'et*, עִלְפָּהֶלֶּט, *God is his deliverance*), the name of several men.

1. (Sept. Ἐλιφאלάρ v. r. Ἀλιφαλέξ and Ἀλιφαλέτ, Vulg. *Eliphelath*.) One of David's distinguished warriors, styled "the son of Ahasbai, the son of the Maachathite" (2 Sam. xxiii, 34); but, by some error and abbreviation, **ELIPHAL** (q. v.), the son of Ur, [and] Hopher, the Mecherathite," in the parallel passage (1 Chron. xi, 35, 36).

2. (Sept. Ἐλιφאלέρ v. r. Ἐλιφαλέξ, Vulg. *Eliphaleth*.) The third of the nine sons of David, born at Jerusalem, exclusive of those by Bathsheba (1 Chron. ii, 6; xiv, 5, in which latter passage the name is written *Elphat*). B. C. post 1044.

3. (Sept. Ἐλιφאלέρ v. r. Ἐλιφαλά, Vulg. *Eliphelath*.) The ninth of the same (1 Chron. iii, 8; xiv, 7; 2 Sam.

v. 16, in which two latter passages the name is Anglicized "Eliphalet"). It is believed that there were not two sons of this name, but that, like Nogah, one is merely a transcriber's repetition. The two are certainly omitted in Samuel, but, on the other hand, they are inserted in two separate lists in Chronicles, and in both cases the number of sons is summed up at the close of the list. Josephus mentions but one *Eliphale* ('Ελιφαλ), as the last of David's eleven sons, and states that the last two were born of concubines (*Ant.* vii. 3, 3). See DAVID.

4. (Sept. 'Ελιφαλέρ, Vulg. *Eliphalet*.) The third of the three sons of Eshek, of the posterity of Benjamin, and a descendant of king Saul through Jonathan (1 Chron. viii. 39). B.C. ante 536.

5. (Sept. 'Ελιφαλάζ v. r. 'Ελιφαλάτ, Vulg. *Eliphalet*.) One of the sons of Adonikam, who returned from Babylon with his two brothers and 60 males (Ezra viii. 13). B.C. 459.

6. (Sept. 'Ελιφαλέτ, Vulg. *Elipheleth*.) An Israelite of the lineage of Hashum, who divorced his Gentile wife after the exile (Ezra x. 33). B.C. 458.

**Elis'abeth** (Ελισάβετ), wife of Zacharias or Zachariah, and mother of John the Baptist (Luke i. 5). She was a descendant of Aaron, or of the race of the priests; and of her and her husband this exalted character is given by the evangelist: "They were both righteous before God, walking in all the commandments and ordinances of the Lord blameless" (Luke i. 7, 13). They had remained childless till the decline of life, when an angel foretold to her husband Zachariah the birth of John, and Zachariah returning home, Elisabeth conceived. During five months she concealed the favor God had granted her; but the angel Gabriel discovered to the Virgin Mary this miraculous conception, as an assurance of the birth of the Messiah by herself. See ANNUNCIATION. Mary visited Elisabeth, and when she saluted her, Elisabeth felt the quickening of her unborn babe. When her child was circumcised she named him John, according to previous instructions from her husband (Luke i. 39-63). B.C. 7. See ZACHARIAS.

The name in this precise shape does not occur in the Old Testament, where the names of few females are given. But it is a Hebrew name, the same in fact as ELISHEBA (q. v.). It is perhaps etymologically connected with *Elissa* or *Elisa*, the Phœnician name of queen Dido (Virgil, *Æu.* iv. 335), whence the modern *Eliza*, *Elizabeth*.

**Elisæ'us** (Ελισαΐος or 'Ελισσαΐος), the Græcized form of the name of ELISHA (q. v.) in the N. T. (Luke iv. 27) and Apocrypha ('Ελισαΐ, Ecclus. xlviii. 12), as well as Josephus (*Ant.* viii. 13, 7 etc.).

**Elis'ha** (Heb. *Elisha'*, עִישָׁא, for עִישָׁאֵל, *God is his salvation*; Sept. 'Ελισαΐ or 'Ελισσαΐ, Josephus and N. T. 'Ελισσαΐος, Vulg. *Elisæus*, A. V. in N. T. and Apoc. ("Elisæus"), the son of Shaphat of Abel-meholah (1 Kings xix. 16-19), who became the attendant and disciple of Elijah (Josephus, *Ant.* viii. 13, 7), and his successor as prophet in the kingdom of Israel. See ELIJAH.

1. *History*.—The earliest mention of Elisha's name is in the command to Elijah in the cave at Horeb (1 Kings xix. 16, 17). But our first introduction to the future prophet is in the fields of his native place (B.C. cir. 900). Abel-meholah—the "meadow of the dance"—was probably in the valley of the Jordan, and, as its name would seem to indicate, in a moist or watered situation. See ABEL. Elijah, on his way from Sinai to Damascus by the Jordan valley, lights on his successor engaged in the labors of the field, twelve yoke before him, i. e. probably eleven other ploughs preceding him along the same line (see Thomson, *Land and Book*, i. 208). To cross to him, to throw over his shoulders the rough mantle—a token at once of investiture with the prophet's office, and of adoption as a son—was to Eli-

jah but the work of an instant, and the prophet strode on as if what he had done were nothing—"Go back again, for what have I done unto thee?" So sudden and weighty a call, involving the relinquishment of a position so substantial, and family ties so dear, might well have caused hesitation. But the parley was only momentary. To use a figure which we may almost believe to have been suggested by this very occurrence, Elisha was not a man who, having put his hand to the plough, was likely to look back; he delayed merely to give the farewell kiss to his father and mother, and preside at a parting feast with his people, and then followed the great prophet on his northward road to become to him what in the earlier times of his nation Joshua had been to Moses. Of the nature of this connection we know hardly anything. "Elisha the son of Shaphat, who poured water on the hands of Elijah," is all that is told us. The characters of the two men were thoroughly dissimilar, but how far the lion-like daring and courage of the one had infused itself into the other, we can judge from the few occasions on which it blazed forth, while every line of the narrative of Elijah's last hours on earth bears evidence how deep was the personal affection which the stern, rough, reserved master had engendered in his gentle and pliant disciple.

Seven or eight years must have passed between the call of Elisha and the removal of his master, and during the whole of that time we hear nothing of him. But when that period had elapsed he reappears, to become the most prominent figure in the history of his country during the rest of his long life.

Being anxious, after his remarkable appointment on receiving the robe as a symbol of inheriting the prophetic spirit of his ascended master, to enter at once upon the duties of his sacred office, Elisha determined to visit the schools of the prophets which were on the other side of the Jordan. Accordingly, returning to that river, and wishing that sensible evidence should be afforded, both to himself and others, of the spirit and power of his departed master resting upon him, he struck its waters with Elijah's mantle, when they parted asunder and opened a way for him to pass over on dry land. Witnessing this miraculous transaction, the fifty sons of the prophets, who had seen from the opposite side Elijah's ascension, and who were awaiting Elisha's return, now, with becoming reverence, acknowledged him their spiritual head. These young prophets are not more full of reverence for Elisha than of zeal for Elijah; they saw the latter carried up in the air—they knew that this was not the first time of his miraculous removal. Imagining it therefore possible that the Spirit of God had cast him on some remote mountain or valley, they ask permission to go and seek him. Elisha, though fully aware that he was received up into glory, but yet fearful lest it should be conceived that he, from any unworthy motives, was not anxious to have him brought back, yielded to their request. The unavailing search confirmed Elisha's fame. (B.C. cir. 892.)

There are several considerations from which the incompleteness of the records of Elisha's life may be inferred: (a.) The absence of marks by which to determine the dates of the various occurrences. The "king of Israel" is continually mentioned, but we are left to infer what king is intended (2 Kings v. 5, 6, 7, &c.; vi. 8, 9, 21, 26; vii. 2; viii. 3, 5, 6, etc.). This is the case even in the story of the important events of Naaman's cure, and the capture of the Syrian host at Dothan. The only exceptions are iii. 12 (comp. 6), and the narrative of the visit of Jehoash (xiii. 14, etc.), but this latter story is itself a proof of the disarrangement of these records, occurring as it does after the mention of the death of Jehoash (ver. 13), and being followed by an account of occurrences in the reign of Jehoahaz his father (ver. 22, 23). (b.) The absence of chronological sequence in the narratives. The story of the Shunam-

mite embraces a lengthened period, from before the birth of the child till he was some years old. Gehazi's familiar communication with the king, and therefore the story which precedes it (viii, 1, 2), must have occurred before he was struck with leprosy, though placed long after the relation of that event (v, 27). (c). The different stories are not connected by the form of words usually employed in the consecutive narrative of these books. (See Keil, *Comment. on Kings*, p. 318, where other indications will be found.) The call of Elisha seems to have taken place about four years before the death of Ahab. He died in the reign of Joash, the grandson of Jehu, B.C. cir. 855. Hence his public career embraces a period of not less than 65 years, for certainly 55 of which he held the office of "prophet in Israel" (2 Kings v, 8).

(1.) After the departure of his master, Elisha returned to dwell (עָשָׂה) at Jericho (2 Kings ii, 18). The town had lately been rebuilt (1 Kings xvi, 34), and was the residence of a body of the "sons of the prophets" (2 Kings ii, 5, 15). Among the most prominent features of that place are still the two perennial springs which, rising at the base of the steep hills of Quarantania behind the town, send their streams across the plain towards the Jordan, scattering, even at the hottest season, the richest and most grateful vegetation over what would otherwise be a bare tract of sandy soil. At the time in question, part, at least, of this charm was wanting. One of the springs was noxious—had some properties which rendered it unfit for drinking, and also prejudicial to the land (ii, 19, עָשָׂה, *bad*, A. V. "naught"). At the request of the men of Jericho, Elisha remedied this evil. He took salt in a new vessel, and cast it into the water at its source in the name of Jehovah. From the time of Josephus (*War*, iv, 8, 3) to the present (Saewulf, *Mod. Trav.* p. 17), the tradition of the cure has been attached to the large spring N.W. of the present town, and which now bears, probably in reference to some later event, the name of *Ain es-Sultân* (Robinson, *Researches*, ii, 383 sq.). See JERICHO.

(2.) We next meet with Elisha at Bethel, in the heart of the country, on his way from Jericho to Mount Carmel (2 Kings ii, 23). His last visit had been made in company with Elijah on their road down to the Jordan (ii, 2). Sons of the prophets resided there, but still it was the seat of the calf-worship, and therefore a prophet of Jehovah might expect to meet with insult, especially if not so well known and so formidable as Elijah. The road to the town winds up the defile of the wady Suweint, under the hill which still bears what in all probability are the ruins of Ai, and which, even now retaining some trees, was at that date shaded by a forest, thick, and the haunt of savage animals (comp. Amos v, 19). See BETHEL. Here the boys of the town were clustered, waiting, as they still wait at the entrance of the villages of Palestine, for the chance passer-by. In the scanty locks of Elisha, how were they to recognise the successor of the prophet, with whose shaggy hair streaming over his shoulders they were all familiar? So, with the license of the Eastern children, they scoff at the new-comer as he walks by—"Go up (עָשָׂה, hardly *ascend*, as if alluding to Elijah, but *pass on out of the way*), bald-head (עָשָׂה, devoid of hair on the *back* of the head, as opposed to עָשָׂה, bald on the *forehead*)!" For once Elisha assumed the sternness of his master. He turned upon them and cursed them in the name of Jehovah. There was in their expressions an admixture of rudeness, infidelity, and impiety. But the inhabitants of Bethel were to know, from bitter experience, that to dishonor God's prophets was to dishonor himself, for Elisha was at the moment inspired to pronounce the judgment which at once took effect. God, who never wants for instruments to accomplish his purposes, caused two

she-bears to emerge from the neighboring wood and punish the young delinquents. It is not said that they were actually killed (the expression is עָשָׂה, *to rend*, which is peculiarly applicable to the claws of the bear). This fate may indeed have befallen some of the party, but it is by no means probable in regard to the greater number.

Ehrenberg says that the bear is seen only on one part of the summit of Lebanon, called Mackmel, the other peak, Jebel Sanin, being, strangely enough, free from these animals. The Syrian bear is more of a frugivorous habit than the brown bear (*Ursus arctos*), but when pressed with hunger it is known to attack men and animals; it is very fond of a kind of chick-pea (*Cicer arietinus*), fields of which are often laid waste by its devastations. Most recent writers are silent respecting any species of bear in Syria, such as Shaw, Volney, Hasselquist, Burckhardt, and Schulz. Seetzen, however, notices a report of the existence of a bear in the province of Hasbeiya, on Mount Hermon. Klacder supposed this bear must be the *Ursus arctos*, for which opinion, however, he seems to have had no authority; and a recent writer, Dr. Thomson (*Land and Book*, ii, 373), says that the Syrian bear is still found on the higher mountains of this country, and that the inhabitants of Hermon stand in great fear of him. Hemprich and Ehrenberg (*Symbolæ Phys.* pt. i) inform us that during the summer months these bears keep to the snowy parts of Lebanon, but descend in winter to the villages and gardens; it is probable, also, that at this period in former days they extended their visits to other parts of Palestine; for, though this species was in ancient times far more numerous than it is now, yet the snowy summits of Lebanon were probably always the summer home of these animals. It is not improbable, therefore, that the attack upon the forty-two children who mocked Elisha took place some time in the winter, when these animals inhabited the low lands of Palestine. See BEAR.

(3.) Elisha extricates Jehoram, king of Israel, and the kings of Judah and Edom, from their difficulty in the campaign against Moab, arising from want of water (iii, 4-27). The revolt of Moab occurred very shortly after the death of Ahab (iii, 5; comp. i, 1), and the campaign followed immediately—"the same day" (iii, 6; A. V. "time"). The prophet was with the army; according to Josephus (*Ant.* ix, 3, 1) he "happened to be in a tent outside the camp of Israel." Joram he refuses to hear, except out of respect for Jehoshaphat, the servant of the true God; but a minstrel is brought, and at the sound of music the hand of Jehovah comes upon him, and he predicts a fall of rain, and advises a mode of procedure in connection therewith which results in the complete discomfiture of Moab. This incident probably took place at the S.E. end of the Dead Sea. See JEHORAM.

(4.) The widow of one of the sons of the prophets—according to Josephus, of Obadiah, the steward of Ahab—is in debt, and her two sons are about to be taken from her and sold as slaves by her creditors, as by an extension of the law (Exod. xxi, 7, and Lev. xxv, 29), and by virtue of another (Exod. xxii, 3), they had the power to do; and against this hard-hearted act she implores the prophet's assistance. God will not, *without a cause*, depart from the general laws of his administration: Elisha therefore inquires how far she herself had the power to avert the threatened calamity. She replies that the only thing of which she was possessed was one pot of oil. This Elisha causes (in his absence, iv, 5) to multiply (after the example of Elijah at Zarephath), until the widow has filled with it all the vessels which she could borrow, and thus procured the means of payment (2 Kings iv, 1-7). No place or date of the miracle is mentioned.

(5.) The next occurrence is at Shunem and Mount Carmel (iv, 8-37). The account consists of two parts.

[a.] Elisha, probably on his way between Carmel and the Jordan valley, calls accidentally at Shunem, now Solan, a village on the southern slopes of Jebel ed-Duhly, the little Hermon of modern travellers. Here he is hospitably entertained by a woman of substance, apparently at first ignorant of the character of her guest. Wishing that he should take up, more than occasionally, his abode under her roof, she proposed to her husband to construct for him a chamber which he might have for his own accommodation. The husband at once consented, and, the apartment being fitted up in a way that showed their proper conception of his feeling, the prophet becomes its occupant. Grateful for such disinterested kindness, Elisha delicately inquired of her if he could prefer her interest before the king or the captain of his host; for he must have had considerable influence at court, from the part he had taken in the late war. But the good woman declined the prophet's offer by declaring that she would rather "dwell among her own people," and in the condition of life to which she had been accustomed. Still, to crown her domestic happiness, she lacked one thing—she had no child; and now, by reason of the age of her husband, she could not expect such a blessing. In answer, however, to the prayer of the prophet, and as a recompense for her care of him, she was saved from that childless condition which was esteemed so great a calamity by every Jewish wife, and permitted to "embrace a son" (2 Kings, iv, 8-17).

[b.] After an interval of several years, the boy is old enough to accompany his father to the corn-field, where the harvest is proceeding. The fierce rays of the morning sun are too powerful for him, and (affected apparently by a *sun-stroke*) he is carried home to his mother only to die at noon. She says nothing of their loss to her husband, but depositing her child on the bed of the man of God, at once starts in quest of him to Mount Carmel. The distance is fifteen or sixteen miles—at least four hours' ride; but she is mounted on the best ass (אֲתוֹן, *the she-ass*, such being noted for excellence), and she does not slacken rein. Elisha is on one of the heights of Carmel commanding the road to Shunem, and from his position opposite to her (אֲתוֹן) he recognises in the distance the figure of the regular attendant at the services which he holds here at "new moon and sabbath" (comp. ver. 23). He sends Gehazi down to meet her, and inquire the reason of her unexpected visit. But her distress is for the ear of the master, and not of the servant, and she presses on till she comes up to the place where Elisha himself is stationed (אֲתוֹן, *the mount*, ver. 27, i. e. Carmel, ver. 25); then throwing herself down in her emotion, she clasps him by the feet. Misinterpreting this action, or perhaps with an ascetic feeling of the unholiness of a woman, Gehazi attempts to thrust her away. But the prophet is too profound a student of human nature to allow this—"Let her alone, for her soul is vexed within her, and Jehovah hath hid it from me, and hath not told me." "And she said"—with the enigmatical form of Oriental speech—"did I desire a son of my lord? Did I not say, do not deceive me?" No explanation is needed to tell Elisha the exact state of the case. The heat of the season will allow of no delay in taking the necessary steps, and Gehazi is at once dispatched to run back to Shunem with the utmost speed. He takes the prophet's walking-staff in his hand which he is to lay on the face of the child. The mother and Elisha follow in haste. Before they reach the village the sun of that long, anxious summer afternoon must have set. Gehazi meets them on the road, but he has no reassuring report to give; the placing of the staff on the face of the dead boy had called forth no sign of life. Then Elisha enters the house, goes up to his own chamber, "and he shut the door on them twain, and prayed unto Jehovah." It was what Elijah had done on a similar occasion, and

in this and his subsequent proceedings Elisha was probably following a method which he had heard of from his master. The child is restored to life, the mother is called in, and again falls at the feet of the prophet, though with what different emotions—"and she took up her son and went out" (2 Kings iv, 18-37). There is nothing in the narrative to fix its date with reference to other events. We here first encounter Gehazi, the "servant" (עַבְדִּי, *lad*) of the man of God. It must of course have occurred before the events of viii, 1-6, and therefore before the cure of Naaman, when Gehazi became a leper.

(6.) The scene now changes to Gilgal, apparently at a time when Elisha was residing there (iv, 38-41). The sons of the prophets are sitting round him. It is a time of famine, possibly the same seven years' scarcity which is mentioned in viii, 1, 2, and during which the Shunammite woman of the preceding story migrated to the Philistine country. The food of the party must consist of any herbs that can be found. The great caldron is put on at the command of Elisha, and one of the company brings his blanket (לַבְּשֵׁי, *not "lap"* as in A. V.) full of such wild vegetables as he has collected, and empties it into the pottage. But no sooner have they begun their meal than the taste betrays the presence of some noxious herb [see GORRD], and they cry out, "There is death in the pot, oh man of God!" In this case the cure was effected by meal which Elisha cast into the stew in the caldron (1 Kings iv, 38-41).

(7.) The next miracle in all probability belongs to the same time, and also to the same place as the preceding. A man from Baal-shalisha (q. v.) brings the man of God a present of the first-fruits, which under the law (Num. xviii, 8, 12; Deut. xviii, 3, 4) were the perquisite of the ministers of the sanctuary—20 loaves of the new barley, and some delicacy, the exact nature of which is disputed, but which seems most likely to have been roasted ears of corn not fully ripe (אֶבֶן, perhaps elliptically for אֶבֶן אֶבֶן; comp. Lev. xxiii, 4), brought with care in a sack or bag (אֶבֶן אֶבֶן, Sept. *πίρα*). This moderate provision is by the word of Jehovah rendered more than sufficient for a hundred men (2 Kings iv, 42-44). This is one of the instances in which Elisha is the first to anticipate in some measure the miracles of Christ.

(8.) The simple records of these domestic incidents amongst the sons of the prophets are now interrupted by an occurrence of a more important character (2 Kings v, 1-27). The chief captain of the army of Syria, to whom his country was indebted for some signal success (the tradition of the Jews is that it was Naaman who killed Ahab, *Midrash Tehillim*, p. 29 b, on Psa. lxxviii), was afflicted with leprosy, and that in its most malignant form, the white variety (ver. 27). In Israel this would have disqualified him from all employment and all intercourse (2 Kings xv, 5; 2 Chron. xxvi, 20, 21). But in Syria no such practice appears to have prevailed; Naaman was still a "great man with his master," "a man of countenance." One of the members of his establishment is an Israelitish girl, kidnapped by the marauders (אֲרָבִים) of Syria in one of their forays over the border, and she brings into that Syrian household the fame of the name and skill of Elisha. "The prophet in Samaria," who had raised the dead, would, if brought into the presence of (אֲרָבִים) the patient, have no difficulty in curing even this dreadful leprosy. The news is communicated by Naaman himself (אֲרָבִים, *not "one told"*) to the king. Benhadad had yet to learn the position and character of Elisha. He writes to the king of Israel a letter very characteristic of a military prince, and curiously recalling words uttered by another military man in reference to the cure of his sick servant many centuries later—"I say to this one, go, and he goeth, and to my servant, do

this, and he doeth it." "And now"—so ran Benhadad's letter after the usual complimentary introduction had probably opened the communication—"and now, when this letter is come unto thee, behold, I have sent Naaman, my slave, to thee, that thou mayest recover him of his leprosy." With this letter, and with a present, in which the rich fabrics (כִּי־בָבֶלֶת, i. q. a dress of ceremony) for which Damascus has always been in modern times so famous form a conspicuous feature, and with a full retinue of attendants (13, 15, 23), Naaman proceeds to Samaria. The king of Israel—his name is not given, but it was probably Joram—is dismayed at the communication. He has but one idea, doubtless the result of too frequent experience—"Consider how this man seeketh a quarrel against me!" The occurrence soon reaches the ears of the prophet, and with a certain dignity he "sends" to the king—"Let him come to me, and he shall know that there is a prophet in Israel." To the house of Elisha Naaman goes with his whole cavalcade, the "horses and chariot" of the Syrian general fixing themselves particularly in the mind of the chronicler. Elisha still keeps in the background, and while Naaman stands at the doorway, contents himself with sending out a messenger with the simple direction to bathe seven times in the Jordan. The independent behavior of the prophet, and the simplicity of the prescription—not only devoid of any ceremonial, but absolutely insulting to the native of a city which boasted, as it still boasts, of the finest water-supply of any city of the East, all combined to enrage Naaman. His slaves, however, knew how to deal with the quick but not ungenerous temper of their master, and the result is that he goes down to the Jordan and dips himself seven times, "and his flesh came again like the flesh of a little child, and he was clean." His first business after his cure is to thank his benefactor. He returns with his whole train (מִלְּבַיִת, i. e. "host" or "camp"), and this time he will not be denied the presence of Elisha, but, making his way in, and standing before him, he gratefully acknowledges the power of the God of Israel, and entreats him to accept the present which he had brought from Damascus. But Elisha is firm, and refuses the offer, though repeated with the strongest adjuration. Naaman, having adopted Jehovah as his God, begs to be allowed to take away some of the earth of his favored country, of which to make an altar. He then consults Elisha on a difficulty which he foresees. How is he, a servant of Jehovah, to act when he accompanies the king to the temple of the Syrian god Rimmon? He must bow before the god; will Jehovah pardon this disloyalty? Elisha's answer is "Go in peace," and with this farewell the caravan moves off. But Gehazi, the attendant of Elisha, cannot allow such treasures thus to escape him. "As Jehovah liveth"—an expression, in the lips of this vulgar Israelite, exactly equivalent to the oft-repeated *W'allah*—"by God"—of the modern Arabs, "I will run after this Syrian and take somewhat of him." So he frames a story by which the generous Naaman is made to send back with him to Elisha's house a considerable present in money and clothes. He then went in and stood before his master as if nothing had happened. But the prophet was not to be so deceived. His heart had gone after his servant through the whole transaction, even to its minutest details, and he visits Gehazi with the tremendous punishment of the leprosy, from which he has just relieved Naaman. The date of the transaction must have been at least seven years after the raising of the Shunammite's son. This is evident from a comparison of viii, 4 with 1, 2, 3. Gehazi's familiar conversation with the king must have taken place before he was a leper. See NAAMAN.

(9.) We now return to the sons of the prophets, but this time the scene appears to be changed, and is probably at Jericho, and during the residence of Elisha there. Whether from the increase of the scholars con-

sequent on the estimation in which the master was held, or from some other cause, their habitation had become too small—"The place in which we sit before thee is too narrow for us." They will therefore move to the close neighborhood of the Jordan, and cutting down beams—each man one, as with curious minuteness the text relates—make there a new dwelling-place. Why Jordan was selected is not apparent. Possibly for its distance from the distractions of Jericho—possibly the spot was once sanctified by the crossing of Israel with the ark, or of Elijah, only a few years before. Urged by his disciples, the man of God consents to accompany them. When they reach the Jordan, descending to the level of the stream, they commence felling the trees (כִּי־יִצְטָקוּ) of the dense belt of wood in immediate contact with the water. See JORDAN. As one of them was cutting at a tree overhanging the stream, the iron of his axe (a borrowed tool) flew off and sank into the water. His cry soon brought the man of God to his aid. The stream of the Jordan is deep up to the very bank, especially when the water is so low as to leave the wood dry, and is, moreover, so turbid that search would be useless. But the place at which the lost axe entered the water is shown to Elisha; he lops off (כִּי־יִצְטָקוּ) a stick and casts it into the stream, and the iron appears on the surface, and is recovered by its possessor (2 Kings vi, 1-7).

(10.) Elisha is now residing at Dothan, half way on the road between Samaria and Jezreel. The incursions of the Syrian marauding bands (comp. ver. 2) still continue, but apparently with greater boldness, and pushed even into places which the king of Israel is accustomed to frequent (comp. Josephus, *Ant.* ix, 4, 3). But their manœuvres are not hid from the man of God, and by his warnings he saves the king "not once nor twice." So baffled were the Syrians by these repeated failures as to make their king suspect treachery in his own camp. But the true explanation is given by one of his own people—possibly one of those who had witnessed the cure wrought on Naaman, and could conceive no power too great to ascribe to so gifted a person: "Elisha, the prophet in Israel, telleth the king of Israel the words that thou speakest in thy bed-chamber." So powerful a magician must be seized without delay, and a strong party with chariots is dispatched to effect his capture. They march by night, and before morning take up their station round the base of the eminence on which the ruins of Dothan still stand. Elisha's servant—not Gehazi, but apparently a new-comer, unacquainted with the powers of his master—was the first to discover the danger. But Elisha remains unmoved by his fears; and at his request the eyes of the youth are opened to behold the spiritual guards which are protecting them, horses and chariots of fire filling the whole of the mountain. But this is not enough. Elisha again prays to Jehovah, and the whole of the Syrian warriors are struck blind. He then descends, and offers to lead them to the person and the place which they seek. He conducts them to Samaria. There, at the prayer of the prophet, their sight is restored, and they find themselves, not in a retired country village, but in the midst of the capital of Israel, and in the presence of the king and his troops. His enemies thus completely in his grasp, the king of Israel is eager to destroy them. "Shall I slay? shall I slay, my father?" But the end of Elisha has been answered when he has shown the Syrians how futile are all their attempts against his superior power. "Thou shalt not slay. Thou mayest slay those whom thou hast taken captive in lawful fight, but not these [literally, "Are these what thou hast captured with thy sword and bow, that thou art for smiting them?"]: feed them, and send them away to their master." After such a repulse it is not surprising that the marauding forays of the Syrian troops ceased (2 Kings vi, 8-23). See BENHADAD.

(11.) But the king of Syria could not rest under such dishonor. He abandons his marauding system, and gathers a regular army, with which he lays siege to Samaria. The awful extremities to which the inhabitants of the place were driven need not here be recalled. Roused by an encounter with an incident more ghastly than all, and which remained without parallel in Jewish records till the unspeakable horrors of the last days of Jerusalem (Josephus, *War*, v, 10, 3; 13, 7, etc.), the king vents his wrath on the prophet, probably as having, by his share in the last transaction (so Josephus, *Ant.* ix, 4, 4), or in some other way not recorded, provoked the invasion; possibly actuated by the spite with which a weak bad man in difficulty often regards one better and stronger than himself. The king's name is not stated in the Bible, but there can be no doubt that Josephus is correct in giving it as Joram; and in keeping with this is his employment of the same oath which his mother Jezebel used on an occasion not dissimilar (1 Kings xix, 2), "God do so to me and more also, if the head of Elisha, the son of Shaphat, shall stand on him this day." No sooner is the word out of the king's mouth than his emissary starts to execute the sentence. Elisha is in his house, and round him are seated the elders of Samaria, doubtless receiving some word of comfort or guidance in their sore calamity. He receives a miraculous intimation of the danger. Ere the messenger could reach the house, he said to his companions, "See how this son of a murderer (alluding to Ahab in the case of Naboth) hath sent to take away my head! Shut the door, and keep him from entering: even now I hear the sound of his master's feet behind him (hastening to stay the result of his rash exclamation!" interprets Josephus, *Ant.* ix, 4, 4). As he says the words the messenger arrives at the door, followed immediately, as the prophet had predicted, by the king and by one of his officers, the lord on whose hand he leaned. What follows is very graphic. The king's hereditary love of Baal burst forth, and he cries, "This evil is from Jehovah," the ancient enemy of my house: "why should I wait for Jehovah any longer?" To this Elisha answers: "Hear the word of Jehovah"—he who has sent famine can also send plenty—"to-morrow at this time shall a measure of fine flour be sold for a shekel, and two measures of barley for a shekel, in the gate of this very city." "This is folly," says the officer; "even if Jehovah were to make windows in heaven and pour down the provisions, it could not be." "It can, it shall," replies Elisha; "and you, ye shall see it all, but shall not live even to taste it" (2 Kings vi, 24-vii, 2). The next night God caused the Syrians to hear the noise of chariots and horses; and conceiving that Jehoram had hired against them the kings of the Hittites and the king of Egypt, they fled from before the walls of Samaria—leaving their tents filled with gold and provisions—in the utmost panic and confusion. In this way did God, according to the word of Elisha, miraculously deliver the inhabitants of Samaria from a deadly enemy without, and from sore famine within, its walls: another prediction moreover was accomplished; for the distrustful lord was trampled to death by the famished people in rushing through the gate of the city to the forsaken tents of the Syrians (2 Kings vii). See SAMARIA.

(12.) We now go back several years to an incident connected with the lady of Shunem, at a period antecedent to the cure of Naaman and the transfer of his leprosy to Gehazi (v, 1, 27). Elisha had been made aware of a famine which Jehovah was about to bring upon the land for seven years; and he had warned his friend the Shunammite of it that she might provide for her safety. Accordingly she had left Shunem with her family, and had taken refuge in the land of the Philistines, that is, in the rich corn-growing plain on the sea-coast of Judah, where, secure from want, she remained during the dearth. At the end of the seven

years she returned to her native place, to find that during her absence her house with the field-land attached to it—the corn-fields of the former story—had been appropriated by some other person. In Eastern countries kings are (or were) accessible to the complaints of the meanest of their subjects to a degree inconceivable to the inhabitants of the Western world. To the king, therefore, the Shunammite had recourse, as the widow of Tekoah on a former occasion to king David (2 Sam. xiv, 4). Thus occurred one of those rare coincidences which it is impossible not to ascribe to something more than mere chance. At the very moment of the entrance of the woman and her son—clamoring, as Oriental suppliants alone clamor (פזז), for her home and her land—the king was listening to a recital by Gehazi of "all the great things which Elisha had done," the crowning feat of all being that which he was then actually relating—the restoration to life of the boy of Shunem. The woman was instantly recognised by Gehazi. "My lord, O king, this is the woman and this is her son whom Elisha restored to life." From her own mouth the king hears the repetition of the wonderful tale, and, whether from regard to Elisha, or struck by the extraordinary coincidence, orders her land to be restored, with the value of all its produce during her absence (2 Kings viii, 1-6).

(13.) Hitherto we have met with the prophet only in his own country. We now find him at Damascus. (The traditional spot of his residence on this occasion is shown in the synagogue at *Jobar* [? *Hobah*], a village about two miles E. of Damascus. The same village, if not the same building, also contains the cave in which Elijah was fed by ravens and the tomb of Gehazi [Stanley, *Palest.* p. 412; Quaresmius, ii, 881—"vama et mendacia Hebræorum"].) He is there to carry out the command given to Elijah on Horeb to "anoint Hazael to be king over Syria." At the time of his arrival Benhadad was prostrate with his last illness. This marks the time of the visit as after the siege of Samaria, which was conducted by Benhadad in person (comp. vi, 24). The memory of the cure of Naaman, and of the subsequent disinterestedness of the prophet, were no doubt still fresh in Damascus; and no sooner does he enter the city than the intelligence is carried to the king—"The man of God is come hither." The king's first desire is naturally to ascertain his own fate; and Hazael, who appears to have succeeded Naaman, is commissioned to be the bearer of a present to the prophet, and to ask the question on the part of his master, "Shall I recover of this disease?" The present is one of royal dimensions—a caravan (of 40 camels, according to Josephus, *Ant.* ix, 4, 6) laden with the riches and luxuries which that wealthy city alone could furnish. The terms of Hazael's address show the respect in which the prophet was held even in this foreign and hostile country. They are identical with those in which Naaman was addressed by his slaves, and in which the king of Israel in a moment of the deepest gratitude and reverence had addressed Elisha himself. "Thy son Benhadad hath sent me to thee, saying, 'Shall I recover of this disease?'" The reply, probably originally ambiguous, is doubly uncertain in the present doubtful state of the Hebrew text, but the general conclusion was unmistakable: "Jehovah hath showed me that he shall surely die." But this was not all that had been revealed to the prophet. If Benhadad died, who would be king in his stead but the man who now stood before him? The prospect was one which drew forth the tears of the man of God. This man was no rash and imprudent leader, who could be baffled and deceived as Benhadad had so often been. Behind that "steadfast," impenetrable countenance was a steady courage and a persistent resolution, in which Elisha could not but foresee the greatest danger to his country. Here was a man who, give him but the power, would "op-

press" and "cut Israel short," would "thresh Gilead with threshing instruments of iron," and "make them like the dust by threshing" as no former king of Syria had done, and that at a time when the prophet would be no longer alive to warn and to advise. At Hazael's request Elisha confesses the reason of his tears. But the prospect is one which has no sorrow for Hazael. How such a career presented itself to him may be inferred from his answer. His only doubt is the possibility of such good fortune for one so mean. "But what is thy slave, dog that he is (דָּבָרִים אֲדָבָרִים, *thy servant*, THE *dog*, i. e. insignificant object), that he should do this great thing?" To this Elisha replies, "Jehovah hath showed me that thou wilt be king over Syria." Returning to the king, Hazael tells him only half the dark saying of the man of God—"He told me that thou shouldst surely recover." But that was the last day of Benhadad's life. What were the circumstances attending his death, whether in the bath as has recently been suggested (Ewald, *Isr. Gesch.* iii, 523 note), is not clear, except that he seems to have been smothered. The general inference, in accordance with the account of Josephus, is that Hazael himself was the murderer, but the statement in the text does not necessarily bear that interpretation (הִרְבֵּה הַבְּשָׂמִים, may well be rendered "one took the [not a] hair-cloth," i. e. perhaps divan-mattress); and, indeed, from the mention of Hazael's name at the end of the passage, the conclusion is rather the reverse (2 Kings viii, 7-15). See HAZAEL.

(14.) Two of the injunctions laid on Elijah had now been carried out, but the third still remained. Hazael had begun his attacks on Israel by an attempt to recover the stronghold of Ramoth-Gilead (viii, 28), or Ramah, among the mountains on the east of Jordan. But the fortress was held by the kings of Israel and Judah in alliance, and, though the Syrians had wounded the king of Israel, they had not succeeded in capturing the place (viii, 28; ix, 15). One of the captains of the Israelitish army in the garrison was Jehu, the son of Jehoshaphat, the son of Nimshii. At this time his name was mentioned to Elijah on Horeb he must have been but a youth; now he is one of the boldest and best known of all the warriors of Israel. He had seen the great prophet once, when with his companion Bidkar he attended Ahab to take possession of the field of Naboth, and the scene of that day, and the words of the curse then pronounced, no subsequent adventure had been able to efface (ix, 25, 36). The time had now come for the fulfilment of that curse by his being anointed king over Israel. Elisha's personal share in the transaction was confined to giving directions to one of the sons of the prophets, and the detailed narrative may be found in 2 Kings ix (see Maurice, *Prophets and Kings*, serm. ix). See JEHU.

(15.) Beyond this we have no record of Elisha's having taken any part in the revolution of Jehu, or the events which followed it. He does not again appear till we find him on his death-bed in his own house (xiii, 14-19). Joash, the grandson of Jehu, is now king, and he has come to weep over the approaching departure of the great and good prophet. His words are the same as those of Elisha when Elijah was taken away—"My father! my father! the chariot of Israel and the horsemen thereof!" But it is not a time for weeping. One thought fills the mind of both king and prophet. Syria is the fierce enemy who is gradually destroying the country, and against Syria one final effort must be made before the aid of Elisha becomes unobtainable. What was the exact significance of the ceremonial employed, our ignorance of Jewish customs does not permit us to know, but it was evidently symbolic. The window is opened towards the hated country, the bow is pointed in the same direction, and the prophet laying his hands on the string as if to convey force to the shot, "the arrow of Jehovah's deliverance,

the arrow of deliverance from Syria," is discharged. This done, the king takes up the bundle of arrows, and, at the command of Elisha, beats them on the ground. But he does it with no energy, and the successes of Israel, which might have been so prolonged as completely to destroy the foe, are limited to three victories. See JEHOASH.

(16.) The power of the prophet, however, does not terminate with his death. Even in the tomb (Josephus embellishes the account by stating that he had a magnificent funeral, *Ant.* ix, 8, 6) he restores the dead to life. Moab had recovered from the tremendous reverse inflicted on her by the three kings at the opening of Elisha's career (2 Kings iii), and her marauding bands had again begun the work of depredation which Syria so long pursued (2 Kings v, 2; vi, 23). The text perhaps infers that the spring—that is, when the early crops were ripening—was the usual period for these attacks; but, be this as it may, on the present occasion they invaded the land "at the coming in of the year." A funeral was going on in the cemetery which contained the sepulchre of Elisha. Seeing the Moabitish spoilers in the distance, the friends of the dead man hastened to conceal his corpse in the nearest hiding-place. They chose—whether by design or by accident is not said—the tomb of the prophet, and, as the body was pushed (אֶרְבֶּבֶת) into the cell which formed the receptacle for the corpse in Jewish tombs, it came in contact with his bones. The mere touch of those hallowed remains was enough to effect that which in his lifetime had cost Elisha both prayers and exertions—the man "revived and stood up on his feet." Other miracles of the prophet foreshadow, as we have remarked, the acts of power and goodness of our Saviour, but this may rather be said to recal the marvels of a later period—of the early ages of the Christian Church. It is in the story of Gervasius and Protasius (Augustine's *Confessions*, ix, § 16), and not in any occurrence in the life of our Lord or of the apostles, that we must look for a parallel to the last-recorded miracle of Elisha (2 Kings xiii, 20-22).

2. *Characteristics and Traditional Views.*—In almost every respect Elisha presents the most complete contrast to Elijah. The copious collection of his sayings and doings which are preserved in the 3d to the 9th chapter of the 2d book of Kings, though in many respects deficient in that remarkable vividness which we have noted in the records of Elijah, is yet full of testimonies to this contrast. Elijah was a true Bedouin child of the desert. The clefts of the Cherith, the wild shrubs of the desert, the cave at Horeb, the top of Carmel, were his haunts and his resting-places. If he enters a city, it is only to deliver his message and be gone. Elisha, on the other hand, is a civilized man, an inhabitant of cities. He passed from the translation of his master to dwell at Jericho (2 Kings ii, 18); from thence he "returned" to Samaria (ver. 25). At Samaria (v, 3; vi, 32; comp. ver. 24) and at Dothan (vi, 14) he seems regularly to have resided in a house (v, 9, 24; vi, 32; xiii, 17) with "doors" and "windows," in familiar intercourse with the sons of the prophets, with the elders (vi, 32), with the lady of Shunem, the general of Damascus, the king of Israel. Over the king and the "captain of the host" he seems to have possessed some special influence, capable of being turned to material advantage if desired (2 Kings iv, 13). The touches of the narrative are very slight, but we can rather that his dress was the ordinary garment of an Israelite, the *beged*, probably similar in form to the long *abbejeh* of the modern Syrians (2 Kings ii, 12), that his hair was worn short (if not naturally deficient) behind, in contrast with the long locks of Elijah (ii, 23), and that he used a walking-staff (iv, 29) of the kind ordinarily carried by grave or aged citizens (Zech. viii, 4). What use he made of the rough mantle of Elijah, which came into his possession at their

parting, does not anywhere appear, but there is no hint of his ever having worn it. Elijah was emphatically a destroyer. His mission was to slay and to demolish whatever opposed or interfered with the rights of Jehovah, the Lord of Hosts. The nation had adopted a god of power and force, and they were shown that he was feebleness itself compared with the God whom they had forsaken. But after Elijah the destroyer comes Elisha the healer. "There shall not be dew nor rain these years" is the earliest proclamation of the one. "There shall not be from thence any death or barren land" is the first miracle of the other. What may have been the disposition of Elijah when not engaged in the actual service of his mission we have unhappily no means of knowing. Like most men of strong, stern character, he probably had affections not less strong. But it is impossible to conceive that he was accustomed to the practice of that beneficence which is so strikingly characteristic of Elisha, and which comes out at almost every step of his career. Still more impossible is it to conceive him exercising the tolerance towards the person and the religion of foreigners for which Elisha is remarkable—in communication, for example, with Naaman or Hazaël; in the one case calming with a word of peace the scruples of the new proselyte, anxious to reconcile the due homage to Kimmion with his allegiance to Jehovah; in the other case contemplating with tears, but still with tears only, the evil which the future king of Syria was to bring upon his country. That Baal-worship was prevalent in Israel even after the efforts of Elijah, and that Samaria was its chief seat, we have the evidence of the narrative of Jehu to assure us (2 Kings x, 18-27), but his mission is not so directly to rebuke and punish it. In the eulogium of Elisha contained in the catalogue of worthies of Ecclesiastes, xlviii, 12-14—the only later mention of him save the passing allusion of Luke iv, 27—his special character is more strongly brought out than in the earlier narrative: "Whilst he lived he was not moved by the presence of any prince, neither could any bring him into subjection. No word could overcome him, and after his death his body prophesied. He did wonders in his life, and at his death were his works marvelous."

This thaumaturgic view of Elisha is indeed the true key to his Biblical history, for he evidently appears in these records chiefly as a worker of prodigies, a predictor of future events, a revealer of secrets, and things happening out of sight or at a distance. The working of wonders seems to be a natural accompaniment of false religions, and we may be sure that the Baal-worship of Samaria and Jezreel was not free from such arts. The story of 1 Kings xxii shows that even before Elisha's time the prophets had come to be looked upon as diviners, and were consulted, not on questions of truth and justice, nor even as depositaries of the purposes and will of the Deity, but as able to foretell how an adventure or a project was likely to turn out, whether it might be embarked in without personal danger or loss. But if this degradation is inherent in false worship, it is no less a principle in true religion to adjust itself to a state of things already existing, and out of the forms of the alien or the false to produce the power of the true. Thus Elisha appears to have met the habits of his fellow-countrymen. He wrought, without reward and without ceremonial, the cures and restorations for which the soothsayers of Baalzebub at Ekron were consulted in vain: he warned his sovereign of dangers from the Syrians which the whole four hundred of his prophets had not succeeded in predicting to Ahab, and thus in one sense we may say that no less signally than Elijah he vanquished the false gods on their own field.

The frequency and unparalleled nature of his miracles also furnish perhaps the best explanation of Elisha's behest of "a double portion of his own spirit"

upon Elisha (2 Kings-ii, 9). The ordinary meaning put upon this phrase (see, for example, J. H. Newman, *Subj. of the Day*, p. 191) is that Elisha possessed double the power of Elijah. This, though sanctioned by the renderings of the Vulgate and Luther, and adopted by a long series of commentators from Ephraem Syrus to Krummacker, would appear not to be the real force of the words. The expression is *שְׁנַיִם פִּי*, literally "a mouth of two"—a double mouthful—the same phrase employed in Deut. xxi, 17 to denote the amount of a father's goods which were the right and token of a first-born son. Thus the gift of the "double portion" of Elijah's spirit was but the legitimate conclusion of the act of adoption which began with the casting of the mantle at Abel-meholah years before. It was this which Elisha sought—not a gift of the spirit of prophecy twice as large as Elijah himself possessed. This carries improbability on the very face of it; for with what propriety could a man be asked to leave as an inheritance to another double of what he himself possessed? Nor did Elisha get any such superlative endowment; his position as a prophet was altogether of a dependent and secondary nature as compared with Elijah's; and the attempts that have been made to invert the relation of the one to the other, proceed upon arbitrary and superficial considerations. Not less arbitrary is the view of Ewald, that the request of Elisha must be understood as indicating a wish for two thirds only of Elijah's spirit (*Gesch.* iii, 507)—a view that requires no refutation. The proper explanation is, that Elisha here regarded Elijah as the head of a great spiritual household, which included himself as the first-born and all who had since been added to the fraternity under the name of "the sons of the prophets;" and what he now sought was, that he might be constituted Elijah's heir in the spiritual vineyard, by getting the first-born's double portion, and therewith authority to continue the work. For a curious calculation by Peter Damianus that Elijah performed twelve miracles and Elisha twenty-four, see the *Acta Sanctorum*, July 20.

Elisha is canonized in the Greek Church; his day is the 14th of June. Under that date, his life, and a collection of the few traditions concerning him—few indeed when compared with those of Elijah—may be found in the *Acta Sanctorum*. In the time of Jerome a "mausoleum" containing his remains was shown at Samaria (Reland, *Palæst.* p. 986). Under Julian the bones of Elisha were taken from their receptacle and burnt. But, notwithstanding this, his relics are heard of subsequently, and the church of St. Apollinaris at Ravenna still boasts of possessing his head. The Carmelites have a special service in honor of Elisha.—Kitto, s. v.; Smith, s. v.; Fairbairn, s. v.

3. *Literature.*—On the subject generally, Kitto, *Daily Bible Illustrations*, "Solomon and Kings," 47th to 49th week; Niemeyer, *Charakt.* v, 364 sq.; Blunt, *History of Elisha* (new ed. Lond, 1862); Krummacker, *Elisha* (from the German, Lond, 1838); Anon. *Short Meditations on Elisha* (Lond, 1848); Cassel, *Der Prophet Elisa* (Berlin, 1860); Stanley, *Jewish Church*, ii, 353 sq. On the fate of the Bethelie youths, Michaelis, *De Elisæo vindicato* (Pref. a. O. 1734). On the miracle of the axe-helve, Freise, *Ferrum natans* (Jen. 1689). On the Shunammite's, Thomson, *Land and Book*, ii, 177 sq.

**Elisha** (in Armenian *Eghische*), one of the most celebrated Armenian historians, was born at the beginning of the 5th century. He was a pupil of the patriarch St. Sahag (Isaac) and of St. Mesrob, by whom he was sent to the schools of Athens, Alexandria, and Constantinople. Subsequently he became almoner and secretary of prince Vartan, who, in the religious war of the Armenians against the Persians, was chief commander of the Armenian army. He died in 480. Probably he is the same person with bishop Elisha of Amathunik, who in 449 was present at the Syn-

od of Artishat, at which the bishops of Armenia replied to the summons of the Persian ruler Yesdegerd II to adopt the faith of Zoroaster. This reply, to which was added a brief apology of the Christian religion, led to the religious war which is described by Elisha. So great was the reputation of this work that its author received the surname of the Armenian Xenophon. It begins with the accession to the throne of Yesdegerd in 439, describes in full the schemes of persecution devised by the Persian king against the Armenians, the resistance of the Armenian bishops and princes, the "holy alliance" concluded by the latter, and its operation and fate until the unfortunate battle at the river Techmut, in the province of Artas, in 451, in consequence of which the leaders of the holy alliance and most of the bishops were captured and taken to Persia. The first edition of this work was printed at Constantinople in 1764 (new ed. 1833); other editions appeared at Nakhidchevan (1764), Calcutta (1816), and Venice (1823 and 1838). The last Venice edition, which is the best, contains also commentaries to the books of Joshua and Judges, a recommendation of monastic life, an exposition of the Lord's Prayer, several homilies, and a work on the ecclesiastical canons. An English translation of the work was published by Fr. Neumann (*The History of Vartan and of the Battle of the Armenians, containing an Account of the religious Wars between the Persians and Armenians*, by Elisens, bishop of the Amaduniens, etc., Lond. 1830). It has also been translated into French by abbé G. K. Garabed (*Soulercement national de l'Arménie chrétienne*, Par. 1844, 8vo), and into Italian by G. Cappelletti (Ven. 1841). Elisha is also the author of a history of Armenia, which, however, appears to be lost.—Wetzer u. Welte, *Kirchen-Lex.* iii, 540; Hofer, *Nov. Biog. Génér.* xv, 884; Neumann, *Versuch einer Gesch. der armen. Litter.* p. 69, 70. (A. J. S.)

**Eli'shah** (Heb. *Elishah*, עִלְיָשָׁה, deriv. unknown; Sept. *Ἐλισά* and *Ἐλισαί*; Josephus, *Ἐλισάς*, Vulg. *Elisha*), the oldest of the four sons of Javan (Gen. x, 4; 1 Chron. i, 7). B.C. cir. 2450. He seems to have given name to a region on the Mediterranean, "the isles (עִלְיָשָׁה, *shores*) of Elishah," which are described as exporting fabrics of purple and scarlet to the markets of Tyre (Ezek. xxvii, 7). If the descendants of Javan peopled Greece, we may expect to find Elishah in some province of that country. The circumstance of the purple suits the Peloponnesus, for the fish affording the purple dye was caught at the mouth of the Eurotas, and the purple of Laconia was very celebrated. See PURPLE. The name seems kindred to *Elis* (Bochart, *Phaleg*, iii, 4), which, in a wider sense, was applied to the whole Peloponnesus; and some identify *Elishah* with *Hellas* (Michaelis, *Spicileg.* i, 79).—Kitto, s. v. Josephus, however, identified the race of Elishah with the *Æolians* (*Ant.* i, 6, 1). His view is adopted by Knobel (*Völkertafel*, p. 81 sq.). It appears correct to treat it as the designation of a race rather than of a locality; and if Javan represents the Ionians, then Elishah the *Æolians*, whose name presents considerable similarity (*Ἰολοίς* having possibly been *Ἰελίς*), and whose predilection for maritime situations quite accords with the expression in Ezekiel. In early times the *Æolians* were settled in various parts of Greece, Thessaly, Bœotia, Ætolia, Locris, Elis, and Messenia: from Greece they emigrated to Asia Minor, and in Ezekiel's age occupied the maritime district in the N.W. of that country, named after them *Æolis*, together with the islands Lesbos and Tenedos. The purple shell-fish was found on this coast, especially at Abydos (Virgil, *Georg.* i, 207), Phocæa (Ovid, *Metam.* vi, 9), Sigæum and Lectum (Athenæus, iii, 88). Not much, however, can be deduced from this as to the position of the "isles of Elishah," as that shell-fish was found in many parts of the Mediterranean, especially on the coast of Laconia (Pausan. iii, 21, § 6).—

Smith, s. v. Schulthess (*Paradies*, p. 264), without the slightest probability, argues in favor of a position on the western coast of Africa, on the ground of the resemblance to *Elisha* as the Phœnician name of Carthage. See ETYMOLOGY.

**Elish'ama** (Heb. *Elishama*, עִלְיָשָׁמָא, whom *God has heard*), the name of several men.

1. (Sept. *Ἐλισαμά* v. r. in Chron. *Ἐλισαμαί*.) Son of Ammihud, and "prince" or "captain" (both *נָשִׂיא*, i. e. phylarch) of the tribe of Ephraim at the Exode (Num. i, 10; ii, 18; vii, 48, 53; x, 22). B.C. 1658. From the genealogy in 1 Chron. vii, 26, we find that he was the grandfather of Joshua.

2. (Sept. *Ἐλισαμά* v. r. *Ἐλισά*.) The second of the nine sons of David born at Jerusalem, exclusive of those by Bathsheba (1 Chron. iii, 6); called in the parallel passages (2 Sam. v, 15; 1 Chron. xiv, 5) by apparently the more correct name ELISHUA (q. v.).

3. (Sept. *Ἐλισαμά*.) The seventh of the same series of sons (2 Sam. v, 16; 1 Chron. iii, 8; xiv, 7), being one of the thirteen, or, according to the record of Samuel, the eleven, sons born to David of his wives after his establishment in Jerusalem. B.C. post 1044. The list in Josephus (*Ant.* vii, 3, 3) has no similar name. See DAVID.

4. (Sept. *Ἐλισαμά*.) One of the two priests sent by Jehoshaphat with the Levites to teach the Law through the cities of Judah (2 Chron. xvii, 8). B.C. 912.

5. (Sept. *Ἐλισαμά*.) Son of Jekamiah, a descendant of Judah (1 Chron. ii, 41). In the Jewish traditions preserved by Jerome (*Qu. Hebr.* on 1 Chron. ii, 41) he appears to be identified with

6. (Sept. *Ἐλισαμά* v. r. in Jer. *Ἐλισά* and *Ἐλεασά*.) A member of the royal line of Judah; father of Nethaniah, and grandfather of Ishmael who slew Gedaliah, provisional governor of Jerusalem after its capture by the Babylonians (2 Kings xxv, 25; Jer. xli, 1). B.C. considerably ante 588.

7. (Sept. *Ἐλισαμά*.) A royal scribe in whose chamber the roll of Jeremiah was read to him and other assembled magnates, and afterwards deposited for a time (Jer. xxxvi, 12, 20, 21). B.C. 605.

**Elish'aphat** (Heb. *Elishaphat*, עִלְיָשָׁפָת, whom *God has judged*; Sept. *Ἐλισαφάτ* v. r. *Ἐλισαφάν*), son of Ziechri, and one of the "captains of hundreds" whom Jehoiaada associated with himself in the league to overthrow the usurpation of Athaliah (2 Chron. xxiii, 1). B.C. 877.

**Elish'eba** (Heb. *Elish'eba*, עִלְיָשָׁבָה, *God is her oath*, or she *swears by God*, i. e. worshipper of God, comp. Isa. xix, 8; Sept. *Ἐλισάβητ*, Vulg. *Elisabeth*; as in Luke i, 7), the daughter of Amminadab, phylarch of the tribe of Judah, and sister of Nahshon, the captain of the Hebrew host (Num. ii, 3); she became the wife of Aaron (q. v.), and hence the mother of the priestly family (Exod. vi, 23). B.C. 1658.

**Elishu'a** (Heb. *id.* עִלְיָשֻׁעַ, *God is his salvation*; Sept. *Ἐλισουή* v. r. *Ἐλισάβ* and *Ἐλισά*, Vulg. *Elishu*), one of the sons of David, born at Jerusalem (2 Sam. v, 15; 1 Chron. xiv, 5); called ELISHAMA (q. v.) in the parallel passage (1 Chron. iii, 6). B.C. post 1044.

**Elis'imus** (*Ἐλισάμοσ*; Vulg. *Liasmus*), an Israelite of the "sons of Zamoth," who divorced his Gentile wife after the exile (1 Esdr. ix, 28); evidently the ELASHIB (q. v.) of the Heb. text (Ezra x, 27).

**Eli'u** (Ἠλιού, i. e. *Elihu*), one of the forefathers of Judith (Jud. viii, 1), and therefore of the tribe of Simeon. See JUDITH.

**Eli'ud** (*Ἐλισάδ*, prob. for Heb. *עִלְיָד*, *God is his praise*, but not found in O. T.), son of Achim, and father of Eleazar, being the fifth in ascent in Christ's paternal genealogy (Matt. i, 14, 15). B.C. cir. 200. See GENEALOGY OF CHRIST.

**Elizabeth**, queen of England, ascended the throne on the death of her sister, the bloody Mary, Nov. 17, 1558, and died March 24 (April 3, New Style), 1603. She was the daughter and only living child of Anne Boleyn and Henry VIII. She was born Sept. 7, 1533, and was therefore "full five-and-twenty years old when she came to the crown." Before she was three years of age her mother was beheaded by her father, who, according to his own declaration, "never spared man in his anger, nor woman in his lust." On the 8th of June of the same year, 1536, the Parliament declared the divorces of Catharine of Aragon and Anne Boleyn legal, and bastardized the issue of both marriages. The same decision had been previously pronounced by archbishop Cranmer in the Star-Chamber, and confirmed by the Convocation. The Parliament also empowered Henry to settle the succession by testamentary disposition. In January, 1544, Elizabeth was restored to the line of royal inheritance.

During the lifetime of her father her education was carefully encouraged, especially by queen Catharine Parr; and it was continued after his death. She was instructed in Latin and Greek by William Grindal and Roger Ascham. The latter commends her masculine power of application, quick apprehension, and retentive memory. "She spoke French and Italian with fluency, was elegant in her penmanship, and was skilful in music, though she did not delight in it." She seems also to have had some acquaintance with German. Her position was at all times exceedingly dubious, and rarely free from peril.

On the accession of her brother Edward VI she encountered other risks than those she had been previously exposed to. In her infancy her hand had been designed for the duke of Orleans, third son of Francis I; it was offered to the earl of Arran, and declined by him; it was then proposed for Philip of Spain. Under Edward VI, admiral Seymour, the brother of the lord protector, hesitated between seeking the hand of Mary, Elizabeth, or the lady Jane Grey. He finally accepted that of the queen dowager, but did not discontinue his amorous attentions, and renewed his addresses to the princess Elizabeth on his wife's death. Her fair fame was impeached by her encouragement of his devotions; and this furnished one of the charges against him which resulted in his execution.

New dangers encompassed her on the death of her brother. Dudley, earl of Northumberland, father of the earl of Leicester, the subsequent favorite, had persuaded the boy-king, in his last illness, to set aside both his sisters on the ground of their illegitimacy, and to bequeath the crown to the lady Jane Grey (great-niece of Henry VIII), who had recently been married to his fourth son, lord Guilford Dudley. Ridley, bishop of London, preached vehemently in favor of lady Jane, and against any supposed title of Mary and Elizabeth, both of whom were regarded as Roman Catholic, and favorable to the restoration of the old religion. Northumberland offered lands and money to Elizabeth to induce her to renounce her claims, but she adroitly evaded his proposals.

The legitimacy of Mary was declared by Parliament, which thus stigmatized anew the birth of Elizabeth. She conformed to the rites of the Roman Catholic Church with some reluctance, but was viewed with suspicion. In 1554 she was implicated, in connection with her dissolute suitor, Courtenay, earl of Devonshire, in Wyatt's conspiracy, and was confined to the Tower for two months. Her death was demanded; but Philip II, now the husband of Mary, interposed, and she was put under surveillance at Woodstock. Philip proposed to bestow her upon Emanuel Philibert, duke of Savoy, who afterwards married, according to the provisions of the treaty of Cateau-Cambresis, Margaret of France.

These points may appear trivial in a rapid notice of the life and reign of Elizabeth, but they affected both

the development of her character and the policy of her government. The death of queen Mary exposed her to untried difficulties, requiring discernment, resolution, and singular good fortune. Her accession to the throne was unchallenged in Parliament, and was heard with demonstrations of joy by the populace of London. She herself, however, in her retirement at Hatfield, recognised the gravity of the occasion. She had been declared illegitimate and incapable of the crown by her father, by her brother, by the Star-Chamber, by the Convocation, and twice by act of Parliament. For the last twenty years the religion of England had been determined by royal edicts and parliamentary enactments. The majority of the people were Roman Catholic in consequence of the measures of the late reign. Elizabeth, in the presence of her dying sister, had "prayed God that the earth might open and swallow her alive if she were not a true Roman Catholic." But, if Roman Catholicism remained the national creed, her tenure of the crown would be wholly precarious, as the illegitimacy of her birth would be inevitably and irrefragably maintained. The superior title of Mary, queen of Scots, would prevail, perhaps, with the aid of French arms, while the Brandon or Suffolk line might seek Spanish support. Roman Catholic her government could not be; but, if she renounced Rome, she united the religious with the political enthusiasm of France, under the instigation of the Guises, against her reign, and alienated or provoked Philip II, then aspiring to universal dominion, and having in his own person some claims to the English throne, which he afterwards advanced. He had hastened to tender his widowed heart and hand to the new queen immediately on the death of her sister. Could she venture to reject it at once, while his party was still strong, and in possession of all places of influence in England—while her own throne was still uncertain? She temporized, she coquetted, she entertained his proposals till she could reject them. She did not fully renounce the old and lately restored religion. She retained the crucifix and lights in her private chapel, and throughout her life addressed prayers to the Virgin. But she gradually abolished the most distinctive practices of the Papal Church, and established by act of Parliament her ecclesiastical supremacy. Her own Protestantism was always political rather than religious; the creed was less important to her than the political submission of the people. Her first measures were very cautious, and were adroitly introduced by her great minister, Sir William Cecil, who guided her councils till his death, forty years after. So insecure was her hold upon the sceptre, that in the year of her coronation her title was denied by pope Paul IV, and also by John Knox, who had written a diatribe against *the intolerable regimen of women*, and who at this time addressed a letter to the queen to persuade her to surrender her crown.

Nearly all omens were adverse. The state was divided into factions—all opposed to her. Foreign states were hostile or indifferent in interest and in sentiment. Her title was most questionable, if not utterly invalid. She had no support but her own brave heart, the patriotic antipathy of her people to foreign rule, the civil wars and discords prevailing or in prospect in the kingdoms around her, and the sagacity of the advisers whom she might choose. She had to knit together her own people into a nation, to win popular support by suppressing all factions at home, to avert foreign dangers by creating a party for herself, and provoking occupation for her enemies in the realms by which she was menaced. The character and conduct of Elizabeth present a most interesting, but most difficult moral and historical study. No hasty and sweeping censures, whether of praise or blame, can exhibit the complicated intertexture of threads of various material and hue in that strange fabric. All was not virtue, all was not vice. The virtues were obscured, soiled,

or dwarfed by supposed state necessities; the vices were darkened or deepened by ceaseless provocations and harassing perplexities. Never, perhaps, was an illustrious character composed of a more undistinguishable admixture of fine gold, and dross, and clay, and never was there one better calculated to invite and reward curious examination.

In the earlier years of her reign she could trust only to those political friends whose fortunes were indissolubly connected with her own, and to her relatives, principally by her mother's line—the descendants of Mary Boleyn. As her throne became more assured, she attracted to her court the young men of ancient gentry, of adventurous spirit, of chivalrous bearing, of great but restricted ambition, and of high physical and intellectual advantages. Gentle birth, great talents, and good looks were the passports to the favor of the court. She thus created supporters and officers for her crown. The old nobility she did not and could not trust. They were powers in the land which despised, envied, and menaced her own. She accumulated favors on Robert Dudley, earl of Leicester, from compassion for the fate of his father and brother, from regard for his courtly manners, perhaps for a tenderer feeling, which she deemed it unregal and unsafe to gratify. Leicester, like his father, was ever scheming for a crown. Essex she petted, indulged, spoiled, as a bright, petulant, promising youth, who was one of her nearest male relatives, and the chief hope of her lonely old age.

Her crown was at first held merely by the acquiescence of the nation; it was not confirmed by any parliamentary sanction till the fourteenth year of her reign. Civil and religious disorder desolated Scotland, France, and the Netherlands: she prevented such commotions in her own realm. She promptly suppressed the commencements of revolt; she arrested the numerous conspiracies against her life and throne before they had time to explode; and she left her people united, if not a harmonious nation—prosperous, intelligent, powerful, independent, and free.

Menaced by the claims of Mary, and by their prospective advocacy by France or Spain, she placed herself at the head of the Protestant movement, and aided, openly or secretly, the Protestant lords in Scotland, the Huguenots in France, William of Orange, and the Gueux in the Netherlands. She assisted all; she gave no decisive aid to any.

In the midst of perils and successes at home and abroad, she made head against the incessant revolts of Ireland, which has been a thorn in the side of Britain from the fabulous days of king Arthur to the current year of queen Victoria. Throughout her reign she was harassed by its state of chronic though intermittent rebellion, but in the year preceding her death she received its submission through lord Mountjoy.

The important results achieved in the long reign of Elizabeth were mainly due to the impulses communicated by herself and the policy pursued by her ministers. All portentous stars were in conjunction in her horoscope. Internal and external hazards environed her. Industry was disorganized, agriculture disordered, trade inactive, enterprise stagnant, fortunes were shattered, ranks confused, beggars and vagabonds multiplied by the confiscation and private appropriation of Church lands, by the inclosure of commons, and the extension of pasturage. These social evils were aggravated by the growth of colossal fortunes alongside of increasing destitution among the masses, as commerce rapidly advanced under her rule. They were augmented also by the progressive depreciation of the precious metals, which grievously affected the public revenue, and the condition of families with fixed and moderate means.

All these circumstances must be considered in order to appreciate justly the otherwise suspicious and unintelligible policy of Elizabeth. They explain the

meaning, if they do not evince the propriety of her ecclesiastical measures; they illustrate the spirit of her internal government; they interpret her severity to the beautiful and unfortunate queen who sought as a kinswoman an asylum and protection in her realm. They enable us to see how she fostered the high empire and the transcendent genius of the Elizabethan Age; and how, in the midst of all the clouds and mists which obscured her career, she remained a right royal woman, created the national spirit of England, established the English Church, maintained the Protestant cause, and spread such blessings over the land that to this day the popular imagination still fondly looks back to "the merry days of good queen Bess."

Her religious policy was hostile alike to Roman Catholics and Puritans; yet Howard of Effingham, who commanded the navies of England against the Spanish Armada, belonged to the Roman communion; and nearly all her chief ministers were supporters of the Puritan doctrine. There seems to be substantial truth in the declaration of lord Bacon, who had ample opportunities of forming a correct judgment, who was Puritan by family and political connections, but tolerant by disposition. He says, with an affirmation of "certain knowledge," "Most certain it is that it was the firm resolution of this princess not to offer any violence to consciences; but then, on the other side, not to suffer the state of her kingdom to be ruined under pretence of conscience and religion." Her aim was to maintain her ascendancy in Church and State, in order to prevent internal divisions which would invite external aggressions. It was impossible, in the turmoil and religious acrimony of the period, to draw precisely the line of discrimination between religious belief and political intrigue. There is reason to believe that the persecutions which darkened her reign did not contemplate capital penalties till her crown and life had both been endangered by papal excommunications, by Papist plots, and by Spanish or domestic schemes of assassination.

These principles also controlled in large measure her harsh, unsympathizing treatment of her beautiful and accomplished cousin, Mary of Scotland, whose graces have been employed, like the charms of Aspasia and Phryne in an Athenian court, to secure acquittal when the evidence compels a condemnation. If Mary was innocent of the murder of her husband; if she was not involved in the Northern rebellion; if she did not beguile the duke of Norfolk; if she did not connive at Babington's conspiracy and other similar transactions; if she did not instigate Hamilton of Bothwellhaugh to murder her royal jailor; if she practised no collusion with Philip of Spain—all these things might have been readily credited by the English queen and her council, and such belief would remove the atrocity, if not the formal illegality, of their procedure. But if all, or most of these suspicions were well founded; if they have been confirmed by the most dispassionate historians, and by the most recent and diligent investigations, the action of Elizabeth may still be illegal, but it ceases to be iniquitous. It should be remembered, too, that Elizabeth did not consent to the trial of Mary till after repeated and urgent demands from the lords and commons of England in Parliament assembled; that her signature of the death-warrant is by no means certain; that it was issued and carried into effect without her consent, and contrary to her orders; and that the execution caused her bitter agony and horror. This plea is, indeed, counterbalanced by the suspicion that she sought the removal of her royal captive by secret murder. Such a design is, of course, infamous, though in accordance with the spirit and practices of the age.

To these habits of indirect procedure may be referred much of that matrimonial coquetting which furnished occasion for the malignant censures of hostile contemporaries. There was much female vanity in the fre-

quent and not always coy reception of tender addresses. The Tudor blood displayed its licentious warmth in Margaret and Mary, the sisters of Henry VIII, and in their female descendants, as well as in "bluff king Harry." But there was much also of policy in Elizabeth's demeanor. It introduced a courtly language which has often been misconstrued. It cannot have been entirely unworthy, degrading, or vicious, when it inspired the compliments of Sidney, and Raleigh, and Spenser, and Shakspeare, and Bacon. There is a fashion in language and manners as well as in dress, and the fashion must be regarded if we would interpret their significance.

The supposition of a warmer attachment to Essex than the natural attachment of an aged relative for the hopeful representative of an almost extinct line has neither foundation nor probability. Just as little truth is there in the fancy that her life was overcast and her death hastened by the execution of Essex. The misguided earl had been guilty of the grossest breach of trust and treachery at the head of the government and armies of Ireland; he had repeated his treason, and menaced her existence and crown, in the midst of her capital. He had a solemn trial, and was inevitably condemned. He confessed the enormity of his guilt, and the queen shortly after assured the ambassador of Henry IV that she felt no scruples in regard to his punishment.

Whatever may be thought on these points, which will always be disputed, the spirit, the conduct, and the measures of Elizabeth encouraged and produced the most splendid outburst of national prowess and of varied abilities that any age has ever witnessed. Strong men surrounded her from the first—men of marked capacity as statesmen, of eminent qualities as precursors of the approaching splendor—Sir William Cecil, Sir Nicholas Bacon, Sir Francis Walsingham, Sir Ralph Sadler, the earl of Sussex, and lord Sackville. But she had been a quarter of a century on the throne, more than half her reign was passed, and she was verging to old age before the great names which immortalized her times commenced those achievements which have immortalized themselves. It was under the inspiration of her rule, and of the results attained by her rule, that the brilliant generation grew up which has left to all future admiration the names of Sidney, and Spenser, and Shakspeare, and Bacon—of Raleigh, and Vere, and Essex, and Grenville—of Hooker and Gilbert—the generation which confirmed the independence of England and of Europe, which invented new arts, extended and applied the principles of law and government, secured the Protestant ascendancy, founded colonies, extended commerce, glorified letters, discovered new sciences, and established the political eminence, the industrial wealth, and the intellectual empire of England.

The first twenty years of Elizabeth's reign were occupied in consolidating her throne, by averting foreign aggression through the encouragement given by her to the insurgents in each neighboring state, by suppressing disorder and divisions at home, and by promoting Protestant interests at home and abroad. The next twenty years, which terminated with the peace of Vervins, was a period of secret or open contention with Philip of Spain. The execution of Mary, queen of Scots, 1587, and the defeat of the Spanish Armada, 1588, marked the culmination of this perilous struggle. It was closed by the death of the great minister, lord Burleigh. The last five years of her reign were free from serious apprehensions of foreign dangers, but they were distracted by the disturbances in Ireland, by the treacherous intrigues of the court, and by the ambitious designs of the reckless and ungrateful Essex. Her whole life was one long succession of hazards, and after all her glories she died lonely, unloved, and without friends.

Few sovereigns have ever impressed themselves

more strongly than Elizabeth upon the imaginations and hearts of their people; few ever bestowed greater or more permanent benefits upon them; yet few have met with blinder admiration or more undistinguishing vituperation. The presumptions are all adverse to this great queen. Contemporary slanders, designed for political objects, have crystallized themselves into commonly accepted facts. But with each addition to our knowledge of the period, the perception of her heroism, and even of her virtues, becomes clearer, and the exaggeration or false coloring of her frailties diminishes. It was an age of great crimes and of multitudinous vices, and Elizabeth did not escape the contamination; but a minute study of the fearful difficulties of her position from infancy to old age will produce profound commiseration rather than bitter censure.

It is only in the diaries and journals of Parliament; in the state papers of the time; in the records of the religious and political intrigues of the period; in the reports of Venetian, French, and Spanish ambassadors; in contemporaneous memoirs, and in the numerous miscellaneous letters and papers of the age, that the true characteristics of Elizabeth and her reign can be discovered. Perhaps a definite conclusion cannot be reached until the voluminous calendars and other records, now in process of publication under the auspices of the Master of the Rolls, have been given to the world. Certainly the portrait offered by the latest historian of her reign, Mr. Froude, cannot be accepted with any confidence, for it is as strangely distorted and miscolored as his picture of Henry VIII. The commendation of her earliest eulogist, lord Bacon, who knew her well, is still appropriate: "To say the truth, the only commender of this lady's virtues is time, which, for as many ages as it hath run, hath not yet showed us one of the female sex equal to her in the administration of a kingdom."

The literature of this subject is so extensive that it is scarcely necessary to enumerate particular works. Any or all of the historians of England may be consulted; but further researches may be aided by examining Camden, *Annals of Queen Elizabeth*; Strype's *Annals of the Reformation in England*; Harrison's *Description of England in Hall's Chronicle*; Sir Robert Naunton, *Fragmenta Regalia*; Symonds d'Ewes's *Diary*; Rushworth's *Collections*; *Harleian Miscellany*; *Felicities of Queen Elizabeth*, in the works of Lord Bacon; Egerton, Sidney, and Burleigh *Papers*; Miss Strickland's *Life of Queen Elizabeth*; Miss Aiken's *Memoirs of Queen Elizabeth*; Wright's *Elizabeth*; Mignet, *Hist. Mary, Queen of Scots*; Caird, *Mary Stuart*; Froude's *Hist. England*, and the *Calendars of State Papers* for the period published by the British government. A very able essay on queen Elizabeth and queen Mary appeared in the *Edinburgh Review* for October, 1866. (G. F. H.)

**Elizabeth, Albertine**, countess of the Palatinate, was born at Heidelberg Dec. 26, 1618. She was the eldest daughter of the unfortunate Friedrich V, king of Bohemia, and of Elizabeth Stuart, daughter of James I. The misfortunes of her family led to her becoming abbess of the institution of Herford, in Westphalia, where she died Feb. 11, 1680. She was no less distinguished for her high attainments in literature and science than for her sincere and active piety. All true Christians in need of help were sure to receive it from her. She was the intimate friend of Fox, Keith, Barclay, Malebranche, Leibnitz, Des Cartes, Gichtel, etc. Penn, in a passage of his "*No Cross, no Crown*," pays a fitting tribute to her piety and virtue.—*Herzog, Real-Encyclop.* iii, 769. See Guhrauer, *Pfalzgräfin Elizabeth* (Raumer's *Historisches Taschenbuch*, 1851); Goebel, *Gesch. d. christlichen Lebens in d. rhein.-westphäl. evang. Kirche* (Coblenz, 1852).

**Elizabeth, Saint**, of Thuringia, was a daughter of king Andrew II, of Hungary, and was born at

Pressburg in 1207. When only four years old she was destined by her father to become the wife of Ludwig, oldest son of landgrave Hermann of Thuringia. She was immediately sent to the court of the landgrave, at the Wartburg, for her education, and on her arrival was betrothed to Ludwig. She early showed a remarkable inclination for ascetic exercises. Several efforts were on that account made to have her sent back to her father, but Ludwig, who in 1215 succeeded his father as landgrave, refused to dismiss her, and in 1221 married her. As landgravine she continued her ascetic manners, and refused all the comforts of life. At the same time, she was indefatigable in all works of charity. She spun and sowed garments for the poor, and, at the time of a famine, fed as many as 900 people daily. Her confessor, Konrad von Marburg, not only encouraged her asceticism, but made her vow absolute obedience, and that, in the case of her husband's death, she would not marry again. Ludwig died in 1227, at Otranto, while taking part in the crusade of emperor Friedrich II. In consequence of the opposition of her mother-in-law Sophia, and most of the members of the family, as well as the courtiers generally, Elizabeth was deprived of the regency during the minority of her oldest son, and her brother-in-law, Heinrich Raspe, assumed the administration of the landgravate. Soon Elizabeth, with her son Hermann, and her two daughters, was expelled from the Wartburg, and for a time had to beg in the streets of Eisenach for the necessaries of life. At length she found a refuge at one of the castles of her maternal uncle, the bishop of Bamberg. Repeated offers of a second marriage (even, it is said, from the emperor Friedrich), which were made to her she refused. When the knights who had accompanied her husband returned from the crusade, they compelled Heinrich Raspe to restore to Elizabeth the Wartburg, and the revenue to which she could lay claim as the widow of the landgrave. Subsequently Heinrich gave her the town of Marburg, with a number of adjoining villages, and an annual income of 500 marks in silver. Elizabeth took up her residence at Marburg in 1229, and again devoted her whole time to asceticism and benevolence. Her confessor Konrad not only continued to be very severe, but several times was even guilty of acts of great cruelty with regard to her. Nevertheless, she declined an invitation from her father to return to him. Exhausted by her ascetic life, she died in a hospital which had been erected by her, Nov. 19, 1231. The fame of her ascetic life had already pervaded all Europe, and, as was usual in such cases, the people soon ascribed to her relics a number of miracles, about the details of which there is, however, the greatest discrepancy among the contemporaneous writers, showing how little they rested on careful investigation. No longer than four years after her death, in 1235, she was canonized by pope Gregory IX. In 1236 her relics were transferred with great solemnity to a new church (St. Elizabeth's) which landgrave Konrad erected at Marburg. The emperor Friedrich II placed a golden crown on the head of the saint, and an immense crowd of people, estimated at 200,000, came to see the relics while exhibited to public view. After the Reformation, landgrave Philip, in order not to countenance the veneration of relics, had them removed from the church; subsequently the Teutonic knights obtained permission to send them to various Roman Catholic churches and convents. Her head is preserved in the church of St. Elizabeth at Breslau.—See Herzog, *Real-Encyclop.* iii, 767; Wetzer and Welte, *Kirch.-Lex.* iii, 511; Hofer, *Nov. Biog. Générale*, xv, 875; Justi, *Elisabeth die Heilige* (Zurich, 1797, 2d ed. Marb., 1835); Schermbach, *Elisabeth die Heilige* (Erfurt, 1828); Montalembert, *Ve de St. Elisabeth* (Par. 1835); Simon, *Lubrig IV und s. Gemahlin, die heil. Elisabeth* (Frankf. 1854); Kahnis, *Die heil. Elis. in Zeitschrift für histor. Theol.* 1868. See KONRAD VON MARBURG. (A. J. S.)

**Elizabethines.** (1.) Associations of women whose object it was to imitate the ascetic life and the benevolent zeal of Elizabeth (q. v.) of Thuringia. They did not retire from the world, and only met for prayer and some ascetic exercises. (2.) A branch of nuns of the third order of St. Francis, so called after Elizabeth of Hungary, who, after the death of her husband, is said to have joined of the third order of St. Francis. Modern writers on monastic orders generally doubt or deny the report that Elizabeth ever was a member of the third order of Franciscans, but the name Elizabethines is still in use to designate Franciscan nuns of the third order. In France they have also been designated by the name of *Sœurs* or *Filles de la Miséricorde* (Sisters of Charity). The real foundress of the monastic community is said to have been Angelina di Corbaro, daughter of the count of Corbaro and Tisigniano. She was born in 1377, married the count de Civitelle, with whom she lived as a sister, and immediately after the death of her husband (1393) joined the third order of Franciscans. She founded the first monastery of Franciscan Tertiarians in 1395 at Foligno. In 1428 the monasteries of this order were organized into a congregation, which was authorized to elect at the triennial conventions ("Chapters General") a general. In 1459 the congregation was placed under the general of the Franciscan Observants. In the middle of the 16th century the Elizabethines had 135 monasteries and 3872 nuns. In 1843 the number of members was estimated at 1000.—Helyot, *Dict. des Ordres Relig.* (ed. Migne), ii, 144; Fehr, *Geschichte der Mönchsorden*, i, 275. (A. J. S.)

**Eliz'aphan** (Heb. *Elitsaphan'*, עֵלִישָׁפָן, whom *God has protected*; Sept. Ἐλισάφαν), the name of two men.

1. Second son of Uzziel, and chief of the Kohathite Levites at the Exode (Num. iii. 30; Exod. vi. 22). B.C. 1657. He, with his elder brother, was directed by Moses to carry away the corpses of their sacrilegious cousins Nadab and Abihu (Lev. x, 4). In these two last-cited passages the name is written contracted into ELZAPHAN. His family was known and represented in the days of king David (1 Chron. xv, 8), and took part in the revival of Hezekiah (2 Chron. xxix, 13).

2. Son of Parnoch, and phylarch (שׂרֵי־צִבְרוֹן, "prince") of the tribe of Zebulun at the Exode, being one of the men appointed to assist Moses in apportioning the land of Canaan.

**Eliz'zur** (Heb. *Elitsur'*, אֵלִישׁוּר, *God is his rock*; Sept. Ἐλισούρ), son of Shedeur, and phylarch (שׂרֵי־צִבְרוֹן, "prince") of the tribe of Reuben at the Exode (Num. i, 5; ii, 10; vii, 30, 35; x, 18). B.C. 1657.

**Elka'nah** [some *El'kanah*] (Hebrew, *Elkanah'*, אֵלְכָנָה, whom *God has gotten*; Sept. Ἐλκανά, but Ἐλκανά in Exod., and Ἠλκανά v. r. Ἐλκανά in 1 Chron. xii, 6; xv, 23; Josephus, Ἐλκάνης and Ἐλκάν; Vulg. *Elcana*), the name of several men, all apparently Levites.

1. Second son of Korah, the son of Izhar, the son of Kohath, the son of Levi, according to Exod. vi, 24, where his brothers are represented as being Assir and Abiasaph. But in 1 Chron. vi, 22, 23 (Hebr. 7, 8) Assir, Elkanah, and Eliasaph are mentioned in the same order, not as the three sons of Korah, but as son, grandson, and great-grandson respectively; and this seems to be correct. If so, the passage in Exodus must be understood as merely giving the families of the Korhites existing at the time the passage was penned, which must in this case have been long subsequent to Moses. In Num. xxvi, 58, "the family of the Korhites" (A. V. "Korathites") is mentioned as one family. As regards the fact of Korah's descendants continuing, it may be noticed that we are expressly told in Num. xxvi, 11, that when Korah

and his company died, "the children of Korah died not."—Smith, s. v. See KORAH. On the above view, this Elkanah becomes the son of Assir (q. v.), grandson of Korah, and father of Ebiasaph (q. v.). B. C. cir. 1700. See SAMUEL. A writer in the *Journal of Sacred Lit.* (April, 1852, p. 200), however, proposes to reject both Assir and this first Elkanah from the list in Chronicles.

2. Son of Shaul or Joel, being father of Amasai, and sixth in descent from Ebiasaph, son of the foregoing (1 Chron. vi, 25, 36). B. C. cir. 1445.

3. Son of Ahimoth or Mahuth, being father of Zuph or Zophai, and great grandson of the one immediately preceding (1 Chron. vi, 26, 35). B. C. cir. 1340. (See Hervey, *Genealogies*, p. 210, 214, note.)

4. Another Kohathite Levite, in the line of Heman the singer. B. C. cir. 1190. He was the fifth in descent from the foregoing, being son of Jeroham, and father of Samuel, the illustrious judge and prophet (1 Chron. vi, 27, 28, 33, 34). Josephus (*Ant.* v, 10, 2) calls him a man "of middle condition among his fellow-citizens" (τῶν ἐν μέσῳ πολιτῶν). All that is known of him is contained in the above notices and in 1 Sam. i, 1, 4, 8, 19, 21, 23, and ii, 2, 20, where we learn that he was of a Bethlehemite stock (an "Ephrahtite;" the Levites not being confined to their cities), but lived at Ramathaim-Zophim in Mount Ephraim, otherwise called Ramah; that he had two wives, Hannah and Peninnah, but had no children by the former, till the birth of Samuel in answer to Hannah's prayer. We learn also that he lived in the time of Eli the high-priest, and of his sons Hophni and Phinehas; that he was a pious man, who went up yearly from Ramathaim-Zophim to Shiloh, in the tribe of Ephraim, to worship and sacrifice at the tabernacle there; but it does not appear that he performed any sacred functions as a Levite; a circumstance quite in accordance with the account which ascribes to David the establishment of the priestly and Levitical courses for the Temple service. He seems to have been a man of some wealth from the nature of his yearly sacrifice, which enabled him to give portions out of it to all his family, and from the costly offering of three bullocks when Samuel was brought to the house of the Lord at Shiloh. After the birth of Samuel, Elkanah and Hannah continued to live at Ramah (where Samuel afterwards had his house, 1 Sam. vii, 7), and had three sons and two daughters.—Smith, s. v. See SAMUEL.

5. Another man of the family of the Korhites who joined David while he was at Ziklag (1 Chron. xii, 6). B. C. 1054. From the terms of ver. 2, some have thought it doubtful whether this can be the well-known Levitical family of Korhites; but the distinction there seems merely to refer to residents within the tribe of Benjamin, which included the Levitical cities. Perhaps he was the same who was one of the two door-keepers for the ark when it was brought to Jerusalem (1 Chron. xv, 23). B. C. 1043.

6. An officer in the household of Ahaz, king of Judah, and slain by Zichri the Ephraimite, when Pekah invaded Judah; apparently the second in command under the prefect of the palace (2 Chron. xxxviii, 7). B. C. 739. Josephus says that he was the general of the troops of Judah, and that he was merely carried into captivity by "Amaziah," the Israelitish general (*Ant.* ix, 12, 1). See AHAZ.

7. Father of one Asa, and head of a Levitical family resident in the "villages of the Netophathites" (1 Chron. ix, 16). B. C. long ante 536.

**Elkesaites**, a sect of Jewish Christians, which sprang up in the 2d century. The origin of the name is uncertain. Delitzsch (in Rudelbach u. Guericke, *Zeitschrift*, 1841) derives it from a hamlet, Elkesi, in Galilee. The Church fathers derived it from the name of a pretended founder, Elxai, which name, according to Epiphanius, denotes "a hidden power" (עֲלֵי כֹחַ).

Elxai is probably not the name of a person, but the name of a book which was the chief authority for this sect. Gieseler thinks that the name signifies the Holy Ghost, which in *Hom. Clem.* xvii, 16, is called *ἀόρατος ἄσρατος*, "the incorporeal power." At all events, the sect held as highest doctrinal authority a book which is brought into connection with Elxai. This book, which appears to have been the chief authority of all the Gnostic sects of Jewish Christians, was known to Origen (*Euseb. Hist. Eccl.* vi, 38), and the Syrian Alciabiades of Apamea brought it with him to Rome. Epiphanius shows its influence among all sects of Jewish Christians. As Origen reports, this book was believed to have fallen from heaven; according to an account in the *Philosophoumena*, it was revealed by an angel, who was the Son of God. Elxai is said to have received it from the Seri, in Parthia, in the third year of Trajan (A. D. 101), and its contents were communicated to no one except upon an oath of secrecy. Ritschl puts the origin of the book in the last third of the second century, while Uhlhorn thinks that it must have originated soon after the beginning of the second century, as it served as the basis of the doctrinal system of the Clementine Homilies, which were nearly completed about A. D. 150.

The best account of the standard book of the Elkesaites is to be found in the *Philosophoumena*, and its main points are confirmed by the statements of Origen. Epiphanius, as usual, is somewhat confused in his exposition of the sect, and his report seems in many points to refer to a modified, and not the original system. According to the *Philosophoumena*, there was in the Elkesaite system a pagan element of naturalism, mixed with Jewish and Christian elements. The pagan element shows itself in particular in the ablutions. A remission of sins is proclaimed upon the ground of a new baptism, consisting without doubt in oft-repeated ablutions, which were also used against sickness, and were made in the name of the Father and the Son. In connection with these ablutions appear seven witnesses—the five elements, and oil and salt (also bread), the latter two denoting baptism and the Lord's Supper. The same pagan element appears in the use made by the Elkesaites of astronomy and magic; even baptismal days were fixed in accordance with the position of the stars. The Jewish element appears in the obligatory character of the law, and in circumcision. They rejected, however, sacrifices, and also several parts of the Old and New Testaments (of the latter, the Pauline epistles). Their views of Christ seem not to have been settled. On the one hand, their Christ is described as an angel; on the other, they taught a repeated, continuous incarnation of Christ, although his birth of a virgin seems to have been retained. The Lord's Supper was celebrated with bread and salt; the eating of meat was forbidden; marriage was highly esteemed; renunciation of the faith in time of persecution was allowed. A prayer, which is preserved by Epiphanius (xix, 4), is entirely unintelligible.

The Elkesaite doctrine probably arose among the Jewish Christians, who, in the neighborhood of the Dead Sea, coalesced with the Essenes, and were to some extent influenced by Oriental paganism. Under bishop Callistus of Rome, a certain Alciabiades of Apamea went to that city as an Elkesaite teacher, and in 274 Origen met a missionary of the sect at Cesarea. These efforts appear, however, to have met with but little success. The Clementine Homilies contain a further development of Elkesaite doctrines, with a stronger predominance of the Christian element. At the time of the emperor Constantius, Epiphanius found Elkesaites to the east of the Dead Sea, in Nabathæa, Ituræa, and Moabitis. He calls them Σαρψαῖτοι, which name he explains as ἡλιακοί, and therefore seems to have derived from שֶׁפֶטֶן, "sun." From the cir-

cumstance that in Epiphanius Elxai appears among nearly all parties of Jewish Christians, Uhlhorn infers that the Elkesaites were not so much a separate sect as a school among all sects of Jewish Christians. Ritschl regards them as antipodes of the Montanists, and, as their chief peculiarity, the setting forth of a new theory of remission of sins by a new baptism. Hefele, in *Wetzer u. Welte, Kirchen-Lex.* art. *Ebioniten*, iii, 359, takes the Elkesaites for the highest of four classes of Jewish Essenes, from whom, or, rather, from a member of whom (the Elxai of Epiphanius), a party of Ebionites received about the middle of the second century a gnosis or theosophic secret system, which was fully developed in the Clementine Homilies. See Uhlhorn, in Herzog, *Real-Encyclop.* iii, 771 (which article is the basis of our account); Ritschl, *Ueber d. Sekte. der Elkesaiten*, in *Zeitschrift für histor. Theologie*, 1853; Hefele, in *Wetzer u. Welte, Kirchen-Lex.* [art. *Ebioniten*], iii, 358; and [art. *Clement I*] ii, 590; Schaff, *Hist. of the Christ. Church*, § 69; Lipsius, *Zur Quellen-Kritik des Epiphanius* (Vien. 1865); Mosheim, *Ch. Hist.* bk. i, c. ii, pt. ii, ch. v, 3, 5-7. (A. J. S.)

**El'kōsh** (עֶלְקוֹשׁ, i. e. *God is its bow*, see Fürst, *Hebr. Handw.* s. v.), the birthplace of the prophet Nahum, hence called "the ElkosHITE" (Nah. i, 1). Two widely differing Jewish traditions assign as widely different localities to this place. In the time of Jerome it was believed to exist in a small village of Galilee. The ruins of some old buildings were pointed out by his guide as the remains of the ancient ElkosH (Jerome, on *Nah.* i, 1). Cyril of Alexandria (*Comm. on Nahum*) says that the village of ElkosH was somewhere or other in the country of the Jews. Pseudo-Epiphanius (*De Vitis prophetarum*, in his *Opp.* ii, 247) places ElkosH on the east of the Jordan, at Bethabara (εἰς Βηθαβάρην, *Chron. Pasch.* p. 150, Cod. B, has εἰς Βηθαβαρίην), where he says the prophet died in peace. According to Schwartz (*Palestine*, p. 188), the grave of Nahum is shown at *Kefr Tanchum*, a village 2½ English miles north of Tiberias. A village of the name *El-Kawzah* is found about 2½ hours S.W. of Tiberias, which seems to correspond with Jerome's notice. Another village of that name, also an ancient site, lies on a high hill rather more than 2 hours S. of Nablous (Van de Velde, *Memoir.* p. 309). But mediæval tradition, perhaps for the convenience of the Babylonian Jews, attached the fame of the prophet's burial place to *El-Kush*, or *Alkosh*, a village on the east bank of the Tigris, near the monastery of Rabban Hormuzd, and about two miles north of Mosul. It is situated on a stony declivity, has a few gardens, and contains about 30 papal Nestorian families (Perkins, in the *Biblioth. Sacra*, July, 1852, p. 643). Benjamin of Tudela (p. 53, ed. Asher) speaks of the synagogues of Nahum, Obadiah, and Jonah at Asshur, the modern Mosul. R. Petachia (p. 35, ed. Benisch) was shown the prophet's grave, at a distance of four parasangs from that of Barnah, the son of Neriah, which was itself distant a mile from the tomb of Ezekiel. It is mentioned in a letter of Masius, quoted by Assemani (*Bibl. Orient.* i, 525). Jews from the surrounding districts make a pilgrimage to it at certain seasons. The synagogue which is built over the tomb is described by Colonel Shiel, who visited it in his journey through Kurdistan (*Journ. Geog. Soc.* viii, 93). Rich evidently believed in the correctness of the tradition, considering the pilgrimage of the Jews as almost sufficient test (*Kurdistan*, i, 101). Layard, however, speaks less confidently (*Ninereh*, i, 197). Gesenius doubts the genuineness of either locality (*Thes. Heb.* p. 1211 b). The tradition which assigns ElkosH to Galilee is more in accordance with the internal evidence afforded by the prophecy, which gives no sign of having been written in Assyria (Knobel, *Prophet.* ii, 208; Hitzig, *Kl. Proph.* p. 212; Edwards, in the *Bibliotheca Sacra*, Aug. 1848, p. 557 sq.).—Smith, s. v. See NAHUM.

**El'koshite** (Heb. *Elkoshi'*, עֶלְקוֹשִׁי, the regular patrial form; Sept. Ἐλκείσιος, Vulg. *Elcesæus*), an epithet (Nah. i, 1) of the prophet Nahum (q. v.), apparently as an inhabitant of ELKOSH (q. v.).

**El'lasar** (Heb. *Ellasar'*, עֶלְלָסָר: Fürst suggests [*Heb. Handw.* s. v.] that it may be compounded of עֶלְלָסָר = עֶלְלָסָר and עֶלְלָסָר = עֶלְלָסָר; Sept. Ἐλλασάρ), a territory in Asia, whose king, Arioch, was one of the four who invaded Canaan in the time of Abraham (Gen. xiv, 1, 9). The association of this king with those of Elam and Shinar indicates the vicinity of Babylonia and Elymais as the region in which the kingdom should be sought; but nothing further is known of it, unless it be the same as THELASAR mentioned in 2 Kings xix, 12, the TELLASAR of Isa. xxxvii, 12. Symmachus and the Vulg. understand *Pontus*. The Jerusalem Targum renders the name by *Tellasar*. The Assyro-Babylonish name of the king Arioch (q. v.) would seem to point to some province of Persia or Assyria (compare Dan. ii, 14). Col. Rawlinson thinks (see *Jour. Sac. Lit.* Oct. 1851, p. 152 note) that Ellasar is the Hebrew representative of the old Chaldean town called in the native dialect *Larsa* or *Larancha*, and known to the Greeks as *Larissa* (Ἀρρῖσα) or *Larachon* (Λαράχων). This suits the connection with Elam and Shinar (Gen. xiv, 1), and the identification is orthographically defensible. Larsa was a town of Lower Babylonia or Chaldea, situated nearly half way between Ur (now Mugheir) and Erech (Warka), on the left bank of the Euphrates. It is now *Senkerch*. The inscriptions show it to have been one of the primitive capitals, of earlier date, probably, than Babylon itself; and we may gather from the narrative in Gen. xiv, that in the time of Abraham it was the metropolis of a kingdom distinct from that of Shinar, but owing allegiance to the superior monarchy of Elam. That we hear no more of it after this time is owing to its absorption into Babylon, which took place soon afterwards.—Kitto, s. v.; Smith, s. v. See ABRAHAM.

**Eller**, ELIAS, chief of a fanatical sect known under the name of the Ellerians, or "Communion of Ronsdorf." He was born in 1690 (according to others, in the beginning of the 18th century). He was the son of a poor peasant in the village of Ronsdorf, in the duchy of Berg, where at that time not only Pietism, but Millenarianism and "Philadelphia" mysticism had numerous adherents. He early went to Elberfeld to find employment in a manufactory, and while there he won the confidence of a rich widow, Bolckhaus, to so high a degree that she married him. Eller at this time had already gained a great influence among the Separatists in Elberfeld, as he was thoroughly acquainted with the writings of all the leading Mystics. Having become rich by his marriage, he soon (1726) organized, together with a Reformed pastor, Schleiermacher, a society of Apocalyptic Millenarians who regularly met in his house, and on meeting and separating greeted each other with a "seraphic" kiss. Among the regular attendants at these meetings was Anna von Buchel, the beautiful daughter of a baker in Elberfeld, who soon astonished the whole society by her ecstasies and visions, and by the wonderful prophecies which she proclaimed while in this condition. She claimed to hold frequent conversations with the Lord, and announced the beginning of the millennium to take place in 1730. The new doctrine found many adherents, and numbered upwards of 50 families; but the relations of Anna with Eller became at the same time so intimate that Eller's wife openly accused the two of illicit intercourse, and declared the prophecies of Anna to be a deliberate fraud. Eller declared his wife to be insane, and had her locked up, while Anna claimed to have received a revelation that Eller's wife was possessed by an evil spirit, and would soon be carried off by Satan. The whole society, even the sons of Eller's wife from

her first marriage, believed this announcement, and the unfortunate woman was consequently subjected to the utmost indignities and tribulations for about six months, when death put an end to her sufferings. Almost immediately after her burial Eller married Anna von Buchel. His society was now deemed sufficiently strong to appear in public. Eller maintained, in union with the prophecies of Professor Horch in Marburg, that in accordance with Rev. iii, 1, 7, the Church of Sardis would cease in 1729, and the Church of Philadelphia begin in 1730. The revelations and visions of his wife increased rapidly. What she announced as a new revelation was laid down in a writing, which was subsequently communicated to the initiated under the name of the "Hirtentasche" ("The Shepherd's Bag"). The chief points of the new doctrines were, The Bible is the Word of God, but a new revelation has become necessary, and this is laid down in the *Hirtentasche*. Not only the ancient saints, but the Saviour himself, will reappear upon earth. The person of the Father dwelt in Abraham, the person of the Son in Isaac, the person of the Holy Ghost in Sarah, but the fullness of the Deity in Eller. Moses, Elias, David, and Solomon were prototypes both of Christ and of Eller. The children of Anna were not the natural children of Eller, but begotten by God himself. The faithful, whose number had largely increased, were divided into three classes. To the first class belonged those who expressed belief, but were not yet made acquainted with all doctrines and secrets; to the second those who, being initiated, were called in the congregations "Persons of Rank" ("Standespersonen"); to the third, the most trustworthy among the initiated, who had reached the temple, and were called "gifts" (Geschenke). The society believed that from Anna the Saviour would be born a second time, and there was therefore some dissatisfaction when her first child was a daughter. Her second child, born 1733, was a son, Benjamin, and he was believed by the sect to be the Saviour, manifested a second time in the flesh, but he died when only a year old. Eller, in the mean while, had sent out missionaries throughout Germany, Switzerland, and Scandinavia, but the investigations which in 1735 were made in Elberfeld concerning the meetings held by him induced him to depart in 1737, with his family, for Ronsdorf, his native place. Many of his adherents followed him immediately, and fifty new houses arose in Ronsdorf in a short time. The missionaries sent out by Eller collected large amounts of money for the new church to be built in Ronsdorf, and in 1741 Schleiermacher was called as pastor. Eller himself was elected burgomaster, and soon established a theocratic despotism. His wife Anna died in 1744, in a mysterious manner, and Eller proclaimed that all the supernatural gifts which had been possessed by Anna had been transferred to him. But now Schleiermacher began to lose his faith and even to oppose Eller, who, however, to neutralize the sermons of Schleiermacher, caused one of his most fanatical adherents, Pastor Wülfing, of Solingen, to be called as second pastor. In 1749 Eller married the widow of a rich merchant at Ronsdorf, Bosselmann, who had died under suspicious circumstances; and in the same year he procured the removal of Schleiermacher from his position of first pastor, and the election of Pastor Rudenhaus, of Rattingen, who, since 1738, had been a fanatical adherent of the sect, as his successor. Schleiermacher was, even after his departure from Ronsdorf, persecuted by Eller, who lodged with the government a formal charge of sorcery against him; and so great was still Eller's influence, that Schleiermacher deemed it best to flee to Holland. Eller died on May 16, 1750, and soon after him died also Wülfing. After the death of these two men the sect seems to have soon become extinct. Schleiermacher's innocence was, chiefly owing to the efforts of his friend J. W. Knevel, fully established by the

declarations of the theological faculties of Marburg and Herborn, and the Synod of Berg. This fanaticism singularly resembles that of the Buchanites (q. v.). See Herzog, *Real-Encyclop.* xx, 606; Knevel, *Gründel d. Verwüstung an heil. Stätte od. d. Geheimnisse der Bosheit d. Ronsdorfer Sekte* (Frankf. 1750); Wülfing, *Ronsdorffischer Catechismus* (Düsseldorf, 1756); Joh. Bolckhaus (step-son of Eller), *Ronsdorf's gerechte Sache* (Düsseldorf, 1757); *Das jubelrende Ronsdorf* (compiled by Wülfing, but edited by Bolckhaus, Mühlheim, 1761); Wülfing, *Ronsdorf's silberne Trompete* (Mühlheim, 1761); Engels, *Versuch einer Gesch. d. relig. Schwärmerei im ehemal. Herzogthum Berg* (Schwelm, 1826); Hase, *Ch. Hist.* § 421. The *Hirtentasche* may be found in the *Histoire des Sectes Religieuses*. (A. J. S.)

**Ellerians.** See ELLER.

**Elliott, Arthur W.**, a Methodist Episcopal minister, was born in Maryland in 1784; emigrated to Butler Co., Ohio, in 1805, and was converted in 1806. In 1818 he entered the itinerancy, and rapidly rose to eminence and usefulness. He filled many important charges in his Conference until his health failed. He was supernumerary eight years, and superannuated seventeen during his ministry. In 1854 he removed to Paris, Ill., where he died in January, 1858. Mr. Elliott had a "wonderful power over the multitude, and thousands of souls will call him blessed in eternity."—*Minutes of Conferences*, 1858, p. 296.

**Elliott, Charles.** See p. 1042 of this vol.

**Elliott, John, D.D.**, a Congregational minister, was born at Killingworth, Conn., Aug. 24, 1768, graduated at Yale College 1786, entered the ministry 1791, and was installed pastor in East Guilford Nov. 2, 1791, in which place he remained until the close of his life, Dec. 17, 1824. Dr. Elliott was made fellow of Yale College 1812, and one of the prudential committee 1816. He published *An Oration on the Death of Thomas Lewis* (1804), and a few sermons.—Sprague, *Annals*, ii, §21.

**Elliott, Stephen, D.D.**, Protestant Episcopal bishop of the diocese of Georgia, was born in Beaufort, S. C., Aug. 31, 1806. At sixteen he entered the sophomore class at Harvard University, but returned during the junior year to South Carolina College, Columbia, where he graduated A.B. in 1825. In 1827 he engaged in the practice of law. "In 1832, under the pressure of a newly-awakened devotion to the cause of Christ, he abandoned his profession, and became a candidate for holy orders. He was ordained by bishop Bowen in 1835, served as deacon one month in the church at Wilton, and was then elected professor of sacred literature and the evidences of Christianity in the South Carolina College. Five years later he was chosen first bishop of Georgia. He was consecrated in February, 1841, removed to Savannah, and became rector of St. John's Church. In 1844 he became provisional bishop of Florida. In 1845 he removed to Montpellier, to direct in person the work of female education. Here he spent about seven years of his life, and, like many other bishops, expended his whole fortune in the noble effort. In 1853 he removed to Savannah, and took charge of Christ Church in that city as rector. This office he continued to hold, with the exception of one brief interval, till his death. His numerous home duties did not hinder his visitation of his diocese at least once each year, often much more frequently. But two hours before his decease he had returned, in cheerfulness and apparent health, from one of those long episcopal journeys. Instantly, not to him 'suddenly,' in the midst of his labors, and at the height of his power," he died at his home in Savannah Dec. 24, 1866.—*Amer. Quart. Church Review*, April, 1867, 224 April, 1868.

**Ellis, Reuben**, an early Methodist Episcopal minister. The dates of his early life are wanting. He was a native of North Carolina, entered the itinerancy in 1777, and died in Baltimore February, 1796. "He

was a man of very sure and solid parts, weighty and powerful in preaching, and full of simplicity and godly sincerity."—*Minutes of Conferences*, i, 67; Stevens, *History of Methodist Episcopal Church*, p. 39 et al.

**Ellis, Robert Fulton**, a Baptist minister, was born at Topsham, Me., Oct. 16, 1809; studied at Bowdoin College, and at Newton Theological Institution, where he graduated in 1838. He was pastor of the Second Baptist Church in Springfield, Mass., from 1838 to 1845. He then spent two and a half years in the State of Missouri, preaching, establishing Sunday-schools, and furnishing them with libraries. In 1847 he became pastor of the First Baptist Church of Alton, Ill., but, becoming associate editor of the *Western Watchman*, published at St. Louis, Mo., he again took an itinerant agency in that state, and, while thus employed, he died, July 24, 1854.—Sprague, *Annals*, vi, 827.

**Ellys, ANTHONY**, bishop of St. David's, was born in 1693. He was educated at Clare Hall, Cambridge, where he took his master's degree in 1716. In 1724 he was presented to the vicarage of St. Olave, Jewry, and to the rectory of St. Martin's, Ironmonger's Lane. In 1728 he obtained a prebend of Gloucester, and in 1728 was created D.D. at Cambridge. He was next promoted to the bishopric of St. David's, and died at Gloucester in 1761. His writings are as follows: 1. *A Plea for the Sacramental Text*:—2. *Remarks on Hume's Essay concerning Miracles*, and sermons preached on public occasions (4to):—3. *Tracts on the Liberty, Spiritual and Temporal, of Protestants in England* (1767, 4to):—4. *Tracts on the Liberty, Spiritual and Temporal, of Subjects in England*: the two last-mentioned are collections of tracts, and form one great and elaborate work, which was the principal object of the bishop's life. They were published posthumously.—Hook, *Eccles. Biography*, vol. iv; Kippis, *Biographia Britannica*, v, 581.

**Elm** stands in the Auth. Vers. as the translation of עֵלֶם, *elah*, in Hos. iv, 13; elsewhere rendered "oak" (q. v.).

**Elmo'dam** (Ἐλμοδάμ; perhaps for עֵלֶם דָּם, *Al-*

*modad*), son of Er and father of Cosam; one of the ancestors of Christ, in the private line of David, and great-grandfather of Maaseiah, the great-grandfather of Salathiel (Luke iii, 28). B.C. cir. 700. He is not mentioned in the Old Test.

**Elna'am** [many *El'naam*] (Heb. *Elna'am*, עֵלְנָאָם [in pause עֵלְנָאָם], *God is his delight*; Sept. 'Ελναίμ v. r. 'Ελλαίμ, Vulgate *Elnaem*) father of Jeribai and Joshaviah, two of David's distinguished warriors (1 Chron. xi, 46). B.C. 1044. In the Sept. the second warrior is said to be the son of the first, and Elnaam is given as himself a member of the guard.

**Elna'than** [some *El'nathan*] (Heb. *Elnathan'*, עֵלְנָתָן, whom *God has given*; compare *John, Theodore, Diodati*), the name of four leading men.

1. An inhabitant of Jerusalem, father of Nehushta, the mother of king Jehoiachin (2 Kings xxiv, 8, Sept. 'Ελνασζάν v. r. 'Ελλασζάν). B.C. ante 598. He was perhaps the same with the son of Achbor, sent by Jehoiakim to bring the prophet Urijah out of Egypt (Jer. xxvi, 22, Sept. 'Ελκαζάν), and in whose presence the roll of Jeremiah was read, for the preservation of which he interceded with the king (Jer. xxxvi, 12, 25, Sept. *Naζάν* v. r. 'Ιωναζάν). B.C. 605.

2, 3, 4. (Sept. 'Ελναζάν, *Naζάν*, and 'Ελναζάν respectively). Three of the Israelites, of established prudence and integrity, sent by Ezra to invite the priests and Levites to accompany him to Jerusalem (Ezra viii, 16). B.C. 459.

**Ellōra**, a decayed town in the dominions of the Nizam, not far from the city of Dowlatabad, in lat. 20° 2' N., and long. 75° 13' E. (This article is taken from Chambers's *Encyclopædia*.) It is celebrated for its wonderful rock-cut temples. Their number has not been precisely ascertained, but Erskine reckoned 19 large ones, partly of Hindu and partly of Buddhist origin. Some are cave-temples proper—i. e. chambers cut out in the interior of the rock—but others are vast buildings hewn out of the solid granite of the hills, having an exterior as well as an interior architecture, and being, in fact, magnificent monoliths. In executing the latter, the process was first to sink a great

Temple called Kailasa, at Ellora. From Fergusson's *Handbook of Architecture*.

quadrangular trench or pit, leaving the central mass standing, and then to hew and excavate this mass into a temple. The most beautiful of these objects is the Hindu temple Kailasa. At its entrance the traveler passes into an antechamber 138 feet wide by 88 deep, adorned by numerous rows of pillars. Thence he proceeds along a colonnade over a bridge into a great rectangular court, which is 247 feet in length and 150 broad, in the centre of which stands the temple itself, a vast mass of rock richly hewn and carved. It is supported by four rows of pilasters, with colossal elephants beneath, and seems suspended in the air. The interior is about 103 feet long, 56 broad, and 17 high, but the entire exterior forms a pyramid 100 feet high, and is overlaid with sculpture. In the great court are numerous ponds, obelisks, colonnades, sphinxes, and on the walls thousands of mythological figures of all kinds, from ten to twelve feet in height. Of the other temples, those of Indra and Dumarbeyna are little inferior to that of Kailasa. Regarding their antiquity and religious significance, authorities are not agreed; but at all events they must be subsequent to the epic poems *Ramayana* or *Mahabharata*, because they contain representations taken from these poems, and also to the cave-temples at Elephanta, because they exhibit a richer and more advanced style of architecture.

**Elohim** is the Heb. plural (*Elohim'*, עֲלֹהִים), of which the sing. form, עֶלֶה, *Elo'ah*, is also employed to designate in general any deity, but likewise the true God. The word is derived, according to Gesenius (*Thes. Heb.* p. 94), from an obsolete root, עָלָה, *alah*, to *revere*; but is better referred by Fürst (*Heb. Handb.* p. 90) to the kindred עָזַח [see *EL-*], the name of God as *mighty* (from the extensive root עָזַח עָזַח עָזַח, to *be firm*); and has its equivalent in the Arabic *Allah*, i. e. God. The plur. *Elohim* is sometimes used in its ordinary sense of *gods*, whether true or false (e. g. of the Egyptians, Exod. xii, 12; xxxv, 2, 4; Deut. xx, 18; xxxii, 17; including Jehovah, Psa. lxxxvi, 8; Exod. xviii, 11; xxii, 19; or distinctively of actual deity, Isa. xlv, 6; xlv, 5, 14, 21; xlv, 9; 1 Chron. xiii, 9); once of *kings* (Psa. lxxxii, 1, 6); but Gesenius thinks not of *angels* (Psa. viii, 6; xci, 7; cxxxviii, 1), nor *judges* (Exod. xxi, 6; xxii, 7, 8). But it is especially spoken of one true God, i. e. Jehovah, and in this sense it is always *construed as a sing.*, especially when it has the article prefixed (אֱלֹהִים הַיְהוָה). See Sack, *Commentatt. theol. hist.* (Bonn, 1821), i; Reinhard, *De notione Dei*, etc. (Vitemb. 1792); Edzard, *Utrum "Elohim" a Canaanivis orig. ducet* (ib. 1696); Michaelis, *Num Deus dicatur עֲלֹהִים inito federe* (ib. 1723); Sennert, *Esercitt. philol.* (ib. 1678). Comp. *God*.

**Elohist**, the name technically given in theology and sacred criticism to the assumed authors of those parts of the Pentateuch (q. v.) in which the Deity is styled *ELOHIM* rather than *YHWH* (q. v.).

**Elo'ī** (עֲלֹהִים) for Aramæan עֲלֹהִים, *my God*), an exclamation quoted thus by our Saviour (Mark xv, 34) on the cross from Psa. xxii, 2 (where the Sept. has ὁ θεός μου), for the Heb. עֲלֹהִים, which is more literally Græcized ἰησὺς, *ELI*, by Matthew (xxvi, 46).

**E'lon**, a name occurring in two forms in the Heb. (but both having the primitive sense of *oak* [q. v.]), as that of a place, and also of three men.

1. (Heb. *Eylon'*, עֵילֹן; Sept. Ἐλών.) A city of Dan, mentioned between Jethlah and Timnath (Josh. xix, 43); probably the same elsewhere (1 Kings iv, 9) more fully called *ELON-BETH-HANAN* (q. v.).

2. (Heb. *Eylon'*, עֵילֹן; Sept. Ἐλών) A Hittite, father of Bashmath (Gen. xxvi, 34) or Adah (Gen. xxxvi, 3), the first wife of Esau (q. v.). B. C. ante 1963.

3. (Heb. *Elon'*, עֵילֹן; Sept. Ἐλών and Ἐλλών v. r. Ἀρόών.) The second of the three sons of Zebulon (Gen. xli, 14), and father of the family of the Elonites (Num. xxvi, 26). B. C. 1856.

4. (Heb. *Eylon'*, עֵילֹן; Sept. Ἐλών, Josephus Ἠλών, Vulg. *Ahiolon*.) A native of the tribe of Zebulon (perhaps a descendant of the preceding), and the 11th of the Hebrew judges for ten years (Judg. xii, 11, 12), B. C. 1243-34; which are simply noted as a period of tranquillity (comp. Josephus, *Ant.* v, 7, 14). See *JUDGES*.

**E'lon**. See *OAK*.

**E'lon-beth-ha'nan** [some *E'lon-beth-hanan*] (Heb. *Eylon' beyth-Chanan'*, עֵילֹן בֵּית חָנָן, *oak of Beth-hanan*, i. e. of the house of Hanan; Sept. Ἐλών [v. r. Αἰάδωμ] εὐς Βηθανάν, Vulg. *Elon et in Beth-hanan*), one of the Danite cities in the commissary-district of Ben-Dekar, the third of Solomon's purveyors (1 Kings iv, 9). It is simply called *ELON* in Josh. xix, 43, being probably a site marked from early times by a particular tree [see *OAK*] of traditional fame. For "Beth-hanan" some Hebrew MSS. have "Ben-hanan," and some "and Beth-hanan;" the latter is followed by the Vulgate. To judge from the order of the list in Joshua, its situation must have been on the border of Dan, between Ajalon and Ekron. Thenius suggests (*Execg. Handb.* in loc.) that Beth-hanan can be no other than the village *Bêt-Hunun*, in the rich plain near Gaza (Robinson, *Researches*, ii, 371); but this is entirely out of the region in question. Possibly it may be the modern *Bêt-Susin*, a "small village, looking old and miserable," on a ridge near an ancient well, about half way between the sites of Nicopolis and Zorah (Robinson, *Later Researches*, p. 152).

**E'lonite** (Heb. with the art. and collectively, *ha-Eloni'*, הַעֲלֹנִים; Sept. ὁ Ἀλλωνί), the patronymic designation (Num. xxvi, 26) of the descendants of *ELON* (q. v.), the son of Zebulon.

**Eloquence of the Pulpit**. See *HOMELETICS*.

**E'loth** (Heb. *Eylloth'*, עֵילֹת, *trees*; Sept. Ἀλάθ v. r. in Chron. Ἀλάρα), another (plur.) form (1 Kings ix, 26; 2 Chron. viii, 17; xxvi, 2) of the name of the city *ELATH* (q. v.).

**Elpa'al** [many *El'paal*] (Heb. *Elpa'al*, עֵלְפָאֵל, in pause עֵלְפָאֵל, *God* is his *wages*; Sept. Ἀλφαᾶλ and Ἐλφαᾶλ), the second named of the two sons of Shalah-ram (a descendant of Benjamin residing in the region of Moab) by his wife Ihusim, and progenitor of a numerous posterity (1 Chron. viii, 11, 12, 14). B. C. cir. 1618. The Bene-Elpaal appear to have lived in the neighborhood of Lydda (Lod), and on the outposts of the Benjaminite hills as far as Ajalon (viii, 12-18), near the Danite frontier.

**Elpa'let** [many *El'palet*] (Heb. *Elpe'let*, עֵלְפָאֵל, in pause עֵלְפָאֵל; Sept. Ἐλφαᾶλετ v. r. Ἐλφαᾶλ, Vulg. *Elphalelet*), a contracted form (1 Chron. iv, 5) of the name *ELIPHALET* (q. v.).

**Elpa'ran** [many *El'paran*] (Hebrew *Eyl Paran'*, עֵילְפָאֵרָן, *oak of Paran*; Sept. ἡ περιβύτουρος [v. r. περιμυμζουός] τῆς Φαράν, Vulg. *campestris Pharan*), a spot (bounding on the south the territory of the Rephaim smitten by Chedorlaomer) on the edge of the wilderness bordering the territory of the Horites or Idumæa, probably marked by a noted tree (Gen. xiv, 6). See *OAK*; *PARAN*. An ingenious writer in the *Jour. of Sac. Lit.* (Oct. 1851, p. 153 note) argues, from the rendering of the Sept., for the identity of *El-paran* with *Elath*, but inconclusively.

**Elphegus**. See *ALPHAGE*.

**Elphinston**, WILLIAM, was born at Glasgow in 1481, studied in the university of that city, and obtain-

ed the rectory of Kirkmichael. He subsequently was professor of civil and canon law at Paris and Orleans for nine years, and on his return (1471) was appointed rector of the University of Glasgow. He afterwards became successively member of Parliament and of the Privy Council, ambassador of James III to France, and bishop of Ross, from whence he was transferred to Aberdeen in 1484. As bishop of Aberdeen he was twice sent on a diplomatic mission to England. In 1488 he was for several months lord chancellor of the kingdom, and subsequently, on returning from an embassy to Germany, he was appointed to the office of lord privy seal. He secured the foundation of the University at Aberdeen, for which pope Alexander VI gave a bull dated Feb. 10, 1494. King's College was in consequence erected in 1506, and Elplinton contributed 10,000 pounds Scots towards it, and the building of a bridge over the Dee. He died October 25th, 1514, while negotiations were pending with the court of Rome for his elevation to the primacy of St. Andrew's. He wrote a book of canons, the lives of some Scottish saints, and a history of Scotland, which is preserved among Fairfax's MSS. in the Bodleian Library. —Hook, *Eccles. Biography*, vol. iv; Oudin, *De Script. Eccles.* iii, 2670.

**Elpis** (Ἐλπίς, *hope*), one of the wives of Herod the Great, who had by her and another wife Phædra two daughters, Roxana and Salome (Josephus, *Ant.* xvii, 1, 3; *War.* i, 28, 4).

**Elrington**, THE RIGHT REV. THOMAS, lord bishop of Leighlin and Ferns, obtained a scholarship in the University of Dublin in 1778, and in 1781 was elected fellow. In 1794 he was appointed Donellan lecturer at his alma mater; in 1795, professor of mathematics, and in 1806, rector of Ardree, in the county of Tyrone. In 1811 he was raised to the highest literary rank in Ireland by appointment as provost of Trinity College. This position he held with high credit to himself until 1820, when he was consecrated bishop of Limerick. In 1822 he was transferred to the see of Leighlin and Ferns. He died in 1835. Besides editing several of the classics, he published his lectures delivered while Donellan lecturer: "The proof of Christianity derived from the miracles recorded in the New Testament," under the title, *Sermons preached in the Chapel of Trinity College*, etc. (Dublin, 1796, 8vo):—*Reflections on the Appointment of Dr. Milner as the Political Agent of the Roman Catholic Clergy in Ireland* (1809, 8vo):—*The Clergy of the Church of England truly ordained* (1809, 8vo), and a number of other polemical writings.—*Annual Biography and Obituary*, xx (1836); Darling, *Cyclopædia Bibliographica*, p. 1034-5.

**Elsner**, JACOB, D.D., was born at Saalfeld, Prussia, in March, 1692. He studied at the University of Königsberg, and in 1715 became "conrector" of the Reformed school in that city. Two years later he visited Utrecht and Leyden. In 1720 he was appointed professor of theology and philology at Bingen; in 1722, rector and first professor of the Joachimsthal Gymnasium at Berlin. Subsequently he became pastor at one of the Berlin churches. From 1742 to 1744 he was director of the class of belles-lettres at the Royal Society. He died Oct. 8, 1750. His principal works are: *Observationes sacre in novi fœderis libros* (Traj. 1720-1728, 2 vols. 8vo):—*Comm. sacro-philologicis in evang. Matthæi* (Zwolle, 1767-69, 2 vols. 4to):—*Commentarius in evang. Marci* (Traj. 1733, 4to).—Darling, *Cyclop. Bibliographica*; Doering, *die gelehrten Theolog. Deutschlands*, i, 366; Hoefcr, *Nouv. Biogr. Génér.* xv, 919.

**El'tekoh** [some *Elte'keh*] (Heb. *Eltekeh'*, אֱלֵתֶכֶה, *God is its fear*, i. e. object of awe; but *Elteke'*, אֱלֵתֶכֶה in Josh. xxi, 23; Sept. Ἐλτεκό v. r. Ἀλτακά and ἡ Ἐκωζαίρ, Vulg. *Elthece* and *Elthecho*), a city in the tribe of Dan, apparently near the border, and mentioned between Ekron and Gibbethon (Josh. xix, 44).

With its "suburbs" it was assigned as a city of refuge and Levitical city to the Kohathites (Josh. xxi, 23); but it is omitted in the parallel list (1 Chron. vi). The site is possibly now represented by *El-Mansurah* ("the victorious"), "a miserable little village" near a copious spring, in the plain between Ramleh and Akir (Robinson, *Researches*, iii, 21). Schwarz (*Palest.* p. 141) confounds Eltekeh with Eltekon, and locates both at a village which he calls "*Althini*, not far from Beilin (Baalath)."

**El'telkon** [some *Elte'kon*] (Heb. *Eltekon'*, אֱלֵתֶקֹן, *God is its foundation*; Sept. Ἐλτεκοῖν v. r. Ἐλτεκῖν and Ἐίκοιν, Vulg. *Eltecon*), a city of Judah, in the mountain-district, mentioned last in order after Maarath and Beth-Anoth (Josh. xv, 59), being in the group north of Hebron (Keil, *Comment.* in loc.). See JUDAH. It is perhaps identical in site with the present *Zeit-Sabur el-Atikah*, a little S.E. of Jerusalem. See ELTEKEH. It is perhaps the *Atagu* mentioned in the Assyrian inscriptions. See HEZEKIAH.

**Elto'lad** [many *El'tolad*] (Heb. *Eltolad'*, אֱלֵתוֹלָד, perhaps meaning *God is its race* or posterity; but, according to Fürst [*Hebr. Handw.* s. v.], whose *God is Mylita*, the Phœnician deity [comp. MOLADAH]; Sept. Ἐλτοωλά and Ἐλτοωλά, v. r. Ἐρβωωλά and Ἐρβουλά; Vulg. *Eltholad*), a city in the south of Judah, mentioned between Azem and Chesil (Josh. xv, 29), but afterwards assigned to Simeon, and mentioned between Azem and Bethul (Josh. xix, 4). It remained in possession of the latter tribe in the time of David (1 Chron. iv, 29, where it is called simply TOLAD). It is possibly the ruined site *Tell-Melaha*, observed by Van de Velde (*Memoir*, p. 113) along the N. branch of wady Sheriah, which empties into the Mediterranean a little S. of Gaza.

**El'lul** (Heb. *Elul'*, אֱלּוּל, Neh. vi, 15; Sept. Ἐλούλ, also in 1 Macc. xiv, 27; the Macedonian Ἰορπιαῖος) is the name of that month which was the sixth of the ecclesiastical, and the twelfth of the civil year of the Jews, and which began with the new moon of our August or September, and consisted of 29 days. Several unsatisfactory attempts have been made to find a Syro-Arabian etymology for the word, as it occurs in a similar form in both these languages (see Gesenius, *Thes. Hebr.* p. 1036). The most recent derivation, that of Benfey, deduces it, through many commutations and mutilations, from an original Zend form *haurvatât* (*Monatsnamen*, p. 126). According to the Talmud, the following are the days devoted to religious services. See CALENDAR.

1. The new moon. The propitiatory prayers are commenced in the evening service after the new moon.
7. The festival of the dedication of the walls of Jerusalem by Nehemiah.
17. A fast because of the death of the spies who brought up the evil report of the Land of Promise (Num. xiv, 36, 37).
21. The festival of wood offering (*Xylophoria*). According to others, this occurred during the previous month.
22. A fast in memory of the punishment of the wicked and incorrigible Israelites.
29. This is the last day of the month, on which the Jews reckoned up the beasts that had been born, the tenths of which belonged to God. They chose to do it on this day because the first day of the month Tisri was a festival, and therefore they could not tithe a flock on that day.

**Elûsa** (Ἐλουσα, apparently for the Aramæan אֱלּוּסָא; see Jerome, *Comment. in Esa.* xv, 4), an ancient city of Idumæa, frequently mentioned by writers of the fourth to the sixth centuries (see the citations in Rehd, *Palest.* p. 755-7) as an episcopal city of the Third Palestine (*Concil. Gem.* iii, 448); the *Elÿssa* of the Pentinger Table, 71 Roman miles S. of Jerusalem (Ritter, *Erdk.* xiv, 120); recognised by Dr. Robinson (*Bib. Res.* i, 296 sq.) as the present ruins *el-Khulaseh*, 5 hours S. S. W. of Hebron on the way to Egypt, and consisting of walls, a fine well, and inclosures sufficient to have contained a population of 15,000 or 20,000

persons (see also Stewart, *Tent and Khan*, p. 205). See also CHELLUS.

**Elu'zai** (Heb. *Eluzay'*, אֱלֻזַי, *God is my praises*, i. e. object of praise; Sept. Ἐλουζαῖ v. r. Ἀζαῖ, Vulg. *Eluzai*), one of the Benjamite warriors who joined David at Ziklag (1 Chron. xii, 5). B. C. 1054.

**Elvira**, COUNCIL OF (*Concilium Eliberitanum* or *Illyberitanum*), held in the town of Elvira (or Illiberis, Iliberi, or Liberini), in the Spanish province of Batica. The town, which no longer exists, was situated not far from the modern Granada. That it was not Illiberis, in Gallia Narbonensis, is shown by the fact that all the signers were Spanish bishops. The council was most probably held at the beginning of the fourth century, but the year (303, 305, 309) is uncertain. Some of the early Protestant writers (as the authors of the *Magdeburg Centuries*) inferred, from the resolutions concerning pictures and the lighting of candles, that the synod took place as late as the year 700; but this opinion has now been abandoned. The Synod of Elvira is the most ancient among those of which all the canons (eighty-one) are extant. It was attended by nineteen bishops, among them Hosius of Cordova, and twenty-six priests. Some of the canons show that the Church of Spain was at that time strongly under the influence of Novatian and Montanist principles. The most important of the resolutions were, 1, depriving of communion, i. e. of absolution, even in death, those who, after baptism, have voluntarily sacrificed to idols; 3, relaxing the penalty in canon 1 in favor of those who have not gone beyond offering a present to the idol. It allows of admitting such to communion at the point of death, if they have undergone a course of penance; canons 6 and 7 forbid communion even at the point of death to those who have caused the death of another maliciously, and to adulterers who have relapsed after entering upon the course of penance; 12 and 13 forbid communion even in death to mothers who prostitute their own daughters, and to women who, after consecrating themselves in virginity to God, forsake that state; 33 prohibits the clergy from the use of marriages; 34 prohibits the lighting of candles during daytime in cemeteries, "for the spirits of the saints must not be disturbed;" 36 declares that pictures ought not to be in a church, lest the object of veneration and worship be depicted upon walls; 63 and 64 forbid communion even in death to adulteresses who have wilfully destroyed their children, or who abide in a state of adultery up to the time of their last illness; 65 forbids communion even in death to one who has falsely accused of a crime a bishop, priest, or deacon. The canons may be found in Mansi, ii, 2 sq., and in Routh, *Reliquie*, vol. iv. Special treatises on the canons were written by the bishop Ferdinand de Mendoza (*De Confirmando concil. Illyberitano*, in Mansi, l. c.), and bishop Aubespine of Orleans (Mansi, l. c.). The canons, together with some explanatory remarks, may also be found in the *Tübinger Theolog. Quartalschrift*, 1821, p. 1-44.—Herzog, *Real-Encyclop.* iii, 775; Wetzer u. Welte, *Kirchen-Lex.* iii, 543; Gams, *Kirchengesch. von Spanien*; Hefele, *Concilien-geschichte*, i, 122 sq. (A. J. S.)

**Elxai, Elxaites.** See ELKESAITES.

**Ely**, EZRA STILES, D.D., a Presbyterian (O. S.) minister, was born in Lebanon, Conn., June 13, 1786. At twelve years of age he made a profession of religion. He graduated at Yale College in 1803. His theological studies were pursued under his father, the Rev. Z. Ely. In 1806 he was ordained, and installed as pastor of the church in Colchester, Conn., which he left some time after to become chaplain to the New York City Hospital. In 1811 the Old Pine Street Church, Philadelphia, became vacant. Its pulpit had been filled by the most eloquent ministers of the day, and it was necessary to choose a man of commanding

intellect and power. The choice fell most wisely upon Dr. Ely. He entered upon his field of labor with earnestness and zeal. He was the principal founder of the Jefferson Medical College. He was stated clerk and moderator of the General Assembly in 1825 and 1828, and was constantly engaged in works of charity and schemes of benevolence. In 1834 he conceived the plan of establishing a college and theological seminary in Missouri. He entered into this with great zeal, and for a while with success, but the crisis of 1837 made it a failure. In this enterprise he lost his large fortune, and returned to Philadelphia a poor man—his intellect and oratorical powers unimpaired—but failed to receive that degree of attention he commanded when in affluence. In 1844 he became pastor of the church in Northern Liberties, Philadelphia, where he labored until prostrated by paralysis in 1851. He lingered ten years, his intellect being so impaired as to preclude activity of any kind. He died June 18, 1861. He published *Memoirs of the Rev. Z. Ely* (his father):—*Collateral Bible*, or *Key to the Holy Scriptures* (in connection with Bedell and M'Corckle):—*Ely's Journal*:—*Sermons on Faith*:—*Visits of Mercy*. He was also editor of *The Philadelphian*.—Wilson, *Presb. Historical Almanac*, 1862.

**Ely**, so called from a Saxon word, *elig*, an eel, or *helig*, a willow, a cathedral town in that part of the fen country of Cambridgeshire called the *Isle of Ely*. Pop. about 6000.

*Ely Cathedral*.—About the year 673, Etheldreda, daughter of the king of East Anglia, and wife of Oswy, king of Northumberland, founded a monastery here, and took on herself the government of it. A new church was begun in 1081, which was converted into a cathedral, and the abbey erected into a see in 1109. The possessions of the abbey were divided between the bishop and the community. Among the celebrated names connected with Ely are abbot Thurstan, who defended the isle against William the Conqueror for seven years, and bishop Andrews. The bishops of Ely, like the bishops of Durham, formerly enjoyed a palatine jurisdiction, and appointed their own chief justice, etc., but this privilege was taken from them by the 6th and 7th William IV. The bishop of Ely is visitor to St. Peter's, St. John's, and Jesus colleges, Cambridge, of which last he also appoints the master. There is a grammar-school attached to the cathedral, founded by Henry VIII. The diocese of Ely belongs to the province of Canterbury, and embraces Cambridgeshire, Bedfordshire, Huntingdonshire, and the archdeaconry of Sudbury, in Suffolk. The income of the bishop is £5500. Present (1868) incumbent is Edward Harold Browne. The diocese has 26 deaneries and 172,263 church sittings. The total population within the territory of the diocese was, in 1861, 480,716.—Chambers, *Encyclop.* s. v.; *Churchman's Calendar* for 1868.

**Elymæ'an** (Ἐλυμαῖος), the Græcized form (Judith i, 6) of the designation usually Anglicized ELAMITE (q. v.).

**Elyma'is** (Ἐλυμαίς), a general designation (To-bit ii, 10) of that province of the Persian empire (see Smith, *Dict. of Class. Geog.* s. v.) termed ELAM (q. v.) in the Bible. In 1 Macc. vi, 1, however, the word is used (incorrectly) in a more specific or local sense of some Persian city, as we are there informed that Antiochus Epiphanes, understanding there were very great treasures in the temple at Elymais, determined to plunder it; but the citizens resisted him successfully. 2 Macc. ix, 2 calls this city *Persepolis*, probably because it formerly had been the capital of Persia; for Persepolis and Elymais were very different cities; the former situated on the Araxes, the latter on the Eulæus. The temple which Antiochus designed to pillage was that of the goddess Nannoæ, according to 2 Macc. i, 13; Apian says (*Syr.* p. 66) a temple of Venus (i. e.

probably the goddess Anubis; Polybius (xxxi, 11), Diodorus, Josephus (*Ant.* xii, 9, 1), and Jerome say a temple of Diana. See ANTHOCHUS (EMPHANES).

**Elymas** (Ελύμας), an appellation commonly derived from the Arabic *Aliman* ("a wise man," see Pfeiffer, *Dubia vcr.* p. 941; like the Turkish title *Ulema*, see Lakemacher, *De Elyma Mago*, in his *Observatt.* ii, 162), which Luke interprets by ὁ μάγος, the *Magian* or "sorcerer;" it is applied to a Jew named BAR-JESUS, who had attached himself to the prosconsul of Cyprus, Sergius Paulus, when Paul visited the island (*Acts* xiii, 6 sq.). A.D. 44. On his attempting to dissuade the prosconsul from embracing the Christian faith, he was struck with miraculous blindness by the apostle (see Neander's *History of first Planting of the Christian Church*, i, 125). A very different but less probable derivation of the word is given by Lightfoot in his *Hebrew and Talmudical Exerccitions on the Acts* (*Works*, viii, 461), and in his *Sermon on Elymas the Sorcerer* (*Works*, vii, 104). Chrysostom observes, in reference to the blindness inflicted by the apostle on Bar-Jesus, that the limiting clause, "for a season," shows that it was not intended so much for the punishment of the sorcerer as for the conversion of the deputy (Chrysost. in *Acta Apost. Homil.* xxxviii; *Opera*, ix, 241). On the practice generally then prevailing, in the decay of faith, of consulting Oriental impostors of this kind, see Conybeare and Howson, *Life of St. Paul*, i, 177-180, 2d ed.—Kitto, s. v.; Smith, s. v. See MAGIC.

**El'zabad** [some *Elza'bad*] (Heb. *Elzabad'*, עֶלְזָבָד, whom *God has bestowed*, i. q. *Theodore*; Sept. ΕΛΕΖΑΒΑΪΔ and ΕΛΕΖΑΒΑΪ, v. r. Ελεζέβ and ΕΛΕΖΑΒΑΪ), the name of two men.

1. The ninth of the eleven Gadite heroes who joined David in his fastness in the wilderness of Judah (*1 Chron.* xii, 12) B.C. 1061.

2. One of the able-bodied sons of Shemaiah, the son of Obed-edom the Levite; he served as a porter to the "house of Jehovah" under David (*1 Chron.* xxvi, 7). B.C. 1014.

**El'zaphan** [some *Elza'phan*] (Heb. *Eltsaphan'*, עֶלְזָפָן), a contracted form (*Exod.* vi, 22; *Lev.* x, 4) of the name ELIZAPHAN (q. v.).

**Emanation** (Latin *emanatio*, a flowing forth), a religious theory concerning the relation of the universe to the Deity, which lies at the basis of some of the Oriental religions, and from them found its way into several philosophical systems. Emanation denotes a development, descending by degrees, of all things from the Supreme Being, the universe constituting in general, as well as in particular, a chain of revelations, the individual rings of which lose the divine character the more the farther they are remote from the primary source, the Deity. A system of emanation is different from a system of evolution, because in the latter the revelation of the Deity in the universe has for the Deity itself the signification of a process of self-cognition which grows in a progressive ratio. Emanation was the basis of the religions of India, in the northern provinces of which country it developed from the original religion of nature even before the compilation of the Vedas. The cause of all things was found in a universal world-soul. See ANIMA MUNDI. The world-soul was identified with Brahma, and, viewed as the eternal spiritual unit, the mysterious source of all life. The ancient gods were explained as the first rays of Brahma, whom he had constituted the guardians of the world. The creation was an emanation from brahma, which became the more gross, dense, materialized, the farther it removed from the primitive source. Those who give themselves up to the corporeal world sink deeper and deeper, and only rise again upward when purified by the fire of hell; but those who renounce all sensuality, and direct all their thoughts to the one

divine substance, are gradually absorbed by it. The religion of the Parsees is also based upon emanation. From the *Zervane akhercuc* (the uncreated one), Ormuzd and Ahriman proceed as the highest revelation. From Ormuzd and Ahriman all other substances emanate, from the ministering angels down to the beings of the material world. But the Persians did not teach, like the Indians, a self-destruction of personality for the purpose of obtaining a reunion with the original unit; in the Parsee system the good is perfected and completed by overcoming the bad, and the series of the imperfect emanations is closed by a reunion of Ahriman with Ormuzd. In the Western countries, Plato is the first in whose writings we find, though not yet distinctly, traces of the doctrine of emanation. More developed, it appears in the writings of Philo. It is a prominent feature of the Neoplatonic school, and through Valentinus (q. v.) it was introduced into the Gnostic schools. Finally, it is to be found in the philosophy of the Arabs, which was more or less an Aristotelism mixed with Neoplatonic views.—Wetzer u. Welte, *Kirchen-Lex.* iii, 548; Möller, *Gesch. der Kosmologie in der griech. Kirche bis auf Origenes* (Halle, 1860); Neander, *Ch. Hist.* vol. i. (A. J. S.)

**Emancipation.** 1. In the Roman Church, *Emancipatio canonicarum* is the raising of some member of a convent to an ecclesiastical dignity, by virtue of which he is no longer subject to his former superior. The *Emancipatio canonica* is the release of a young canon from the obligation of visiting the foundation school when about to receive a prebend. 2. The term is also used to denote the act whereby a government or Legislature delivers from a state of slavery, or sets at political liberty, any classes of persons who have previously been declared ineligible for certain offices or privileges, on account of their religious peculiarities, e. g. emancipation of Jews in Christian countries (see JEWS); Roman Catholic emancipation in 1829 in England (see TESTS). 3. The freeing of slaves from bondage (see SLAVERY).

**Embalm** (עֲבָרָה, *chanal'*, to *spice*; hence spoken of the ripening of fruit, on account of its aromatic juice, improperly rendered "putteth forth" in *Cant.* ii, 13), the process of preserving a corpse by means of aromatics (*Gen.* 1, 2, 3, 26; Sept. ἐνταφιάζω). This art was practised among the Egyptians from the earliest times, and arrived at great perfection in that country, where, however, it has now become lost, the practice apparently having gradually fallen into disuse in consequence of the change of customs affected by the introduction of Christianity in that part of the Roman empire. It is in connection with that country that the above instances occur, and later examples (*2 Chron.* xvi, 14; *John* ix, 59, 40) seem to have been in imitation of the Egyptian custom. The modern method of embalming is in essential points similar.

1. *Egyptian*.—1. The feeling which led the Egyptians to embalm the dead probably sprang from their belief in the future reunion of the soul with the body. Such a reunion is distinctly spoken of in the Book of the Dead (Lepsius, *Totentbuch*, chap. 89 and *passim*), and Herodotus expressly mentions the Egyptian belief in the transmigration of souls (ii, 123). This latter idea may have led to the embalming of lower animals also, especially those deemed sacred, as the ox, the ibis, and the cat, mummies of which are frequent. The actual process is said to have been derived from "their first merely burying in the sand, impregnated with natron and other salts, which dried and preserved the body" (Rawlinson, *Herod.* ii, 122). Drugs and bitumen were of later introduction, the latter not being generally employed before the 18th dynasty. When the practice ceased entirely is uncertain.

2. Herodotus (ii, 86-89) describes three modes, varying in completeness and expense, and practised by persons regularly trained to the profession, who were in-

tified into the mysteries of the art by their ancestors. The most costly mode, which is estimated by Diodorus Siculus (i, 91) at a talent of silver (over \$1000), was said by the Egyptian priests to belong to him whose name in such a matter it was not lawful to mention, viz. Osiris. The embalmers first removed part of the brain through the nostrils by means of a crooked iron, and destroyed the rest by injecting caustic drugs. An incision was then made along the flank with a sharp Ethiopian stone, and the whole of the intestines removed. The cavity was rinsed out with palm-wine, and afterwards scoured with pounded perfumes. It was then filled with pure myrrh pounded, cassia, and other aromatics, except frankincense. This done, the body was sewn up and steeped in natron for seventy days. When the seventy days were accomplished, the embalmers washed the corpse and swathed it in bandages of linen, cut in strips and smeared with gum. They then gave it up to the relatives of the deceased, who provided for it a woollen case, made in the shape of a man, in which the dead was placed, and deposited in an erect position against the wall of the sepulchral chamber. Diodorus Siculus gives some particulars of the process which are omitted by Herodotus. When the body was laid out on the ground for the purpose of embalming, one of the operators, called the scribe (*γραμμάρειός*), marked out the part of the left flank where the incision was to be made. The dissector (*παρῶσις*) then, with a sharp Ethiopian stone (black flint, or Ethiopian agate, Rawlinson, *Herod.* ii, 121), hastily cut through as much flesh as the law enjoined, and fled, pursued by curses and volleys of stones from the spectators. When all the embalmers (*ταριεῦραι*) were assembled, one of them extracted the intestines, with the exception of the heart and kidneys; another cleansed them one by one, and rinsed them in palm-wine and perfumes. The body was then washed with oil of cedar, and other things worthy of notice, for more than thirty days (according to some MSS. forty), and afterwards sprinkled with myrrh, cinnamon, and other substances, which possess the property not only of preserving the body for a long period, but also of communicating to it an agreeable smell. This process was so effectual that the features of the dead could be recognised. It is remarkable that Diodorus omits all mention of the steeping in natron. Porphyry (*De Abst.* iv, 10) supplies an omission of Herodotus, who neglects to mention what was done with the intestines after they were removed from the body. In the case of a person of respectable rank they were placed in a separate vessel and thrown into the river. This account is confirmed by Plutarch (*Sept. Sap. Conv.* c. 16).

The second mode of embalming cost about 20 mina. In this case no incision was made in the body, nor were the intestines removed, but cedar-oil was injected into the stomach by the rectum. The oil was prevented from escaping, and the body was then steeped in natron for the appointed number of days. On the last day the oil was withdrawn, and carried off with it the stomach and intestines in a state of solution, while the flesh was consumed by the natron, and nothing was left but the skin and bones. The body in this state was returned to the relatives of the deceased.

The third mode, which was adopted by the poorer classes, and cost but little, consisted in rinsing out the intestines with *symæa*, an infusion of senna and cassia (Pettigrew, *Hist. of Mummies*, p. 69), and steeping the body for the usual number of days in natron.

Although the three modes of embalming are so precisely described by Herodotus, it has been found impossible to classify the mummies which have been discovered and examined under one or other of these three heads. Pettigrew, from his own observations, confirms the truth of Herodotus's statement that the brain was removed through the nostrils. But in many instances, in which the body was carefully preserved

and elaborately ornamented, the brain had not been removed at all, while in some mummies the cavity was found to be filled with resinous and bituminous matter. M. Rouyer, in his *Notice sur les Embaume-ments des Anciens Egyptiens (Description de l'Egypte, p. 471)*, endeavored to class the mummies which he examined under two principal divisions, which were again subdivided into others. These were, I. Mummies with the ventral incision, preserved, 1, by balsamic matter, and, 2, by natron. The first of these are filled with a mixture of resin and aromatics, and are of an olive color—the skin dry, flexible, and adhering to the bones. Others are filled with bitumen or asphaltum, and are black, the skin hard and shining. Those prepared with natron are also filled with resinous substances and bitumen. II. Mummies without the ventral incision. This class is again subdivided, according as the bodies were, 1, salted and filled with *pisasphaltum*, a compound of asphaltum and common pitch; or, 2, salted only. The former are supposed to have been immersed in the pitch when in a liquid state. The medicaments employed in embalming were various. From a chemical analysis of the substances found in mummies, M. Rouelle detected three modes of embalming: 1, with *asphaltum*, or Jew's pitch, called also *funeral gum*, or *gum of mummies*; 2, with a mixture of asphaltum and cedria, the liquor distilled from the cedar; 3, with this mixture, together with some resinous and aromatic ingredients. The powdered aromatics mentioned by Herodotus were not mixed with the bituminous matter, but sprinkled into the cavities of the body. Pettigrew supposes that after the spicing "the body must have been subjected to a very considerable degree of heat; for the resinous and aromatic substances have penetrated even into the innermost structure of the bones, an effect which could not have been produced without the aid of a high temperature, and which was absolutely necessary for the entire preservation of the body" (p. 62). M. Rouyer is of the same opinion (p. 471). The surface of the body was in one example covered with "a coating of the dust of woods and barks, nowhere less than one inch in thickness," which "had the smell of cinnamon or cassia" (Pettigrew, p. 62, 63). At this same stage plates of gold were sometimes applied to portions of the body, or even its whole surface. Before enwrapping, the body was always placed at full length, with no variety save in the position of the arms.

The principal embalming material in the more costly mummies appears to have been asphalt, either alone or mixed with a vegetable liquor, or so mixed with the addition of resinous and aromatic ingredients. Pettigrew supposes resinous matters were used as a kind of varnish for the body, and that pounded aromatics were sprinkled in the cavities within. The natron, in a solution of which the mummies were placed in every method, appears to have been a fixed alkali. It might be obtained from the Natron Lakes and like places in the Libyan desert. Wax has also been discovered (Pettigrew's *History*, p. 75 sq.).

3. The embalming having been completed, the body was wrapped in bandages. There has been much difficulty as to the material; but it seems certain that linen was invariably used. Though always long, they vary in this respect; and we know no authenticated instance of their exceeding 700 yards, though much greater measures are mentioned. The width is also very various, but it is generally not more than seven or eight inches. The quantity of cloth used is best ascertained from the weight. The texture varies, in the cases of single mummies, the coarser material being always nearer to the body. The bandages are found to have been saturated with asphalt, resin, gum, or natron; but the asphalt has only been traced in those nearest the body: probably the saturation is due to the preparation of the mummies, and does not indicate any special preparation of the clothes. The beau-

Swathing a Mummy. (From the Egyptian Monuments.)

ty of the bandaging has been the subject of great admiration. The strips were very closely bound, and all directions were adopted that could carry out this object. Pettigrew is of opinion that they were certainly applied wet. Various amulets and personal ornaments are found upon mummies and in their wrappings; the former were thought to be of use to the soul in its wanderings, and they were placed with the body from the belief in the relation between the two after death. With these matters, and the other particulars of Egyptian mummies, we have little to do, as our object is to show how far the Jewish burial-usages may have been derived from Egypt. The body in the cases of most of the richer mummies, when bandaged, has been covered with what has been termed by the French a *cartonage*, formed of layers of cloth, plastered with lime on the inside. The shape is that of a

The Mummy's Head, as seen at an open panel of the Coffin. (From the Monuments.)

II. *Hebrew-Egyptian*.—The records of the embalming of Jacob and Joseph are very brief. In the former case we read, "And Joseph commanded his servants the physicians to embalm his father: and the physicians embalmed Israel. And forty days were fulfilled for him; for so are fulfilled the days of embalming: and the Egyptians mourned for him threescore and ten days" (Gen. 1, 2, 3). Of Joseph we are only told that "they embalmed him, and he was put in a coffin in Egypt" (ver. 26). It should be remarked, that in Joseph's case the embalming must have been thorough, as Moses at the Exodus carried his body into Canaan. The motive of embalming in these instances was evidently that the strong desire of these patriarchs to be buried in the Land of Promise might be complied with, although, had this not been so, respect would probably have led to the same result. That the physicians were employed by Joseph to embalm his father may mean no more than the usual embalmers, who must have had medical and surgical knowledge, but it is not unlikely that the kings and high officers were embalmed by household physicians. The periods of forty days for embalming, and seventy for mourning, are not easily reconciled with the statement of Herodotus, who specifies seventy days as the time that the body remained in natron. Hengstenberg (*Egypt and the Books of Moses*, p. 69) attempts to reconcile this discrepancy by supposing that the seventy days of Herodotus include the whole time of embalming, and not that of steeping in natron only. But the differences in detail which characterize the descriptions of Herodotus and Diodorus, and the impossibility of reconciling these descriptions in all points with the results of scientific observation, lead to the natural conclusion that, if these descriptions are correct in themselves, they do not include every method of embalming which was practised, and that, consequently, any discrepancies between them and the Bible narrative cannot fairly be attributed to a want of accuracy in the latter. Perhaps the periods varied in different ages, or the forty days may not include the time of steeping in natron. Diodorus Siculus, who, having visited Egypt, is scarcely likely to have been in error in a matter necessarily well known, speaks of the anointing of the body at first with oil of cedar and other things for above thirty or forty days (ἑφ' ἡμέρας πλείους τῶν τριάκοντα; some MSS. τεσσαράκοντα). This period would correspond very well with the forty days mentioned in Genesis, which are literally "the days of spicing," and indicate that the latter denoted the most essential period of embalming. Or, if the same period as the seventy days of Herodotus be meant by Diodorus, then there would appear to have been a change. It may be worth noticing, that Herodotus, when first mentioning the steeping in natron, speaks of seventy days as the extreme time to which it might be lawfully prolonged (ἡμέρας ἐβδομήκοντα· πλείνας ἢ τούτων οὐκ ἔστι ταριχεύ-

Painting the *Cartonage* or Mummy-case. (From the Monuments.)

body of which the arms and legs are not distinguishable. In this shape every dead person who had, if we may believe Diodorus, been judged by a particular court to be worthy of the honor of burial, was considered to have the form of Osiris, and was called by his name. It seems more probable, however, that the tribunal spoken of was that of Amenti, "the hidden," the Egyptian Hades, and that the practice of embalming was universal. The *cartonage* of the more costly mummies is generally beautifully painted with subjects connected with Amenti. Mummies of this class are inclosed in one or even two wooden cases, either of sycamore, or, rarely, of cedar. The mummies of royal and very wealthy persons were placed in an outer stone case, within which there was a wooden case, and, probably, sometimes two such cases. See MUMMY. It would seem that the features of the face, as well as the other parts of the body, were covered over with the bandage, and that it was only through this, and latterly through the coffin, which commonly took the form of the features, that these could be recognised.

iv), that (according to Pettigrew, p. 61) "appearing to be precisely the time necessary for the operation of the alkali on the animal fibre." This would seem to render it possible that the seventy days in the time of Herodotus was the period of mourning, as it was not to be exceeded in what appears to have been the longest operation of embalming. The division of the seventy days mentioned in Genesis into forty and thirty may be suggested if we compare the thirty days' mourning for Moses and for Aaron, in which case the seventy days in this instance might mean until the end of seventy days. It is also to be remarked that Diodorus speaks of the time of mourning for a king being seventy-two days, apparently ending with the day of burial (i, 72). Joseph's coffin was perhaps a stone case, as his mummy was to be long kept ready for removal. See COFFIN.

III. *Jewish*.—It is not until long after the Exodus that we find any record of Jewish embalming, and then we have, in the O. T., but one distinct mention of the practice. This is in the case of king Asa, whose burial is thus related: "And they buried him in his own sepulchre, which he had digged for himself in the city of David, and laid him in the bed [or rather "coffin," not "bier"] which he had filled [or "which was filled"] with perfumes and spices compounded by the apothecaries' art; and they made for him an exceeding great burning" (2 Chron. xvi, 14). The burning is mentioned of other kings of Judah. From this passage it seems that Asa had prepared a bed, probably a sarcophagus, filled with spices, and that spices were also burnt at his burial. In the accounts of our Saviour's burial the same or similar customs appear to be indicated, but fuller particulars are given. We read that Nicodemus "brought a mixture of myrrh and aloes, about an hundred pound [weight]." The body they wound "in linen clothes with the sweet spices, as the manner of the Jews is to prepare for burial" (John xix, 39, 40). Mark specifies that fine clothes were used (xv, 46), and mentions that the women who came to the sepulchre on the morning of the resurrection "had bought sweet spices, that they might come and anoint him" (xvi, 1). Luke relates that the women went to see the sepulchre. "And they returned, and prepared sweet spices and ointments" (xxiii, 56). Immediately afterwards he speaks of their "bringing the sweet spices which they had prepared" (xxiv, 1) on the second day after. Our Lord himself referred to the use of ointment in burial-ceremonies (*πρός τὸ ἐνταφιάζειν*) "for the preparation for burial," when he commended the piety of the woman who had anointed his head with "very precious ointment" (Matt. xxvi, 6-13), and spoke in like manner in the similar case of Mary, the sister of Lazarus (John xii, 3-8). The customs at this time would seem to have been to anoint the body and wrap it in fine linen, with spices and ointments in the folds, and afterwards to pour more ointment upon it, and perhaps also to burn spices. In the case of our Saviour, the hurried burial and the following of the Sabbath may have caused an unusual delay. Ordinarily everything was probably completed at once.

Herodotus and Diodorus Siculus speak of the use of myrrh in Egyptian embalming, but we do not find any mention of aloes. The wrapping in fine linen is rather contrary to the Egyptian practice than like it, when we remember that the coarser mummy-bandages are those which immediately enfold the body, and would best correspond to the clothes used by the Jews.

The Jewish custom has therefore little in common with the Egyptian. It was, however, probably intended as a kind of embalming, although it is evident from what is mentioned in the case of Lazarus, who was regularly swathed (John xi, 44), that its effect was not preservation (ver. 39). The use of aromatics may naturally have been a harmless relic of the Egyptian cus-

tom, which, however, was very different in all else that relates to the disposal of the corpse. See BURIAL.

Mummy of Pen-amen, priest of Amun-Ra. (From the British Museum.)

Among the later Jews a sort of embalming by means of honey occurs (Josephus, *Ant.* xiv, 7, 4; see Strabo, xvi, 746; compare Pliny, xxii, 50). Wax is said to have been employed for a similar purpose by the ancient Persians (Herodotus, i, 140; comp. Cicero, *Tusc. Quæst.* i, 45; Xenophon, *Hellen.* v, 3, 19).—Kitto, s. v.; Smith, s. v.

IV. *Literature*.—See Pettigrew, *History of Egyptian Mummies* (Lond. 1840, 4to); Wilkinson, *Ancient Egyptians*, 2d series, ii, 451 sq.; Rosellini, *Monumenti dell'Egitto*, II, iii, 334 sq., and pl. 121; Jablonski, *Opusc.* ed. Gott.* 1780, iii, 89 sq.; Winckler, *Animadverss.* i, 105 sq.; Creuzer, *Comment. in Herod.* i, 14 sq., 361 sq.; Sethus, *De alimenter. facultatibus* (Par. 1658), x, p. 74; Ritter, in the *Hall. Encyclop.* vii, 374 sq.; Brande's *Encyclopædia*, and the *Penny Cyclopædia*, s. v. Mummy.

#### Embalming the Dead in the Christian Church.

It was the custom of the early Church to bestow the honor of embalming upon the bodies of martyrs at least. According to an intimation of Tertullian (*Apol.* cap. 42), the usage appears to have been even generally adopted by Christians in burying their dead. One of the chief ingredients used was myrrh; in imitation of the Jewish custom, which was followed by Joseph of Arimathea and Nicodemus, who "brought a mixture of myrrh and aloes, about an hundred pound weight, and took the body of Jesus, and wound it in linen clothes with the spices, as the manner of the Jews is to bury" (John xix, 39). There was supposed to be some mystic meaning in the presents made by the wise men to our Saviour at his birth when they offered to him gifts, gold, frankincense, and myrrh: gold as to a king, frankincense as to a God, and myrrh as to a man that must die and be buried. In addition to the Jewish custom and the mode of our Saviour's burial, another reason which rendered the use of myrrh important was that the ancient Christians were often compelled to bury their dead in the places in which they assembled for divine worship, and the embalming would tend to preserve them from corruption, and render the burial-places less offensive.—Bingham, *Orig. Eccles.* bk. xxiii, ch. ii, § 5.

**Ember Weeks.** The weeks in which the ember days fall. These are certain days set apart in the Roman and Anglican churches for imploring God's blessing upon the ordinations which are appointed to be held in the church on the Sundays next following these weeks. The ember days are the Wednesday, Friday, and Saturday after the first Sunday in Lent; after Whit-Sunday; after the 14th of September; and after the 13th of December. These days were settled by the Council of Placentia, A. D. 1095. The name is derived by some from a German word signifying "abstinence;" by others it is supposed to signify "ashes;" the most probable derivation, however, is from a Saxon word (*ymbren* or *embren*) signifying "a circuit or course," because these fast-days return at certain periods (Eden, s. v.). The ember weeks in the Roman Church are called the *quatuor tempora*, the fast so called being observed at the beginnings of the four seasons. In the French Church it is called the fast of *quatre-temps*. It is observed at the same dates, nearly, as in the English Church. It was first distinctly fixed in the Church year by Gregory VII.—Thomas-sin, *Traité des Jeûnes*, pt. i, chap. xxi; Bingham, *Orig.*

*Ecc.* bk. xxi, ch. ii; Eden, *Churchman's Dictionary*, s. v.; Palmer, *Orig. Liturg.* i, 305; Procter, *On Common Prayer*, p. 261.

**Emblem**, "a device or figure employed to represent some moral notion. There are various opinions as to the lawfulness and expediency of emblems in religious matters, some considering it to be both allowable and useful thus to represent spiritual ideas to the bodily eye; others, again, holding it to be both presumptuous and dangerous, if not superstitious, to use any emblems of sacred things not warranted and enjoined by Scripture. This, at least, is certain, that it is quite as likely to lead to idolatry (answering to that of the Hindoos, Egyptians, etc.) as pictures or images giving a simple resemblance. The golden calf was meant for an emblem, but it was the occasion of gross idolatry" (Eden).

Emblems are to be distinguished from symbols. Symbols are generally intended to represent revealed doctrines; emblems are "arbitrary representations of an idea of human invention" (Walcott). Thus a sword is the emblem of St. Paul. A lion, as indicating solitude, was chosen as the emblem of Jerome as a recluse. See IDOLATRY; IMAGE.

**Embroider** (רָמַד, *ramak'*, to variegate, Exod. xxxv, 35; xxxviii, 23; elsewhere "needle-work," etc.; שָׁבַט, *shabats'*, to interweave, Exod. xxviii, 39; "set," Exod. xxxviii, 20). See BROIDEREED. If these passages are correctly rendered, the Israelites must have known the art of embroidery. In several passages, also, an equivalent expression is used—*needle-work*—and used so as to imply that not plain sewing, but ornamental work, was evidently meant (Exod. xxvi, 36; Judg. v, 30; Psalm xlv, 14, etc.). The Hebrew women were undoubtedly indebted to their residence in Egypt for that perfectness of finish in embroidery which was displayed in the service of the tabernacle, and in the preparation of the sacerdotal robes directed to be worn by the high-priest (Exod. xxviii, 29). The colored figures in the cloth of the Hebrews are thought by most authors to have been partly the product of the weaver in colors, whose art appears the superior, and partly that of the embroiderer in colors. The notices

Ancient Egyptian Princess in embroidered dress. (From the Monuments.)

of Egyptian history, confirmed by the monumental remains, give reason for believing that at a comparatively early period they had made wonderful attain-

ments in this line. For example, a corslet is mentioned by Herodotus as having been presented by Amasis, king of Egypt, to the Lacedæmonians, which was of linen, each thread composed of 360 finer threads, and ornamented with numerous figures of animals, worked in gold and cotton (Herod. iii, 47). This was many centuries indeed after the Exodus; but its testimony reaches back to a much earlier time, as such a beautiful and elaborate piece of workmanship could not have been produced without ages of study and application to the art. Wilkinson says, "Many of the Egyptian stuffs presented various patterns worked in colors by the loom, independent of those produced by the dyeing or printing process, and so richly composed that they vied with cloths embroidered by the needle. The art of embroidery," he adds, "was commonly practised in Egypt" (iii, 128)—referring in proof, however, simply to passages in Scripture, and taking them in the sense put upon them in the authorized version, sanctioned by Gesenius and the rabbins. The Egyptian sails, says the same author, were some of them embroidered with fanciful devices, representing the phoenix, flowers, and other emblems. This, however, was confined to the pleasure-boats of the nobles and king. That this was done even in the early ages is evident from the paintings at Thebes, which show sails ornamented with various colors, of the time of Rameses III. The devices are various; the most common is the phoenix (Ezek. xxvii, 7). The Egyptian ladies of rank wore splendid dresses of needle-work (Psalm xlv, 13, 14). (See Wilkinson's *Ancient Egyptians*, abridgm. ii, 81; Gesenius, *Heb. Thesaur.*, s. v., ut sup.)

The art of embroidery became hereditary in certain families of the Israelites, but finally fell into desuetude (1 Chron. iv, 21).

In later times, the Babylonians were the most noted of all the Asiatic nations for the weaving of cloth of different colors, with gold threads introduced into the woof. These Assyrian dresses are mentioned as an

Ancient Assyrian embroidered Robe. (From the Monuments.)

article of commerce by Ezekiel (xxvii, 24), and occur even as early as the time of Joshua (vii, 21). They formed, perhaps, the "dyed attire and broided work" so often mentioned in Scripture as the garments of princes and the costly gifts of kings. The ornaments upon them may either have been dyed, worked in the loom, or embroidered with the needle (Judg. v, 30). (See Layard's *Ninveh*, 1st series, ii, 313.) See WOMAN; WEAVING. (See further in Adam's *Roman Antiquities*, p. 372; Miss Lambert's *Hand-book of Needle-work*, London and New York, 1846.) See NEEDLE-work.

Modern Oriental Embroidery-frame.

**Embury, Philip**, the first Methodist minister in America, was born in Ballygaran, Ireland, Sept. 21, 1728 or 1729. His parents were Germans of the Palatinate, and he was educated at a school near Ballygaran. In 1752 he was converted, and in 1758 he was entered upon the roll of the Irish Conference as a preacher. In 1760 he emigrated to America, but it is not known whether he preached or not during the first few years of his life in New York. In 1766, stimulated by the advice of Barbara Heck, a pious Methodist, he organized a class, and commenced preaching, first in his own house, then in a hired room, and soon after (1767) in the "Rigging Loft," famous as the birth-place of Methodism in New York. A chapel became necessary, and in 1768 the pioneer Methodist church was erected on the site of the present John-street Church. New York at this time had a population of twenty thousand. Embury continued to serve the Church in this chapel gratuitously until the arrival of the first missionaries sent out by John Wesley in 1769, when he surrendered the charge, and, with a party of fellow-Methodists, emigrated to Washington County. He there continued his labors as a "local preacher, and formed a society, chiefly of his own countrymen, at Ashgrove, the first Methodist organization within the bounds of the present Troy Conference, now numbering twenty-five thousand communicants, and more than two hundred travelling preachers. Embury died suddenly in August, 1775, in consequence of an accident in mowing. He was buried on a neighbor's farm, but in 1832 his remains were taken up and deposited in Ashgrove church-yard, with funeral ceremonies, and an address by John N. Maffitt. In 1866, the centenary year of American Methodism, his remains were transferred, by order of the Troy Conference, to the Woodland Cemetery, Cambridge, Washington County, N. Y., with impressive services, conducted by bishop James and the Rev. S. D. Brown. See a good sketch of his life by Saxe, *Ladies' Repository*, May, 1859; also Bangs, *History of the Methodist Episcopal Church*, vol. i; Stevens, *Memorials of Methodism*, vol. ii; Wakeley, *Heroes of Methodism*; Stevens, *History of the Methodist Episcopal Church*, vol. i; Wakeley, *Lost Chapters*.

**Emek.** See BETH-EMEK; KEZIZ.

**Emerald** (ἤμαρ, *no'phek*, of uncertain signif.; Sept. ἄνθραξ, N. T. and Apoc. *σμάραγδος*), a precious stone, named first in the second row on the breast-plate of the high-priest (Exod. xxviii, 18; xxxix, 11), imported to Tyre from Syria (Ezek. xxvii, 16), used as a seal or signet (Ecclus. xxxii, 6), as an ornament of clothing and bedding (Ezek. xxviii, 13; Judg. x, 21), and spoken of as one of the foundations of Jerusalem (Rev. xxi, 19; Tob. xiii, 16). The rainbow round the throne

is compared to emerald in Rev. iv, 3 (ὄμοιος ὄρασει σμαραγδίνῳ). The Sept., Josephus, and Jerus. Targum understand by it the *carbuncle*. This name (in Greek denoting a *live coal*) the ancients gave to several glowing red stones resembling live coals (Pliny, *Hist. Nat.* xxxii, 25; comp. Theophrast. *De Lapid.* 18), particularly rubies and garnets. See **CARBUNCLE**. The most valued of the carbuncles seems, however, to have been the Oriental garnet, a transparent red stone, with a violet shade, and strong vitreous lustre. It was engraved upon (Theophrast. 31), and was probably not so hard as the ruby, which, indeed, is the most beautiful and costly of the precious stones of a red color, but is so hard that it cannot easily be subjected to the graving-tool. The Hebrew *nophek*, in the breast-plate of the high-priest, was certainly an engraved stone; and there is no evidence that the ancients could engrave the ruby, although this has in modern times been accomplished (Rosenmüller, *Biblical Mineralogy*, p. 32, 33; Braunius, *De Vest. Sacerdot.* p. 523; Bellermann, *Ueber die Urin u. Thuninnim*, p. 43). See **BERYL**.

The *smaragdus* of the New Test. was the generic name of twelve varieties of gems, some of which were probably true emeralds, while others seem to have been rather stones of the prasius or jasper kind, and still others no more than colored crystals and spars from copper mines. The statues, etc., of emerald mentioned by several ancient authors appear to have been nothing more than rock crystals, or even colored glass (Hill on Theophrast. *de Lapid.* 41; Moore's *Anc. Mineral.* p. 150). See **GEM**.

The modern emerald is a species of *beryl*, of a beautiful green color, which occurs in primitive crystals, and is much valued for ornamental jewelry. The finest are obtained from Peru. The mines from which the ancients obtained emeralds are said to have existed in Egypt, near Mount Zabarah. (See the *Penney Cyclopaedia*, s. v. **BERYL**.)

**Em'erods.** See **HEMORRHOIDS**.

**Emerson, John S.**, a Congregational minister and missionary, was born at Chester, N. H., in 1802; graduated at Dartmouth College in 1826, and studied theology at Andover. He had studied with special reference to the missionary work, and went, under the auspices of the American Board, to the Sandwich Islands, and was appointed to Waialua, Oahu, where he spent nearly the whole of his missionary life, laboring with zeal and success. For four years he was professor in the Lahainaluna seminary, and while there he prepared (with other writers) an *English-Hawaiian Dictionary*. He died at Waialua March 28, 1867.—*American Annual Cyclopaedia*, vii, 559.

**Emerson, Ralph, D. D.**, a Congregational divine and scholar, was born at Hollis, N. H., August 18, 1787, and was educated at Yale College, where he graduated in 1811 with the highest honors of his class. After studying theology at Andover until 1814, he was tutor at Yale for a short time, and in 1816 became pastor at Norfolk, Conn. In 1827 he was chosen professor of Church history and pastoral theology at Andover, which office he held until 1854. He lived for five years at Newburyport, and then removed to Rockford, Illinois, where some of his children resided, and where he died, May 20, 1863. As a teacher, he maintained a high character during his long service at Andover.—*Congregational Quarterly*, July, 1863.

**Emery, Jacques André**, an eminent French Roman Catholic divine, was born at Gex, August 27, 1732, and studied in the Jesuits' College at Mâcon, and also at St. Sulpice, Paris. He was ordained in 1756; became professor of theology at Orleans 1759; and afterwards he held the chair of philosophy at Lyons; in 1776, superior of the seminary at Angers; 1784, head of the abbey of Boisgroland, and also head of the congregation of St. Sulpice. In 1789 he founded a seminary of his congregation at Baltimore, Maryland.

During the French Revolution he was imprisoned both at St. Pelagie and at the Conciergerie. In 1802 he resumed his place among the clergy of Paris, and devoted himself to the restoration of the scattered and broken congregation of St. Sulpice. He died April 18, 1811. Among his numerous writings are *L'Esprit de Leibnitz* (Lyons, 1772, 2 vols. 12mo; Paris, 1804, 2 vols. 8vo);—*Esprit de St. Thérèse* (3d edit. Avignon, 1825, 2 vols. 12mo).—Hoefler, *Nouv. Biogr. Générale*, xv, 943; Wetzer und Welte, *Kirchen-Lexikon*, xii, 315.

**Ē'mim** (Heb. *Eymim*', עִמִּים, *terrors*; Sept. Ὀυμαῖοι and Ὀυμείν; Auth. Vers. "Emims"), a numerous and warlike tribe of the ancient Canaanites, of gigantic stature, defeated by Chedorlaomer and his allies in the plain of Kiriathaim; they occupied, in the time of Abraham, the country east of the Jordan, afterwards possessed by the Moabites (Gen. xiv, 5; Deut. ii, 10, 11). See CANAAN. An ingenious writer in the *Journal of Sac. Lit.* (April, 1852, p. 55 sq.; Jan. 1853, p. 296) argues, but upon rather slender grounds, that their original title was *Shittim*, and identifies them with the *Chetta* so often referred to in the Egyptian inscriptions. It would appear, from a comparison of Gen. xiv, 5-7 with Deut. ii, 10-12, 20-23, that the whole country east of Jordan was, in primitive times, held by a race of giants, all probably of the same stock, comprehending the Rephaim on the north, next the Zuzim, after them the Emin, and then the Horim on the south; and that afterwards the kingdom of Bashan embraced the territories of the first; the country of the Ammonites, the second; that of the Moabites, the third; while Edom took in the mountains of the Horim. The whole of them were attacked and pillaged by the Eastern kings who destroyed Sodom and Gomorrah. See REPHAIM. The Emin were related to the Anakim, and were generally called by the same name; but their conquerors, the Moabites, termed them Emin—that is, "Terrible men" (Deut. ii, 11)—most probably on account of their fierce aspect. See ANAKIM.

**Eminence**, a title of the Romish cardinals, first given to them by Urban VIII. to endow them with a rank equal to that of the spiritual princes of Europe, and of the grand masters of the knights of St. John and of Malta. See CARDINALS.

**Emlyn**, ΤΙΜΟΛΑΣ, an English Nonconformist theologian, was born May 27, 1663, at Stamford, in Lincolnshire; made chaplain 1683 by the countess of Donegal. In 1691 he became assistant to Mr. Boyce in the congregation of Nonconformists in Wood Street, Dublin. Having imbibed and preached Arian doctrines, he was deprived of his functions, and fined and imprisoned for two years. Restored to liberty, he continued to preach and to write in favor of Arianism until his death, July 30, 1743. His *Works* were collected and published in London, 1746 (3 vols. 8vo). Waterland notices Emlyn's writings frequently (see the Index to his works, 6 vols. 8vo). See also DORNER, *Person of Christ* (Edinb. transl.), div. ii, vol. iii, 357.

**Emman'uél** (Ἐμμανουήλ), a Græcized form (Matt. i, 23) of the name IMMANUEL (q. v.).

**Em'maus** (Ἐμμαούε, prob. from עִמְמַו, *hot baths*, see Gen. xxxvi, 24), the name of three places in Palestine.

1. A village (κώμη) 60 stadia (A. V. "furlongs") or 7½ miles from Jerusalem, noted for our Lord's interview with two disciples on the day of his resurrection (Luke xxiv, 13). The same place is mentioned by Josephus (*War*, vii, 6, 6), and placed at the same distance from Jerusalem, in stating that Vespasian left 800 soldiers in Judea, to whom he gave the village of *Ammis* (Ἐμμαούε). The direction, however, is not given in either passage. Eusebius and Jerome (*Onomast.* s. v. Ἐμμαούε, Emmaus) hold that it is identical with *Nicopolis* [see No. 2, below]; and they were followed by all geographers down to the commencement

of the 14th century (Reland, *Palest.* p. 758). Then, for some reason, it began to be supposed that the site of Emmaus was at the little village of *Kubeibeh*, about 3 miles W. of Neby Samwil, the eminence N.W. of Jerusalem (Maundeville, in *Early Travels in Palestine*, p. 175; Ludolph, de Suchem, *Itiner.*; Quaresmius, ii, 719; Robinson, *Bib. Res.* iii, 66, note). Mr. Williams regards *Kariet el-Enab* as the true location (*Journal of Philology*, iv, 26), and Thomson inclines to the same position (*Land and Book*, ii, 308); but this view has little to recommend it, and the locality is otherwise appropriated. See KILJATIS-JEARIM. Schwarz thinks it different from Nicopolis, and that it is mentioned in the Talmud as *Barur Chayil* (בְּרֻר חַיִּיל, i. e. *chosen of the army*) or *Gibbor Chayil* (גִּבּוֹר חַיִּיל, i. e. *heroes of the army*, as being occupied by Roman veterans), a name that he finds in "some ruins which the Arabs call *Barbariā*, S. of Saris, 7½ Eng. miles from Jerusalem" (*Palest.* p. 117, 118); but no such name appears on Van de Velde's *Map* (which lays down Saris at 7 miles N. of W. from Jerusalem). In this uncertainty, the monkish identification with el-Kubeibeh ("the little dome") may for the present be acquiesced in. This corresponds sufficiently in distance from Jerusalem (Raumer, *Paläst.* p. 169), being 7500 paces (Cotovicus, p. 315), or 2½ hours to the N.W. (Van de Velde, *Memoir*, p. 309); and containing the ruins of a convent and church (Tobler, *Topograph. von Jerus.* ii, 540), although Dr. Robinson describes it (*Bib. Res.* ii, 394) as "a village built up by the government of Gaza on a stony, barren hill, without anything to mark it particularly as an ancient site." On the evangelical incident at this place there are treatises in Latin by Harenberg (in his *Olia Gandersh.* p. 41-60); Waleh (Jen. 1754). Zschokke (*Das neueste. Emmaus beleuchtet*, Schaffh, 1865) argues at length in favor of the modern traditional site; and the chief building on the spot, known as the "castrum Arnoldi," has lately been bought by some zealous Catholics as a "holy place" (*Bibliotheca Saera*, July, 1866, p. 517).

2. EMMAUS (Ἐμμαούε, 1 Macc. iii, 40, etc.; Ἀμμαούε, Josephus, *War*, ii, 20, 4) or NICOPOLIS, a town in the plain of Philistia, at the foot of the mountains of Judah (Jerome, in *Dan.* viii), 22 Roman miles from Jerusalem, and 10 from Lydda (*Itin. Hieros.* ed. Hessel, p. 600; Reland, *Palest.* p. 309). The name does not occur in the O. T.; but the town rose to importance during the later history of the Jews, and was a place of note in the wars of the Asmonæans. It was fortified by Bacehides, the general of Antiochus Epiphanes, when he was engaged in the war with Jonathan Maccabæus (Josephus, *Ant.* xiii, 1, 3; 1 Macc. ix, 50). It was in the plain beside this city that Judas Maccabæus so signally defeated the Syrians with a mere handful of men, as related in 1 Macc. iii, 57; iv, 3; ix, 50. Under the Romans, Emmaus became the capital of a topharchy (Josephus, *War*, iii, 3, 5; Pliny, v, 14). It was burned by the Roman general Varus about A.D. 4. In the 3d century (about A.D. 220) it was rebuilt through the exertions of Julius Africanus, the well-known Christian writer, and then received the name *Nicopolis*. Eusebius and Jerome frequently refer to it in defining the positions of neighboring towns and villages (*Chron. Pas.* ad A.C. 223; Reland, p. 759). Early writers mention a fountain at Emmaus, famous far and wide for its healing virtues (Sozomen, *Hist. Eccl.* v, 21); the cause of this Theophanes ascribes to the fact that our Lord on one occasion washed his feet in it (*Chron.* p. 41). The Crusaders still called it Nicopolis, but confounded it with a small fortress farther south, on the Jerusalem road, now called Iatrôn (Will. Tyr. *Hist.* vii, 24). A small, miserable village called *Ammis* still occupies the site of the ancient city. It stands on the western declivity of a low, rocky hill commanding the plain, and contains the ruins of an old church a little south of the village, also two copi-

ous fountains, one of which is doubtless the ancient medicinal spring (Robinson, *Researches*, ii, 363; *Later Res.* p. 146, 147; Thomson, *Land and Book*, ii, 290).

Dr. Robinson has recently revived the old theory that the Emmaus of Luke is identical with Nicopolis, and has supported it with his wonted learning, but not with his wonted conclusiveness (*Bib. Res.* iii, 65, 66; *Later Res.* p. 148). He endeavors to cast doubts on the accuracy of the reading *Ἐμμαύρα* in Luke xxiv, 13, because several uncial MSS. and a few unimportant cursive MSS. insert *ἱκατόν*, thus making the distance 160 stadia, which would nearly correspond to the distance of Nicopolis. But the best MSS. have not this word, and the best critics regard it as an interpolation. There is a strong probability that some copyist who was acquainted with the city, but not the village of Emmaus, tried thus to reconcile Scripture with his ideas of geography. The opinions of Eusebius, Jerome, and their followers, on a point such as this, are not of very great authority. When the *name* of any noted place agreed with one in the Bible they were not always careful to see whether the *position* corresponded in like manner. Emmaus-Nicopolis being a noted city in their day, they were led somewhat rashly to confound it with the Emmaus of the Gospel. The circumstances of the narrative are plainly opposed to the identity. The two disciples, having journeyed from Jerusalem to Emmaus in part of a day (Luke xxiv, 28, 29), left the latter again after the evening meal, and reached Jerusalem before it was very late (*ver.* 33, 42, 43). Now, if we take into account the distance, and the nature of the road, leading up a steep and difficult mountain, we must admit that such a journey could not be accomplished in less than from six to seven hours, so that they could not have arrived in Jerusalem till long past midnight. This fact seems conclusive against the identity of Nicopolis and the Emmaus of Luke (Reland, *Palæst.* p. 427 sq.; Van de Velde, *Memoir*, p. 309).—Smith, s. v.

3. The name Emmaus, or Ammaus (*Ἀμμαούς*), was also borne by a village of Galilee close to Tiberias; probably the ancient *ἩΜΜΑΥΗ* (q. v.), i. e. hot springs—of which name Emmaus was but a corruption. The hot springs still remained in the time of Josephus, and are mentioned by him as giving name to the place (*War.* iv, 1, 3; *Ant.* xviii, 2, 3).

**Em'mer** (*Ἐμμέρ*), given (1 Esdr. ix, 21) as the name of one of the priests whose "sons" had married foreign wives after the exile, in place of the *EMMER* (q. v.) of the Heb. text (Ezra x, 20).

**Emmeran** or **Emmeram**, a bishop of Poitiers in the 7th century. He left his see for the purpose of missionary labors in Hungary, but is said to have stopped in Bavaria three years, at the request of duke Theodo, to purify the Christianity of that duchy, where it was sadly mixed with paganism. After this he continued his journey to Rome, and was waylaid and murdered by a son of the duke (Sept. 22, 652), because the daughter of the latter, Uta, claimed to have been dishonored by Emmeran. After his death, a clergyman, Wulfaich by name, maintained the innocence of Emmeran, saying that the latter, shortly before his death, had told him that, in order to help Uta, he had allowed her to name him as seducer, though the real culprit was Sieghart, the son of a judge. This statement of Wulfaich is said to have induced Theodo to bury him with great honors, and to exile his son to Hungary. Emmeran was soon venerated as a saint, and became one of the patron saints of the city and diocese of Ratibon. He is commemorated in the Church of Rome on the 22d of September. On pictures he is represented as a bishop with a ladder. The accounts of Emmeran are very confused and conflicting; the best one is given by Canisius, *Lectiones Antiquæ*, iii, 1. See Neander, *Ch. Hist.* iii, 39; Herzog, *Real-Encyclop.* iii, 779; Wetzler u. Welte, *Kirchen-Lex.* iii, 558.

**Emmons**, NATHANAEL, D.D., one of the founders of a new school in Calvinistic theology, was born April 20 (O. S.), 1745, at East Haddam, Conn., a town which was also the birthplace of the missionary brothers David and John Brainard, of President Edward Dorr Griffin and his brother George D. Griffin, Esq., of the jurist Jeremiah Gates Brainard and the poet James Brainard Taylor. He was the sixth son, and the twelfth and youngest child of his parents. He entered Yale College in 1763, and was graduated with honor in 1767. Among his classmates were Gov. John Treadwell, the poet John Trumbull, Professor Samuel Wales, and Dr. Joseph Lyman, who, as long as they lived, exhibited a high degree of reverence for Dr. Emmons. He studied theology first with Rev. Nathan Strong, of Coventry, Conn., and afterwards with Rev. Dr. John Smalley, of Berlin, Conn., a divine who had been a pupil of Dr. Joseph Bellamy, and who exerted more influence than perhaps any other man in shaping the theological opinions of young Emmons.—In 1769 Emmons was approbated as a preacher, and not on the 20th of April, 1773, was ordained pastor of the Congregational Church in Franklin, Mass. He remained sole pastor of this church fifty-four years, and an active member of it sixty-seven years and five months. Among the members of the council which ordained him were his two special friends, Rev. Dr. Hopkins, of Newport, R. L., and Rev. Dr. Hart, of Preston, Conn., a son-in-law of Dr. Bellamy. During his active pastorate at Franklin he was favored with three revivals of religion, one in 1784, one in 1794, and one in 1808-9. In the first of these revivals about seventy persons, in the second about thirty, and in the third about forty were thought to have consecrated themselves to Christ. One of his aphorisms was, "The seed which a faithful laborer sows is apt to come up when he retires from the field;" and as soon as Dr. Emmons was relieved of his sole pastorate at Franklin, he was gladdened by a fourth revival, in which thirty-six persons were added to his church, and after nine or ten years he rejoiced in a fifth ingathering of the fruits which he had planted. He lived to see nearly four hundred of his parishioners profess their faith in Christ. One of them, Rev. Dr. Blake, has recorded: "Hardly a case of defection from the truth has ever occurred among those who were turned unto God under Dr. Emmons's ministry." His examinations of candidates for church-membership were very rigid.—A large part of his influence on the churches has been exerted through his theological pupils. Between eighty-six and a hundred young men were guided by him in their studies preparatory to the Christian ministry. Of these pupils several became useful as professors in our colleges and theological seminaries; many, as sound and strong preachers. Forty-six of them are noticed in the biographical dictionaries of eminent men. His impress upon them was decided and permanent. They were often called Emmonites.—Although he was an adept in metaphysical abstractions, yet he aimed to be a practical man, not only in his influence on his pupils, but also in the general affairs of the Church and the State. He was the first president, and a father, if not the father of the Massachusetts Missionary Society, which was the parent of many philanthropic institutions. He was also one of the original editors of the *Massachusetts Missionary Magazine*, which was the germ of the present *Missionary Herald*. He was among the foremost in starting various trains of influence which have now become parts of our history. When the masonic fraternity was most popular, he was a zealous anti-mason. When anti-slavery was most generally denounced, he was an active abolitionist. It was often his lot to be an advocate of the weaker party. He was a decided Federalist in politics, and produced a great excitement by some of his political writings. He seldom visited his parishioners, still he was remarkable for his knowledge of their

secular as well as religious affairs. He was a man of authority in his parish, faithful, often stern, yet beloved.—It is as an author, however, that he has exerted his greatest influence on the churches. He published during his life more than seven thousand copies of nearly two hundred sermons, besides four elaborate dissertations and more than a hundred essays for the magazines of his day. He must have preached nearly or quite six thousand times, and at his death a part only of his discourses were collected and published in six octavo volumes; to these a seventh volume was afterwards added. At a still subsequent period a new and enlarged edition of his sermons was published in six volumes. The first edition of his works was introduced with a memoir by his son-in-law, Rev. Jacob Ide, D.D., of Medway, Mass.; the second edition with a memoir by E. A. Park, of Andover, Mass.—He began to study in 1762; he ceased to preach in 1827; during these sixty-five years he was an earnest, patient, and singularly methodical applicant to books. During ten of the years which followed his resignation of his active pastorate he continued to be an assiduous reader, although he relaxed his habits of intense energetic study. It may be safely affirmed, then, that he devoted seventy-five years to the perusal of books, the meditation on their contents, and the writing on themes suggested by them. He was accustomed to spend ten, twelve, or fourteen hours daily in his room with his book or pen in hand. He had a place for everything, and kept everything in its place. He was temperate in his diet, regular in all his habits, and, although he took no physical exercise, he enjoyed uninterrupted health during his long and laborious life. He was distinguished for his punctuality, precision, definiteness, and sharpness of mind, keen analysis, self-consistency, wit, frankness, honesty, profound reverence for the truth. He was tenacious of old usages, and went so far as to continue to wear the antique dress, even the three-cornered hat, as long as he appeared in public. He was an original thinker, and formed his theological system with rare independence of mind. He coincided in opinion with Dr. Samuel Hopkins, of Newport, more nearly than with any preceding divine. A sketch of his theological system will be given in the subsequent notice of Dr. Hopkins. It may be here remarked, however, that he considered himself not a *high*, nor a *low*, but a *consistent* Calvinist; and, so far as his speculations were novel, they were mainly designed to make the Genexan scheme consistent with itself. On one Sabbath, for instance, he would use so bold language in advocating the doctrine of decrees as might induce some to call him a Fatalist; and on a following Sabbath he would use so bold language in advocating the doctrine of free-will as might induce some to call him a Pelagian; and on a third Sabbath he would employ his ingenuity in reconciling his statements on the agency of God with his statements on the free agency of man. This ingenuity in harmonizing such views as are often pronounced irreconcilable, was a main source of the interest excited in him.—Dr. Emmons died on the 23d of September, 1840, at the age of ninety-five years and five months. He retained his faculties to a surprising degree until his death, and few men have ever left the world with a more unflinching and solid faith in Christ.—In 1775 he was married to his first wife, who, with her two children, died in 1778. In 1779 he was married to his second wife, by whom he had five children, two of whom survived him. She was the step-daughter of Rev. Dr. Samuel Hopkins, of Hadley, Mass., and thus he became the brother-in-law of Rev. Dr. Spring, of Newburyport, Mass., Rev. Dr. Austin, president of Burlington College, Rev. Leonard Worcester, and Rev. Mr. Riddell, four strong Hopkinsian divines. In 1831, when he was eighty-six years of age, he was married to his third wife, the widow of his former friend, Rev. Mr. Mills, of Sutton, Mass. (E. A. P.)

**Em'mor** ('Εμμόρ v. r. 'Εμμόρ), a Græcized form (Acts vii, 16) of the name of ΗΑΜΟΡ (q. v.), the father of Shechem (Gen. xxxiv, 2).

**Emperor** (Lat. *imperator, general*), a title common (in its Lat. form) to all governors who had paramount jurisdiction within a given province (Smith, *Dict. of Class. Antiq.* s. v. Imperium), but technically assumed as a prænomen first by Julius Cæsar (Sueton. *Jul.* 76), as affecting supreme power, and historically attributed to his successors, the heads of the so-styled ROMAN EMPIRE (q. v.). They were also designated as CÆSAR (q. v.). We are here chiefly concerned with them as they came in contact with the Christian religion in the character of persecutors or patrons. See PERSECUTION. (See Baldwin, *Edicta vet. principum Roman. de Christianis*, Hal. 1727 [also in Heineccii *Jurispr. Rom. i.*, 374 sq.]; Crause, *De Romanorum imperatoribus hæreticis*, Ziz. 1674; Hebenstreit, *De primis Christianis imperatoribus*, Jen. 1702; Heineccius, *De ministris Cæsarum Christianis*, Hal. 1712; also Hirt, *De imperatorum ante Constant. erga Christianos favore*, Jen. 1758; Koepke, *De statu Christianorum sub imp. Berol.* 1828).

The following is a complete list of the Roman emperors, with their respective dates of accession. See each name of ecclesiastical interest in its alphabetical place.

**Emory, John, D.D.**, a bishop of the Methodist Episcopal Church, was born in Queen Anne County, Maryland, April 11, 1789. After completing his academical education at Washington College, he studied law, and was admitted to the bar at nineteen years of age. His great ability was soon manifest; he came rapidly into practice, and had every prospect of early success. But he had passed through a decided religious experience before his admission to the bar, and soon after decided, in opposition to the will of his father, to enter the ministry. In 1810 he was received on trial in the Philadelphia Conference of the Methodist Episcopal Church. He soon established a reputation for pre-eminence in all the qualities of a true Christian minister. From 1813 to 1824 he filled the most important pastoral stations in the Methodist Connection in America, his appointments being as follows: 1811, Cambridge Circuit; 1812, Talbot Circuit; 1813-14, Philadelphia; 1815, Wilmington; 1816-17, Union Church, Philadelphia; 1818-19, Washington; 1820-21, Annapolis; 1822, Hagerstown; 1823, Baltimore. In 1816 he was elected to the General Conference, and he was a member of every subsequent General Conference until his death, except that of 1824. In 1820 he was sent as a delegate from the American to the British Conference, and discharged the delicate duties of his mission to the entire satisfaction of the churches. From 1824 to 1832 he was book-agent and editor for the Methodist Episcopal Church at New York. In this post his rare combination of intellectual power and culture with business habits was pre-eminently displayed. To none of the eminent men who have held this office is the Methodist Book Concern more indebted for its present greatness than to Dr. Emory. In the language of Bishop Waugh, "The two great objects which Dr. Emory aimed to accomplish were, first, the extinguishment of the debts due from the concern, and, second, the actual sale of the stock on hand, and especially that part of it which was daily depreciating, because of the injuries which were constantly being sustained by it, in the scattered and exposed state in which most of it was found. The ability, skill, diligence, and perseverance which he displayed in the measures devised by him for the accomplishment of these objects have seldom been equaled, and perhaps never surpassed by the most practiced business man. His success was complete. Before the meeting of the General Conference he had canceled all the obligations of the institution which had been so opportunely intrusted to his supervision. He had greatly enlarged the annual dividends to an increased number of conferences. He had purchased several lots of ground for a more enlarged and eligible location of the establishment, and had erected a large four story brick building as a part of the improvements intended to be put on them, for the whole of which he had paid. It was his high honor, and also his enviable satisfaction, to report to the General Conference, for the first time, that its Book Concern was no longer in debt." He originated the "Publishing Fund" and "The Methodist Quarterly Review," and abolished entirely the sale of books on commission.

In 1832 he was elected a bishop of the Methodist Episcopal Church, and entered upon his duties at once, not only by attending the annual Conferences, but also by general attention to the interests of the Church. He was especially active with regard to education, and had a large share in the organization of Dickinson College. In addition to this, he drew up the outline of a plan for an education society in the Methodist Episcopal Church, which he designed to aid ministers and others in educating their sons. Soon after his election

to the episcopacy Dr. Emory devised a course of study for candidates for deacons' and elders' orders, in which, with his usual discretion, he did not hazard everything by attempting too much. The Troy Conference of 1835 was the last which he attended. On the 16th of December in that year he was thrown from his carriage, about two miles from his own house (Reisterstown, Md.), at seven o'clock A.M., and at half past seven in the evening he died.

Bishop Emory was a man of great talent and large cultivation. As a scholar, he was accurate and profound; as a preacher, he was clear and convincing; as an administrative officer, he hardly had a superior in any church. As a controversial writer, he was distinguished for logical directness and for fairness to his adversaries. In 1817 he published two pamphlets in reply to bishop White's *Objections against Personal Assurance by the Holy Spirit*; and in 1818, another, entitled *The Divinity of Christ vindicated against the Cavils of Mr. John Wright*. The period from 1818 to 1830 was one of great excitement in the Methodist Episcopal Church on various points of Church polity, and in all the controversy Dr. Emory bore a distinguished part. A large party wished to have the office of presiding elder made elective; he fell into the ranks of that party, and, at the General Conference of 1820, he opposed vigorously a theory which gave the bishops a right to veto the acts of the General Conference. In the later conferences as to lay representation he was the principal writer, publishing, in 1824, *The Defence of our Fathers*, in reply to A. McCaine, a very vigorous and powerfully written work. After his death there appeared from his pen *The Episcopal Controversy Reviewed* (New York, 1838, 8vo), edited by his son, Robert Emory, from an unpublished manuscript; it is a luminous sketch, in reply to bishop Onderdonk's *Episcopacy tested by Scripture*. Most of the original articles in the first two volumes of the *Methodist Quarterly Review* were written by him.—*Life of Bishop Emory*, by his eldest son (N. Y. 1840, 8vo); M'Clintock, in *Methodist Quarterly Review*, 1842, p. 62 sq.; Sprague, *Annals*, vii, 486; Stevens, *History of the Methodist Episcopal Church*, vol. iv.

**Emory, Robert, D.D.**, son of the preceding, an eminent Methodist minister and scholar, was born in Philadelphia, July 29, 1814. His early education was superintended by his father. In 1827 he entered Columbia College, New York, where he graduated in 1831 with the highest honors and medals of his class. He then entered upon the study of law, first in the law school of Yale College, and afterwards in the office of the Hon. Reverdy Johnson, of Baltimore. In 1834 he was elected professor of ancient languages at Dickinson College, Carlisle, and entered upon his duties there with great zeal. In 1839 he was admitted on trial in the Baltimore Conference of the Methodist Episcopal Church; in 1841 he was appointed to the Baltimore city station; and in 1842 he was appointed acting president of Dickinson College, during the absence of the president (Dr. Durbin). In 1844 he was appointed presiding elder of the Carlisle District; and in 1845 he was made president of Dickinson College. In the same year the degree of D.D. was conferred upon him by Columbia College. In 1847 he attended the session of the Evangelical Alliance held at London, and few of the delegates made a greater impression upon the body. His health showed signs of failure during this year, and he spent the winter following in the West Indies. But he continued to decline, and on his return homeward he died in Baltimore, May 18, 1848. Dr. Emory was one of those rare men in whom the human faculties, both moral and intellectual, seem to approach perfection, and to reach almost complete harmony of action. His classical scholarship was thorough and accurate; his mind was at once logical and comprehensive, and his general culture was wide and generous. His religious experience was, in many re-

pects, similar to that of President Edwards, and ripened into similar fullness and serenity. As a preacher he was luminous, earnest, and successful. As a college officer he was seldom rivaled. "His power of government was unsurpassed; he seemed born to command. In him prudence and independence met to form that rare combination so essential to one who rules. This remark finds its illustration and proof in his government of the college, to whose interests he devoted so much of his brief earthly life. While he shrunk from no responsibility of his position, he was still careful to maintain that position by devising the best means to meet responsibility. Though many felt the weight of the sceptre in his hand, yet the conviction that it was wielded by a strong man, and in the fear of the Lord, conciliated esteem. As president of the college, as in every other position, he rose rapidly, both before the public and in the college; and the last year in which his name appeared in connection with that office was the most prosperous in the history of the institution. The students honored him even to reverence, and regarded him as standing on a moral and intellectual eminence toward which the indolent and unworthy must not even look, and to which the noblest and best among them ought eagerly to aspire." In 1841 he published *A Life of the Rev. John Emory, D.D.* (N. Y. 8vo); in 1843, an elaborate *History of the Discipline of the Methodist Episcopal Church* (N. Y. 12mo). He left unfinished an *Analysis of Butler's Analogy*, which was completed by the Rev. G. R. Crooks, D.D. (N. Y. Harpers, 1856, 8vo), and which is the best analysis of the *Analogy* that has ever appeared.—*Minutes of Conferences*, 1849; Sprague, *Annals*, vii, 828.

**Emotion** (*emoreo*, to move out) "is often used as synonymous with feeling. Strictly taken, it means 'a state of feeling which, while it does not spring directly from an affection of body, manifests its existence and character by some sensible effect upon the body.' An *emotion* differs from a *sensation* by its not originating in a state of body; and from a *cognition*, by its being pleasurable or painful. Emotions, like other states of feeling, imply knowledge. Something beautiful or deformed, sublime or ridiculous, is known and contemplated; and on the contemplation springs up the appropriate feeling, followed by the characteristic expression of countenance, or attitude, or manner. In themselves considered, emotions can scarcely be called springs of action. 'The feelings of beauty, grandeur, and whatever else is comprehended under the name of taste, do not lead to action, but terminate in delightful contemplation, which constitutes the essential distinction between them and the moral sentiments, to which, in some points of view, they may doubtless be likened' (Mackintosh, *Dissert.* p. 238). Emotions tend rather, while they last, to fix attention on the objects or occurrences which have excited them. In many instances, however, *emotions* are succeeded by desires to obtain possession of the objects which awaken them, or to remove ourselves from the presence of such objects. When an *emotion* is thus succeeded by some degree of desire, it forms, according to Lord Kames, a *passion*, and becomes, according to its nature, a powerful and permanent spring of action. Emotions, then, are awakened through the medium of the intellect, and are varied and modified by the conception we form of the objects to which they refer. Emotions manifest their existence and character by sensible effects upon the body. Emotions, in themselves and by themselves, lead to quiescence and contemplation rather than activity; but they combine with springs of action, and give to them a character and a coloring. What is said to be done from surprise or shame has its proper spring—the surprise or shame being concomitant" (Dr. Chalmers, *Sketches of Mental and Moral Philosophy*, p. 88).—Fleming, *Vocabulary of Philosophy*, s. v.

**Empedocles**, an ancient philosopher of Agrigen-

tum, "distinguished himself by his knowledge of natural history and medicine, and his talents for philosophical poetry. It is generally believed that he perished, in the crater of *Ætna*. Some suppose him to have been a disciple of Pythagoras or Archytas (Diog. Laert. viii, 54 sq.); others, of Parmenides. He cannot have been an immediate scholar of the first, inasmuch as Aristotle (*Met.* i, 3) represents him as contemporary with, but younger than Anaxagoras, and because he appears to have been the master of Gorgias. His philosophy, which he described in a didactic poem, of which only fragments have come down to us, combined the elements of various systems, most nearly approaching that of Pythagoras and Heraclitus, but differing from the latter, principally, 1. Inasmuch as Empedocles more expressly recognises four elements, earth, water, air, and fire: these elements (compare his system, in this respect, with that of Anaxagoras) he affirmed not to be *simple* in their nature, and assigned the most important place to fire. 2. Besides the principle of concord (*φιλία*), opposed to that of discord (*νῆκος*) (the one being the source of union and good, the other of their opposites), he admitted into his system *necessity* also, to explain existing phenomena. To the first of these principles he attributed the original composition of the elements. The material world (*σφαῖρος, πῦμα*) he believed, as a whole, to be divine, but in the *sublunary* portion of it he detected a considerable admixture of evil and imperfection. He taught that at some future day all things must again sink into chaos. He advanced a subtle and scarcely intelligible theory of the active and passive affections of things (comp. Plato, *Menon*. ed. Steph. p. 76. C. D.; Arist. *De Gener. et Corr.* i, 8; *Fragm. ap. Sturz.* v, 117), and drew a distinction between the world as presented to our senses (*κόσμος αἰσθητός*), and that which he presumed to be the type of it, the intellectual world (*κόσμος νοητός*). He looked for the principle of life in fire, admitting, at the same time, the existence of a Divine Being pervading the universe. From this superior intelligence he believed the *dæmones* to emanate, to whose nature the human soul is allied. Man is a fallen *dæmon*. There will be a return to unity, a transmigration of souls, and a change of forms. The soul he defined to consist in a combination of the four elements (because cognition depends upon the similarity of the subject and object), and its seat he pronounced to be principally the blood" (Tennemann, *Manual Hist. Phil.* § 106). Lewes differs from all other historians respecting the place occupied by Empedocles, making his system to include elements from the Pythagorean, Eleatic, Heraclitic, and Anaxagorean systems (*History of Philosophy*, Lond. 1867, 2 vols. 8vo, i, 89 sq.). See Sturz, *Empedocles Agrigentinus, De Vita et Philosophiæ ejus exposit.* *Carminum Reliquias ex Antiquis Scripturis collectas, recensitas, illustravit Fr. Guil. Sturz* (Lips. 1865, 8vo); J. G. Neumann *Prog. de Empedocle Philosopho* (Viteb. 1750, fol.); Lomnatzsch, *Die Weisheit des Emped.* (Berlin, 1830); Stein, *Emped. Agrigent. fragment.* (Bonn, 1852); Winnefeld, *Die Philosophie des Emped.* (Rastadt, 1862); Steinhart, in Ersch und Gruber, *Allgem. Encyclop.* s. v. Empedocles.

**Empiricism, Empirism, Empiric.** Empiricism, in its primary meaning, signifies the method or habit of judging from observation or trial; and an empiric is one who forms his conclusions in this manner. Empiricism may thus be employed to denote either inductive reasoning, in which observation and experiment furnish the data for the conclusions drawn by the reason, or that unscientific mode of procedure which accepts the phenomena as they are observed, without analysis or accurate determination. In the former case the term is used in a good sense, and is equivalent to experimental science; in the latter it is used in a bad sense, and this is its ordinary employment.

The relation of experience to science, and to art

or practice, is precisely exhibited by Aristotle in the opening chapter of his *Metaphysics*; but the peculiar terseness of the Aristotelian phraseology renders expansion and restatement of his positions necessary, in order to adapt them to modern views.

Art, or systematic action, is founded upon observation, but upon observation reduced to theory, or to consonance with theory. That is to say, observation furnishes the facts, but they must be co-ordinated and interpreted in order to constitute valid knowledge (science), or a reliable rule of action (art). If the observations be indistinct or perplexed, or if they be not sufficiently numerous to establish a general conclusion, or if a general conclusion be drawn prematurely, the induction is deceptive, and obnoxious to the censures passed by Lord Bacon upon the simple enumeration of examples (*Nov. Org.* i, aph. lxxix, cv; *Instaur. S. l. Int.* tom. ix, p. 146; *Dist. Op.* p. 167, ed. Montagu). The true nature of the induction required is briefly stated by Campanella: "Inductio est argumentatio a partibus sufficienter enumeratis ad sum totum universale." What is a sufficient exposition of the particulars may be learned from the *Second Book of the Novum Organon*, or more satisfactorily from Whewell's *Philosophy of the Inductive Sciences*, Comte's *Political Philosophy*, and Mill's *Logic*.

When the observations are sufficiently multiplied and varied, and when they have been analyzed and sifted so as to eliminate all illusions, and everything which does not bear distinctly upon the point under consideration, then they justify a definite conclusion. This is the "*multiplicatio et vividitas instantiarum*" so strenuously urged by Lord Bacon. But, even in this case, the general experience authorizes a universal conclusion only by assuming a law latent under each of the concordant instances by which all are governed. In establishing or accepting the conclusion there is need for the introduction of a purely rational element—if none other, at least the principle that nature acts uniformly, and that what is true of all observed instances is true of all similar phenomena. Thus theory is needed to permit and to complete induction, or inference from observation.

This accumulation, collation, and appreciation of instances is disregarded by undisciplined and impatient minds. A few recurrences loosely noted, or a single undigested observation, is made the foundation for a universal conclusion, without reference to any rational principle. The designation derived from experience and inquiry is still retained, but, in consequence of want of validity in the process, and of method, reliability, and rationality in the corresponding practice, it receives an unfavorable import, and empiricism commonly denotes that mode of reasoning which is based upon hasty and inadequate observation, and which neglects scientific principle and scientific precision.

This exposition of the derivation and deflection of the meaning is illustrated and confirmed by the history of the term. In the middle of the 3d century before Christ a revolution in medical practice was inaugurated by Philinus of Cos and Serapion of Alexandria. They revolted against the maxims of the Dogmatists, and repudiated the course pursued by the Methodists of treating all cases of disease according to fixed theoretical rules. They observed the symptoms of disorders, and the specific effects of remedial agents; they considered the idiosyncrasies of their patients as affected by climates and localities; and they employed the therapeutics which had been found effectual in analogous instances. They recognised three kinds of experience: chance, experiment, and imitation, but relied principally upon the last, which is a sort of blind observation. They thus introduced into medical practice the whole train of inductive reasoning, and were in consequence designated Empirics. The school flourished for nearly five centuries, and its duration attests its merit and success. It had started, however, with

sundry hazardous hypotheses, such as the doctrine of Homeopathy, and in its best period had trusted mainly to disguised analogies, which were usually obscure, and too often delusive. The Empirics rejected formal science; they contemned theoretical views and rational deductions, and thus drifted into close approximation to the Sceptics. Their original doctrine was an extravagance in the manner of its assertion, but it was a wholesome reaction against a more perilous excess. With the succession of generations, however, their cardinal principle of depending exclusively on observation was pushed so far as to engender the wildest fantasies. Hence no confidence could be placed in their treatment of diseases. It was thus that the term Empiricism received the opprobrious signification which is habitually attached to it. The meaning of a word is perpetuated in the last perversion which it has received from popular use.

The name originating in this way in the schools of medicine was readily transferred to the corresponding procedure in other departments of knowledge. Empiricism is opposed to science in the same way that a paralogism is opposed to a syllogism: it is the abuse, or the imperfect use of a procedure which is valid when correctly pursued. It is confused observation developed into unreliable induction. But the distortion of the process, and the consequent degradation of the word denoting the process, evince the partial agreement between empiricism and scientific reasoning. It becomes, therefore, expedient to point out more explicitly the relation which observation and experience bear to theory, or philosophical reasoning.

Science is the systematic co-ordination of observed facts, and the exhibition of their dependence upon general principles. Observation collects particulars, which should be compared and tested, so as to eliminate all discrepancies and all accidental agreements, and to disentangle from the complex phenomena the single point of positive and habitual concordance. When this is adequately achieved, the regular association of the facts under consideration is established. This, however, provides only what Bacon designates *axiomata media*—those inductions which ascertain the character and direct connections of the phenomena. A further generalization is required; these intermediate axioms must be traced to precise laws. Such is the nature and procedure of strict inductive science, with which empiricism is more immediately contrasted, though it arose originally out of the antagonism to dogmatic deduction. The empiric disregards these careful comparisons and gradual approximations, and leaps at once from loosely-observed data, from casual coincidences, or from a few disconnected instances to a general conclusion. He has no principle to restrain him, no recognised law for his guidance. From the absence of all certainty, and the consequent liability to error, empiricism has come to denote rash and ignorant generalization leading to hazardous and unreasoning applications.

Another important point demands attention. Certain phenomena are so complex and so inapprehensible by the processes of rigid observation, comparison, and experiment, that they scarcely admit of rigorously scientific treatment. Moreover, from the want of opportunity for applying the methods of science, and from the multiplicity of concurrent, interacting, and irregularly varying influences involved in the production of the result, scientific induction and philosophical deduction fail to include or to exclude everything which should be embraced or rejected. The subject either does not yet admit of scientific treatment, but must be governed by the suggestions of unanalyzed experience, or there is a large discordance between the scientific conclusions and the observed facts. In these cases the indications of experience cannot be disregarded, and the procedure, to be adopted, must be in greater or less measure empirical. History, politics,

social organization, agriculture, and many of the applications of physical science to human requirements demand, in a greater or less degree, this subordination of scientific results to observed facts. But the insufficiency of the procedure should be recognised; for empiricism, even in its most favorable form, is tentative and problematical, because it is the renunciation of the guidance of the reason, and the acceptance of imperfect or imperfectly-digested observation for the prescriptions of ascertained and immutable law. Empiricism is available only in *consimili casu*; and, as this exact similitude can never be assured, but is always precarious, it is necessarily attended with insecurity. If the conditions or concomitants vary so as to modify the result, it is a blind leader of the blind. The only protection in changed circumstances, or under novel conditions, is a knowledge of the general principles which govern the facts, and this knowledge is obtained only from science, inductive or deductive. Theory and experience have distinct but associated functions: theory is the abstract rationale of the phenomena; experience is their indiscriminating representation: theory degenerates into rash inexperience when not checked by careful observation; experience runs into wild and pernicious fantasies when not illuminated by speculative discernment. The two must be combined and conciliated in order to afford any absolute confidence in the rectitude of our conclusions, and the procedure founded thereon. If they be separated, and to the extent to which they are separated, experience is valid only in matters of mere routine; theory or science is always required under novel combinations. Theory, unregulated by experience, is arbitrary and capricious as experience unenlightened by reason, and misleads hopelessly, because it never awakens any suspicion of the possibility of error. But theory, which systematizes the conclusions drawn from an adequate range and degree of observation, furnishes guidance under all changes of circumstance; while empiricism only misleads and betrays in every case when it is necessary to deviate in any respect from a procedure already adopted and approved.

Empiricism is thus at all times an irrational procedure, though it may furnish a practical rule within a very limited sphere. Theory may beguile, in consequence of its imperfect constitution or rash application, but is always requisite to insure the recognition of established law, and obedience to the immutable prescriptions of reason in the individual or in the order of creation. An empirical procedure may often be indispensable, but, when most necessary, it is provisional only. A theoretical procedure may be demanded before adequate experience has been acquired, but this must be confirmed or reformed by the observation of facts. It is only when theory is sustained by facts, and facts are explained by theory, that knowledge becomes entirely trustworthy. Many departments of practical knowledge are not yet, and may never be, capable of thorough scientific organization. In these we must continue to be guided by empirical conclusions; but they are received, not because they are sufficient, but because nothing better is attainable. Empiricism is, therefore, always inadequate, and usually deceptive. (G. F. II.)

**Ems Congress**, a meeting of plenipotentiaries of the archbishops of Mentz, Cologne, Treves, and Salzburg, held in the watering-place of Ems, in August, 1786, for the purpose of defining the rights belonging to bishops and archbishops, and of opposing the exorbitant demands of the papal nuncio. The agreement which was arrived at, and which consists of 23 articles, is called the Ems Punctuation. The archbishops of Germany, as well as the emperors, had long been dissatisfied with the endeavors made by the popes, under the pretext of securing the execution of the decrees of the Council of Trent, to steadily enlarge the rights of papal nuncios and legates in Germany at

the expense of the bishops. A serious conflict was brought on by the elector Karl Theodor of Bavaria, who, in order to supersede as much as possible the episcopal jurisdiction of other princes of the empire, such as the archbishops of Salzburg and Cologne, over his subjects, induced the Pope to appoint a papal nuncio at the court of Munich. The archbishop of Salzburg in 1785 requested the archbishop of Mentz, as primate of the German Catholic Church, to avert the new danger threatening the authority of the archbishops. The primate remonstrated in Rome, and his example was soon followed by the bishops of Eichstätt and Freising. But Pope Pius VI declared that the new nuncio in Munich, Zoglio, would be clothed with the same authority which had heretofore been exercised by the nuncio in Cologne. The archbishops of Mentz and Salzburg appealed to the emperor Joseph II for aid against this encroachment of the Pope upon their rights. The emperor replied, Oct. 12, 1785, that the Pope would at once be notified that the emperor would never allow an infringement upon the diocesan rights of the German bishops. Nevertheless, the new nuncio Zoglio made his appearance in Munich in March, 1786; informed all archbishops and bishops whose dioceses embraced part of Bavaria of his arrival; exercised all the prerogatives which the Pope claimed for his nuncios; and even appointed a sub-nuncio at Disseldorf. The archbishop of Cologne remonstrated against these proceedings to the emperor, and the latter ordered the elector Karl Theodor to forbid the nuncio the further exercise of functions which did not belong to him. At the same time, the archbishops of Cologne, Treves, Mentz, and Salzburg forbade their subjects to receive any orders from the nuncios of Munich and Cologne. In order to organize a combined resistance to the papal encroachments, the archbishop of Mentz invited the archbishops of Cologne, Treves, and Salzburg to send deputies to a congress to be held at Ems. The invitation was accepted, and accordingly the Ems congress met in August, 1786. It was composed of the assistant bishop Heimes, of Mentz, the official Beck, of Treves, the official Von Tautphæus, of Cologne, and the consistorial councillor Bönike, of Salzburg. These deputies, on the 25th of August, agreed upon the Ems Punctuation, the most important points of which are the following: 1. All those papal prerogatives and reservations which were unknown in the first centuries, but derived from the pseudo-Isidorian decretals, must now be abandoned. 2. The bishops, having received from Christ the power to bind and to loose, the persons living within their dioceses must not pass over their immediate ecclesiastical superiors in order to have recourse to Rome. No exemptions must any more be allowed except such as have been confirmed by the emperors. The members of monastic orders are forbidden to receive any orders from their generals, or any superiors living outside of Germany. 3. As the bishops have the power to grant dispensations, the so-called *facultates quinquennales* shall no longer be asked from the papal court; and the bulls, briefs, and rescripts of the popes, as well as all the declarations, rescripts, and orders of the Roman congregations, shall not be received in Germany without their express recognition by the bishops. 4. The nuncios shall have no ecclesiastical jurisdiction, but shall be merely ambassadors of the Pope.

The Punctuation, signed by the four archbishops, was sent to the emperor Joseph, who assured the archbishops of his assistance, but also declared, perhaps influenced by the nuncio Caprara at Vienna, that the execution would depend upon an agreement between the archbishop on the one hand, and the exempt, the suffragan bishops, and the government on the other. The papal party, in the mean while, endeavored to excite the jealousy of the bishops against the four archbishops, charging the latter with an intention of extending their rights at the expense of those of the

bishops. The archbishop of Mentz was in particular charged with a desire to establish a primate authority over all archbishops and bishops of Germany. Among the bishops who came forward to attack the Punctuation, those of Spire, Hildesheim, and Würzburg were prominent. Soon particular interests caused disagreement among the signers of the Punctuation. The archbishop of Mentz approached the Pope with a request to have baron von Dalberg appointed his coadjutor; the archbishop of Treves (1787) appealed to Rome for a renewal of the *facultates quinquennales*; and finally, in 1789, all the four archbishops declared that they desired a settlement of the controversy, and that they recognised the right of the Pope to send nuncios and to grant dispensations. The literature on the Congress and the Punctuation of Ems is very copious. The results of the congress were at once published in the work *Resultate des Ems Congresses* (Francf. 1787) [also in *Die neuesten Grundrissen der deutsch-kath. Kirchen-Verfassung*, Stuttgart, 1821]. The official reply of Rome is entitled *Responsio ad Metropolitanum Mogunt. Trevir. Colon. et Salisb. super Nuntiaturis* (Romæ, 1789). See also Neudecker, in Herzog, *Real-Encyclop.* iii, 784; Münch, *Gesch. des Ems Congresses*; Pacca (papal nuncio at Cologne), *Histor. Denkwürdigkeiten* (Augsburg, 1832); Stigloher, *Die Errichtung der päbstl. Nuntiatur in München und der Ems Congress* (Ratisbon, 1866). (A. J. S.)

**Emser**, HIERONYMUS, a Roman Catholic divine, and one of the most violent of Luther's opponents in the Reformation, was born at Ulm March 26, 1477. After having begun his studies at Tübingen, he went to continue them at Basle, where he applied himself to jurisprudence, theology, and Hebrew. He accompanied cardinal Raymond de Gurk, who had appointed him his chaplain and secretary, through Germany and Italy in 1500-1502. Some time after he became lecturer at Erfurt, which he quitted (1504) to reside at the University of Leipzig, where he taught canonical law. About the same time, George, duke of Saxony, took him as his private secretary. The duke, who had a desire to procure the canonization of bishop Benno, of Meissen, employed Emser to visit a number of convents, especially in Bohemia, to collect information concerning Benno; and in 1510 sent him to Rome. On his return from Rome he received from the duke two prebends, at Dresden and Meissen. About this time he also appears to have been consecrated a priest. His recovery from a severe sickness he ascribed to the intercession of bishop Benno, and was thereby induced to write a eulogy of him (*Divi Bennonis Vita*, Lips. 1512). With Luther, whose reformatory zeal had already begun to attract attention, Emser remained on good terms until the time of the Leipzig disputation (1519). Luther called him *Emser noster* (our Emser), and was kindly received by Emser when he had to preach before duke George at Dresden. The literary controversy between Emser and Luther commenced soon after the Leipzig disputation with a letter from Emser to Dr. Zack, provost at Leitmeritz, in which the opinion was expressed that Luther had nothing in common with the Bohemian Hussites, and an intimation was given that Luther was ready to abandon his reformatory views. As Emser, who was descended from a noble family, used in this letter his esutcheon, the forepart of a he-goat, Luther addressed his very bitter reply to the "Wild-goat Emser" (*ad Egocerotem Emseranum*, Wittenberg, 1519), and in his subsequent writings generally called him "the he-goat of Leipzig," or "He-goat Emser." In his reply, Emser called Luther's theology "novel and cynic," and represented Luther's reformatory labors as merely the result of the jealousy of the Augustinian monks against the Dominicans. Emser also attacked Carlstadt, Zwingle, Pickheimer, and other reformers; was soon joined by Eck, and thus helped to kindle a violent controversy all through Germany. In 1520 Lu-

ther burned Emser's writings along with the papal bull and the decretals. As Emser's works were almost wholly personal invectives, the interest in them soon ceased, and in the history of the Reformation they are of little significance. As duke George forbade Luther's translation of the Bible, Emser, in 1527, published another German translation made from the Vulgate. Emser branded Luther's version as a horrible corruption; but at present even the Roman Catholic writers of Germany acknowledge that Emser's version is of no value, and, in a literary point of view, greatly inferior to that of Luther. Emser died Nov. 8, 1527, where and how is not known. The titles of the numerous works of Emser may be found in Waldan, *Nachrichten von Emser's Leben und Schriften* (Auspach, 1783). See Neudecker, in Herzog, *Real-Encycl.* iii, 782; Hoefler, *Nouv. Biog. Génér.* xvi, 17. (A. J. S.)

**En-** (Heb. *Eyn-*, עַן, constr. of עַיִן, a fountain), a prefix to many names of places in Heb. (e. g. En-gedi, En-gamini, En-dor, En-haddah, En-hazor, En-harod, En-mishpah, En-eglaim, En-shemesh, En-rogel, Entannim [Neh. ii, 13], En-tappuah); all so called from a living spring in the vicinity; and corresponding to the Arabic prefix *Ain-* (Robinson, *Researches*, iii, 225), in which language, as also in the Syriac and Ethiopic, it has the same signification; in two instances (Josh. xxi, 16; Num. xxxiv, 11) it stands alone as the name of a place (q. d. "the spring"); also in the dual, ENAM (q. v.), and plural ANIM (q. v.), the latter likewise in the Aramaic form *Enon* (q. v.). See AIN.

**Enaim.** See ENAM.

**E'nam** (Heb. with the art. *ha-Eynam'*, הַעֵינַם, doubtless a contraction for עַיִן עַיִן, the two springs; Sept. Ἐνάϊμ v. r. Ἐναεῖμ and Μααρί, Vulg. *Enaim*), a city in the lowlands of Judah, mentioned between Tappuah and Jarmuth (Josh. xv, 34). From its mention with towns (Jarmuth and Eshtaol for instance) which are known to have been near Timnath, this is very probably the place in the "entrance" of which (perhaps at a fork of the road) Tamar sat to intercept her father-in-law on his way to Timnath (Gen. xxxviii, 14), (עַיִן עַיִן הַרְהוּ, *pe'thuck Eynay'im*, i. e. *doorway of Enaim*, or the *double spring*; Sept. αὐτὰς Αἰνὰν, Vulg. *brivium itineris*, A. V. "an open place;" comp. *Reland, Palest.*, p. 761). Eusebins and Jerome (*Onomast.* s. v. Ἐνάϊμ, Enaim) state that it was "still a village *Bethenim* (Βεθενίμ) near the terebinth;" meaning probably "Abraham's oak," 22 miles S. of Jerusalem (*ib.* s. v. Ἀρκώ, Archoch), near Hebron (Robinson, *Res.* ii, 443). Schwarz in like manner identifies Enam with "the village *Beth-Ani*, distant 2½ English miles from Saafir" (*Palest.* p. 102); meaning apparently *Beit-Anur*, which is laid down on Van de Velde's *Map* at that distance S.W. of Bir es-Zafaraneh, in the region N.E. of Hebron. But this site is appropriated to Beth-anoth (q. v.), with which the similarity of names has doubtless caused these authors to confuse Enam. The place in question lay in the group of cities situated N.W. of Hebron, on the border of the tribe of Dan (Keil, *Comment. on Josh.* in loc.). It is perhaps the present *Deir el-Batm*, with a well adjoining, laid down by Van de Velde (*Map*) a little beyond *Deir Dubban*, N. of Eleutheropolis.

**E'nan** (Heb. *Eynan'*, עֵינָן, born at a fountain, q. d. *fontanus*; Sept. Αἰνὰν), the father of Ahira, which latter was phylarch of the tribe of Naphtali at the Exode (Num. i, 15; ii, 29; vii, 78, 83; x, 27). B.C. ante 1657. See also HAZAR-ENAN.

**Enas'ibus** (Ἐνάσιβος, Vulgate *Eliasib*), given (1 Esdr. ix, 34) as the name of one of "the sons of Moani" who had married a Gentile wife after the exile, in place of the ELIASIB (q. v.) of the Heb. text (Ezra x, 36).

**Encænïa** (ἐγκαῖνια). (1.) When heathen temples

were converted to Christian use, they were purified by a solemn dedication, called *Encenia*, and by the sign of the cross; they also received new and appropriate names (Middle, *Antiq.* vi, 2). (2.) At a later period *encenia* denoted festivals kept in memory of the dedication of churches. In the church of Jerusalem, built by Constantine to the honor of our Saviour, it was customary to observe an anniversary festival which lasted eight days, during which divine service was performed. The practice was soon adopted by other churches. In England the first Saxon bishops allowed the people liberty on the annual feasts of the dedication of their churches, to build themselves booths round the church, and to entertain themselves with eating and drinking. In German such a feast is called *Kirchweih*, church-consecration, whence the English name *Church-wake*. The ceremonies and solemnities instituted at Oxford in honor of founders and benefactors of colleges are called *encenia*.—Bingham, *Orig. Eccles.* bk. xx, ch. viii, § 1. See DEDICATION.

**Encamp** (עָנַף, *chanah*), to decline, e. g. of the day, Judg. xix, 9, i. e. evening; hence to "pitch" a tent, Gen. xxvi, 17, especially to "camp" down at night, as often rendered), among the Hebrews, primarily denoted the resting of an army or company of travelers at night (Exod. xiii, 20; Num. i, 50; comp. Exod. xvi, 13; Gen. xxxii, 21), and hence the derivative *עָנַף*; *machaneh*, camp, once *עָנַף*; *machanoh*, 2 Kings vi, 8) is applied to the army or caravan when on its march (Exod. xiv, 19; Josh. x, 5; xi, 4; Gen. xxxii, 7, 8). See MAHAXAIM. Sometimes the verb refers to the casual arrangement of a siege (Psa. xxix, 3) or campaign (1 Sam. iv, 1), and occasionally it is extended to the signification of a permanent abode (Isa. xxix, 1). Among nomadic tribes war never attained the dignity of a science, and their encampments were consequently devoid of all the appliances of more systematic warfare. See WAR.

1. The description of the camp of the Israelites, on their march from Egypt (Num. ii, iii), supplies the greatest amount of information on the subject: whatever else may be gleaned is from scattered hints. The tabernacle, corresponding to the chieftain's tent of an ordinary encampment, was placed in the centre; and around and facing it (Num. ii, 1), arranged in four grand divisions, corresponding to the four points of the compass (but not necessarily in the strict quadrangular form usually represented, since modern Arab caravans are ranged at night in a nearly circular manner), lay the host of Israel, according to their standards (Num. i, 52; ii, 2). On the east the post of honor was assigned to the tribe of Judah, and round its standard rallied the tribes of Issachar and Zebulun, descendants of the sons of Leah. On the south lay Reuben and Simeon, the representatives of Leah, and the children of Gad, the son of her handmaid. Rachel's descendants were encamped on the western side of the tabernacle, the chief place being assigned to the tribe of Ephraim. To this position of Ephraim, Manasseh, and Benjamin, allusions are made in Judg. v, 14, and Psa. lxxx, 2. On the north were the tribes of Dan and Naphthali, the children of Bilhah, and the tribe of Asher, Gad's younger brother. All these were encamped around their standards, each according to the ensign of the house of his fathers. In the centre, round the tabernacle, and with no standard but the cloudy or fiery pillar which rested over it, were the tents of the priests and Levites. The former, with Moses and Aaron at their head, were encamped on the eastern side. On the south were the Kohathites, who had charge of the ark, the table of shew bread, the altars and vessels of the sanctuary. The Gershonites were on the west, and when on the march carried the tabernacle and its lighter furniture; while the Merarites, who were encamped on the north, had charge of its heavier appurtenances. The order of encampment

was preserved on the march (Num. ii, 17), the signal for which was given by a blast of the two silver trumpets (Num. x, 5). The details of this account supply Prof. Blunt with some striking illustrations of the undesigned coincidences of the books of Moses (*Undes. Coincid.* p. 75-86).

In this description of the order of the encampment no mention is made of sentinels, who, it is reasonable to suppose, were placed at the gates (Exod. xxxii, 26, 27) in the four quarters of the camp. This was evidently the case in the camp of the Levites (comp. 1 Chron. ix, 18, 24; 2 Chron. xxxi, 2).

The sanitary regulations of the camp of the Israelites were enacted for the twofold purpose of preserving the health of the vast multitude, and the purity of the camp as the dwelling-place of God (Num. v, 3; Deut. xxiii, 14). With this object the dead were buried without the camp (Lev. x, 4, 5); lepers were excluded till their leprosy departed from them (Lev. xiii, 46; xiv, 3; Num. xii, 14, 15), as were all who were visited with loathsome diseases (Lev. xiv, 3). All who were defiled by contact with the dead, whether these were slain in battle or not, were kept without the camp for seven days (Num. xxxi, 19). Captives taken in war were compelled to remain for a while outside (Num. xxxi, 19; Josh. vi, 23). The ashes from the sacrifices were poured out without the camp at an appointed place, whither all uncleanness was removed (Deut. xxiii, 10, 12), and where the entrails, skins, horns, etc., and all that was not offered in sacrifice, were burnt (Lev. iv, 11, 12; vi, 11; viii, 17).

The execution of criminals took place without the camp (Lev. xxiv, 14; Num. xv, 35, 36; Josh. vii, 24), as did the burning of the young bullock for the sin-offering (Lev. iv, 12). These circumstances combined explain Heb. xiii, 12, and John xix, 17, 20.

2. The encampment of the Israelites in the desert left its traces in their subsequent history. The temple, so late as the time of Hezekiah, was still "the camp of Jehovah" (2 Chron. xxxi, 2; comp. Psalm lxxviii, 28); and the multitudes who flocked to David were "a great camp, like the camp of God" (1 Chron. xii, 22).

High ground appears to have been uniformly selected for the position of a camp, whether it were on a hill or mountain side, or in an inaccessible pass (Judg. vii, 18). So, in Judg. x, 17, the Ammonites encamped in Gilead, while Israel pitched in Mizpeh. The very names are significant. The camps of Saul and the Philistines were alternately in Gilead, the "height" of Benjamin, and the pass of Michmash (1 Sam. xiii, 2, 3, 16, 23). When Goliath defied the host of Israel, the contending armies were encamped on hills on either side of the valley of Elah (1 Sam. xvii, 3); and in the fatal battle of Gilboa Saul's position on the mountain was stormed by the Philistines who had pitched in Shunem (1 Sam. xxxiii, 4), on the other side of the valley of Jezreel. The carelessness of the Midianites in encamping in the plain exposed them to the night surprise by Gideon, and resulted in their consequent discomfiture (Judg. vi, 33; vii, 8, 12). But another important consideration in fixing upon a position for a camp was the proximity of water; hence it is found that in most instances camps were pitched near a spring or well (Judg. vii, 3; 1 Macc. ix, 33). The Israelites at Mount Gilboa pitched by the fountain in Jezreel (1 Sam. xxxi, 1), while the Philistines encamped at Aphek, the name of which indicates the existence of a stream of water in the neighborhood, which rendered it a favorite place of encampment (1 Sam. iv, 1; 1 Kings xx, 26; 2 Kings xiii, 17). In his pursuit of the Amalekites David halted his men by the brook Besor, and there left a detachment with the camp furniture (1 Sam. xxx, 9). One of Joshua's decisive engagements with the nations of Canaan was fought at the waters of Merom, where he surprised the confederate camp (Josh. xi, 5, 7; comp. Judg. v, 19, 21). Gide-

on, before attacking the Midianites, encamped beside the well of Harod (Judg. vii, 1), and it was to draw water from the well at Bethlehem that David's three mighty men cut their way through the host of the Philistines (2 Sam. xxiii, 16).

The camp was surrounded by the *magalah'* (1 Sam. xvii, 20), or *magal'* (1 Sam. xxvi, 5, 7), which some, and Thenius among them, explain as an earthwork thrown up round the encampment, others as the barrier formed by the baggage-wagons. The etymology of the word points merely to the circular shape of the inclosure formed by the tents of the soldiers pitched around their chief, whose spear marked his resting-place (1 Sam. xxvi, 5, 7; see Thomson, *Land and Book*, ii, 20 sq.), and it might with propriety be used in either of the above senses, according as the camp was fixed or temporary. We know that, in the case of a siege, the attacking army, if possible, surrounded the place attacked (1 Macc. xii, 43), and drew about it a line of circumvallation (*dayek'*, 2 Kings xxv, 1), which was marked by a breastwork of earth (*mesillah'*, Isa. lxii, 10; *solelah'*, Ezek. xxi, 27 [22]; comp. Job xix, 12), for the double purpose of preventing the escape of the besieged and of protecting the besiegers from their sallies. But there was not so much need of a formal intrenchment, as but few instances occur in which engagements were fought in the camps themselves, and these only when the attack was made at night. Gideon's expedition against the Midianites took place in the early morning (Judg. vii, 19), the time selected by Saul for his attack upon Nahash (1 Sam. xi, 11), and by David for surprising the Amalekites (1 Sam. xxx, 17; comp. Judg. ix, 33). To guard against these night attacks, sentinels (*shomerim'*) were posted (Judg. vii, 20; 1 Macc. xii, 27) round the camp, and the neglect of this precaution by Zebah and Zalmunna probably led to their capture by Gideon and the ultimate defeat of their army (Judg. vii, 19).

The valley which separated the hostile camps was generally selected as the fighting ground (*sadeh'*, "the battle-field," 1 Sam. iv, 2; xiv, 15; 2 Sam. xviii, 6), upon which the contest was decided, and hence the valleys of Palestine have played so conspicuous a part in its history (Josh. viii, 13; Judg. vi, 33; 2 Sam. v,

22; viii, 13, etc.). When the fighting men went forth to the place of marshaling (*maarakah'*, 1 Sam. xvii, 20), a detachment was left to protect the camp and baggage (1 Sam. xvii, 22; xxx, 21). The beasts of burden were probably tethered to the tent pegs (2 Kings vii, 10; Zech. xiv, 15).

The *machaneh'*, or movable encampment, is distinguished from the *matstsab'*, or *netsib'* (2 Sam. xxiii, 14; 1 Chron. xi, 16), which appears to have been a standing camp, like those which Jehoshaphat established throughout Judah (2 Chron. xvii, 2), or an advanced post in an enemy's country (1 Sam. xiii, 17; 2 Sam. viii, 6), from which skirmishing parties made their predatory excursions and ravaged the crops. It was in resisting one of these expeditions that Shamah won himself a name among David's heroes (2 Sam. xxiii, 12). *Machaneh* is still farther distinguished from *mibtsu'*, "a fortress" or "walled town" (Num. xiii, 19).

Camps left behind them a memorial in the name of the place where they were situated, as among ourselves (comp. *Chester*, etc., from the Lat. *castra*). Mahaneh-Dan (Judg. xiii, 25) was so called from the encampment of the Danites mentioned in Judg. xviii, 12. The more important camps at Gilgal (Josh. v, 10; ix, 6) and Shiloh (Josh. xviii, 9; Judg. xxi, 12, 19) left no such impress; the military traditions of these places were eclipsed by the greater splendor of the religious associations which surrounded them. (See Ker Porter, *Travels in Persia*, ii, 147 sq., 300 sq.; Rhodes, *Tent-Life and Encampment of Armies in ancient and modern Times*, Lond. 1858.)—Smith, s. v.

Among the Ancient Egyptians, "the field encampment was either a square or a parallelogram, with a principal entrance in one of the faces, and near the centre was the general's tent and those of the principal officers. The general's tent was sometimes surrounded by a double rampart or fosse inclosing two distinct areas, the outer one containing three tents, probably of the next in command, or of the officers on the staff; and the guards slept or watched in the open air. Other tents were pitched outside these inclosures; and near the external circuit a space was set apart for feeding horses and beasts of burden, and another for ranging the chariots and baggage. It was near the general's tent, and within the same area, that the al-

Modern Arab Encampment in the Desert.

tars of the gods, or whatever related to religious matters, the standards, and the military chest, were kept; and the sacred emblems were deposited beneath a canopy within an inclosure similar to that of the general's tent" (Wilkinson, i, 409, abridgm.).

**Enchantment** stands in the Auth. Vers. as the representative of several Heb. words: usually some form of נָחַשׁ, *nachash*' (2 Kings xvii, 17; xxi, 6; 2 Chron. xxxiii, 6; Lev. xix, 26; Deut. xviii, 10; Num. xxiii, 23; xxiv, 1), literally to *whisper* a spell, hence to *practice divination* in general; נִחַשׁ, *nichash*' (Eccles. x, 11), of cognate form and signification, especially *incantation*; לָטַח, *lut*, literally to *muffle up*, hence to use *magic arts* (Exod. vii, 11, 22; viii, 7, 18); אָנַח, *anan*', literally to *cover with a cloud*, hence to *practice sorcery* (Jer. xxvii, 9); and חָבַר, *chabar*', to *bind*, i. e. with a spell, to *charm* (Isa. xlvii, 9, 12). The following are the specific forms which the black art assumed among the Hebrews. See also AMULET; DIVINATION.

1. לִטְמִים, *lutim*', or לְחַטְמִים, *lechatumim*', Exod. vii, 11, 22; viii, 7; Sept. *pharmacia* (Grotius compares the word with the Greek *λρατ*); secret arts, from לָטַח, to *cover*; though others incorrectly connect it with נִחַשׁ, a *flame*, or the glittering blade of a sword, as though it implied a sort of dazzling cheironomy which deceives spectators. Several versions render the word by "whisperings," *insurrations*, but it seems to be a more general word, and hence is used of the various means (some of them no doubt of a quasi-scientific character) by which the Egyptian *chartumim* imposed on the credulity of Pharaoh. See MAGICIAN.

2. קְשָׁפִים, *kesaphim*'; Sept. *pharmacia*, *φάρμακα* (2 Kings ix, 22; Mic. v, 12; Nah. iii, 4); Vulg. *veneficia*, *maleficia*; "malefice artes," "prastigie," "muttered spells." Hence it is sometimes rendered by *ἐπαοιδαι*, *incantations*, as in Isa. xlvii, 9, 12. The belief in the power of certain formulæ was universal in the ancient world. Thus there were *carmina* to evoke the tutelary gods out of a city (Macrob. *Saturnal* iii, 9), others to devote hostile armies (*Id.*), others to raise the dead (Maimon. *De Idol.* i, 15; Senec. *Ed. p.* 547), or bind the gods (*ἑσμοὶ θεῶν*) and men (*Æsch. Fur.* 331), and even influence the heavenly bodies (Ovid, *Met.* vii, 207 sq.; xii, 263; "Te quoque Luna traho," Virg. *Ecl.* viii; *Æn.* iv, 489; Hor. *Epod.* v, 45). They were a recognised part of ancient medicine, even among the Jews, who regarded certain sentences of the law as efficacious in healing. The Greeks used them as one of the five chief resources of pharmacy (Pind. *Pyth.* iii, 8, 9; Soph. *Aj.* 582), especially in obstetrics (Plat. *Theat.* p. 145) and mental diseases (Galen, *De Similit. tuenda*, i, 8). Homer mentions them as used to check the flow of blood (*Od.* xix, 456), and Cato even gives a charm to cure a disjoined limb (*De Re Rust.* 160; comp. Plin. *II. N.* xxviii, 2). The belief in charms is still all but universal in uncivilized nations; see Lane's *Modern Egypt*, i, 300, 306, etc.; ii, 177, etc.; Beckman's *Voyage to Bornoe*, ch. ii; Meroller's *Congo* (in Pinkerton's *Voyages*, xvi, p. 221, 273); Hue's *China*, i, 223; ii, 326; Taylor's *New Zealand*, and Livingstone's *Africa*, passim, etc.; and hundreds of such remedies still exist, and are considered efficacious among the uneducated. See INCANTATION.

3. נִחַשְׁתִּים, *nichashtim*' (Ecc. x, 11), Sept. *φθνησιμῶς*, is especially used of the charming of serpents, Jer. viii, 17 (comp. Psa. lviii, 5; Eccles. xii, 13; Ecc. x, 11; Lukan. ix, 89)—a parallel to "cantando rumpitur anguis," and "Viperæas rumpo verbis et carmine fauces," Ov. *Metam.* l. c.). Maimonides (*De Idol.* xi, 2) expressly defines an enchanter as one "who uses strange and meaningless words, by which he imposes on the folly of the credulous. They say, for instance, that if one utter the words before a serpent or scorpion it will do

no harm" (Carpzov, *Annot. in Godwynum*, iv, 11). An account of the Marsi, who excelled in this art, is given by Augustine (*ad Gen.* ix, 28), and of the Psylli by Arnobius (*ad Nat.* ii, 32); and they are alluded to by a host of other authorities (Pliny, vii, 2; xxviii, 6; *Ælian*, *II. A.* i, 57; Virg. *Æn.* vii, 750; Sil. Ital. viii, 495. They were called 'Οφιοὐόκτρα). The secret is still understood in the East (Lane, ii, 106). See CHARM.

4. The word נִחַשְׁתִּים, *nichashtim*', is used of the enchantments sought by Balaam (Num. xxiv, 1). It properly alludes to ophiomancy, but in this place has a general meaning of endeavoring to gain omens (Sept. *ἐξ συνάφην τοῖς οὐνοῖς*). See SOOTHISAYER.

5. חֶבֶר, *che'ber*, is used for magic (Isa. xlvii, 9, 12). It means generally the process of acquiring power over some distant object or person; but this word seems also to have been sometimes used expressly of serpent charmers, for R. Sol. Jarchi, on Deut. xvii, 11, defines the חֶבֶר הַחֶבֶר to be one "who congregates serpents and scorpions into one place." See MAGIC.

Any resort to these methods of imposture was strictly forbidden in Scripture (Lev. xix, 26; Isa. xlvii, 9, etc.), but to eradicate the tendency is almost impossible (2 Kings xvii, 17; 2 Chron. xxxiii, 6), and we find it still flourishing at the Christian era (Acts xiii, 6, 8; viii, 9, 11, *γοητεία*; Gal. v, 20; Rev. ix, 21). See WITCHCRAFT.

The chief "sacramenta dæmoniacæ" were a rod, a magic circle, dragon's eggs, certain herbs, or "insane roots," like the henbane, etc. The fancy of poets, both ancient and modern, has been exerted in giving lists of them (Ovid and Hor. *l. c.*; Shakspeare's *Macbeth*, Act iv, 1; Kirke White's *Gondoline*; Southey's *Course of Kehama*, cant. iv, etc.).—Smith, s. v. See SOCRERY.

**Encinas.** See ENZINAS.

**Encolpium.** See RELIQUARY.

**Eneratites** (Ἐγκρατίες, *Ἐγκρατῖαι*, *Continentes*), a name given by several Church fathers (Irenæus, Eusebius, Epiphanius, Jerome, Augustine, Theodoret) to a particular Gnostic sect, but which, in the opinion of most of the modern Church historians (Neander, Hase), either designates collectively several Gnostic sects, or, in general, the tendency of Gnostic asceticism in the ancient Church. The Eneratites condemned marriage, forbade the eating of flesh or drinking of wine, and used even at the celebration of the Lord's Supper water instead of wine, on which account they were called *ἰδρωπογαστράται*, *aquarii*. They were, in general, representatives of the Gnostic asceticism based upon the principle of Dualism, in opposition to the asceticism of the Ebionites, Montanists, and others which kept within the limits of the Church. The Church fathers who regarded the Eneratites as one sect of Gnostics, called Tatian (q. v.) its founder; but it is certain that there were Eneratites before Tatian, and that subsequently there were Eneratites who in some points differed from Tatian. Prominent men among the Eneratites were, besides Tatian, Saturninus, Marcion, Julianus, Cassianus, and Severus, who is called the founder of a particular sect, the Severians, and made himself known as a violent opponent of the apostle Paul and of the Pauline epistles. In the 12th century the name of the Eneratites was used, together with the names of several other ancient heresies, to designate and condemn the Bogomiles. See Eusebius, *Hist. Eccl.* iv, 29; Mosheim, *Ch. Hist.* (N. Y. 3 vols.) i, 149, 282; Mosheim, *Comment.* i, 482; Hase, *Ch. Hist.* p. 64, 83; Lea, *Sacerdotal Celibacy*, p. 42; Lardner, *Works* (10 vols. 8vo), ii, 148 sq.; Schaff, *Ch. Hist.* i, 245; Herzog, *Real-Encykl.* iv, 67; Wetzler u. Welte, *Kirch.-Lex.* iii, 575. See TATIAN.

**Encyclica, Encyclical Letters** (from the Gr. ἐγκύκλιος, letters which have to go the rounds of a certain number of men—*literæ encyclicæ, literæ circulares*), in the ancient Church, letters sent by bishops to

all the churches of a particular circuit. At present the name is exclusively used for letters addressed by the Pope to all the bishops of the Roman Catholic world. In the encyclicals the Pope lays down his views of the general wants of the Church, or of some prevailing demands and sentiments; he warns against dangerous movements within the Church, as well as against dangers threatening the Church from abroad. He urges the bishops to be watchful, and points to the proper antidotes for existing evils. Among modern encyclicals, none attracted greater attention than that issued by Pope Pius IX, in Dec., 1864, against modern civilization.—Wetzer and Welte, *Kirchen-Lexikon*, vi, 540. See LITERÆ ENCYCLICÆ. (A. J. S.)

**Encyclopædia of Theology**, a branch of theological science of comparatively recent origin. Its aims are to furnish (1) a sketch of the different branches of theology in their organic connection and relations with each other; showing the fitness of the various branches to theological science as a whole, and the relative importance of these branches; and (2) a plan of theological study, showing the order in which the topics should be taken up, and indicating the best methods of study and necessary books and helps of all kinds. This second branch, including the practical application of encyclopædia, is generally called Methodology, and the whole science taken together is called by the double name *Encyclopædia and Methodology*. Of these, Encyclopædia is the objective side, the outline of the science itself; Methodology is the subjective side, having reference to the work of the student of the science.

I. *History of the Science*.—In form, this branch of science is modern. When theology as a science was in its infancy, theological encyclopædia as science was impossible. But at an early period helps for students were prepared. Such were the treatise by Chrysostom, *De Sacerdote*, the *De officiis ministrorum* of Ambrosius, *De doctrina christiana* of Augustine, and a work of the same kind as the latter, *De disciplina scholarum*, attributed to Boethius († 525), but probably written after his time. Cassiodorus († 562) wrote *De Institutione Divinarum Litterarum*, an introduction to the profitable study of Scripture, for the use of monks. In the 7th century Isidor of Seville wrote a larger work, a kind of general encyclopædia, wherein he also treats of theology, *Originum sive Etymologiarum libr. xx*, but it is more in the shape of pastoral theology, as is the *De institutione clericorum* of Rabanus Maurus in the 9th century. The latter contains, however (vol. iii), a sketch of the different branches of information necessary to a minister. The *Didascalion (eruditio didascalica)* of Hugo of St. Victor († 1141) comes nearer to the character of a theological encyclopædia—its 1st, 2d, and 3d books treating on the preparatory studies, and the others, 4th to 6th, on the exposition of Scripture and the study of the fathers (Liebner, *Hugo v. St. Victor*, p. 96). In the 13th century, Vincent of Beauvais († 1264), in his *Speculum doctrinale*, gave a scientific exposition of several subjects, including theology. After these we find the writings of Nicolas of Clémanges (*De studio theologico*, d'Acbery, i, 473), and Jean Charlier Gerson (*De reformatione theologice, and Epistole duæ ad studentes Collegii Navarre Parisiensis, quid et qualiter studere debeat novus theologice auditor*).

But the real origin of theological encyclopædia is to be found in the time when the Reformation, in the 16th century, breaking through the bonds of scholastic divinity, brought in a new era for science, particularly for theology. Erasmus first led the way in the new direction by his *Ratio s. methodus compendio perveniendi ad veram theologiam* (1519-1522), giving to theological studies a solid philosophical foundation, promoting the study of the Scriptures, and requiring from the theologian a knowledge of natural sciences. In the *Lutheran Church* we first find Melancthon giving a short guide to theological studies in his *Brevi*

*ratio discende Theologiæ* (Opp., Bas. 1541, iii, 287). This was followed by a work of his pupil, Theobald Thamer, *Adhortatio ad theologie studium in academia Marburgensi*, 1543. After these we find the *Oratio de studio theol. recte inchoando*, 1577, and *Regulæ studiorum seu de ratione discendi in præcipuis artibus recte instituenda* (Lips. 1565), both by David Chytrius; the *Consilium de theologiæ studio recte constituendo* (Nuremberg, 1565), by Hieronymus Weller, the pupil and friend of Luther; the systematic *Methodus studii theologiæ publicis prælectionibus in academia Jenensi a. 1617 exposita* (1620, 1622, 1654), by John Gerhard; as also the works of Jacob Andrea, *De Stud. Sacr. Litt.* (Lips. 1567); Nicholas Selnecker (*Notatio de Stud. Theologiæ* (Lips. 1579); and Abr. Calov (*Isagoge ad Theologiam*). First in the list of encyclopedic works of the *Reformed Church* stands Bullinger's *Ratio studii theologiæ*, and the latter part of Conrad Gessner's *Pandectarum universalium liber ultimus*. But more important than either of those is the work of Andreas Gerhard of Ypern (Hyperius), professor at Marburg († 1564), *Theologiæ, seu de ratione studii theologiæ* (Basel, 1572, 1582), in which we find a first attempt to arrange the matter of the *Encyclopædia*, dividing it into different departments, exegetical, dogmatical, historical, and practical, though the exact limits of each were not yet well defined. The writers on dogmatics often prefixed an encyclopedic essay to their works, as did J. H. Alsted in his *Methodus sacrosanctæ Theologiæ* (Hanov. 1623), which contains two prefatory books on the study of theology. From the school of Saumur came Steph. Gausson's *Disertationes de studii theologiæ ratione*, etc. (1678, 6th ed., by Rambach, Hal. 1726). Calixtus († 1656) wrote a copious *Apparatus Theologicus* (Helmst., edited by his son, 1661); and Spener († 1705) gave acute advice and discriminations in several of his writings.

The term encyclopædia, in its present meaning, we find for the first time in the title of a work by the Reformed theologian S. Mursinna, *Præmiæ lineæ Encyclopædiæ Theologiæ* (Hal. Magd. 1764; 2d ed. 1794). But this, like all the works heretofore mentioned, has now only a historical interest. Herder's *Brief v. d. Studium d. Theologiæ* (1785, 4 vols.) is, on the other hand, even now of value in this field. A new era in the history of theological encyclopædia was inaugurated by Schleiermacher in his *Darstellung d. theologischen Studiums z. Behufe eintretender Vorlesungen* (Berlin, 1811); but the full effect of the book was not felt until its 2d edition appeared in 1830, although Bertholdt (*Theol. Wissenschaftskunde*, Erlangen, 1821, 2 vols.), Francke (*Theol. Encyclopædie*, 1819), and Danz (*Encyclopædie und Methodologie*, Wein. 1832) had been stimulated and guided by Schleiermacher's remarkable sketch. The powerful grasp of the whole science, and the luminous statement of the relations of all the parts, given by Schleiermacher, give his *Darstellung* the foremost place in this branch of science. (There is an English translation by Farrar, not very well done, under the title *Brief Outline of the Study of Theology*, Edinb. 1850, 12mo.) Its practical fault lies in the divisions made of the whole science (see below). It was followed by Hagenbach's *Encyclopædie u. Methodologie d. Theol. Wissenschaften* (Leips. 1833, 8vo), a work of great practical value, which has maintained its position as the most useful manual on the subject (7th edition, Leips. 1864, 8vo). The *Encyclopædie d. theol. Wissenschaften* of K. Rosenkranz (Halle, 1845) is thoroughly speculative and Hegelian. Harless's *Encyclopædie u. Methodologie* (Nürnberg. 1837) is a Lutheran work, and is really valuable for its historical sketch of the development of theology and for its copious literature. The *Anleitung z. Studium d. christl. Theologie* of Lobegott Lange (Jena, 1841) advocates Biblical rationalism. Pelt's *Theologische Encyclopædie* (Hamb. 1843, 8vo) follows Schleiermacher's method closely, but is a thorough and scholarly work, careful in state-

ment, broad in range, and accurate in literature. Holland has produced a valuable compendium in Clarisse, *Encyclopædie Theologica Epitome* (2d edit. Lugd. Bat. 1835, 8vo), which has a copious literature, especially full in reference to English books, a matter in which the German writers on the subject are all signally deficient.

Among Roman Catholic books in this field are to be mentioned Possevinus, *Bibliotheca selecta de ratione studiorum* (Colon. 1607); Ellies du Pin, *Méthode pour étudier la théologie* (1716), translated into several languages. In the 18th century, Denina (1758), Gerbert (1764), Braun (1777), Brandmeier (1783), and especially Oberthür, labored in this field. The influence of the later Protestant writers is manifest in such works as Drey, *Kurze Einl. in das Stud. d. Theologie* (Tübing. 1819); Klee, *Encyclopædie* (Mainz, 1832); Staudenmaier, *Encyclopædie der theol. Wissenschaften als System d. gesamten Theol. g'e* (Mentz, 1834-1840); Gengler, *D. Ideale d. Wissenschaft. o. d. Encyclopædie d. Theologie* (Bamb. 1834); Buchner, *Enc. u. Method.* (Sulzb. 1837); A. von Sieger, *De natura fidei et methodo theologia ad ecclesie catholicae Theologos* (Monast. 1839).

No book properly to be called *Encyclopædia of Theology* has appeared in English, and no book is more needed, as the English theological literature is almost wholly neglected by the Germans. (We are glad to see, as this article goes to press, 1868, an *Encyclopædia and Methodology* announced as in preparation by Dr. H. B. Smith.) But there are many excellent remarks in English books of pastoral theology on the best methods of study, and some special treatises which deserve notice. Among them are Dodwell, *Advice on Theological Studies* (Lond. 1691); Bennet, *Directions for Studying* (Lond. 1727, 3d edit. 8vo); Cotton Mather, *Manuductio in Ministerium* (Boston, 1726, 12mo; re-published, with additions, as Mather's *Student and Preacher*, by Ryland (Lond. 1781); Mason, *Student and Pastor* (Lond. 1755); Marsh, *Course of Lectures on Divinity* (Cambridge, 1809, 8vo), which gives good practical hints, and also attempts an encyclopædic outline; Doddridge, *Lectures* (Works, Lond. 1830, 255 sq.); Bickersteth, *Christian Student* (Lond. 4th edit. 1844), contains much information and good advice, but is destitute of scientific form or spirit. There are many compends, such as Preston's *Theological Manual* (1850), Smith's *Compendium* (1836), etc., which are superficial sketches of theology, designed to aid students in cramming rather than in thorough work. Many good hints are given in books of pastoral theology, for which see PRACTICAL THEOLOGY. There is a good list of books in Lowndes's *British Librarian*, p. 813 sq.

11. *Method of Theological Encyclopædia and Methodology*.—1. Some writers hold that encyclopædia should be treated entirely apart from methodology: so Kienlen, *Encyclopædie* (Strasb. 1842), confines the former to the exposition of the relation of the several branches of theology to the science as a whole; making methodology a separate work, aiming, not to set forth the science at all, but to show how it should be studied. This view is correct, if encyclopædia be taken in its broadest sense, as not merely an introductory science, taking the beginner by the hand at the portals of theology, and showing him the way to enter, and the plan of the edifice, but also as forming the *conclusion* of the course of study, in which all the branches are exhibited in their natural relations to the central trunk. But in view of practical use, most of the recent writers blend methodology with encyclopædia in one connected whole.

2. We give here the methods of the chief writers on the subject. (1.) Schleiermacher (§ 31) divides theology as science into three branches, Philosophical, Historical, and Practical. *Philosophical* theology includes, 1. Apologetics; 2. Polemics. *Historical* theology includes, 1. Exegetics, or the knowledge of primitive

Christianity; 2. Church history, or the knowledge of the earthly career of Christianity; 3. the knowledge of the present condition of Christianity (*a*) as to doctrine (Dogmatic theology), (*b*) as to social condition and extension (Ecclesiastical statistics). *Practical* theology includes, 1. Church service (Liturgy, Worship, Homilies, Pastoral care); 2. Church government. (2.) Hagenbach adopts the old and useful division of theology into four parts, Exegetical, Historical, Systematic, and Practical. *Exegetical* theology includes a knowledge of the sacred books, as the primary source of Christian doctrine, and the record of the original facts of Christianity. This knowledge presumes a knowledge of the languages of the sacred books, and requires also an apparatus (1) of criticism; (2) of history, viz. archeology, geography, etc.; (3) of interpretation (Hermeneutics). *Historical* theology includes Bible-history of Old and New Test., Biblical theology, Church history, Doctrine history, Patristics, Symbolics, Archeology, Statistics. *Systematic* theology includes Dogmatics, Apologetics, Polemics, and Ethics. *Practical* theology embraces Catechetics, Worship, Homilies, Pastoral care, Church government.—Pelt gives a very complete outline (founded on Schleiermacher's) in his *Encyclopædie* (1843, 8vo), which he modifies somewhat in his article *Theologie*, in Herzog's *Real-Encyclopædie*, xv, 748 (compare also his article in *Studien u. Kritiken*, 1849, p. 27).—Godet (*Bulletin Théologique*, Paris, 1863, art. i) divides theology into, 1. Speculative, or the knowledge of salvation; 2. Practical, or the art of saving men. Under the first he classes Exegetical, Systematic, and Historical theology; under the second, Ecclesiastical economy, Missions, Apologetics (compare a criticism on this outline by Pronier in the same journal, May, 1863, p. 76 sq.). Thomas (*Bullet. Théol.* Sept. 1865) proposes to arrange as follows: 1. Apologetics (historical and philosophical); 2. Historical theology (Biblical sciences, Church history, Statistics); 3. Systematic theology (Dogmatics, Polemics, Speculative theology); 4. Practical theology (the individual, the family, the nation, civilization, the Church, (*a*) as to its base, (*b*) as to its organization, (*c*) as to its active working.—Dr. W. F. Warren, of the Boston Theological Seminary, gives a philosophical but luminous outline in *Jahrbücher f. Deutsche Theologie*, 1867, p. 318, as follows: 1. The Church, in its origin in time (History of the sacred writings; Biblical doctrines; Mosaic, Jewish, and New Test.; Biblical Church history; auxiliary sciences: philology, archeology, geography, chronology, etc.). 2. The Church in its development in time (Literature, History of doctrines, System of Christian doctrines, Church history, Church economy, auxiliary sciences, with Polemics as a concluding discipline). 3. The Church in its consummation (the scientific exposition of what the Word of God tells us concerning the future development and final consummation of the Church). In a note to Dr. Warren's article (p. 321), Dr. Wagenmann gives another outline, to which we refer the reader.

*Literature*.—Besides the authors already cited, see Tholuck's *Lectures on Encyclopædia*, translated in the *Bibliotheca Sacra*, vol. i; *Biblical Repository*, edited by Dr. Robinson, i, 613; iv, 127; Zyro, in *Studien u. Kritiken*, 1837, p. 689 sq.; Shedd, *Essays*, Essay i, on *Method and Influence of Theological Studies*; Vincent, *Du Protestantisme en France*, i, 314 sq. (Paris, 1860, 12mo); Credner, *Preface to Kito's Cyclopædia*.

**ENCYCLOPEDIA**, FRENCH, and the ENCYCLOPÉDISTES. The *Dictionnaire Encyclopédique* was a publication of the 18th century, which exerted a great influence not merely on general science and literature, but also on theology and religion. Its full title is *Encyclopédie ou Dictionnaire raisonné des Sciences, des Arts, et des Métiers, par une société de gens de Lettres; mis en ordre et publié par DIDEROT; et quant à la partie Mathématique par D'ALEMBERT* (Par. and Amst. 1751-80, 25 vols. fol.). This great work was projected by Diderot

(q. v.), and carried through, in the midst of difficulties, chiefly by his indomitable industry and perseverance. The name of D'Alembert (q. v.) added lustre to the publication; and these two called to their aid all the sceptical and free-thinking talent of France. A great aim of the Encyclopedists was to establish what they called philosophy instead of religion; and the higher intellect of France seemed to become thoroughly imbued with their views, social, moral, and political. The *Encyclopædia* was a product of the same causes which generated the Revolution, but the publication itself doubtless greatly hastened the catastrophe. It was only one stage in the development of that one-sided realism which commenced with Locke; expanded into the deism of England; and, crossing over to France, found a powerful advocate in Condillac. The progress of this development was very rapid. Among the Encyclopedists a single lifetime produced startling changes. Diderot, the editor and leading philosophical spirit of the *Encyclopædia*, "was at first only a doubter, next he became a deist, lastly an atheist. In the first stage he only translated English works, and even condemned some of the English deists. His views seem gradually to have altered, probably under the influence of Voltaire's writings and of the infidel books smuggled into France, and he thenceforth assumed a tone bolder and marked by positive disbelief. Diderot's atheism is a still farther development of his unbelief. It is expressed in few of his writings, and presents no subject of interest to us, save that it seeks to invalidate the arguments for the being of God drawn from final causes" (Farrar, *Critical History of Free Thought*, p. 179). D'Alembert, the scientific editor of the *Encyclopædia*, was the author of the celebrated *Discours Préliminaire des Éditeurs*, which was issued in separate form, and became a text-book of infidelity not only in France, but also in England. D'Alembert's reputation in the department of science was very great over the entire continent of Europe, and he gave to the *Encyclopædia* its high scientific character and value. (See ALEMBERT, D.) There has been much discussion as to whether the *Encyclopædia* proper really was issued in the interests of atheism. Many of the articles are entirely Christian in their tone and spirit. Others are as decidedly atheistic, while the *Discours Préliminaire* can hardly be called doubtful as to its character and aims. The true view seems to be that the Encyclopedists endeavored clandestinely to accomplish what more honest infidels had long attempted openly. They endeavored to undermine both religion and the state, while seeming to be in favor of them. Voltaire doubtless stands at the head of the coterie which furnished the articles for the *Encyclopædia*, although he wrote little for it himself. More than any other man he was the educator of the Encyclopedists. His principles are too well known to need statement. Helvetius derived his philosophy from Locke. "He was the moralist of the sensational philosophy, one who applied the philosophy of Condillac to morals. His philosophy is expressed in two works: the one on the spirit, the other on man; the former a theoretical view of human nature, the latter a practical view of education and society. His primary position is, that man owes all his superiority over animals to the superior organization of his body. Pleasure is the only good, and self-interest the true ground of morals, and the frame-work of individual and political right" (Farrar, *History of Free Thought*, p. 180). Next come the authors of the *Système de la Nature*, a work issued by the encyclopedists. It has been attributed to baron d'Holbach, his tutor Lagrange, Diderot, Grimm, Helvetius, and Robinet. It was doubtless a joint work, and expressed the views of all these men, or was a compromise creed to which they could all subscribe, for they held widely different opinions in other respects. The great object of the *System of Nature* was to banish God from the universe. It is de-

voted to the boldest materialism. "There is, in fact, nothing but matter and motion, says this book. Both are inseparably connected. If matter is at rest, it is only because hindered in motion, for in its essence it is not a dead mass" (Schwegler, *History of Philosophy*). The first part of this work undertakes to disprove the existence of mind; the second part is directed against religion. This *System of Nature* was the boldest achievement of infidelity, a work which even Voltaire pronounced "illogical in its deductions, absurd in its physics, and abominable in its morality." To those already named we may add Rousseau, whose *Political Essays* became the text-book of the French Revolution. He did for the state what the others had done for the Church. Such, then, were the views of those who projected and carried forward the *Encyclopædia*. If in the *Encyclopædia* itself we find those views covered up, or at least offset by thoroughly Christian ones, we are justified in believing that they were concealed and balanced by contrary opinions only to make the *Encyclopædia* acceptable to the unthinking masses of the French nation. The fact, as some hold, that the French nation was ripening for a revolution both in Church and State, and would have rushed into such a catastrophe at all hazards, proves nothing respecting the motives of the encyclopedists; and the terrible quickening which their great popular work gave to infidelity is perhaps the best test by which to judge the purposes of its authors.

Let us now look at the *Encyclopædia* itself, and its spirit can perhaps be best read from the *Discours Préliminaire*. D'Alembert was its author, although he probably secured both the approval and assistance of Diderot in its form and contents. The object of this *Discours* is to set forth the philosophy underlying the *Encyclopædia*, and this is nothing more than the sensualism of Locke. D'Alembert declares that "all our abstract knowledge may be reduced to what we receive through our senses." Showing that this may be the case, he thence argues that it is so. Sensations are the only things about which he cannot raise a doubt. With regard to ethics, the following is his underlying principle. Our ideas of good and evil "arise from the oppression which, by nature, the stronger practices upon the weaker, and the latter bears the more reluctantly the more violent it is, because he feels that there is no reason why he should submit to it; the evils which befall us through the vices of our fellow-men lead to the indirect knowledge of antagonistic virtues." These are the grounds upon which his philosophy is based. And yet this *Discours* made infidelity more popular to the unthinking masses than the writings of Locke, Condillac, Helvetius, De la Mettrie, or Holbach had done.

Such is the sensualistic materialism contained in the *Discours Préliminaire*, containing the ethical principle that we feel a sense of oppression only because we can see no reason why we should submit to it. And yet, by the side of this, in the same *Discours*, we find the following statement: "Nothing, therefore, is more necessary than a revealed religion, which instructs us concerning so many things. Designed for the completion of our natural knowledge, it shows us a portion of what was concealed from us; but confines itself to that which is most needful, while all the rest remains forever hidden. A few points of faith, and a small number of practical precepts, is all to which the revealed religion refers; yet, thanks to the light which it communicates to the world, since then the people are more firm and decided concerning a great number of interesting questions than the philosophers of any school ever were." In this way infidelity and religion were woven into the same system, religion being always held subordinate, a something to accomplish an end which science and philosophy could not quite reach. This being once admitted, it was not difficult to persuade the French people that, when philosophy

could accomplish all that is necessary, religion might be set aside.

In the body of the *Encyclopedia* itself, many of the articles upon religious subjects are apparently in full sympathy with catholicity, and even orthodoxy. For instance, the article "Trinité" defends the orthodox dogma from attacks of Socinians, Jews, and infidels of all kinds. In the article "Dieu" the arguments for the existence of God are ably summed up, and objections are refuted. Quotations are made from Christian authorities, and the writer of the article seems to have been in full sympathy with the Christian view of the subject. The existence of angels and devils is recognised. The article "Christianisme" pronounces Christianity the only true revealed religion, and the Old and New Testaments are recognised as divine. It declares that the severest criticism has not been able to invalidate their authenticity. Reason and philosophy must accord to them the honor of setting forth facts beyond their reach. The hand of God is seen in the style of the sacred writings. Articles on Protestantism condemn severely every innovation in doctrine, every departure from the established creeds of the various denominations. The errors of the Romish Church are pointed out and severely castigated. It is not necessary to suppose these articles written in a spirit of hypocrisy. Their authors doubtless held the views expressed. The fact that they did not invalidate the opinion that the *Encyclopedia* was secretly issued in the interests of atheism. Its authors could well afford to give Christian men a voice within its pages, when there was so much to counteract all they might say. It was not that Christianity had no advocates in the *Encyclopedia*, but that it was allowed only a feeble defence, and was often defended on principles which directly tended to its overthrow. Its very defenders, in many cases, were its worst enemies, and only erected fortifications on the side of religion to show how easily they could be carried by infidelity. The defence is made chiefly to rest on endemionism. Christianity should be upheld because it brings us more good than any other system of religion. Whatever system is most advantageous for man in his worldly relations is the system to which he should adhere. Whenever men can be made to believe that Christianity fails to do this, then it must be set aside. For example, in the article "Christianisme," Christ is placed side by side with the other lawgivers, his only superiority being that, while they kept the useful in view, he aimed at the true as well as the useful. "Though he set forth, as its first object, the happiness of another life, he also meant it to make us happy in this world." In other places morality is preferred to faith, "because he who does good and makes himself useful to the world is in a better condition through morality without faith than through faith without morality." Theism is better than atheism, because it is more advantageous for nations to admit the existence of God than to reject it.

The work began to appear in 1751, and was concluded in 1765, in 17 vols. fol., besides 11 vols. of plates. A supplement, in 5 vols., appeared at Amsterdam, 1776-1777, and a *Table analytique et raisonnée des matières*, in 2 vols., at Paris, in 1780. The publication was stopped two or three times by the government, and the last volumes were distributed privately, though the king himself was one of the purchasers. Diderot himself said of the *Encyclopedia* that he had had "neither time nor means of being particular in the choice of his contributors, among whom some were excellent, but most of the rest were very inferior; moreover the contributors, being badly paid, worked carelessly; in short, it was a patch-work composed of very ill-sorted materials, some masterpieces by the side of school-boys' performances; and there was also considerable neglect in the arrangement of the articles, and especially in the references." In

spite of all its defects, the *Encyclopedia* was the pride of France, and is in many respects a very able production. See La Porte, *Esprit de l'Encyclopédie* (Paris, 1768); Voltaire, *Questions sur l'Encyclopédie* (Paris, 1770); Van Mildert, *Boyle Lecture*, i, 378; Kurtz, *Church History*, ii, 236; Farrar, *Hist. of Free Thought*, p. 166-178; Tenenmann, *Manual Hist. Philosophy*, p. 378; Schwegler, *Hist. Philosophy*, translated by Scelye, p. 206; Chambers, *Encyclopedia*; Herzog, *Real-Encyklop.* iv, 1; Morell, *Hist. Phil.* p. 111. (H.G.)

**End of the World.** See ESCHATOLOGY.

**En'-dor** (Heb. *Eyn-Dor'*, עֵינֹדוֹר, *fountain of Dor*, i. e. of the age, 1 Sam. xxviii, 7, Sept. 'Ενδὼρ v. r. 'Αενδῶρ; but defectively דֹר עֵינֹ in Josh. xvii, 11, Sept. Δόρ v. r. 'Ενδῶρ; and עֵינֹדוֹר in Psa. lxxxiii, 10 [11], Sept. 'Αενδῶρ; Josephus 'Ενδῶροι, *Ant.* vi, 14, 2), a place which, with its "daughter-towns" (בָּתֵּי עֵינֹדוֹר), was in the territory of Issachar, and yet possessed by Manasseh (Josh. xvii, 11). This was the case with five other places which lay partly in Asher, partly in Issachar, and seem to have formed a kind of district of their own, called "the three, or the triple *Nejheh*" (q. v.). The Israelites were unable to expel the Canaanites from it until a late period. Endor was long held in memory by the Jewish people as connected with the great victory of Deborah and Barak over Sisera and Jabin. Taanach, Megiddo, and the torrent Kishon all witnessed the discomfiture of the huge host, but it was emphatically to Endor that the tradition of the death of the two chiefs attached itself (Psa. lxxxiii, 9, 10). Possibly it was some recollection of this, some fame of sanctity or good omen in Endor, which drew the unhappy Saul thither (see Thomson, *Land and Book*, ii, 161) on the eve of his last engagement with an enemy no less hateful and no less destructive than the Midianites (1 Sam. xxviii, 7). Endor is not again mentioned in the Scriptures; but it was known to Eusebius and Jerome, who describe it (by the same name, 'Αενδῶρ and 'Ενδῶρ, *Endor* and *Endor*) as a large village in the plain of Jezreel or Esdraelon, 4 miles S. of Tabor (*Onomast.* s. v. 'Ανδῶρ, *Endor*), near Nain and Scythopolis (*ib.* s. v. 'Ηνδῶρ, *Endor*). It was recognised during the Crusades (Brocardus, c. vi, p. 176; Marin. Sanut, p. 248), but was then partially lost sight of till the 17th century (Doubdan, p. 580; Nau, p. 632; Maundrell, Apr. 19). On the bleak northern slope of Jebel Duhy (the "Little Hermon" of travellers) the name still lingers, attached to a considerable but now deserted village (Burekhardt, *Trav.* p. 342; Robinson, *Res.* iii, 218; Schwarz, *Palest.* p. 149). The rock of the mountain, on the slope of which *Endôr* stands, is hollowed into caves, one of which, containing a little fountain, the entrance narrow, between rugged rocks, and partly covered with a fig-tree, may well have been the scene of the incantation of the witch (Van de Velde, *Narrative*, ii, 383). The distance from the slopes of Gilboa to Endor is 7 or 8 miles, over difficult ground (Porter, *Hamab.* ii, 358).

**E'neas.** See ÆNEAS.

**En-eg'-la'im** [many *En-egla'im*] (Heb. *Eyn Egla'im*, עֵינֵי עֵגְלָיִם, *fountain of two calves*, unless for עֵינֵי שְׁנֵי עֵגְלָיִם, *fountain of two pools*; Sept. 'Εναγαιεῖμ v. r. Εναγαλλεῖμ), a place named only by Ezekiel (xlvii, 10), apparently as on the Dead Sea, but whether near to or far from Engedi, on the west or east side of the sea, it is impossible to ascertain from the text: "The fishers shall stand upon it from En-gedi even to En-eghlim: they shall be a place to spread forth nets." In his comment on the passage, Jerome places it at the northern end of the Dead Sea, at the influx of the Jordan. M. de Saunley thinks it identical with *Ain-Ajloh*, situated towards the northern point of the Dead Sea, between Jericho and the Jordan (*Narrative*, i,

163). See BETH-HOGLAH. En-eglaim is probably another name for the EGLAIM (q. v.) of Isa. xv, 8.

**Enemes'sar** (Ἐνεμῆσαρος and Ἐνεμῆσαρ) is the name under which SHALMANESER (q. v.) appears in the book of Tobit (i, 2, 13, 15, 16). The change of the name is a corruption, the first syllable *Shal* being dropped (compare the Bupalnssor of Abydenus, which represents Nabopolassar), and the order of the liquids *m* and *n* being reversed. The author of Tobit makes Enemesar lead the children of Israel into captivity (i, 2), following the apparent narrative of the book of Kings (2 Kings xvii, 3-6; xviii, 9-11). He regards Sennacherib not only as his successor, but as his son (i, 15), for which he has probably no authority beyond his own speculations upon the text of Scripture.—Smith, s. v. See TOBIT.

**Ené'níus** (Ἐννῆός v. r. Ἐννῆος, Vulg. *Emmanius*), one of the leaders of the people who returned from captivity with Zorobabel (1 Esdr. v, 8); corresponding to the NAHAMANI (q. v.) of Nehemiah (vii, 7).

**Energici**, a sect in Germany in the 16th century, so called because they held that the Eucharist was the energy of Jesus Christ—not his body, nor a representation thereof.—Buck, *Theol. Dictionary*, s. v.

**Energumens** (ἠνεργούμενοι), persons possessed, and, in the narrower and more usual sense, persons possessed by an evil spirit. In the early Church such persons constituted a distinct class, bearing some relation to the catechumens and the faithful, but differing from them in this, that they were under the special care of exorcists, while they took part in some of the religious exercises of both classes. Catechumens who became disordered in mind during their term of probation were not baptized until thoroughly recovered, except in cases of sickness. Should any among the baptized become thus afflicted, they were excluded from the Christian assembly during the worst stages of their disease, being compelled to remain in the area of the church. From this circumstance they were called *χαιμαζόμενοι*, exposed to the weather. When partially recovered they were permitted to join in public worship, but were not permitted to partake of the Lord's Supper till they were properly restored, except in the immediate prospect of death.—Bingham, *Orig. Eccl.* bk. iii, ch. iv, § 6, 8.

**Enfantin**, BARTHÉLEMY PROSPER, more commonly called father Enfantin, one of the founders of Saint Simonism (q. v.), was born at Paris Feb. 8, 1796. He received his education at a lyceum, and subsequently (1813) at the Polytechnic School. After the fall of Napoleon he engaged in commercial and industrial pursuits. Towards the close of the year 1825 Enfantin became intimately acquainted with Olinde Rodrigues, and through him with Saint Simon, who converted him to his theories of an industrial and religious reformation. He accepted from his dying master the mission to spread and develop his doctrines. The work was begun with the establishment of a journal called *Le Producteur* (1825-26, 5 vols.), which closed its career with the celebrated epitaph, *The golden age, which a blind tradition has formerly placed in the past, is still before us*. The Liberal party at first saw in this periodical the application of its own ideas to the material order, and supported it; but the support was withdrawn when Benjamin Constant denounced it as theocratic. In 1828 Enfantin had about a dozen collaborators, among whom were Blanqui, Duveyrier, Buchez (in 1848 president of the Constituent Assembly), and Pereire. The revolution of 1830 filled Enfantin with enthusiastic hopes. He signed, on the 30th of July, a proclamation, in which he demanded community of goods, abolition of inheritance, and the emancipation of woman. He organized "centres of action" at Toulouse, Montpellier, Lyons, Metz, and Dijon; provided for regular preaching at Paris, and frequently ad-

ressed the learned, the artists, and the industrials. In 1830 he secured the support of the *Globe* newspaper. Soon he was made by acclamation (the sacred word was *acclamé*) one of the supreme fathers, with Bazard. The two chiefs disagreed, however, on one important point: Bazard wished to pay prominent attention to political agitation, while Enfantin occupied himself only with ethics, art, religion, and social reform. He desired first of all to regulate individual relations, to emancipate woman and the pauper, and to sanctify the flesh by labor and pleasure. He expected to obtain control of society by dispossessing the Church, not the state. In November, 1831, he issued a manifesto to the forty thousand adherents of the new doctrine in France, that Bazard and Rodriguez had separated from him, and that the new dogma had become incarnate in him alone, as the living law and the messiah. But his attempt to establish communistic colonies failed, and the researches made for finding a female messiah, to share with him the leadership of the communion, made the whole movement ridiculous. The *Globe*, which was gratuitously distributed, had to be discontinued. In 1832 the government suppressed the association. Enfantin, followed by about forty of his disciples, among whom were Michael Chevalier (subsequently a member of the senate), Duveyrier, and Gustave d'Eichthal, retired to an estate which he possessed on the coast of Menilmontant, and there organized a model community. There the new brethren, divided into groups of laborers, wore a peculiar garb, and passed the day in work, religious conferences, and symbolical ceremonies. The "father" (Enfantin) had this name conspicuously inscribed upon his breast, superintended, preached, encouraged; he wrote articles for *Les Feuilles Populaires*, and the *Livre Nouveau*; composed mystical hymns, and developed some mystical pantheism. It cost him great efforts to refute the attacks of Carnot, J. Reynaut, and others. He was then summoned before the assizes of the Seine, being charged with having held forbidden meetings, and outraged public morality, and was condemned to a year of imprisonment (August 28, 1832). The Saint Simonians now dispersed. Enfantin, who after a few months was set at liberty, left with about a dozen of his disciples for Egypt. Most of them, turning Mohammedans, received appointments from the pasha of Egypt; but Enfantin refused to profess Mohammedanism, and after remaining in Egypt for two years, returned to France. He was for a time postmaster, and in 1841, through the influence of his friends, some of whom had obtained high offices, was appointed member of a scientific commission sent to Algeria. In 1845 he received the chief direction of the Lyons railroad. In November, 1848, Enfantin, conjointly with Duveyrier, established a daily paper, *Le Crédit*, which was continued until 1850. Subsequently Enfantin became connected with the administration of the railroad from Lyons to the Mediterranean. He died May 31, 1864. Shortly before his death he appointed Arles Dufour head of the sect. Enfantin developed the socialistic views of his master and his own in the works *Economie politique et St. Simonienne* (Par. 1831) and *Morale* (Par. 1832). The latter work was at once condemned by the *Cour d'assises*. Another work of the same class, *Le Livre nouveau* (completed in 1832), has never been printed. His philosophical and theological views were set forth at length in the *Correspondance philosophique et religieuse* (Par. 1847), of which the *Correspondance politique* (Paris, 1849) is a supplement, and in a pamphlet against the Jesuit orator, father Felix (*Réponse au Père Felix*, Paris, 1856). His last work was *La Vie Eternelle présente, future* (Paris, 1861; also republished in the *Bibliothèque utile*, Paris, 1864). In 1865 a collective edition of his socialistic works was published.—Vapereau, *Dictionnaire des Contemporains*, s. v.; Hofer, *Nouv. Biogr. Génér.* xvi, 37. (A. J. S.)

**Enfield**, WILLIAM, LL.D., an English Dissenter

and voluminous writer, was born at Sudbury March 29, 1741, and was educated at Davenport under Dr. Ashworth. On leaving the seminary he became pastor to a congregation at Liverpool. He afterwards became resident tutor and lecturer on belles-lettres at Warrington Academy. In 1785 he became minister of the Unitarian Church at Norwich, where he died Nov. 3, 1797. Among his numerous publications were (1) *A History of Philosophy*, drawn up from Brucker (Lond. 1819, 2 vols. 8vo);—(2) *The Preachers' Directory* (London, 1771, 4to);—(3) *Sermons for Families* (Lond. 1778, 2 vols. 12mo);—(4) *The English Preacher* (Lond. 9 vols. 12mo). He was a frequent contributor to periodicals, and shared with Dr. Aikin in the preparation of the *General Biographical Dictionary*.

Engad'di (ἐν αἰγάλοις v. r. Ἐργαδί in ἐν Γάδι, or ἐν Γάδαις, Vulg. in *Cades*), Ecclus. xxiv, 14. See ENGEDI.

En-gan'nim (Heb. *Eyn Gannim'*, עַיִן גַּנִּים, fountain of gardens), the name of several places in Palestine, for, besides those mentioned below, there was said, according to Eusebius and Jerome (*Onomast.* s. v. Ἰγαννί, Engannim), then to be a third village called Engannim (Ἰγαννά, *Eganna*) near Gerasa, beyond the Jordan.

1. (Sept. Ἡργοनीμ v. r. unrecognisable; Vulg. *Engannim*.) A town in the plains of Judah, mentioned between Zanoah and Tappuah (Josh. xv, 34). Eusebius and Jerome state (*Onomast.* s. v. Ἰγαννί, Engannim) that it was still extant in their day near Bethel; but there must have been some mistake in this, as the place in question lay in the group N.W. of Jerusalem (Keil, *Comment. on Josh.* in loc.), possibly at the site of the present agricultural village *Rana*, north of Eleutheropolis (Robinson, *Researches*, ii, 354). Schwarz, however, thinks (*Palest.* p. 162) that "En-gannim is certainly identical with the village *Jenin*, 3 Eng. miles S.E. of Ashkelon;" but this is not in the quarter indicated by the associated names, and is, moreover, with greater probability appropriated to another ancient locality. See ZENAX.

2. A city on the border of Issachar (Josh. xix, 21; Sept. Ἰεὼν καὶ Τορμάν, Alex. Ἰν Γαννίμ; Vulg. *En-Gannim*); allotted with its "suburbs" to the Gershonite Levites (xxi, 29; Sept. Πηγὴ γαρμάντων; Vulg. *En-Gannim*); probably the same (see *Reiland, Palest.* p. 812) as the *Ginsea* (Γινσαία) or *Gennim* (Γεννίμ) of Josephus, on the borders of the great plain toward Samaria (*Ant.* xx, 6, 1; *War*, iii, 3, 4; comp. ii, 12, 3), which Biddulph (in *Purchas*, ii, 135) identifies with the present *Jenin*, a town 15 miles south of Mount Tabor, and which he and others describe as still a place of gardens and abundant water (Wilson, *Lands of Bible*, ii, 84; Van de Velde, *Narrative*, ii, 359; Schwarz, *Palest.* p. 167). In the lists of Levitical cities in 1 Chron. vi, ANEM is substituted for Engannim, apparently by contraction. The position of *Jenin* is in striking agreement with the requirements of BETHEG-GAN (A.V. "the garden-house;" Sept. Βαθγάν) in the direction of which Abaziah fled from Jehu (2 Kings ix, 27). The rough road of the ascent was probably too much for his chariot, and, keeping the more level ground, he made for Megiddo, where he died (Stanley, *Palest.* p. 342). The place is several times noticed by Arabian writers in connection with the march of Saladin, and has been visited by many modern travellers (Robinson, *Researches*, iii, 156). The only remains of *Ginsea* are a few foundations of walls close to the mosque of the present town (De Sauley, *Narrative*, i, 78, 79). The town is high enough to overlook the broad plain, and low enough to have its houses encircled by its verdure. The hills rise steeply behind, dotted with bushes, and here and there clothed with the sombre foliage of the olive. Rich gardens, hedged with prickly pear, extend along their base, and a few palm-trees give variety to the scene.

The "fountain," from which the town took the first part of its Scripture name (*En*), is in the hills a few hundred yards distant; and its abundant waters flow over and fertilize the "gardens" (*Gannim*) from which the second and chief part of the name is derived. The leading road from Jezreel and the north to Samaria and Jerusalem passes *Jenin*. It contains about 2000 inhabitants, and is the capital of a large district (Porter, *Handbook*, p. 351; Thomson, *Land and Book*, ii, 189).

En-ge'di [many *En'-gedi*, some *En-ge'di*] (Heb. *Eyn Gedi'*, עַיִן גֵּדִי, fountain of the kid; Sept. in Josh. Ἡργαδί v. r. Ἀγκαδῖς, in Sam. Ἐργαδί, in Chron. and Cant. Ἐργαδέει v. r. Ἰργαδί and ἐν Γαδί, in Ezek. Ἐργαδέει v. r. Ἰργαδέει, Apocr. ENGADDI; Josephus Ἐργαδί; Ptolemy Ἐργαίαι, v, 16, 8; Stephanus Byz. Ἐργαδά, p. 333; Eusebius Ἡργαδί, *Onomast.* s. v.; Pliny, *Engudd*, *Hist. Nat.* v, 17), a town in the wilderness of Judah (Josh. xv, 62), on the western shore of the Dead Sea (Ezek. xlvii, 10), which gave its name to a part of the desert whither David withdrew for fear of Saul (Josh. xv, 62; 1 Sam. xxiv, 1-4). Its more ancient name was HAZEZON-TAMAR (q. v.), and by that name it is mentioned before the destruction of Sodem, as being inhabited by the Amorites, and near the cities of the plain (Gen. xiv, 7); a title ("the pruning of the palm") doubtless derived from the palm-groves that surrounded it (Ecclus. xxiv, 14). It was immediately after an assault upon the "Amorites, that dwelt in Hazezon-tamar," that the five Mesopotamian kings were attacked by the rulers of the plain of Sodom (Gen. xiv, 7; comp. 2 Chron. xx, 2). Saul was told that David was in the "wilderness of En-gedi;" and he took "300 men, and went to seek David and his men upon the rocks of the wild goats" (1 Sam. xxiv, 1-4). These animals still frequent the cliffs above and around the fountain: the Arabs call them *Beden*. At a later period En-gedi was the gathering-place of the Moabites and Ammonites who went up against Jerusalem, and fell in the valley of Berachah (2 Chron. xx, 2). It is remarkable that this is the usual route taken in the present day by such predatory bands from Moab as make incursions into Southern Palestine. They pass round the southern end of the Dead Sea, then up the road along its western shore to the pass at *Ain-Jidy* (the ascent by the cliff *Ziz*," 2 Chron. xx, 16), and thence toward Hebron, Tekoa, or Jerusalem, as the prospects of plunder seem most inviting. The vineyards of En-gedi were celebrated by Solomon (Cant. i, 14); its balsam by Josephus (*Ant.* ix, 1, 2). Stephanus of Byzantium places it near Sodom; Jerome at the south end of the Dead Sea (*Comm. in Ezek.* xlvii); but Josephus more correctly upon the Lake Asphaltites, at the distance of 300 stadia from Jerusalem (*Ant.* ix, 1, 2; comp. xvi, 13, 4; *War*, iii, 3, 5). In the time of Eusebius and Jerome, En-gedi was still a large village on the shore of the Dead Sea, but it must have been abandoned very soon afterwards, for there is no subsequent reference to it in history, nor are there any traces of recent habitation (Porter's *Handbook*, p. 242). There is a curious reference to it in Mandeville (*Early Trav.* p. 179), who says that the district between Jericho and the Dead Sea is "the land of Dengadda" (Fr. *d'Engadda*), and that the balm-trees were "still called vines of Gady." En-gedi has always, until recently, been sought at the north end of the Dead Sea (Reiland, *Palest.* p. 449); but in 1805 Seetzen recognised the ancient name in the *Ain-Jidy* of the Arabs, and lays it down in his map at a point of the western shore nearly equidistant from both extremities of the lake. This spot was visited by Dr. Robinson, and he confirms the identification (*Researches*, ii, 209-216). The site lies among the mountains, a considerable way down the descent to the shore. Here is a rich plain, half a mile square, sloping very gently from the base

of the mountains to the water, and shut in on the north by a lofty promontory. About a mile up the western acclivity, and at an elevation of some 400 feet above the plain, is the fountain of Ain-Jidy, bursting forth at once in a fine stream upon a sort of narrow terrace or shelf of the mountain, having an abrupt margin towards the lake. The water is sweet, but warm, and strongly impregnated with lime. The stream rushes down the steep descent of the mountain below, and its course is hidden by a luxuriant thicket of trees and shrubs belonging to a more southern clime. Near this fountain are the remains of several buildings, apparently ancient, although the main site of the town seems to have been farther below. The whole of the descent below seems to have been once terraced for tillage and gardens, and near the foot are the ruins of a town, exhibiting nothing of particular interest, and built mostly of unhewn stones. This we may conclude was the town which took its name from the fountain. On reaching the plain, the brook crosses it in nearly a straight line to the sea. During a great part of the year it is absorbed in the thirsty soil. Its banks are now cultivated by a few families of Arabs, who generally pitch their tents near this spot. The soil is exceedingly fertile, and in such a climate it might be made to produce the rarest fruits of tropical climes; but vineyards no longer clothe the mountain-side, and neither palm-tree nor balsam is seen on the plain.

THE WILDERNESS OF EN-GEDI is doubtless the immediately neighboring part of the wild region west of the Dead Sea, which must be traversed to reach its shores. It was here that David and his men lived among the "rocks of the wild goats," and where the former cut off the skirts of Saul's robe in a cave (1 Sam. xxi, 1-4). "On all sides," says Dr. Robinson, "the country is full of caverns, which might then serve as lurking-places for David and his men, as they do for outlaws at the present day." He adds that, as he came in sight of the ravine of the Ghôr, a mountain-goat started up and bounded along the face of the rocks on the opposite side (*Researches*, ii, 203). M. de Sauley imagines that he has identified the particular cave in question with one in that vicinity now called *Bir el-Makukieh* (*Narrative*, i, 162).—Kitto, s. v.; Smith, s. v.

**Engelbert**, abbot of Admont, of the Benedictine order in Styria, was born of noble parents about 1250. He became abbot of Admont about 1297, and died 1331, leaving a great number of works, of which the principal are: *De ortu, progressu et fine imperii Romani*, published by Gaspard Brusch (Basle, 1553, 8vo; Mentz, 1603, 8vo);—*Tractatus super passionem secundum Mattheum; de statu defunctorum; de Providentia; de causa longevitatis hominum ante diluivium*;—*Speculum virtutum*. Several of his works were published by the learned Benedictine monk Pez, partly in the *Thesaurus Anecdotorum Novissimus* (Augsb. 1721), partly in the *Bibliotheca ascetica antiquo-nova* (Ratisbon, 1723-25). A biography of Engelbert, and a complete list of all his works, are given by Pez, both in an introductory essay in the 1st volume of the *Thesaurus* and in the preface to the 3d volume of the *Bibliotheca*.—Hoefler, *Nov. Biog. Génér.* xvi, 48; Wetzer u. Welte, *Kirchen-Lex.* iii, 589. (A. J. S.)

**Engelbert, SAINT**, archbishop of Cologne, was a son of count Engelbert I of Berg-Geldern, and was born in 1185. When he was twenty-two years old the diocese of Münster was offered to him, but he declined it on the ground of youth and inexperience. In 1215 he was elected archbishop of Cologne. With great energy he reorganized the electorate, which, under the administration of his predecessors, had become quite disordered. He extinguished its debt, recovered those portions of its territory which had been lost, and acquired new ones. When the emperor Friedrich II

was called to Italy, Engelbert was appointed head of the regency to which was intrusted the administration of the empire. As archbishop, Engelbert made the utmost endeavors to reform the corrupt habits of the clergy, and to repel the interference of the nobility in ecclesiastical affairs. The rigor with which he carried through his principles made him many enemies, and on Nov. 7, 1225, he was surprised and assassinated at Gevelsberg by his nephew, count Friedrich von Isenburg. The murderer was captured and broken on the wheel; the bishops of Münster and Osnabrück, who were charged with complicity, were excommunicated; and Engelbert, on account of his zeal for enlarging the power of the Church, was enrolled in the number of saints. A life of Engelbert, by Cæsar of Heisterbach (q. v.), was, in 1630, edited by Gelenius, with many learned remarks and additions (*Index libertatis ecclesie et martyri St. Engelbertus*, Colonia, 1630); see also Ficker, *Engelbert der Heilige*, Cologne, 1853; Wetzer u. Welte, *Kirchen-Lex.* iii, 590. See also COLOGNE. (A. J. S.)

**Engelbrecht, JOHANN**, a visionary religionist, was born in Brunswick 1599. He was sickly from his youth, and suffered dreadfully from melancholy, caused by physical pain as well as by mental disturbance. He believed himself (after 1623) the subject of revelations and visions, and went from house to house preaching and narrating his supernaturally acquired knowledge of heaven and hell. Some preachers, like Paul Egard, in Holstein, gave very favorable testimonials of his character and his preaching; but the larger number took offence at his pretended revelations, and persecuted him. In Hamburg, where he spent several years, he was imprisoned. During the last years of his life he lived in great retirement in his native city. He died in 1644. Though unlettered, he wrote several books, especially a *View of Heaven* (Brunswick, 1625); and they were collected in 1640, and again in 1697, into editions of his *Werte und Offenbarungen* (Brunsw. and Amsterd.). Some of his writings have been translated into French and English.—Herzog, *Real-Encyklop.* iv, 32.

**Engelhardt, JOHANN GEORG VEIT**, a German theologian, was born at Neustadt on the Aich, Nov. 12, 1791. After studying for three years at the University of Erlangen, and being for several years a tutor in two noble families, he was, in 1817, appointed deacon at a church in Erlangen and professor at the gymnasium. In 1820 he became lecturer at the University of Erlangen, and obtained the degree of doctor of divinity; the next year he was advanced to an extraordinary, and in 1822 to an ordinary professorship at the university. The latter position he retained until his death, Sept. 13, 1855. For several years he held the office of university preacher, and five times he was elected rector of the university. From 1845 to 1848 he was deputy of the university in the Bavarian diet. The king of Bavaria conferred upon him the title of ecclesiastical councillor and the order of St. Michael, and the city of Erlangen the right of honorary citizenship. In the history of theological literature, Engelhardt has secured a lasting place by his manuals of Church history and history of doctrines (*Handbuch der Kirchengeschichte*, 4 vols., Erlangen, 1833-34; *Dogmengeschichte*, 2 vols., Neustadt, 1839). He gave special attention to the study of the history of mystic theology. His intention to write a comprehensive history of this theology he did not find time to carry out, but he wrote a number of separate articles on the subject. Among the most important of this class of his works are those on Dionysius Areopagita (*Dissertatio de Dionysio plotiniano*, Erlangen, 1820; *De origine scriptorum Areopagiticorum*, Erlang. 1823; *Die angebl. Schriften des Areopagiten Dionysius, übersetzt u. mit Abhandlungen begleitet*, Erlang. 1823, 2 vols.); on Plotinus (*Plotin's Enneaden, übersetzt u. mit*

*Anmerkungen*, part i, Erlangen, 1820, incomplete); on Richard of St. Victor and Ruysbroek (*Rich. von St. Victor u. Joh. Ruysbroek*, Erlang. 1838). Several other works on kindred topics are preserved in MS. in the library of the Erlangen University. Next to mystic theology, the study of the Church fathers was one of his favorite occupations, to which we owe a work on patristics (*Leitfaden zu Vorlesungen über Patristik*, Erlang. 1823). He also left in MS. a complete translation of Irenæus. A biographical sketch of Engelhardt is given in the funeral sermon by his colleague, professor Thomasius (Erlang. 1855). See Herzog, *Real-Encyclop.* xix, 479. (A. J. S.)

**Engine** (*μηχανή*, *machine*, 1 Macc. v, 30, etc.; 2 Macc. xii, 15, etc.), a term exclusively applied in Scripture to military affairs. Such instruments were certainly known much earlier than the Greek writers appear to admit, since figures of them occur in Egyptian monuments, where two kinds of the *testudo*, or penthouse, used as shelters for the besiegers, are represented, and a colossal lance, worked by men who, under the cover of a *testudo*, drive the point between the stones of a city wall. See FORT.

were of much inferior strength. Darts varied similarly from small beams to large arrows, and the range they had exceeded a quarter of a mile, or about 450 yards. All these engines were constructed upon the principle of the sling, the bow, or the spring, the last

Roman Balista.

Ancient Egyptian Testudo.

1. The Hebrew  $\text{כִּישְׁשָׁבוֹן}$ , *chishshabon'* (2 Chron. xxvi, 15), lit. *invention* (as in Eccles. vii, 29), is its counterpart in etymological meaning, each referring to the *ingenuity* (engine, from *ingenium*) displayed in the contrivance. The engines to which the term is applied in 2 Chron. were designed to propel various missiles from the walls of a besieged town; one, like the *balista*, was for stones, consisting probably of a strong spring and a tube to give the right direction to the stone; another, like the *catapulta*, for arrows, an enormous stationary bow. The invention of these is assigned to Uzziah's time—a statement which is supported both by the absence of such contrivances in the representations of Egyptian and Assyrian warfare, and by the traditional belief that the *balista* was invented in Syria (Pliny, vii, 56). Of the *balista* and cata-

ping an elastic bar, bent back by a screw or a cable of sinews, with a trigger to set it free, and contrived either to impel darts by its stroke, or to throw stones from a kind of spoon formed towards the summit of the spring. (See Smith's *Dict. of Class. Antiq.* s. v. *Tormentum*.) See WAR.

Roman Catapulta.

*pulta* it may be proper to add that they were of various powers. For battering walls there were some that threw stones of fifty, others of one hundred, and some of three hundred weight; in the field of battle they

Ancient Assyrian War-engine.

2. Another military engine with which the Hebrews were acquainted was the battering-ram, described in Ezek. xxvi, 9 as  $\text{מִכְּבֹּלֹה}$ , *mechi' kobollo'*, lit. a *beating of that which is in its front*, hence a ram for striking walls; and still more precisely in Ezek. iv, 2, xxi, 22 as  $\text{כָּר}$ , *kar*, a *ram*. The use of this instrument was well known both to the Egyptians (Wilkinson, *Anc. Eg.* i, 353) and the Assyrians. The references in Ezekiel are to the one used by the latter people, consisting of a high and stoutly-built framework on four wheels, covered in at the sides in order to protect the men moving it, and armed with one or two pointed

weapons. Their appearance was very different from that of the Roman *aries* with which the Jews afterwards became acquainted (Joseph. *War*, iii, 7, 19). No notice is taken of the *testudo* or the *vineæ* (comp. Ezek. xxvi, 9, *Vulg.*), but it is not improbable that the Hebrews were acquainted with them (comp. Wilkinson, i, 361). The marginal rendering "engines of shot" (Jer. vi, 6; xxxii, 24; Ezek. xxvi, 8) is incorrect. An engine for battering the wall is mentioned in the reign of king David (2 Sam. xx, 15); but the instrument itself for throwing it down may have been that above noticed, and not the battering-ram. The ram was, however, a simple machine, and capable of demolish-

Roman Battering-ram worked by hand.

ing the strongest walls, provided access to the foot was practicable, for the mass of cast metal which formed the head could be fixed to a beam lengthened sufficiently to require between one and two hundred men to lift and impel it; and when it was still heavier and hung in the lower floor of a movable tower, or *helepolis*, it became a most formidable engine of war—one used in all great sieges from the time of Demetrius, about B.C. 306, till long after the invention of gunpowder. Towers of this kind were largely used at the destruction of Jerusalem (q. v.) by the Romans.—Kitto, s. v.; Smith, s. v. See BATTERING-RAM.

Roman covered Battering-ram mounted on Wheels.

Roman *Helepolis* or movable Tower and Battering-ram combined.

**England, Church of.** The proper designation of this church since the Act of Union in 1801 is "The United Church of England and Ireland." The Reformed Church of England dates from the 16th century; but it is convenient to treat in this article of the rise of Christianity in England, and of its growth under the protection of the State. (The free churches of England are given under their several titles in this work.)

**I. HISTORY.**—(I.) *Early Period* (to the mission of Augustine, A.D. 596). 1. *To the Saxon Invasion*, A.D. 449. It is generally believed that Christianity was introduced into Britain before the end of the 2d century. Tertullian († about 220) speaks of places in Britain not reached by the Romans, but yet subject to Christ (*Britannorum inaccessa Romanis loca, Christo vero subdita*). Eusebins, indeed, declares that some of the apostles preached in Britain (*Decm. Evang.* iii, 7); Stillingfleet (*Origines Britannicæ*, c. i), Cave (*Lives of the Apostles*), and others, insist that St. Paul was the founder of British Christianity. Clemens Romanus (A.D. 101) says that Paul went to the limits of the West (το ἄκρον τῆς ἕσπερος, *1 Epist. ad Cor.*); and Theodoret († 457) says that Paul brought salvation to the isles of the ocean (ταῖς ἐν τῷ πελάγει ὑακριναις ἡσίαις, in *Psalm cævi*). But none of these hints amount to proof. Other traditions use the names of St. James, of Simon Zelotes, and of Joseph of Arimathea; asserting that the latter came over A.D. 35, or about the twenty-first year of Tiberius, and died in England. Of all this there is no proof (Fuller, *Ch. Hist. of Britain*, i, 13; Stillingfleet, *Orig.* c. iv; Short, *Ch. History of England*, i, § 2). Another legend is that an English king, Lucius, sent messengers to Eleutherius († 192), bishop of Rome, asking for Christian instruction; that the messengers were converted and ordained, one a bishop and the other a teacher; and that on their return king Lucius and his chief men were baptized, and a regular Church order established (Collier, *Ecl. History*, vol. i, ch. i; Smith, *Religion of Ancient Britain*, ch. v). But it is very doubtful whether there ever was a king Lucius, and the whole story is now generally discredited.

The Gospel having been introduced into Britain, a Christian Church subsisted there, though not always in an equal degree of vigor, till the persecution of Diocletian. It then acquired new strength from the fortitude of its martyrs. Though the names of only three have been recorded (St. Alban, Aaron, and Julius), yet all historians agree that numbers suffered in Britain with the greatest constancy and courage (compare Gildas, § 8; Bede, i, 6, 7). The first martyr is said to have been St. Alban, who lived in the town of Verulam, which had a Roman colony; he had been converted from paganism by a teacher to whom he had afforded protection from the general persecution. Though Constantian, the Roman governor of Britain, had an inclination to favor the Christians, yet it was not in his power to dispense with the edicts of the emperors, and he complied so far with them as to demolish the churches. Though he died a pagan, yet he granted to the Christians the free exercise of their religion, and protected them from injury or insult. This emperor died at York, and was succeeded by his son Constantine, A.D. 306 (Carwithe, *Hist. of Christian Church*, chap. xvi). The best illustration of the early organization of Christianity in Britain is the fact that three British bishops attended the council at Arles, A.D. 314, the canons of which have among their signers *Eborius* episcopus, de civitate Eboracensi, provincia Britannia; *Restitutus* episcopus, de civitate Londinensi, provincia suprascripta; *Adelfius* episcopus, de civitate colonia Londinensium (perhaps Colonia Lindi, i. e. *Lincoln*); compare Jac. Usserii *Brit. eccles. antiq.* (Lond. 1687); Bingham, *Orig. Ecl.* iii, 557 sq. British bishops also attended the councils of Sardica (A.D. 347) and of Ariminum (A.D. 359).

Little is accurately known of the real state of Christianity in this period. Pelagianism took root in Britain (the native country of Pelagius), and the British bishops called in Germanus and Lupus from Gaul, who refuted Pelagius at the conference of Verulam (A.D. 446). They also founded a cathedral at Llandaff, making Dubricius bishop, with extensive jurisdiction. The monastery of Banchor (Bangor), near Chester, was founded at about the same time.

2. *From the Saxon Invasion, 449, to the Invasion of Augustine, 596.*—Hengist and Horsa, retained by Vortigern, A.D. 449, to aid him with 5000 men in expelling the Scots and Picts from Britain, remained in the island as conquerors. The greater part of Britain was again plunged into barbarism, and Christianity kept its ground only in Wales and Cornwall. (Its history in Ireland and Scotland is given in separate articles.) The patron saint of Wales, St. David (6th century), is said to have been consecrated a bishop at Jerusalem; he held a synod against Pelagianism at Brey, and became archbishop of Caerleon (see DAVID, St.). In Cornwall the British rites and usages were preserved until near the end of the 7th century. Iona, where Columba (q. v.) established his foundations about 565, was a centre of light not only for Scotland, but also for north Britain (see IONA).

(II.) *Middle Age: Era of Submission to the Papacy (6th to 16th century).* Up to the 6th century British Christianity had been independent of Rome. But at that time Gregory the Great determined to seek the conversion of the English Saxons to Christianity. Ethelbert, king of Kent, had married a Christian wife, Bertha, daughter of Charibert, king of the Franks. She induced her husband to favor Christianity, and thus prepared the way for the mission of Augustine (sent by Gregory), who, with a number of monks, landed in 596. They converted Ethelbert, who was not only king of Kent, but Bretwalda, or chief of the Saxon monarchs. His example was soon followed by the kings of Essex and East Anglia, and gradually by the other chieftains of England. It is said that 10,000 English were baptized within the year of Augustine's arrival. In 597 Augustine went over to Arles, in France, where he was consecrated by bishop Virgilius, and on his return he became the first bishop of Canterbury. His see was immediately endowed by king Ethelbert, who likewise established the dioceses of Rochester and London. Another portion of the Anglo-Saxons were converted by Aidan and other Scottish missionaries. But the ecclesiastical system set up by the Roman missionaries was entirely of the Roman type, which differed from that of the Irish and of the old British Church in various points, e. g. the reckoning of Easter, the clerical tonsure, chrisms, etc. More important were the questions of the marriage of the clergy and of the papal jurisdiction. Wherever the Roman influence prevailed, the Roman view, of course, was adopted. But Scottish and Irish missionaries were also at work in the kingdom, and up to the 7th century the converts of the latter were probably in the majority. In 661, king Oswy of Northumberland held a conference at Whithy, where Colman (q. v.) of Lindisfarne maintained the old British and Irish views, and Wilfrid (q. v.) took the Roman side. The king was persuaded by Wilfrid (or perhaps by his queen, who was a Romanist), and went over to the Roman party. Colman and all his clergy then went to Ireland. In 688 the pope sent over Theodore to be primate of England, and under his administration (688–689) the Roman and British Christians (what remained of them) were fused into one body. See THEODORE. But for many ages we hear little of any exercise of jurisdiction by the popes in England: the English bishops and kings did not permit appeals to Rome. When Wilfrid, bishop of York, appealed, A.D. 680, against an English synod which had deposed him from his diocese, and obtained a decree in his favor

from the pope, that decree was disregarded in England, even Theodore himself refusing to obey it. From this period England was in formal connection with the see of Rome up to the time of the Reformation. A few great names shine amid the general gloom, e. g. Bede († 735), Alcuin († 804), king Alfred († 900). The Anglo-Saxon Church, from the time of Alfred, grew more and more Romanish. "At length, from the time of Gregory VII (A.D. 1073), the papal jurisdiction was pushed into England, as it was into other countries; legates made frequent visits, held councils, exacted subsidies. Appeals, dispensations, mandates, reserves, annates, bulls, and all the other inconveniences of papal usurpation, followed each other in rapid succession; and for four centuries no country in Europe suffered more, and with greater reluctance, than England. But the popes and the kings of England had, after much disputation, made their agreement, and the Church was their prey" (Palmer, *Ch. History*, ch. xxii).

The Norman Conquest took place A.D. 1066. From this period, for several centuries, the history of England is full of struggles between the ecclesiastical and royal power for supremacy. William the Conqueror refused to acknowledge the pope as his feudal superior, and declared his right to retain in his own hand the investiture of bishops and abbots which the early Saxon kings had possessed. He prohibited the publishing of papal bulls and letters of advice till they had been submitted to and approved of by him; and, further, he deprived the clergy of the right of excommunicating any of his nobles except with his express permission. On the other hand, "he confirmed by charter a law of Edward the Confessor, granting to the clergy title of cattle and profits, in addition to the ancient title of produce," and committed a still greater error in establishing ecclesiastical courts, to which alone clerical persons were thenceforth to be amenable. The "spiritual courts" became an enormous power in supporting the Roman domination. In 1076 celibacy was first made imperative on the English clergy. "Under Henry Beauclerc a synod met at Westminster, 1102, which passed various reforming measures, the nature of which attests the existing depravity and degradation of the Church. This synod prohibited simony, and the pope ruled that lay investiture was simony, and on this question a rupture between the pope and the king soon occurred. After a struggle to maintain the rights of investiture, which he had received with the crown, Henry felt himself compelled to relinquish them to the pope, and only got permission from the pope for bishops to do homage to him, if they chose, without being on that account removed from their sees. None of the proposed measures of reform accomplished any result. The morals of the clergy were thoroughly relaxed; murder by a person in holy orders was quite a usual occurrence; against such offenders there was no resort to common law, and ecclesiastical courts rarely interfered with them. A case of this kind gave rise to the protracted struggle between Thomas à Becket, archbishop of Canterbury, on the side of the pope, and Henry II. for himself and people" (Eadie, *Cyclopaedia*, s. v.). The "Constitutions of Clarendon" (see CLARENDON) were intended to secure the rights of the civil against the ecclesiastical power; but the resistance of Becket (q. v.), his murder, and the repentant fears of the king, caused their speedy revocation in all the points to which the pope objected. "It was not, however, till the reign of John, when England was laid under an interdict, and the king resigned his crown to the pope, that the papal encroachments rose to their height; and the weak reign of Henry III, which followed, did nothing to abate them. Edward I gave a check to the power of the clergy, subjected them to taxation, and passed the statute of mortmain (1279), which prohibited the transfer of land without the king's consent. There is little to be said as to innovations in doctrine

during these three centuries; but it may be noted that about the middle of this period, viz. 1213, the Council of St. John Lateran declared transubstantiation, or the bodily presence of Christ in the consecrated elements, to be a tenet of the Church" (Chambers, s. v.). In 1350 the important statute of *Provisors* was passed. It was provoked by the fact that most of the valuable English benefices were reserved to the pope or to alien clergy, and it provided that the pope should confer no English benefice on any one without consent of the king. The statute of *Premunire* (1389; enlarged 1393) forbade any interference of the Church with the statute of *Provisors*, and also all appeals from English civil courts to the pope. The statute of *Mortmain* (in Magna Charta), and the various amendments and additions to it, all aimed to prevent the accumulation of property in the Church. See *MORTMAIN*.

In the reign of Henry II certain German Church reformers found their way to England—probably Waldensian Christians; and, though they were bitterly persecuted, all the good seed did not perish. In 1327 John Wycliffe was born. As rector of Lutterworth he preached until his death against the supremacy of the pope, the abuses of the hierarchy, and the Romish doctrine of the sacraments. In 1377 he was arrested for heresy, but no harm came to him. His translation of the Scriptures, and other writings, made a great impression upon the more educated classes, but his labors had little effect upon the mass of the people. After his death more fruit appeared; and by 1400 his followers were numerous enough to form a party and to get the designation of *Lollards* (q. v.), and for a century persecution for Lollardism was common in England. "Henry IV thought it necessary to fortify his usurped position by assisting the bishops against the Lollards, and from this time to the Reformation there was an uninterrupted succession of confessors and martyrs. Sir John Oldcastle, lord Cobham, was the most illustrious of these sufferers. Fox gives a detailed account of nearly twenty individuals burned for heresy between the death of lord Cobham and 1509, when Henry VIII ascended the throne. To some extent, the blood of these martyrs was the seed of the Reformed Church; but we must not overlook the 'hidden seed,' which was growing secretly from the time that Wycliffe gave to his countrymen a translation of the Scriptures in their own tongue. The progress of learning, and especially the study of Greek, led to a better understanding of the sacred books, whilst the invention of printing (1442) caused a wider circulation of them" (Chambers, s. v.). See *WYCLIFFE*; *LOLLARDS*.

(III.) *From the Reformation to the present Time.*—The Church of Rome, however, was to all outward appearance fairly established in England at the time of the accession of Henry VIII in 1509 [see *HENRY VIII*], and his minister, cardinal Wolsey, maintained the splendor of the Church to a degree unexampled in England. Nevertheless, the great edifice was already undermined. In view of the facts cited in the last paragraph, it is absurd to say, as Roman writers do, that the source of the English Reformation is to be found in the vices of Henry VIII. However, it was not till the reign of that monarch that the Reformation in England in reality commenced. When Luther declared war against the pope, Henry wrote his treatise on the seven sacraments against Luther's book, *Of the Captivity of Babylon*, and was repaid by the pontiff with the title of "Defender of the Faith" (1521). The king had married his brother's widow, Catharine of Aragon, and was weary of her. Wolsey at first favored a divorce, "to revenge himself on Charles V for having disappointed him of the papacy; but after the king began to look with favor on Anne Boleyn, one of a house from whom Wolsey had everything to fear, he adopted a covert policy of opposition to the divorce he had suggested. When at last he was pressed on every side, with no open way before him, and his own

ruin imminent, his course became tortuous, and was marked by a constant endeavor to protract the proceedings, and delay any sentence being pronounced on this question by the pope. The issue was, in consequence of the advice of Cranmer, an appeal to the universities, and to the learned men of Christendom, for their opinion on this point, which was given in favor, for the most part, of Henry. The disgrace of Wolsey followed thereon. See *WOLSEY*. Henry's quarrel with the pope daily became more palpable. Convocation was summoned in 1531, and charged with breaking the statutes of *provisors* and *premunire*. They humbly offered to pay a fine. The first step towards a schism was made by this Convocation, but it was under the pressure of the court. They proclaimed the king of England 'only and supreme lord, and, as far as the law of Christ permits, even the supreme head of the Church of England.' In 1533, on the elevation of Cranmer to the see of Canterbury, he pronounced sentence of divorce between Henry VIII and Catharine; and the marriage of Anne Boleyn to Henry was publicly notified. The pope declared this illegal, and threatened, unless these doings were undone, that he would pronounce excommunication on Henry. To prevent any such proceedings affecting the stability of his throne and his succession, in the following year Henry caused Parliament to abolish all papal authority in England, and to stop all payments to the Roman exchequer. After this came, under Thomas Cromwell, acting as vice-regent, a blow upon popish power in England from which it never recovered—namely, first a visitation, and then, as a consequence, the suppression of the monasteries, because 'they had long and notoriously been guilty of vicious and abominable living.' Among the bishops there were two parties; one whose sympathies were with the pope, the other with reform; to the former belonged Bonner and Gardiner, to the latter Cranmer and Latimer. But it was necessary to have some authoritative declaration of what the Church of England held since it had rejected the pope; and hence, in 1536, the king, as head of the Church, issued a proclamation on this subject, and in 1539 Parliament passed an act for establishing the Creed, under the rather characteristic title, 'An act for abolishing diversity of opinions.' By this the doctrine of transubstantiation was taught, and the penalty of death by burning was attached to the denial of it. All who stood out for 'the necessity of the communion in both kinds, or for the marriage of priests, or against the observance of vows of chastity, or the propriety of private masses, or the fitness of auricular confession; all priests who shall marry after having advisedly made vows of chastity, shall suffer the pains of death as felons; and all those who maintain the same errors under any other manner may be imprisoned during the king's pleasure' (Mackintosh). Henry felt compelled to go on and increase the distance which separated him from Rome. There was in the Church a powerful party (Cranmer, Latimer, and many others of less note) that were of progressive tendencies, and to this party Thomas Cromwell, during his continuance in power, lent all his influence. His favor shown to the Protestant cause was one ground of his fall. About this time, too, several editions of the English Bible were printed and circulated with the permission of Henry. They were based upon Coverdale's translation. To Cranmer and Cromwell the permission to circulate them is due, and the command to place them in the cathedrals for public use, and for ministers to instruct their people in them. But the tide of political power now turned in favor of the Romanist party, and these permissions were withdrawn: the Bible became again for a time a prohibited book, and many who had received enlightened views of truth suffered bitter persecution. "In 1540 Cranmer persuaded Henry to appoint a commission, of which he was made a member, to draw up a formal

confession. This appeared under the title, *The Erudition of a Christian Man*. It indicates some progress, since it only recommends prayers for the dead as 'good and charitable; and because it is not known what condition departed souls are in, we ought only to recommend them to the mercy of God.' It affirms justification by faith, though it modifies this declaration so far as to add, 'Yet man, prevented by grace, is by his free consent and obedience a worker toward the attaining of his own justification.' It forbids the worship of images, though it allows their use to excite devotional feeling. It altered some minor matters also in the service. Such was the character of the Church of England's first confession. The Reformers were gaining strength, and under Edward VI and the Protector Somerset their triumph was undoubted. Thirty commissioners were sent through the country to abolish superstitious practices. Crammer drew up twelve homilies, which were appointed to be read in the churches where the ministers could not preach. This was one of the provisions made for the diffusion of sound religious knowledge. This step, and the sermons themselves, elicited the unqualified approbation of the Continental Reformers. Crammer wrote also a catechism, which was generally circulated. Such theologians as Bucer and Peter Martyr were invited to come and lecture in the English universities; and the most strenuous exertions were made to provide preaching; 'one sermon every quarter of the year at least' in every church being imperative. But such was the state of the Romish clergy that even this much they could hardly accomplish. In 1547 Parliament repealed the various persecuting acts of Henry VIII and earlier reigns, levelled against the new opinions, as they are often called. As Convocation was inclined in favor of the Romish party, Parliament assumed to itself the task of reforming the Church. It passed that year acts 'concerning the sacrament,' ordaining 'the communion to be received in both kinds,' forbidding the priest to communicate alone, and requiring him to prepare the people for worthily communicating by an exhortation on the day *preceding* its celebration. In 1548 there was a commission appointed for the revision of the offices of public worship. One of its first fruits was a new communion service. Confession was no longer made imperative. At the same time a new liturgy was compiled. At the end of it occurs the petition—'From the tyranny of the bishop of Rome and all his detestable enormities, good Lord, deliver us.' See COMMON PRAYER. In 1551 a farther series of emendations was made in the Prayer-book: in it very few alterations have since been introduced. The same year the Articles, then forty-two in number, were published. See ARTICLES, THIRTY-NINE. The commission appointed in 1552 to prepare a canon law, in consequence of the death of Edward, was discontinued before its work was done. Under his reign the progress of reformation had been rapid, but it was to be sorely tried. Mary ascended the throne (1553) and re-established Romanism. Bonner and Gardiner were restored; the Book of Common Prayer and Catechism were declared heretical; the kingdom was reconciled to the see of Rome; a persecution of the chief reformers commenced—Rogers was burned at Smithfield, Hooper at Gloucester, Saunders at Coventry, Taylor at Hadley. The prisons were filled with 'heretics;' many fled beyond sea; some purchased safety by an outward conformity. Crammer, Latimer, and Ridley perished in the flames at Oxford. Cardinal Pole was made primate. One benefit was conferred on the Church by Mary—she surrendered all the Church lands, as well as the first-fruits and tithes, which had been seized by Henry. At last the death of Mary (1558), with which that of the cardinal was all but simultaneous, delivered the Church from its oppressors. Under Elizabeth (1558-1603) Protestantism was again in the ascendant; and by the various measures

which were taken, the Reformation in England was completed. The Convocation of 1562, besides drawing up the Thirty-nine Articles, published two volumes of homilies by Crammer, Ridley, and Latimer, and caused Nowell, dean of St. Paul's, to draw up a catechism for general use. See NOWELL.

"About this time the more extreme reforming party began to appear (see PURITANS), and to exert their influence specially in all the questions which arose about the various ceremonies of the Church. Elizabeth's extreme jealousy of her supreme authority often obstructed the plans for reform which the more zealous clergy contrived—a jealousy which brought her into collision with the primate himself, as on the subject of 'the prophesyings.' The works of the great Continental divines, as Calvin and Bullinger, were studied in England; and the great standard work of Richard Hooker on *Ecclesiastical Polity*—which may be styled the apology of the Church of England—was published 1594-97.

"When James ascended the throne, both the Puritans and the Church party calculated on having his support. The Puritans hastened to present to him the famous Millenary Petition, which embodied a statement of those things in the Church which they desired to see amended. This elicited from the universities a counter-petition, and James held a conference with both parties at Hampton Court (q. v.), January, 1604. It resulted in no-good to the Puritans, for king James now thought Episcopacy was most conformable to monarchy, and the reply to their arguments he pithily put in the form 'No bishop, no king.' One advantage which ensued from this conference was the revision of the translation of the Bible, instituted at the suggestion of the leader of the Puritans, and the result was the present authorized version. During the reign of James the famous Synod of Dort met, and four English divines were sent thither by James. See DORT, SYNOD OF. Henceforward the Calvinistic party in the Church of England began to decline, and king James himself turned against it. James first issued the *Book of Sports* in 1618, and offended very many, because he thereby legally sanctioned certain amusements on the Sabbath day. Under Charles it was republished in 1663, the declaration affirming that it was done 'out of a pious care for the service of God . . . . and the ease, comfort, and recreation of our well-deserving people.' It was received with manifest disgust, and many of the clergy refused to obey the ordinance requiring its publication in the churches. In 1644 the House of Commons caused it to be burnt by the hangman. See SPORTS, BOOK OF." Under Charles, the High-Church party, with Laud at their head, rose to the highest power. The court of High Commission and the Star Chamber never had more constant employment, and their hateful tyranny most thoroughly roused the people. The severity of Laud occasioned the greatest discontent; and the Puritan party, as they could not maintain themselves in the Church, began to found special lectureships; but, on Laud's advice, the king issued instructions to the bishops to suppress all such. Forbearance at last came to an end. Then came the great rebellion and civil war, which led to the putting down of Episcopacy, and the establishment of Presbyterianism on the basis of the *Westminster Confession*, though afterwards Independence took the lead. Laud was condemned the day after the House of Commons established Presbyterianism, and executed January 10, 1645.

"With the restoration of Charles II occurred the restoration of Episcopacy in England. The Sunday after his return heard the liturgy read in almost every parish church. The Puritans, who are henceforward known as Presbyterians (q. v.), having greatly contributed to the restoration, were treated at first by Charles with kindness, and several of their number were offered high ecclesiastical preferments. In 1661

the famous Savoy Conference (q. v.) met, with Baxter as leader of the Presbyterian party, and Sheldon as that of the bishops, to try, if possible, to unite both sides. As might have been expected, the plan failed. In 1662 the Act of Uniformity was passed; and, rather than take the test it prescribed, 2000 Puritan clergy left the Church of England. Then, in quick succession, followed those persecuting acts, the Corporation, Conventicle, and Five-miles Acts. Still further grievances were inflicted by the Test Act of 1672. Next arose another school of divines—'Christian philosophers rather than divines.' Their lives were moral, but they eviscerated the Gospel of all that was characteristic of it. When a plan for 'comprehension' was revived in 1668, the House of Commons prohibited such a measure being introduced. When James, duke of York, professed Roman Catholicism, Charles at once proclaimed complete toleration. This was in 1672; but the Commons the year following compelled him to withdraw his indulgence. Popery they were determined to resist. When James came into power he proclaimed similar indulgences, and forbade preaching against Romanist errors: nay, in defiance of the enactment of 1651, he re-created the court of High Commission. These measures the clergy resisted. In consequence of his resistance, the bishop of London was suspended for a time. The University of Cambridge came into collision with the king, and also Magdalen College, Oxford. Rather than do what might advantage Rome, the Nonconformists did not avail themselves of the royal indulgence. But James renewed his declaration, and commanded that it should be published in the churches. Eighteen out of twenty-five bishops refused to do so, and nearly all the clergy. The bishops were commanded to cite the recusants, but they refused. Seven of them—Sanicroft, Lloyd, Ken, Turner, Lake, White, and Irelawney—even drew up a remonstrance, and, as a consequence, were sent to the Tower. Their committal to it had rather the appearance of a triumphal entry, from the enthusiasm displayed by the people on their behalf. They were tried at Westminster Hall, and the news of their acquittal was received with rapturous delight on all hands, for all felt that they were committed to a struggle against an insidious attempt to restore Popery. The royal career of James was now ending, and his further schemes were not developed, for that very year the Prince of Orange landed (5th of November, 1688). One of William's earliest acts was the passing of a toleration bill in 1689; but an act of comprehension was rejected in the Commons. In September of that year a commission was appointed to revise the liturgy and canons, and reform ecclesiastical abuses; but all their proposals were rejected by Convocation. Three of the seven bishops mentioned above refused the oath of allegiance to William and Mary. They headed the party known as the Nonjurors, which ceased to exist as an independent Episcopal Church in 1780; but many of them became attached to the Scottish Episcopalians" (Chambers, s. v.). See NONJURORS.

During the period just described a school of divines was formed who, in seeking to avoid Puritanism on the one hand, and Romanism on the other, became Latitudinarians. "They became Christian philosophers rather than divines; and, except an occasional dissertation on the Trinity or a Whitsunday sermon, in which the work of the Holy Spirit was carefully guarded against fanatical abuses, they scarcely interfered with matters of Christian doctrine. Still they were men of blameless lives, and in a slothful age remarkable for pastoral diligence. Amongst the leaders were Whitecoate, Cudworth, Wilkins, and Worthington; some of these were known to be men of eminent piety, but it was more apparent in their lives (and, since their deaths, by their private diaries) than in their preaching. They were equally afraid of superstition on the one hand, and enthusiasm on the

other. They loved the constitution of the Church, and were well satisfied with the liturgy; but they did not think all other forms unlawful. They wished to see a spirit of greater moderation. They continued on good terms with Nonconformists, and allowed great freedoms, not only in philosophical speculations, but in religion; and the boldness of their inquiries into the reasonableness, rather than the scriptural warrant of the truths of religion, led them to be regarded as Socinians. They were all zealous against Popery; and the Papists cried them down, in return, as Athelists, Deists, or, at best, Socinians, and men of no principles at all. In the society of these men, Tillotson, Patrick, Lloyd, and Stillingfleet were trained—the greatest divines of the next generation, but still with the faults of the school in which they had been educated. They received, and long bore, the title of the Latitudinarian divines; and, in the sense in which we have explained it, the charge was just. They attempted a divorce between evangelical doctrine and Christian practice. The former they at first neglected, and at length lost out of sight; the latter they displayed with admirable clearness, and, if any other principles than those of the Gospel could possibly have enforced it, they would not have so completely failed. But the founders of the school made no deep impression in the days of Charles II, and their still more gifted pupils saw religion in the Church of England almost expiring in spite of all their efforts" (Marsden, *Churches and Sects*, i, 286). "In 1698 the Church of England gave birth to two noble philanthropic schemes—the Society for the Promotion of Christian Knowledge, which circulates Bibles, Prayer-books, and Tracts; and in 1701 the Society for the Propagation of the Gospel in Foreign Parts was chartered." In 1747 Convocation was dissolved. See CONVOCATION.

"That the Church of England, after fighting for its very existence against Popery on the one hand, and against Puritanism on the other, should have subsided into inactivity during the dull reigns of the Georges, is less a matter of surprise than of regret. The peaceful enjoyment of her temporalities in a dull, irreligious, not to say infidel age, may easily account for, though it cannot excuse, her illness. But that in the rise of John Wesley, 1730, she should have failed to see a grand opportunity for herself, is a matter of both surprise and regret; she, however, let it pass; nor can she hope that such another will ever again present itself. See METHODISM; WESLEY. The utmost that can be hoped is that she has seen her error.

"The next important event in the history of the Church is the Act of Union, which came into effect on the 1st of January, 1801, and united the churches of England and Ireland in all matters of doctrine, worship, and discipline. The Reformation had made some progress in Ireland under Edward VI. Five Protestant bishops were appointed in 1560, and the English Bible and Liturgy were introduced in 1551; but, from a variety of causes, the Reformed doctrines have never found much acceptance with the native population, and, although a Protestant Church was established by law, it was and is the Church of the minority. See IRELAND. In 1635 the English Articles were received, and in 1662 the English Book of Common Prayer was adopted by Convocation. Before the political union of the countries, the two churches were in full communion. By an act of the imperial Parliament in 1833, ten of the Irish bishoprics were suppressed, and the funds thus obtained were applied to the augmentation of small livings, and the building and repair of churches" (Chambers, *Cyclopaedia*, s. v.). It is now proposed (1868) to "disestablish" the Episcopal Church in Ireland, and the proposal will doubtless be carried into effect.

In the progress of the 19th century great changes have passed over the Church of England. The formation of the Church Missionary Society (see MIS-

SIONARY SOCIETIES), of the Bible Society, etc., and especially the influence of Methodism, awakened the long dormant spirit of aggressive Christianity. Since 1800 more than 3000 churches have been erected. About 1830 several earnest young men in the University of Oxford gave signs of profound theological study, and of deep interest in Church questions. In reaction, perhaps, from the latitudinarianism of the 18th century, their studies lay chiefly in the fathers and mediæval writers, and in 1833 they began the publication of the Oxford tracts, calling for a revival of obsolete usages, and bringing up again Romanist or quasi-Romanist views in theology. A brief history of this movement is given under PUSEYISM; it must suffice to say here that many young clergymen, as the result of the movement, went over to Rome; and those of the school who remained gave rise to the modern RITUALISM (q. v.), which tends to import the spirit, doctrines, and practices of the Church of Rome into the Church of England. In the autumn of 1867 a conference of bishops of the Church of England, and of the churches in communion with the English, was held at Lambeth. The chief object of this synod was to promote a closer union between all branches of the Anglican Church. A resolution censuring bishop Colenso, of Natal, for his deviation from the doctrine of the Church, was adopted by all save three votes. The pastoral letter, signed by the bishops, warned the people against Romanizing tendencies, but made no reference to controversies within the Church. A Greek translation of the pastoral letter was officially transmitted by the archbishop of Canterbury to all the patriarchs and bishops of the Greek Church. See PAN-ANGLICAN SYNOD. In order to promote the interest of intelligent laymen in the affairs of the Church, a "Church Congress" was called in 1860, which from that time has held annual sessions. See CHURCH CONGRESS. Several attempts were made by the High-Church party to introduce monastic institutions. Thus the Rev. Mr. Lyne, assuming the name of father Ignatius, endeavored to establish an Anglican branch of the Benedictine order, but the first monastery of the order at Norwich had, after a trial of a few years, to be abandoned. At Bristol a community of the Third Order of St. Benedict was organized. The Rev. Mr. Macconochie, in 1867, established a Society of the Holy Cross, of which he was the first master. But thus far (1868) all these attempts have met with but little success. See MONASTICISM. The High-Church party exhibited a great desire to bring on a closer union with the Eastern churches. A special society, the Eastern Church Association (see below, *Statistics*), was established to promote the cause, and the Convocations of Canterbury and York gave their official approval of the scheme. See EASTERN CHURCHES, GREEK CHURCH, and PROTESTANT EPISCOPAL CHURCH. Official communications for the same purpose were also opened with the Church of Sweden, but this step was strenuously opposed by one portion of the High-Church party on the ground that the Swedish Church held some heretical doctrines.

II. CONSTITUTION AND GOVERNMENT.—1. *Church and State*.—The constitution of the Reformed Church of England is that "of an authorized and paid establishment, which is not allowed to persecute those who dissent from it" (Short). The union of Church and State was completely secured by the statutes that followed the Reformation up to the Revolution of 1688. The English Church constitution remained nearly unchanged by the Reformation, only that the crown took the place of the pope. The course of subsequent legislation brought in, however, many important modifications of detail. The old statutes, though rarely enforced, were still law, excepting when expressly abrogated. One of the most important of these was the *Præmunire* (see above). The statute 25 of Henry VIII (1534), ch. xxi, declares entire independence of

Rome, and calls the king *supreme head* of the Church of England, according to the recognition of its prelates and clergy. This statute abolishes Peter's pence, and provides for the visitation of monasteries by royal commission.

During the reign of Mary Popery was restored, but all the statutes to that effect were repealed by stat. 1 of Elizabeth (1558-9), which transfers the headship of the Church from the pope to the English crown, and declares the *royal supremacy* perpetual. Every form of spiritual and ecclesiastical jurisdiction and prerogative is included in the declaration. The crown can exercise this authority through such officers as it may select, provided they be British subjects appointed by letters-patent. The act prescribes the oath of supremacy, to be taken by all civil and spiritual officers. See OATH OF SUPREMACY. The *Act of Uniformity* (1559) restored the Common Prayer, and required the clergy to conform strictly to it. The statute 13 Eliz. c. 11 (1571), incorporated the 39 articles which had been agreed upon by the Convocation of 1562 into the law of the land. This act, with the laws of supremacy and uniformity, and the articles, settled the government, the worship, and the doctrines of the Church. The queen, though subject to the Church order and doctrines, was invested with full power to govern the Church, and to fill the highest ecclesiastical offices. Church and State were fused together, for all citizens of the State were made members of the Church; the officers of the Church were officers of the State, and the head of the State was made head of the Church. The Revolution made several changes in the constitution of the Church. By stat. 1 William and Mary, ch. vi (April, 1689), the coronation oath was modified. In it the king swore not merely to govern according to the old laws and customs, but also to maintain the laws of God and the true confession of the Gospel, and of the Protestant Reformed religion as by law established; and to "preserve unto the bishops and clergy of this realm, and to the churches committed to their charge, all such rights and privileges as by law do or shall appertain unto them." The 8th chapter substituted a new form of the oath of allegiance, in which the recognition of the king's ecclesiastical supremacy is left out, and in its place stands a promise to obey the king truly; with an anathema of the impious doctrine that princes excommunicated by the pope should be deposed and executed, and that a foreign potentate can have ecclesiastical authority within the realm. The same statute (ch. xviii) removed some penalties from Dissenters, and made them eligible to office, provided they took the oath of allegiance personally, or by proxy, in case of conscientious objection to taking the special oaths of office. During the present century a number of acts have been passed annulling disabilities of Papists and Dissenters; and it is now the case that Dissenters and Romanists have religious freedom, are eligible to civil office, and are admitted to Parliament.

2. *Government*.—(1.) The king is the supreme head of the Church on earth, at least in name and form. Formerly the clergy made the following subscription: "That the king's (queen's) majesty, under God, is the only supreme governor of this realm, and of all other his highness's dominions and countries, as well in all spiritual or ecclesiastical things or causes as temporal," etc.; but by an act of Parliament of July 5, 1865 (28th and 29th Vict. cap. 122), persons to be ordained deacons or priests are required (1) to make a "Declaration of Assent" to the Thirty-nine Articles of Religion and to the Book of Common Prayer, and of the Ordering of Bishops, Priests, and Deacons; (2) to take the *Oath of Allegiance and Supremacy* (21st and 22d Vict. cap. 38), by which they swear to be faithful and bear true allegiance to the queen, and declare that no foreign prince, person, prelate, state, or potentate hath, or ought to have, any jurisdiction, power,

superiority, pre-eminence, or authority, ecclesiastical or spiritual, within this realm. "The highest Church offices are filled by the ministry in the name of the crown. The Privy Council, in which only temporals vote, is the highest court of appeal."

(2.) The management of the Church is in the hands of a hierarchy of archbishops and bishops, subject to the authority of the king and Parliament. The United Church of England and Ireland is divided into four provinces: two English, Canterbury and York; two Irish, Armagh and Dublin. These are under four mutually independent archbishops. The bishops, as well as the archbishops, are spiritual peers, excepting the bishop last consecrated, and the bishop of Sodor and Man, who does not sit in the House of Lords unless he happens to be a peer in his own right. Archbishops are chosen by the crown from among the bishops. The sovereign also nominates the bishops. The Church is governed, "under her majesty, by archbishops, bishops, deans, archdeacons, and the rest that bear office in the same" (Can. vii). The archbishops and bishops alone have the power to ordain clergymen; and these ordinations take place, according to canon law, at "allotted certain times," and "only on the Sundays immediately following *jejunia quatuor temporum*, commonly called Ember weeks." Candidates for the ministry are usually graduates of Cambridge or Oxford, or Trinity College, Dublin, or else of Durham, Lampeter, or St. Bees; but the bishops are not bound to restrict ordination to members of any university or college. Approved candidates take "the oath of supremacy," sign a declaration that they will conform to the liturgy, and subscribe three articles: the first affirming the supremacy of the sovereign in the Church; the second asserting that the Book of Common Prayer contains nothing contrary to the word of God, and that the ordained person will use the form of the said book; and the third, that they hold all "the Thirty-nine Articles." The candidate is first ordained a deacon, and so continues for one year. At the expiration of this term he undergoes an examination; and when this is satisfactory, he is admitted by the bishop to the order of priest, or presbyter. Several of the presbyters, as well as the bishop, lay their hands simultaneously on the head of every candidate, while the bishop repeats the form prescribed in the ordination service. When once ordained a presbyter, he is competent to take any duty or to hold any preferment in the Church.

(3.) The country is divided into parishes, and many of these have been of late years subdivided. See PARISH. The property of the Church of England is obtained through many different channels, and is very valuable: the total revenues are estimated as being not under five millions a year; and yet so unequal is the distribution, that there are, out of 10,500 benefices, not less than 6800 with incomes under £300 a year; and of these there are 3460 livings whose annual value is under £150. The curates have a very inadequate compensation, the ordinary pay ranging, in large towns, from £70 to £150.

The total number of benefices in 1867 was 12,888. Of late some reforms have been effected by the Parliament. There is a special board of "ecclesiastical commissioners for England to administer the state patronage of ecclesiastical benefices. In their twentieth report, issued in 1868, they state that in the current year they expect to complete the scheme which, in their report of 1864, they proposed to accomplish within five years. Every living with less income than £300 a year which then existed, and contained, according to the census of 1861, a population of 4000 persons, will, on the 1st of March, 1869, have had its income raised to £300 a year, except those cases in private patronage where the one half of the augmentation which the patrons were required to provide from non-ecclesiastical sources has not been forthcoming.

In their report of 1853 the commissioners referred to an arrangement which had been entered into with the dean and chapter of York, whereby the capitular estates (subject to subsisting leases) had become vested in the commissioners, and in lieu thereof the dean and chapter were to receive an annuity until the commissioners should restore to them real estates in possession calculated to produce an income equal to such annuity; and it was estimated that the arrangement would at a future date yield a considerable surplus for the augmentation of small livings. At the close of 1852 the chapter of Carlisle effected a similar commutation. In 1855 the Cathedral Commission advised that all the improved revenue derived from the better management of capitular property should be appropriated to the augmentation of capitular incomes, and to the improvement of cathedral institutions. In 1856 a committee of the House of Commons sat to consider the proceedings of the ecclesiastical commissioners, and in their third report set out the details of the York chapter commutation, and observe, "Such agreements tend to facilitate enfranchisement, and to provide funds for the endowment of poor livings, as well as to afford a ready means of providing estates in possession for the ecclesiastical corporations." In the year 1854 the chapters of Peterborough and Chester; in 1855, the chapter of Gloucester; in 1856, St. Asaph; in 1857, Worcester; in 1860, Chichester; in 1861, Winchester and Salisbury; in 1862, Bristol, Canterbury, and Exeter; in 1866, Wells, Rochester, and St. David's; and in 1867, the chapters of Llandaff and Windsor, effected similar commutations of their capitular estates. All these arrangements have been successively sanctioned by orders in council. Commutations have thus been effected with no fewer than eighteen chapters. Under these commutations the chapters gave up their ancient estates in consideration of annual money payments to be received by them, pending their re-endowment with real estates in possession; and in 1862 the permanent estate of the chapter of York; in 1863, that of Peterborough; in 1865, those of Carlisle and Chichester; in 1866, those of Chester, Gloucester, and Canterbury; and in 1867, that of Winchester, were reassigned. As a consequence, the commissioners, in the period between 1864 and 1868, considered the local claims of the parochial cures upon the estates of the chapters of York, Peterborough, Carlisle, and Chichester, and, so far as the value of the property would permit, the requisite grants were made to such parochial cures." See below, *Patronage and Statistics*.

(4.) The only ecclesiastical assembly of the English Church is *Convocation* (q. v.), which is a convention of the clergy to discuss Church affairs in time of Parliament. As the Parliament consists of two distinct houses, so does this Convocation; the one called the upper house, where the archbishops and bishops sit severally by themselves; the other the lower house, where the rest of the clergy are represented by their deputies. The power of the Convocation is limited by a statute of Henry VIII. They are not to make any canons or ecclesiastical laws without the royal license; nor, when permitted to make any, can they put them in execution but under severe restrictions. In the year 1661 the English Convocation granted a subsidy to king Charles II, which was the last tax of this nature paid by the English clergy; for, by an arrangement made between archbishop Sheldon and lord chancellor Clarendon in 1664, the Convocation of the clergy thenceforward gave up the privilege of taxing themselves to the House of Commons, in consideration of being allowed to vote at the election of members of that house (Eden). Of late, the Convocations, both of Canterbury and York, have again been permitted to meet, talk, vote addresses to the crown, etc., but they have no real power. See CONVOCATION.

(5.) *Canons*.—In the Convocation which met at the time of the Parliament of 1604, the canons by which

the Church of England is still governed were passed. They are said to have been collected by Bancroft from the canons of the ancient Church, and the articles, injunctions, and acts of Convocation during the reigns of Edward and Elizabeth. They received the royal sanction, but were not carried through the two houses of Parliament, and are not, therefore, laws of the realm. They bind the clergy only, and that by virtue of their promise of canonical obedience. Many of them have been virtually repealed by subsequent enactments, especially the Toleration Act. Many of those that remain are such that the best and wisest members of the Church would gladly see them repealed. See CANONS OF THE CHURCH OF ENGLAND.

(6.) *Patronage*.—The theory of the Church of England is that whoever originally built a church is entitled to choose its minister in perpetuity—i. e. is the *patron* of the living. What follows on this point is from a Church of England writer (Marsden, *Churches and Sects*, i, 332): “In a few instances this right is still vested in the descendants of the original patron, but these must be rare. The right of patronage is now a salable commodity, transferred, or sold by auction, to the highest bidder, like any other real property, and the patronage of the Church of England is consequently dispersed wherever wealth has found its way: 1144 benefices are in the gift of the crown; 1853 in that of the bishops; 938 in that of cathedral chapters and other dignitaries; 770 in that of the universities and collegiate bodies; 6092 in private persons; and 931 (vicarages or perpetual curacies) in the incumbent of the mother church. The good and evil of this system are so nearly balanced that thoughtful and wise men are to be met with every day who, as they look at the favorable or dark side of the question, are disposed to cherish it as the nearest approach that is ever likely to be made in practice to a perfect theory; or, on the other hand, to reject it as unjust and full of danger. Its evils lie upon the surface, and they are by no means slight. It has a tendency to promote a subservient spirit, inconsistent with the courage and simplicity of the Christian minister, towards those in whose hands patronage is vested, for upon them advancement in the Church depends. It excludes many valuable men from livings of importance, and thrusts many incompetent men into stations for which they are but meanly qualified. It fills our choicest parishes with men rather well bred than deeply learned—men of courtesy and benevolence rather than a fervent zeal; and, consequently, the parish church wears to the poor man too frequently something of a cold and aristocratic air. He is spoken to by his superior in the presence of his superiors, and he retires to the dissenting chapel, not that he prefers dissent, but that he meets with sympathy and feels himself at home. Patronage is either held by individuals, or vested in corporations or in trustees; but the individual may have little sense of religion; he may give away his church on considerations of friendship, or he may look upon it merely as a provision for a younger son. Corporate bodies have less conscience than individuals. Previous to the act for reforming municipal corporations twenty years ago, most of the livings in our ancient towns and boroughs were in the gift of our municipal corporations. Their appointments, on an average, were certainly not better than those of private patrons; religion slumbered in our great towns not less profoundly than in our country villages. Several trusts have been formed of late years for the purchase of advowsons (an advowson is the right of presentation in perpetuity), and none can deny them at least the praise of pure disinterestedness. They have expended large sums to obtain in return the right of placing zealous ministers of evangelical principles in populous places. But all these various methods of patronage labor under the same defect—the congregation whose spiritual interests are to be committed to

the new pastor, and the parishioners amongst whom, as their friend or their example, he is to live and die, have no voice whatever in the momentous choice. The party most interested looks on with indifference, or hope, or silent resignation. The English lay churchman, in the most important event that can affect his parish during his lifetime, finds everything done for him; it is only on trifling matters that he is consulted. He may help to build the school, he may discharge the duties of churchwarden, but with regard to the appointment of the minister he has no right to speak.” A remarkable illustration of the way in which ecclesiastical wealth is monopolized by certain families is afforded in the case of Richard and George Pretyman, sons of the bishop of Lincoln, which is stated in the *Methodist Quarterly*, 1853, p. 157.

III. DOCTRINES.—(1.) The doctrinal standards of the united Church of England and Ireland are, after the Scriptures, the Book of Homilies, the Thirty-nine Articles, and the Prayer-book. (a) *The Homilies* (q. v.) were composed by Cranmer, Latimer, and Ridley, men of unexceptionable learning and orthodoxy; or, according to others, the first book was written principally by Cranmer, and the second by Jewel. They were appointed to be read in churches at the beginning of the Reformation, when, by reason of the scarcity of learned divines, few ministers were found who could safely be trusted to preach their own compositions. (b) The first draught of the *Articles* was composed by archbishop Cranmer, assisted by bishop Ridley, in the year 1551; and after being corrected by the other bishops, and approved by the Convocation, they were published in Latin and English in 1553, and amounted to forty-two in number. In 1562 they were revised and corrected. Being then reduced to thirty-nine, they were drawn up in Latin only; but in 1571 they were subscribed by the members of the two houses of Convocation, both in Latin and English, and therefore the Latin and English copies are to be considered as equally authentic. See ARTICLES, XXXIX. (c) During the last century disputes arose among the clergy respecting the propriety of subscribing to any human formulæ of religious sentiments. Parliament, in 1772, was applied to for the abolition of the subscription by certain clergymen and others, whose petition received the most ample discussion, but was rejected by a large majority. It has been generally held by most, if not all Calvinists, both in and out of the Church, that the doctrinal parts of the articles are Calvinistic. This opinion, however, has been warmly controverted. It is no doubt nearer the truth to conclude that the articles are framed with comprehensive latitude, and that neither Calvinism nor Arminianism was intended to be exclusively established (Watson, s. v. *Church*). See Puller's *Moderation of the Church of England considered*, 1679 (new edit. Lond. 1843, 8vo); and also see ARMINIANISM, vol. i, p. 416, 417; ARTICLES LAMBETH, vol. i, p. 441. The articles contain, however, what the Church of England holds to be a fair scriptural account of the leading doctrines of Christianity, together with a condemnation of what she considers to be the principal errors of the Church of Rome and of certain Protestant sects. As far as they go (and there are many things unnoticed by them), they are a legal definition of the doctrines of the Church of England and Ireland, though the members of that communion look to the Prayer-book as well as to the articles for the genuine expression of her faith. The articles are far more thoroughly Protestant than the Prayer-book, taken as a whole. Although the articles expressly assert that the Church of Rome has erred, attempts have repeatedly been made by the High-Church party of the Church of England to show that there is no irreconcilable difference between the Thirty-nine Articles and the decrees of the Council of Trent, and that a construction can be put upon them fully harmonizing them. To show this was, in particular, the object of

Dr. Newman's celebrated tract (*Tracts for the Times*, No. 90, Oxf. 1839), and more recently of Dr. Pusey's *Eirenicon* (Lond. 1865; N. Y. 1866). See also *Christ. Remembrancer*, Jan. 1866, art. vi.

(2.) For the preservation of doctrine and discipline in the Church of England, many provisions are made both by the civil and canon law. Whoever shall come to the possession of the crown of England shall join in communion with the Church of England, as by law established (12 and 13 Will. III, ch. ii, § 3). By the 1 Will. III, ch. vi, an oath shall be administered to every king or queen who shall succeed to the imperial crown of this realm, at their coronation; to be administered by one of the archbishops or bishops; to be thereunto approved by such king or queen, that they will do the utmost in their power to maintain the laws of God, the true profession of the Gospel, and Protestant Reformed religion established by law; and will preserve unto the bishops and clergy of this realm, and to the churches committed to their charge, all such rights and privileges as by law do or shall appertain unto them, or any of them. And by the 5 Anne, ch. v, the king, at his coronation, shall take and subscribe an oath to maintain and preserve inviolably the settlement of the Church of England, and the doctrine, worship, discipline, and government thereof, as by law established (§ 2).

(3.) In practice there is no definite creed or system of theology in the Church of England. Its members have always been divided into parties. There has always been a Sacramentarian party, approximating in doctrine to the teachings of Rome, though it has never had great influence since Laud's time until the recent rise of Puseyism (q. v.). And, on the other hand, there have never been wanting representatives of the Puritan or Evangelical school. The latter party finds its stronghold in the Articles, the former in the Liturgy. At present a division prevails into three great sections, which are styled High-Church, Low-Church (or Evangelical), and Broad-Church. The first party holds to apostolical succession, the divine right of episcopacy, and generally adheres to the sacramentarian view of the Church's life. The Puseyites have been drawn chiefly from this party. The Low-Church, or Evangelical party, holds, in general, that episcopacy is not *essential* to the being of the Church, though some evangelicals, so called, hold it in as high esteem as High-churchmen. The Low-churchmen recognise the claims of Presbyterians and dissenters as members of Christ's body. In doctrine they are chiefly Calvinists. The Broad-Church party, though of recent origin, embraces a large number of the most cultivated men in the Church, such as Kingsley, Maurice, Stanley, and, in fact, most of Dr. Arnold's pupils and sympathizers. The tendency of this party is towards what is called liberal Christianity.

At the present time (1868) the Church of England is agitated by proposals of change on many sides. Archdeacon Wilberforce, who went over to Rome some years ago, issued an "explanation," in which he inquires how far the popular principle of subscription to the English formularies is compatible with the rule of Church authority. The system he believes to be altogether bad, while it has not even the merit of being able to settle the differences which exist among individual churchmen. He says: "The difficulty becomes greater when it is considered that the clergy are divided into various parties, who are widely opposed to one another in almost every particular. It may be allowable, perhaps, to employ the phraseology of a recent reviewer, who has distributed them into three classes, which he designates as High, Low, and Broad. The last may be expected to be comparatively inattentive to matters of doctrine, regarding the Church chiefly as a social institution, designed merely to raise the standard of morals and ameliorate the manners of men. But the High and Low agree in one

point, if in nothing else, that to contend for the truth is the first duty of Christians. They differ, however, respecting almost every point of doctrine. One believes the Church to be the body of Christ, inhabited by his Spirit; the other supposes it to be little more than a religious club. One believes in baptismal regeneration and in the real presence; the other speaks of the sacraments as if they were only acted sermons. One affirms Christ to speak by the voice of his priests, and that deadly sin requires absolution; the other affirms that the priest's words are no more effective than those of his parish clerk. Yet both parties, as well as the Broad, who lie between them, subscribe to the same formularies, which they interpret avowedly in contradictory senses, and from which they deduce the most opposite results. If all this does not arise from the laxity of those who subscribe, but from the ingenuity of those who devised our formularies, they must certainly have been the greatest masters of equivocal expression whom the world has known." Subscription to the English formularies, he says, was originally imposed, and is still rendered by High-churchmen, on the principle that the Church's judgment should guide her members; but the Gorham case showed that the Church of England has transferred the decision respecting doctrines to the civil power, and that the most opposite statements respecting matters of faith are taught under her sanction. See GORHAM CASE. There exists in England a "Liturgical Revision Society," from whose "Declaration of Principles and Objects" we extract the following: "The members of this society are moved by such 'weighty and important considerations' as arise from 'the exigencies' of *these present times*, to seek further 'changes and alterations in the Prayer-book;' some of which, as the most necessary, they now proceed to specify: 1. The Rubric: the word priest to be changed. 2. The Ordination Service: words abused to the purposes of sacerdotal assumption to be altered. 3. The Visitation of the Sick: the absolution to be omitted or qualified. 4. The Baptismal Offices: words asserting the spiritual regeneration of each recipient to be altered. 5. The Catechism to be revised. 6. The Burial Service: general language to be employed in expressing hope for the departed. 7. The Athanasian Creed: the damnable clauses to be omitted. 8. The Apocryphal Lessons to be replaced by Scripture." The chief aim of this society is "to bring the Book of Common Prayer into closer conformity with the written word of God and the principles of the Reformation, by excluding all those expressions which have been assumed to countenance Romanizing doctrine or practice."

At present (1868) Romanizing tendencies are plainly on the increase in the Church of England, and there is apparent danger of a total separation of many ministers and members of this Church from the common faith of the reformed churches organized in the 16th century. The High-Church party has several schools, one of which (the Old School), while gladly concurring in all efforts for widening the breach between "the Church" and the "sects," yet continues in earnest opposition to the errors of Rome. Others, looking more at what is common to the Church of Rome and the Church of England than at what separates them, hope that the Church of Rome, by means of an "Episcopalian" movement, will gradually come over to the Anglican ground. This party builds great hopes especially upon the movements in Italy of such men as cardinal Andrea and Passaglia. There is, finally, an extreme party, which makes every other consideration subordinate to the desire to establish the union with Rome, and which has of late proceeded farther in this direction as a party than has ever been done before. It is this party which in 1867 sent a letter to cardinal Patrizi asking for some kind of recognition from Rome. It also aims at re-establishing monastic orders, and is specially conspicuous by "Ritualistic"

innovations in divine worship, endeavoring to conform the service altogether to that of the Roman and Eastern churches. Until recently this party was more noted for zeal and fervor than for intelligence and ecclesiastical standing, but of late they have gained an immense advantage by the open declaration of Dr. Pusey in their favor. In his *Eirenicon* (1866, 12mo) he explains away the chief doctrinal differences between the Articles and the Catechism of Trent, though, at the same time, he treats severely the personal infallibility of the pope, and the increasing Mariolatry of the Roman Church. Dr. Pusey also advocates the confessional and monastic life. The latest development of this school is to be found in the series of volumes entitled *The Church and the World* (edited by the Rev. Orby Shipley).

On the other hand, there is a large party of Rationalists in the Church of England whose type of opinion is to be found in the *Essays and Reviews* (1860), and whose extreme representative is perhaps bishop Colenso, of Natal, who has published several volumes of so-called criticisms, in which the inspiration and authenticity of the Old Testament are repudiated. No power has been discovered, either in the Church of England or in the laws of the land, to deal with the Romanizers on the one hand, or the Rationalists on the other.

IV. STATISTICS.—The Established Church of England is divided into two ecclesiastical provinces, Canterbury and York. Each province has a Convocation (q. v.) consisting of two houses, the upper house embracing the archbishop and all the bishops of the provinces, and the lower house a number of deans, archdeacons, and proctors. The bishops of the Church in England, in 1868, were as follows: 1. *Province of Canterbury*.—1. Canterbury (archbishop); 2. London; 3. Winchester; 4. Exeter; 5. St. David's; 6. Chichester; 7. Lichfield; 8. Oxford; 9. St. Asaph's; 10. Hereford; 11. Llandaff; 12. Lincoln; 13. Bath and Wells; 14. Salisbury; 15. Norwich; 16. Bangor; 17. Rochester; 18. Worcester; 19. Gloucester; 20. Ely; 21. Peterborough. II. *Province of York*.—1. York (archbishop); 2. Durham; 3. Manchester; 4. Ripon; 5. Carlisle; 6. Chester; 7. Sodor and Man (each diocese is treated of in a special article of the *Cyclopaedia*, where full statistics and the name of the present incumbents are given). The 32 dioceses of Ireland, formerly divided into four provinces) were reduced to 12 by the Church-Temporality Act (passed 1833). *Armagh* has 6 dioceses: Armagh, Derry, Down, Kilmore, Meath, Tuam. *Dublin*, 6: Dublin, Cashel, Cloyne, Killaloe, Limerick, Ossory. See IRELAND. In connection with the Church of England are also a number of colonial and missionary bishops. They were, in 1867, as follows: I. *Europe*.—Gibraltar. II. *Asia*.—1. Calcutta (metropolitan); 2. Bombay; 3. Labuan and Sarawak; 4. Madras; 5. Colombo; 6. Victoria; 7. Jerusalem. III. *Africa*.—1. Capetown (metropolitan); 2. Mauritius; 3. Grahamstown; 4. St. Helena; 5. Orange River State; 6. Central Africa; 7. Natal; 8. Sierra Leone; 9. Niger region. IV. *Australasia*.—1. Sydney (metropolitan); 2. Adelaide; 3. Melbourne; 4. Newcastle; 5. Perth; 6. Brisbane; 7. Goulburn; 8. Tasmania; 9. New Zealand (metropolitan); 10. Christ Church; 11. Nelson; 12. Wellington; 13. Waiapu; 14. Dunedin; 15. Melanesia; 16. Honolulu; 17. Grafton and Armidale. V. *America*.—1. Montreal (metropolitan); 2. Toronto; 3. Newfoundland; 4. Fredericton; 5. Nova Scotia; 6. Huron; 7. Colombia; 8. Quebec; 9. Ontario; 10. Rupert's Land; 11. New Westminster; 12. Jamaica; 13. Barbadoes; 14. Antigua; 15. Nassau; 16. Guiana.

The following is a list of the principal Church Societies, with a brief account of their work: 1. *Society for promoting the Employment of additional Curates in populous Places* (established in 1837). This society, besides making annual grants towards the maintenance of additional clergymen, grants sums, not exceeding

£500 in any single grant, in aid of endowments. Income for 1867-68, £32,464. 2. *The Church Pastoral Aid Society* (1836) aims at providing means for maintaining curates and lay agents in largely peopled districts. Total receipts in the year 1866-67, £47,829; in 1867-68, £61,745. 3. *The Incorporates Society for promoting the Enlargement, Building, and Repairing of Churches and Chapels in England and Wales* (1818) had, in 1867-68, an income of £8422. This society was incorporated by act of Parliament in 1828; until 1851 it was supported by a triennial royal letter, which produced about £30,000; since then it has been dependent on annual subscriptions, donations, church collections, and legacies. 4. *The London Diocesan Church Building Society and Metropolis Church Fund* (1854) had, in 1867-68, an income of £45,130. 5. *The Church of England Scripture Readers' Association* provides by readers of the Scriptures to the poor, under the superintendence of the parochial clergy. Its income was, in 1867-68, £13,440. 6. *The National Association for promoting Freedom of Worship* (1858) has for its object "to promote the restoration of the ancient freedom of parish churches as the true basis of the parochial system, and the only means of relieving spiritual destitution; and the scriptural system of weekly offerings as the most excellent way; especially enjoined by the Church of England, of raising money for Church purposes, and as a substitute for pew-rents where endowments are not obtainable." 7. *Society for promoting Christian Knowledge*. This is the oldest society in the country. It supplies Bibles and Prayer-books either gratuitously or far below cost price, issues books and tracts of a "sound Church tone," suitable for schools, lending libraries, workmen's clubs and reading-rooms, hospitals, workhouses, jails, etc.; also for the use of soldiers, sailors, and emigrants. The income (independent of sales) for 1866-67 was £28,547; for 1867-68, £29,700. 8. *National Society for promoting the Education of the Poor in the Principles of the Established Church* (instituted 1811, incorporated 1817). The operations of this society embrace building school-rooms and teachers' dwelling-houses, maintaining colleges for the training of teachers, granting money towards paying the salaries of certificated teachers, etc. The National Society, during the time of its existence, has made grants to the amount of more than £400,000, and this amount has been supplemented by at least £1,200,000 of private contribution for the building of schools, besides originating the expenditure of an immense annual sum for their sustentation. The total number of schools in connection with this society in 1865 was 12,421, in which there were 1,186,515 scholars. The total number of scholars in the Sunday-schools was 1,818,476. The number of schoolmasters and mistresses trained in the colleges of the society is about 140 a year, and about 4750 have been sent out during the last twenty-two years. The income of the society for 1864-65 was £20,267. 9. *The Prayer-book and Homily Society* desires to promote the circulation of the "Book of Common Prayer and the Homilies" of the Church, which it has had translated into thirty-three languages. Its income for 1866-67 was £1163; for 1867-68, £1247. 10. *The Poor Clergy Relief Society* has, since its establishment in 1856, assisted 1165 poor clergymen, and widows and orphans of clergymen, with the sum of £8254. In 1864-65 the income was £2062, and grants were made to 101 applicants. 11. *The Society for the Propagation of the Gospel in Foreign Parts* (incorporated in 1701) is the oldest of all the English, and one of the oldest of all the Protestant missionary societies of the world. The society aims as much as possible at establishing complete churches, with bishops at their head, and which shall ultimately become altogether independent of the society, wherever England has any territorial possessions. Its income in 1866-67 was £91,186; in 1867-68, £114,546. 12. *The Church Missionary Society for Africa and the*

East was founded in 1799. Its work is chiefly among the natives of the countries in which its missions are established. Its income in 1866-67 was £150,357, and in 1867-68, £157,288. 13. *The Colonial and Continental Church Society.* Its leading object is to send clergymen, catechists, and teachers of the Church of England to settlers in the English colonies, and to British subjects in other parts of the world. The income for 1866-67 was £31,079; for 1867-68, £34,120. 14. *The English Church Union* was formed in 1859 for the purpose of "watching over the interests of the Church of England; of resisting, by a combination of its members, the attempts of dissenters and others to alienate the rights and injure the position of the Church; and also for the purpose of developing its internal energies." It is intended to be the central organ of the High-Church party. The union is managed by a council of twenty-four elected and five ex-officio members, thirteen of these being clergymen and the remaining sixteen laymen. 15. *The Association for the promotion of the Unity of Christendom* was formed in 1857 for the purpose of uniting in a bond of intercessory prayer members both of the clergy and the laity of the Roman Catholic, Greek, and Anglican communions. The members promise to use daily a brief prayer for the peace and unity of the Church. In 1865 the association numbered 8827 members, divided as follows: Roman Catholics, 1271; Orientals, including Servians and Armenians, 360; uncertain or miscellaneous, 75; Anglicans, 7121. 16. *The Eastern Church Association* was founded in 1864. Its objects were stated to be to inform the English public as to the state and position of the Eastern Christians; to make known the principles and doctrines of the Anglican Church to the Christians of the East; to take advantage of all opportunities which the providence of God shall afford for intercommunion with the orthodox Church, and also for friendly intercourse with the other ancient churches of the East; to assist, as far as possible, the bishops of the orthodox Church in their efforts to promote the spiritual welfare and the education of their flocks. It counts among its members English, Scotch, American, colonial, and Greek bishops. 17. *The Anglo-Continental Society* has for its object to make the principles of the English Church known in the different countries of Europe and throughout the world, and to aid in the reformation of national churches and other religious communities. 18. *The English Church Association* was established in 1865 as the central organization of Low-Churchmen. Its chief object is to counteract and prevent the spreading of High-Church and Romanizing tendencies in the Church. 19. *The South American Mission Society*, established in 1852. Its object is to send out missionaries to the native tribes of South America, to Englishmen in spiritual destitution there, and to take advantage of any opening for evangelization. Its means was in 1866-67, £7431, and in 1867-68, £9902. 20. *Irish Church Missions to Roman Catholics.* According to the nineteenth annual report, published in May, 1868, the income was £25,577; the year before it was £22,507. 21. *The London Society for promoting Christianity among the Jews*, established in 1809. The officers must be members of the United Church of England and Ireland, or, if foreigners, of a Protestant Church. Its income was in 1866-67, £33,327, and in 1867-68, £36,075.

At the last official census taken in Great Britain in 1861, in England and Scotland no inquiries were made as to the creed of the inhabitants. For Ireland, the population connected with the E-established Church was, in 1861, according to the official census, 678,661. As in England the Church herself makes no attempt to find out her statistics, nothing but estimates can be given on this point. As regards places of worship, number of sittings, and estimates of Church attendants, the statistics of the Established Church com-

pared as follows with the aggregate statistics of all other religious bodies :

Religious Bodies.	Places of Worship.	Number of Sittings.	Estimate of Church Attendants.
Church of England . . . . .	14,077	5,317,915	3,773,474
All other religious denominations . . . . .	20,300	4,894,648	3,487,558

According to this table, of all the church sittings, 51.9 per cent. belonged to the Church of England, and 48.1 per cent. to the other religious denominations; and of the Church attendants, likewise about 52 per cent. to the Church of England, and 48 to others. Other statistics, as, for instance, the annual marriage statistics, give to the population connected with the Church of England from 65 to 70 per cent. of the population. The two statements may be reconciled by taking 52 per cent. as that portion of the total population which is practically and actively connected with the Church, while it is, on the other hand, probable that fully 65 per cent. sustain a nominal connection with the Church. Since the beginning of the present century, the progress of the Church of England in point of places of worship and Church attendants has been less rapid than that of the other religious denominations taken together. For detailed comparative statistics, see GREAT BRITAIN.

Besides the national universities of Oxford and Cambridge, Durham University and King's College, London, the Church of England has the following theological training institutions: St. Bees (Cumberland), with 80 students, and St. Aidan's (Birkenhead), with 63 students; also a training department at Birmingham College, the London College of Divinity at St. John's Wood, and Lampeter College, Wales.

The following table gives the number of parishes and the number of clergy in each of the English dioceses; also the total population of the territory embraced in each diocese.

Dioceses.	Population of Dioceses in 1861.	Number of Clergy.	Number of Parishes.	Average Population to each Clergyman.
Canterbury . . . . .	474,602	536	357	887
York . . . . .	930,216	744	554	1259
London . . . . .	2,570,079	716	324	3590
Durham . . . . .	855,065	351	245	2445
Winchester . . . . .	1,267,794	1012	599	1252
St. Asaph . . . . .	246,337	250	185	985
Bangor . . . . .	195,390	195	134	1040
Bath and Wells . . . . .	422,527	660	481	640
Carlisle . . . . .	266,591	327	272	815
Chester . . . . .	1,248,416	598	370	2088
Chichester . . . . .	363,735	592	311	614
St. David's . . . . .	437,689	527	411	821
Ely . . . . .	489,716	720	529	667
Exeter . . . . .	953,763	954	694	950
Gloucester & Bristol . . . . .	568,574	648	459	877
Hereford . . . . .	223,491	466	358	498
Lichfield . . . . .	1,221,494	879	625	1350
Lincoln . . . . .	766,026	1029	801	675
Llandaff . . . . .	421,326	319	250	1320
Manchester . . . . .	1,679,326	601	385	2794
Norwich . . . . .	667,704	1161	908	575
Oxford . . . . .	515,083	856	699	602
Peterborough . . . . .	486,977	715	556	681
Ripon . . . . .	1,103,394	630	444	1751
Rochester . . . . .	609,914	84	54	758
Salisbury . . . . .	377,737	611	471	562
Sodor and Man . . . . .	52,460	45	31	1166
Worcester . . . . .	857,775	661	442	1294
Total for England and Wales . . . . .	20,269,671	17,067	12,539	1200

For farther accounts of the statistics of the Church of England, see the annual *Clergy List* (which also contains a complete list of all the benefices, with names of patrons, etc.); Rivington's *Ecclesiastical Year-book for 1865*; *Christian Year-book* (Lond. 1867 and 1868); Schem, *Amer. Eccles. Year-book for 1859* (N. Y. 1860), and *Amer. Eccles. Almanac for 1868* (N. Y. 1868).

Dublin, 1847, vols. v, vi); Smith, *Religion of Ancient Britain* (Lond. 1846, 12mo); Churton, *Early English Church* (Lond. 1858, 3d edit. 18mo); Soames, *Anglo-Saxon Church* (Lond. 1828, 2d edit. 8vo); *Ib. Doctrines of Anglo-Saxon Church* (Bampton Lecture, 1830); *Ib. Latin Church during Anglo-Saxon Times* (Lond. 1848, 8vo); *Ib. Elizabethan Religious History* (Lond. 1839, 8vo); *Ib. Reformation* (Lond. 1826-8, 4 vols. 8vo); Fuller, *Church History of Great Britain* (1655, fol.; new edit. Lond. 1837, 3 vols. 8vo); Warner, *Ecclesiastical History of England* (1765, 2 vols. fol.); Inett, *Origines Anglicanæ*, History from 6th century to death of King John, 1216 (Lond. 1704-10, 2 vols. fol.; new edit. Oxford, 1855, 3 vols. 8vo); Carwithen, *History of the Church of England* (Oxford, 1849, 2d edit. 2 vols. 12mo); Grant, *Summary of the History of the English Church and of the Sects*, etc. (Lond. 1811-1826, 4 vols. 8vo); Collier, *Ecclesiastical History of Great Britain* (1708, fol.; new ed. by Barham, Lond. 1840, 9 vols. 8vo); Brown, *Compendious History of the British Churches* (Edinb. 1820; 2d edit. 1823, 2 vols. 8vo); Baxter, *Church History of England* (2d ed. Lond. 1849, 8vo); Short, *Sketch of the History of the Church of England to 1688* (Lond. 1840, 3d edit. 8vo); Anderson, *History of the Church of England in the Colonies* (Lond. 1856, 2d edit. 3 vols. 8vo); *Annual American Cyclopaedia*, 1863, and all the following volumes, art. Anglican Church.

On the history of the English Reformation, see REFORMATION. For general statistics of Christianity in the British Islands, see GREAT BRITAIN; IRELAND; SCOTLAND.

**Engles, Joseph Patterson**, D.D., was born in Philadelphia Jan. 3, 1793. He was educated at the University of Pennsylvania, and graduated in July, 1811. In 1813 he was appointed co-master of the grammar-school in the same institution with Rev. Dr. S. B. How. In 1817, Rev. Dr. S. B. Wylie and Mr. Engles founded an academy, under the name of the Classical Institute, which Mr. Engles continued until February, 1845, when he was elected publishing agent of the Presbyterian Board of Publication. He continued in this position until his death. Mr. Engles was a member and elder of the Scots Presbyterian Church, Philadelphia, having joined that church at the age of twenty, and very soon after having been chosen an elder of the same. Besides writing several smaller volumes for children and youth, he edited an edition of the Greek Testament, with various readings. He died suddenly on the night of April 14, 1861, of a disease of the heart from which he had been suffering for about a year.

**Engles, William M.**, D.D., a Presbyterian minister, was born in Philadelphia Oct. 12, 1797, and was educated at the University of Pennsylvania, where he graduated A.B. in 1815. After studying theology under the Rev. Dr. S. B. Wylie (q. v.), he was licensed to preach in 1818, and in 1820 became pastor of the Seventh Presbyterian Church in Philadelphia, which office he filled faithfully until his health failed in 1834, when he became editor of *The Presbyterian*. He edited that journal for over thirty years. In 1838 the Presbyterian Board of Publication made him their editor of books and tracts, and he continued in that work with great success till 1863. In one of their publica-

tions, it is stated that "the Board of Publication is probably more largely indebted to Dr. Engles than to any other one man for its existence and its usefulness, especially during the first twenty years of its history." Besides his constant editorial work, he wrote a number of small books on practical religion, many of which had a wide circulation. Of one of them, the *Soldier's Pocket-book*, in English and German, 300,000 were circulated among our soldiers during the civil war. He died in Philadelphia Oct. 12, 1867.—*American Annual Cyclopaedia*, vii, 296.

**English Versions of the Bible.** Passing over the lives of the individual translators, the long struggle with the indifference or opposition of men in power, the religious condition of the people as calling for, or affected by, the appearance of the translation, the time, and place, and form of the successive editions by which the demand, when once created, was supplied—all of which is given under more appropriate titles—we shall here aim to give an account of the several versions as they appeared; to ascertain the qualifications of the translators for the work which they undertook, and the principles on which they acted; to form an estimate of the final result of their labors in the received version, and, as consequent on this, of the necessity or desirableness of a new or revised translation; and, finally, to give such a survey of the literature of the subject as may help the reader to obtain a fuller knowledge for himself. In doing this we shall substantially adopt so much of Prof. Plumtre's art. in Smith's *Dict. of the Bible*, s. v. Versions, as relates to the subject. The present article has been carefully revised by the Rev. T. J. Conant, D.D., of Brooklyn.

1. *Early Translations.*—It was asserted by Sir Thomas More, in his anxiety to establish a point against Tyndal, that he had seen English translations of the Bible which had been made before Wycliffe, and that these were approved by the bishops, and were allowed by them to be read by laymen, and even by devout women (*Dialogues*, ch. viii-xiv, col. 82). There seem good grounds, however, for doubting the accuracy of this statement. No such translations—versions, i. e. of the entire Scriptures—are now extant. No traces of them appear in any contemporary writer. Wycliffe's great complaint is that there is no translation (Forshall and Madden, *Wycliffe's Bible*, Pref. p. xxi, ProL p. 59). The Constitutions of archbishop Arundel (A. D. 1408) mention two only, and these are Wycliffe's own, and the one based on his and completed after his death. More's statement must therefore be regarded either as a rhetorical exaggeration of the fact that parts of the Bible had been previously translated, or as arising out of a mistake as to the date of MSS. of the Wycliffe version. The history of the English Bible will therefore begin, as it has begun hitherto, with the work of the first great reformer. One glance, however, we may give, in passing, to the earlier history of the English Church, and connect some of its most honored names with the great work of making the truths of Scripture, or parts of the books themselves, if not the Bible as a whole, accessible to the people. We may think of Cædmon as embodying the whole history of the Bible in the alliterative metre of Anglo-Saxon poetry (Bede, *Hist. Eccl. iv*, 24); of Aldhelm, bishop of Sherborne, in the 7th century, as rendering the Psalter; of Bede, as translating in the last hours of his life the Gospel of John (*Epist. Cuthberti*); of Alfred, setting forth in his mother tongue, as the great ground-work of his legislation, the four chapters of Exodus (xx-xxiii) that contained the first code of the laws of Israel (Pauli's *Life of Alfred*, chap. v). The wishes of the great king extended further. He desired that "all the free-born youth of his kingdom should be able to read the English Scriptures" ["*Englisc gewritt*," which, however, may merely denote English literature in general] (*Ibid.*). Portions of the

Bible, some of the Psalms, and extracts from other books, were translated by him for his own use and that of his children. The traditions of a later date, seeing in him the representative of all that was good in the old Saxon time, made him the translator of the whole Bible (*Ibid.*, supp. to chap. v).

The work of translating was, however, carried on by others. One Anglo-Saxon version of the four gospels, interlinear with the Latin of the Vulgate, known as the Durham book, is found in the Cottonian MSS. of the British Museum, and is referred to the 9th or 10th century. Another, known as the Rushworth Gloss, and belonging to the same period, is in the Bodleian Library at Oxford. Another, of a somewhat later date, is in the same collection, and in the library of Corpus-Christi College, Cambridge. The name of Aldhelm, bishop of Sherborne, is connected with a version of the Psalms; that of Ælfric with an epitome of Scripture history, including a translation of many parts of the historical books of the Bible (Lewis, *Hist. of Transl.* ch. i.; Forshall and Madden, *Preface*; Bagster's *English Hexapla*, Pref.). The influence of Norman ecclesiastics, in the reigns that preceded and followed the Conquest, was probably adverse to the continuance of this work. They were too far removed from sympathy with the subjugated race to care to educate them in their own tongue. The spoken dialects of the English of that period would naturally seem to them too rude and uncouth to be the channel of divine truth. Pictures, mysteries, miracle plays, rather than books, were the instruments of education for all but the few who, in monasteries under Norman or Italian superintendence, devoted themselves to the study of theology or law. In the remoter parts of England, however, where their influence was less felt, or the national feeling was stronger, there were those who carried on the succession, and three versions of the Gospels, in the University Library at Cambridge, in the Bodleian, and in the British Museum, belonging to the 11th or 12th century, remain to attest their labors. The metrical paraphrase of the Gospel history known as the Ormulum, in alliterative English verse, ascribed to the latter half of the 12th century, is the next conspicuous monument, and may be looked upon as indicating a desire to place the facts of the Bible within reach of others than the clergy. The 13th century, a time in England, as throughout Europe, of religious revival, witnessed renewed attempts. A prose translation of the Bible into Norman-French, circ. A.D. 1260, indicates a demand for devotional reading within the circle of the court, or of the wealthier merchants, or of convents for women of high rank. Farther signs of the same desire are found in three English versions of the Psalms—one towards the close of the 13th century; another by Schorham, circ. A.D. 1320; another, with other canticles from the O. T. and N. T., by Richard Rolle, of Ilampole, circ. 1349; the last being accompanied by a devotional exposition—and in one of the Gospels of Mark and Luke, and of all Paul's epistles (the list includes the apocryphal epistle to the Laodiceans), in the library of Corpus-Christi College, Cambridge. The fact stated by archbishop Arundel in his funeral sermon on Anne of Bohemia, wife of Richard II, that she habitually read the Gospels in the vulgar tongue, with divers expositions, was probably true of many others of high rank. It is interesting to note these facts, not as detracting from the glory of the great reformer of the 14th century, but as showing that for himself also there had been a preparation; that what he supplied met a demand which had for many years been gathering strength. It is almost needless to add that these versions started from nothing better than the copies of the Vulgate, more or less accurate, which each translator had before him (Lewis, ch. i.; Forshall and Madden, *Preface*).

II. WYCLIFFE (born 1324, died 1384).—I. It is singular, and not without significance, that the first

translation from the Bible connected with the name of Wycliffe should have been that of part of the Apocalypse. The *Last Age of the Church* (A.D. 1356) translates and expounds the vision in which the reformer read the signs of his own times, the sins and the destruction of "Antichrist and his meynce" (=multitude). Shortly after this he completed a version of the Gospels, accompanied by a commentary, "so that pore Cristen men may some dele know the text of the Gospel, with the comyn sentence of the olde holie doctores" (Preface). Wycliffe, however, though the chief, was not the only laborer in the cause. The circle of English readers was becoming wider, and they were not content to have the book which they honored above all others in a tongue not their own. Another translation and commentary appear to have been made about the same time, in ignorance of Wycliffe's work, and for the "manie lewid men that gladlie would kon the Gospelle, if it were draghen into the English tung." The fact that many MSS. of this period are extant, containing in English a Monotessaron, or Harmony of the Gospels, accompanied by portions of the Epistles, or portions of the O. T., or an epitome of Scripture history, or the substance of Paul's epistles, or the Catholic Epistles at full length, with indications more or less distinct of Wycliffe's influence, shows how widespread was the feeling that the time had come for an English Bible (Forshall and Madden, *Pref.* p. xiii-xvii). These preliminary labors were followed up by a complete translation of the N. T. by Wycliffe himself. The O. T. was undertaken by his coadjutor, Nicholas de Hereford, but was interrupted probably by a citation to appear before archbishop Arundel in 1382, and ends abruptly (following so far the order of the Vulgate) in the middle of Baruch. Many of the MSS. of this version now extant present a different recension of the text, and it is probable that the work of Wycliffe and Hereford was revised by Richard Purvey, circ. A.D. 1388. To him also is ascribed the interesting Prologue, in which the translator gives an account both of his purpose and his method (Forshall and Madden, *Pref.* p. xxv).

2. The former was, as that of Wycliffe had been, to give an English Bible to the English people. He appeals to the authority of Bede, of Alfred, and of Grosstete, to the examples of "Frenshe, and Beemers (Bohemians), and Britons." He answers the hypocritical objections that men were not holy enough for such a work; that it was wrong for "idiots" to do what the great doctors of the Church had left undone. He hopes "to make the sentence as trewe and open in Englishe as it is in Latine, or more trewe and open."

It need hardly be said, as regards the method of the translator, that the version was based upon the Vulgate (comp. Gen. iii, 15: "She shall trede thy head"). If, in the previous century, scholars like Grosstete and Roger Bacon, seeking knowledge in other lands, and from men of other races, had acquired, as they seem to have done, some knowledge both of Greek and Hebrew, the succession had, at all events, not been perpetuated. The war to be waged at a later period with a different issue between scholastic philosophy and "humanity" ended, in the first struggle, in the triumph of the former, and there was probably no one at Oxford among Wycliffe's contemporaries who could have helped him or Purvey in a translation from the original. It is something to find at such a time the complaint that "learned doctoris taken litel heede to the lettre," the recognition that the Vulgate was not all sufficient, that "the texte of oure bokis" (he is speaking of the Psalter, and the difficulty of understanding it) "discordeth much from the Ebreu" (which knowledge is, however, at second hand, "bi witness of Jerom, of Lire, and other expositouris"). The difficulty which was thus felt was increased by the state of the Vulgate text. The translator complains that what the Church had in view was not Jerome's ver-

sion, but a later and corrupt text; that "the comune Latyne Bibles han more nede to be corrected as manie as I have seen in my life, than hath the Englishe Bible late translated." To remedy this he had recourse to collation. Many MSS. were compared, and out of this comparison the true reading ascertained as far as possible. The next step was to consult the *Glossa Ordinaria*, the commentaries of Nicholas de Lyra, and others, as to the meaning of any difficult passages. After this (we recognise here, perhaps, a departure from the right order) grammars were consulted. Then came the actual work of translating, which he aimed at making idiomatic rather than literal. As he went on, he submitted his work to the judgment of others, and accepted their suggestions. It is interesting to trace these early strivings after the true excellence of a translator; yet more interesting to take note of the spirit, never surpassed, seldom equalled, in later translators, in which the work was done. Nowhere do we find the conditions of the work, intellectual and moral, more solemnly asserted. "A translator hath grete nede to studie well the sentence, both before and after," so that no equivocal words may mislead his readers or himself, and then also "he hath nede to lyve a clene life, and be ful devout in preiers, and have not his wit occupied about worldli things, that the Holie Spyrte, author of all wisdom, and cunningge, and truth, dresse (=train) him in his work, and suffer him not for to err" (Forshall and Madden, *Prolog.* p. 60).

3. The extent of the circulation gained by this version may be estimated from the fact that, in spite of all the chances of time, and all the systematic efforts for its destruction made by archbishop Arundel and others, not less than 150 copies are known to be extant, some of them obviously made for persons of wealth and rank, others apparently for humbler readers. It is significant as bearing, either on the date of the two works or on the position of the writers, that while the quotations from Scripture in Langton's *Vision of Piers Plowman* are uniformly given in Latin, those in the *Persones Tale* of Chaucer are given in English, which for the most part agrees substantially with Wycliffe's translation.

4. The following characteristics may be noticed as distinguishing this version: (1) The general homeliness of its style. The language of the court or of scholars is as far as possible avoided, and that of the people followed. In this respect the principle has been acted on by later translators. The style of Wycliffe is to that of Chaucer as Tyndale's is to Surrey's, or that of the A. V. to Ben Jonson's. (2) The substitution, in many cases, of English equivalents for quasi-technical words. Thus we find "fy" or "fogh" instead of "Raca" (Matt. v, 22); "they were washed" in Matt. iii, 6; "richesse" for "mammon" (Luke xvi, 9, 11, 13); "bishop" for "high-priest" (*passim*). (3) The extreme literalness with which, in some instances, even at the cost of being unintelligible, the Vulgate text is followed, as in 2 Cor. i, 17-19.

III. TYNDALE.—The work of Wycliffe stands by itself. Whatever power it exercised in preparing the way for the Reformation of the 16th century, it had no perceptible influence on later translations. By the reign of Henry VIII his English was already obsolescent, and the revival of classical scholarship led men to feel dissatisfied with a version which had avowedly been made at second-hand, not from the original. With Tyndale, on the other hand, we enter on a continuous succession. He is the patriarch, in no remote ancestry, of the Authorized Version. With a consistent, unswerving purpose, he devoted his whole life to this one work, and, through dangers and difficulties, amid enemies and treacherous friends, in exile and loneliness, accomplished it. More than Cranmer or Ridley, he is the true hero of the English Reformation. While they were slowly moving onwards, halting between two opinions, watching how the court-

winds blew, or, at the best, making the most of opportunities, he set himself to the task without which, he felt sure, reform would be impossible, which, once accomplished, would render it inevitable. "Ere many years," he said, at the age of thirty-six (A. D. 1520), he would cause "a boy that driveth the plough" to know more of Scripture than the great body of the clergy then knew (Foxe, in Anderson's *Annals of English Bible*, i, 36). We are able to form a fairly accurate estimate of his fitness for the work to which he thus gave himself. The change which had come over the universities of Continental Europe since the time of Wycliffe had affected those of England. Greek had been taught in Paris in 1458. The first Greek Grammar, that of Constantine Lascaris, had been printed in 1476. It was followed in 1480 by Craston's Lexicon. The more enterprising scholars of Oxford visited foreign universities for the sake of the new learning. Groeyn (d. 1519), Linacre (d. 1524), Colet (d. 1519), had, in this way, from the Greeks whom the fall of Constantinople had scattered over Europe, or from their Italian pupils, learned enough to enter, in their turn, upon the work of teaching. When Erasmus visited Oxford in 1497, he found in these masters a scholarship which even he could admire. Tyndale, who went to Oxford cir. 1500, must have been within the range of their teaching. His two great opponents, Sir Thomas More and bishop Tonstal, are known to have been among their pupils. It is significant enough that, after some years of study, Tyndale left Oxford and went to Cambridge. Such changes were, it is true, common enough. The fame of any great teacher would draw around him men from other universities, from many lands. In this instance, the reason of Tyndale's choice is probably not far to seek (Walter, *Biog. Notice to Tyndale's Doctrinal Treatises*). Erasmus was in Cambridge from 1509 to 1514. All that we know of Tyndale's character and life, the fact especially that he had made translations of portions of the N. T. as early as 1502 (Offor, *Life of Tyndale*, p. 9), leads to the conclusion that he resolved to make the most of the presence of one who was emphatically the scholar and philologist of Europe. It must be remembered, too, that the great scheme of cardinal Ximenes was just then beginning to interest the minds of all scholars. The publication of the Complutensian Bible, it is true, did not take place till 1520; but the collection of MSS. and other preparations for it began as early as 1504. In the mean time Erasmus himself, in 1516, brought out the first published edition of the Greek Testament, and it was thus made accessible to all scholars. Of the use made by Tyndale of these opportunities we have evidence in his coming up to London (1522), in the vain hope of persuading Tonstal (known as a Greek scholar, an enlightened Humanist) to sanction his scheme of rendering the N. T. into English, and bringing a translation of one of the orations of Isocrates as a proof of his capacity for the work. The attempt was not successful. "At the last I understood not only that there was no room in my lord of London's palace to translate the N. T., but also that there was no place to do it in all England" (*Pref. to Five Books of Moses*).

It is not so easy to say how far at this time any knowledge of Hebrew was attainable at the English universities, or how far Tyndale had used any means of access that were open to him. It is probable that it may have been known, in some measure, to a few bolder than their fellows, at a time far earlier than the introduction of Greek. The large body of Jews settled in the cities of England must have possessed a knowledge, more or less extensive, of their Hebrew books. On their banishment, to the number of 16,000, by Edward I, these books fell into the hands of the monks, superstitiously revered or feared by most, yet drawing some to examination, and then to study. Grostete, it is said, knew Hebrew as well as Greek.

Roger Bacon knew enough to pass judgment on the Vulgate as incorrect and misleading. Then, however, came a period in which linguistic studies were thrown into the background, and Hebrew became an unknown speech even to the best-read scholars. The first signs of a revival meet us towards the close of the 15th century. The remarkable fact that a Hebrew Psalter was printed at Soncino in 1477 (forty years before Erasmus's Greek Testament), the Pentateuch in 1482, the Prophets in 1486, the whole of the O. T. in 1488, that by 1496 four editions had been published, and by 1596 not fewer than eleven (Whitaker, *Hist. and Crit. Inquiry*, p. 22), indicates a demand on the part of the Christian students of Europe, not less than on that of the more learned Jews. Here also the progress of the Complutensian Bible would have attracted the notice of scholars. The cry raised by the "Trojans" of Oxford in 1519 (chiefly consisting of the friars, who from the time of Wycliffe had all but swamped the education of the place) against the first Greek lectures—that to study that language would make men pagans, that to study Hebrew would make them Jews—shows that the latter study as well as the former was the object of their dislike and fear (Anderson, i, 24; Hallam, *Lit. of Eur.*, i, 403).

Whether Tyndale had in this way gained any knowledge of Hebrew before he left England in 1524 may be uncertain. The fact that in 1530-31 he published a translation of Genesis, Deuteronomy, and Jonah (see a letter by the ven. lord Arthur Hervey to the *Bury Post* of Feb. 3, 1862, transferred shortly afterwards to the *Athenæum*), may be looked on as the first-fruits of his labors, the work of a man who was giving this proof of his power to translate from the original (Anderson, *Annals*, i, 209-288). We may perhaps trace, among other motives for the many wanderings of his exile, a desire to visit the cities Worms, Cologne, Hamburg, Antwerp (Anderson, p. 48-64), where the Jews lived in greatest numbers, and some of which were famous for their Hebrew learning. Of at least a fair acquaintance with that language we have, a few years later, abundant evidence in the table of Hebrew words prefixed to his translation of the five books of Moses, and in casual etymologies scattered through his other works, e. g. "Mammon" (*Parable of Wicked Mammon*, p. 63), "Cohen" (*Obedience*, p. 255), "Abel Mizraim" (p. 347), "Pesah" (p. 353). A remark (Preface to *Obedience*, p. 148) shows how well he had entered into the general spirit of the language. "The properties of the Hebrew tongue agreeth a thousand times more with the English than with the Latine. The manner of speaking is in both one, so that in a thousand places thou needest not but to translate it into English word for word." When Spalatin describes him in 1534, it is as one well-skilled in seven languages, and one of these is Hebrew (Anderson, i, 337).

The N. T. was, however, the great object of his care. First the gospels of Matthew and Mark were published tentatively, then in 1525 the whole of the N. T. was printed in 4to at Cologne, and in small 8vo at Worms (reproduced in fac-simile in 1862 by Mr. Francis Fry, Bristol). The work was the fruit of a self-sacrificing zeal, and the zeal was its own reward. In England it was received with denunciations. Tonstal, bishop of London, preaching at Paul's Cross, asserted that there were at least 2000 errors in it, and ordered all copies of it to be bought up and burnt. An act of Parliament (35 Hen. VIII. cap. 1) forbade the use of all copies of Tyndale's "false translation." Sir T. More (*Dialogues*, l. c. *Supplication of Souls, Confutation of Tyndal's Answer*) entered the lists against it, and accused the translator of heresy, bad scholarship, and dishonesty, of "corrupting Scripture after Luther's counsel." The treatment which it received from professed friends was hardly less annoying. Piratical editions were printed, often carelessly, by trading pub-

lishers at Antwerp. One of his own pupils, George Joye, undertook (in 1534) to improve the version by bringing it into closer conformity with the Vulgate, and made it the vehicle of peculiar opinions of his own, substituting "life after this life," or "verie life," for "resurrection," as the translation of *ἀνάστασις*. (Comp. Tyndale's indignant protest in Pref. to edition of 1534.) Even the most zealous reformers in England seemed disposed to throw his translation overboard, and encouraged Coverdale (see below) in undertaking another. In the mean time the work went on. Editions were printed one after another, namely, at Hamburg, Cologne, Worms, in 1525; Antwerp in 1526, '27, '28; Marlbrow (=Marburg) in 1529; Strasburg (Joye's edition) in 1531; Bergen-op-Zoom in 1533 (Joye's); John vi at Nuremberg in 1533; Antwerp in 1534 (Cotton, *Printed Editions*, p. 4-6). The last appeared in 1535, just before his death, "diligently compared with the Greek," presenting for the first time systematic chapter-headings, and with some peculiarities in spelling specially intended for the pronunciation of the peasantry (Offor, *Life*, p. 82). His heroic life was brought to a close in 1536. We may cast one look on its sad end—the treacherous betrayal, the Judas-kiss of the false friend, the imprisonment at Vilvorden, the last prayer, "Lord, open the king of England's eyes." He was tied to the stake, then strangled to death, and finally burnt. (See Offor's memoir prefixed to his edition of Tyndale's New Testament.)

The work to which a life was thus nobly devoted was as nobly done. To Tyndale belongs the honor of having given the first example of a translation based on true principles, and the excellence of later versions has been almost in exact proportion as they followed his. Believing that every part of Scripture had one sense and one only, the sense in the mind of the writer (*Obedience*, p. 304), he made it his work, using all philological helps that were accessible to attain that sense. Believing that the duty of a translator was to place his readers as nearly as possible on a level with those for whom the books were originally written, he looked on all the later theological associations that had gathered round the words of the N. T. as hindrances rather than helps, and sought, as far as possible, to get rid of them. Not "grace," but "favor," even in John i, 17 (in edition of 1525); not "charity," but "love;" not "confessing," but "acknowledging;" not "penance," but "repentance;" not "priests," but "seniors" or "elders;" not "salvation," but "health;" not "church," but "congregation," are instances of the changes which were then looked on as startling and heretical innovations (Sir T. More, *l. c.*). Some of them we are now familiar with. In others the later versions bear traces of a reaction in favor of the older phraseology. In this, as in other things, Tyndale was in advance, not only of his own age, but of the age that followed him. To him, however, it is owing that the versions of the English Church have throughout been popular, and not scholastic. All the exquisite grace and simplicity which have endeared the A. V. to men of the most opposite tempers and contrasted opinions—to J. H. Newman (*Dublin Review*, June, 1853) and J. A. Froude—is due mainly to his clear-sighted truthfulness. The testimony of a Roman Catholic scholar is worth quoting: "In point of perspicuity and noble simplicity, propriety of idiom and purity of style, no English version has as yet surpassed it" (Geddes, *Prospectus for a new Translation*, p. 89). The desire to make the Bible a people's book led Tyndale in one edition to something like a provincial rather than a national translation; but, on the whole, it kept him free from the besetting danger of the time, that of writing for scholars, not for the people; of a version full of "inkhorn" phrases, not in the spoken language of the English nation. And throughout there is the pervading stamp, so often wanting in other like works, of the

most thorough truthfulness. No word has been altered to court a king's favor, or please bishops, or make out a case for or against a particular opinion. He is working freely, not in the fetters of prescribed rules. With the most entire sincerity he could say, "I call God to record, against the day we shall appear before our Lord Jesus to give a reckoning of our doings, that I never altered one syllable of God's Word against my conscience, nor would this day, if all that is in the world, whether it be pleasure, honor, or riches, might be given me" (Anderson, i, 349).

IV. COVERDALE.—I. A complete translation of the Bible, different from Tyndale's, bearing the name of Miles Coverdale, printed probably at Zürich, appeared in 1535. The undertaking itself, and the choice of Coverdale as the translator, were probably due to Cromwell. Tyndale's controversial treatises, and the polemical character of his prefaces and notes, had irritated the leading ecclesiastics, and embittered the mind of the king himself against him. All that he had written was publicly condemned. There was no hope of obtaining the king's sanction to anything that bore his name. But the idea of an English translation began to find favor. The rupture with the see of Rome, the marriage with Anne Boleyn, made Henry willing to adopt what was urged upon him as the surest way of breaking forever the spell of the pope's authority. The bishops even began to think of the thing as possible. It was talked of in Convocation. They would take it in hand themselves. The work did not, however, make much progress. The great preliminary question whether "venerable" words, such as *hostia*, penance, pascha, holocaust, and the like, should be retained, was still unsettled (Anderson, i, 414). Not till "the day after doomsday" (the words are Cranmer's) were the English people likely to get their English Bible from the bishops (*ib.* i, 577). Cromwell, it is probable, thought it better to lose no further time, and to strike while the iron was hot. A divine whom he had patronized, though not, like Tyndale, feeling himself called to that special work (*Pref. to Coverdale's Bible*), was willing to undertake it. To him accordingly it was intrusted. There was no stigma attached to his name, and, though a sincere Reformer, neither at that time nor afterwards did he occupy a sufficiently prominent position to become an object of special persecution.

2. The work which was thus executed was done, as might be expected, in a very different fashion from Tyndale's. Of the two men, one had made this the great object of his life; the other, in his own language, "sought it not, neither desired it," but accepted it as a task assigned him. One prepared himself for the work by long years of labor in Greek and Hebrew; the other is content to make a translation at second hand "out of the Douche (Luther's German Version) and the Latine." The one aims at a rendering which shall be the truest and most exact possible; the other loses himself in weak commonplace as to the advantage of using many English words for one and the same word in the original, and in practice oscillates between "penance" and "repentance," "love" and "charity," "priests" and "elders," as though one set of words were as true and adequate as the other (*Preface*, p. 19). In spite of these weaknesses, however, there is much to esteem in the spirit and temper of Coverdale. He is a second-rate man, laboring as such contentedly, not ambitious to appear other than he is. He thinks it a great gain that there should be a diversity of translations. He acknowledges, though he dare not name it, the excellence of Tyndale's version, and regrets the misfortune which left it incomplete. He states frankly that he had done his work with the assistance of that and of five others. The five were probably: (1.) The Vulgate; (2.) Luther's; (3.) The German Swiss version of Zürich; (4.) The Latin of Pagninus; (5.) Tyndale's. Others, however, have conjectured a German translation of the Vulgate earlier

than Luther's, and a Dutch version from Luther (Whitaker, *Hist. and Crit. Inquiry*, p. 49). If the language of his dedication to the king, whom he compares to Moses, David, and Josiah, seems to be somewhat fulsome in its flattery, it is, at least, hardly more offensive than that of the Dedication of the A. V., and there was more to palliate it.

3. An inspection of Coverdale's version serves to show the influence of the authorities he followed. The proper names of the O. T. appear for the most part in their Latin form, "Elias," "Eliseus," "Ochozias;" sometimes, as in "Esay" and "Jeremy," in that which was familiar in spoken English. Some points of correspondence with Luther's version are not without interest. Thus "Cush," which in Wycliffe, Tyndale, and the A. V. is uniformly rendered "Ethiopia," is in Coverdale "Morians' land" (Psa. lxxviii, 31; Acts viii, 27, etc.), after the "Mohrenlande" of Luther, and appears in the form accordingly in the P.-B. version of the Psalms. The proper name *Rabshakch* passes, as in Luther, into the "chief butler" (2 Kings xviii, 17; Isa. xxxvi, 11). In making the sons of David "priests" (2 Sam. viii, 18) he followed both his authorities. "Ἐπίσκοποι" are "bishops" in Acts xx, 28 ("overseers" in A. V.). "Shiloh," in the prophecy of Gen. xlix, 10, becomes "the worthy," after Luther's "der Held." "They houghed oxen" takes the place of "they digged down a wall," in Gen. xlix, 6. The singular word "Lamia" is taken from the Vulg., as the English rendering of *Ziim* ("wild beasts," A. V.) in Isa. xxxiv, 14. The "tabernacle of witness," where the A. V. has "congregation," shows the same influence. In spite of Tyndale, the Vulg. "plena gratia," in Luke i, 28, leads to "full of grace;" while we have, on the other hand, "congregation" throughout the N. T. for ἑκκλησία, and "love" instead of "charity" in 1 Cor. xiii. It was the result of the same indecision that his language as to the Apocrypha lacks the sharpness of that of the more zealous reformers. "Baruch" is placed with the canonical books, after "Lamentations." Of the rest he says that they are "placed apart," as "not held by ecclesiastical doctors in the same repute" as the other Scriptures, but this is only because there are "dark sayings" which seem to differ from the "open Scripture." He has no wish that they should be "despised or little set by." "Patience and study would show that the two were agreed."

4. What has been stated practically disposes of the claim which has sometimes been made for this version of Coverdale's, as though it had been made from the original text (Anderson, i, 564; Whitaker, *Hist. and Crit. Inquiry*, p. 58). It is not improbable, however, that as time went on he added to his knowledge. The letter addressed by him to Cromwell (*Remains*, p. 492, Parker Soc.) obviously asserts, somewhat ostentatiously, an acquaintance "not only with the standing text of the Hebrew, with the interpretation of the Chaldee and the Greek," but also with "the diversity of reading of all sects." He, at any rate, continued his work as a pains-taking editor. Fresh editions of his Bible were published, keeping their ground in spite of rivals, in 1537, 1539, 1550, 1553. He was called in at a still later period to assist in the Geneva version. Among smaller facts connected with this edition may be mentioned the appearance of Hebrew letters—of the name Jehovah—in the title-page (יהוה), and again in the margin of the alphabetic poetry of Lamentations, though not of Psa. cxix. The plural form "Biblia" is retained in the title-page, possibly, however, in its later use as a singular feminine (comp. BIBLE). There are no notes, no chapter-headings, no divisions into verses. The letters A, B, C, D in the margin, as in the early editions of Greek and Latin authors, are the only helps for finding places. Marginal references point to parallel passages. The O. T., especially in Genesis, has the attraction of wood-cuts. Each book

has a table of contents prefixed to it. A careful reprint, though not a fac-simile, of Coverdale's version has been published by Bagster (Lond. 1838).

V. MATTHEW.—I. In the year 1537, a large folio Bible appeared as edited and dedicated to the king, by Thomas Matthew. No one of that name appears at all prominently in the religious history of Henry VIII, and this suggests the inference that the name was pseudonymous, adopted to conceal the real translator. The tradition which connects this Matthew with John Rogers, the protomartyr of the Marian persecution, is all but undisputed. It rests (1) on the language of the indictment and sentence which describe him (Foxe, *Acts and Monuments*, p. 1029, 1563; Chester, *Life of Rogers*, p. 418–423) as Joannes Rogers, alias Matthew, as if it were a matter of notoriety; (2) the testimony of Foxe himself, as representing, if not personal knowledge, the current belief of his time; (3) the occurrence, at the close of a short exhortation to the study of Scripture in the preface, of the initials J. R.; (4) internal evidence. This last subdivides itself. (a.) Rogers, who had graduated at Pembroke College, Cambridge, in 1525, and had sufficient fame to be invited to the new Cardinal's College at Oxford, accepted the office of chaplain to the merchant adventurers of Antwerp, and there became acquainted with Tyndale two years before the latter's death. Matthew's Bible, as might be expected, if this hypothesis were true, reproduces Tyndale's work, in the N. T. entirely, in the O. T. as far as 2 Chron., the rest being taken, with occasional modifications, from Coverdale. (b.) The language of the Dedication is that of one who has mixed much, as Rogers mixed, with foreign reformers ("the godlie in strange countries").

2. The printing of the book was begun apparently abroad, and was carried on as far as the end of Isaiah. At that point a new pagination begins, and the names of the London printers, Grafton and Whitechurch, appear. The history of the book was probably something like this: Coverdale's translation had not given satisfaction—least of all were the more zealous and scholar-like reformers contented with it. As the only complete English Bible, it was, however, as yet, in possession of the field. Tyndale and Rogers, therefore, in the year preceding the imprisonment of the former, determined on another, to include O. T., N. T., and Apocrypha, but based throughout on the original. Left to himself, Rogers carried on the work, probably at the expense of the same Antwerp merchant who had assisted Tyndale (Poyntz), and thus got as far as Isaiah. The enterprising London printers, Grafton and Whitechurch, then came in (Chester, *Life of Rogers*, p. 29). It would be a good speculation to enter the market with this, and so drive out Coverdale's, in which they had no interest. They accordingly embarked a considerable capital, £500, and then came a stroke of policy which may be described as a miracle of audacity. The name of Rogers, known as the friend of Tyndale, is suppressed, and the simulacrum of Thomas Matthew disarms suspicion. The book is sent by Grafton to Cranmer. He reads, approves, rejoices. He would rather have the news of its being licensed than a thousand pounds (Chester, p. 425–427). Application is then made both by Grafton and Cranmer to Cromwell. The king's license is granted, but the publisher wants more. Nothing less than a monopoly for five years will give him a fair margin of profit. Without this, he is sure to be undersold by piratical, inaccurate editions, badly printed on inferior paper. Failing this, he trusts that the king will order one copy to be bought by every incumbent, and six by every abbey. If this was too much, the king might, at least, impose that obligation on all the popishly-inclined clergy. That will bring in something, besides the good it may possibly do them (Chester, p. 430). The application was to some extent successful. A copy was ordered, by royal proclamation, to be set up in

every church, the cost being divided between the clergy and the parishioners. This was, therefore, the first Authorized Version. It is scarcely conceivable, however, that Henry could have read the book which he thus sanctioned, or known that it was substantially identical with what had been publicly stigmatized in his Acts of Parliament (*ut supra*). What had before given most offence had been the polemical character of Tyndale's annotations, and here were notes bolder and more thorough still. Even the significant "W. T." does not appear to have attracted notice.

3. What has been said of Tyndale's version applies, of course, to this. There are, however, signs of a more advanced knowledge of Hebrew. All the technical words connected with the Psalms, Neginoth, Shiggaion, Sheminih, etc., are elaborately explained. Psa. ii is printed as a dialogue. The names of the Hebrew letters are prefixed to the verses of Lamentations. Reference is made to the Chaldee Paraphrase (Job vi), to Rabbi Abraham (Job xix), to Kimchi (Psa. iii). A like range of knowledge is shown in the N. T. Strabo is quoted to show that the magi were not kings, Macrobius as testifying to Herod's ferocity (Matt. ii), Erasmus's Paraphrase on Matt. xiii, xv. The popular identification of Mary Magdalene with "the woman that was a sinner" is discussed, and rejected (Luke x). More noticeable even than in Tyndale is the boldness and fulness of the exegetical notes scattered throughout the book. Strong and earnest in asserting what he looked upon as the central truths of the Gospel, there was in Rogers a Luther-like freedom in other things which has not appeared again in any authorized translation or popular commentary. He guards his readers against looking on the narrative of Job i as literally true. He recognises a definite historical starting-point for Psa. xlv ("The sons of Korah praise Solomon for the beauty, eloquence, power, and nobleness, both of himself and of his wife"), Psa. xxii ("David declareth Christ's dejection . . . and all, under figure of himself"), and the Song of Solomon ("Solomon made this balade for himself and his wife, the daughter of Pharaoh, under the shadow of himself, figuring Christ," etc.). The chief duty of the Sabbath is "to minister the fodder of the Word to simple souls," to be "pitiful over the weariness of such neighbors as labored sore all the week long." "When such occasions come as turn our rest to occupation and labor, then ought we to remember that the Sabbath was made for man, and not man for the Sabbath" (Jer. xvii). He sees in the prophets of the N. T. simply "expounders of Holy Scripture" (Acts xv). To the man living in faith, "Peter's fishing after the resurrection, and all deeds of matrimony are pure spiritual;" to those who are not, "learning, doctrine, contemplation of high things, preaching, study of Scripture, founding of churches and abbeyes, are works of the flesh" (*Pref. to Romans*). "Neither is outward circumcision or outward baptism worth a pin of themselves, save that they put us in remembrance to keep the covenant" (1 Cor. vii). "He that desireth honor gasheth after lucre . . . castles, parks, lordships . . . desireth not a work, much less a good work, and nothing less than a bishop's" (1 Tim. iii). Ezek. xxxiv is said to be "against bishops and curates that despise the flock of Christ." The *ἄγγελος ἐκκλησίας* of Rev. ii and iii appears (as in Tyndale) as "the messenger of the congregation." Strong protests against Purgatory are found in notes to Ezek. xviii and 1 Cor. iii, and in the "Table of Principal Matters" it is significantly stated under the word Purgatory that "it is not in the Bible, but the purgation and remission of our sins is made us by the abundant mercy of God." The Preface to the Apocrypha explains the name, and distinctly asserts the inferiority of these books. No notes are added to them, and the translation of them is taken from Coverdale, as if it had not been worth while to give much labor to it.

4. A few points of detail remain to be noticed. In the order of the books of the N. T. Rogers follows Tyndale, agreeing with the A. V. as far as the Epistle to Philemon. This is followed by the Epistles of John, then that to the Hebrews, then those of Peter, James, and Jude. Wood-cuts, not very freely introduced elsewhere, are prefixed to every chapter in the Revelation. The introduction of the "Table" mentioned above gives Rogers a claim to be the patriarch of Concordances, the "father" of all such as write in Dictionaries of the Bible. Reverence for the Hebrew text is shown by his striking out the three verses which the Vulgate has added to Psa. xiv. In a later edition, published at Paris, not by Rogers himself, but by Grafton, under Coverdale's superintendence, in 1539, the obnoxious prologue and prefaces were suppressed, and the notes systematically expurgated and toned down. The book was in advance of the age. Neither booksellers nor bishops were prepared to be responsible for it.

VI. TAVERNER (1539).—1. The boldness of the pseudo-Matthew had, as has been said, frightened the ecclesiastical world from its propriety. Coverdale's version was, however, too inaccurate to keep its ground. It was necessary to find another editor, and the printers applied to Richard Taverner. But little is known of his life. The fact that, though a layman, he had been chosen as one of the canons of the Cardinal's College at Oxford indicates a reputation for scholarship, and this is confirmed by the character of his translation. It professes, in the title-page, to be "newly recognised, with great diligence, after the most faithful exemplars." The editor acknowledges "the labors of others (i. e. Tyndale, Coverdale, and Matthew, though he does not name them) who have neither indiligently nor unlearnedly travelled," owns that the work is not one that can be done "absolutely" (i. e. completely) by one or two persons, but requires "a deeper conferring of many learned wittes together, and also a juster time and longer leisure;" but the thing had to be done; he had been asked to do it. He had "used his talent" as he could.

2. In most respects this may be described as an expurgated edition of Matthew's. There is a table of principal matters, and there are notes; but the notes are briefer and less polemical. The passages quoted above are, e. g. omitted wholly or in part. The epistles follow the same order as before.

VII. CRANMER.—1. In the same year as Taverner's, and coming from the same press, appeared an English Bible, in a more stately folio, printed with a more costly type, bearing a higher name than any previous edition. The title-page is an elaborate engraving, the spirit and power of which indicate the hand of Holbein. The king, seated on his throne, is giving the *Verbum Dei* to the bishops and doctors, and they distribute it to the people, while doctors and people are all joining in cries of "Vivat Rex." It declares the book to be "truly translated after the verity of the Hebrew and Greek texts" by "divers excellent learned men, expert in the foresaid tongues." A preface, in April, 1540, with the initials "T. C.," implies the archbishop's sanction. In a later edition (Nov., 1540) his name appears on the title-page, and the names of his coadjutors are given, Cuthbert (Tonstal), bishop of Durham, and Nicholas (Heatff), bishop of Rochester; but this does not exclude the possibility of others having been employed for the first edition.

2. Cranmer's version presents, as might be expected, many points of interest. The prologue gives a more complete ideal of what a translation ought to be than we have as yet seen. Words not in the original are to be printed in a different type. They are added, even when "not wanted by the sense," to satisfy those who have "missed them" in previous translations, i. e. they represent the various readings of the Vulgate where it differs from the Hebrew. The sign \* indi-

cates diversity in the Chaldee and Hebrew. It had been intended to give all these, but it was found that this would have taken too much time and space, and the editors purposed therefore to print them in a little volume by themselves. The frequent hands (✚) in the margin, in like manner, show an intention to give notes at the end; but Matthew's Bible had made men cautious, and, as there had not been time for the "king's council to settle them," they were omitted, and no help given to the reader beyond the marginal references. In the absence of notes, the lay-reader is to submit himself to the "godly-learned in Christ Jesus." There is, as the title-page might lead us to expect, a greater display of Hebrew than in any previous version. The books of the Pentateuch have their Hebrew names given, *Bereschüh* (Genesis), *Velle Schemoth* (Exodus), and so on. 1 and 2 Chron. in like manner appear as *Dibre Huiamin*. In the edition of 1541, many proper names in the O. T. appear in the fuller Hebrew form, as e. g. Amaziah, Jeremiahu. In spite of this parade of learning, however, the edition of 1539 contains, perhaps, the most startling blunder that ever appeared under the sanction of an archbishop's name. The editors adopted the preface which, in Matthew's Bible, had been prefixed to the Apocrypha. In that preface the common traditional explanation of the name was concisely given. They appear, however, to have shrunk from offending the conservative party in the Church by applying to the books in question so damnatory an epithet as Apocrypha. They looked out for a word more neutral and respectful, and found one that appeared in some MSS. of Jerome so applied, though in strictness it belonged to an entirely different set of books. They accordingly substituted that word, leaving the preface in all other respects as it was before, and the result is the somewhat ludicrous statement that the "books were called *Hagiographa*," because "they were read in secret and apart!"

3. A later edition in 1541 presents a few modifications worth noticing. It appears as "authorized" to be "used and frequented" in every church in the kingdom. The introduction, with all its elaborate promise of a future perfection, disappears, and in its place there is a long preface by Cranmer, avoiding as much as possible all references to other translations, taking a safe *via media* tone, blaming those who "refuse to read" on the one hand, and "inordinate reading" on the other. This neutral character, so characteristic of Cranmer's policy, was doubtless that which enabled it to keep its ground during the changing moods of Henry's later years. It was reprinted again and again, and was the authorized version of the English Church till 1568—the interval of Mary's reign excepted. From it, accordingly, were taken most, if not all, the portions of Scripture in the Prayer-books of 1549 and 1552. The Psalms as a whole, the quotations from Scripture in the Homilies, the sentences in the Communion services, and some phrases elsewhere (such as "worthy fruits of penance"), still preserve the remembrance of it. The oscillating character of the book is shown in the use of "love" instead of "charity" in 1 Cor. xiii; and "congregation" instead of "church" generally, after Tyndale; while in 1 Tim. iv, 14, we have the singular rendering, as if to gain the favor of his opponents, "with authority of priesthood." The plan of indicating doubtful texts by a smaller type was adhered to, and was applied, among other passages, to Psa. xiv, 5, 6, 7, and the more memorable text of 1 John v, 7. The translation of 1 Tim. iii, 16, "All Scripture given by inspiration of God is profitable," etc., anticipated a construction of that text which has sometimes been boasted of, and sometimes attacked as an innovation. In this, however, Tyndale had led the way.

VIII. GENEVA.—1. The experimental translation of the Gospel of Matthew by Sir John Cheke into a purer English than before (Strype, *Life of Cheke*, vii,

3) had so little influence on the versions that followed that it hardly calls for more than a passing notice, as showing that scholars were as yet unsatisfied. The reaction under Mary gave a check to the whole work, as far as England was concerned; but the exiles who fled to Geneva entered upon it with more vigor than ever. Cranmer's version did not come up to their ideal. Its size made it too costly. There were no explanatory or dogmatic notes. It followed Coverdale too closely; and where it deviated, did so, in some instances, in a retrograde direction. The Geneva refugees—among them Whittingham, Goodman, Pullain, Sampson, and Coverdale himself—labored "for two years or more, day and night." They entered on their "great and wonderful work" with much "fear and trembling." Their translation of the N. T. was "diligently revised by the most approved Greek examples" (MSS. or editions?) (*Preface*). The N. T., translated by Whittingham, was printed by Conrad Badius in 1557, the whole Bible in 1560.

2. In point of general correctness in expressing the true sense of the Hebrew and Greek Scriptures, the Geneva version shows a very marked advance on all that preceded it, and for more than sixty years it was the most popular of all the English versions. Largely imported in the early years of Elizabeth, it was printed in England in 1561, and a patent of monopoly was given to James Bodleigh. This was transferred in 1576 to Barker, in whose family the right of printing Bibles remained for upwards of a century. Not less than eighty editions, some of the whole Bible, were printed between 1558 and 1611. It kept its ground for some time even against the later version of king James, and gave way, as it were, slowly and under protest. In the *Soldiers' Pocket Bible*, published in 1643 for the use of Cromwell's army, almost all the selections of Scripture were taken from the Geneva version. The causes of this general acceptance are not difficult to ascertain. The volume was, in most of its editions, cheaper and more portable—a small quarto, instead of the large folio of Cranmer's "Great Bible." It was the first Bible which laid aside the adolescent black letter, and appeared in Roman type. It was the first which, following the Hebrew example, recognised the division into verses, so dear to the preachers or hearers of sermons. It was accompanied, in most of the editions after 1578, by a Bible Dictionary of considerable merit. The notes were often really helpful in dealing with the difficulties of Scripture, and were looked upon as spiritual and evangelical. It was accordingly the version specially adopted by the great Puritan party through the whole reign of Elizabeth, and far into that of James. As might be expected, it was based on Tyndale's version, often returning to it where the intermediate renderings had had the character of a compromise.

3. Some peculiarities are worthy of special notice: (1) It professes a desire to restore the "true writing" of many Hebrew names, and we meet accordingly with forms like Izhak (Isaac), Jaacob, and the like. (2) It omits the name of Paul from the title of the Epistle to the Hebrews; and, in a short preface, leaves the authorship an open question. (3) It avows the principle of putting all words not in the original in italics. (4) It presents, in a Calendar prefixed to the Bible, something like a declaration of war against the established order of the Church's lessons, commemorating Scripture facts, and the deaths of the great reformers, but ignoring saints' days altogether. (5) It was the first English Bible which entirely omitted the Apocrypha. (6) The notes were characteristically Swiss, not only in their theology, but in their politics. They made allegiance to kings dependent upon the soundness of their faith, and in one instance (note on 2 Chron. xv, 16) at least seemed, to the easily startled James I, to favor tyrannicide.

4. The circumstances of the early introduction of

the Geneva version are worth mentioning, if only as showing in how different a spirit the great fathers of the English Reformation, the most conservative of Anglican theologians, acted from that which has too often animated their successors. Men talk now of different translations and various readings as likely to undermine the faith of the people. When application was made to archbishop Parker, in 1565, to support Bodleigh's application for a license to reprint the Geneva version in 12mo, he wrote to Cecil in its favor. He was at the time looking forward to the work he afterwards accomplished, of "one other special Bible for the churches, to be set forth as convenient time and leisure should permit," but in the mean time it would "nothing hinder, but rather doo much good, to have diversity of translations and readings" (Strype, *Life of Parker*, iii, 6). Many of the later reprints, instead of the Geneva version from the Greek, have Tomson's translation of Beza's Latin version; and the notes are said to be taken from Joae, Camer, P. Leseler, Villerius, and Fr. Junius. The Geneva version, as published by Barker, is that popularly known as the *Breeches Bible*, from its rendering of Gen. iii, 7. It had, however, been preceded in this by Wycliffe's.

IX. THE BISHOPS' BIBLE.—1. The facts just stated will account for the wish of archbishop Parker, in spite of his liberal tolerance, to bring out another version which might establish its claims against that of Geneva. Great preparations were made. The correspondence of Parker with his suffragans presents some points of interest, as showing how little agreement there was as to the true theory of a translation. Thus, while Sandys, bishop of Worcester, finds fault with the "common translation" (Geneva?), as "following Munster too much," and so "swerving much from the Hebrew," Guest, bishop of St. David's, who took the Psalms, acted on the principle of translating them so as to agree with the N.-T. quotations, "for the avoiding of offence;" and Cox, bishop of Ely, while laying down the sensible rule that "inkhorn terms were to be avoided," also went on to add "that the usual terms were to be retained so far forth as the Hebrew will well bear" (Strype, *Parker*, iii, 6). The principle of pious frauds, of distorting the truth for the sake of edification, has perhaps often been acted on by other translators. It has not often been so explicitly avowed as in the first of these suggestions.

2. The bishops thus consulted, eight in number, together with some deans and professors, brought out the fruit of their labors in a magnificent folio (1568 and 1572). Everything had been done to make it attractive. A long erudite preface vindicated the right of the people to read the Scriptures, and (quoting the authority of bishop Fisher) admitted the position which later divines have often been slow to admit, that "there be yet in the Gospel many dark places which, without all doubt, to the posterity shall be made much more open." Wood-engravings of a much higher character than those of the Geneva Bible were scattered profusely, especially in Genesis. Three portraits of the queen, the earl of Leicester, and lord Burleigh, beautiful specimens of copperplate engraving, appeared on the title-pages of the several parts. A map of Palestine was given, with degrees of latitude and longitude, in the edition of 1572. It also contained more numerous illustrated initials. Some of these caused very great dissatisfaction, being grossly offensive representations of heathen mythology; for which, however, the printer alone was responsible, who used such ornamental initials as he chose, following the taste of the age. From one of them, the initial letter of the Epistle to the Hebrews, this version is popularly known as the *Leda Bible*. A most elaborate series of genealogical tables, prepared by Hugh Broughton, the great rabbi of the age (of whom more hereafter), but ostensibly by Speed the antiquary (Broughton's name being in disfavor with the bishops), was prefixed

(Strype, *Parker*, iv, 20; Lightfoot, *Life of Broughton*). In some points it followed previous translations, and was avowedly based on Cramer's. "A new edition was necessary." "This had led some well-disposed men to recognise it again, not as condemning the former translation, which has been followed mostly of any other translation, excepting the original text" (Pref. of 1572). Cramer's Prologue was reprinted. The Geneva division into verses was adopted throughout.

3. Some peculiarities, however, appear for the first and last time. (1.) The books of the Bible are classified as legal, historical, sapiential, and prophetic. This was easy enough for the O. T., but the application of the same idea to the N. T. produced some rather curious combinations. The Gospels, the catholic Epistles, and those to Titus, Philemon, and the Hebrews, are grouped together as legal, St. Paul's other epistles as sapiential; the Acts appear as the one historical, the Revelation as the one prophetic book. (2.) It is the only Bible in which many passages, sometimes nearly a whole chapter, have been marked for the express purpose of being omitted when the chapters were read in the public service of the Church. (3.) In the edition of 1572, Cramer's version of the Psalms, as being the one used in the Book of Common Prayer (which could not be changed without an act of Parliament), was printed along with the Bishops' version in parallel columns. In the editions subsequent to this date the Bishops' version is omitted altogether, and that of Cramer is substituted in its place, in order that the Bible and the Prayer-book might have the same version. They are so far worthless, therefore, as editions of the Bishops' Bible. (4.) The initials of the translators were attached to the books which they had severally undertaken. The work was done on the plan of limited, not joint liability. (5.) Here, as in the Geneva, there is the attempt to give the Hebrew proper names more accurately, as e. g. in Heva, Isaac, Uziah, etc.

4. Of all the English versions, the Bishops' Bible had probably the least success. It did not command the respect of scholars, and its size and cost were far from meeting the wants of the people. Its circulation appears to have been practically limited to the churches which were ordered to be supplied with it. It had, however, at any rate, the right to boast of some good Hebrew scholars among the translators, one of whom, bishop Alley, had written a Hebrew Grammar; and, though vehemently attacked by Broughton (Townley, *Literary History of the Bible*, iii, 190), it was defended as vigorously by Fulke, and, together with the A. V., received from Selden the praise of being "the best translation in the world" (*Table Talk, Works*, iii, 2069).

X. RHEIMS AND DOUAY.—1. The successive changes in the Protestant versions of the Scriptures were, as might be expected, matter of triumph to the controversialists of the Latin Church. Some saw in it an argument against any translation of Scripture into the spoken language of the people. Others pointed decisively to the want of unity which these changes displayed. There were some, however, who took the line which Sir T. More and Gardiner had taken under Henry VIII. They did not object to the principle of an English translation. They only charged all the versions hitherto made with being false, corrupt, heretical. To this there was the ready retort that they had themselves done nothing; that their bishops in the reign of Henry had promised, but had not performed. It was felt to be necessary that they should take some steps which might enable them to turn the edge of this reproach. Accordingly, the English refugees who were settled at Rheims—Martin, Allen (afterwards cardinal), and Bristow—undertook the work. Gregory Martin, who had graduated at Cambridge, had signaled himself by an attack on the existing versions, and had been answered in an elaborate treatise by Fulke, master of Catherine Hall, Cambridge (*A Defence of the Sin-*

*cere and True Translation*, etc.). The charges are mostly of the same kind as those brought by Sir T. More against Tyndale. "The old time-honored words were discarded. The authority of the Septuagint and Vulgate was set at naught when the translator's view of the meaning of the Hebrew and Greek differed from what he found in them." The new model translation was to avoid these faults. It was to command the respect at once of priests and people. After an incubation of some years, it was published at Rheims in 1582. Though Martin was competent to translate from the Greek, it professed to be based on "the authentic text of the Vulgate." Notes were added, as strongly dogmatic as those of the Geneva Bible, and often keenly controversial. The work of translation was completed somewhat later by the publication of the O. T. at Douay in 1609. The language was precisely what might have been expected from men who adopted Gardiner's ideal of what a translation ought to be. At every page we stumble on "strange inhorn words," which never had been English, and never could be, such, e. g. as "the Pasche and the Azymes" (Mark xvi. 1), "the arch-synagogue" (Mark v. 35), "in prepuce" (Rom. iv, 9), "obdurate with the fallacie of sin" (Heb. iii. 13), "a greater hoste" (Heb. xi, 4), "this is the annuntiation" (1 John v, 5), "pre-ordinate" (Acts xiii, 48), "the justifications of our Lord" (Luke i, 6), "what is to me and thee" (John ii, 4), "longanimity" (Rom. ii, 4), "purge the old leaven that you may be a new paste, as you are azymes" (1 Cor. iv, 7), "you are evacuated from Christ" (Gal. v, 4), and so on.

2. A style such as this had, as might be expected, but few admirers. Among those few, however, we find one great name. Bacon, who leaves the great work of the reign of James unnoticed, and quotes almost uniformly from the Vulgate, goes out of his way to praise the Rhemish version for having restored "charity" to the place from which Tyndale had expelled it, in 1 Cor. xiii (*Of the Pacification of the Church*). Even Roman Catholic divines have felt the superiority of the A. V., and Challoner, in his editions of the N. T. in 1748, and the Bible, 1763, often follows it in preference to the Rheims and Douay translations.

XI. KING JAMES'S VERSION.—1. The position of the English Church in relation to the versions in use at the commencement of the reign of James was hardly satisfactory. The Bishops' Bible was sanctioned by authority. That of Geneva had the strongest hold on the affections of the people. Scholars, Hebrew scholars in particular, found grave fault with both. Hugh Broughton, who spoke Hebrew as if it had been his mother tongue, denounced the former as being full of "traps and pitfalls," "overthrowing all religion," and proposed a new revision to be effected by an English Septuagint (72), with power to consult gardeners, artists, and the like, about the words connected with their several callings, and bound to submit their work to "one qualified for difficulties." This ultimate reference was, of course, to be himself (Strype, *Whitgift*, iv, 19, 25). Unhappily, neither his temper nor his manners were such as to win favor for this suggestion. Whitgift disliked him, worried him, drove him into exile. Broughton's views were, however, shared by others; and among the demands of the Puritan representatives at the Hampton-Court Conference in 1604 (Dr. Reynolds being the spokesman), was one for a new, or, at least, a revised translation. The special objections which they urged were neither numerous (three passages only—1<sup>st</sup> Sa. cv, 28; evi, 30; Gal. iv, 25—were referred to) nor important, and we must conclude either that this part of their case had not been carefully got up, or that the bullying to which they were exposed had had the desired effect of throwing them into some confusion. The bishops turned the difficulties which they did raise with supercilious scorn. They were "trivial, old, and often answered." Bancroft raised the cry of alarm which a timid conservatism has so of-

ten raised since. "If every man's humor were to be followed, there would be no end of translating" (Cardwell, *Conferences*, p. 188). Cramer's words seemed likely to be fulfilled again. Had it been left to the bishops, we might have waited for the A.V. "till the day after doomsday." Even when the work was done, and the translators acknowledged that the Hampton-Court Conference had been the starting-point of it, they could not resist the temptation of a fling at their opponents. The objections to the Bishops' Bible had, they said, been nothing more than a shift to justify the refusal of the Puritans to subscribe to the Communion-book (*Preface* to A.V.). But the king disliked the politics of the Geneva Bible. Either repeating what he had heard from others, or exercising his own judgment, he declared that there was as yet no good translation, and that the Geneva was the worst of all. Nothing, however, was settled at the Conference beyond the hope thus held out.

2. But the king was not forgetful of what he thought likely to be the glory of his reign. The work of organizing and superintending the arrangements for a new translation was one specially congenial to him, and in 1606 the task was accordingly commenced. The selection of the fifty-four scholars to whom it was intrusted seems, on the whole, to have been a wise and fair one. Andrews, Saravia, Overal, Montague, and Barlow represented the "highier" party in the Church; Reynolds, Chaderton, and Lively that of the Puritans. Scholarship unconnected with party was represented by Henry Savile and John Boys. One name, that of Broughton, is indeed conspicuous by its absence. The greatest Hebrew scholar of the age—the man who had, in a letter to Cecil (1595), urged this very plan of a joint translation—who had already translated several books of the O. T. (Job, Ecclesiastes, Daniel, Lamentations), was ignominiously excluded. This may have been, in part, owing to the dislike with which Whitgift and Bancroft had all along regarded him. But in part, also, it was owing to Broughton's own character. An unmanageable temper, showing itself in violent language, and the habit of stigmatizing those who differed from him, even on such questions as those connected with names and dates, as heretical and atheistic, must have made him thoroughly impracticable; one of the men whose presence throws a committee or conference into chaos. Only forty-seven names appear in the king's list (Burnet, *Reform. Records*). Seven may have died or declined to act; or it may have been intended that there should be a final committee of revision. A full list is given by Fuller (*Ch. Hist.* x); and is reproduced, with biographical particulars, by Todd and Anderson. The Puritan side was, however, weakened by the death of Reynolds and Lively during the progress of the work.

3. What reward other than that of their own consciences and the judgment of posterity were the men thus chosen to expect for their long and laborious task? The king was not disposed to pay them out of his state revenue. Gold and silver were not always plentiful in the household of the English Solomon, and from him they received nothing (Heywood, *State of Auth. Bibl. Revision*). There remained, however, an ingenious form of liberality, which had the merit of being inexpensive. A king's letter was sent to the archbishops and bishops, to be transmitted by them to their chapters, commending all the translators to their favorable notice. They were exhorted to contribute in all 1000 marks, and the king was to be informed of each man's liberality. If any livings in their gift, or in the gift of private persons, became vacant, the king was to be informed of it, that he might nominate some of the translators to the vacant preferment. Heads of colleges, in like manner, were enjoined to give free board and lodging to such divines as were summoned from the country to labor in the great work (Strype, *Whitgift*, iv). That the king might take his place as

director of the whole, a copy of fifteen instructions was sent to each translator, and apparently circulated freely in both universities.

4. The instructions thus given will be found in Fuller (*l. c.*), and with a more accurate text in Burnet (*Reform. Records*). It will not be necessary to give them here in full; but it will be interesting to note the bearing of each clause upon the work in hand, and its relation to previous versions. (1) The Bishops' Bible was to be followed, and as little altered as the original will permit. This was probably intended to quiet the alarm of those who saw in the proposed new version a condemnation of that already existing. (2) The names of prophets and others were to be retained as nearly as may be in the form vulgarly used. This was to guard against forms like Izbak, Jeremiah, etc., which had been introduced in some versions, and which some Hebrew scholars were willing to introduce more copiously. To it we owe probably the forms Jeremy, Elias, Osee, Core, in the N. T. (3) The old ecclesiastical words were to be kept, as the word "church" not to be translated "congregation." The rule was apparently given for the sake of this special application. "Charity," in 1 Cor. xiii, was probably also due to it. The earlier versions, it will be remembered, had gone on the opposite principle. (4) "When any word hath divers significations, that to be kept which hath been most commonly used by the most eminent fathers, being agreeable to the propriety of the place and the analogy of faith." This, like the former, tends to confound the functions of the preacher and the translator, and substitutes ecclesiastical tradition for philological accuracy. (5) The division of the chapters to be altered either not at all, or as little as possible. Here, again, convenience was more in view than truth and accuracy, and the result is that divisions are perpetuated which are manifestly arbitrary and misleading. (6) No marginal notes to be affixed but only for the explanation of Hebrew and Greek words. This was obviously directed against the Geneva notes, as the special objects of the king's aversion. Practically, however, in whatever feeling it originated, we may be thankful that the A.V. came out as it did, without note or comment. The open Bible was placed in the hands of all readers. The work of interpretation was left free. Had an opposite course been adopted, we might have had the tremendous evil of a whole body of exegesis imposed upon the Church by authority, reflecting the Calvinism of the Synod of Dort, the absolutism of James, the high-flying prelacy of Bancroft. (7) "Such quotations of places to be marginally set down as may serve for fit reference of one Scripture to another." The principle that Scripture is its own interpreter was thus recognised, but practically the marginal references of the A.V. of 1611 were somewhat scanty, most of those now printed having been added in later editions. (8 and 9) State plan of translation. Each company of translators is to take its own books; each person to bring his own corrections. The company to discuss them, and, having finished their work, to send it on to another company, and so on. (10) Provides for differences of opinion between two companies by referring them to a general meeting. (11) Gives power, in cases of difficulty, to consult any scholars. (12) Invites suggestions from any quarter. (13) Names the directors of the work: Andrews, dean of Westminster; Barlow, dean of Chester; and the regius professors of Hebrew and Greek at both universities. (14) Names translations to be followed when they agree more with the original than the Bishops' Bible, namely, Tyndale's, Coverdale's, Matthew's, Whitlurch's, (Cramer's), and Geneva. (15) Authorizes universities to appoint three or four overseers of the work.

5. It is not known that any of the correspondence connected with this work, or any minute of the meetings for conference, is still extant. Nothing is more

striking than the silence with which the version that was to be the inheritance of the English people for at least two centuries and a half was ushered into the world. Here and there we get glimpses of scholars coming from their country livings to their old college haunts to work diligently at the task assigned them (Peck, *Desiderata Curiosa*, ii, 87). We see the meetings of translators, one man reading the chapter which he has been at work on, while the others listen, with the original, or Latin, or German, or Italian, or Spanish versions in their hands (Selden, *Table Talk*). We may represent to ourselves the differences of opinion, settled by the casting vote of the "odd man," or by the strong overbearing temper of a man like Baneroff, the minority comforting themselves with the thought that it was no new thing for the truth to be outvoted (Gell, *Essay towards Amendment of last English transl. of Bible*, p. 321). Dogmatic interests were in some cases allowed to bias the translation; and the Calvinism of one party, the prelatic views of another, were both represented at the expense of accuracy (Gell, l. c.). The following passages are those commonly referred to in support of this charge: (1.) The rendering "such as should be saved," in Acts ii, 47. (2.) The insertion of the words "any man" in Heb. x, 38 ("the just shall live by faith, but if *any man* draw back," etc.), to avoid an inference unfavorable to the doctrine of Final Perseverance. (3.) The use of "bishopric," in Acts i, 20, of "oversight," in 1 Pet. v, 2, of "bishop," in 1 Tim. iii, 1, etc., and "overseers," in Acts xx, 28, in order to avoid the identification of bishops and elders. (4.) The chapter-heading of Ps. cxlix in 1611 (since altered), "The prophet exhorteth to praise God for that power which he hath given the Church to bind the consciences of men." Blunt (*Duties of a Parish Priest*, lect. ii) appears, in this question, on the side of the prosecution, Trench (*On the A. V. of the N. T.* chap. x) on that of the defence. The charge of an undue bias against Rome in 1 Cor. xi, 27; Gal. v, 6; Heb. xiii, 4, is one on which an acquittal may be pronounced with little or no hesitation.

6. For three years the work went on, the separate companies comparing notes as directed. When the work drew towards its completion, it was necessary to place it under the care of a select few. Two from each of the three groups were accordingly selected, and the six met in London to superintend the publication. Now, for the first time, we find any more definite remuneration than the shadowy promise held out in the king's letter of a share in the 1000 marks which deans and chapters would not contribute. The matter had now reached its business stage, and the Company of Stationers thought it expedient to give the six editors thirty pounds each, in weekly payments, for their nine months' labor. The final correction, and the task of writing the arguments of the several books, was given to Bilson, bishop of Winchester, and Dr. Miles Smith, the latter of whom also wrote the Dedication and the Preface. Of these two documents, the first is unfortunately familiar enough to us, and is chiefly conspicuous for its servile adulation. James I is "that sanctified person," "enriched with singular and extraordinary graces," that had appeared "as the sun in his strength." To him they appeal against the judgment of those whom they describe, in somewhat peevish accents, as "popish persons or self-conceited brethren." The Preface to the Reader is more interesting, as throwing light upon the principles on which the translators acted. They "never thought that they should need to make a new translation, nor yet to make of a bad one a good one." "Their endeavor was to make a good one better, or, out of many good ones, one principal good one." They claim credit for steering a middle course between the Puritans who "left the old ecclesiastical words," and the obscurity of the Papists "retaining foreign words of purpose to darken the sense." They vindicate the practice, in

which they indulge very freely, of translating one word in the original by several English words, partly on the intelligible ground that it is not always possible to find one word that will express all the meanings of the Greek or Hebrew, partly on the somewhat childish plea that it would be unfair to choose some words for the high honor of being the channels of God's truth, and to pass over others as unworthy.

7. The version thus published did not all at once supersede those already in possession. The fact that five editions were published in three years shows that there was a good demand. But the Bishops' Bible probably remained in many churches (Andrews takes his texts from it in preaching before the king as late as 1621), and the popularity of the Geneva version is shown by not less than thirteen reprints, in whole or in part, between 1611 and 1617. It is not easy to ascertain the impression which the A. V. made at the time of its appearance. Probably, as in most like cases, it was far less for good or evil than friends or foes expected. The Puritans, and the religious portion of the middle classes generally, missed the notes of the Geneva book (Fuller, *Church History*, x, 50, 51). The Romanists spoke, as usual, of the unsettling effect of these frequent changes, and of the marginal readings as leaving men in doubt what was the truth of Scripture. Whitaker's answer, by anticipation, to this charge is worth quoting: "No inconvenience will follow if interpretations or versions of Scripture, when they have become obsolete or ceased to be intelligible, may be afterwards changed or corrected" (*Dissert. on Script.* p. 232, Parker Soc. ed.). The wiser divines of the English Church had not then learned to raise the cry of finality. One frantic cry was heard from Hugh Broughton, the rejected (*Works*, p. 661), who "would rather be torn in pieces by wild horses than impose such a version on the poor churches of England." Selden, a few years later, gives a calmer and more favorable judgment. It is "the best of all translations as giving the true sense of the original." This, however, is qualified by the remark that "no book in the world is translated as the Bible is, word for word, with no regard to the difference of idioms. This is well enough so long as scholars have to do with it, but when it comes among the common people, Lord! what gear do they make of it!" (*Table Talk*). The feeling of which this was the expression led, even in the midst of the agitations of the Commonwealth, to proposals for another revision, which, after being brought forward in the Grand Committee of Religion in the House of Commons in January, 1656, was referred to a sub-committee, acting under White Locke, with power to consult divines and report. Conferences were accordingly held frequently at White Locke's house, at which we find, mingled with less illustrious names, those of Walton and Cudworth. Nothing, however, came of it (White Locke, *Memoirs*, p. 564; Collier, *Ch. Hist.* ii, 9). No report was ever made; and with the Restoration the tide of conservative feeling, in this as in other things, checked all plans of further alteration. Many had ceased to care for the Bible at all. Those who did care were content with the Bible as it was. Only here and there was a voice raised, like R. Gell's (*ut sup.*), declaring that it had defects, that it bore in some things the stamp of the dogmatism of a party (p. 821).

8. The highest testimony of this period is that of Walton. From the editor of the Polyglot, the few words "inter omnes eminet" meant a good deal (*Pref.*). With the reign of Anne the tide of glowing panegyric set in. It would be easy to put together a long *catalogue* of praises stretching from that time to the present. With many, of course, this has been only the routine repetition of a traditional boast. "Our unrivalled Translation" and "our incomparable Liturgy" have been equally phrases of course. But there have been witnesses of a far higher weight. In pro-

portion as the English of the 18th century was infected with a Latinized or Gallicized style, did those who had a purer taste look with reverence to the strength and purity of a better time as represented in the A. V. Thus Addison dwells on its emobbling the coldness of modern languages with the glowing phrases of Hebrew (*Spectator*, No. 405), and Swift confesses that "the translators of the Bible were masters of an English style far fitter for that work than any we see in our present writings" (*Letter to Lord Oxford*). Each half century has naturally added to the prestige of these merits. The language of the A. V. has intertwined itself with the controversies, the devotion, the literature of the English people. It has gone, wherever they have gone, over the face of the whole earth. The most solemn and tender of individual memories are, for the most part, associated with it. Men leaving the Church of England for the Church of Rome turn regretfully with a yearning look at that noble "well of English undefiled" which they are about to exchange for the uncouth monstrosities of Rheims and Douay. In this case, too, as in so many others, the position of the A. V. has been strengthened, less by the skill of its defenders than by the weakness of its assailants. While from time to time scholars and divines (Lowth, Newcome, Waterland, Trench, Ellicott) have admitted the necessity of a revision, those who have attacked the present version and produced new ones have been, for the most part, men of narrow knowledge and defective taste (Purver, Harwood, Bellamy, Conquest, Sawyer), just able to pick out a few obvious faults, and committing others equally glaring. They have also generally entered on the work of translating or revising the whole Bible single-handed. One memorable exception must not, however, be passed over. Hallam (*Lit. of Europe*, iii, ch. ii, ad fin.) records a brief but emphatic protest against the "enthusiastic praise" which has been lavished on this translation. "It may, in the eyes of many, be a better English, but it is not the English of Daniel, or Raleigh, or Bacon. . . . It abounds, in fact, especially in the O. T., with obsolete phraseology, and with single words long since abandoned, or retained only in provincial use." The statement may, however, in some sense be accepted as an encomium. If it had been altogether the English of the men of letters of James's reign, would it have retained, as it has done for two centuries and a half, its hold on the mind, the memory, the affections of the English people?

XII. *Schemes for a Revision*.—1. A notice of the attempts which have been made at various times to bring about a revision of the A. V., though necessarily brief and imperfect, may not be without its use for future laborers. The first half of the 18th century was not favorable for such a work. An almost solitary *Essay for a New Translation* by H. R. (Ross), 1702, attracted little or no notice (Todd, *Life of Walton*, i, 134). A Greek Testament, with an English translation, singularly vulgar and offensive, was published in 1720, of which extracts are given by Lewis (*Hist. of Transl.*, ch. v). With the slight revival of learning among the scholars of the latter half of that period the subject was again mooted. Lowth in a visitation sermon (1758), and Seeker in a Latin speech intended for Convocation (1761), recommended it. Matt. Pilkington, in his *Remarks* (1759), and Dr. Thomas Brett, in an *Essay on Ancient Versions of the Bible* (1760), dwelt on the importance of consulting them with reference to the O. T. as well as the N. T., with a view to a more accurate text than that of the Masoretic Hebrew, the former insisting also on the obsolete words which are scattered in the A. V., and giving a useful alphabetic list of them. A folio *new and literal translation* of the whole Bible by Anthony Purver, a Quaker (1764), was a more ambitious attempt. He dwells at some length on the "obsolete, uncouth, clownish" ex-

pressions which disfigure the A. V. He includes in his list such words as "joyous," "solace," "damsel," "day-spring," "bereaved," "marvels," "bondmen." He substitutes "he hearkened to what he said" for "he hearkened to his voice;" "eat victuals" for "eat bread" (Gen. iii, 19); "was in favor with" for "found grace in the eyes of;" "was angry" for "his wrath was kindled." In spite of this defective taste, however, the work has considerable merit, is based upon a careful study of the original and of many of the best commentators, and may be contrasted favorably with most of the single-handed translations that have followed. It was, at any rate, far above the depth of degradation and folly which was reached in Harwood's *Literal Translation of the N. T.* "with freedom, spirit, and elegance" (1768). Here, again, a few samples are enough to show the character of the whole. "The young lady is not dead" (Mark v, 39). "A gentleman of splendid family and opulent fortune had two sons" (Luke xv, 11). "The clergyman said, You have given him the only right and proper answer" (Mark xii, 32). "We shall not pay the common debt of nature, but by a soft transition," etc. (1 Cor. xv, 51).

2. Biblical revision was happily not left entirely in such hands as these. A translation by Worsley "according to the present idiom of the English tongue" (1770) was, at least, less offensive. Durell (*Preface to Job*), Lowth (*Pref. to Isaiah*), Blayney (*Pref. to Jeremiah*, 1784), were all strongly in favor of a new or revised translation. Durell dwells most on the arbitrary additions and omissions in the A. V. of Job, on the total absence in some cases of any intelligible meaning. Lowth speaks chiefly of the faulty state of the text of the O. T., and urges a correction of it, partly from various readings, partly from ancient versions, partly from conjecture. Each of the three contributed, in the best way, to the work which they had little expectation of seeing accomplished, by laboring steadily at a single book, and committing it to the judgment of the Church. Kennicott's labors in collecting MSS. of the O. T. issued in *Lis State of the present Hebrew Text* (1753-59), and excited expectations that there might before long be something like a basis for a new version in a restored original.

A more ambitious scheme was started by the Roman Catholic Dr. Geddes, in his *Prospectus for a New Translation* (1786). His remarks on the history of English translations, his candid acknowledgment of the excellences of the A. V., and especially of Tyndale's work as pervading it, his critical notes on the true principles of translation, on the A. V. as falling short of them, may still be read with interest. He too, like Lowth, finds fault with the superstitious adherence to the Masoretic text, with the undue deference to lexicons, and disregard of versions shown by our translators. The proposal was well received by many Biblical scholars, Lowth, Kennicott, and Barrington being foremost among its patrons. The work was issued in parts, according to the terms of the Prospectus, but did not get further than 2 Chron. in 1792, when the death of the translator put a stop to it. Partly, perhaps, owing to its incompleteness, but still more from the extreme boldness of a Preface, anticipating the conclusions of a later criticism, Dr. Geddes's translation fell rapidly into disfavor. A sermon by White (famous for his Bampton Lectures) in 1779, and two pamphlets by J. A. Symonds, professor of modern history at Cambridge—the first on the Gospels and the Acts, in 1789; the second on the Epistles, in 1791—though attacked in an *Apology for the Liturgy and Church of England* (1795), helped to keep the discussion from oblivion.

3. The revision of the A. V., like many other salutary reforms, was hindered by the French Revolution. In 1792, archbishop Newcome had published an elaborate defence of such a scheme, citing a host of authorities (Doddridge, Wesley, Campbell, in addition to those already mentioned), and taking the same line as Lowth.

Revised translations of the N. T. were published by Wakefield in 1795, by Newcome himself in 1796, by Scarlett in 1798. Campbell's version of the Gospels appeared in 1788, that of the Epistles by Macknight in 1795. But in 1796 the note of alarm was sounded. A feeble pamphlet by George Burges (*Letter to the Lord Bishop of Ely*) took the ground that "the present period was unfit," and from that time conservatism, pure and simple, was in the ascendant. To suggest that the A. V. might be inaccurate was almost as bad as holding "French principles." There is a long interval before the question again comes into anything like prominence, and then there is a new school of critics in the *Quarterly Review* and elsewhere, ready to do battle vigorously for things as they are. The opening of the next campaign was an article in the *Classical Journal* (No. 36), by Dr. John Bellamy, proposing a new translation, followed soon afterwards by its publication under the patronage of the prince regent (1818). The work was poor and unsatisfactory enough, and a tremendous battery was opened upon it in the *Quarterly Review* (Nos. 37 and 38), as afterwards (No. 46) upon an unhappy critic, Sir J. B. Burges, who came forward with a pamphlet in its defence (*Reasons in favour of a new Translation*, 1819). The rash assertion of both Bellamy and Burges that the A. V. had been made almost entirely from the Septuagint and Vulgate, and a general deficiency in all accurate scholarship, made them easy victims. The personal element of this controversy may well be passed over, but three less ephemeral works issued from it, which any future laborer in the same field will find worth consulting. Whitaker's *Historical and Critical Inquiry* was chiefly an able exposure of the exaggerated statement just mentioned. H. J. Todd, in his *Vindication of the Authorized Translation* (1819), entered more fully than any previous writer had done into the history of the A. V., and gives many facts as to the lives and qualifications of the translators not easily to be met with elsewhere. The most masterly, however, of the manifestoes against all change was a pamphlet (*Remarks on the Critical Principles, etc.*, Oxford, 1820), published anonymously, but known to have been written by archbishop Laurence. The strength of the argument lies chiefly in a skilful display of all the difficulties of the work, the impossibility of any satisfactory restoration of the Hebrew of the O. T., or any settlement of the Greek of the N. T.; the expediency, therefore, of adhering to a *Textus receptus* in both. See VARIOUS READINGS. The argument, if conclusive, would unsettle our confidence in the text of the Holy Scriptures. Happily, more thorough critical research has fully refuted the archbishop's positions. But the scholarship and acuteness with which the subject is treated make the book instructive, and any one entering on the work of a translator ought at least to read it, that he may know what difficulties he has to face. About this period, also (1819), a new edition of Newcome's version was published by Belsham and other Unitarian ministers, and, like Bellamy's attempt on the O. T., had the effect of stiffening the resistance of the great body of the clergy to all proposals for a revision.

4. A correspondence between Herbert Marsh, bishop of Peterborough, and the Rev. H. Walter, in 1828, is the next link in the chain. Marsh had spoken (*Lectures on Biblical Criticism*, p. 295) with some contempt of the A. V. as based on Tyndale's, Tyndale's on Luther's, and Luther's on Münster's lexicon, which was itself based on the Vulgate. There was, therefore, on this view, no real translation from the Hebrew in any one of these. But it is evident that the Christian Hebraists of the period of the Reformation depended quite as much on the traditional learning of their Jewish teachers, often erroneous indeed, as on the earlier tradition preserved in the Latin Vulgate, and that they followed, as far as they were able, the Masoretic

punctuation, a much surer guide than the ancient versions, or the later rabbinic interpretation.

5. The last five-and-twenty years have seen the question of a revision from time to time gaining fresh prominence. If men of second-rate power have sometimes thrown it back by meddling with it in wrong ways, others, able scholars and sound theologians, have admitted its necessity and helped it forward by their work. Dr. Conquest's Bible, with "20,000 emendations" (1841), has not commanded the respect of critics, and is almost self-condemned by the silly ostentation of its title. The motions which have from time to time been made in the House of Commons by Mr. Heywood have borne little fruit beyond the display of feeble liberalism, and yet feebler conservatism, by which such debates are, for the most part, characterized; nor have the discussions in Convocation, though opened by a scholar of high repute (professor Selwyn), been much more productive. Dr. Beard's essay, *A revised English Bible the Want of the Church* (1857), though tending to overstate the defects of the A. V., is yet valuable as containing much information, and representing the opinions of the more learned Nonconformists. Far more important, every way, both as virtually an authority in favor of revision and as contributing largely to it, are professor Scholefield's *Hints for an improved Translation of the N. T.* (1832). In his second edition, indeed, he disclaims any wish for a new translation, but the principle which he lays down clearly and truly in his preface, that if there is "any adventitious difficulty resulting from a defective translation, then it is at the same time an act of charity and of duty to clear away the difficulty as much as possible," leads legitimately to at least a revision; and this conclusion Mr. Selwyn, in the last edition of the *Hints* (1857), has deliberately adopted. To bishop Ellicott also belongs the credit of having spoken at once boldly and wisely on this matter. Putting the question whether it would be right to join those who oppose all revision, his answer is, "God forbid. . . . It is in vain to cheat our own souls with the thought that these errors (in A. V.) are either insignificant or imaginary. There are errors, there are inaccuracies, there are misconceptions, there are obscurities. . . . and that man who, after being in any degree satisfied of this, permits himself to lean to the counsels of a timid or popular obstructiveness, or who, intellectually unable to test the truth of these allegations, nevertheless permits himself to denounce or deny them, will . . . have to sustain the tremendous charge of having dealt deceitfully with the inviolable word of God" (*Pref. to Pastoral Epistles*). The translations appended by Dr. Ellicott to his editions of Paul's epistles proceed on the true principle of altering the A. V. "only where it appears to be incorrect, inexact, insufficient, or obscure," uniting a profound reverence for the older translators with a bold truthfulness in judging of their work. The copious collection of all the earlier English versions makes this part of his book especially interesting and valuable. Dr. Trench (*On the A. V. of the N. T.*, 1858), in like manner, states his conviction that "a revision ought to come," though as yet, he thinks, "the Greek and the English necessary to bring it to a successful issue are alike wanting" (p. 3). The work itself, it need hardly be said, is the fullest contradiction possible of this somewhat despondent statement, and supplies a good store of materials for use when the revision actually comes. The *Revision of the A. V. by five Clergymen* (Dr. Barrow, Dr. Moberly, dean Alford, Mr. Humphry, and Dr. Ellicott) represents the same school of conservative progress, has the merit of adhering to the clear, pure English of the A. V., and does not deserve the censure which Dr. Beard passes on it as "promising little and performing less." As yet, this series includes only the Gospel of John, and the epistles to the Romans and Corinthians. The publications of the

American Bible Union are signs that there also the same want has been felt. The translations given respectively by Alford, Stanley, Jowett, and Conybeare and Howson, in their respective commentaries, are in like manner at once admissions of the necessity of the work and contributions towards it. Mr. Sharpe (1840) and Mr. Highton (1862) have ventured on the wider work of translations of the entire N. T. Mr. Sawyer (1858) has done the same, and proposes to continue the task over the whole Bible; but he lacks both the scholarship and the judgment necessary. Mr. Cookeley has published the Gospel of Matthew as Part I of a like undertaking. It might almost seem as if at last there was something like a *consensus* of scholars and divines on this question. That assumption would, however, be too hasty. Partly the *vis inertiae*, which, in a large body like the clergy of the Church, is always great, partly the fear of ulterior consequences, partly also the indifference of the majority of the laity, would probably, at the present moment, give at least a numerical majority to the opponents of a revision. Writers on this side are naturally less numerous, but the feeling of conservatism, pure and simple, has found utterance in four men representing different sections, and of different calibre—Mr. Scrivener (*Supp. to J. Eng. Ver. of N. T.*), Dr. M'Caul (*Reasons for holding fast the Authorized English Version*), Mr. C. S. Malan (*A Vindication*, etc.), and Dr. Cumming (*Revision and Translation*). A high American authority, Mr. Geo. P. Marsh, may also be referred to as throwing the weight of his judgment into the scale against any revision at the present moment (*Lectures on the English Language*, lect. xxviii).

XIII. *Present State of the Question.*—1. To take an accurate estimate of the extent to which the A. V. requires revision would call for nothing less than an examination of each single book, and would therefore involve an amount of detail incompatible with our present limits. To give a few instances only would practically fix attention on a part only of the evidence, and so would lead to a false rather than a true estimate. No attempt, therefore, will be made to bring together individual passages as needing correction. A few remarks on the chief questions which must necessarily come before those who undertake a revision will not, perhaps, be out of place. Examples, classified under corresponding heads, will be found in the book by Dr. Trench already mentioned, and, scattered in the form of annotations, in that of professor Scholefield.

2. The translation of the N. T. is from a text confessedly imperfect. What editions were used is a matter of conjecture; most probably one of those published with a Latin version by Beza between 1565 and 1598, and agreeing substantially with the *Textus receptus* of 1633. It is clear, on principle, that no revision ought to ignore the results of the textual criticism of the last hundred years. To shrink from noticing any variation, to go on printing as the inspired Word that which there is a preponderant reason for believing to be an interpolation or a mistake, is neither honest or reverential. To do so for the sake of greater edification is simply to offer to God the unclean sacrifice of a lie. The authority of the A. V. is, at any rate, in favor of the practice of not suppressing facts. In Matt. i, 11; xxvi, 26; Luke xvii, 36; John viii, 6; Acts xiii, 18; Ephes. vi, 9; Heb. ii, 4; James ii, 18; 1 John ii, 23; 1 Peter ii, 21; 2 Peter ii, 11, 18; 2 John, 8, different readings are given in the margin, or, as in 1 John ii, 23, indicated by a different type. In earlier versions, as has been mentioned, 1 John v, 7 was printed in smaller letters. The degree to which this should be done will, of course, require discernment. An apparatus like that in Tischendorf or Alford would obviously be out of place. Probably the useful Greek Testament edited by Mr. Scrivener might serve as an example of a middle course.

3. Still less had been done at the commencement of the 17th century for the text of the O. T. The Jewish teachers, from whom Protestant divines derived their knowledge, had given currency to the belief that in the Masoretic text were contained the *ipsissima verba* of revelation, free from all risks of error, from all casualties of transcription. The conventional phrases, "the authentic Hebrew," "the Hebrew verity," were the expression of this undiscerning reverence. They refused to apply the same rules of judgment here which they applied to the text of the N. T. They assumed that the Masorites were infallible, and were reluctant to acknowledge that there had been any variations since. Even Walton did not escape being attacked as unsound by the great Puritan divine, Dr. John Owen, for having called attention to the fact of discrepancies (*Proleg.* ch. vi). The materials for a revised text are, of course, scantier than with the N. T.; but the labors of Kennicott, De Rossi, J. H. Michaelis, and Davidson have not been fruitless, and here, as there, the older versions must be admitted as at least evidence of variations which once existed, but which were suppressed by the rigorous uniformity of the later rabbis. Conjectural emendations, such as Newcome, Lowth, and Ewald have so freely suggested, ought to be ventured on in such places only as are quite unintelligible without them. See CRITICISM, BIBLICAL.

4. All scholars worthy of the name are now agreed that as little change as possible should be made in the language of the A. V. Happily there is little risk of an emasculated elegance such as might have infected a new version in the last century. The very fact of the admiration felt for the A. V., and the general revival of a taste for the literature of the Elizabethan period, are safeguards against any like tampering now. Some words, however, absolutely need change, as being altogether obsolete; others, more numerous, have been slowly passing into a different, often into a lower or a narrower meaning, and are therefore no longer what they once were, adequate renderings of the original.

5. The self-imposed law of fairness, which led the A. V. translators to admit as many English words as possible to the honor of representing one in the Hebrew or Greek text, has, as might be expected, marred the perfection of their work. Sometimes the effect is simply the loss of the solemn emphasis of the repetition of the same word; sometimes it is more serious, and affects the meaning. While it would be simple pedantry to lay down unconditionally that but one and the same word should be used throughout for one in the original, there can be no doubt that such a limitation is the true principle to start with, and that instances to the contrary should be dealt with as exceptional necessities. Side by side with this fault there is another just the opposite of it. One English word appears for several Greek or Hebrew words, and thus shades of meaning, often of importance to the right understanding of a passage, are lost sight of. Taken together, the two forms of error, which meet us in well-nigh every chapter, make the use of an English Concordance absolutely misleading. Technical terms especially should be represented in as exact and uniform a manner as possible.

6. Grammatical inaccuracy must be noted as a defect pervading, more or less, the whole extent of the present version of the N. T. Instances will be found in abundance in Trench and Scholefield (*passim*), and in any of the better Commentaries. Such Gallicisms as "I am come," "Babylon is fallen," etc., to say nothing of outright French words, e. g. "briit" for noise (Nah. iii, 19), have often escaped detection. The true force of tenses, cases, prepositions, articles, is continually lost, sometimes at the cost of the finer shades which give vividness and emphasis, but sometimes also entailing more serious errors. In justice to the translators of the N. T., it must be said that, situ-

ated as they were, such errors were almost inevitable. They learned Greek through the medium of Latin. Lexicons and grammars were alike in the universal language of scholars; and that language was poorer and less inflected than the Greek, and failed utterly to represent, e. g. the force of its article, or the difference of its aorist and perfect tenses. Such books of this nature as were used by the translators were necessarily based upon a far scantier induction, and were therefore more meagre and inaccurate than those which have been the fruits of the labors of later scholars. Recent scholarship may in many things fall short of that of an earlier time, but the introduction of Greek lexicons and grammars in English has been beyond all doubt a change for the better.

7. The field of the O. T. has been far less adequately worked than that of the N. T., and Hebrew scholarship has made far less progress than Greek. Relatively, indeed, there seems good ground for believing that Hebrew was more studied in the early part of the 17th century than it is now. It was newer and more popular. The reverence which men felt for the perfection of the "Hebrew verity" made them willing to labor to learn a language which they looked upon as half-divine. But here, also, there was the same source of error. The early Hebrew lexicons represented partly, it is true, a Jewish tradition, but partly also were based upon the Vulgate (bishop Marsh, *Lectures*, ii, App. 61). The forms of cognate Shemitic languages had not been applied as a means for ascertaining the precise value of Hebrew words. The grammars, also in Latin, were defective. Little as Hebrew professors have, for the most part, done in the way of exegesis, any good commentary on the O. T. will show that here also there are errors as serious as in the N. T. In one memorable case, the inattention, real or apparent, of the translators to the force of the *Hiphil* form of the verb (Lev. iv, 12) has led to a serious attack on the truthfulness of the whole narrative of the Pentateuch (Colenso, *Pentateuch critically Examined*, pt. i, ch. vii).

8. The poetical character of many portions of the O. T. is wholly obscured by the arrangement of the A. V., and, indeed, its authors and editors seem to have ignored the poetical element altogether. This is a defect of very great importance, and should be remedied by a proper distribution of the clauses according to the Heb. laws of parallelism (q. v.), as well as by a more careful observance of that system of transposition of the terms of each hemistich that is characteristic of all poetry.

9. The division into chapters and verses is a matter that ought not to be passed over in any future revision. The former, it must be remembered, does not go further back than the 13th century. The latter, though answering, as far as the O. T. is concerned, to a long-standing Jewish arrangement, depends, in the N. T., upon the work of Robert Stephens. Neither in the O. T. nor in the N. T. did the verse-division appear in any earlier edition than that of Geneva. The inconveniences of changing both are probably too great to be risked. The habit of referring to chapter and verse is too deeply rooted to be got rid of. Yet the division, as it is, is not seldom artificial, and sometimes is absolutely misleading. No one would think of printing any other book, in prose or poetry, in short clauses like the verses of our Bibles, and the tendency of such a division is to give a broken and discontinuous knowledge, to make men good textuaries but bad divines. An arrangement like that of the paragraph Bibles of our own time, with the verse and chapter divisions relegated to the margin, ought to form part of any authoritative revision.

10. Other points of detail remain to be noticed briefly: (1.) The chapter-headings of the A. V. often go beyond their proper province. If it is intended to give an authoritative commentary to the lay reader, let it be done thoroughly. But if that attempt is abandon-

ed, as it was deliberately in 1611, then for the chapter-headings to enter, as they do, upon the work of interpretation, giving, as in Canticles, Psalms, and Prophets, *passim*, mystical meanings, is simply an inconsistency. What should be a mere table of contents becomes a gloss upon the text. (2.) The use of italics in printing the A. V., if of advantage in point of minute criticism, is at least open to some risks. At first they seem an honest confession on the part of the translators of what is or is not in the original. On the other hand, they tempt to a loose translation. Few writers would think it necessary to use them in translating other books. If the words do not do more than represent the sense of the original, then there is no reason for treating them as if they were added at the discretion of the translators. If they go beyond that, they are of the nature of a gloss, altering the force of the original, and have no right to be there at all, while the fact that they appear as additions frees the translator from the sense of responsibility. (3.) Good as the principle of marginal references is, the margins of the A. V., as now printed, are somewhat inconveniently crowded, and the references, being often merely verbal, tend to defeat their own purpose, and to make the reader weary of referring. They need, accordingly, a careful sifting; and though it would not be desirable to go back to the scanty number of the original edition of 1611, something intermediate between that and the present overabundance would be an improvement. (4.) Marginal readings, on the other hand, indicating variations in the text, or differences in the judgment of translators, might be profitably increased in number. The results of the labors of scholars would thus be placed within the reach of all intelligent readers, and so many difficulties and stumbling-blocks might be removed.

In all these points there has been, to a much larger extent than is commonly known, a work of unauthorized revision. Neither italics, nor references, nor readings, nor chapter-headings, nor, it may be added, punctuation, are the same now as they were in the A. V. of 1611. The chief alterations appear to have been made first in 1683, and afterwards in 1769, by Dr. Blayney, under the sanction of the Oxford delegates of the press (*Gentleman's Magazine*, Nov. 1789). A like work was done about the same time by Dr. Paris at Cambridge. There had, however, been some changes previously. The edition of 1638, in particular, shows considerable augmentations in the italics (Turton, *Text of the English Bible*, 1833, p. 91, 126). To Blayney also we owe most of the notes on weights and measures, and coins, and the explanation, where the text seems to require it, of Hebrew proper names. The whole question of the use of italics is discussed elaborately by Turton in the work just mentioned. The late issues of the American Bible Union (q. v.) have, too uniformly perhaps, rejected this mode of distinction; discarding it on the ground that, if the italicized words are not necessary to the sense, they have no business there; if necessary, then the reader is misled by marking them as though they were not.

11. What has been said will serve to show at once to what extent a new revision is required, and what are the chief difficulties to be encountered. The work, it is believed, ought not to be delayed much longer. Names of men competent to undertake the work, as far as the N. T. is concerned, will occur to every one; and if such alterations only were to be introduced as commanded the assent of at least two thirds of a chosen body of twenty or thirty scholars, while a place in the margin was given to such renderings only as were adopted by at least one third, there would be, it is believed, at once a great change for the better, and without any shock to the feelings or even the prejudices of the great mass of readers. Men fit to undertake the work of revising the translation of the O. T. are confessedly fewer, and, for the most part, occupied in

other things. The knowledge and the power, however, are there, though in less measure; and, even though the will be for the time absent, a summons to enter on the task from those whose authority they are bound to respect, would, we cannot doubt, be listened to. It might have the result of directing to their proper task, and to a fruitful issue, energies which are too often withdrawn to ephemeral and unprofitable controversies. As the revised Bible would be for the use of English-speaking people, the men appointed for the purpose ought not to be taken exclusively from any one Church, and the learning of all denominations should at least be fairly represented. The changes recommended by such a body of men, under conditions such as those suggested, might safely be allowed to circulate experimentally for two or three years. When they had stood that trial, they might, without risk, be printed in the new Authorized Version. Such a work would unite reverence for the past with duty towards the future. In undertaking it we should be not slighting the translators on whose labors we have entered, but following in their footsteps. It is the wisdom of the Church to bring out of its treasures things new and old.

XIV. *Literature.*—In addition to the works cited above, see especially Johnson's *Account of the several English Trans. of the Bible* (Lond. 1730, 8vo; reprinted in Bp. Watson's *Theolog. Tracts*); Bp. Marsh's *Hist. of the Translations which have been made of the Scriptures, from the earliest to the present Age* (Lond. 1812, 8vo); Lewis's *History of the principal Translations of the Bible* (3d ed. Lond. 1818, 8vo); Newcome's *Historical View of the English Biblical Translations* (Dublin, 1792, 8vo); Cotton's *List of Editions of the Bible* (2d ed. Oxford, 1852, 8vo); Walter's *Letter on the Independence of the Authorized Version of the Bible* (Lond. 1823, 8vo); Todd's *Vindication of our Authorized Translation*, etc. (Lond. 1819, 8vo); and especially Anderson's *Annals of the English Bible* (Lond. 1845, 2 vols. 8vo; in part reprinted, N. Y. 1856, 8vo); also Beard, *Revised English Bible the Want of the Church* (new ed. Lond. 1860, 8vo); Mrs. Conant, *History of the English Bible* (N. Y. 1856; Lond. 1859, 8vo); Bp. Hinds, *Scripture and the Authorized Version* (Lond. 1853, 12mo); Malan, *Vindication of the Authorized Version of the Bible* (Lond. 1856, 8vo); Anon. *Renderings of the principal English Translations of the Bible* (Lond. 1849, 4to); Scholefield, *Hints for an improved Translation of the New Testament* (Lond. 1857, 12mo); Dewes, *Plea for translating the Scriptures* (Lond. 1866, 8vo); comp. *Bibliotheca Sacra*, April, 1858; *Ch. of Eng. Quarterly*, Oct. 1856; *Christian Review*, April, 1857; *Jour. of Sac. Lit.* July, 1857, July, 1858; *South. Presb. Review*, Jan. 1858; *Br. For. Quart. Rev.* Jan. 1860; *Free-will Bapt. Quart. Rev.* July, 1863; *Meth. Quart. Review*, July, 1864; *Jour. Sac. Lit.* Apr. 1867. See AUTHORIZED VERSION.

**Engrave** (חָרַטְ, *pathach'*, to open, hence [in Piel] to carve or grave, whether on wood, gems, or stone; thrice חָרַשׁ, *charash'*, Exod. xxviii, 11; xxxv, 35; xxxviii, 23, elsewhere *artificer* in general; *ἐντυπῶω*, 2 Cor. iii, 7). The latter term, חָרַטְ, so translated in the A. V., applies broadly to any *artificer*, whether in wood, stone, or metal: to restrict it to the engraver in Exod. xxxv, 35; xxxviii, 23, is improper: a similar latitude must be given to the other term חָרַשׁ, which expresses the operation of the artificer; in *Zech.* iii, 9, ordinary stone-cutting is evidently intended. The specific description of an engraver was חָרַטְ אֲבִנִים (Exod. xxviii, 11), lit. a *stone-graver*, and his chief business was cutting names or devices on rings and seals; the only notices of engraving are in connection

with the high-priest's dress—the two onyx-stones, the twelve jewels, and the mitre-plate having inscriptions on them (Exod. xxviii, 11, 21, 36). The previous notices of signets (Gen. xxxviii, 18; xli, 42) imply engraving. The art was widely spread throughout the nations of antiquity (*For. Quar. Rev.* xxvi, 32; xxvii, 40), particularly among the Egyptians (Diod. i, 78; Wilkinson, iii, 373), the Æthiopians (Her. vii, 69), and the Indians (Von Bohlen, *Indien*, ii, 122).—Smith, s. v. See GRAVING.

**En-had'dah** (Hebrew *Eyn Chaldah'*, עֵינַי חַלְדָּה, *swift fountain*; Sept. *Hyaçêdâ*), a city on the border of the tribe of Issachar, mentioned between Engannim and Beth-pazzez (Josh. x, 21). Van de Velde (*Narrative*, i, 315) and Thomson (*Land and Book*, ii, 248) would identify it with *Ain-Haud*, on the western brow of Carmel, and about two miles from the sea; but this is out of the limits of the tribe of Issachar. Its site is possibly to be sought in that of the modern village *Ain-Mabil*, not far N. E. of Nazareth (Robinson, *Researches*, iii, 269).

**En-hak'korè** (Heb. *Eyn hak-korè'*, עֵינַי הַקִּירָה, *fountain of the caller*; Sept. Πηγῆ τοῦ ἐπακουμένον), a name given by Samson to the spring that burst forth in answer to his prayer in a dell of Lehi, when he was exhasted with the slaughter of the Philistines (Judg. xv, 19). The word מַקְתֵּשׁ, *maktesh'*, which in the narrative denotes the "hollow place" (literally the "mortar") or *socket* in the jaw, and also that for the "jaw" itself, *lechi*, are both names of places. See LEHI. Van de Velde (*Memoir*, p. 343) endeavors to identify Lehi with *Tell el-Lekiyeh*, 4 miles N. of Beer-sheba, and En-hakkore with the large spring between the tell and Khewelfeh. But Samson's adventures appear to have been confined to a narrow circle, and there is no ground for extending them to a distance of some 30 miles from Gaza, which Lekiyeh is, even in a straight line. It appears to have been the same place later known (Neh. xi, 29) as EN-RIMMON (q. v.).

**En-ha'rod** (Heb. *Eyn Charod'*, עֵינַי חָרוֹד, *fountain of Harod*; Sept. πηγῆ Ἁρόδ'), a spring in the vicinity of the town of Harod (Judg. vii, 1, where the name is translated "well of Harod"). See HAROD.

**En-ha'zor** (Heb. *Eyn Chatsor'*, עֵינַי חָצוֹר, *fountain of Hazor*, i. e. of the village; Sept. πηγῆ Ἀσόρ), a fortified city of the tribe of Naphtali, mentioned between Edrei and Iron (Josh. xix, 37), but apparently different from Hazor (ver. 36). It has been identified by Schwarz (*Palest.* p. 183) and Thomson (*Land and Book*, i, 515) with the *Ain-Hazir* not far N. W. of *Tell-Hazir* (between Rameh or Ramah and Yakuk or Hukkok), which latter (being marked as a ruined site by Van de Velde, although Dr. Robinson, who visited it, denies that there are any traces of structures on the summit; *Later Researches*, p. 81), was probably the location of the city itself. See HAZOR.

**Enlightenment.** See ILLUMINATI.

**En-mish'pat** (Heb. *Eyn Mishpat'*, עֵינַי מִשְׁפָּט, *fountain of judgment*; Sept. ἡ πηγῆ τῆς κρίσεως), the earlier name (Gen. xiv, 7) for KADESH (q. v.). In the borders of Idumea (comp. Num. xx, 13, 14). According to Schwarz (*Palest.* p. 214), there is found, about 10 miles south of Petra, a large spring, still called by the Bedouins *Ain el-Sedaka*, or *spring of justice*, which he holds to be the same as the ancient En-mishpat; but this would be very far south for the required locality [see EXODE]; and the spot he names is doubtless the *Ain el-Usdakah* marked on Robinson's *Map* as identical with the *Zodocatha* of the Roman post-routes (Reiland, *Palest.* p. 250).

**Enmity**: "opposition; very bitter, deep-rooted, irreconcilable hatred and variance. Such a constant enmity there is between the followers of Christ and

Šačan; nay, there is some such enmity between mankind and some serpents (Gen. iii, 15). Friendship with this world, in its wicked members and lusts, is *enmity with God*—is opposed to the love of him, and amounts to an actual exerting of ourselves to dishonor and abuse him (James iv, 4; 1 John ii, 15, 16). The carnal mind, or minding of fleshly and sinful things, is *enmity against God*—is opposed to his nature and will in the highest degree, and, though it may be removed, cannot be reconciled to him, nor he to it (Rom. viii, 7, 8). The ceremonial law is called *enmity*: it marked God's enmity against sin by demanding atonement for it; it occasioned men's enmity against God by its burdensome services, and was an accidental source of standing variance between Jews and Gentiles; or perhaps the *enmity* here meant is the state of variance between God and men, whereby he justly loathed and hated them as sinful, and condemned them to punishment; and they wickedly hated him for his holy excellence, retributive justice, and sovereign goodness: both are slain and abolished by the death of Christ (Eph. ii, 15, 16)."—Brown, *Dictionary of the Bible*, s. v.

**Ennodius**, MAGNUS FELIX, one of the Latin fathers, was born about A. D. 473, at Arles (according to others at Milan), of a noble Gallic family, having such names as Faustus and Boethius on its registers. His parents dying early, he was sent, on the invasion of the Visigoths, to an aunt in Milan, who took good care of his education. Soon after her death (A. D. 489) he married a rich wife, and lived very freely until a severe illness brought him to reflection; and on his restoration he was ordained deacon, and his wife became a nun. (One account says that he had been ordained deacon before, and lived a bad life as deacon.) In 494 he accompanied Epiphanius of Pavia on a mission to Burgundy to ransom some Italian prisoners. In 496 he went to Rome, where he soon gained great reputation. In 502 he wrote in vindication of pope Symmachus against his rival, pope Laurentius. In this defence he first asserted that the bishop of Rome is subject to no earthly tribunal (Gieseler, i, § 115). He was the first to give to the bishop of Rome exclusively the name of "Papa" (pope), and was, in general, very eager to enlarge the papal authority. After he had been chosen, about A. D. 511, to succeed Maximus as bishop of Pavia (Ticinum), he went, under direction of pope Hormisdas, on two missions (515 and 517) to the emperor Anastasius with reference to the union between the Eastern and Western churches. Both missions failed. Ennodius died at Pavia July 17, 521. Among his writings are, *Epistolarum ad Diversos lib. iv.*:—*Livellus adr. eos, qui contra Synodum scribere presumerunt*, containing the defence of Symmachus named above:—*Vita Epiphaniū Episcopi*:—*Vita Antonii Monachi Lirinensis*:—*Euchristicon de vita sua*, an autobiography:—*Patrensis didascalica ad Ambrosium et Beatum*:—*Orationes*:—*Carmina*. His writings were published in Basle, 1569, fol.; Tournay, 1610; and by Sirmond (best ed.), Paris, 1611. They are also in Migne, *Patrol. Lat.* vol. lxxiii. Ennodius wrote strongly in favor of free will, and has been therefore styled a Semipelagian.—Cave, *Hist. Lit.* (Geneva, 1720), i, 322; Ceillier, *Auteurs Sacrés* (Paris, 1861), x, 473 sq.; Herzog, *Real-Encyklop.* iv, 68; Wetzer u. Welte, *Kirch.-Lex.* iii, 595.

**E'noch** (Heb. *Chanok'*, עֲנוֹךְ, *initiated*; according to Philo, *De poet. Caini*, § 11, from עָנָה, with the suffix עָנָה = עָנָה [ἐπιμνησται Ἐνοὺχ χάρις σου], i. e. *thy favor*; Sept. and N. T. Ἐνώχ, Josephus Ἐνώχος, Vulg. *Enoch*), the name of several men.

1. The eldest son of Cain (Gen. iv, 17), who called the city which he built after his name (Gen. iv, 18). B. C. post 4041. It is there described as being east of Eden, in the land of Nod, to which Cain retired after the murder of his brother. See NOD. Ewald (*Gesch.*

i, 356, note) fancies that there is a reference to the Phrygian Iconium, in which city a legend of Ἐννοχὸς was preserved, evidently derived from the biblical account of the father of Methuselah (Steph. Byz. s. v. Ἰκόνιον; Suid. s. v. Ἐννοχός). Other places have been identified with the site of Enoch with little probability; e. g. *Anuehta* (Ptolemy, vi, 3, 5) in Susiana, the *Heniochi* (Ptolemy, v, 9, 25; Strabo, xi, 492; Pliny, vi, 10, 12) in the Caucasus, etc. (Huetius, *De Paradiso*, c. 17; Hasse, *Entdeckung*, ii, 35; Gotter, *De Henochia ubi*, Jen. 1705 [of little value]; Sticht, *De urbe Henochia*, Jen. 1727).

2. Another antediluvian patriarch, the son of Jared and father of Methuselah (Gen. v, 21 sq.; Luke iii, 28; in 1 Chron. i, 3, the name is Anglicized "Henoch"). B. C. 3550-3185. He was born when Jared was 162 years old, and after the birth of his eldest son in his 65th year he lived 300 years. From the period of 365 years assigned to his life, Ewald (*Isr. Gesch.* i, 356), with very little probability, regards him as "the god of the new year," but the number may have been not without influence on the later traditions which assigned to Enoch the discovery of the science of astronomy (*ἀστρολογία*, Eupolemus ap. Euseb. *Præp. Ev.* ix, 17, where he is identified with Atlas). After the birth of Methuselah it is said (Gen. v, 22-24) that Enoch "walked with God 300 years . . . and he was not; for God took him" (עָנָה עִתָּה לְלוֹךְ אִתָּהּ). The phrase "walked with God" (עָנָה עִתָּה לְלוֹךְ אִתָּהּ) is elsewhere only used of Noah (Gen. vi, 9; comp. Gen. xvii, 1, etc.), and is to be explained of a prophetic life spent in immediate converse with the spiritual world (Book of Enoch, xii, 2, "All his action was with the holy ones, and with the watchers during his life"). There is no farther mention of Enoch in the O. T., but in Ecclesiasticus (xlix, 14) he is brought forward as one of the peculiar glories (οὐκ εἶς ἐκτίσθη οἷος 'Ε.) of the Jews, for he was taken up (ἀνεβήθη), Alex. *μετετέθη*) from the earth. "He pleased the Lord and was translated [Vulg. into Paradise], being a pattern of repentance" (Eccles. xlv, 14). In the Epistle to the Hebrews the spring and issue of Enoch's life are clearly marked. "By faith Enoch was translated (*μετετέθη*), that he should not see death . . . for before his translation (*μετάθεσις*) he had this testimony, that he pleased God." The contrast to this divine judgment is found in the constrained words of Josephus: "Enoch departed to the Deity (*ἀνεχώρησε πρὸς τὸ θεῖον*), whence [the sacred writers] have not recorded his death" (*Ant.* i, 3, 4). In the Epistle of Jude (v, 14; comp. Enoch ix, 8) he is described as "the seventh from Adam;" and the number is probably noticed as conveying the idea of divine completion and rest (comp. August. *c. Faust.* xii, 14), while Enoch was himself a type of perfected humanity, "a man raised to heaven by pleasing God, while angels fell to earth by transgression" (Irenæus, iv, 16, 2). Elijah was in like manner translated; and thus was the doctrine of immortality palpably taught under the ancient dispensation.

The biblical notices of Enoch were a fruitful source of speculation in later times. Some theologians disputed with subtlety as to the place to which he was removed, whether it was to Paradise or to the immediate presence of God (comp. Feuardentius, *ad Iren.* v, 5), though others more wisely declined to discuss the question (Thilo, *Col. Apoc.* X. T. p. 758). On other points there was greater unanimity. Both the Latin and Greek fathers commonly couple Enoch and Elijah as historic witnesses of the possibility of a resurrection of the body and of a true human existence in glory (Iren. iv, 5, 1; Tertull. *de Resurr. Carn.* p. 58; Jerome, *c. Journ. Hierosol.* § 29, 32, p. 437, 440); and the voice of early ecclesiastical tradition is almost unanimous in regarding them as "the two witnesses" (Rev. xi, 3 sq.) who should fall before "the beast," and afterwards be raised to heaven before the great

judgment (Hippol. *Fragm. in Dan.* xxii; *de Antichr.* xliii, Cosmas Indic. p. 73, ap. Thilo, *κατὰ τὴν ἐκκλησιαστικὴν παράδοσιν*; Tertull. *de Anima*, p. 59; Ambros. in *Psalms*. xlv, 4; *Evang. Nicod.* c. xxv, on which Thilo has almost exhausted the question, *Cod. Apoc. N. T.* p. 765 sq.). This belief removed a serious difficulty which was supposed to attach to their translation, for thus it was made clear that they would at last discharge the common debt of a sinful humanity, from which they were not exempted by their glorious removal from the earth (Tertull. *de Anima*, l. c.; August. *Op. imp. c. Jul.* vi, 59). In later times Enoch was celebrated as the inventor of writing, arithmetic, and astronomy (Euseb. *Præp. Ev.* ix, 17). He is said to have filled 300 books with the revelations which he received, and is commonly identified with *Edris* (i. e. *the learned*), who is commemorated in the Koran (cap. 19) as one "exalted [by God] to a high place" (comp. Sale, ad loc.; Hottinger, *Hist. Orient.* p. 30 sq.). Visions and prophecies were commonly ascribed to him, which he is said to have arranged in a book. This book was delivered to his son, and preserved by Noah in the ark. After the Flood it was made known to the world, and handed down from one generation to another (see *Yuchasin*, f. 134; Eusebius, *Hist. Eccles.* vii, 32; Cedren. *Hist.* p. 9; Barhebr. *Chron.* p. 5). But these traditions were probably due to the apocryphal book which bears his name (comp. Fabric. *Cod. Pseudep.* l. T. i, 215 sq.). See below. Some (Buttm. *Mythol.* i, 176 sq.; Ewald, *l. c.*) have found a trace of the history of Enoch in the Phrygian legend of Annaeus (*Ἀνανακός*, *Νάνακος*), who was distinguished for his piety, lived 300 years, and predicted the deluge of Deucalion.—Smith, s. v.; Kitto, s. v. See Heber, *De pietate et fide Enochii* (Bamb. 1789); Bredenkamp, in Paulus, *Memor.* ii, 152; Danz, in Meuschen's *N. T. Talm.* p. 722; Selmieder, *Comment. in Gal.* iii, 19 (Nurnb. 1826), p. 23; Buddei *Hist. Eccles.* l. T. i, 162; Drusus, *De Henoch*, in the *Crit. 3. The third son of Midian, and grandson of Abraham by Keturah (Gen. xxv, 4, A. V. "Hanoch;" 1 Chron. i, 33, "Henoeh"). B. C. post 1988.

4. The eldest son of Reuben (A. V. "Hanoch," Gen. xlv, 9; Exod. vi, 14; 1 Chron. v, 3), from whom came "the family of the Hanochites" (Num. xxvi, 5). B. C. 1873.

5. In 2 Esdr. vi, 49, 51, "Enoch" stands in the Lat. (and Eng.) version for one of the two famous amphibious monsters, doubtless correctly *Behemoth* in the Ethiopic.

ENOCH, BOOK OF, one of the most important remains of early apocalyptic literature. The interest that once attached to it has now partly subsided; yet a document quoted, as is generally believed, by an inspired apostle (Jude, ver. 14, 15), can never be wholly devoid of importance or utility in sacred literature. From its vigorous style and wide range of speculation, the book is well worthy of the attention which it received in the first ages, and recent investigations have still left many points for further inquiry.

I. *History of the Book.*—The first trace of its existence is generally found in the epistle of Jude (14, 15; comp. Enoch, i, 9), but the words of the apostle leave it uncertain whether he derived his quotation from tradition (Hoffmann, *Schriftbeweis*, i, 420) or from writ-

ing (*ἔπροφήτησεν* . . . Ἐνὸχ λέγων), though the wide spread of the book in the 2d century seems almost decisive in favor of the latter supposition. In several of the fathers mention is made of Enoch as the author, not only of a prophetic writing, but of various productions. Some such work appears to have been known to Justin (*Apol.* ii, 5), Irenæus (*adv. Hæer.* iv, 16, 2), and Anatolius (Euseb. *H. E.* vii, 32). Clement of Alexandria (*Eclog.* p. 801) and Origen (yet comp. *c. Cels.* v, p. 267, ed. Spenc.) both make use of it, and numerous references occur to the "writing," books," and "words" of Enoch in the *Testament of the XII Patriarchs* (q. v.)—a document which Nitzsch has shown to belong to the latter part of the 1st century or the beginning of the second, and which presents more or less resemblance to passages in the present book (Fabricii *Cod. Pseudep.* l. T. i, 161 sq.; Gröföer, *Proph. Pseudep.* 273 sq.). Tertullian (*De cultu fem.* i, 3; compare *De Idol.* 4) expressly quotes the book as one which was "not received by some, nor admitted into the Jewish canon" (in armarium Judaicum), but defends it on account of its reference to Christ ("legimus omnem scripturam ædificationi habilem divinitus inspirari"). Augustine (*De Civ.* xv, 23, 4) and an anonymous writer, whose work is printed with Jerome's (*Brev. in Psalm.* cxxxii, 2; compare Hil. *ad Psalm.* l. c.), were both acquainted with it; but from their time till the revival of letters it was known in the Western Church only by the quotation in Jude (Dillmann, *Eind.* lvi). In the Eastern Church it was known some centuries later. In the 8th century, Georgius Syncellus, in a work entitled *Chronographia*, that reaches from Adam to Diocletian, made various extracts from "the first book of Enoch." In the 9th century, Nicephorus, patriarch of Constantinople, at the conclusion of his *Chronographia Compendium*, in his list of *canonical and uncanonical* books, refers to the book of Enoch, and assigns 4800 *στίχοι* as the extent of it. After this time little or no mention appears to have been made of the production until Scaliger printed the fragments of Syncellus regarding it, which he inserted in his notes to the *Chronicus Canon* of Eusebius. In consequence of such extracts, the book of Enoch excited much attention and awakened great curiosity. At the beginning of the 17th century an idea prevailed that it existed in an Ethiopic translation. A Capuchin monk from Egypt assured Peirce that he had seen the book in Ethiopic, a circumstance which excited the ardor of the scholar of Pisa so much that he never rested until he obtained the tract. But when Job Ludolph went afterwards to Paris to the Royal Library, he found it to be a fabulous and silly production. In consequence of this disappointment, the idea of recovering it in Ethiopic was abandoned. At length, in 1773, Bruce brought home three copies of the book of Enoch from Abyssinia in MSS., containing the Ethiopic translation complete. "Amongst the articles," he states, "I consigned to the library at Paris was a very beautiful and magnificent copy of the prophecies of Enoch in large quarto. Another is amongst the books of Scripture which I brought home, standing immediately before the book of Job, which is its proper place in the Abyssinian Canon; and a third copy I have presented to the Bodleian Library at Oxford by the hands of Dr. Douglas, bishop of Carlisle." As soon as it was known in England that such a present had been made to the Royal Library at Paris, Dr. Woide, librarian of the British Museum, set out for France with letters from the secretary of state to the ambassador at that court, desiring him to assist the learned bearer in procuring access to the work. Dr. Woide accordingly transcribed it, and brought back with him the copy to England. The Parisian MS. was first publicly noticed by the eminent Orientalist De Sacy in 1800, who translated into Latin ch. i, ii, iii, iv—xvi; also xxii and xxxi. These he also published in the *Magasin Encyclopédique* (VI, i, 382 sq.). Mr. Murray, editor of

*Bruce's Travels*, gave some account of the book from the traveller's own MS. The Ethiopic text, however, was not published till the edition of archbishop Laurence from the Bodleian MS. in 1838 (*Libri Enoch versio Æthiopicæ* . . . Oxon.). But in the interval Laurence published an English translation, with an introduction and notes, which passed through three editions (*The Book of Enoch*, etc., by R. Laurence; Oxford, 1821, 1833, 1838). The translation of Laurence formed the basis of the German edition of Hoffmann (*Das Buch Henoch* . . . A. E. Hoffmann, Jena, 1833-38); and Gfrörer, in 1840, gave a Latin translation constructed from the translations of Laurence and Hoffmann (*Propheta veteres Pseudepigraphi* . . . ed. A. F. Gfrörer, Stuttgartia, 1840). According to Angelo Mai, there is a MS. copy of the book of Enoch among the Ethiopic codices of the Vatican, which must have been brought into Europe earlier than Bruce's MSS. In 1834 Dr. Rüppell procured another MS. of Enoch from Abyssinia, from which Hoffmann made the second part of his German version. All these editions were superseded by those of Dillmann, who edited the Ethiopic text from five MSS. (*Liber Henoch, Æthiopicæ*, Lipsiæ, 1851), and afterwards gave a German translation of the book with a good introduction and commentary (*Das Buch Henoch* . . . von Dr. A. Dillmann, Leipzig, 1853). The work of Dillmann gave a fresh impulse to the study of the book. Among the essays which were called out by it, the most important were those of Ewald (*Ueber des Æthiopischen Buches Henoch Entstehung*, etc., Göttingen, 1856) and Hilgenfeld (*D. Jüdische Apokalypik*, Jena, 1857). The older literature on the subject is reviewed by Fabricius (*Cod. Pseudep. V. T.* i, 199 sq.).

The Greek translation, in which it was known to the fathers, appears to be irrecoverably lost. There is no trace of it after the 8th century. The last remnant of it is preserved by Syncellus.

II. *Identity of the extant Forms.*—There can be no doubt that the Ethiopic translation exhibits the identical book which, as most believe, Jude quoted, and which is also mentioned or cited by many of the fathers. The fragment preserved by Syncellus (reprinted by Laurence and Hoffmann) is obviously the same as chap. vii, etc., the deviations being of little importance (though one considerable passage quoted by Georg. Syncellus is wanting in the present book, Dillm. p. 85), and probably accidental. It is manifest, also, to any one who will compare the quotations made by the fathers with the Ethiopic version, that both point to the same original. The extracts in question could not have been interpolations, as they are essential to the connections in which they are found. The mention of books of Enoch in the Testament of Judah, in the Testament of Benjamin, in Origen (*c. Cels.* and *Homil. in Num.*), and of the "first book" of Enoch in the fragments preserved by Syncellus, consist with the idea that the whole was then, as now, divided into different books. Tertullian leads us to believe that it was of the same extent in the Greek text then existing as it is in the present Ethiopic.

III. *Canonicity.*—Notwithstanding the quotation in Jude, and the wide circulation of the book itself, the apocalypse of Enoch was uniformly and distinctly separated from the canonical Scriptures. Tertullian alone maintained its authority, while he admitted that it was not received by the Jews: his arguments, however, are exceedingly puerile (*De cultu faminarum*, i, 3). Origen, on the other hand (*c. Cels.* v, 267, ed. Spence.), and Augustine (*De Civ.* xv, 23, 4), definitively mark it as apocryphal, and it is reckoned among the apocryphal books in the Apostolic Constitutions (vi, 16), and in the catalogues of the *Synops. S. Scripturæ*, Nicephorus (Credner, *Zur Gesch. d. Kan.* p. 145), and Montfaucon (*Bibl. Coislin.* p. 193).

IV. *Original Language.*—The book of Zohar, in which are various allusions to Enoch, seems to speak

of it as an important Hebrew production which had been handed down from generation to generation. The Cabalists, whose opinions are embodied in Zohar, thought that Enoch was really the author, a sentiment quite at variance with any other hypothesis than that of a Hebrew original. At all events, a Hebrew book of Enoch was known and used by Jewish writers till the 13th century (Dillmann, *Einl.* lvii). One of the earliest references to the book occurs in the *Hebrew Book of Jubilees* (Dillmann, in *Ewald's Jahrb.* 1850, p. 90). The careful reader soon sees that the work was composed at first in Hebrew, or rather Hebrew-Aramaean. This was long ago perceived by Joseph Scaliger, though he had before him nothing but the Greek fragments preserved by Syncellus. Hottinger, however, observed, in opposition to Scaliger, that a Hebraizing style is no sure proof of a Hebrew original. Hoffmann adduces the Hebrew-Aramaean etymology of names, especially the names of angels, as an evidence of the Aramaean original—an argument which is more pertinent; and Laurence infers from the book of Zohar that Hebrew was its primitive language. The writer's thorough acquaintance with the canonical Scriptures of the Jews in the tongue in which they were composed; their use of them in the original, not the Greek translation of the Septuagint; their Hebrew etymologies of names, especially the appellations of angels and archangels; the fact that all words and phrases can easily be rendered back into Hebrew and Aramaean, and the many Hebrew idioms and terms that occur, prove that neither Greek nor Ethiopic was the original language, but the later Palestinian Hebrew. Thus Tamiel (viii, 7) is compounded of  $\text{מל}$  and  $\text{אל}$ , the upright of God; Samyaza of  $\text{שמ}$  and  $\text{יזא}$ , the name of the strong. The same conclusion follows from the term Ophanin (ix, 13), which is evidently identical with the Hebrew  $\text{אפנין}$ . It is remarkable, also, that as Ophanin occurs in connection with the Cherubim, so the Hebrew term  $\text{אפנין}$  is found in the same association (1 Kings vii, 30; Ezek. i, 15, 16, 19, 20, 21; x, 2, 6, 9, 10, etc.; Murray's *Enoch Restitutus*, p. 33 sq.). The names of the sun are *Oryares* and *Tomas* (lxxvii, 1), from  $\text{אור}$  and  $\text{אריס}$ . In lxxvii, 1, 2, we read that "the first wind is called the eastern, because it is the first," which can only be explained by the Hebrew  $\text{אפנין}$ ,  $\text{אפנין}$ ; "the second is called the south, because the Most High there descends," i. e.  $\text{אפנין}$ ,  $\text{אפנין}$  (Dillmann, *Das Buch Henoch*, p. 235, 236). The names of the conductors of the month are also Hebrew (lxxxii, 13), as Murray (p. 46) and Hoffmann (p. 690) remark. See Joseph hal-Lewi, in the *Journal Asiatique*, 1867, p. 352 sq.

At what time the Greek version was made from the original can only be conjectured. It could not have been long after the final redaction of the whole, probably about the time of Philo. Having appeared in Greek, it soon became widely circulated. The Ethiopic version was made from the Greek probably about the same time as the Ethiopic translation of the other parts of the Bible with which it was afterwards connected, or, in other words, towards the middle or close of the 4th century. See ETHIOPIC VERSIONS.

V. *Contents.*—The book of Enoch is divided in the Ethiopic MSS. into twenty sections, which are subdivided into 108 chapters; but copies differ in their specification of chapters. Dillmann has properly departed from the MSS., and endeavored to make divisions of sections, chapters, and verses which may represent the text pretty nearly as it is preserved among the Abyssinians.

In its present shape the book consists of a series of revelations supposed to have been given to Enoch and Noah, which extend to the most varied aspects of na-

ture and life, and are designed to offer a comprehensive vindication of the action of Providence. See ENOCH. It is divided into five parts. The *first part* (chaps. i-xxxvi, Dillm.), after a general introduction (characterizing the book to which it belongs as a revelation of Enoch the seer respecting the future judgment of the world, and its results both towards the righteous and rebellious sinners, written to console the pious in the times of final tribulation), contains an account of the fall of the angels (Gen. vi, 1), and of the judgment to come upon them and upon the giants, their offspring (vi-xvi); and this is followed by the description of the journey of Enoch through the earth and lower heaven in company with an angel, who showed to him many of the great mysteries of nature, the treasure-houses of the storms, and winds, and fires of heaven, the prison of the fallen, and the land of the blessed (xvii-xxxvi). The *second part* (xxxvii-lxxi) is styled "a vision of wisdom," and consists of three "parables," in which Enoch relates the revelations of the higher secrets of heaven and of the spiritual world which were given to him. The first parable (xxxviii-xliv) gives chiefly a picture of the future blessings and manifestation of the righteous, with further details as to the heavenly bodies; the second (xlv-lvi) describes in splendid imagery the coming of Messiah, and the results which it should work among "the elect" and the gainsayers; the third (lviii-lxix) draws out at further length the blessedness of "the elect and holy," and the confusion and wretchedness of the sinful rulers of the world. The *third part* (lxxii-lxxxii) is styled "the book of the course of the lights of heaven," and deals with the motions of the sun and moon, and the changes of the seasons; and with this the narrative of the journey of Enoch closes. The *fourth part* (lxxxiii-xci) is not distinguished by any special name, but contains the record of a dream which was granted to Enoch in his youth, in which he saw the history of the kingdoms of God and of the world up to the final establishment of the throne of Messiah. The *fifth part* (xcii-cv) contains the last addresses of Enoch to his children, in which the teaching of the former chapters is made the groundwork of earnest exhortation. The signs which attended the birth of Noah are next noticed (evi-evii); and another short "writing of Enoch" (eviii) forms the close to the whole book (comp. Dillmann, *Einkl.* i sq.; Lücke, *Versuch einer vollständ. Einkl.* i, 93 sq.).

**VI. Design.**—The leading object of the writer, who was manifestly imbued with deep piety, was to comfort and strengthen his contemporaries. He lived in times of distress and persecution, when the enemies of religion oppressed the righteous. The outward circumstances of the godly were such as to excite doubts of the divine equity in their minds, or, at least, to prevent it from having that hold on their faith which was necessary to sustain them in the hour of trial. In accordance with this, the writer exhibits the reward of the righteous and the punishment of the wicked. To give greater authority to his affirmations, he puts them into the mouths of Enoch and Noah. Thus they have all the weight belonging to the character of an eminent prophet and saint. Various digressions are not without their bearing on the author's main purpose. The narrative of the fallen angels and their punishment, as also of the flood, exemplifies the retributive justice of Jehovah; while the Jewish history, continued down to a late period, exhibits the final triumph of His people, notwithstanding all their vicissitudes. Doubtless the author lived amid a season of fiery trial, and, looking abroad over the desolation, sought to cheer the sufferers by the consideration that they should be recompensed in the Messianic kingdom. As for their wicked oppressors, they were to experience terrible judgments. The writer occasionally delights in uttering dire anathemas against the wicked. It is plain that the book grew out of the times and

circumstances by which he was surrounded. It gives us a glimpse not only of the religious opinions, but also of the general features which characterized the whole period. The book belongs to the apocalyptic literature of the period between the close of the O.-T. canon and the advent of Messiah. It is therefore of the same class of composition as the fourth book of Esdras and the Jewish Sibyllines. The principal interest attaching to it arises from its contributing to our knowledge of the development of Jewish Messianic ideas subsequently to the writings of inspired prophets. In tracing the gradual unfolding and growth of those ideas among the Jewish people, we are the better prepared for the revelation of the N. T.

**VII. Doctrines.**—In doctrine the Book of Enoch exhibits a great advance of thought within the limits of revelation in each of the great divisions of knowledge. The teaching on nature is a curious attempt to reduce the scattered images of the O. T. to a physical system. The view of society and man, of the temporary triumph and final discomfiture of the oppressors of God's people, carries out into elaborate detail the pregnant images of Daniel. The figure of the Messiah is invested with majestic dignity as "the Son of God" (cv, 2 only), "whose name was named before the sun was made" (xlviii, 3), and who existed "aforetime in the presence of God" (lxii, 6; comp. Laurence, *Prel. Diss.* li sq.). At the same time, his human attributes as "the son of man," "the son of woman" (lxii, 5 only), "the elect one," "the righteous one," "the anointed," are brought into conspicuous notice. The mysteries of the spiritual world, the connection of angels and men, the classes and ministries of the hosts of heaven, the power of Satan (xl, 7; lxxv, 6), and the legions of darkness, the doctrines of resurrection, retribution, and eternal punishment (xxii; comp. Dillm. p. xix), are dwelt upon with growing earnestness as the horizon of speculation was extended by intercourse with Greece. But the message of the book is emphatically one of "faith and truth" (comp. Dillm. p. 32), and while the writer combines and repeats the thoughts of Scripture, he adds no new element to the teaching of the prophets. His errors spring from an undisciplined attempt to explain their words, and from a proud exultation in present success. For the great characteristic by which the book is distinguished from the later apocalypse of Ezra [see *ESDRAS*, 2D BOOK] is the tone of triumphant expectation by which it is pervaded. It seems to repeat in every form the great principle that the world, natural, moral, and spiritual, is under the immediate government of God. Hence it follows that there is a terrible retribution reserved for sinners, and a glorious kingdom prepared for the righteous, and Messiah is regarded as the divine mediator of this double issue (xc, xci). Nor is it without a striking fitness that a patriarch translated from earth, and admitted to look upon the divine majesty, is chosen as "the herald of wisdom, righteousness, and judgment to a people who, even in suffering, saw in their tyrants only the victims of a coming vengeance."

As in the canonical prophecies of the O. T., so here, the final establishment of the Messianic kingdom is preceded by wars and desolations. In the eighth of the ten weeks into which the world's history is divided, the sword executes judgment upon the wicked, at the end of which God's people have built a new temple, in which they are gathered together. The tenth week closes with the eternal judgment upon angels (xc, xci).

With respect to the doctrine of a general resurrection, it is certainly implied in the work. But the mode of the resurrection of the wicked and the righteous is differently presented. The *spirits* of the former are taken out of Sheol and thrown into the place of torment (xcviii, 3; ciii, 8; cviii, 2-5); whereas the spirits of the righteous raised again will be reunited to their *bodies*, and share the blessedness of Messiah's kingdom on earth (lxi, 5; xci, 10; xcii, 3; c, 5). The

reunion of their *bodies* with their spirits appears a thing reserved for the righteous.

As various sects in Jerusalem were tolerably developed at the time of some of the writers, it has been a subject of inquiry whether the peculiar doctrines of any appear in the work. According to Jellinek (*Zeitschrift für deutsch-morgentänd. Gesellschaft*, vii, 249), the work originated in the sphere of Essenism. We learn from Josephus that the Essenes preserved as sacred the names of the angels; and put up certain prayers before sunrise, as if they made supplication for that phenomenon (*War*, ii, 8). Now there is a very developed angel-doctrine in the work before us, and we also find the following passage: "When I went out from below and saw the heaven, and the sun rise in the east, and the moon go down in the west, a few stars, and everything as he has known it from the beginning, I praised the Lord of judgment and magnified him, because he has made the sun go forth from the windows of the east," etc., lxxxiii, 11). This certainly reminds one of Essenism showing its influence on the mind of the writer. The 108th chapter is more plainly Essenic. The pious, whom God rewards with blessings, are described as having lived a life of purity, self-denial, and asceticism like to that of the Essenes. Yet Dillmann appears disinclined to find any reflection of Essenism in lxxxiii, 11, or elsewhere (*Das Buch Henoch, Allgemeine Einleitung*, p. liii). We admit that the other parts of the book are free from it. It is obvious that the writer did not belong to the school of the Pharisees. He was tolerably free from the sects of his people; rising above the narrow confines of their distinctive peculiarities, which were not then fully developed.

VIII. *Style*.—It is obvious that the author was a poet of no mean order. His inspiration was high, his ideas elevated and pure. He had a creative fancy which could body forth new forms and shapes. Speaking out of the midst of his own time, he could throw himself back into the past, and mould it suitably to his purpose. His language, too, has the living freshness of a master. He was well acquainted with the book of Daniel, as is obvious from the spirit of his production. Not that he was an imitator of that book—far from it; his mind was too powerful and independent. It is characteristic of him that he calls Jehovah *Lord of Spirits*, that he specifies as the seven spiritual beings that stand before God the four highest angels, Michael, Raphael, Gabriel, Phanuel; and the three highest hosts, the Cherubim, Seraphim, and Ophanim; that he speaks of the *Elect* by way of eminence, the *Son of Man*, i. e. the Messiah. The charm of the writer's descriptions is irresistible, transporting the reader into the highest regions of the spiritual world. With a genuine glow of feeling, and the elevation of purest hope, he carries us away, till we are lost in wonder at the poetic inspiration of one living at a period comparatively so late. His work must have created a new branch of writing at the time, leading to numerous imitations.

IX. *Authorship*.—The general unity which the book possesses in its present form marks it, in the main, as the work of one man. The several parts, while they are complete in themselves, are still connected by the development of a common purpose. But internal coincidence shows with equal clearness that different fragments were incorporated by the author into his work, and some additions have been probably made afterwards. Different "books" are mentioned in early times, and variations in style and language are discernible in the present book. To distinguish the original elements and later interpolations is the great problem which still remains to be solved, for the different theories which have been proposed are barely plausible. In each case the critic seems to start with preconceived notions as to what was to be expected at a particular time, and forms his conclusions to suit his prejudices. Hoffmann and Weisse place the composi-

tion of the whole work after the Christian æra, because the one thinks that Jude could not have quoted an apocryphal book (Hoffmann, *Schriftbeweis*, i, 420 sq.), and the other seeks to detach Christianity altogether from a Jewish foundation (Weisse, *Evangelienfrage*, p. 214 sq.). Stuart (*Am. Bibl. Repos.* 1840) so far anticipated the argument of Weisse as to regard the Christology of the book as a clear sign of its post-Christian origin. Ewald, according to his usual custom, picks out the different elements with a daring confidence, and leaves a result so complicated that no one can accept it in its details, while it is characterized in its great features by masterly judgment and sagacity. He places the composition of the groundwork of the book at various intervals between B.C. 144 and B.C. cir. 120, and supposes that the whole assumed its present form in the first half of the century before Christ. Lücke (2d ed.) distinguishes two great parts, an older part including chaps. i-xxxvi, and lxxii-cv, which he dates from the beginning of the Maccabean struggle, and a later, chaps. xxxvii-lxxi, which he assigns to the period of the rise of Herod the Great (B.C. 141, etc.). He supposes, however, that later interpolations were made without attempting to ascertain their date. Dillmann at first (*ut sup.*) upheld more decidedly the unity of the book, and assigned the chief part of it to an Aramæan writer of the time of John Hyrcanus (B.C. cir. 110). To this, according to him, "historical" and "Noachian additions" were made, probably in the Greek translation (*Einh.* lii). Latterly, however (in Herzog's *Encyklop.* xii, 309), he has greatly modified this opinion. Köstlin (in Zeller's *Jahrb.* 1856, p. 240 sq., 370 sq.) assigns chaps. i-xvi, xxi-xxxvi, lxxii-cv to about B.C. 110; chaps. xxxvii-lxxi to B.C. cir. 100-64; and the "Noachian additions" and chap. cviii to the time of Herod the Great. Hilgenfeld himself places the original book (chaps. i-xvi, xx-xxxvi, lxxii-xc, xci, 1-19; xciii, cv) about the beginning of the first century before Christ (*ut sup.* p. 145 n.). This book he supposes to have passed through the hands of a Christian writer who lived between the times "of Saturninus and Marcion" (p. 181), who added the chief remaining portions, including the great Messianic section, chaps. xxxvii, lxxi. In the face of these conflicting theories it is evidently impossible to dogmatize, and the evidence is insufficient for conclusive reasoning. The interpretation of the Apocalyptic histories (chaps. lvi, lvii, lxxxv-xc), on which the chief stress is laid for fixing the date of the book, involves necessarily minute criticism of details, which belongs rather to a commentary than to a general Introduction; but, notwithstanding the arguments of Hilgenfeld and Jost (*Gesch. Jud.* ii, 218 n.), the whole book appears to be distinctly of Jewish origin. Some inconsiderable interpolations may have been made in successive translations, and large fragments of a much earlier date were undoubtedly incorporated into the work, but, as a whole, it may be regarded as describing an important phase of Jewish opinion shortly before the coming of Christ. That the entire production appeared before the Christian æra is clearly deducible from the fact that the Roman empire never appears as a power dangerous to Israel. Volkmar, however, contends (in the *Zeitschr. der morg. Gesellsch.* 1860, p. 87 sq.) that it was written by a disciple of Akiba to encourage the Jewish revolt under Bar-Cocheba; a view which is ably controverted by Hilgenfeld (*Ib.* p. 111 sq.).

Stuart has laid considerable stress on the Christology of the book as indicative of an acquaintance on the authors' part with the N. T., especially the Apocalypse. But the Christological portions do not possess sufficient distinctness to imply a knowledge of the N. T. The name *Jesus* never occurs. Neither are the appellations *Lord*, *Lord Jesus*, *Jesus Christ*, or even *Christ* employed. The words *faith*, *believers*, *God* and *his anointed*, *deny*, etc., can hardly be claimed as Christian terms,

because they occur in the Ethiopic O. T. as the representatives of Hebrew-Greek ones. All that can be truly deduced from the Christology is that it is highly developed, and very elevated in tone, yet fairly derivable from the O. T. in all its essential and individual features. Nor is there anything in the eschatology or angelology to necessitate a Christian origin. We allow that the Messiah is spoken of in very exalted terms. His dignity, character, and acts surpass the descriptions presented in other Jewish books. But they are alike in the main, colored by the highly poetical imagination of the writers, in conformity with the sublimity and animation of their creations. We must therefore reject Stuart's opinion of a Jewish-Christian origin. All the arguments adduced on its behalf are easily dissipated, since Dillman's edition and Ewald's criticisms have led to a better acquaintance with the text of the work itself. Nor is Hilgenfeld's attempt to show that the so-called first Enoch book (xxxvii-lxxi) proceeded from Christian Gnostics more successful, as Dillman has remarked (*Pseudepigraphen des A. T.* in Herzog's *Encyclopädie*, xii, 309, 310). Equally futile is Hoffmann's endeavor to show that the work did not appear till after the destruction of Jerusalem in the first century, when both Jude's epistle and the Apocalypse had been written (*Zeitschr. d. morgenl. Gesellschaft*, vi, 87 sq.). Not very dissimilar is Böttcher's view, that the book, like the Sybilline oracles, was made up in the first and second centuries after Christ of pieces belonging to different times (*De Inferis*, i, § 505). Nothing is more certain than that the work belongs to an ante-Christian world; and therefore the only problem is how to distribute the different books incorporated, and when to date them separately and collectively. After Laurence, Hoffmann and Gfrörer had erred in placing the whole under Herod the Great; Krieger and Lücke assigned different portions to different times, putting chaps. i-xxxvi and lxxii-cviii to the early years of the Maccabæan struggle, and xxxvii-lxxi to B.C. 38-24. How far this apportionment is correct will be seen from the preceding statements (see Krieger's *Beiträge z. Kritik und Eregese*, 1845, and Lücke's *Versuch einer vollständigen Einleitung in die Offenbarung des Johannes*, § 11).

X. *The Place where it was written.*—The place where the author lived and wrote is Palestine. This alone seems to suit the circumstances implied in the work, which is largely pervaded by the spirit of persons whose power, religion, and independence had been overborne by foreign interference. Laurence, however, endeavors to show from the 72d chapter (71st Laurence), where the length of the days at various periods of the year is given, that the locality must have been between the 45th and 49th degrees of north latitude, in the northern districts of the Caspian and Euxine seas. Hence he conjectures that the writer was one of the Jews who had been carried away by Shalmaneser and did not return. Krieger supposes (*Beiträge*, p. 53) that Enoch, the imaginary writer, drew from the astronomical traditions or writings of northern Asia, regardless of the difference of Palestine's geographical position. Murray has shown (p. 63 sq.) that one passage favors the idea that the author lived in Abyssinia; whence he infers that the production proceeded from various persons belonging to countries removed from one another. But De Saey has remarked that as the authors' astronomical system is partly imaginary, their geography may also be visionary. Neither Egypt, nor Chaldea, nor Palestine, suits the astronomy of the book. The scientific knowledge of the Israelites was imperfect. It is therefore idle to look for accuracy in geography or astronomy. The writer or writers systematized such knowledge as they had of natural phenomena after their own fashion, as appears from the fact that to every third month thirty-one days are assigned. The allusions to the Oriental theosophy and the opinions of Zoroaster do

not necessarily commend a Chaldean origin, at least of the astronomical part, since the images of fire, radiance, light, and other Oriental symbols may be satisfactorily accounted for by the Jews' intercourse with other nations, and their residence there for a time. The Oriental philosophy of Middle Asia was evidently not unknown to the authors. Zoroastrian doctrines are embodied in the work because Persian influences had been felt by the Israelites since the Babylonian captivity.

XI. *Did Jude really quote the Book of Enoch?*—A simple comparison of the language of the apostle and that found in the corresponding passage of the extant book seems to settle this question conclusively in the affirmative, especially as the Scripture citation is prefaced with the direct acknowledgment of quotation: "And Enoch also, the seventh from Adam, prophesied of these, saying," etc. The following are the words respectively:

<p>EPISTLE OF JUDE, VER. 14, 15;  <i>Authorized Version.</i>                  "Behold, the Lord cometh                  with ten thousands of his                  saints, to execute judgment                  upon them, upon all, and to                  convince all and destroy the                  wicked, and that are ungodly                  among them, to prove all the                  carnal for ever of all their                  ungodly deeds, whereby which                  the sinful and which they have                  ungodly com-ungodly have                  done, and committed, and of                  all their hard mitted against                  him."</p>	<p>BOOK OF ENOCH, chap. ii;  <i>Laurence's Version.</i>                  "Behold, he comes with ten                  thousands of his saints, to ex-                  aints, to execute judgment acute                  judgment upon them, upon                  all, and to convince all and                  destroy the wicked, and that                  are ungodly among them, to                  prove all the carnal for ever                  of all their ungodly deeds, wher-                  by which the sinful and which                  they have ungodly com-ungodly                  have done, and committed, and                  of all their hard mitted against                  him."</p>
--	--

Some, however, are most unwilling to believe that an inspired writer could cite an apocryphal production. Such an opinion destroys, in their view, the character of his writing, and reduces it to the level of an ordinary composition. But this is preposterous. The apostle Paul quotes several of the heathen poets, yet who ever supposed that by such references he sanctions the productions from which his citations are made, or renders them of greater value? All that can be reasonably inferred from such a fact is, that if the inspired writer cites a particular sentiment with approbation, it must be regarded as just and right, irrespective of the remainder of the book in which it is found. The apostle's sanction extends no farther than the passage to which he alludes. Other portions of the original document may exhibit the most absurd and superstitious notions. It has always been the current opinion that Jude quoted the book of Enoch, and there is nothing to disprove it. It is true that there is some variation between the quotation and its original, but this is usual even with the N. T. writers in citing the Old.

Others, as Cave, Simon, Witsius, etc., suppose that Jude quoted a *traditional* prophecy or saying of Enoch, and we see no improbability in the assumption. Others, again, believe that the words apparently cited by Jude were suggested to him by the Holy Spirit. But surely this hypothesis is unnecessary. Until it can be shown that the book of Enoch did not exist in the time of Jude, or that his quoting it is unworthy of him, or that such knowledge was not handed down traditionally so as to be within his reach, we abide by the opinion that Jude really quoted the book. While there are probable grounds for believing that he might have become acquainted with the circumstance independently of inspiration, we ought not to have recourse to the hypothesis of *immediate suggestion*. On the whole, it is most likely that the book of Enoch existed before the time of Jude, and that the latter really quoted it in accordance with the current tradition. Whether the prophecy ascribed to Enoch was *truly* ascribed to him is a question of no importance in this connection.—Kitto, s. v.; Smith, s. v. See *JUDE*.

ENOCH, CITY OF. See ENOCH, I.

Enon. See ENON.

**E'nos** (Heb. *Enosh'*, עֲנוֹשׁ, poet. a man; Sept. and N. T. *Ἐνώβ*; Josephus *Ἐνώβος*, *Ant.* i, 3, 2), the son of Seth, and grand-son of Adam (Gen. v, 6-11; Luke iii, 38). He lived 905 years (B.C. 3937-3052), and is remarkable on account of a singular expression used respecting him in Genesis iv, 26, "Then began men to call on the name of the Lord." This is not to be taken absolutely, as it would be absurd to suppose that none called on the name of the Lord before that time, and accordingly there are two interpretations given of the passage: one is the marginal reading of the A. V., "Then began men to call themselves by the name of the Lord," in order, it would seem, to distinguish themselves from those who were already idolaters, and were termed children of men; the other, "Then men *profane*ly called on the name of the Lord," intimating that at that period idolatry began to be practised among men. The latter is the interpretation adopted by the Jewish expositors generally, but the former has more currency among Christian commentators. It may be observed that they both unite in the common idea of the widening difference between the pious and the wicked. In either case the passage may be regarded as implying that divine worship, which till that time had been confined to private families, now became public—that is, religious services were held on fixed days and in public assemblies. In 1 Chron. i, 1, the name is Anglicized ENOSH.

**E'nosh**, a more correct mode of Anglicizing (1 Chron. i, 1) the name ENOS (q. v.).

**En-rim'mon** (Heb. *Eym Rimmôn*, עֵימֹן רִמּוֹן, *fountain of Rimmon*; Sept. ἐν Ῥεμμῶν v. r. ἐν Ῥεμῶν, Vat. MS. omits, Vulg. *et in Remmon*), a place occupied by the descendants of Judah after the exile (Neh. xi, 29). It appears from the associated places to be the same with the "Ain and Rimmon" of Josh. xv, 32 (comp. Josh. xix, 7; 1 Chron. iv, 32), where perhaps, in like manner, but one place is referred to, a spring adjoining the town of Rimmon. See AIN. Yet the enumeration ("five cities") of 1 Chron. iv, 32 ("Ain, Rimmon") requires them to be taken as distinct. In fact, there appears to have been a Levitical city en-

Rimmon near to, but originally distinct from the non-Levitical Rimmon, and indicated by a remarkable reservoir still extant in the vicinity. See RIMMON.

**En-ro'gel** (Heb. *Eym Rogel*, עֵימֹן רֹגֵל, *fount of the treader*, q. d. *foot-fountain*: construed by Fürst, after the Targums, with the Arabic and Syriac versions, "Fullers' Spring," because fullers trode the clothes in the water; but Gesenius renders "fountain of the spy;" Sept. πηγή Ῥογγή, Vulg. *fons Rogel*), a spring which formed one of the landmarks on the boundary-line between Judah (Josh. xv, 7) and Benjamin (xviii, 16). It was the point next to Jerusalem, and at a lower level, as is evident from the use of the words "ascended" and "descended" in these two passages. Here, apparently concealed from the view of the city, Jonathan and Abimeaz remained, after the flight of David, awaiting intelligence from within the walls (2 Sam. xvii, 17), and here, "by the stone Zoheleth, which is 'close to' (עֲצֵס) En-rogel," Adonijah held the feast, which was the first and last act of his attempt on the crown (1 Kings i, 9). By Josephus, on the last incident (*Ant.* vii, 14, 4), its situation is given as "without the city, in the royal garden," and it is without doubt referred to by him in the same connection, in his description of the earthquake which accompanied the sacrifice of Uzziah (*Ant.* ix, 10, 4), and which, "at the place called Eroze" (Ἐρωζή v. Ἐρόρωζή), shook down a part of the Eastern hill, "so as to obstruct the roads, and the royal gardens." In more modern times, a tradition, apparently first recorded by Quaresimus, would make En-rogel identical with what is now called by the Franks the *well of Nehemiah*, and by the natives that of *Job* (*Bir-Eyub*). Robinson describes it as "a deep well situated just below the junction of the valley of Hinnom with that of Jehoshaphat. The small oblong plain there formed is covered with an olive-grove, and with the traces of former gardens extending down the valley from the present gardens of Siloam. Indeed, this whole spot is the prettiest and most fertile around Jerusalem. The well is very deep, of an irregular quadrilateral form, walled up with large squared stones, terminating above in an arch on one side, and apparently of great antiquity. There is a small rude building over it, furnished with one or two large troughs or reservoirs of stone, which are kept partially filled for the convenience of the people. The well measures 125 feet in depth, 50 feet of which was now full of water. The water is sweet, but not very cold, and is at the present day drawn up by the hand. In the rainy season the well becomes quite full, and sometimes overflows at the mouth. Usually, however, the water runs off under the surface of the ground, and finds an outlet some forty yards below the well, whence it is said to flow for sixty or seventy days in winter, and the stream is sometimes large" (*Researches*, i, 490). In favor of this identification is the fact that in the Arabic version of Josh. xv, 7 the name of Ain-Eyub, or "spring of Job," is given for En-rogel, and also that in an early Jewish Itinerary (Uri of Biel, in Hottinger's *Cippi Hebraici*, p. 48) the name is given as "well of Job," as if retaining the memory of Job's connection with Adonijah—a name which it still retains in the traditions of the Greek Christians (Williams, *Holy City*, ii, 490). Against this general belief the following strong but not conclusive arguments are urged by Bonar in favor of identifying En-rogel with the present "Fountain of the Virgin," *Ain Ummeed-Daraj*—"spring of the mother of steps"—the perennial source from which the Pool of Siloam is supplied (*Lund of Promise*, App. v): 1. The *Bir Eyub* is a well and not a spring (En), while, on the other hand, the "Fountain of the Virgin" is the only real spring close to Jerusalem. This objection, however, as the above description shows, but partially applies. 2. The situation of the Fountain of the Virgin agrees somewhat better with the course of the boundary of Benjamin

than that of the *Bir Eyub*, which is rather too far south. This objection, however, does not apply to the original boundary of Benjamin, which necessarily followed the valley of Siloam. See TRIBE. 3. *Bir Eyub* does not altogether suit the requirements of 2 Sam. xvii, 17. It is too far off both from the city, and from the direct road over Olivet to the Jordan, and is in full view of the city (Van de Velde, i, 475), which the other spot is not. But we may readily suppose that a more retired route and a secluded spot would have been chosen for concealment. 4. The martyrdom of St. James (q. v.) was effected by casting him down from the temple wall into the valley of Kedron, where he was finally killed by a fuller with his washing-stick (Eusebius, *Hist. Eccl.* ii, 23). The natural inference is that the martyred apostle fell near where the fullers were at work. Now *Bir Eyub* is too far off from the site of the temple to allow of this, but it might very well have happened at the Fountain of the Virgin. (See Stanley's *Sermons on the Apost. Age*, p. 333-4). But this is too remote and indirect an agreement, and one based upon a vague tradition. 5. *Daraj* and *Rogel* are both from the same root, and therefore the modern name may be derived from the ancient one, even though at present it is taken to allude to the "steps" by which the reservoir of the fountain is reached. 6. The Fountain of the Virgin is still the great resort of the women of Jerusalem for washing and treading their clothes. 7. The level of the king's gardens must have been above the *Bir Eyub*, even when the water is at the mouth of the well, and it is generally seventy or eighty feet below; while they must have been lower than the Fountain of the Virgin, which thus might be used without difficulty to irrigate them. The last considerations, however, have little weight (see Thomson, *Land and Book*, ii, 528).—Smith, s. v.; Kitto, s. v.; Fairbairn, s. v. See JERUSALEM.

**Enrolment** or ἀπογραφὴ (Luke ii, 1, "taxing"). See CENSUS.

**ENS** is "either *ens reale* or *ens rationis*. *Ens rationis* is that which has no existence but in the idea which the mind forms of it, as a golden mountain. *Ens reale*, in philosophical language, is taken *late et stricte*, and is distinguished as *ens potentiale*, or that which may exist, and *ens actuale*, or that which does exist. It is sometimes taken as the concrete of *essentia*, and signifies what has essence and may exist—as a rose in winter; sometimes as the participle of *esse*, and it then signifies what actually exists. *Ens* without intellect is *res* a thing."—Fleming, *Vocabulary of Philosophy*, s. v.

**Ensample.** See EXAMPLE.

**En-she'mesh** (Heb. *Eyn-She'mesh* עֵינ־שֶׁמֶשׁ, fountain of the sun; Sept. ἡ πηγὴ ἡλιου and πηγὴ Σάηε; Vulgate, *Ensimes, id est, Fons Solis*), a spring which formed one of the landmarks on the north boundary of Judah (Josh. xv, 7) and the south boundary of Benjamin (xviii, 17). From these notices it appears to have been between the "ascent of Adummim"—the road leading up from the Jordan valley south of the wady Kelt—and the spring of En-rogel, in the valley of Kedron. It was therefore east of Jerusalem and of the Mount of Olives. The only spring at present answering to this position is the *Ain-Haul* or *Ain-Chât*—the "Well of the Apostles"—about a mile below Bethany, the traveller's first halting-place on the road to Jericho (Toller, *Topog. von Jerus.* ii, 400). The aspect of this spring is such that the rays of the sun are on it the whole day. This is not inappropriate in a fountain dedicated to that luminary.—Smith, s. v. Dr. Robinson thinks that En-shemesh must have been either this spring or the fountain near St. Saba (*Researches*, i, 493).

**Ensign** is the rendering in the Auth. Vers. for two Hebrew words: עֹז, *oth* (the flag of a single tribe, Num. ii, 2), a *sign* or *token*, as elsewhere rendered;

עֶז, *nes* (a lofty signal, e. g. a "pole," Num. xxi, 3, 9), a ship's *standard* or *flag* ("sail," Isa. xxxiii, 23; Ezek. xxvii, 7), a *beacon* or *signal* on a hill, chiefly on the irruption of an enemy, in order to point out to the people a place of rendezvous. There is a third and more emphatic word relating to the subject, namely, עֶזֶל, *de'gel* (from עֶזֶל, to cover), which, however, is invariably rendered "standard" (except Cant. ii, "banner"). The distinction between these three Hebrew terms is sufficiently marked by their respective uses: *Nes* is a *signal*; *DEGEL*, a *military standard* for a large division of an army; and *OTH*, the same for a small one. Neither of them, however, expresses the idea which "standard" conveys to our minds, viz. a *flag*; the standards in use among the Hebrews probably resembled those of the Egyptians and Assyrians—a figure or device of some kind elevated on a pole. See BANNER.

1. The notices of the *nes* or "ensign" are most frequent; it consisted of some well-understood signal which was exhibited on the top of a pole from a bare mountain top (Isa. xiii, 2; xviii, 3)—the very emblem of conspicuous isolation (Isa. xxx, 17). Around it the inhabitants mustered, whether for the purpose of meeting an enemy (Isa. v, 26; xviii, 3; xxxi, 9), which was sometimes notified by the blast of a trumpet (Jer. iv, 21; li, 27); or as a token of rescue (Psa. lx, 4; Isa. xi, 10; Jer. iv, 6); or for a public proclamation (Jer. i, 2); or simply as a gathering point (Isa. xlix, 22; lxii, 10). What the nature of the signal was we have no means of stating; it has been inferred from Isa. xxxiii, 23, and Ezek. xxvii, 7, that it was a flag; we do not observe a flag depicted either in Egyptian or Assyrian representations of vessels (Wilkinson, iii, 211; Bonomi, p. 166, 167); but, in lieu of a flag, certain devices, such as the phoenix, flowers, etc., were embroidered on the sail, whence it appears that the device itself, and perhaps also the sail bearing the device, was the *nes* or "ensign." It may have sometimes been the name of a leader, as implied in the title which Moses gave to his altar, "Jehovah-nissi" (Exod. xvii, 15). It may also have been, as Michaelis (*Suppl.* p. 1648) suggests, a blazing torch. The important point, however, to be observed is, that the *nes* was an occasional signal, and not a military standard, and that *elevation* and *conspicuity* are implied in the use of the term: hence it is appropriately applied to the "pole" on which the brazen serpent hung (Num. xxi, 8), which was indeed an "ensign" of deliverance to the pious Israelite; and again to the censers of Korah and his company, which became a "sign" or beacon of warning to Israel (Num. xvi, 38). See SIGNAL.

2. The term *degel* is used to describe the standards which were given to each of the four divisions of the Israelitish army at the time of the Exodus (Num. i, 52; ii, 2 sq.; x, 14 sq.). Some doubt indeed exists as to its meaning in these passages, the Sept. and Vulgate regarding it not as the standard itself, but as a certain military division annexed to a standard, just as a *vevillum* is sometimes used for a body of soldiers (Tacitus, *Hist.* i, 70; Livy, viii, 8). The sense of *compact* and *martial array* does certainly seem to lurk in the word; for in Cant. vi, 4, 10, the brilliant glances of the bride's eyes are compared to the destructive advance of a well-arranged host, and a similar comparison is employed in reference to the bridegroom (Cant. v, 10); but, on the other hand, in Cant. ii, 4, no other sense than that of a "banner" will suit, and we therefore think the rendering in the A. V. correct. No reliance can be placed on the term in Psa. xx, 5, as both the sense and the text are matters of doubt (see Olshausen and Hengstenberg, in loc.). A standard implies, of course, a standard-bearer; but the supposed notice to that officer in Isa. x, 18, is incorrect, the words meaning rather "as a sick man pineth away;" in a somewhat

parallel passage (Isa. lix, 19) the marginal version is to be followed rather than the text. The character of the Hebrew military standards is quite a matter of conjecture; they probably resembled the Egyptian, which consisted of a sacred emblem, such as an animal, a boat, or the king's name (Wilkinson, i, 294). Rabbinical writers state the devices to have been as follows: for the tribe of Judah, a lion; for Reuben, a man; for Ephraim, an ox; and for Dan, an eagle (Carpov, *Crit. Ap.* p. 667); but no reliance can be placed on this. As each of the four divisions, consisting of three tribes, had its standard, so had each tribe its "sign" (*oth*) or "ensign," probably in imitation of the Egyptians, among whom not only each battalion, but even each company, had its particular ensign (Wilkinson, *l. c.*). We know nothing of its nature. The word occurs figuratively in Psa. lxxiv, 4, apparently in reference to the images of idol gods.—Smith, s. v. See STANDARD.

Various Forms of Ancient Egyptian Ensigns.

**Entablature** (Lat. *In, tabula*), "the superstructure which lies horizontally upon the columns in classic architecture: it is divided into *architrave*, the part immediately above the column; *frieze*, the central space; and *cornice*, the upper projecting mouldings. Each of the orders has its appropriate entablature, of which both the general height and the subdivisions are regulated by a scale of proportions derived from the diameter of the column."—Parker, *Glossary of Architecture*, s. v.

**En-Tannim** (Heb. *Eyn hat-tannim*, עֵינַי תַּנִּימַי, fountain of the dragons or jackals; Sept. πηγὴ τῶν ἀκκῶν), a reservoir on the west side of Jerusalem (Neb. ii, 13), probably the present upper pool of Gihon; Anglicized DRAGON-WELL (q. v.).

**En-tap'puäh** (Heb. *Eyn Tappu'ach*, עֵינַי תַּפְּוּאָה, fountain of Tappuah; Sept. ἡ πηγὴ Θαπφουέ v. r. Θαφφούε), a spring near the city Tappuah (q. v.), put for that place in Josh. xvii, 7 (comp. ver. 8).

**Entelechy** (ἐντελέχεια, from ἐντελής, perfect;

and ἔχειν, to have; in Latin *perfectihabia*). "In one of the books of the Pythagoreans, viz. *Ocellus Lucanus*, Περὶ τοῦ πάντος, the word *συντέλεια* is used in the same sense. Hence it has been thought that this was borrowed from the Pythagoreans" (Monboddo, *Ancient Metaphysics*, book i, chap. iii, p. 16, note). Cicero (*Tuscul. Quæst. lib. i, quæst. 1*) interprets it to mean *quandam quasi continuatam motionem et percipientem*. Melancthon (*Opera*, xiii, 12-14, ed. 1846) gives two interpretations of *entelechy*, as he writes it. He says that ἐντελεχίς signifies *continuum*, and ἐντελέχεια *continuitas*. According to him, Aristotle used it as synonymous with ἐνέργεια. Hence Cicero translated it by continuous movement or agitation. Argyropolus blames Cicero for this, and explains it as meaning "interior perfection," as if it were τὸ ἐντὸς τελειοῦν. But Melancthon thinks Cicero's explanation in accordance with the philosophy of Aristotle. According to others, ἐντελέχεια means *continuance*, and is a totally different word from ἐντελέχεια, which means *actuality* (Arist. *Metaphys.* Bohn's Libr. p. 68, 301; Donaldson, *New Cratylus*, p. 339-344). According to Leibnitz, "entelechiu is derived apparently from the Greek word which signifies *perfect*, and therefore the celebrated Hermoläus Barbarus expressed it in Latin, word for word, by *perfectihabia*, for act is the accomplishment of power; and he needed not to have consulted the devil, as he did, they say, to tell him this much (Leibnitz, *Theodicee*, pt. i, § 87). You may give the name of *entelechies* to all simple substances or created monads, for they have in them a certain perfection (ἔχουσι τὸ ἐντελέ), they have a sufficiency (αὐτάρχεια) which makes them the source of their internal actions, and, so to say, incorporeal automaton" (*Monadologie*, § 18). He calls a nomad an autarchic automaton, or first *entelechie*, having life and force in itself. "Entelechy is the opposite to *potentiality*, yet would be ill translated by that which we often oppose to potentiality, *actuality*. Εἶδος expresses the substance of each thing viewed in repose—its form or constitution; ἐνέργεια its substance, considered as active and generative; ἐντελέχεια seems to be the synthesis or harmony of these two ideas. The *effectio* of Cicero, therefore, represents the most important side of it, but not the whole" (Maurice, *Mor. and Metaphys. Philosophy*, p. 191, note). 'Entelechia ce qui a en soi sa fin, qui par consequent ne relève que de soi-même, et constitue une unité indivisible (Cousin, note to his transl. of Aristotle, *Metaph.* Lk. xii, p. 212). "L'Entelechie est opposée à la simple puissance, comme la forme à la matière, l'être au possible. C'est elle qui, par la vertu de la fin, constitue l'essence même des choses, et imprime le mouvement à la matière aveugle; et c'est en ce sens qu' Aristote a pu donner de l'âme cette célèbre définition, qu'elle est l'entelechie ou forme première de tout corps naturel qui possède la vie en puissance" (*Dict. des Sciences Philosophiques*). Aristotle defines the soul of man to be an *entelechy*, a definition of which Dr. Reid said he could make no sense.—Fleming, *Vocabulary of Philosophy*, s. v.

**Entertainment** (עֲוָרָה, a "feast," comp. עֲוָרָה, to "entertain" a stranger, Heb. xiii, 2). This took place among the Hebrews sometimes in connection with a public festival (Deut. xvi; Tob. ii, 1) and accompanied by offerings [see SACRIFICIAL FESTIVAL] (1 Sam. ix, 13; xvi, 3; 1 Kings i, 9; iii, 15; in token of alliance, Gen. xxvi, 30; xxxi, 54); sometimes with a domestic or social occurrence, and, so far as the latter reference is concerned, they were chiefly held at the weaning of children (Gen. xxi, 8; comp. Rosenmüller, *Morgenl.* vi, 243 sq.), at weddings (Gen. xxix, 22; Judg. xiv, 10; John ii, 1 sq.), on birthdays (Job i, 4), particularly in royal courts (Gen. xl, 20 [2 Hos. vii, 5]; Matt. xix, 6; comp. Herod. i, 133; ix, 109; Lucian, *Gall.* 9; Athen. iv, 143; see *Doughty Analact.* i, 44; ii, 33; Lausent, *De notatit. convitiisque*

*quæ in iisdem agitabantur*, in Gronovii *Thesaur.* viii), on the reception and departure of dear friends or else respected personages (Gen. xix, 3; 2 Sam. iii, 20; xx, 4; 2 Kings vi, 23; Tobit vii, 9; viii, 20 sq.; 1 Macc. xvi, 15; 2 Macc. ii, 28; Luke v, 29; xv, 23 sq.; John xii, 2), at sheepshearing (2 Sam. xiii, 23; 1 Sam. xxv, 2, 36), and vintage (Judg. ix, 27), also at funerals (2 Sam. iii, 35; Jer. xvi, 7; Tob. iv, 18 [the  $\text{קָרַבְתָּם הַיָּמִים}$  of Hos. ix, 4]; comp. Josephus, *War*, ii, 1, 1; Homer, *Il.* xxiii, 29; xxiv, 802; see Harmer, iii, 203), and mostly occurred in the evening (Josephus, *War*, i, 17, 4). The guests were invited by servants (Prov. ix, 3; Matt. xxii, 3 sq.), in more honorable instances a second time (Matt. xxii, 4; comp. Luke xiv, 7; comp. Eskuiche, *Erlüuter.* ii, 410 sq.), and these summoners (like the Roman *vocatores* or *invitatores*) seem to have had the business of assigning the guests their relative position (Walch, *Observ. in Matt. ex inscript.* p. 62). On their arrival the guests were kissed (Tob. ix, 8; Luke vii, 45), their feet were washed (Luke vii, 44; comp. Homer, *Il.* x, 576 sq.; *Odys.* iii, 476; viii, 454; Petron. *Sat.* 31; see Douglai *Anal.* i, 52); the hair of their head and beard, even their clothes, oftentimes their feet (Luke vii, 38; John xii, 3; comp. Athen. xii, 553), anointed with costly oil (Psa. xxiii, 5; Amos vi, 6; comp. Homer, *Il.* x, 577; Plutarch, *Sympos.* iii, 6, p. 654; Petron. *Sat.* 65; Lucret. iv, 1125; see Walch, *De unctioibus vet. Ebraeor. concubialibus*, Jen. 1751), and their persons decked with garlands, with which their head was especially adorned (Isa. xxviii, 1; Wisd. ii, 7 sq.; comp. Joseph. *Ant.* xix, 9, 1; Athen. xv, 655; Plutarch, *Sympos.* iii, 1 p. 645; iii, 6, p. 654; Philostr. *Apoll.* ii, 27; Aristoph. *Av.* 460; Horace, *Od.* ii, 7, 23; *Sat.* ii, 3, 256; Plautus, *Menuechn.* iii, 1, 16; Lucretius, iv, 1125; Juvenal, v, 36; Petron. 65; Ovid, *Fast.* v, 337); and then, with consideration to the rank (Josephus, *Ant.* xv, 2, 4); comp. Becker, *Charicles*, i, 427), they were assigned their respective places (1 Sam. ix, 22; Luke xiv, 8; Mark xii, 39; Philo, ii, 78; comp. Buckingham, *Mesopot.* i, 279). All received, as a rule, like portions sent by the master of the house (1 Sam. i, 4; 2 Sam. vi, 19; 1 Chron. xvi, 3; comp. Homer, *Odys.* xx, 280 sq.; *Il.* xxiv, 626; Plutarch, *Sympos.* ii, 10, p. 642, 644), which, however, when special honor was intended, was doubled, or even increased fivefold (Gen. xliii, 34; comp. Herod. vi, 57), or a tid-bit sent in place of it (1 Sam. ix, 24; compare Homer, *Il.* vii, 321; see Köster, *Erlüuter.* p. 197 sq.). The management of the entertainment was in the hands of the *architriclinus* (q. v.) (John ii, 8), generally a friend of the family (comp. Sir. xxxii, 1, 23; see Rosenmüller, *Morgenl.* v, 223). The pride of the entertainer exhibited itself partly in the number of the guests (Gen. xxix, 22; 1 Sam. ix, 22; 1 Kings i, 9, 25; Luke v, 29; xiv, 16), partly in expense of the eating and drinking vessels (Esth. i, 6 sq.; compare Curtius, viii, 12, 16; see Kype, *De apparatus conviv. regis Persar.* Regiom. 1755), partly and especially in the variety and excellence of the viands (Gen. xxvii, 9; Isa. xxv, 6; Amos vi, 4; Job viii, 21; comp. Psa. xxiii, 5; Job xxviii, 16; Niebuhr, *Trac.* iii, 385), as well as their richness (Gen. xviii, 6; 1 Sam. ix, 24; Judg. vi, 19). Such banquets also lasted longer than with Occidentals (3 Macc. vi, 28; comp. Esth. i, 3 sq.; Rosenmüller, *Morgenl.* iii, 294), and in Persia weighty state interests were discussed and determinations reached at the royal table (Esth. i, 15; vii, 1 sq.; Herod. i, 113; Plutarch, *Sympos.* vii, 9; Ammian. Marc. xviii, 5, p. 169, Bip. ed.; Athen. iv, 144; comp. Tacit. *Germ.* 22). The amusement consisted in part of music and song (Isa. v, 12; Amos vi, 5; Psa. lxxix, 13; Sir. xxxii, 7; comp. Homer, *Odys.* xvii, 358; Rosenmüller, *Morgenl.* v, 200), also the dance (Matt. xiv, 6), in part of jests and riddles (Judg. xiv, 12 sq.; compare Athen. x, 452, 457). At their departure the guests were again perfumed, especially on the beard (Maun-

drell, p. 400 sq.). The women feasted on such occasions probably not with the men (Buckingham, ii, 404), but in a separate apartment (Esth. i, 9; see Rosenmüller, *Morgenl.* iii, 296; Bachelor, *Chron.* p. 98; comp. the later meretricious custom, Dan. v, 2; Judith xii, 11 sq.; Herod. v, 18); but in plebeian homes the sexes were intermingled (John xii, 8). The Israelites were forbidden heathenish sacrificial entertainments (Exod. xxxiv, 15; yet see Num. xxv, 1 sq.), partly because these were in honor of false worship, and partly because they would thus be liable to partake of unclean flesh (1 Cor. x, 28). See Buxtorf, *De conviv. Ebr.* in Ugolini *Thesaurus* xxx; Geier, *De Vet. Ebr. ratione canandi*, in the *Biblioth. Lubec.* vi, sq.; Stuck, *Antiquit. conviv.* (Tigur. 1597); Mercurial, *De arte gymnast.* p. 75 sq. ed. Amst. See MEAL-TIME.

An especial sort of entertainment were the *κόποι*, or *comissationes* ("revellings"), which played so conspicuous a part in the sensual times during which the apostles labored (Rom. xiii, 13; Gal. v, 21; 1 Pet. iv, 3). Young men assembled to banquetings on festival occasions, or in the crowd of public associations, became excited with song or music, and traversed the streets inspired with wine, jubilating, and committing many extravagances (comp. Wetstein, ii, 85 sq.; Bos, *Observ. in N. T.* p. 117 sq.; Schwarz, *De comissatione vet.* Altdorf, 1744; Ilgen, *De poes. scol.* p. 197 sq.; Apulej. ed. Oudenorp, i, 133 sq.). On the luxury and wantonness of entertainments generally in the Roman period, see Philo, ii, 477 sq. The rich Jews followed the example of their pagan masters.—Winer, i, 391. See FEAST.

**Enthusiasm** ( $\text{ἐνθουσιασμός}$ , from  $\text{ἐνθεος}$ , *inspired*; *God-possessed*; *rapt*) is used both in a good and a bad sense.

1. In the first, which springs from its derivation, it signifies divine inspiration in general; or, secondarily, any extraordinary mental or moral exaltation. "The raptures of the poet, the deep meditations of the philosopher, the heroism of the warrior, the devotedness of the martyr, and the ardor of the patriot, are so many different phases of *enthusiasm*." In this sense it "is almost a synonyme of genius; the moral life in the intellectual light, the will in the reason; and without it, says Seneca, nothing truly great was ever achieved" (Coleridge). "There is a temper of mind called *enthusiasm*, which, though rejecting the authority neither of reason nor of virtue, triumphs over all the vulgar infirmities of men, contemns their ordinary pursuits, braves danger, and despises obloquy, which is the parent of heroic acts and devoted sacrifices, and which devotes ease, pleasure, interest, ambition, and life to the service of one's fellow-men" (Mackintosh, *Miscellaneous Works*, Lond. 1851, p. 731).

2. The bad sense of the word was formerly in much more common use than now. According to it, an enthusiast is one who substitutes his own fancies for reason and truth, especially in matters of religion. "Every enthusiast is properly a madman; yet his is not an ordinary, but a religious madness. The enthusiast is generally talking of religion, of God, or of the things of God, but talking in such a manner that any reasonable Christian may discern the disorder of his mind. Such enthusiasm may be described, in general, as a religious madness arising from some falsely imagined influence or inspiration of God; at least, from imputing something to God which ought not to be imputed to him, or expecting something from God which ought not to be expected from him" (Wesley, *Sermon on Enthusiasm*, *Works*, ii, 331 sq.). Warburton similarly defines enthusiasm as "that temper of mind in which the imagination has got the better of the judgment" (*Div. Leg.* bk. v, Appendix). James Blair (*Sermons*, 1740, iv, 274) makes religious enthusiasm to consist especially in "setting up the private spirit to assert anything contrary to Scripture." So Waterland (*Works*, Oxford, 1843, iv, 422) says that

"enthusiasm, in the bad sense, is a subtle device of Satan upon ill-meaning or unmeaning instruments, making use of their ambition, self-admiration, or other weakness, to draw them by some plausible suggestions into a vain conceit that they have something within them either of equal authority with Scripture, or superior to it." On the stupid misapplication of the term enthusiasm by worldly men to designate true Christian life, see Wesley's sermon above, and also Taylor, *Natural Hist. of Enthusiasm* (N. Y. 1834, 4th ed. 12mo).

**Entity** (*entitas*), "in the scholastic philosophy, was synonymous with essence or form. To all individuals of a species there is something in common—a nature which transiently invests all, but belongs exclusively to none. This essence, taken by itself and viewed apart from any individual, was what the scholastics called an *entity*. It denoted the common nature of the individuals of a species or genus. It was the idea or model according to which we conceived of them. The question whether there was a reality corresponding to this idea divided philosophers into *Nominalists* and *Realists* (q. v.). *Entity* is also used to denote anything that exists, as an object of sense or of thought. See *ENS*."—Fleming, *Vocabulary of Philosophy*, p. 162.

**Entrance into the Church.** Certain ceremonies early grew into use as signs of reverence on the part of Christians on entering the church building. They washed their hands and faces in the fountains or cisterns which were generally found in the *atrium* or court before the church; probably referring to the Psalmist's expression, "I will wash my hands in innocency: so will I compass thine altar." Many took off their shoes or sandals, especially when they went to receive the Eucharist; interpreting as applicable to themselves the command to Moses, "Put off thy shoes from off thy feet, for the place whereon thou standest is holy ground." In some instances bowing towards the altar was practised; and when emperors or kings went into the house of God, they not only left their arms and guard, but also their crowns, behind them. It was also not uncommon for men to kiss the doors, threshold, or pillars in token of their love. The germ of many of the absurd practices and ceremonies of the Roman Catholic Church may be found in these customs.—Farrar, *Eccles. Dict.* s. v.; Bingham, *Orig. Eccles.* bk. viii, ch. x, § 12.

**Entwistle, Joseph**, a Wesleyan Methodist minister, was born in Manchester, England, April 15, 1767. At sixteen he began to preach, and in 1787 Mr. Wesley called him into the itinerant ministry. He devoted himself to his work, studying theology, under many difficulties, and also the ancient languages. He filled acceptably a number of the most important appointments, and in 1812 was chosen president of the Conference. In 1831 he was made governor of the Wesleyan Theological Institution, in which office he remained until 1838, when his infirm health compelled him to retire. He died at Tadcaster in 1841. See *Memoir of the Rev. Joseph Entwistle*, by his Son (London, 1850, 12mo); *Methodist Quarterly Review*, April, 1851, p. 305.

**Enzinas, or Encinas de Francisco**, a Spanish Protestant, was born at Burgos about 1520. He is commonly named Dryander, and also used the names Duchesne, Van Eyck, Eichman, all of the same meaning (*oak-mountain*) as the Spanish name Enzinas. After completing his academic studies in Italy, he went to Louvain, and studied there, and also spent some time with Melancthon at Wittemberg. Having wealthy relatives in the Netherlands, he fixed his abode there, and openly embraced the Reformed cause. He published a Spanish version of the N. T., dedicated to Charles V (1543). He was arrested Dec. 13, 1543, and imprisoned at Brussels. He escaped in February, 1545, to Antwerp, thence to Germany and England (1548). He carried letters of commendation from Melancthon

to Edward VI and to Cranmer, who received him warmly, and gave him a post at Oxford. After some time he returned to the Continent, and continued his literary labors at Strasburg, Basle, and Geneva. He died about 1570.—McCrie, *Reformation in Spain*, ch. v; Hoefler, *Nouv. Biog. Générale*, xv, 122.

**Enzinas de, Jayme**, a Spanish Protestant, brother of the preceding (known like his brother, by the name Dryander), studied at Louvain and Paris, and embraced Reformed principles. At the request of his father he returned to Italy, and remained there in great uneasiness for some years. He was preparing to rejoin his brother in Germany when he was denounced before the Inquisition as a heretic. He was tried, condemned, and burnt alive in 1546.—McCrie, *Reformation in Spain*, ch. v.

**Eon, or Eudo de Stella**, a fanatic nobleman who lived in the middle of the 12th century. He was a native of the Bretagne, and a man without education. In the form used in exorcising evil spirits he heard these words, "*per Eum, qui venturus est judicare vivos et mortuos*," and concluded, from the resemblance between the word *Eum* and his own name, that he was the person who should judge the quick and the dead. His views seem to be connected with those of the Cathari. He is said to have taught that baptism was of value only for believers; that the only true baptism was that of the Spirit by the imposition of hands; that the hierarchy had not been instituted by God; that the Church of Rome was not the true Church, because her priests did not lead a holy life. He denied the resurrection of the body, and rejected marriage as a sacrament. He went about preaching these doctrines, found many adherents, and was reported to possess the power of working miracles. In 1145 the cardinal-legate Albericus came from Ostia to the Bretagne, and preached against Eon and his adherents at Nantes. He also induced archbishop Hugo, of Rouen, to write a work against him, which is, however, rather a diffuse explanation of the doctrines of the Church of Rome than a refutation of Eon (*Dignitatum Christiane fidei contra hereticos sui temporis libri tres; Bibl. Patrum Mar.* tom. xxii). At the same time troops were sent out against the new heretics, and in the diocese of Alet many were burned. Eon withdrew into the province of Guienne; in 1148 he repaired to Champagne, where his band was scattered, and he, together with some of his prominent adherents, was captured. He was taken before the council at Rheims, and asked who he was. He replied, *Is qui venturus est judicare vivos et mortuos*. The synod declared him to be insane, and charged the archbishop of Rheims to take care of him. Many of his followers were sentenced to be burned. After Eon's death the sect soon died out.—Schmidt, in *Herzog's Real-Encyklop.* iv, 212; Wetzer u. Welte, *Kirchen-Lex.* iii, 602; Mosheim, *Ch. Hist.* bk. iii, cent. xii, pt. iii, ch. v, § 16; Geseler, *Ch. Hist.* per. iii, div. iii, ch. vii, § 84. (A. J. S.)

**Eon.** See GNOSTICISM.

**Eonian.** See *EOX*.

**Equinians**, a sect of the 16th century; so called from one Equinus, who taught that Christ did not die for the wicked, but for the faithful only.—Buck, *Theol. Dictionary*, s. v.

**Epact**, "in chronology, is the excess of the solar month above the lunar synodical month; or of the solar year above the lunar year of twelve synodical months; or of several solar months above as many synodical months; or of several solar years above as many periods, each consisting of 12 synodical months. The menstrual epact is the excess of the civil calendar month above the lunar month. For a month of 31 days, this epact is 1 day 11 hours 15 minutes 57 seconds, if we suppose new moon to occur on the first day of the month. The annual epact is the excess of the

solar year above the lunar. As the Julian solar year is (nearly) 365 days, and the Julian lunar year is (nearly) 354 days, the annual epact is nearly 11 days. The epact for two Julian years is, therefore, nearly 22 days; for three years, 33 days; and so on. When, however, the epact passes 30 days, 30 falls to be deducted from it, as making an intercalary month. For three years, then, the epact is properly 3; and for 4 years, adding 11 days, it is 14 days; and so on. Following the cycle, starting from a new moon on the 1st of January, we find that the epact becomes 30 or 0 in the 19th year. The epact for the 20th year is again 11; and so on. The years in the cycle are marked by Roman numerals I, II, III, etc., called the Golden Numbers; and a table of the Julian epacts exhibits each year in the cycle with its golden number and epact. As the Gregorian year (see CALENDAR) differs from and is in advance of the Julian by 11 days (the number lost on the Julian account before the Gregorian computation of time was introduced in England), and as 11 days is the difference between the solar and lunar years, it follows that the Gregorian epact for any year is the same with the Julian epact for the year preceding it" (Chambers, *Encyclopædia*, s. v.).

**Epænetus** (Ἐπαίνετος, commendable), a Christian resident at Rome when Paul wrote his epistle to the Church in that city, and one of the persons to whom he sent special salutations (Rom. xvi, 5). A. D. 55. In the received text he is spoken of as being "the first-fruits of Achaia" (ἀπαρχὴ τῆς Ἀχαιᾶς); but "the first-fruits of Asia" (τῆς Ἀσίας) is the reading of the best MSS. (S A B C D E F G 67), of the Coptic, Armenian, Æthiopic, Vulgate, the Latin fathers, and Origen (*In Ep. ad Rom. Comment.* lib. x, *Opera*, vii, p. 431; *In Numer. Hom.* xi, *Opera*, x, p. 109). This reading is preferred by Grotius, Mill, Bengel, Whitby, Koppe, Rosenmüller, Rückert, Olshausen, and Tholuck; and admitted into the text by Griesbach, Knapp, Tittmann, Schoiz, Lachmann, and Tischendorf; also by Bruder, in his edition of Schmidt's Concordance, Lips, 1842. Dr. Bloomfield, who also adopts it in his Greek Testaments (2d ed. 1836), remarks that "the very nature of the term ἀπαρχὴ suggests the idea of one person only (see 1 Cor. xv, 20), and, as in 1 Cor. xvi, 15, Stephanas is called the ἀπαρχὴ τῆς Ἀχαιᾶς, Epænetus could have no claim to the name." With respect to the former part of this statement, the learned writer has strangely overlooked such passages as James i, 18, "that we should be a kind of first-fruits" (ἀπαρχὴν τῶν), and Rev. xiv, 4, "These were redeemed from among men, being the first-fruits" (ἀπαρχὴν); and as to the latter part, not Stephanas alone, but his house, is said to be the first-fruits, and to have added themselves (ἑταῖον ἐαυτοῦς) to the ministry of the saints. Macknight's remark in favor of the received reading, that if Epænetus was one of that house, he was a part of the first-fruits of Achaia, seems somewhat forced. The synopsis of the pseudo-Dorotheus makes him first bishop of Carthage, but Justinian remarks that the African churches do not recognise him.—Kitto, s. v.; Smith, s. v.

**Epaon, Synod of, Concilium Epaonense or Epaunense**, a general synod of the Catholic bishops of Burgundy, held in 517. A great change in the relation of the Catholic Church of Burgundy to the state government took place in 516, when the new king Sigmond, son of the Arian king Gundobald, joined it. The Catholic Church thus became the State Church, though it does not appear that Sigmond, like so many kings of his times, aspired to exercise a controlling influence upon Church affairs. The Council of Epaon, which was to establish Church discipline in the new Catholic kingdom upon a permanent basis, was not called by the king, but by Avitus, bishop of Vienne, and Viventius, metropolitan of Lyons. The letters of both bishops are still extant. That of Viventius

is addressed to all bishops, clergymen, lords, and notables of the land, complains of want of discipline among the clergy, and invites every one who has to bring charges against the moral conduct of any clergyman to appear before the council. The clergymen are commanded to be present, and the laymen are permitted to attend in order that the people may receive information of what the bishops will decree. The letter of Avitus complains that the Church law ordering the holding of two synods every year had entirely fallen into disuse, and states that he had been censured by the Pope on this account, and had been commanded to assemble a synod, to renew and enforce the old Church laws, as far as they were still applicable, and to add, if necessary, new ones. As no such censure can be found in a letter of the Pope to Avitus, written in Feb. 517, nor in any other papal letter extant, it has been inferred (Vogel, in Herzog's *Real-Encyclop.* s. v.) that Avitus, in order to secure the meeting of the council, used the papal authority to a greater extent than he was authorized to do. In compliance with the letters of invitation, 24 bishops appeared personally at Epaon, and one sent representatives. Their deliberations were of but short duration, and on Sept. 14, 517, the bishops signed the acts upon which, "under divine inspiration," they had agreed. The acts consist of a brief preface and 40 canons which concern the conduct of bishops, clergymen, monks, secular authorities, and laymen, the intercourse with the Arian heretics, the property and discipline of the Church. The provisions concerning the heretics are of special importance. Catholic clergymen, under severe penalties, are forbidden to sit at table with heretics. With a Jew no layman shall dine, under penalty of being never admitted to a clergyman's table. Heretics who wish to join the Church must apply to the bishops personally; only when they are on the death-bed they may be received by a priest. The church edifices of the heretics are declared to be objects worthy of special horror, and their purification is declared impossible. The 30th canon forbids marriages with near relatives, in particular with the sister of a deceased wife. This canon directly concerned a prominent officer at the royal court, Stephanus, who was married to his sister-in-law Palladia. The bishops seem to have anticipated trouble from the opposition of Stephanus, for, after the dissolution of the Council of Epaon, eleven bishops, among whom was Apollinaris, bishop of Valence and brother of Avitus, went to Lyons, where, under the presidency of Viventius, they agreed upon a line of conduct for the enforcement of the canon, providing even for the case that the king should leave the Church, and appoint Arian bishops for some of the episcopal sees.

A part of the canons of Epaon remained in force in Southern France, as canons of the Council of Agde ("Agathensis"). This council had been held in 504, and established 47 canons, to which subsequently, for the purpose of obtaining a complete code of discipline, 14 canons of other councils were added; of these 24, 15 were taken from the Council of Epaon.

The site of Epaon cannot be established with certainty. According to some, it is the little town of Yenne, in Savoy, on the left bank of the Rhone; according to others, a little village, Ponas, about half way between Lyons and Vienne.—Herzog, *Real-Encyclop.* iv, 75; Wetzer und Welte, *Kirchen-Lex.* iii, 603; Hefele, *Concilien-geschichte*, ii, 660; Landon, *Manual of Councils*, p. 224; Mansi, *Coll. Concil.* viii, 310; Labbe, *Dissertatio de Concil. Epaunensi.* (A. J. S.)

**Ep'aphras** (Ἐπαφροῦς, usually considered a contraction of *Epaphroditus*, but the last syllable in that case is hardly regular), an eminent teacher in the Church at Colossæ, denominated by Paul "his dear fellow-servant," and "a faithful minister (ὑπάκουος) of Christ" (Coloss. i, 7; iv, 12). A. D. 57. It has been inferred from Coloss. i, 7 that he was the found-

er of the Colossian Church; and Dr. Neander supposes that the apostle terms him *ἡπίσι ἡμῶν ἑκάκωτος Χριστοῦ* (*a servant of Christ in our stead*) because he committed to him the office of proclaiming the Gospel in the three Phrygian cities Colossæ, Hierapolis, and Laodicea, which he could not visit himself (*Hist. of Planting*, i, 200, 373). This language, however, is by no means decisive; yet most probably Epaphras was one of the earliest and most zealous instructors of the Colossian Church (see Alford's prolegomena to that epistle, *Gr. Test.* iii, 35 sq.). Lardner thinks that the expression respecting Epaphras in Coloss. iv, 12, *ὁ ἐξ ἡμῶν*, is quite inconsistent with the supposition of his being the founder of the Church, since the same phrase is applied to Onesimus, a recent convert (*Hist. of the Apostles and Evangelists*, c. xiv; *Works*, vi, 153). But in both cases the words in question seem intended simply to identify these individuals as the fellow-townsmen of the Colossians, and to distinguish them from others of the same name in Rome (see Macknight on Coloss. iv, 2). He was at that time with Paul at Rome (Coloss. iv, 12), and seems by the expression there used to have been at least a Colossian by birth. We find him again mentioned in the epistle to Philemon (ver. 23), which was sent at the same time as that to the Colossians. Paul there calls him *ὁ συναγαλωτός μου*, *my fellow-prisoner*; but some regard the word there as only a tender and delicate expression of Epaphras's attention to the apostle in his imprisonment (comp. Rom. xvi, 13). The martyrologies make Epaphras to have been first bishop of Colossæ, and to have suffered martyrdom there.—Kitto, s. v.; Smith, s. v.. See EPAPHRODITUS.

**Epaphroditus** (*Ἐπαφρόδιτος*, belonging to *Aphrodite*, or *Venus*), a messenger (*ἀπόστολος*) of the Church at Philippi to the apostle Paul during his imprisonment at Rome, who was intrusted with their contributions for his support (Phil. ii, 25; iv, 18). A. D. 57. Paul's high estimate of his character (see Evans, *Script. Biog.* ii, 300) is shown by an accumulation of honorable epithets (*τὸν ἀδελφόν, καὶ συνεργόν, καὶ ἀσφατωσίωτην μου*), and by fervent expressions of gratitude for his recovery from a dangerous illness brought on in part by a generous disregard of his personal welfare in ministering to the apostle (Phil. ii, 30). Epaphroditus, on his return to Philippi, was the bearer of the epistle which forms part of the canon. Grotius and some other critics conjecture that Epaphroditus was the same as the *Epaphras* mentioned in the epistle to the Colossians (see Sirk, *De Epaphrodito Philippensium apostolo*, Lips. 1741; Strohbach, *De Epaphra Colossensi*, Lips. 1710). But, though the latter name may be a contraction of the former, the fact that Epaphras was most probably in prison at the time, sufficiently marks the distinction of the persons. The name Epaphroditus was by no means uncommon (see Tacit. *Ann.* xv, 55; Sueton. *Domit.* 14; Joseph. *Life*, 76), as Weinstein has shown (*Nov. Test. Gr.* ii, 273).—Kitto, s. v.

**Eparch** (*ἐπαρχος*, ruler over a district), a commander (e. g. of vessels, Æschylus, *Ag.* 1227), hence *prefect* of a province (comp. *ἐπαρχία*, Acts xxiii, 24; xxv, 1); applied as a title to Sisinnus (q. v.), the Persian satrap of Syria (1 Esdr. vii, 1, "governor"). See TOPARCHY, etc.

**Eparchy** (*ἐπαρχία*) was the official term of a province in the administration of the Roman empire. It consisted of a number of communities, and was a subdivision of a diocese (*ἐπίσκοπος*). In the organization of the Church, the ecclesiastical heads of communities were called bishops, those of the capitals of eparchies, metropolitans; those of the dioceses, patriarchs. The term eparchy is thus used in can. 4 of the Council of Nice, and by Maerius of Ancyra (Suicer, *Thesaur. Eccles.* s. v.). The meaning of the term was subsequently changed in the Greek Church, so as to denote, in gen-

eral, the diocese of any bishop, archbishop, or metropolitan). In Russia the eparchies are divided into three classes, the first of which comprised in 1866 the four metropolitan sees of Petersburg, Moscow, Kiev, and Novgorod; the second twenty sees, the incumbents of which, with the exception of one, had the title archbishop; the third twenty-nine sees, six of which had the title archbishop, while the others were merely bishops. Eparchies can be transferred at the pleasure of the czar from one class to the other.—Herzog, *Real-Encyclop.* iv, 80; Wetzer u. Welte, *Kirchen-Lex.* iii, 604; *Churchman's Calendar for 1868*. See GREEK CHURCH and RUSSIA. (A. J. S.)

**Épée**, CHARLES MICHEL DE L', born in Versailles Nov. 25, 1712, was distinguished for his labors in behalf of the deaf and dumb. He entered into orders as a Roman Catholic priest, but, having been interdicted from the exercise of his functions, he devoted himself to the care of deaf mutes. Two young girls, mutes, had been under the care of father Vamin, at whose death L'Épée took charge of them. From this time his talents, time, and property were all consecrated to this cause. He framed a series of signs (the basis of the system now in use), and his success induced the duc de Penthièvre and others to aid him. He organized an asylum, which, after his death, was taken under the patronage of the French government, and placed under Sicard (q. v.), the worthy successor of L'Épée. He died at Paris Dec. 23, 1789. His writings give full accounts of his method; among them are *Institution des Sourds et des Muets*, 1774, 12mo; enlarged edition, 1776, 12mo; and again improved, 1784, 12mo. See especially his *Art d'enseigner à parler aux Sourds-Muets*, with notes by Sicard, and the *Éloge* of L'Épée by M. Bebian (Paris, 1820, 8vo).—Hoefler, *Nov. Biog. Génér.* xxx, 829.

**Epefanofschins**, a Russian sect, followers of a monk of Kiev, who was ordained bishop through forged letters of recommendation. He died in prison, but is esteemed a martyr by his followers. Their sentiments are nearly the same as the *Starobredsi*, or Old Ceremonialists.—Pinkerton's *Greek Church*, p. 304; Williams, cited by Buck, *Theological Dictionary*. See RUSSIA; RUSSIAN SECTS.

**Epen'etus**. See EPENETUS.

**É'phah** (Heb. *Epphah'*, עֵפָה, *gloom*), the name of a tribe (including that of the founder), also of a woman and of a man.

1. (Sept. *Γεφάρ* v. r. in Chron. *Γαφάρ*, Isa. *Γαφά*.) The first in order of the five sons of Midian (Gen. xxv, 4; 1 Chron. i, 33), B. C. cir. 1988; afterwards mentioned by Isaiah in the following words: "The multitude of camels shall cover thee, the dromedaries of Midian and Ephah: all they from Sheba shall come: they shall bring gold and incense; and they shall show forth the praises of the Lord. All the flocks of Kedar shall be gathered together unto thee, the rams of Nebaioth shall minister unto thee: they shall come up with acceptance on mine altar, and I will glorify the house of my glory" (Isa. lx, 6, 7). This passage clearly connects the descendants of Ephah with the Midianites, the Keturahite Sheba, and the Ishmaelites, both in the position of their settlements and in their wandering habits, and shows that, as usual, they formed a tribe bearing his name. But no satisfactory identification of this tribe has been discovered. The Arabic word *Ghaffah*, which has been supposed to be the same as Ephah, is the name of a town, or village, near Pelusium, or Bulbeys (the modern Bilbeys), a place in Egypt, in the province of Sharkiyeh, not far from Cairo; but the tradition that Ephah settled in Africa does not rest on sufficient authority.—Smith, s. v. See MIDIAN.

2. (Sept. *Γαφά*.) A concubine of Caleb, of the tribe of Judah, by whom she had several sons (1 Chron. ii, 46). B. C. post 1856.

3. (Sept. Γαφά.) A son of Jahdai, who was apparently the grandson of the oldest of the foregoing sons (1 Chron. ii, 47). B.C. long post 1856.

**Ephah** (ἑφάη, *ephah'*, rarely ἑφᾶ, *ephah'*), a measure of grain, containing "three seahs or ten omers," and equivalent in capacity to the bath for liquids (Exod. xvi, 36; 1 Sam. xvii, 17; Zech. v, 6; Judg. vi, 19; Ruth ii, 17; the "double ephah," Prov. xix, 10; Deut. xxv, 14; Amos viii, 5, means two ephahs, the one just, the other false). According to Josephus (*Ant.* viii, 2, 9), the ephah contained 72 sextarii, equal to the Attic (liquid) metretres, or 1933.95 Paris cubic inches, about 1½ bushels English (see Böckh, *Metrolog. Untersuch.* p. 259, 278). This is also confirmed by other testimony; so that there is doubtless an error in another passage of Josephus (*Ant.* xv, 9, 2), where the ephah seems to be equal to 96 sextarii, or the Attic medimnus. The origin of this word is to be sought in the Egyptian language, where it signifies a *measure*, especially of corn, from which comes the Sept. rendering οἰά (see Rödiger, in *Allg. Encyclop.* s. v.; Gesenius, *Thes. Ling. Heb.* in Appendix.). See MEASURES.

**E'phai** (Heb. *Ephayy'*, עֵפְאִי [text עֵפְאִי for עֵפְאִי, *Ophay'*], *languid*, hence *gloom*; Sept. Ἰωφῆ v. r. Ὠφῆ, Ὠφί, and Ὠφέτ, *Vulg. Ophi*), a Netophathite, whose sons were among the "captains (סִרְיָוֹ) of the forces" left in Judah after the deportation to Babylon, and who warned the Babylonian governor of the plots against him (Jer. xl, 8). B.C. 588. They submitted themselves to Gedaliah, the Babylonian governor, and were apparently massacred with him by Ishmael (xli, 3; comp. xl, 13).

**Ephéh.** See VIPER.

**E'pher** (Heb. *id.* עֵפֶר, the *gopher*, so called from its gray or ashy color), the name of a tribe (including that of its founder) and of two men.

1. (Sept. Ἀφῆρ v. r. Ὀφῆρ, in Chron. Ὀφῆρ, *Vulg. Opher* and *Epher*.) The second in order of the sons of Midian (Gen. xxv, 4; 1 Chron. i, 33), Abraham's son by Keturah. B.C. post 1988. According to Gesenius, the name is equivalent to the Arabic *Ghiffr*, signifying "a calf," and "a certain little animal, or insect, or animalcule." Two tribes bear a similar appellation, *Ghifvar*; but one was a branch of the first Amalek, the other of the Ishmaelite Kináneh (comp. Caussin, *Essai sur l'Hist. des Arabes*, i, 20, 297, 298; and Abulfeda, *Hist. Antislamica*, edit. Fleischer, p. 196); neither is ascribed to Midian. The first settled about Yethrib (El-Medineh); the second in the neighborhood of Mekkeh.—Smith, s. v. See MIDIAN.

2. (Sept. Ἀφῆρ v. r. Γαφῆρ, *Vulg. Epher*.) The third son of Ezra, a descendant of the tribe of Judah, and apparently of Caleb, the son of Jephunneh (1 Chron. iv, 17). B.C. cir. 1618.

3. (Sept. Ὀφῆρ, *Vulg. Epher*.) The head of one of the families of Manasseh east, who were carried away by Tiglath-Pileser (1 Chron. v, 24). B.C. ante 740. The name may be compared with that of Ophrah (q. v.), the native place of Gideon, in Manasseh, on the west of Jordan.

**E'phes-dam'mim** (Heb. *E'phes Dammim'*, עֵפְהִים דַּמִּיִּם, appar. *boundary of blood*; Sept. Ἀφῆσομιμῖν or Ἀφῆσομιμῖν v. r. Ἐφῆσῖν, *Vulg. fines Dammim*), a place in the tribe of Judah between Shochoh and Azekah, where the Philistines were encamped when David fought with Goliath (1 Sam. xvii, 1). The similar, but not parallel passage (1 Chron. xi, 13), has the shorter form *Pas-Dammim*. The name was probably derived from its being the scene of frequent sanguinary encounters between Israel and the Philistines. On his way from Beit-Jibrin to Jerusalem, Van de Velde came past a ruined site on the high northward-looking brow of wady Musur, about one hour E. by S. of Beit-Netif, called *Khirbet Damun*, which he has

no doubt represents the ancient Ephes-Dammim, and "which fixes the place of the camp of Goliath just at its foot, where the valley contracts, and may, indeed, be called the pass [or extremity] of Dammim" (*Memoir*, p. 290). In that case the narrative of 1 Sam. xvii, becomes plain: "the gorge" (סִרְיָוֹ) between the battle-lines of the two armies (ver. 3), and along which the first rout and pursuit occurred (ver. 52), was no other than the wady Musur itself, which is so narrow immediately at this spot. See ELAH (VALLEY OF).

**Ephes'ian** (Ἐφεσῖος), a native or resident of the city of Ephesus (q. v.), in Asia Minor (Acts xix, 28, 34, 35; xxi, 29). The similar adj. *Ephusius* (Ἐφεσῖος, "of Ephesus") also occurs (Rev. ii, 1).

**EPHESIANS, EPISTLE TO,** or Paul's letter addressed to the Christian Church at the ancient and famous city of Ephesus (see below), that church which the apostle had himself founded (Acts xix, 1 sq.; comp. xviii, 19), with which he abode so long (*ῥητερίαν*, Acts xx, 31), and from the elders of which he parted with such a warm-hearted and affecting farewell (Acts xx, 18-55). See PAUL.

I. *Authenticity.*—This epistle expressly claims to be the production of the apostle Paul (i, 1; iii, 1); and this claim the writer, in the latter of these passages, follows up by speaking of himself in language such as that apostle is accustomed to use in describing his own position as an ambassador of Christ (iii, 1, 3, 8, 9). The justice of this claim seems to have been universally admitted by the early Christians, and it is expressly sanctioned by several of the fathers of the second and third centuries (Irenæus, *adv. Hæc.* v, 2, 3; v, 14, 3; Clemens Alexandr. *Padagog.* i, 108; *Protript.* ix, 69, ed. Potter; *Strom.* iv, 8, p. 592; Origen, *cont. Cels.* iii, 20; iv, 211, ed. Spencer; Tertullian, *adv. Marc.* v, 11, 17; *De Præscr. Hæc.* ch. 36; Cyprian, *Testim.* iii, 7, etc.); and after them the constant and persistent tradition of the ancient Church. Even Marcion did not deny that the epistle was written by Paul, nor did heretics refuse occasionally to cite it as confessedly due to him as its author (Irenæus, *Hæc.* i, 8, 5; see Hug, *Introd.* Fosdick's transl. p. 551; Hippolytus, *Philosophumena*, vi, 34). In recent times, however, its genuineness has been somewhat vehemently called in question. The epistle is also cited as part of sacred Scripture by Polycarp (*Ep. ad Philipp.* c. 1; c. 12); and it is probably to it that Ignatius refers in writing to the Ephesians (c. 12; compare Cotelerii *Annot.* in loc.; Pearson, *Vind. Ignatiana.* pt. ii, p. 119; Lardner's *Works*, ii, 70, 8vo). De Wette has attempted, from internal evidence, to set aside this external proof of the Pauline origin of this epistle; but his cavils have been so fully and satisfactorily answered by Schott (*Isag. in N. T.* p. 260), Guericke (*Beiträge zur hist. krit. Einleitung ins N. T.* p. 106), Hlesem (*Der Ap. Paulus*, p. 130), Rückert (*Der Br. Pauli an die Epheser*, p. 289), and others, that later De Wette himself, both in the introductory pages of his *Commentary* on this epistle (ed. 2, 1847), and in his *Introduction to the N. T.* (ed. 5, 1848), only labors to prove that it is a mere spiritless expansion of the epistle to the Colossians, though compiled in the apostolic age. Schwegler (*Nachapost. Zeitalt.* ii, 330 sq.), Baur (*Paulus*, p. 418 sq.), and others advance a step farther, and reject both epistles as of no higher antiquity than the age of Montanism and early Gnosticism. The objections adduced are chiefly the following: 1. The absence of any friendly greetings in this epistle, coupled with what are alleged to be indications of want of previous acquaintance on the part of the writer with the Ephesians, facts which, it is asserted, are incompatible with the supposition that it was written by Paul, whose relations with the Ephesian Church were so intimate. 2. The occurrence of words, and phrases, and sentiments, which indicate acquaintance with those Gnostic ideas which were familiar only at a period much later than that of

the apostle. 3. The close resemblance of this epistle to the epistle to the Colossians, suggesting that the former is only an enlargement of the latter. The first of these objections may be passed by here, as the allegations on which it rests will be particularly considered when we come to the question of the destination of the epistle; at present it may suffice to cite the remark of Reuss in reference to the *unreasonableness* of such objections: "If Paul writes similar letters of friendship, they are pronounced insignificant, and so spurious, because there is a want of the didactic character in them; and, on the other hand, if this prevails, there is proof of the spuriousness of the writing in the absence of the other. What! must both elements always be united according to some definite rule? is it so with us? or are any two of Paul's epistles alike in this respect?" (*Die Geschichte d. H. Schr. Neuen Test.* p. 104, 3d ed.) The second of the above objections has reference to such passages as i, 21; ii, 7; iii, 21, where it is alleged the Gnostic doctrine of æons is recognised; and to the expression *πλήρωμα*, i, 23, as conveying a purely Gnostic idea; and to such words as *μυστήριον*, *σοφία*, *γνώσις*, *φῶς*, *σκοτία*, etc. On this it seems sufficient to observe, without denying the existence of Gnostic allusions in this epistle, that, on the one hand, the objection assumes that, because Gnostic schools and systems did not make their appearance till after the age of the apostles, the ideas and words in favor with the Gnostics were unknown at an earlier period, a position which cannot be maintained [see Gnostics]; and, on the other, that, because the apostle uses phraseology which was employed also by the Gnostics, he uses it in the same sense as they did, which is purely gratuitous and indeed untrue, for to confound the *αἰώνες* and *πλήρωμα* of the apostle with the *αἰώνες* and *πλήρωμα* of the Gnostics, as Baur does, only proves, as Lange has remarked, that "a man may write whole books on Gnostics and Gnosticism without detecting the characteristic difference between the Christian principle and Gnosticism" (*Apostol. Zeit.* i, 124). With regard to the resemblance between this epistle and that to the Colossians, it can surprise no one that, written at the same time, they should in many respects resemble each other (see Klöpffer, *De origine Epp. ad Eph. et Col.* Gryph. 1853); but it does not require much penetration to discover the many points of difference between them, especially in the point of view from which the writer contemplates his main subject, the Lord Jesus Christ, in each; in the one as the prehistoric, pre-existent, supreme source of all things; in the other as the incarnate, historical, exalted, glorified head of the Church, to whom all things are subjected (comp. Eph. i, 20-23, with Col. i, 15-20; and Lange, *Ap. Zeit.* i, 118). As for the alleged "copious expansion," that may be left to the judgment of the reader, as well as the counter notion of Schneckenburger, that the epistle to the Colossians is an epitome of that to the Ephesians made by Paul himself. On such objections in general, we may say with Reuss that "rash hypotheses, whatever acceptance they may have received, tell by their deficiency or strangeness, not against the epistle, but against themselves; and, in opposition to all cavils, the many traits which disprove the presence in the thoughts of a deceptive imitation by a foreign hand stand as valid arguments in its defence" (*Gesch.* p. 104). For a detailed reply to the arguments of De Wette and Baur, the student may be referred to Meyer, *Einleit. z. Eph.* p. 19 sq., ed. 2; Davidson, *Introd. to N. T.* ii, 352 sq., and Alford, *Prolegomena*, p. 8.

II. The Readers for whom this Epistle was designed. —In the opening words, "Paul, an apostle of Christ Jesus by the will of God, to the saints that are in Ephesus and faithful in Christ Jesus," the words *ἐν Ἐφεσῶν*, are omitted by the Vatican and Sinaitic MSS., the cursive numbered 67, by Basil (expressly), probably by Origen, and possibly by Tertullian. This,

combined with the somewhat noticeable omission of all greetings to the members of a church with which the apostle stood in such affectionate relation, and some other internal objections, have suggested a doubt whether these words really formed a part of the original text. On the subject of the persons addressed, therefore, two hypotheses have been principally entertained, besides the common opinion which, following the (disputed) reading in i, 1, regards the party to whom it was sent as the Church at Ephesus. (See the *Jahrb. f. deutsche Theol.* 1866, p. 129 sq., 742 sq.)

1. Grotius, reviving the opinion of the ancient heretic Marcion, maintains that the party addressed in this epistle was the Church at Laodicea, and that we have in this the epistle to that Church which is commonly supposed to have been lost. The view of Grotius, which has been followed by some scholars of eminent name, among whom are found Hammond, Mill, Venema, Wetstein, and Paley, rests chiefly on two grounds, viz. the testimony of Marcion, and the close resemblance between this epistle and that to the Colossians, taken in connection with Coloss. iv, 16. With respect to the former of these grounds, it is alleged that, as Marcion was under no temptation to utter a wilful falsehood in regard to the destination of this epistle, he probably had the authority of the Church at Laodicea, and, it may be, the tradition of the churches generally of Asia Minor, for the opinion which he expresses (Grotius, *Proleg. ad Ephes.*; Mill, *Proleg. ad N. Test.* p. 9, Oxon. 1707). But, without charging Marcion with *designedly* uttering what was false, we may suppose that, like some critics of recent times, this view was suggested to him by the apostle's allusion, in Col. iv, 16, to an epistle addressed by him to the Laodiceans. Nor is there the least ground for supposing that Marcion spoke in this instance on the authority of the Asiatic churches; on the contrary, there is every reason to believe the opposite; for not only do Origen and Clement of Alexandria, who were fully acquainted with the views of the Eastern churches on such matters, give no hint of any such tradition being entertained by them, but Tertullian, to whom we are indebted for our information respecting the opinion of Marcion, expressly says that in that opinion he opposed the tradition of the orthodox churches, and imposed upon the epistle a false title, through conceit of his own superior diligence in exploring such matters (*adv. Marc.* v, 17). With regard to the other argument by which this view is advocated, admitting the fact of a close resemblance between the epistle to the Colossians and that before us, and the fact that Paul had, some time before sending the former epistle, written one to the Church at Laodicea, which he advises the Colossians to send for and read, how does it follow from all this that the epistle to the Laodiceans and that now under notice were one and the same? It appears more probable that, seeing the two extant epistles bear so close a resemblance to each other, had the one now bearing the inscription "to the Ephesians" been really the one addressed to the Laodiceans, the apostle would not have deemed it of so much importance that the churches of Colossæ and Laodicea should interchange epistles. Such being the chief arguments in favor of this hypothesis (for those which, in addition, Wetstein alleges from a comparison of this epistle with that to the Church at Laodicea, in the Apocalypse, are not deserving of notice; see Michaelis, *Introd.* iv, 137), we may venture to set it aside as without any adequate support. It may be observed, also, that it seems incompatible with what the apostle says, Col. iv, 15, where he enjoins the Church at Colossæ to send his greetings to the brethren at Laodicea, etc. No one sends greetings by another except when it is impossible to express them one's self. But if Paul wrote to Laodicea at the same time as to Colossæ, and sent both letters by the same bearer, Tychicus, there was manifestly no occasion whatever for his

sending his salutations to the latter of these churches through the medium of the former; it was obviously as easy, and much more natural, to send his salutations to the Church at Laodicea in the epistle addressed to themselves. This seems to prove that the epistle to the Laodiceans had been written some considerable time before that to the Colossians, and therefore could not have been the same with that now under notice. See LAODICEANS (EPISTLE TO).

2. The opinion that this epistle was not specially addressed to any one church, but was intended as a sort of circular letter for the use of several churches, was first broached by archbishop Usher (*Annal. Vet. et Nov. Test.* p. 680, Breme, 1686). To this opinion the great majority of critics have given their suffrage; indeed, it may be regarded as the received opinion of Biblical scholars in the present day. This may make it apparently presumptuous in us to call it in question, and yet it seems to us so ill supported by positive evidence, and exposed to so many objections, that we cannot yield assent to it. (1.) In the *first* place, it is to be observed that this is a hypothesis entirely of *modern* invention. No hint is furnished of any such notion having been entertained concerning the destination of this epistle by the early Church. With the solitary exception of Marcion, so far as we know, all parties were unanimous in assigning Ephesus as the place to which this epistle was sent, and Marcion's view is as much opposed to the supposition of its being a circular letter as the other. As respects the external evidence, therefore, this hypothesis is purely destitute of support. (2.) It is a hypothesis suggested for the purpose of accounting for certain alleged facts, some of which are, to say the least, doubtful, and others of which may be explained as well without it as with it. These facts are, *a.* The alleged omission of the name of any place at the commencement of the epistle; *b.* Marcion's assertion that this epistle was addressed to the Laodiceans, which, it is said, probably arose out of his having seen that copy of this circular epistle which had been sent to Laodicea; *c.* The want of any precise allusions to personal relations subsisting between the apostle and those to whom this epistle was addressed; and *d.* The expressions of unacquaintedness with those to whom he wrote, which occur in this epistle, e. g. iii, 1-4. How these facts may be reconciled with the supposition that this epistle was addressed to the Ephesians will be considered afterwards; at present the question is, How do they favor the hypothesis that this was a circular letter? Now, supposing them to be unquestionable, and admitting that they are not irreconcilable with this hypothesis, it must yet appear to all that they go very little way towards affording *primary* evidence in its support. It is not one which grows naturally out of these facts, or is suggested by them; it is plainly of foreign birth, and suggested for them. But when it is remembered that the *first* of these alleged facts is (to say the least) very doubtful; that the *second* is made to serve this hypothesis only by means of another as doubtful as itself, and that, were its services admitted, it would prove too much, for it would go to show that, to the Laodiceans, the apostle not only sent a peculiar epistle, mentioned Col. iv, 16, but gave them a share also in this circular epistle written some time after their own; and that the *third* and *fourth* are both either partially or wholly questionable, it must be admitted that this hypothesis stands upon a basis which is little better than none. (3.) Had the epistle been addressed to a particular circle of churches, some designation of these churches would have been given, by which it might have been known what churches they were to which this letter belonged. When it is argued that this must be a circular letter, because there is no church specified to which it is addressed, it seems to be forgotten that the designation of a particular set of churches is as necessary for a circular epistle as the designation of one church is for

an epistle specially addressed to it. If we must leave out the words *ἰν' Ἐφεσῶν* in chap. i, 1, what are we to put in their place? for if we take the passage as it stands without them, it will follow that the epistle was addressed to *all* Christians everywhere, which is more than the advocates of the hypothesis now under notice contend for. The supposition that the title was left blank is equally gratuitous, unreasonable, and unnecessary. (4.) In chap. vi, 21, 22, Paul mentions that he had sent to those for whom this epistle was destined Tychicus, who should make known to them all things, that they might know his affairs, and that he might comfort their hearts. From this it appears that Tychicus was not only the bearer of this letter, but that he was personally to visit, converse with, and comfort those to whom it was addressed. On the supposition that this was a circular letter, this could hardly have been practicable.

3. We return, then, to the question of the genuineness of the suspected words "at Ephesus," *ἰν' Ἐφεσῶν*. At first sight the doubts against them seem plausible; but when we oppose to these (*a*) the preponderating weight of diplomatic evidence for the insertion of the words, (*b*) the testimony of all the versions, (*c*) the universal designation of this epistle by the ancient Church (Marcion standing alone in his assertion that it was written to the Laodiceans) as an epistle *to the Ephesians*, (*d*) the extreme difficulty in giving any satisfactory meaning to the isolated participle (*τοῦτε ὁδοῖν, to those that are—*), and the absence of any parallel usage in the apostle's writings, we can scarcely feel any doubt as to the propriety of removing the brackets in which these words are enclosed in the 2d and later editions of Tischendorf, and of considering them an integral part of the original text. If called upon to supply an answer to, or an explanation of the internal objections, we must record the opinion that none on the whole seems so free from objection as that which regards the epistle as *also* designed for the benefit of churches either contemporaneous to, or dependent on that of Ephesus. The counter-arguments of Meyer, though ably urged, are not convincing. Nor can an appeal to the silence of writers of the ancient Church on this further destination be conceived to be of much weight, as their references are to the usual and *titular* designation of the epistle, but do not and are not intended to affect the question of its wider or narrower destination. It is not unnatural to suppose that the special greetings here omitted might have been separately intrusted to the bearer Tychicus, possibly himself an Ephesian, and certainly commissioned by the apostle (vi, 22) to inform the Ephesians of his state and circumstances.

III. *Occasion of writing this Epistle.*—It does not seem to have been called out by any special circumstances, nor even to have involved any distinctly precautionary teaching (compare Schneckenburger, *Beiträge*, p. 135 sq.), whether against Oriental or Judaic theosophy, but to have been suggested by the deep love which the apostle felt for his converts at Ephesus, and which the mission of Tychicus, with an epistle to the Church of Colossæ, afforded him a convenient opportunity of evincing in written teaching and exhortation. The epistle thus contains many thoughts that had pervaded the nearly contemporaneous epistle to the Colossians, reiterates many of the same practical warnings and exhortations, bears even the tinge of the same diction, but at the same time enlarges upon such profound mysteries of the divine counsels, displays so fully the *origin and developments of the Church in Christ*, its union, communion, and aggregation in him, that this majestic epistle can never be rightly deemed otherwise than one of the most sublime and consolatory outpourings of the Spirit of God to the children of men. To the Christians at Ephesus dwelling under the shadow of the great temple of Diana, daily seeing its outward grandeur, and almost daily hearing of its pompous ritualism, the allusions in this epistle to that

mystic building of which Christ was the corner-stone, the apostles the foundations, and himself and his fellow-Christians portions of the august superstructure (ii, 19-22), must have spoken with a force, an appropriateness, and a reassuring depth of teaching that cannot be overestimated.

IV. *Contents*.—These easily admit of being divided into two portions, the first mainly *doctrinal* (i-iii), the second *hortatory and practical*.

1. The doctrinal portion opens with a brief address to the saints in Ephesus, and rapidly passes into a sublime ascription of praise to God the Father, who has predestinated us to the adoption of sons, blessed and redeemed us *in Christ*, and made known to us his eternal purpose of uniting all in him (i, 3-14). This not unnaturally evokes a prayer from the apostle that his converts may be enlightened to know the hope of God's calling, the riches of his grace, and the magnitude of that power which was displayed in the resurrection and transcendent exaltation of Christ—the head of his body, the Church (i, 15-23). Then, with a more immediate address to his converts, the apostle reminds them how, dead as they had been in sin, God had quickened them, raised them, and even enthroned them with Christ; and how all was by grace, not by works (ii, 1-10). They were to remember, too, how they had once been alienated and yet were now brought nigh in the blood of Christ; how he was their Peace, how by him both they and the Jews had access to the Father, and how on him as the corner-stone they had been built into a spiritual temple to God (ii, 11-22). On this account, having heard, as they must have done, how to the apostle was revealed the profound mystery of this call of the Gentile world, they were not to faint at his troubles (iii, 1-13): nay, he prayed to the great Father of all to give them inward strength, to teach them the love of Christ, and fill them with the fulness of God (iii, 13-19). The prayer is concluded by a sublime doxology (iii, 20, 21), which serves to usher in the more directly *practical portion*.

2. This the apostle commences by entreating them to walk worthy of this calling, and to keep the unity of the Spirit: there was but one body, one Spirit, one Lord, and one God (iv, 1-6). Each, too, had his portion of grace from God (iv, 7-10), who had appointed ministering orders in the Church, until all come to the unity of the faith, and grow up and become united with the living Head, even Christ (iv, 11-16). Surely, then, they were to walk no more as darkened, feelingless heathen; they were to put off the old man, and put on the new (iv, 17-24). This, too, was to be practically evinced in their outward actions; they were to be truthful, honest, pure, and forgiving; they were to walk in love (iv, 25-v, 2). Fornication, covetousness, and impurity were not even to be named; they were once in heathen darkness, now they are light, and must reprove the deeds of the past (v, 3-14). Thus were they to walk exactly, to be filled with joy, to sing, and to give thanks (v, 15-21). Wives were to be subject to their husbands, husbands to love and cleave to their wives (v, 23-33); children were to honor their parents, parents to bring up holily their children (vi, 1-4); servants and masters were to perform to each other their reciprocal duties (vi, 5-9). With a noble and vivid exhortation to arm themselves against their spiritual foes with the armor of God (vi, 10-20), a brief notice of the coming of Tychicus (vi, 21, 22), and a twofold doxology (vi, 23, 24), this sublime epistle comes to its close.

V. *Date*.—This epistle was written during the latter part of the apostle's first imprisonment at Rome, at about the same time with that to the Colossians, A.D. 57. This appears from the following circumstances: Timothy was not yet with Paul (i, 1); Paul was then a prisoner (iii, 1; iv, 1), but had been allowed to preach (vi, 20; comp. Acts xxviii, 30, 31); Tychicus (on his first journey) carried this epistle (vi, 21; comp.

Coloss. iv, 7, 8). The question of order in time between this epistle and that to the Colossians is very difficult to adjust. On the whole, both internal and external considerations seem somewhat in favor of the priority of the Epistle to the Ephesians. Comp. Neander, *Planting*, i, 329 (Bohn), Schleiermacher, *Stud. u. Krit.* for 1832, p. 500, and Wiesler, *Chronol.* p. 450 sq.—Kitto, s. v.; Smith, s. v. See COLLOSSIANS (EPISTLE TO).

VI. *Commentaries, etc.*—The following is a full list of separate exegetical helps on this epistle, the more important having an asterisk (\*) prefixed: Victorinus, *In ep. ad Ephes.* (in Mai's *Script. Vet.* III, i, 87); Jerome, *Commentarii* (in *Opp.* vii, 537; also in *Opp. Supp.* xi, 995); Chrysostom, *Homilicæ* (in *Opp.* xi, 1; *Bibl. Patr.* ix); Claudius Taurinensis, *Expositio* (in Mabillon, *Act. Anal.* 91); \*Calvin, *Commentarii* (in *Opp.*; also tr. into English, Lond. 1854, 8vo); also *Sermons* (tr. by Golding, Lond. 1577, 4to); Ridley, *Commentary* (in Richmond's *Fathers*, ii, 14); Megander, *Commentarius* (Basil. 1534, 8vo); Sarcet, *Adnotationes* (Freckf. 1541, 8vo); Major, *Enarratio* (Wittemb. 1552, 8vo); Nailant, *Enarrationes* (Ven. 1554; Lond. 1570, 8vo); Weller, *Commentarius* (Norimb. 1559, 8vo); Vellerus, *Enarrationes* (Norimb. 1559, 8vo); Bucer, *Praelectiones* (Basil. 1562, fol.); Musculus, *Commentarii* (Basil. 1569, fol.); Heminge, *Commentary* (Lond. 1581, 4to); Binemagn, *Expositio* (Lond. 1581, 4to); Anon., *Exposition* (Lond. 1581, 4to); Stewart, *Commentarius* (Ingolst. 1593, 4to); Rollock, *Commentarius* (Edinb. 1590, 4to; Gen. 1593, 8vo); Zanchius, *Commentaria* (Newstad. 1594, fol.); Weinrich, *Explicatio* (Lips. 1613, 4to); Battus, *Commentarii* (Ilost. 1620, 4to); De Quiros, *Commentarius* (Hisp. 1622, fol.; Lugd. 1623, 4to); Meeluehrer, *Commentarius* (Norimb. 1628, 4to); Hanneken, *Explicatio* (4to, Marp. 1631; Lips., 1718; Jen. 1731); Tarnovius, *Commentarius* (Rost. 1636, 4to); Cocecius, *Commentarius* (in *Opp.* v); Althofer, *Animadversiones* (Alt. 1641, 4to); Crocius, *Commentarius* (Cassel, 1642, 8vo); Bayne, *Commentary* (Lond. 1643, fol.); Wandalin, *Paraphrasis* (Slesw. 1650, 8vo); Boyd, *Praelectiones* (fol., London, 1652; Gen. 1660); Anon., *Annotationes* (8vo, Cambr. 1653; Amst. 1703; also in the *Criticæ Sacræ*); Ferguson, *Expositio* (Edinb. 1659, 8vo); Crell, *Commentarius* (in *Opp.* i, 4); Lagus, *Commentatio* (Gryph. 1664, 4to); Schmidt, *Paraphrasis* (Arg. 1684, 1699, 4to); Du Bosc, *Sermons* (Fr., Rotterdam, 1699, 3 vols. 8vo); Goodwin, *Expositio* (Strasb. 1699, 4to); Spener, *Erklär.* (Hal. 1706, 1730, 4to); Gerbaden, *Geopent Door* (Tr. ad Rh. 1707, 4to); Pffefinger, *Dissertationes* (Arg. 1711, 8vo); also, *De visitatione Pauli ap. Ephesios* (Arg. 1721, 4to); Röhl, *Commentarius* (Tr. ad Rh. 1715, 1731, 2 vols. 4to); Hazevoet, *Verklar.* (L. **Eph'esus** (Ἐφέσος, according to one legend from ἔφεσις, the permission given by Hercules to the Amazons to settle here), an illustrious city (Athen. viii, 361) in the district of Ionia (πόλις Ἰωνίας ἐπιφανεστάτη, Steph. Byz. s. v.), on the western coast of the peninsula commonly called Asia Minor—not that this geographical term was known in the first century. The ASIA of the N. T. was simply the Roman province which embraced the western part of the peninsula. Of this province Ephesus was the capital. See *ASIA MINOR*.

1. *History*.—It was one of the twelve Ionian cities in Asia Minor in the mythic times (Herod. i, 142), and said to have been founded by the Amazons, but in later times inhabited by the Carians and Leleges (Strabo, xiv, 640), and taken possession of by the Ionians under Androclus, the son of Codrus (Cramer, *Asia Minor*, i, 363). Besides the name by which it is best known, it bore successively those of *Samorna*, *Trachea*, *Ortygia*, and *Ptelea*. Being founded by Androclus, the legitimate son of Codrus, it enjoyed a pre-eminence over the other members of the Ionian confederacy, and was denominated the royal city of Ionia. The climate and country which the colonists from Attica had selected as their future abode surpassed, according to Herodotus (i, 142), all others in beauty and fertility; and, had the martial spirit of the Ionians corresponded to their natural advantages, they might have grown into a powerful independent nation. The softness, however, of the climate, and the ease with which the necessities of life could be procured, transformed the hardy inhabitants of the rugged Attica into an indolent and voluptuous race: hence they fell successively under the power of the Lydians (B. C. 560) and the Persians (B. C. 557); and, though the revolt of Histieus and Aristagoras against the Persian power was for a time successful, the contest at length terminated in favor of the latter (Herod. vi, 7-22). The defeat of the Persians by the Greeks gave a temporary liberty to the Ionian cities; but the battle of Mycale transferred the virtual dominion of the country to Athens. During the Peloponnesian war they paid tribute indifferently to either party, and the treaty of Antalcidas (B. C. 387) once more restored them to their old masters the Persians. They beheld with indifference the exploits of Alexander and the disputes of his captains, and resigned themselves without a struggle to successive conquerors. Ephesus was included in the dominions of Lysimachus; but, after the defeat of Antiochus (B. C. 190), it was given by the Romans to the kings of Pergamum. In the year B. C. 129 the Romans formed their province of Asia. The fickle Ephesians took part with Mithridates against the Romans, and massacred the garrison: they had reason to be grateful for the unusual clemency of L. Cornelius

II.—Q

Sulla, who merely inflicted heavy fines upon the inhabitants. Thenceforward the city formed part of the Roman empire. While, about the epoch of the introduction of Christianity, the other cities of Asia Minor declined, Ephesus rose more and more. It owed its prosperity in part to the favor of its governors, for Lysimachus named the city Arsinoë in honor of his second wife, and Attalus Philadelphus furnished it with splendid wharves and docks; in part to the favorable position of the place, which naturally made it the emporium of Asia on this side the Taurus (Strabo, xiv, 641, 663). Under the Romans, Ephesus was the capital not only of Ionia, but of the entire province of Asia, and bore the honorable title of *the first and greatest metropolis of Asia* (Böckh, *Corp. Inscript. Græc.* 2968-2992). The bishop of Ephesus in later times was the president of the Asiatic dioceses, with the rights and privileges of a patriarch (Evagr. *Hist. Eccles.* iii, 6). Towards the end of the 11th century Ephesus experienced the same fate as Smyrna; and, after a brief occupation by the Greeks, it surrendered in 1308 to sultan Saysan, who, to prevent future insurrections, removed most of the inhabitants to Tyriæum, where they were massacred.

Early Silver Coin of Ephesus. From the British Museum. Actual Size. Weight  $17\frac{1}{2}$  grains.

2. *Biblical Notices*.—That Jews were established there in considerable numbers is known from Josephus (*Ant.* xiv, 10, 11), and might be inferred from its mercantile eminence; but it is also evident from Acts ii, 9; vi, 9. In harmony with the character of Ephesus as a place of concourse and commerce, it is here, and here only, that we find disciples of John the Baptist explicitly mentioned after the ascension of Christ (Acts xviii, 25; xix, 3). The case of Apollos (xviii, 24) is an exemplification further of the intercourse between this place and Alexandria. The first seeds of Christian truth were possibly sown at Ephesus immediately after the great Pentecost (Acts ii). Whatever previous plans Paul may have entertained (xvi, 6), his first visit was on his return from the second missionary circuit (xviii, 19-21), and his stay on that occasion was very short; nor is there any proof that he found any Christians at Ephesus, but he left there Aquila and Priscilla (ver. 19), who both then and at a later period (2 Tim. iv, 19) were of signal service. In Paul's own stay of more than two years (xix, 8, 10; xx, 31), which formed the most important passage of his third circuit, and during which he labored, first in the synagogue (xix, 8), and then in the school of Tyrannus (ver. 9), and also in private houses (xx, 20), and during which he wrote the First Epistle to the Corinthians, we have the period of the chief evangelization of this shore of the Ægæan. The direct narrative in Acts six receives but little elucidation from the Epistle to the Ephesians, which was written after several years from Rome; but it is supplemented in some important particulars (especially as regards the apostle's personal habits of self-denial, xx, 34) by the address at Miletus. This address shows that the Church at Ephesus was thoroughly organized under its presbyters. On leaving the city, the apostle left Timothy in charge of the Church there (1 Tim. i, 3), a position which he seems to have retained for a considerable period, as we learn from the second epistle addressed to him. See *TIMOTHY*. Among Paul's other companions, two, Trophimus and Tychicus, were

natives of Asia (xx, 4), and the latter probably (2 Tim. iv, 12), the former certainly (Acts xxi, 29), natives of Ephesus. In the same connection we ought to mention Onesiphorus (2 Tim. i, 16-18) and his household (iv, 19). On the other hand must be noticed certain specified Ephesian antagonists of the apostle, the sons of Sceva and his party (Acts xix, 14), Hymeneus and Alexander (1 Tim. i, 20; 2 Tim. iv, 14), and Phygellus and Hermogenes (2 Tim. i, 15). See **PART I.** Ephesus is also closely connected with the apostle John, not only as being the scene (Rev. i, 11; ii, 1) of the most prominent of the churches of the Apocalypse, but also in the story of his later life as given by Eusebius (*Hist. Eccl.* iii, 23, etc.). According to a tradition which prevailed extensively in ancient times, John spent many years in Ephesus, where he employed himself most diligently for the spread of the Gospel, and where he died at a very old age, and was buried. See **JOHN (THE APOSTLE)**. Possibly his Gospels and Epistles were written here. There is a tradition that the mother of our Lord was likewise buried at Ephesus, as also Timothy. Some make John bishop of the Ephesian communities, while others ascribe that honor to Timothy. In the book of Revelation (ii, 1) a favorable testimony is borne to the Christian churches at Ephesus. Ignatius addressed one of his epistles to the Church of this place (τῇ ἐκκλησίᾳ τῇ ἀξιωμακωρίστῳ, τῇ οὐσῇ ἐν Ἐφέσῳ τῆς Ἀσίας, *Hefele, Pat. Apostol.* p. 154), which held a conspicuous position during the early ages of Christianity, and was, in fact, the metropolis of the churches of this part of Asia.

3. *Location.*—Ephesus lay on the Ægean coast, nearly opposite the island of Samos, 320 stadia from Smyrna (Strabo, xiv, 632). The ancient town seems to have been confined to the northern slope of Coressus (Herod. i, 26), but in the lapse of time the inhabitants advanced farther into the plain, and thus a new town

sprang up around the temple (Strabo, xiv, 640). All the cities of Ionia were remarkably well situated for the growth of commercial prosperity (Herod. i, 142), and none more so than Ephesus. With a fertile neighborhood (Strabo, xiv, 637) and an excellent climate, it was also most conveniently placed for traffic with all the neighboring parts of the Levant. In the time of Augustus it was the great emporium of all the regions of Asia within the Taurus (Strabo, xiv, 950); its harbor (named Panormus), at the mouth of the Cayster, was elaborately constructed, though alluvial matter caused serious hindrances both in the time of Atalus and in Paul's own time (Tacitus, *Ann.* xvi, 23). The apostle's life alone furnishes illustrations of its mercantile relations with Achaia on the W., Macedonia on the N., and Syria on the E. At the close of his second missionary circuit, he sailed across from Corinth to Ephesus (Acts xviii, 19), when on his way to Syria (Acts xviii, 21, 22): some think that he once made the same short voyage over the Ægean, in the opposite direction, at a later period. See **CORINTHIANS, FIRST EP. TO.** On the third missionary circuit, besides the notice of the journey from Ephesus to Macedonia (xix, 21; xx, 1), we have the coast voyage on the return to Syria given in detail (xx, xxi), and the geographical relations of this city with the islands and neighboring parts of the coast minutely indicated (xx, 15-17). To these passages we must add 1 Tim. i, 3; 2 Tim. iv, 12, 20; though it is difficult to say confidently whether the journeys implied there were by land or by water. See likewise Acts xix, 27; xx, 1.

As to the relations of Ephesus to the inland regions of the continent, these also are prominently brought before us in the apostle's travels. The "upper coasts" (τὰ ἄνωρτοκά μέρη, Acts xix, 1), through which he passed when about to take up his residence in the city, were the Phrygian table-lands of the interior: and it was probably in the same district that on a previous

Plan of Ephesus and its Environs.

1. Grove of Diana; 2. Temple of Diana; 3. Monument of Androclus; 4. City Port; 5. Great Gymnasium; 6. Agora civilis; 7. Agora venalis; 8. Theatre; 9. Stadium; 10. Odeon; 11. Castle of Adrian; 12. Mosque of Ainsaluk; 13. Arched aqueduct across the valley; 14. Tunnelled aqueduct; 15. Quarries.

occasion (Acts xvi, 6) he formed the unsuccessful project of preaching the Gospel in the district of Asia. Two great roads at least, in the Roman times, led eastward from Ephesus; one through the passes of Tmolus to Sardis (Rev. iii, 1), and thence to Galatia and the N.E., the other round the extremity of Pactyas to Magnesia, and so up the valley of the Mæander to Iconium, whence the communication was direct to the Euphrates and to the Syrian Antioch. There seem to have been Sardinian and Magnesian gates on the E. side of Ephesus corresponding to these roads respectively. There were also coast-roads leading northwards to Smyrna, and southwards to Miletus. By the latter of these it is probable that the Ephesian elders travelled when summoned to meet Paul at the latter city (Acts xx, 17, 18). Part of the pavement of the Sardinian road has been noticed by travellers under the cliffs of Galleus. (See Leake's *Asia Minor*, and *Map*.)

Among the more marked physical features of the peninsula are the two large rivers, Hermus and Mæander, which flow from a remote part of the interior westward to the Archipelago, Smyrna (Rev. ii, 8) being near the mouth of one, and Miletus (Acts xx, 17) of the other. Between the valleys drained by these two rivers is the shorter stream and smaller basin of the Cayster, called by the Turks Kutschuk-Mendere, or the Little Mæander. Its upper level (often called the Caystrian meadows) was closed to the westward by the gorge between Galleus and Pactyas, the latter of these mountains being a prolongation of the range of Messogis, which bounds the valley of the Mæander on the north, the former more remotely connected with the range of Tmolus, which bounds the valley of the Hermus on the south. Beyond the gorge and towards the sea the valley opens out again into an alluvial flat (Herod. ii, 10), with hills rising abruptly from it. The plain is now about 5 miles in breadth, but formerly it must have been smaller, and some of the hills were once probably islands. Here Ephesus stood, partly on the level ground and partly on the hills.

Of the hills, on which a large portion of the city was built, the two most important were Prion and Coressus, the latter on the S. of the plain, and being, in fact, almost a continuation of Pactyas, the former being in front of Coressus and near it, though separated by a deep and definite valley. Further to the N.E. is another conspicuous eminence. It seems to be the hill mentioned by Procopius (*De Edif.* v. i) as one on which a church dedicated to the apostle John was built; and its present name *Agasuluk* is absurdly thought to have reference to him, and to be a corruption of his traditional title *ὁ ἄγιος θεόλογος*. (See generally Cellarii *Notit.* ii, 80.)

4. *Government*.—It is well known that Asia was a proconsular province; and in harmony with this fact we find proconsuls (*ἀνθύπατοι*, A. V. "deputies") specially mentioned (Acts xix, 38). Nor is it necessary to inquire here whether the plural in this passage is generic, or whether the governors of other provinces were present in Ephesus at the time. Again, we learn from Pliny (v, 31) that Ephesus was an assize-town (*forum* or *convantus*); and in the N.-T. narrative (Acts xix, 38) we find the court-days alluded to as actually being held (*ἀγοραῖοι ἀγοραὶ*, A. V. "the law is open") during the uproar; though perhaps it is not absolutely necessary to give the expression this exact reference as to time (see Wordsworth in loc.). Ephesus itself was a "free city," and had its own assemblies and its own magistrates. The senate (*γερουσία*, or *βουλὴ*) is mentioned not only by Strabo, but by Josephus (*Ant.* xiv, 10, 25; xvi, 6, 4 and 7); and Luke, in the narrative before us, speaks of the *ἄμιος* (ver. 30, 33, A. V. "the people") and of its customary assemblies (*ἀνώρω ἐκκλησίαι*, ver. 39, A. V. "a lawful assembly"). That the tumultuary meeting which was gathered on the occasion in question should take place in the theatre

(ver. 29, 31) was nothing extraordinary. It was at a meeting in the theatre at Cæsarea that Agrippa I received his death-stroke (Acts xii, 23), and in Greek cities this was often the place for large assemblies (Tacitus, *Hist.* ii, 80; Val. Max. ii, 2). We even find conspicuous mention made of one of the most important municipal officers of Ephesus, the "town-clerk" (q. v.) (*γραμματεὺς*), or keeper of the records, whom we know from other sources to have been a person of great influence and responsibility. It is remarkable how all these political and religious characteristics of Ephesus, which appear in the sacred narrative, are illustrated by inscriptions and coins. An *ἀρχιεὼν*, or state-paper office, is mentioned on an inscription in Chishull. The *γραμματεὺς* frequently appears; so also the *Ἀσιαρχοὶ* and *ἀνθύπατοι*. Sometimes these words are combined in the same inscription; see, for instance, Böckh, *Corp. Inscr.* 2999, 2994, 2996. The later coins of Ephesus are full of allusions to the worship of Diana in various aspects. The word *πικώροσ* (warden, A. V. "worshipper") is of frequent occurrence. That which is given last below has also the word *ἀνθύπατος* (proconsul, A. V. "deputy"); it exhibits an image of the temple, and bearing as it does the name and head of Nero, it must have been struck about the time of Paul's stay in Ephesus. The one immediately preceding it bears the name (Cusinius) of the acting *γραμματεὺς* ("town-clerk") at the time.

Bronze Coins of Ephesus.

5. *The Asiarchs*.—Public games were connected with the worship of Diana at Ephesus. The month

of May was sacred to her. The uproar mentioned in the Acts very probably took place at this season. Paul was certainly at Ephesus about that time of the year (1 Cor. xvi, 8), and Demetrius might well be peculiarly sensitive if he found his trade failing at the time of greatest concert. However this may be, the Asiarchs (Ἀσιάρχαι, A. V. "chiefs of Asia") were present (Acts xix, 31). These were officers appointed, after the manner of the ædiles at Rome, to preside over the games which were held in different parts of the province of Asia, just as other provinces had their *Galatarchs*, *Lyciarchs*, etc. Various cities would require the presence of these officers in turn. In the account of Polycarp's martyrdom at Smyrna (Hefele, *Pat. Apost.* p. 286) an important part is played by the Asiarch Philip. It is a remarkable proof of the influence which Paul had gained at Ephesus that the asiarchs took his side in the disturbance. See Dr. Wordsworth's note on Acts xix, 31. Comp. ASIARCH.

6. *Religion*.—Conspicuous at the head of the harbor of Ephesus was the great temple of Diana or Artemis, the tutelary divinity of the city. She was worshipped under the name of *Artemis*. There was more than one divinity which went by the name of Artemis, as the Arcadian Artemis, the Taurian Artemis, as well as the Ephesian Artemis. (See Dougl'ty *Analect.* ii, 91; Münter, *Relig. d. Karthag.* p. 53.) Her worship in this instance was said to have originated in an image that fell from heaven (ἑπιπέτεις, Acts xix, 35; comp. Clem. Alex. *Protrep.* p. 14; Wetstein in loc.), and believed to have been an object of reverence from the earliest times (Pliny, xvi, 79). The material of which it was composed is disputed, whether ebony, cedar, or otherwise (see Spanheim, *ad Callim. Dian.* ver. 239). She was represented as many-breasted (πολύμαστορος, *multimania*, see Gronovii *Thesaur.* vii; Zorn, *Bibloth. Antiq.* i, 439 sq.; Creuzer, *Symbol.* ii, 176 sq.), although different explanations are given of her figure in this respect. The following is the description given by Mr. Falkener (*Ephesus*, p. 290, 291) of an antique statue of the Ephesian Diana now in the Naples Museum: "The circle round her head denotes the nimbus of her glory; the griffins inside of which express its brilliancy. In her breast are the twelve signs of the zodiac, of which those seen in front are the ram, bull, twins, crab, and lion; they are divided by the hours. Her necklace is composed of acorns, the primeval food of man. Lions are on her arms to denote her power, and her hands are stretched out to show that she is ready to receive all who come to her. Her body is covered with various beasts and monsters, as sirens, sphinxes, and griffins, to show she is the source of nature, the mother of all things. Her head, hands, and feet are of bronze, while the rest of the statue is of alabaster, to denote the ever-varying light and shade of the moon's figure. . . . Like Rhea, she was crowned with turrets, to denote her dominion over terrestrial objects."

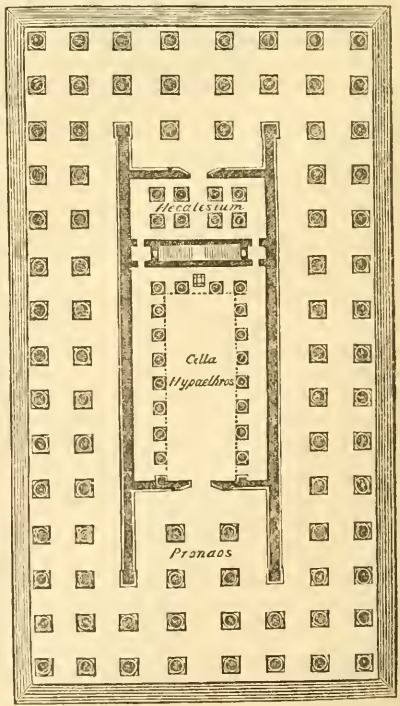

ine strength, ease, and grace, and whose delights were in the pursuits of the chase. See DIANA.

Around the image of the goddess was erected, according to Callimachus (*Hymn. in Dian.* 248), her large and splendid temple. This building was raised (about B.C. 500) on immense substructions, in consequence of the swampy nature of the ground. The earlier temple, which had been begun before the Persian war, was burnt down in the night when Alexander the Great was born (B.C. 355), by an obscure person of the name of Eratostratus, who thus sought to transmit his name to posterity (Strabo, xiv, 640; Plutarch, *Alex.* 3; Solin, 43; Cicero, *De Nat. Deor.* ii, 27); and, as it seemed somewhat unaccountable that the goddess should permit a place which redounded so much to her honor to be thus recklessly destroyed, it was given out that Diana was so engaged with Olympias in aiding to bring Alexander into the world that she had no time nor thought for any other concern. At a subsequent period Alexander made an offer to rebuild the temple, provided he were allowed to inscribe his name on the front, which the Ephesians refused. Aided, however, by the whole of Asia Minor, they succeeded in erecting a still more magnificent temple, which the ancients have lavishly praised and placed among the seven wonders of the world. It took two hundred and twenty years to complete. Pliny (*Hist. Nat.* xxxvi, 21), who has given a description of it, says it was 425 feet in length, 220 broad, and supported by 127 columns, each of which had been contributed by some prince, and were 60 feet high; 36 of them were richly carved. Chersiphron, the architect, presided over the undertaking, and, being ready to lay violent hands on himself in consequence of his difficulties, was restrained by the command of the goddess, who appeared to him during the night, assuring him that she herself had accomplished that which had brought him to despair. The altar was the work of Praxiteles. The famous sculptor Scopas is said by Pliny to have chiselled one of the columns. Apelles, a native of the city, contrib-

Ancient representation of "Diana of the Ephesians."

It will be seen, from the figure given, that this last differed materially from the Diana, sister of Apollo, whose attributes are the bow, the quiver, the girt-up robe, and the hound; whose person is a model of fem-

Plan of the Temple of Diana at Ephesus.

ated a splendid picture of Alexander the Great. The rights of sanctuary, to the extent of a stadium in all directions round the temple, were also conceded, which, in consequence of abuse, the emperor Tiberius abolished. The temple was built of cedar, cypress, white marble, and even gold, with which it glittered (Spanh. *Observat. in Hymn. in Dian. 353*). Costly and magnificent offerings of various kinds were made to the goddess and treasured in the temple, such as paintings, statues, etc., the value of which almost exceeded computation. The fame of the temple, of the goddess, and of the city itself, was spread not only through Asia, but the world, a celebrity which was enhanced and diffused the more readily because sacred games were practised there, which called competitors and spectators from every country. In style, too, this famous structure constituted an epoch in Greek art (Vitruv. iv, 1), since it was here first that the graceful Ionic order was perfected. The magnificence of this sanctuary was a proverb throughout the civilized world (Philo Byz. *Spect. Maud. 7*). All these circumstances give increased force to the architectural allegory in the great epistle which Paul wrote in this place (1 Cor. iii, 9-17), to the passages where imagery of this kind is used in the epistles addressed to Ephesus (Ephes. ii, 19-22; 1 Tim. iii, 15; vi, 19; 2 Tim. ii, 19, 20), and to the words spoken to the Ephesian elders at Miletus (Acts xx, 32). The temple was frequently used for the safe custody of treasure. Of more questionable character was the privilege which, in common with some other Greek temples, it enjoyed of an asylum, within the limits of which criminals were safe from arrest (Strabo, xiv, 641; Plutarch, *De are al. c. 3*; Apollon. *Eph. epist. 65*). By Alexander this asylum was extended to a stadium, and by Mithridates somewhat further; Mark Antony nearly doubled the distance; but the abuses hence arising became so mischievous, that Augustus was compelled to abolish the privilege, or at least restrict it to its ancient boundary. Among his other enormities, Nero is said to have despoiled the temple of Diana of much of its treasure. It continued to conciliate no small portion of respect till it was finally burnt by the Goths in the reign of Gallienus. (See Hirt, *Der Tempel der Diana zu Ephesus*, Berlin, 1809.)

The chief points connected with the uproar at Ephesus in the case of PAUL (Acts xix, 23-41) are mentioned in the articles DIANA and PAUL; but the following details must be added. In consequence of this devotion, the city of Ephesus was called *νεωκόρος* (ver. 35) or "warden" of Diana (see Van Dale, *Dissert.* p. 309; Wolf and Kuinöl, in loc.). This was a recognised title applied in such cases, not only to individuals, but to communities. In the instance of Ephesus, the term is abundantly found both on coins and on inscriptions. Its *neocorate* was, in fact, as the "town-clerk" said, proverbial. Another consequence of the celebrity of Diana's worship at Ephesus was that a large manufactory grew up there of portable shrines (*ναοί*, ver. 24, the *ἀποθήματα* of Dionys. Halicarn. ii, 2, and other writers), which strangers purchased, and devotees carried with them on journeys or set up in their houses. Of the manufacturers engaged in this business, perhaps Alexander the "coppersmith" (ὁ χαλκεύς, 2 Tim. iv, 14) was one. The case of Demetrius the "silversmith" (*ἀργυροποιός* in the Acts) is explicit. He was alarmed for his trade when he saw the Gospel, under the preaching of Paul, gaining ground upon idolatry and superstition, and he spread a panic among the craftsmen of various grades, the *τεχνίται* (ver. 24) or designers, and the *ἐργάται* (v. 25) or common workmen, if this is the distinction between them. (See Schmid, *Templa Demetrii argentei*, Jena, 1695; Wilisch, *Naiōia vet.* Lips. 1716.) See DEMETRIUS.

6. *Magical Arts.*—Among the distinguished natives of Ephesus in the ancient world may be mentioned

Apelles and Parrhasius, rivals in the art of painting, Heraclitus, the man-hating philosopher, Hipponax, a satirical poet, Artemidorus, who wrote a history and description of the earth. The claims of Ephesus, however, to the praise of originality in the prosecution of the liberal arts are but inconsiderable, and it must be content with the dubious reputation of having excelled in the refinements of a voluptuous and artificial civilization. With culture of this kind, a practical belief in and a constant use of those arts which pretend to lay open the secrets of nature, and arm the hand of man with supernatural powers, have generally been found conjoined. Accordingly, the Ephesian multitude were addicted to sorcery; indeed, in the age of Jesus and his apostles, adepts in the occult sciences were numerous: they travelled from country to country, and were found in great numbers in Asia, deceiving the credulous multitude and profiting by their expectations. They were sometimes Jews, who referred their skill and even their forms of proceeding to Solomon, who is still regarded in the East as head or prince of magicians (Josephus, *Ant.* viii, 2, 5; Acts viii, 9; xiii, 6, 8). In Asia Minor Ephesus had a high reputation for magical arts (Ortob, *De Ephes. Libris combustis*, Lips. 1708). This also comes conspicuously into view in Luke's narrative (Acts xix, 11-20). The peculiar character of Paul's miracles (*ἐνθάμεις ὃν τὰς τυχοῖσας*, ver. 11) would seem to have been intended as antagonistic to the prevalent superstition. The books mentioned as being burned by their possessors in consequence of his teaching were doubtless books of magic. How extensively they were in use may be learned from the fact that "the price of them" was "fifty thousand pieces of silver" (more than \$30,000). Very celebrated were the Ephesian letters (*Ἐφέσια γράμματα*), which appear to have been a sort of magical formulæ written on paper or parchment, designed to be fixed as amulets on different parts of the body, such as the hands and the head (Plut. *Sym.* vii; Lake-macher, *Obs. Philol.* ii, 126; Deyling, *Observ.* iii, 355). Erasmus (*Adag. Cent.* ii, 578) says that they were certain signs or marks which rendered their possessor victorious in every thing. Eustathius (*ad Hom. Odys.* x, 634) states an opinion that Ceresus, when on his funeral pile, was very much benefited by the use of them; and that when a Milesian and an Ephesian were wrestling in the Olympic games, the former could gain no advantage, as the latter had Ephesian letters bound round his heel; but, these being discovered and removed, he lost his superiority, and was thrown thirty times. The faith in these mystic syllables continued, more or less, till the sixth century (see the Life of Alexander of Tralles, in Smith's *Dict. of Class. Biog.* s. v.). We should enter on doubtful ground if we were to speculate on the Gnostic and other errors which grew up at Ephesus in the later apostolic age, and which are foretold in the address at Miletus, and indicated in the epistle to the Ephesians, and more distinctly in the epistles to Timothy. See CURIOUS ARTS.

7. *Modern Remains.*—The ruins of Ephesus lie two short days' journey from Smyrna, in proceeding from which towards the south-east the traveller passes the pretty village of Sedekuy; and two hours and a half onwards he comes to the ruined village of Danizzi, on a wide, solitary, uncultivated plain, beyond which several burial-grounds may be observed; near one of these, on an eminence, are the supposed ruins of Ephesus, consisting of shattered walls, in which some pillars, architraves, and fragments of marble have been built. The soil of the plain appears rich. It is covered with a rank, burnt-up vegetation, and is everywhere deserted and solitary, though bordered by picturesque mountains. A few corn-fields are scattered along the site of the ancient city, which is marked by some large masses of shapeless ruins and stone walls. Towards the sea extends the ancient port, a pestilential marsh. Along the slope of the mountain and over

the plain are scattered fragments of masonry and detached ruins, but nothing can now be fixed upon as the great temple of Diana. There are some broken columns and capitals of the Corinthian order of white marble: there are also ruins of a theatre, consisting of some circular seats and numerous arches, supposed to be the one in which Paul was preaching when interrupted by shouts of "Great is Diana of the Ephesians." The ruins of this theatre present a wreck of immense grandeur, and the original must have been of the largest and most imposing dimensions. Its form alone can now be spoken of, for every seat is removed, and the proscenium is a hill of ruins. A splendid circus (Fellows's *Reports*, p. 275) or stadium remains tolerably entire, and there are numerous piles of buildings, seen alike at Pergamus and Troy as well as here, by some called *gymnasia*, by others temples; by others again, with more propriety, palaces. They all came with the Roman conquest. No one but a Roman emperor could have conceived such structures. In Italy they have parallels in Adrian's villa near Tivoli, and perhaps in the pile upon the Palatine. Many other walls remain to show the extent of the buildings of the city, but no inscription or ornament is to be found, cities having been built out of this quarry of worked marble. The ruins of the adjoining town, which arose about four hundred years ago, are entirely composed of materials from Ephesus. There are a few huts within these ruins (about a mile and a half from Ephesus), which still retain the name of the parent city, *Asalük*—a Turkish word, which is associated with the same idea as Ephesus, meaning the City of the Moon (Fellows). A church dedicated to St. John is thought to have stood near, if not on the site of the present mosque. Arundell (*Discoveries*, ii, 253) conjectures that the gate, called the Gate of Persecution, and large masses of brick wall which lie beyond it, are parts of this celebrated church, which was fortified during the great Council of Ephesus. The tomb of St. John was in or under his church, and the Greeks have a tradition of a sacred dust arising every year, on his festival, from the tomb, possessed of miraculous virtues: this dust they term *manna*. Not far from the tomb of St. John was that of Timothy. The tomb of Mary and the seven *παῖδες* (*boys*, as the *Synaecaria* calls the Seven Sleepers) are found in an adjoining hill. At the back of the mosque, on the hill, is the sunk ground-plan of a small church, still much venerated by the Greeks. The sites of two others are shown at *Asalük*. There is also a building, called the Prison of St. Paul, constructed of large stones without cement. The situation of the temple is doubtful, but it probably stood where certain large masses remain on the low ground, full in view of the theatre. The disappearance of the temple may easily be accounted for, partly by the rising of the soil, and partly by the incessant use of its materials for mediæval buildings. Some of its columns are said to be in St. Sophia at Constantinople, and even in the cathedrals of Italy.

Though Ephesus presents few traces of human life, and little but scattered and mutilated remains of its ancient grandeur, yet the environs, diversified as they are with hill and dale, and not scantily supplied with wood and water, present many features of great beauty. Arundell (ii, 241) enumerates a great variety of trees, which he saw in the neighborhood, among which may be specified groves of myrtle near Ephesus. He also found heath in abundance, of two varieties, and saw there the common fern, which he met with in no other part of Asia Minor. Dr. Chandler (p. 150, 4to) gives a striking description of Ephesus, as he found it on his visit in 1764: "Its population consisted of a few Greek peasants, living in extreme wretchedness, dependence, and insensibility, the representatives of an illustrious people, and inhabiting the wreck of their greatness—some the substructure of the glorious edifices which they raised; some beneath the vaults of

the stadium, once the crowded scene of their diversions; and some in the abrupt precipice, in the sepulchres which received their ashes. Such are the present citizens of Ephesus, and such is the condition to which that renowned city has been reduced. It was a ruinous place when the emperor Justinian filled Constantinople with its statues, and raised the church of St. Sophia on its columns. Its streets are obscured and overgrown. A herd of goats was driven to it for shelter from the sun at noon, and a noisy flight of crows from the quarries seemed to insult its silence. We heard the partridge call in the area of the theatre and of the stadium. The pomp of its heathen worship is no longer remembered; and Christianity, which was then nursed by apostles, and fostered by general councils, barely lingers on, in an existence hardly visible." However much the Church at Ephesus may (Rev. ii, 2), in its earliest days, have merited praise for its "works, labor, and patience," yet it appears soon to have "left its first love," and to have received in vain the admonition—"Remember, therefore, from whence thou art fallen, and repent and do the first works; or else I will come unto thee quickly, and will remove thy candlestick out of his place, except thou repent." If any repentance was produced by this solemn warning, its effects were not durable, and the place has long since offered an evidence of the truth of prophecy, and the certainty of the divine threatenings, as well as a melancholy subject for thought to the contemplative Christian. Its fate is that of the once-flourishing seven churches of Asia: its fate is that of the entire country—a garden has become a desert. Busy centres of civilization, spots where the refinements and delights of the age were collected, are now a prey to silence, destruction, and death. Consecrated first of all to the purposes of idolatry, Ephesus next had Christian temples almost rivalling the pagan in splendor, wherein the image of the great Diana lay prostrate before the cross; and, after the lapse of some centuries, Jesus gave place to Mohammed, and the crescent glittered on the dome of the recently-Christian church. A few more scores of years, and Ephesus had neither temple, cross, crescent, nor city, but was "a desolation, a dry land, and a wilderness." Even the sea has retired from the scene of devastation, and a pestilential morass, covered with mud and rushes, has succeeded to the waters which brought up ships laden with merchandise from every part of the known world. (See Herod. i, 26; ii, 148; Livy, i, 45; Pausanias, vii, 2, 4; Philo Byz. *de 7 Orb. Mirac.*; Creuzer, *Symbol.* ii, 13; Hassel, *Erdteschr.* ii, 132.)—Smith, s. v.; Kitto, s. v.; Fairbairn, s. v.

7. *Literature.*—The site of ancient Ephesus has been visited and examined by many travellers during the last 200 years, and descriptions, more or less copious, have been given by Pococke, Tournefort, Spon and Wheler, Chandler, Ponsjoulat, Prokesch, Beaujour, Schubert, Arundell (*Seven Churches*, Lond. 1828, p. 26), Fellows (*Asia Minor*, Lond. 1839, p. 274), and Hamilton. The fullest accounts are, among the older travellers, in Chandler (*Travels*, Oxford, 1755, p. 131), and among the more recent, in Hamilton (*Researches*, Lond. 1842, ii, 22). Some views are given in the second volume of the *Ionian Antiquities*, published by the Dilettanti Society. Leake, in his *Asia Minor* (Lond. 1824, p. 258, 346), has a discussion on the dimensions and style of the temple. In Kiepert's *Hellas* is a map, more or less conjectural, the substance of which will be found in Smith's *Dict. of Class. Geog.* s. v. Ephesus. The latest and most complete work is Falkener's *Ephesus and the Temple of Diana* (London, 1862, 8vo). A railway now renders Ephesus accessible from Smyrna (Pressensé, *Land of Gospel*, p. 215). To the works above referred to must be added Perry, *De rebus Ephesiorum* (Gött. 1837), a slight sketch; Guhl, *Ephesiaca* (Berl. 1843), a very elaborate work, although his plans are mostly from Kiepert; Heimsen's *Paulus* (Gött.

1830), which contains a good chapter on Ephesus; Biscoe, *On the Acts* (Oxf. 1829), p. 274-285; Mr. Akerman's paper on the Coins of Ephesus in the *Trans. of the Numismatic Soc.* 1841; Gronovius, *Antiq. Græc.* vii, 387-401; and an article by Ampère in the *Rev. des Deux Mondes* for Jan. 1842. Other monographs are Anon. *Acta Pauli cum Ephesibus* (Helmst. 1768); Æpinus, *De duplici bapt. discip. Ephesinor.* (Aitorf, 1719); Benner, *De bapt. Ephesiorum in nomine Christi* (Giesl. 1733); Bircherode, *De cultu Diavæ Ephes.* (Hafn. 1723); Conrad, *Acta Pauli Ephes.* (Jena, 1710); Deyling, *De tumultu a Demetrio* (in his *Obs. sacr.* iii, 362 sq.); Lederlin, *De templis Diavæ Ephesiorum* (Argent. 1714); Schurzleish, *De literis Ephesior.* (Viteb. 1698); Siber, *De πνευματικῇ Ephesiorum* (Viteb. 1685); Wallen, *Acta Pauli Ephes.* (Gryph. 1783); Stieckel, *De Ephesibus literis lingue Semitice vindicandis* (Jen. 1860). See EPHESIANS, EPISTLE TO.

EPHESUS, GENERAL COUNCIL OF. The third œcumenical council, convoked by the emperor Theodosius II, was held at Ephesus in 431, upon the controversy raised by Nestorius, bishop of Constantinople, who objected to the application of the title of Θεοτόκος to the Virgin Mary. For the circumstances which led to the convocation of this council, see the articles NESTORIUS, NESTORIANS, PELAGIUS. Celestine, the pope, not seeing fit to attend in person, sent three legates, Arcadius and Projectus, bishops, and Philip, a priest. Among the first who arrived at the council was Nestorius, with a numerous body of followers, and accompanied by Irenæus, a nobleman, his friend and protector. Cyril of Alexandria also, and Juvenal of Jerusalem came, accompanied by about fifty of the Egyptian bishops; Memnon of Ephesus had brought together about forty of the bishops within his jurisdiction; and altogether more than two hundred bishops were present. Candidianus, the commander of the forces in Ephesus, attended, by order of the emperor, to keep peace and order; but by his conduct he greatly favored the party of Nestorius. The day appointed for the opening of the council was June 7th; but John of Antioch, and the other bishops from Syria and the East not having arrived, it was delayed till the 22d of the same month. At the first session of the council (June 22), before the Greek and Syrian bishops had arrived, Cyril and the bishops present condemned the doctrines of Nestorius, and deposed and excommunicated him. This sentence was signed by one hundred and ninety-eight bishops, according to Tillemont, and by more than two hundred according to Fleury; it was immediately made known to Nestorius, and published in the public places. At the same time, notice of it was sent to the clergy and people of Constantinople, with a recommendation to them to secure the property of the Church for the successor of the deposed Nestorius. As soon, however, as Nestorius had received notice of this sentence, he protested against it, and all that had passed at the council, and forwarded to the emperor an account of what had been done, setting forth that Cyril and Memnon, refusing to wait for John and the other bishops, had hurried matters on in a tumultuous and irregular way. On the 27th of June twenty-seven Syrian bishops arrived, chose John of Antioch for their president, and deposed Cyril in their turn. In August, count John, who had been sent by Theodosius, arrived at Ephesus, and directed the bishops of both synods to meet him on the following day. Accordingly, John of Antioch and Nestorius attended with their party, and Cyril with the orthodox; but immediately a dispute arose between them, the latter contending that Nestorius should not be present, while the former wished to exclude Cyril. Upon this, the count, to quiet the dispute, gave both Cyril and Nestorius into custody, and then endeavored, but in vain, to reconcile the two parties. And thus matters seemed as far from a settlement as ever. The emperor at last permitted the fathers of the council to

send to him eight deputies, while the Orientals or Syrians, on their part, sent as many. The place of meeting was Chalcedon, whither the emperor proceeded, and spent five days in listening to the arguments on both sides; and here the Council of Ephesus may, in fact, be said to have terminated. Nothing is known of what passed at Chalcedon, but the event shows that Theodosius sided with the Catholics, since upon his return to Constantinople he ordered, by a letter, the Catholic deputies to come there, and to proceed to consecrate a bishop in the place of Nestorius, whom he had already ordered to leave Ephesus, and to confine himself to his monastery near Antioch. Afterwards he directed that all the bishops at the council, including Cyril and Memnon, should return to their respective dioceses. The judgment of this council was at once approved by the whole Western Church, and by far the greater part of the East, and was subsequently confirmed by the (œcumenical Council of Chalcedon, consisting of six hundred and thirty bishops. Even John of Antioch and the Eastern bishops very soon acknowledged it. But Nestorius protested to the last that he did not hold the heretical opinions anathematized by the council. See NESTORIUS.

Of the other councils of Ephesus, the following are all that need be mentioned: 1, in 245 (?), against the Patropassian Noetus; 2, in 400, under Chrysostom, where Heraclidus was consecrated bishop of Ephesus, and six simoniacal bishops deposed; and the ROMAN COUNCIL (see next article).—Landon, *Manual of Councils*, p. 235; Mansi, *Conc.* iv, 1212, 1320, et al.; Gieseler, *Ch. History*, § 88; Neander, *Church Hist.* ii, 468 sq.; Murd. Mosheim, *Church Hist.* i, 358; Palmer, *On the Church*, i, 385 sq.; Cunningham, *Historical Theology*, i, 328 sq.; Hefele, *Concilien-geschichte*, ii, 161 sq.; Smith, *Tables of Church History; Christian Examiner*, liv, 49.

EPHESUS, ROBER COUNCIL OF (σίνωδος λυστροική, *lutrocinium Ephesinum*), the so-called second general council at Ephesus, A. D. 449. Eutyches (q. v.), whom Flavianus, bishop of Constantinople, had in the preceding year deposed on account of heretical opinions, appealed to a general council, at which the patriarchs of Rome, Alexandria, Jerusalem, Thessalonica, and other heads of the Church should be present, and prevailed upon the emperor to convoke the council immediately. Theodosius wrote to Dioscorus, bishop of Alexandria, desiring him to attend at Ephesus on the 1st of August, with ten metropolitan and as many Egyptian bishops, and no more, in order to inquire into a question of faith in dispute between Flavianus and Eutyches, and to remove from the Church the favorers of Nestorius. In the same manner he wrote to other bishops, always fixing the same number of metropolitans and bishops, and especially forbidding Theodoret to leave his diocese. He sent his own officers, Elpidus and Eulogius, with authority to provide such troops as they might deem necessary, in order to carry into effect what might be required. The bishops who had sat in judgment upon Eutyches at the council held by Flavianus at Constantinople in 448 were present at the council, but were allowed to take no part in the debates, and Dioscorus was allowed to take the lead in everything relating to the council. The council met August 8, and about 130 bishops attended. Dioscorus and his party ruled throughout; Eutyches was declared orthodox, and re-established in his priesthood and office of abbot; and sentence of deposition was pronounced upon Flavianus. Flavianus appealed from this decision to the bishop of Rome, whose legate, Hilary, boldly opposed the sentence; at the same time many of the bishops on their knees implored Dioscorus to reconsider the matter; but he, determined to carry it through, cried out for the imperial officers, upon which the proconsul Proclus entered, followed by a band of soldiers, armed with swords and sticks, and carrying chains, who by threats and blows

compelled the bishops to sign the sentence of deposition. This, at last, ninety-six of them did, many, however, being first severely wounded; Flavianus himself was treated with such excessive violence that he died of the injuries he had received within three days: it is said that Dioscorus jumped upon him as he lay upon the ground, and that Barsumas and the monks kicked him with the utmost brutality. To the condemnation of Flavianus that of Eusebius of Dorylaeum was added, which ended the first session; after which the legate Hilary, dreading fresh scenes of violence, fled secretly to Rome. In the following sessions Theodoret of Tyre was deposed, also Domnus of Antioch and Ibas of Edessa; after which Dioscorus departed, and the bishops withdrew from Ephesus. Thus ended the *σύνodus Ἀφροασική*, as the Greeks justly named this disgraceful assembly, in which violence and injustice were carried on to the utmost excess.—Landon, *Manual of Councils*, p. 236; Mansi, *Concil.* vi, 588 et al.; Neander, *Ch. Hist.* ii, 509 sq.; Gieseler, *Ch. **Eph'al** (Heb. *Eph'al*, עֵפְאֵל, *judicator*; Sept. Ὀφλάδ v. r. Ἀφαμίη, Vulg. *Ophalad*), son of Zabab and father of Obad, of the lineage of Sheshan, of Judah (1 Chron. ii, 37). B.C. post 1618.

**E'phod** (Heb. *Ephod*, עֵפֹד, an *ephod* [q. v.]; Sept. Ὀφείδ v. r. Σουφί, Vulg. *Ephod*), the father of Hanniel, which latter, as head of the tribe of Manasseh, was one of the men appointed to assist Joshua and Eleazar in the apportionment of the land of Canaan (Num. xxxiv, 23). B.C. ante 1618.

**Ephod** (עֵפֹד [rarely עֵפֹד], *ephod*, twice [Exod. xxviii, 8; xxxix, 5] in the fem. עֵפֹדָה, *ephuddah*, something *girt*; ἐπωμίς, *Eclus.* xlv, 8), a sacred vestment originally appropriate to the high-priest (Exod. xxviii, 4), but afterwards worn by ordinary priests (1 Sam. xxii, 18), and deemed characteristic of the office (1 Sam. ii, 28; xiv, 3; Hos. iii, 4). A kind of ephod was worn by Samuel (1 Sam. ii, 18), and by David when he brought the ark to Jerusalem (2 Sam. vi, 14; 1 Chron. xv, 27); it differed from the priestly ephod in material, being made of ordinary linen (רְבֵשֶׁת), whereas the other was of fine linen (שָׂרָב); it is noticeable that the Sept. does not give ἐπωμίς or Ἐφοῦδ in the passages last quoted, but terms of more general import, *στολή ἔξωλλος, στολή βρασίην*. Attached to the ephod of the high-priest was the breast-plate with the Urim and Thummim; this was the ephod by eminence, which Abiathar carried off (1 Sam. xxiii, 6) from the tabernacle at Nob (1 Sam. xxi, 9), and which David consulted (1 Sam. xxiii, 9; xxx, 7). The importance of the ephod as the receptacle of the breast-plate led to its adoption in the idolatrous forms of worship instituted in the time of the judges (Judg. viii, 27; xvii, 5; xviii, 14 sq.). The amount of gold used by Gideon in making his ephod (Judg. viii, 26) has led Gesenius (*Thesaur.* p. 135), after Vatke (*Bibl. Theol.* i, 267), following the Peshito version, to give the word the meaning of an idol-image, as though that, and not the priest, was clothed with the ephod: but there is no evidence that the idol was so invested, nor does such an idea harmonize with the general use of the ephod. Idols of wood were often thus overlaid with plates of gold or silver, and are probably alluded to in Judg. xvii, 5; xviii, 17-20; Hos. iii, 4; Isa. xxx, 22. The ephod itself, however, would require a considerable amount of gold (Exod. xxviii, 6 sq.; xxxix, 2 sq.), but certainly not so large a sum as is stated to have been used by Gideon; may we not therefore assume that to *make an ephod* implied the introduction of a new system of

worship with its various accessories, such as the gilded image, which seems, from the prominence assign-

The Sacerdotal Ephod, according to Braun (*De vest. sacerdot.* ii, 475).

A. Front view; B. the back, similar, but without the straps, clasps, or space for the pectoral: together they constituted the two folds or leaves (עֵפֹדָה) of which it was composed, united over the shoulders.

a, a. The two slender-pieces (פְּתִילֵי) .

b, b. The belt (חֲבִילֵי), or two bands for girding it on.

c, c. The two golden rings (טְּבִיטֵי) for fastening the bottom of the breastplate.

d, d. The two bezels or settings (מְשִׁבֵּי) (A. V. "ouches"), each with its memorial gem (שֹׁהַם, "onyx stone") engraved with six of the tribal names; serving also as clasps or buttons for fastening the shoulder-pieces together, and likewise as attachments for the gold chains on the upper corners of the breast-plate.

e. The vacant space, a span wide (τὸ διακείμενον περιτμήματα σπιθαμῆς), left for the insertion of the gemmed breast-plate, according to Josephus (*Ant.* iii, 7, 5).

ed to it in Judg. xviii, 31, to represent the Urim and Thummin, the molten image, and the Teraphim (xvii, 4, 5), and would require a large consumption of metal? The ephod was worn over the tunic and outer garment or pallium (Exod. xxviii, 31; xxix, 5), without sleeves, and divided below the armpits into two parts or halves, of which one was in front, covering the breast and belly, and the other behind, covering the back. These were joined above on the shoulders by clasps or buckles of gold and precious stones, and reached down to the middle of the thighs; they were also made fast by a belt around the body (Exod. xviii, 6-12). The ancient Egyptian priests appear to have been arrayed in white garments of the same materials. The *hierogrammat*, or sacred scribe, especially wore, over the kelt or apron (corresponding to the Jewish sacerdotal "breeches" or drawers) which constituted the universal nether undergarment, a loose upper robe with full sleeves, which in all cases was of the finest linen, and was secured by a girdle round the loins. Sometimes a priest who offered incense was clad in like manner. At other times the priests wore, in addition to the apron, a shirt with short tight sleeves, over which was thrown a loose robe, leaving the right arm exposed (Wilkinson, *Ancient Egypt*, i, 334). See HIGH-PRIEST.

Ancient Egyptian Tunic. One of the two obtained by Gen. Reyner, when in Egypt with the French expedition, from the Arabs at Sakkarah, who said they had found them in a hole filled with sand. This is three feet square, shaped exactly like a modern shirt, but having patches of embroidery sewed upon the arms, shoulders, down the neck, and on the corners. The material is probably linen. The seams are covered with edging, the sleeves are bound, and the hole for the neck has strings for drawing it closer (*Egyptian Antiq.*, ii, 119). Its resemblance to the Jewish ephod is very striking, especially if, as Josephus says (*ut sup.*), the latter had sleeves.

Ancient Egyptian sacred Coat.

Eph'phatha (ἑφφαθά, a Græcized form of the Syro-Chaldee imperative ܦܦܗܐ or ܦܦܗܝܢ, strictly ܦܦܗܝܢܐ, meaning *be opened*, as it is immediately interpreted), an exclamation uttered by Christ in curing the deaf-mute (Mark vii, 34).

**Ephraem Manuscript** (CODEX EPHRAEMI, usually designated as C. of the New Test.), a very important uncial palimpsest, which derives its name from having been (about the 12th century) rewritten over with a portion of the Greek works of Ephraem the Syrian (q. v.). It seems to have been brought from the East by Andrew John Lascar, at whose death (A. D. 1535) it passed into the hands of cardinal Nicolas Ridolfi, and thence, through Pietro Strozzi, into the possession of Catharine de Medici, who deposited it in the Royal Library at Paris, where it still remains (numbered MS. 9). The old Greek writing, which is barely legible (having been partly effaced to make room for the later matter) contains portions of the Sept. version of the O. T. on 64 leaves, and fragments (enumerated in Scrivener's *Introduct.* p. 94 note) of every part of the N. T. on 145 leaves. It is elegantly written, very much resembling in form and arrangement of the books and general appearance the Codex Alexandrinus, and has but one column on a page, consisting of 40 to 46 lines. The characters vary in size, are somewhat elaborate, and have the characteristics of the Alexandrian recension, and of the 5th century. The Ammonian sections stand in the margin, but not the Eusebian canons; the latter, perhaps, having been washed out, as they were usually in red ink. There are no chapter divisions, and but few punctuation marks. Traces of at least three later correctors may be discovered; the first, perhaps of the 6th century, inserted many accents, and the *rough breathing*; by him or the third hand (whose changes are but few), small crosses were interpolated as stops; the second reviser, not earlier than the 9th century, appears to have clumsily added the ecclesiastical notes in the margin. A chemical preparation, applied to the MS. at the instance of Fleck in 1834, though it revived much that was before illegible, has defaced the vellum with stains of various color. The older writing was first noticed by Peter Allix nearly two centuries ago; various readings extracted from it were communicated by Boivin to Kuster, who published them in his edition of Mill's N. T., 1711. A complete collation of the N. T. portion was first made by Wetstein in 1716, for

Specimen of the *Codex Ephraemi*, containing 1 Tim. iii, 15, 16 (with the *anthesis*) | Καὶ οὐλοῦσθε ἄλλα ἅπαντα τὰ ἐπιτελεσθέντα ἐν ἁμαρτίᾳ, ἐδικαίωθ' ἐν πίστι; | the later passage from Ephraem Syrus written over it is τοῦ τῆν Ἀνοβίη τῶν ἐξ ἁμαρτημάτων ἑστῶτα ὅλα ὄντα μετὰ | τῆν γυναικῶν ἡμαρτοῦ.

Bentley's projected edition, and used by Wetstein in his own Greek Test. of 1751-2. In 1843 Tischendorf published the N.-T. part fully, and the O. T. in 1845, in a splendid and accurate form, page for page and line for line, in capital but not fac-simile letters, with valuable prolegomena, etc.—Tregelles, in *Horne's Introd.* iv, 166 sq.; *Christian Remembrancer*, Oct. 1862; Tischendorf, *Nor. Test. Gr.* 7th edit. p. cxlix sq. See MANUSCRIPTS, BIBLICAL.

**E'phraim** (Heb. *Ephra' yim*, עֲפְרַיִם, a dual form; Gesenius suggests = *twinn-land*; Fürst derives from a sing. עֲפְרַיִם = עֲפְרַיִם, *fruitful*; Sept. Ἐφραϊμ), the name of a man (including the tribe and tract named from him, with other kindred objects), and of one or two other places. Our account of them is in a large measure compiled from the articles in Kitto and Smith.

1. (Josephus Græcizes Ἐφραϊμης, *Ant.* ii, 7, 4.) The second son of Joseph by Asenath, the daughter of Potipherah (Gen. xlvii, 20), born during the seven years of plenteousness (B.C. cir. 1878), and an allusion to this is possibly latent in the name, though it may also allude to Joseph's increasing family: "The name of the second he called Ephraim (i. e. double fruitfulness), for God hath caused me to be fruitful (עֲפְרַיִם, *hiphrami*) in the land of my affliction" (Gen. xli, 52). Josephus (*Ant.* ii, 6, 1) gives the derivation of the name somewhat differently—"Restorer, because he was restored to the freedom of his forefathers" (ἀπο-ἰκούσας . . . ἐν τῷ ἀποδοθῆναι). The first incident in his history, as well as that of his elder brother Manasseh, is the blessing of the grandchildren by Jacob, Gen. xlviii—a passage on the age and genuineness of which the severest criticism has cast no doubt (Tuch, *Genesis*, p. 548; Ewald, *Gesch. Isr.* i, 534, note). Like his own father, on an occasion not dissimilar, Jacob's eyes were dim so that he could not see (xlviii, 10; comp. xxvii, 1). The intention of Joseph was evidently that the right hand of Jacob should convey its ampler blessing to the head of Manasseh, his first-born, and he had so arranged the young men. But the result was otherwise ordained. Jacob had been himself a younger brother, and his words show plainly that he had not forgotten this, and that his sympathies were still with the younger of his two grandchildren. He recalls the time when he was flying with the birthright from the vengeance of Esau; the day when, still a wanderer, God Almighty had appeared to him at "Luz in the land of Canaan," and blessed him in words which foreshadowed the name of Ephraim ("I will make thee fruitful," עֲפְרַיִם, *ma-phreka*, Gen. xlviii, 4; "Be thou fruitful," עֲפְרַיִם, *pe-reh*, xxxv, 11; both from the same root as the name *Ephraim*); the still later day when the name of Ephrath (comp. Ewald, *Gesch.* i, 493, n.) became bound up with the sorest trial of his life (xlviii, 7; xxxv, 16). See EPHRAIMITE. Thus, notwithstanding the prearrangement and the remonstrance of Joseph, for the second time in that family, the younger brother was made greater than the elder—Ephraim was set before Manasseh (xlviii, 19, 20). Ephraim would appear at that time to have been about twenty-one years old (comp. Gen. xlvii, 28). Before Joseph's death Ephraim's family had reached the third generation (Gen. i, 23), and it may have been about this time that the affray mentioned in 1 Chron. vii, 21, occurred, when some of the sons were killed on a plundering expedition along the sea-coast to rob the cattle of the men of Gath, and when Ephraim named a son Beriah, to perpetuate the memory of the disaster which had fallen on his house. See BERIAH. Obscure as is the interpretation of this fragment, it enables us to catch our last glimpse of the patriarch, mourning inconsolable in the midst of the circle of his brethren, and at last commemorating his loss in the name of the new child, who, unknown to him, was to be the progenitor

of the most illustrious of all his descendants—Joshua, or Joshua, the son of Nun (1 Chron. vii, 27; see Ewald, i, 491). To this early period, too, has been referred the circumstance alluded to in Psa. lxxxviii, 9, when the "children of Ephraim, armed bowmen (עֲפְרַיִם יְהוּדָה, A. V. "being armed [and] carrying bows," which Gesenius and others support, from the Sept. and Vulg.; although Ewald strikingly renders "carrying slack bows"), turned back in the day of battle." Others, however, assign this defection to the failure of the tribe (in common with the rest of the Israelites) to expel the Canaanites (Judg. i, 29).

1. **TRIBE OF EPHRAIM.** This tribe, although, in accordance with the ancient laws of primogeniture, inferior, as being the junior, yet received precedence over that descended from the elder Manasseh by virtue of the blessing of Jacob (Gen. xli, 52; xlviii, 1). That blessing was an adoptive act, whereby Ephraim and his brother Manasseh were counted as sons of Jacob, in the place of their father; the object being to give to Joseph, through his sons, a double portion in the brilliant prospects of his house. Thus the descendants of Joseph formed *two* of the tribes of Israel, whereas every other of Jacob's sons counted but as one. There were thus, in fact, thirteen tribes of Israel; but the number twelve is usually preserved, either by excluding that of Levi (which had no territory) when Ephraim and Manasseh are separately named, or by counting these two together as the tribe of Joseph when Levi is included in the account. The intentions of Jacob were fulfilled, and Ephraim and Manasseh were counted as tribes of Israel at the departure from Egypt, and, as such, shared in the territorial distribution of the Promised Land (Num. i, 33; Josh. xvii, 14; 1 Chron. vii, 20). The precise position of the immediate descendants of Joseph in Egypt might form an interesting subject for speculation. Being the sons of one in eminent place, and through their mother connected with high families in Egypt, their condition could not at once have been identified with that of the sojourners in Goshen; and perhaps they were not fully amalgamated with the rest of their countrymen until that king arose who knew not Joseph.

The numbers of the tribe did not at all times correspond with the promise of the blessing of Jacob. At the census in the wilderness of Sinai (Num. i, 32, 33; ii, 19) its numbers were 40,500, placing it at the head of the children of Rachel—Manasseh's number being 32,200, and Benjamin's 35,400. But forty years later, on the eve of the conquest (Num. xxvi, 37), without any apparent cause, while Manasseh had advanced to 52,700, and Benjamin to 45,600, Ephraim had decreased to 32,500, the only smaller number being that of Simeon, 22,200. At this period the families of both the brother tribes are enumerated, and Manasseh has precedence over Ephraim in order of mention. It is very possible that these great fluctuations in number may, in part at least, have been owing to the various standards under which the "mixed multitude" (מִצְרַיִם), i. e. mongrel population of semi-Hebrew Egyptians that followed the emigrating host (Exod. xii, 38), ranged itself in its fickleness at different times (*Meth. Quart. Rev.* April, 1863, p. 305 sq.). During the march through the wilderness the position of the sons of Joseph and Benjamin was on the west side of the tabernacle (Num. ii, 18-24), and the prince of Ephraim was Elishama, the son of Ammihud (Num. i, 10).

It is at the time of the sending of the spies that we are first introduced to the great hero to whom the tribe owed much of its subsequent greatness. The representative of Ephraim on this occasion was "Oshea, the son of Nun," whose name was at the termination of the affair changed by Moses to the more distinguished form in which it is familiar to us. As among the founders of the nation Abram had acquired the name of Abraham, and Jacob of Israel, so Oshea, "help,"

Map of the Tribe of Ephraim.

became Jehoshua or Joshua, "the help of Jehovah" (Ewald, ii, 306).

According to the arrangement of the records of the book of Joshua—the "Domesday book of Palestine"—the two great tribes of Judah and Joseph (Ephraim and Manasseh) first took their inheritance; and after them the seven other tribes entered on theirs (Josh. xv, xvi, xvii, xviii, 5). The boundaries of the portion of Ephraim are given in xvi, 1-10, and a part of it apparently in duplicate in ver. 5, 7. The south boundary was coincident for part of its length with the north boundary of Benjamin (q. v.), which latter, however, is somewhat more exactly stated in Josh. xviii, 12 sq. See TRIBE. Commencing at the Jordan, at the reach opposite Jericho (strictly *Jordan of Jericho*, בְּרֵיחַ יְרִיחוֹ, an expression that would lead us to locate the boundary at the point nearest that city, did not the necessity of including within Benjamin certain other pretty well identified places compel us to carry it somewhat farther up the river), it ran to the "water of Jericho," probably the vicinity of the Ras el-Ain; thence by one of the ravines, perhaps the wady Samieh, it ascended through the wilderness—*Miabar*, the uncultivated waste hills—to Mount Bethel and Luz; and thence by Ataroth, "the Japhletite," Bethoron the lower, and Gezer—places two of which are known—along the northern boundary of Dan (q. v.) to the Mediterranean, probably about Joppa. This agrees with the enumeration in 1 Chron. vii, in which Bethel is given as the eastern, and Gezer—somewhere east of the present Ramleh—as the western limit. In Josh. xvi, 6, 8, we apparently have fragments of the northern boundary (compare xvii, 10), and as at least three of the points along that line (Asher, Tappuah, and Janohah) are pretty well identified (see each name), we are tolerably safe in fixing the eastern extremity on the Jordan at about the mouth of wady Fasail, and the western, or the torrent Kanah, at the modern Nahr Falaik, north of Apollonia. But it is

possible that there never was a very definite subdivision of the territory assigned to the two brother tribes. Such an inference, at least, may be drawn from Josh. xvii, 14-18, in which the two are represented as complaining that only one portion had been allotted to them. Among the towns named as Manasseh's were Bethshean in the Jordan valley, Endor on the slopes of the "Little Hermon," Taanach on the north side of Carmel, and Dor on the sea-coast south of the same mountain. Ephraim thus occupied the very centre of Palestine, embracing an area about 40 miles in length from E. to W., and from 6 to 25 in breadth from N. to S. It extended from the Mediterranean on the W. to the Jordan on the E.: on the N. it had the half-tribe of Manasseh, and on the S. Benjamin and Dan (Josh. xvi, 5 sq.; xvii, 7 sq.). This fine country included most of what was afterwards called Samaria, as distinguished from Judaea on the one hand, and from Galilee on the other. See SAMARIA.

The following is a list of all the Biblical localities within this tribe, with the probable sites; those not identified by any modern traveller are inclosed in brackets:

Antipatris.	Town.	<i>Kefr-Saba</i> .
Archi.	do.	[ <i>Kefr-Muss</i> ]?
Arumah.	do.	<i>El-Ormah</i> .
Ataroth (-addar).	do.	<i>Atara</i> .
Baal-hamon.	Vineyard.	[S. E. of Jenin]?
Baal-shalisha.	Town.	See SHALISHA.
Bah-horon.	do.	<i>Beit-T'</i> .
Bechim.	Altar Stone.	[ <i>Kharbet-Joradeh</i> ]?
Elal.	Mount.	[ <i>Jebel Sitti-S'hamiyeh</i> ]
Gaash.	do.	[Sepulchral Hill S. of Tihel]?
Gezer.	Town.	See GEZER.
Gerizim.	Mount.	<i>Jebel At-Tur</i> .
Gezer.	Town.	<i>Abi Shushch</i> .
Gibeah.	do.	<i>Kharbet-Jibia</i> ?
Gilgal (2 Kings ii, 2).	do.	<i>Jifilia</i> .
Gilgal (Josh. xii, 23).	do.	<i>Jifulyeh</i> .
Goh.	do.	See GEZER.
Jacob's Well.	Well.	<i>Bir-Yakub</i> .
Janohah.	Town.	<i>Yanou</i> .

Japhleti.	Village.	[ <i>Beit Unia</i> ]?
Jeshamah.	Town.	[ <i>Ain-Simā</i> ]?
Kanah.	Brook.	<i>Nahr Fulaik</i> ?
Lasharon.	Plain.	See SHARON.
Lebanah.	Plain.	<i>Lubban</i> .
Luz.	do.	[N. of Beitin]?
Micmethah.	do.	[On Wady Bidar]?
Moreh.	Hill.	[S. spur of Jebel Duhy]?
Pirathon.	Town.	<i>Perata</i> .
Salim.	do.	<i>Sheikh Salim</i> .
Samaria.	do.	<i>Sebustiyeh</i> .
Saron.	Region.	See SHARON.
Shalem.	Town.	<i>Salim</i> .
Shalisha.	Region.	[ <i>Kharbet Hatta</i> ].
Sharon.	do.	N. part maritime plain.
Shechem.	Town.	<i>Nablus</i> .
Shiloh.	do.	<i>Seilan</i> .
Sychem or Sychar.	do.	See SHECHEM.
Tappuah.	do.	' <i>Atāf</i> ?
Thebez.	do.	<i>Tubas</i> .
Tinnath (-heres or) -serah.)	do.	<i>Tibneh</i> .
Tipsah.	do.	[ <i>Asira</i> ]?
Tirzah.	do.	<i>Telusā</i> .
Uzzan-serah.	do.	[ <i>Suffa</i> ]?
Zalmon.	Mount.	[ <i>Jebel Sleiman</i> ].

Central Palestine consists of an elevated district which rises from the flat ranges of the wilderness on the south of Judah, and terminates on the north with the slopes which descend into the great plain of Esdraelon. On the west a flat strip separates it from the sea, and on the east another flat strip forms the valley of the Jordan. Of this district the northern half was occupied by the great tribe we are now considering. This was the *Har-Ephraim*, or "Mount Ephraim," a district which seems to extend as far south as Ramah and Bethel (1 Sam. i, 1; vii, 17; 2 Chron. xiii, 4, 19, compared with xv, 8), places but a few miles north of Jerusalem, and within the limits of Benjamin. (See below.) In structure it is limestone—rounded hills separated by valleys of denudation, but much less regular and monotonous than the part more to the south, about and below Jerusalem: with "wide plains in the heart of the mountains, streams of running water, and continuous tracts of vegetation" (Stanley, *Pal. st.*, p. 225). All travellers bear testimony to the "general growing richness" and beauty of the country in going northwards from Jerusalem, the "innumerable fountains" and streamlets, the villages more thickly scattered than anywhere in the south, the continuous corn-fields and orchards, the moist, vapory atmosphere (Martineau, p. 516, 521; Van de Velde, i, 386-8). These are the "precious things of the earth, and the fulness thereof," which are invoked on the "ten thousands of Ephraim" and the "thousands of Manasseh" in the blessing of Moses. These it is which, while Dan, Judah, and Benjamin are personified as lions and wolves, making their lair and tearing their prey among the barren rocks of the south, suggested to the lawgiver, as they had done to the patriarch before him, the patient "bullock" and the "bough by the spring, whose branches ran over the wall" as fitter images for Ephraim (Gen. xlix, 22; Deut. xxxiii, 17). And centuries after, when its great disaster had fallen on the kingdom of Israel, the same images recur to the prophets. The "flowers" are still there in the "olive valleys," "faded" though they be (Isa. xxxviii, 1). The vine is an empty, unprofitable vine, whose very abundance is evil (Hos. x, 1); Ephraim is still the "bullock," now "unaccustomed to the yoke," but waiting a restoration to the "pleasant places" of his former "pasture" (Jer. xxxi, 18; Hos. ix, 13; iv, 16)—"the heifer that is taught and loveth to tread out the corn," the heifer with the "beautiful neck" (Hos. x, 11), or the "kine of Bashan on the mountain of Samaria" (Amos iv, 1).

The wealth of their possession had not the same immediately enervating effect on this tribe that it had on some of its northern brethren, e. g. Asher (j. v.). Various causes may have helped to avert this evil. 1. The central situation of Ephraim in the highway of all communications from one part of the country to

another. From north to south, from Jordan to the Sea—from Galilee, or still more distant Damascus, to Philistia and Egypt—these roads all lay more or less through Ephraim, and the constant traffic along them must have always tended to keep the district from sinking into stagnation. 2. The position of Shechem, the original settlement of Jacob, with his well and his "parcel of ground," with the two sacred mountains of Ebal and Gerizim, the scene of the impressive and significant ceremonial of blessing and cursing; and the tomb and patrimony of Joshua, the great hero not only of Ephraim, but of the nation—the fact that all these localities were deep in the heart of the tribe, must have made it always the resort of large numbers from all parts of the country—of larger numbers than any other place, until the establishment of Jerusalem by David. Moreover, the tabernacle and the ark were deposited within its limits, at Shiloh; and the possession of the sacerdotal establishment, which was a central object of attraction to all the other tribes, must, in no small degree, have enhanced its importance, and increased its wealth and population. It is, perhaps, to this fact that David alludes in Psa. cxxxii, 6, if by "*Ephratuh*" this tribe is there meant. 3. But there was a spirit about the tribe itself which may have been both a cause and a consequence of these advantages of position. That spirit, early domineering and haughty (Josh. xvii, 14), though sometimes taking the form of noble remonstrance and reparation (2 Chron. xxviii, 9-15), usually manifested itself in jealous complaint at some enterprise undertaken on advantage gained in which they had not a chief share. To Gideon (Judg. viii, 1), to Jephthah (xii, 1), and to David (2 Sam. xix, 41-43), the cry is still the same in effect—almost the same in words—"Why did we despise us that our advice should not have been first had?" "Why hast thou served us thus that thou caldest us not?" The unsettled state of the country in general, and of the interior of Ephraim in particular (Judg. ix), and the continual incursions of foreigners, prevented the power of the tribe from manifesting itself in a more formidable manner than by these murmurs during the time of the Judges and the first stage of the monarchy. Samuel, though a Levite, was a native of Ramah in Mount Ephraim, and Saul belonged to a tribe closely allied to the family of Joseph, so that during the priesthood of the former and the reign of the latter the supremacy of Ephraim may be said to have been practically maintained. Certainly in neither case had any advantage been gained by their great rival in the south. But when the great tribe of Judah produced a king in the person of David, the pride and jealousy of Ephraim were thoroughly awakened, and it was doubtless chiefly through their means that Abner was enabled for a time to uphold the house of Saul; for there are manifest indications that by this time Ephraim influenced the views and feelings of all the other tribes. They were at length driven by the force of circumstances to acknowledge David upon conditions; and were probably not without hope that, as the king of the nation at large, he would establish his capital in their central portion of the land. Again, the brilliant successes of David, and his wide influence and religious zeal, kept matters smooth for another period, even in the face of the blow given to both Shechem and Shiloh by the concentration of the civil and ecclesiastical capitals at Jerusalem. Twenty thousand and eight hundred of the choice warriors of the tribe, "men of name throughout the house of their father," went as far as Hebron to make David king over Israel (1 Chron. xii, 30). Among the officers of his court we find more than one Ephraimite (1 Chron. xxvii, 10, 14), and the attachment of the tribe to his person seems to have been great (2 Sam. xix, 41-43). But as he not only established his court at Jerusalem, but proceeded to remove the ark thither, making his native Judah the seat both of the theocratic and civil government, the

Ephraimites, as a tribe, became thoroughly alienated, and longed to establish their own ascendancy. The building of the temple at Jerusalem, and other measures of Solomon, strengthened this desire; and although the minute organization and vigor of his government prevented any overt acts of rebellion, yet the train was then laid, and the reign of Solomon, splendid in appearance but oppressive to the people, developed both the circumstances of revolt and the leader who was to turn them to account. Solomon saw through the crisis, and if he could have succeeded in killing Jeroboam, as he tried to do (1 Kings xi, 40), the disruption might have been postponed for another century. As it was, the outbreak was deferred for a time, but the irritation was not allayed, and the insane folly of his son brought the mischief to a head. Rehoboam probably selected Shechem—the old capital of the country—for his coronation, in the hope that his presence and the ceremonial might make a favorable impression, but in this he failed utterly, and the tumult which followed shows how complete was the breach—"To your tents, O Israel! now see to thine own house, David!" Rehoboam was certainly not the last king of Judah whose chariot went as far north as Shechem, but he was the last who visited it as a part of his own dominion, and he was the last who, having come so far, returned unmolested to his own capital. Jehoshaphat escaped, in a manner little short of miraculous, from the risks of the battle of Ramoth-Gilead, and it was the fate of two of his successors, Ahaziah and Josiah—differing in everything else, and agreeing only in this—that they were both carried dead in their chariots from the plain of Esdraelon to Jerusalem.

Thenceforth the rivalry of Ephraim and Judah was merged in that between the two kingdoms; although still the predominance of Ephraim in the kingdom of Israel was so conspicuous as to occasion the whole realm to be called by its name, especially when that rivalry is mentioned. This title is particularly employed in the prophetic books (Isa. ix, 8; xvii, 3; xxviii, 3; Hos. iv, 17; v, 3; ix, 3). When the land of Ephraim is meant, the word is fem. in the original (Hos. v, 9); when the people, masc. (Isa. vii, 8). Thus in two senses the history of Ephraim is the history of the kingdom of Israel, since not only did the tribe become a kingdom, but the kingdom embraced little besides the tribe. This is not surprising, and quite susceptible of explanation. North of Ephraim the country appears never to have been really taken possession of by the Israelites. Whether from want of energy on their part, or great stubbornness of resistance on that of the Canaanites, certain it is that of the list of towns from which the original inhabitants were not expelled, the great majority belong to the northern tribes, Manasseh, Asher, Issachar, and Naphtali. In addition to this original defect there is much in the physical formation and circumstances of the upper portion of Palestine to explain why those tribes never took any active part in the kingdom. They were exposed to the inroads and seductions of their surrounding heathen neighbors—on one side the luxurious Phœnicians, on the other the plundering Bedouins of Midian; they were open to the attacks of Syria and Assyria from the north, and Egypt from the south; the great plain of Esdraelon, which communicated more or less with all the northern tribes, was the natural outlet of the no less natural high roads of the maritime plain from Egypt, and the Jordan valley for the tribes of the East, and formed an admirable base of operations for an invading army. But, on the other hand, the position of Ephraim was altogether different. It was one at once of great richness and security. Her fertile plains and well-watered valleys could only be reached by a laborious ascent through steep and narrow ravines, all but impassable for an army. There is no record of any attack on the central kingdom, either from the Jordan valley or the maritime plain.

On the north side, from the plain of Esdraelon, it was more accessible, and it was from this side that the final invasion appears to have been made. But even on that side the entrance was so difficult and so easily defensible—as we learn from the description in the book of Judith (iv, 6, 7)—that, had the kingdom of Samaria been less weakened by internal dissensions, the attacks even of the great Shalmaneser might have been resisted, as at a later date were those of Holofernes. There are few things more mournful in the sacred story than the descent of this haughty and jealous tribe, from the culminating point at which it stood when it entered on the fairest portion of the Land of Promise—the chief sanctuary and the chief settlement of the nation within its limits, its leader the leader of the whole people—through the distrust which marked its intercourse with its fellows, while it was a member of the confederacy, and the tumult, dissension, and ungodliness which characterized its independent existence, down to the sudden captivity and total oblivion which closed its career. Judah had her times of revival and of recurring prosperity, but here the course is uniformly downward—a sad picture of opportunities wasted and personal gifts abused. "When Israel was a child, then I loved him, and called my son out of Egypt. . . . I taught Ephraim also to go, taking them by their arms, but they knew not that I healed them. I drew them with cords of a man, with bands of love . . . but the Assyrian shall be their king, because they refused to return. . . . How shall I give thee up, Ephraim? how shall I deliver thee, Israel? how shall I make thee as Admah? how shall I set thee as Zeboim?" (Hos. xi, 1-8). See ISRAEL, KINGDOM OF.

2. MOUNT EPHRAIM, a mountain or group of mountains in Central Palestine, in the tribe of the same name, on or towards the borders of Benjamin (Josh. xvii, 15; xix, 50; xx, 7; Judg. vii, 24; xvii, 1; 1 Sam. ix, 4; 1 Kings iv, 8). From a comparison of these passages it may be collected that the name of "Mount Ephraim" was applied to the whole of the ranges and groups of hills which occupy the central part of the southernmost border of this tribe, and which are prolonged southward into the tribe of Benjamin. (See above.) In the time of Joshua these hills were densely covered with trees (Josh. xvii, 18), which is by no means the case at present. In Jer. 1, 19, Mount Ephraim is mentioned in apposition with Bashan, on the other side of the Jordan, as a region of rich pastures, suggesting that the valleys among these mountains were well watered and covered with rich herbage, which is true at the present day. Joshua was buried in the border of his own inheritance in Timnath-heres, "in the mount of Ephraim, on the north side of the hill Gaash" (Judges ii, 9).

EPHRAIM, GATE OF (עַרְוֹת עֵינָן; Sept. πόλις Ἐφραΐμ), one of the gates of the city of Jerusalem (2 Kings xiv, 13; 2 Chron. xxv, 23; Neh. viii, 16; xii, 39), doubtless, according to the Oriental practice, on the side looking towards the locality from which it derived its name, and therefore on the north, probably at or near the position of the present "Damascus gate." See JERUSALEM.

EPHRAIM, WOOD OF (עֵץ עֵינָן; Sept. δρυμός Ἐφραΐμ), a forest (the word *gaur* implying dense growth), in which the fatal battle was fought between the armies of David and of Absalom (2 Sam. xviii, 6), and the entanglement in which added greatly to the slaughter of the latter (ver. 8). It would be very tempting to believe that the forest derived its name from the place near which Absalom's sheep-farm was situated (2 Sam. xiii, 23), and which would have been a natural spot for his head-quarters before the battle, especially associated as it was with the murder of Amnon. Moreover, there appears to have been another woodland of Ephraim in the mountains belonging to that tribe in this neighborhood (Josh. xvii, 15-18).

But the statements of xvii, 24, 26, and also the expression of xviii, 3, "That thou succor us out of the city," i. e. Mahanaim, allow no escape from the conclusion that the locality was on the east side of Jordan, though it is impossible to account satisfactorily for the presence of the name of Ephraim on that side of the river. The suggestion is due to Grotius that the name was derived from the slaughter of Ephraim at the fords of Jordan by the Gileadites under Jephthah (Judg. xii, 1, 4, 5): but that occurrence took place at the very brink of the river itself, while the city of Mahanaim and the wooded country must have lain several miles away from the stream, and on the higher ground above the Jordan valley. Is it not at least equally probable that the forest derived its name from this very battle? The great tribe of Ephraim, though not specially mentioned in the transactions of Absalom's revolt, cannot fail to have taken the most conspicuous part in the affair, and the reverse was a more serious one than had overtaken the tribe for a very long time, and possibly combined with other circumstances to retard materially their rising into an independent kingdom. But others suppose that it was because the Ephraimites were in the habit of bringing their flocks into this quarter for pasture; for the Jews allege that the Ephraimites received from Joshua, who was of their tribe, permission to feed their flocks in the woodlands within the territories of any of the tribes of Israel; and that, as this forest lay near their territories on the other side the Jordan, they were wont to drive their flocks over to feed there (see Jarchi, Kimchi, Abarbanel, etc., on 2 Sam. xviii, 6). It is probably referred to under the name EPHRATAH (q. v.) in Psa. cxxxii, 6, where the other member of the verse has "fields of the wood." Others, however, not unreasonably suppose this to be a different locality. See FOREST.

2. In "Baal-hazor, which is 'by' Ephraim," was Absalom's sheep-farm, at which took place the murder of Amnon, one of the earliest precursors of the great revolt (2 Sam. xiii, 23). The Hebrew particle  $\text{בְּ}$ , rendered above "by" (A. V. "beside"), always seems to imply actual proximity, and therefore we should conclude that Ephraim was not the tribe of that name, but a town. The cities of Dan and Asher are other instances of localities beyond the tribes, yet bearing their names; and the former suggests that the appellation may in all these cases have arisen by colonization. Ewald conjectures that the place here in question is identical with EPHRAIM, EPHRON, and OPHRAH of the O. T., and also with the EPHRAIM which was for a time the residence of our Lord (*Gesch.* iii, 219, note). But with regard to the first three names there is the difficulty that they are spelt with the guttural letter *ayin*, and this is very rarely exchanged for the *aleph*, which commences the name before us. The Sept. makes the following addition to verse 34: "And the watchman went and told the king, and said, I have seen men on the road of the Oronen ( $\text{תַּרְצֵי הָאוֹרֹנִין}$ , Alex.  $\text{τῶν ὄρειωνῶν}$ ) by the side of the mountain." Ewald considers this to be a genuine addition, and to refer to Beth-horon, N.W. of Jerusalem, off the Nablús road, but the indication is surely too slight for such an inference. Any force it may have is against the identity of this Ephraim with that in John xi, 54, which was probably in the direction N.E. of Jerusalem. Nevertheless, the best solution of the question appears to be to identify this place with the one following. See BAAL-HAZOR.

3. A city ( $\text{Ἐφραὶμ λεγομένην πόλιν}$ ) "in the desert near the wilderness," to which our Lord retired with his disciples when threatened with violence by the priests in consequence of having raised Lazarus from the dead (John xi, 54). By the "wilderness" ( $\text{ἔρημος}$ ) is probably meant the wide unencultivated hill-country N.E. of Jerusalem, lying between the central towns and the Jordan valley (see Lightfoot, *Hor. Heb.*

p. 97, 953). In this case the conjecture of Dr. Robinson is very admissible, that OPHRAH (q. v.) of Benjamin (*Josh.* xviii, 23) and Ephraim are identical, and that their modern representation is *et-Ta'yibeh*, a village on a conspicuous conical hill, commanding a view "over the whole eastern slope, the valley of the Jordan and the Dead Sea" (*Researches*, ii, 121). It is placed by Eusebius (*Onomast.* s. v.  $\text{Ἐφρών}$ ) eight Roman miles north of Jerusalem, while Jerome, with more probability, makes the distance 20 Roman miles. This indication would seem to make it the same with the EPHRAIM or EPHRON which is mentioned in 2 Chron. xiii, 19, along with Bethel and Jeshanah, as towns taken from Jeroboam by Abijah. This, again, is doubtless the same which Josephus also names (*Ἐφραῖμα*) along with Bethel as "two small cities" ( $\text{πολιτεῖαι}$ ), which were taken and garrisoned by Vespasian while reducing the country around Jerusalem (*War*, iv, 9, 9). It is likewise probably identical with the EPHRAIM (see above) near Baal-Hazor (2 Sam. xiii, 23). See also APHEREMA.

E'phraimite, as a designation of a descendant of the patriarch Ephraim, is properly denoted in the Heb. by the patronymic  $\text{בְּנֵי עִפְרָיִם}$ , *son of Ephraim* (Num. x, 22, plur. A. V. "children of Ephraim"), or simply *Ephraim* (often rendered "Ephraimites" in the A. V.); but in *Judg.* xii, 5 it appears as a rendering of  $\text{אֶפְרַתִּיתִּים}$ , an *Ephrathite* (q. v.), meaning thereby, however, an Ephraimite, which is apparently likewise the meaning of the same Heb. word in 1 Sam. i, 1; 1 Kings xi, 26, in both which passages, however, the A. V. regularly Anglicizes "Ephrathite." The narrative in Judges raises the inquiry whether the Ephraimites had not a peculiar accent or *patois*, similar to that which in later times caused "the speech" of the Galileans to "betray" them to the inhabitants of Jerusalem (*Matt.* xxvi, 73).

E'phraim (Heb. in the margin  $\text{Ἐφραΐμ}$ ,  $\text{אֶפְרַיִם}$ , but in the text  $\text{Ἐφרון}$ ,  $\text{אֶפְרֹן}$ , i. e.  $\text{אֶפְרָתִּיתִּים}$ , which latter appears to be the genuine reading [see EPHRON]; Sept.  $\text{Ἐφρών}$ , Vulg. *Ephron*), a city of Israel, which, with its dependent hamlets ( $\text{בָּתוֹתֶיהָ}$  = "daughters," A. V. "towns"), Abijah and the army of Judah captured from Jeroboam with Bethel and Jeshanah (2 Chron. xiii, 19). It appears to be mentioned in the Talmud (*Menach.* ix, 1) as *Ephraim* ( $\text{אֶפְרַיִם}$ ). It has been conjectured that this Ephraim or Ephron is identical with the EPHRAIM by which Absalom's sheep-farm of Baal-hazor was situated (2 Sam. xiii, 23); also with the city called EPHRAIM, near the wilderness in which our Lord lived for some time (John xi, 54); and with OPHRAH ( $\text{אֶפְרָתָה}$ ), a city of Benjamin, apparently not far from Bethel (*Josh.* xviii, 23; comp. Josephus, *War*, iv, 9, 9), and which has been located by Dr. Robinson (*Researches*, new ed. i, 447), with much probability, at the modern village of *et-Ta'yibeh*. (See Ewald, *Geschichte*, iii, 219, 466; v, 365; Stanley, *Palestine*, p. 210.) See EPHRAIM 3.

Eph'ratah [some *Ephra'tah*] (Heb.  $\text{Ἐφραΐת}$ ,  $\text{אֶפְרַתָּה}$ , Gen. xxxv, 16, 19; xlviii, 7 twice; Psa. cxxxii, 6; Mic. v, 1; 1 Chron. ii, 50; iv, 4; Sept.  $\text{Ἐφραθά}$  or  $\text{Ἐφραθά}$ , Vulg. *Ephrata*, A. V. "Ephrathah" in all but Gen. and the last-named passage of Chron., where it gives "Ephrath"), a prolonged [or sometimes "directive"] form of *Eph'rath* (Hebrew  $\text{Ἐφραθ}$ ,  $\text{אֶפְרָת}$ , probably *fruitful*, 1 Chron. ii, 19; Sept.  $\text{Φραθ}$ , Vulg. *Ephrato*), the name of a woman and of one or two places.

1. The second wife of Caleb, the son of Hezron, mother of Hur, and grandmother of Caleb the spy, according to 1 Chron. ii, 19, 50, and probably 24 [see CALEB-EPHRATAH], and iv, 4, in which last passage Hur is apparently called "the father (i. e. founder) of Beth-lehem" (see below). B. C. post 1856.

2. The ancient name of Bethlehem in Judah, as is manifest from Gen. xxxv, 16, 10; xlviii, 7, both which passages distinctly prove that it was called Ephrath or Ephrath in Jacob's time, and use the regular formula for adding the modern name,  $\text{בֵּית לֶחֶם עֵפְרַת}$ , which is *Bethleh-em* (comp. e. g. Gen. xxiii, 2; xxxv, 27; Josh. xv, 10). It cannot, therefore, have derived its name from Ephrath, the mother of Hur, as the author of *Querst. Hebr. in Paraleip.* says, and as one might otherwise have supposed from the connection of her descendants, Salma and Hur, with Bethlehem, which is somewhat obscurely intimated in 1 Chron. ii, 50, 51; iv, 4. It seems obvious, therefore, to infer that, on the contrary, Ephrath, the mother of Hur, was so called from the town of her birth, and that she probably was the owner of the town and district; in fact, that her name was really gentilitious. But if this be so, it would indicate more communication between the Israelites in Egypt and the Canaanites than is commonly supposed. When, however, we recollect that the land of Goshen was the border country on the Palestine side; that the Israelites in Goshen were a tribe of sheep and cattle drovers (Gen. xlvii, 3); that there was an easy communication between Palestine and Egypt from the earliest times (Gen. xii, 10; xvi, 1; xxi, 21, etc.); that there are indications of communications between the Israelites in Egypt and the Canaanites, caused by their trade as keepers of cattle (1 Chron. vii, 21); and that, in the nature of things, the owners or keepers of large herds and flocks in Goshen would have dealings with the nomad tribes in Palestine, it will perhaps seem not impossible that a son of Hezron may have married a woman having property in Ephrath. Another way of accounting for the connection between Ephrath's descendants and Bethlehem, is to suppose that the elder Caleb was not really the son of Hezron, but merely reckoned so as the head of a Hezronite house. He may in this case have been one of an Edomitish or Horite tribe, an idea which is favored by the name of his son Hur [see CALEB], and have married an Ephrathite. Caleb the spy may have been their grandson. It is singular that "Salma, the father of Bethlehem," should have married a Canaanitish woman. Could she have been of the kindred of Caleb in any way? If she were, and if Salma obtained Bethlehem, a portion of Hur's inheritance, in consequence, this would account for both Hur and Salma being called "father of Bethlehem." Another possible explanation is, that *Ephrathah* may have been the name given to some daughter of Benjamin to commemorate the circumstance of Rachel his mother having died close to Ephrath. This would receive some support from the son of Rachel's other son Joseph being called *Ephraim*, a word of identical etymology, as appears from the fact that  $\text{בֵּית לֶחֶם}$  means indifferently an Ephrathite, i. e. *Bethlehemite* (Ruth i, 1, 2), or an *Ephraimite* (1 Sam. i, 1). But it would not account for Ephrath's descendants being settled at Bethlehem. From Ruth i, 2, where the sons of Naomi are called "Ephrathites of Bethlehem [of] Judah," it would seem that Ephrath was the name of a district of which Bethlehem was the chief town; and the designation of Mic. iv, 2 as "Bethlehem [of] Ephrath," is rendered in Matt. ii, 6, "Bethlehem [in the] land [ $\gamma\eta$ ] of Judah," as if to distinguish it by adding the name of a district, although a larger one (Lange, *Comment. on Matt.* in loc.). At all events we should note that in Gen., and perhaps in Chron., it is called *Ephrath* or *Ephrath*; in Ruth, *Bethlehem-Judah*, but the inhabitants *Ephrathites*; in Micah, *Bethlehem-Ephrath*; in Matt. *Bethlehem in the land of Juda*. The Sept. supplies [ $\text{ἐφραθὰ}$  ( $\alpha\upsilon\tau\eta\ \tau\epsilon\tau\iota\ \text{Βηθλεὲμ}$ )] its omission among the cities of Judah in Josh. xv, 60 (see Reineccius, *Progr.* on this point, Weissenfels, 1723). Jerome, and after him Kalisch, observe that Ephrath, *fruitful*, has the same meaning as Bethlehem, *house of bread*, a

view which is favored by the neighboring corn-fields. —Smith, s. v. Ver Poortenn has written monographs entitled *Tabernacula Dei in Ephrata* [Psa. cxxxii] (Coburg, 1739); *Initia Bethlehemi* (ib. 1728); also two entitled *Fata Bethlehemi* (both ib. eod.). See BETHLEHEM.

3. Gesenius and others think that in Psa. cxxxii, 6, "*Ephrath*" means EPHRAIM (q. v.). The meaning of that passage, however, is greatly disputed. The most obvious reference is to *Bethlehem*, which is elsewhere known by that name (see above), and may here be spoken of as the residence of David at the time when as a youth he first heard of the sacred ark (so Hengstenberg, in loc.). Others consider the name as equivalent to the *tribe Ephraim* (comp. Ephrathite for Ephraimite, Judg. xii, 5), which contained Shiloh, the depository of Jehovah's early favor (so Good, in loc., as most interpreters; Delitzsch, *Commentar. über d. Psalter*, ii, 265, argues at length in favor of this view). Perhaps the best explanation is that which refers the word to *Mt. Ephraim* (as a special designation of that part of the tribe which contained Shiloh), in parallelism with the other part of the verse alluding to the *forest*. Hupfeld (in loc.), however, considers it as merely a poetical term for fruitful *field*, e. g. Beth-she-mesh, the latter part of the verse alluding to Kirjath-jearim as the "wood" ( $\text{בְּעֵץ}$ , *wood*).

**Eph'rathite** (Heb. *Ephrathî'*,  $\text{עֵפְרַתִּי}$ ), the designation of the inhabitants of two widely different localities.

1. Properly BETHLEHEMITE, or citizen of Ephrath (q. v.) or Bethlehem (Ruth i, 2; 1 Sam. xvii, 12; Sept.  $\text{Ἐφραθῆαιος}$ , Vulg. *Ephrathæus*).

2. By some confusion or analogy, an EPHRAIMITE, or inhabitant of the tribe of Ephraim (q. v.) (Judg. xii, 5, with the art.  $\text{בְּעֵץ}$ , Sept.  $\text{ἐκ τοῦ Ἐφραϊμ}$  v. r.  $\text{Ἐφραθῆτης}$ , Vulg. *Ephrathæus*, A. V. "an Ephraimite" [the last clause; in the two previous occurrences of the verse, as well as in the context, the original is *Ephraim*]; 1 Sam. i, 1,  $\text{Ἐφραϊμ}$ , *Ephrathæus*, "an Ephrathite;" 1 Kings xi, 26,  $\text{ὁ Ἐφραθῆι}$ , *Ephrathæus*, "an Ephrathite").

**Ephrem or Ephraem Syrus**, an eminent Church father, and the greatest light of the Syrian Church, was born at Nisibis (Sozom. II. E. iii, 16), Syria, or at Edessa, and flourished A. D. 370. The accounts of his early life are variant and unreliable. His parents were heathen, according to one account, and drove him from home for becoming a Christian; but, according to other accounts, he was bred a Christian by his Christian parents. Jacob of Nisibis took care of his education, and took him to the Council of Nicea, A. D. 325. In 363 Nisibis was ceded by the emperor Jovian to the Persians, and Ephrem went to Edessa, whither the most distinguished Syrians came to receive his instruction. Here he lived as a hermit, only coming from his seclusion to teach and preach. His repute for piety and learning became so great that he was elected bishop; but when he heard of it he rushed forth into the market-place, and acted in such a manner that the people thought he was out of his senses. "He then absconded until another had been appointed to the office of bishop in his place. He now went to Caesarea in Cappadocia to see Basilus the Great, who formed the highest opinion of his learning and piety. Ephrem spent the greater part of his life in writing and preaching on devotional and moral subjects, and especially against the Arian heresy; but he was equally energetic whenever there was any occasion to show by his acts that he really was the benevolent man that he appeared to be. This was especially manifest at the time when Edessa was suffering from famine: he gave his assistance everywhere; he called upon the rich to help the poor, and he himself undertook the care of seeing that the poor received what was intend-

ed for them. He was looked up to with admiration and reverence by his contemporaries, who distinguished him by the honorable designation of 'the prophet of the Syrians.' He died about 378, having ordered in his will that no one should praise him, according to the common practice, in a funeral oration, that his body should not be wrapped up in costly robes, and that no monument should be erected on his tomb" (*English Cyclopædia*, s. v.). This "will" of Ephrem is, however, generally held to be spurious.

All accounts unite in testifying to the virtues of Ephrem. Sozomen (*Hist. Eccles.* iii, 16) tells the following story to illustrate his command of a naturally irascible temper. After a fast, his servant, presenting some food to him, let fall the dish on which it was placed. Ephrem, seeing him overwhelmed with shame and terror, said to him, "Take courage; as the food has not come to us, we will go to it." Whereupon Ephrem sat down on the floor, and ate the fragments left in the broken dish.

He was a voluminous author, writing commentaries, practical religious works, sermons, and numerous poems. The commentaries and hymns are in Syriac; the other writings exist only in Greek and other versions. It is doubtful whether he understood Greek; Sozomen (l. c.) expressly says that he knew only Syriac, but that his writings "were translated into Greek during his life, and preserve much of their original force and power, so that they are not less admired in Greek than in Syriac." One of the legends tells that in his visit to Basil both were miraculously enabled to speak the other's language—Basil the Syriac, and Ephrem the Greek. "His commentaries extended over the whole Bible, 'from the book of creation to the last book of grace,' as Gregory of Nyssa says. We have his commentaries on the historical and prophetic books of the Old Testament and the book of Job in Syriac, and his commentaries on the epistles of Paul in an Armenian translation. They have been but little used thus far by commentators. He does not interpret the text from the original Hebrew, but from the old Syriac translation, the Peshito, though he refers occasionally to the original. His sermons and homilies, of which, according to Photius, he composed more than a thousand, are partly expository, partly polemical, against Jews, heathen, and heretics. They evince a considerable degree of popular eloquence; they are full of pathos, exclamations, apostrophes, antitheses, illustrations, severe rebuke, and sweet comfort, according to the subject; but also full of exaggerations, bombast, prolixity, and the superstitions of his age, such as the over-estimate of ascetic virtue, and excessive veneration of the Virgin Mary, the saints, and relics. Some of his sermons were publicly read after the Bible lesson in many Oriental, and even Occidental churches. His hymns were intended to counteract the influence of the heretical views of Bardesanes and his son Harmonius, which spread widely by means of popular Syrian songs. 'When Ephrem perceived,' says Sozomen, 'that the Syrians were charmed with the elegant diction and melodious versification of Harmonius, he became apprehensive lest they should imbibe the same opinions; and therefore, although he was ignorant of Greek learning, he applied himself to the study of the metres of Harmonius, and composed similar poems in accordance with the doctrines of the Church, and sacred hymns in praise of holy men. From that period the Syrians sang the odes of Ephrem, according to the method indicated by Harmonius.' Theodoret gives a similar account, and says that the hymns of Ephrem combined harmony and melody with piety, and subserved all the purposes of valuable and efficacious medicine against the heretical hymns of Harmonius. It is reported that he wrote no less than three hundred thousand verses. But, with the exception of his commentaries, all his Syriac works are written in verse, i. e. in lines of an

equal number of syllables, and with occasional rhyme and assonance, though without regular metre (Schaff, *History of the Christian Church*, iii, 952 sq.)."

The best edition of his collected works is *Ephraemi Syri Opera omnia*, Gr., Syr., et Lat., edita cum præfationibus, notis, var. lectionibus, studio J. S. Assemani et P. Benedetti (Romæ, 1732-46, 6 vols. fol.). Before this edition, many of his writings had been collected and translated from Greek into Latin by Gerard Voss, who published them (1) at Rome, A. D. 1589-93-97; (2) at Cologne in 1603 and 1616; and (3) at Antwerp in 1619 (3 vols. in one). "The first volume consists of various treatises, partly on subjects solely theological, as the priesthood, prayer, fasting, etc., with others partly theological and partly moral, as truth, anger, obedience, envy. The second volume contains many epistles and addresses to monks, and a collection of apophthegms. Vol. iii consists of several treatises or homilies on parts of Scripture, and characters in the Old Testament, as Elijah, Daniel, the three children, Joseph, Noah. Photius gives a list of 49 homilies of Ephrem (Cod. 196), but which of these are included in Voss's edition it is impossible to ascertain, though it is certain that many are not" (Smith, *Dictionary of Biography*, s. v.).

Of separate works there are numerous editions, of which lists may be found in Hoffmann, *Bibliographisches Lexikon*, ii, 3 sq., and in Fabricius, *Bibliotheca Græca*, ed. Harles, viii, 217 sq. An edition containing only the Greek writings of Ephrem was published by Thwaites (Oxford, 1709), edited from 28 MSS. in the Bodleian Library. An English translation from the Syrian by J. B. Morris (Oxf. 1847) contains 13 pieces of verse on the Nativity, 1 against the Jews, and 90 on the faith. The Rev. H. Burgess has published *Select metrical Hymns and Homilies of Ephraem Syrus*, translated from the original Syriac, with an Introduction, and historical and philological notes (Lond. 1853). In his introduction Mr. Burgess mentions, as extant in Syriac verse, "eleven exegetical discourses, more than a hundred controversial sermons, and nearly as many practical hortatory homilies, all in poetry; four pieces on the *freedom of the will*, not only in metre, but the strophes arranged in alphabetic order, like the verses of the 119th Psalm; and he assures us that all these compositions show a high degree of poetic talent, and are distinguished for their 'sonorousness and grace,' and have 'a charm which no translation can express.' Indeed, almost all the three folios of St. Ephraem's printed works in Syriac are poetical. In this volume the author gives us translations of 35 of Ephraem's Syriac hymns, and 9 of his metrical homilies or sermons. They are illustrated by a learned introduction and very instructive notes. More than half the hymns relate to death and eternity, and the others are on various topics pertaining to the Christian life. The subjects of the poetical sermons are the following: (1) Paradise, (2) Satan, (3) to the clergy, (4) the Trinity, (5) matter not eternal, (6) error counterfeits truth, (7) the Trinity, (8) two natures of Christ, (9) man ignorant of himself" (*Biblioth. Sacra*, Oct. 1853, p. 837). M. Cailiau published a Latin version of Ephrem in 8 vols. 8vo (Paris, 1832-35, forming vols. xxxiv-xli of the *Patres Selecti*), in which the following order is used: 1. Commentaries; 2. Exegetical homilies; 3. Sermons; 4. Epistles; 5. Prayers. The writings of Ephrem in Armenian were published at Venice, 4 vols. 8vo, 1836. Hahn und Sieffert's *Chrestomathia Syriaca* (Leipsic, 1825, 8vo) contains 19 select hymns of Ephrem; see also Hahn, *Bardesanes Gnosticus* (Leips. 1819). A German version of many of his poems is given by Zingerle, *Ausg. Schriften des heil. Ephraem* (Innspr. 1830-37, 6 vols.). His funeral sermons are translated into Italian (*Inni funebri di S. Efram Siro, tradotti per Angelo Paggi e Fausto Lasinio*, Firenze, 1851). In 1853 J. Alshein announced a complete edition of the Syriac works of Ephrem, in a

pamphlet (Berl. 8vo) containing a sketch of Ephrem's life, and some literary remarks of value. Many writings of Ephrem remain in MS., of which there is a valuable collection in the British Museum; among them a *Chronicle*, from Creation to the time of Christ, is ascribed to him.

Eccles.* i, 493 sq.; Dupin, *Auteurs Ecclés.* (Paris, 1593), ii, 145 sq.; Ceillier, *Auteurs Sacrés* (Par. 1860), vol. vi, chap. i; Lardner, *Works*, iv, 304 sq.; Clarke, *Succession of Sacred Literature*, i, 403; Von Lengerke, *Comm. de Ephraemo Syr. interprete* (Halle, 1828); the same, *De Eph. Syr. art. hermeneutica* (Königsb. 1831); Villemain, *Tableau de l'éloquence Chrét. au 4<sup>me</sup> Siècle* (Paris, 1840, 12mo), p. 242; Nève, *De la Renaissance des études Syriaques* (Annales de Philosophie, 1854); *North British Review*, Aug. 1853, p. 247; *Jour. of Sacred Literature* July, 1853, p. 389; Rüdiger, in Herzog, *Real-Encyclop.* iii, 85 sq.

**Ephron** (Heb. *Ephron'*, עֶפְרוֹן, signif. doubtful; Sept. Ἐφρών, Vulg. *Ephron*), the name of a man and also of two or three places.

1. The son of Zohar, a Hittite; the owner of a field which lay facing Mamre or Hebron, and of the cave contained therein, which Abraham bought from him for 400 shekels of silver (Gen. xxiii, 8-17; xxv, 9; xlix, 29, 30; i, 13). B.C. 2027. By Josephus (*Ant.* i, 14) the name is given as *Ephraim* (Ἐφράιμ), and the purchase-money 40 shekels. See ABRAHAM.

2. The textual reading (but with initial S) in the Masoretic Bible, and the marginal in the A. V. for EPHRAIM (q. v.), a city within the borders of the kingdom of Israel (2 Chron. xiii, 19).

3. A mountain, the "cities" of which formed one of the landmarks on the northern boundary of the tribe of Judah (Josh. xv, 9), between the "water of Nephtoth" and Kirjath-jearim. As these latter are with great probability identified with Ain Yalo and Kuriet el-enab, Mount Ephron is probably the elevated region on the south side of wady Beit-Hanina (traditional valley of the Terebinth), near its junction with wady Ain-Haniyeh or wady el-Werd. This seems to be the "high plain" indicated by Schwarz (*Palest.* p. 96) as appropriately called Mount Ephron, in comparison with the deep valleys adjoining. The "cities of Mount Ephron" may then be denoted by such ruined sites as el-Sus and Mar-Zakaria in this vicinity.

4. A very strong city (πόλις μεγάλη ὄχυρά σφόδρα) on the east of Jordan, between Carnaim (Ashteroth-Karnaim) and Bethshean, attacked and demolished by Judas Maccabeus (1 Macc. v, 46-52; 2 Macc. xii, 27, 28; Josephus, *Ant.* xii, 8, 5). From the description in these two passages it appears to have been situated in a defile or valley, and to have completely occupied the pass. It was possibly near the outlet of the Jab-bok into the Jordan. Klöden's conjectures (*Lauleskunde von Palästina*, Berl. 1817, p. 75) that it was the present *Kulat er-Rubud*, a strong Saracenic castle on the top of a hill up the wady Rajib, and the residence of the chief of Jebel Ajlun (Burckhardt, *Syria*, p. 266 sq.; Robinson, *Researches*, ii, 121; iii, 166).

**Epicrätēs** (Ἐπικράτης, *controller*, a common Gr. name), one of the generals left by Antiochus Grypus, in connection with Callimander, in charge of the Syrian forces besieging Hircanus in Samaria, but whose cupidity led him to betray Scythopolis into the hands of the Jews (Josephus, *Ant.* xiii, 10, 2, 3).

**Epicurean Philosophy—Epicurus.** The Epicurean philosophy received its name and its complete development from its founder Epicurus. Little was added to the system by its disciples. It was a reaction against the Socratic School, and constituted one of the most marked forms of speculation during the period of Greek decline. It exercised considerable influence over the Latin world in the decay of the Roman republic, and during the first two centuries of

the empire. With important changes of form, but with little modifications of spirit, it survived the overthrow of ancient civilization, perpetuated itself throughout the Middle Ages, reappeared with the revival of philosophy, and may still be recognised in many recent theories.

The Epicurean philosophy, which has survived so many successions of empire, and so vast mutations of thought, is intimately connected with the earlier speculations of the Greeks. Its ethical views are directly deducible from the Cyrenaic School; but its dependence on the Eleatics is unmistakable. See ELEATIC SCHOOL. In physics it displayed an inclination to return to the Ionic method. It is, however, in immediate affiliation with the doctrines of Democritus and Leucippus. From them it derived its atoms, and the casual formation of the universe.

Notwithstanding its connections with previous modes of thought, the Epicurean philosophy is so definite in principle and form that it may be more readily treated without regard to its descent than almost any other type of speculation, ancient or modern.

The Epicurean philosophy was fully developed by its founder, and was long contained almost entirely in his numerous productions. These perished early. Fragments only have been preserved in the philosophical treatises of Cicero, the moral lectures of Seneca, and the late compilation of Diogenes Laërtius. Epicurus's physical theory of the universe, which formed the basis of his theological and ethical conclusions, is transmitted to us in its integrity in the abstruse but brilliant poem of Lucretius. In consequence of the reverence of the disciples for the instructions of the master, and their abstinence from development of his teachings, Epicurus occupies a more prominent position in the exposition of his doctrine than any other Greek philosopher except Pythagoras. It is, accordingly, expedient to consider the circumstances of his life and the peculiarities of his character before entering upon the details of his system.

*Life of Epicurus.*—Epicurus was of pure Athenian descent; of a good family, though reduced to poverty; and settled in Samos, where his father Neocles was a *cleruchus*, and eked out a scanty support by the occupation of a school-master. His mother, Chærestrata, added to the resources of a poor household by practising enchantments and by other superstitious pretences, in which she was aided by her son, who may thus have acquired an early contempt for the current theology and superstition. Epicurus was born at Samos, A.C. 342-1, seven years after the death of Plato, and within a year of Aristotle's acceptance of the office of tutor to Alexander the Great. About the time of Alexander's death, Epicurus came to Athens, at the age of 18, where he is supposed to have attended the instructions of Xenocrates in the academy. Aristotle was still teaching in the lyceum. Epicurus made no long stay at this time in the metropolis, but removed to Colophon and opened a school. He adopted the atomistic doctrine of Democritus, and during five years undertook to teach philosophy at Mitylene and Lampsacus. At the age of 35 he returned to Athens, taught philosophy there for a period of 36 years till his death, and became the founder of a sect, having at first been content with declaring himself a follower of Democritus. The groves of the academy were frequented by the Platonists under Xenocrates; "the shady spaces" around the lyceum were occupied by the Peripatetics under Theophrastus, who possessed a house and garden of his own within the precincts, which were bequeathed to his successors. Epicurus imitated the Peripatetic example, and purchased a garden in the heart of the city for 80 minæ (about \$1400 in gold). This abode, the celebrated *horti Epicuri*, became the place of instruction and of convivial assemblage, and gave name to the school, "the philosophy of the Garden." The life of Epicurus was "simple, temperate, and cheer-

fal;" he was "a kind-hearted friend, and even a patriotic citizen." He kept aloof from the political distractions of the time, and took no part in public affairs. His maxim was *λάθε βιώσας*—avoid notice in life. The political and social disorders of the time, amid the wars of the *Diadochi* and the factious contentions of a city where liberty was supplanted by tyranny or anarchy, might suggest the philosophy which is supposed to have regulated his conduct, viz. that the mind alone is free; all without is at the mercy of capricious violence or incalculable contingencies. In the progress of civil discords and convulsions the only hope of tranquillity must be sought in absolute seclusion and disregard of public transactions.

In his quiet and graceful retreat, surrounded by affectionate pupils and admiring friends, enlivened by the frequent presence of brilliant *heteræ*, one half of the long life of Epicurus was passed. His intercourse was characterized by genial good-humor, and his establishment was conducted with frugal elegance. His temperament and his doctrine, his habits and his precepts, were in entire unison. He sought and obtained for himself the gentle pleasure, the unruffled serenity which he preached to his hearers. He was laborious in the dissemination of his opinions. He is designated as *πολυγραφώτατος* by Diogenes, and is said to have written three hundred volumes, filled, of course, with repetitions. This copious authentic promulgation of his philosophy dispensed with any necessity for expansion or commentary. The theory was, indeed, so simple and perspicuous that nothing remained to be stated after the first exposition.

Before the death of Epicurus in A.C. 270, a rival school had arisen in Athens under the colonnades of the Painted Porch, and nearly every one of his tenets was directly opposed by Zeno of Citium and the Stoic philosophy. The reaction excited by the extreme materialism and fortuitism of Epicurus occasioned an equal extravagance on the other side. With Epicurus the universe was an aggregate of blind atoms compacted and diversified by an equally blind chance; with Zeno it was a divine organism, vital in all its parts, and governed by the immutable decrees of fate. With Epicurus the deities were ineognizant or regardless of temporal affairs; with Zeno everything was controlled by a superintending Providence, whose will was an unalterable necessity, and manifested by the heavenly orbs (*sidera conscienti fati*).

The *Philosophy of Epicurus* divides itself naturally into three parts, Theology, Ethics, and Physics. The last alone received any thoroughly systematic development. It was devised as a scientific basis for the two former, which were rather foregone conclusions, in which "the wish was father to the thought," than strictly logical deductions from established principles. The philosophy of Epicurus was designed for his own immediate satisfaction, and for the practical uses of life. The logomachies of Eleatics and Sceptics, Sophists and Socratics, had produced no settled convictions, and had arrested neither public calamities nor private wretchedness; a doctrine was desired which might bring peace to the individual, and restore happiness or enjoyment to life. The canonization of pleasure, the regulation and sanctification of natural passions, seemed to afford the solution required, and Epicurus was to his time what Fourier was to the last generation. In order to sanction pleasure as the guide of existence, it was necessary to get rid of the menaces of conscience and the terrors of heaven. Hence Epicurus practically denied the gods by relegating them to the eternal isolation of unconcerned indolence and reverie. This was regarded by his votaries as the most essential service of his career (Lucret. i, 63-80). But to exercise the divinities and to abrogate religion, it was necessary to explain the marvelous order, economy, and variety of the creation, without recourse to a creator; to furnish, like La Place, a system of the world which

should exclude the notion of a divine architect. This task Epicurus undertook, with such materials as were at hand. The Eleatic School had asserted an absolute severance of the divine and the transitory, and had devoted their regards to the former. Epicurus repudiated the former, and confined his attention to the material and sensible, disproving all creative or divine agency by his physical doctrine, and maintaining the authority of carnal impulses and earthly pleasures by the repudiation of the gods and of their worship.

*Theology of Epicurus.*—Epicurus acquiesced in the existence of the gods, but denied them any participation in the process of the universe. He ascribed to them immortality and human form, and assigned to them attenuated and spectral bodies, as Milton also appears to have done ("*negat esse corpus deorum, sed tamquam corpus, nec sanguinem, sed tamquam sanguinem.*" Cic. *De Nat. Deor.* i. xxv). He accords to them indestructibility, immutability, and the serene happiness of eternal repose. Their tranquillity would have been disturbed by any care; accordingly, they are entirely unconcerned with everything that falls under human apprehension. This mode of recognising and at the same time cashiering divinity has been recently imitated by Herbert Spencer. So far as human actions or thoughts are concerned, the gods are practically non-existent, and religion is nothing better than a vague and irrational superstition, founded upon dreams, and cherished by ignorant fear.

*Ethics of Epicurus.*—Without divine sanction, without responsibility or existence hereafter, with neither reward nor penalty in a future life for "deeds done in the body," no real system of ethics is conceivable. There is no constraint, no obligation to rectitude; there is no moral compulsion; there is no domain for conscience; there can only be a more or less judicious and provident adaptation of actions to the judgments or dispositions of men, and to the supposed satisfaction of the individual. Morality without religion is a pretence and a delusion. A tranquil and pleasurable existence becomes the *summum bonum* of the sage; the gratification of every passion as it arises the sole duty of an eager and undisciplined nature. Every restraint is removed except such as may be voluntarily imposed; and though cool, impassive, and indolent dispositions may maintain an external propriety of demeanor when exposed to no temptation, there can be no guarantee for rectitude of conduct, and the license of all passions will be gratified by the unclean beasts who wallow in the Epicurean sty. The insufficiency of the doctrine as a rule of conduct was exhibited from the very first. Epicurus placed the highest pleasure in undisturbed repose, but he considered every pleasure to be good in itself; and his favorite disciple, Metrodorus, asserts that the dictates of natural reason would limit all care to the satisfaction of the belly, thus taking as the corner-stone of the system the declaration of Ecclesiastes, "All a man's labor is for his mouth." The stories which circulated in regard to the connection of Epicurus and his companions with Leontium, Marmarium, and other notorious ladies of the like persuasion, show that the tendencies of the doctrine were at once recognised, even if they were not illustrated in practice.

As all the religious foundations of virtue were removed, no logical foundation remained. The *æconomic* of Epicurus, which was at once his logic and his metaphysics, amounted to the negation of any absolute or immutable truth. The sensible impression was the sole criterion of truth. Every sensation, as every general conception, was necessarily true; and we are here reminded, though in different modes and degrees, of the positions assumed by Des Cartes and by Hume. No guidance is accorded for the conduct of the understanding more assured than the immediate impression or the unregulated fancy, and the passions are thus left without any valid control by the reason. A life

according to natural impulses becomes therefore the aim and the duty of a philosopher.

The *Physics of Epicurus* were devised as a means of escape from all divine authority and superintendence. They constitute the most elaborate, coherent, and original portion of the Epicurean system. Even here there was little real originality. Epicurus was a man of little learning, of little logical perspicacity; but he was actuated by a distinct purpose, and possessed of a clear rather than a penetrating mind. He diligently availed himself of everything subservient to his aims in previous systems, and worked out whatever accorded with his plans into a plausible and superficial scheme, in which consistency was little regarded, and acceptability assured by addressing the natural inclinations of men. The Physical Theory of Epicurus acquired more reputation in antiquity from its connection with theology and ethics, and from its exposition of Lucretius, than from any estimation in which it was held by the real students of science. The object of Epicurus was to explain, like Des Cartes, how the universe might have been formed and perpetuated without any foreign agency, though he went further than Des Cartes in rejecting even a divine agency for its first creation.

The leading lines of his physical doctrine are that matter is uncreated and indestructible. Its primitive elements are indivisible particles—atoms—which are eternal and imperishable, passing through various combinations, and assuming new properties and forms according to these mutable compositions. These atoms are infinite in number, and solid, though so small as to be imperceptible by the senses. They possess gravity, and move downwards in an infinite vacuum. Their descent, however, is not in a uniform line; they are deflected by a spontaneous impulse, due to mere contingency, and come into collision, conjunction, composition with each other. Thus worlds, infinite in number, and infinitely varied in their phenomena, are formed. These atoms are in a continual state of vibration or oscillation, and from their concretions and dissolutions, their coherences and dissidences, all the multitudinous changes of inorganic and organic nature are derived. All, however, are governed by chance alone; there is no compulsion, no necessity, no external law, no decree of fate. The cause of being is not extrinsic, but is involved in the process and act of being. No room is allowed for the operation of any conscious and ordaining intelligence; the world is nothing more than the curious result of uncomprehending, undesigned accidents. It will be observed that this theory of Epicurus differs from the vortices of Des Cartes in little more than in ascribing a straight, downward, but variable motion to the atoms in a vacuum, while Cartesianism assigns to them a gyratory movement and denies a vacuum. The difference is more obvious between this system and the recent doctrine of evolution, but the logical principle is the same—the construction and continuation of the universe by simple elements and simple forces generated within its own sphere, and independent of foreign determination. It is consequently not surprising that an attempt has been very recently made to bring the Epicurean Physics into harmony with modern science, whose present tendencies are in the direction of similar irrational self-sufficiency. A like attempt was made by Gassendi more legitimately, but without any permanent acceptance, in the 17th century; and it may be confidently asserted that, in an age of infidel appetencies, there will always be a revival of the Epicurean philosophy and Epicurean proclivities.

**Epicure'ans** (*Ἐπικουροῖται*, Acts xvii, 18), followers of Epicurus or adherents of the Epicurean philosophy (q. v.).

**Epimenides**, a Greek poet, born in Crete, and highly revered as a prophet and natural sage at Athens, where he came by invitation B.C. cir. 596, and spent a long life. Our chief account of him is given by Diogenes Laertius (i, 10). He is said to have written prose works on sacrifices and the political constitution of Crete, together with two letters to Solon, which have all perished, as the extant copies of the last are spurious. Diogenes also attributes to him poetical works entitled the "Genesis and Theogony" of the Curetes and Corybantes (in 5000 verses), an epic on Jason and the Argonauts (in 6500 verses), and an epic on Minos and Rhadamanthys (in 4000 verses); but it is doubtful whether he ever wrote them. He may have been the author of poems called "Useful" and "Pure" (*Χρησιμῶι* und *Καθαροῖι*), which are ascribed to him by other ancient authorities (Suidas, s. v. *Ἐπιμηνίδης*; Strabo, x, p. 479; Pausan. i, 14, 4). But all these have equally perished. He is probably referred to by the apostle Paul in the words (Tit. i, 12; see Alford, *Gr. Test.* in loc.), "One of themselves [the Cretans], even a prophet of their own, said, 'The Cretans are always liars,' etc., apparently quoting from certain old-fashioned poems written upon skins, and popularly attributed to Epimenides.—Smith, *Dict. of Class. Biogr.* s. v.; Heinrich, *Epimenides aus Crete* (Lpz. 1801); also the monographs *De Epimenide* of Gottschalek (Aitorf, 1714), and Schuremann (Hafn. 1733).

**Epiph'anès** (*Ἐπιφάνης*, manifest, hence famous), an epithet given to the gods when appearing to men. The Syrian king Antiochus, brother of Selencus, coming fortunately into Syria a little after the death of his brother, was regarded as some propitious deity, and was hence called Epiphanes—the *splendid* (1 Macc. i, 10; x, 1; 2 Macc. iv, 17; x, 9). See ANTIOCHUS 3.

**Epiphānes, or Epiphanius**, son of Carpoerates, heretic and gnostic, like his father. He supposed an infinite eternal principle, and united with this fundamental principle the system of Valentinus. According to him, as according to some modern reformers, it is ignorance and passion which, in disturbing the equality and the community of goods, have introduced evil into the world; and the idea of property forms no part of the divine plan, but is of human invention. He concluded, therefore, that all laws should be suppressed, and equality re-established. He concluded, also, that the community of wives, as well as of the fruits of the earth, is necessary to the re-establishment of order. He died at the early age of seventeen years. A temple was consecrated to him in Cephalonia.—Neander, *Ch. Hist.* i, 449; Mosheim, *Ch. Hist.* bk. i, c. 2, pt. ii, ch. v, § 14, n. 17; Hofer, *Nouv. Biog. Génér.* xvi, 159.

**Epiphania.** See ΗΑΜΑΤΗ.

**Epiphanius** (*Ἐπιφάνιος*), bishop of Constantia, one of the Church fathers, was born in Palestine, near Eleutheropolis, in the early part of the 4th century (between 310 and 320). His parents are said to have been Jews, but in his sixteenth year he embraced Christianity; the only case of the kind among the fathers, for the rest of them were either converts from heathenism, or born of Christian parents. He went to Egypt, and there gave himself to ascetic life among the monks; one record also says that he imbibed Gnostic errors, from which he was reclaimed by the monastic discipline. He became an earnest patron and friend of monasticism, and founded a monastery near

his native village, of which he became abbot. In 367 he was elected bishop of Constantia (Salamis), the metropolis of Cyprus. Here he remained thirty-six years, busy with the duties of his episcopate, and especially busy with his pen. He devoted himself to the vindication of orthodoxy with unquestioned learning, but with intemperate zeal and violence. He cherished a special hatred for Origen and his doctrines, and wrote, preached, and travelled in order to destroy their influence in the Church. This hatred led him into a quarrel with John, bishop of Jerusalem. "A report that Origen's opinions were spreading in Palestine, and sanctioned even by John, bishop of Jerusalem, excited Epiphanius to such a pitch that he left Cyprus (A.D. 394) to investigate the matter on the spot. At Jerusalem he preached so violent a sermon against any abettors of Origen's errors, and made such evident allusions to the bishop, that John sent his archdeacon to beg him to stop. Afterwards, when John preached against anthropomorphism (of a tendency to which Epiphanius had been suspected), he was followed up to the pulpit by his undaunted antagonist, who announced that he agreed in John's censure of anthropomorphites, but that it was equally necessary to condemn Origenists. Having excited sufficient commotion at Jerusalem, Epiphanius repaired to Bethlehem, where he was all-powerful with the monks; and there he was so successful in his denunciation of heresy, that he persuaded some to renounce their connection with the bishop of Jerusalem" (Smith, *Dict. of Biog.* s. v.). He also interfered with the diocesan jurisdiction of John, by ordaining one Paulinianus in Palestine. The quarrel became very bitter, and was for many years a source of great trouble and injury to the Church. Epiphanius formed an alliance with the violent and unscrupulous Theophilus of Alexandria (q. v.), who had been an Origenist, but, for his own purposes, changed his professed opinions on the subject, and ordered the Nitrian monks to give up all Origen's writings. They refused, and he called a council at Alexandria, A.D. 399, which condemned Origen, his writings, and his followers. Soldiers were sent to drive the monks from Nitria. Some of them went to Constantinople, where Chrysostom (q. v.) gave them his protection. Theophilus persuaded Epiphanius (now over 80 years old) to call a council of Cyprian bishops (A.D. 401). Here Origen was again condemned. Epiphanius wrote to Chrysostom to join in this condemnation. As Chrysostom did not reply, Epiphanius took it for granted that he favored Origenism, and determined to go in person to Constantinople to "crush Amalek," to use his own words (in a letter to Jerome). Sozomen (*Eccles. Hist.* viii, 14) gives a pretty full account of this visit, saying that, on the arrival of Epiphanius, Chrysostom went out with all his clergy to meet the visitor and do him honor; "but Epiphanius declared that he would neither reside with John, nor pray with him, unless he would denounce the works of Origen, and expel Dioscorus and his companions from the city. Not considering it just to act in the manner proposed until judgment had been passed on the case, John tried to postpone the adoption of further measures to some future time. In the mean time his enemies met together, and arranged that on the day when the people would be assembled in the Church of the Apostles, Epiphanius should publicly pronounce condemnation on the works of Origen, and on Dioscorus and his companions as the partisans of this writer; and also denounce the bishop of the city as the abettor of Dioscorus. By this means it was hoped that the affections of the people would be alienated from their bishop. The following day, when Epiphanius was about entering the Church, in order to carry his design into execution, he was stopped by Serapion, at the command of John, who had received intimation of the plot. Serapion proved to Epiphanius that while the project he had devised was unjust in itself, it could be of no personal advantage to him, for

that, if it should excite a popular insurrection, he would be regarded as responsible for the outrages that might follow. By these arguments Epiphanius was induced to relinquish his designs." About this time the empress Eudoxia sent for Epiphanius to pray for her son Theodosius, who was ill; Epiphanius replied that her son would recover provided she would not patronize the defenders of Origen. To this message the empress answered that Epiphanius had failed to save that of his own archdeacon, who had recently died. Finally, some of the Origenists had a conversation with Epiphanius, in which they seem to have convinced him that he had acted rashly. Soon after (Sozomen, *l. c.*), he embarked for Cyprus, either because he recognised the futility of his journey to Constantinople, or because, as there is reason to believe, God had revealed to him his approaching death, for he died while on his voyage back to Cyprus. It is reported that he said to the bishops who had accompanied him to the place of embarkation, "I leave you the city, the palace, and the stage, for I shall shortly depart." He died at sea, on his return to Cyprus, A.D. 403. He is commemorated as a saint in the Church of Rome on May 12.

Epiphanius was "a man of earnest monastic piety, and of sincere but illiberal zeal for orthodoxy. His good nature allowed him to be easily used as an instrument for the passions of others, and his zeal was not according to knowledge. He is the patriarch of heresy-hunters. He identified Christianity with monastic piety and ecclesiastical orthodoxy, and considered it the great mission of his life to pursue the hydra of heresy into all its hiding-places. His learning was extensive, but ill digested. He understood five languages—Hebrew, Syriac, Egyptian, Greek, and a little Latin. Jerome, who knew but three languages, though he knew these far better than Epiphanius, calls him *πεντάγλωσσος*, the five-tongued; and Rufinus reproachfully says of him that he considered it his sacred duty to slander the great Origen in all languages and nations. He was lacking in knowledge of the world and of men, in sound judgment, and in critical discernment. He was possessed of a boundless credulity, now almost proverbial, causing innumerable errors and contradictions in his writings. His style is entirely destitute of beauty or elegance; still, his works are of considerable value as a storehouse of the history of ancient heresies and of patristic polemics" (Schaff, *History of the Christian Church*, iii, § 169). Scaliger calls Epiphanius an ignorant man, who committed the greatest blunders, told the greatest falsehoods, and knew next to nothing about either Hebrew or Greek.

Hook (*Eccles. Biography*, iv, § 3) cites Epiphanius as one of the writers to whom we can refer for proof of the errors of modern Romanism, and for justification of the Reformation. For example, against invocation of saints, "Neither Elias (he says), nor John, nor Thecla, nor any of the saints is to be worshipped. For that ancient error shall not prevail with us, that we should forsake the living God and worship the things that are made by him. For they worshipped and served the creature above the Creator, and became fools. For if he will not permit angels to be worshipped, how much more would he not have her who was born of Anna? Let Mary, therefore, be had in honor, but let the Lord be worshipped." Again he observes "that the creature cannot be worshipped without injuring the true faith, and falling back to the errors of the ancient pagans, who forsook the worship of the true God to adore the creature; or without incurring the malediction spoken of by St. Paul—that they worshipped and served the creature more than the Creator, who is blessed forever; therefore God gave them up to vile affections." "Sed neque Iellas, neque Joannes—neque quisquam sanctorum adoratur," etc. (*Ihar.* 79 and 62). As decisive is his testimony against the doctrine of a purgatorial state. "In the age to come (he says) there is no advantage of fasting, no call to repentance,

no display of charity; none are admitted after their departure hence, nor can we then correct what was before amiss. There Lazarus goeth not to Dives, nor Dives to Lazarus; the garners are sealed, the combat finished, the crowns distributed. Those who have not yet encountered have no more opportunity, and those who have conquered are not cast out. All is finished after we have departed hence" (*Har.* 59).

The extant writings of Epiphanius are the following, in the order in which they are given in the edition of his works by Petavius (Paris, 1622; Leipzig, 1682; and in Migne, *Patrologia Græca*, vols. xli, xlii, xliii):

1. *Ἰλιάρχιον*, Panarium (*medicine-chest*), a treatise against heresies. It was written at the request of two monks, named Paul and Acacius, belonging to a monastery near Berea, in Lower Syria. Prefixed to the work is a letter to these monks, which serves as a preface. The whole work is divided into three books, which are subdivided into seven tomes or sections. The first book contains three of these subdivisions, and each of the others two. The whole includes an account of eighty heresies, twenty of which were before Christ: 1, the Barbarians, from Adam to Noah; 2, the Scythians, from Nimrod to Terah; 3, the Hellenists, including all who paid divine honors to the creature, including idolatry proper, and also the philosophical arts of Stoics, Platonists, Pythagoreans, Epicureans; 4, the Samaritanism, arising from a mixture of Hellenism and Judaism, and including four sects; 5, the Judæans (Judaism), including the seven sects of Sadducees, Scribes, Pharisees, Hemerobaptists, Nazarenes, Essenes, and Herodians. Of Christian heresies he names the Simonians (followers of Simon Magus), the Basilidian, and other Gnostic sects. With the sixty-fourth heresy he begins his account of the heresies of his own age, Origenism, Arianism. A critical work of great ability on the information given by Epiphanius has been published by Lipsius, *Zur Quellenkritik des Epiphanius*. It limits itself to heresies 13 to 57, which are mostly Gnostic systems. Lipsius shows that Epiphanius, Philaster, and Pseudo-Tertullian made use of the same source, and that this source was the work of Hippolytus against 52 heresies called *σύνταγμα*, which was still known to Photius.

2. *Ἀγκυρωτός*, Ancoratus (*anchored*), i. q. *anchor* or defence of the faith, especially of the doctrine of the Trinity; so called "because," says Epiphanius, "I have collected, according to my slender abilities, all those passages of Scripture which are calculated to establish our faith; that this book may, like the *anchor of a ship*, establish believers in the orthodox faith, in the midst of the agitations and tempests of heresy."

3. *Ανακεφαλωσις* (Migne, xlii, 833), which is a summary or abridgment of the Panarium, the order of topics being somewhat varied.

4. *Περὶ μέτρων καὶ σταθμῶν*, De Mensuris et Ponderibus (*of measures and weights*), in which he gives an account of the weights and measures used in Scripture, a book still useful for Biblical archæology.

5. *Περὶ τῶν δώδεκα λίθων*, de xii gemmis quæ erant in veste Aaronis (*on the 12 gems which were in Aaron's breast-plate*).

A *Commentary on the Song of Songs*, under the name of Epiphanius, was published by Foggini, in a Latin version (Rome, 1750, 4to; and the same was published [in Greek and Latin], Rome, 1772, 4to), by Giacomellus, who attributes it to Philo Carpasius. See PHILO.

The complete editions of Epiphanius (by Petavius and Migne) have been named above. There is a new edition by Dindorf (Leips. 5 vols. 8vo, 1859–1863). The *Panarium* is given in vols. ii, iii, of Oehler, *Corpus Hæresiologicalum* (Berlin, 1859–1862, 5 vols. 8vo). There is a German translation of portions of Epiphanius, with notes, by Rosler (1778, 8vo). His account of the Arian and Meletian heresies was translated into English by Whiston, in his *Collection of Ancient Monuments on*

*the Trinity* (Lond. 1713, 8vo). A separate life of Epiphanius was published by Gervaise (Paris, 1738, 4to).

See Sozomen, *Hist. Eccl.* vi, 32; viii, 15; Socrates, *Hist. Eccl.* vi, 10, 12, 14; Dupin, *Eccl. Writers*, ii, 234; the account of the Bollandists, in Migne, *Patrol. Græc.* xli; Oudin, *De Script. Eccl.* i, 527; Ceillier, *Auteurs Sacrés* (Paris, 1860), vol. vi, ch. xv; Cave, *Hist. Litt.* (Genev. 1720), i, 147; Fabricius, *Bibliotheca Græca*, ed. Harles, viii, 255 sq.; Lardner, *Works*, iv, 185 sq.; Clarke, *Succession of Sacred Literature*, i, 324; Neander, *Church History* (Torrey's), ii, 680, 697; Schaff, *Ch. History*, vol. iii, § 169; Hoffmann, *Bibliog. Lexikon*, ii, 25 sq.

**Epiphanius, St.**, bishop of Pavia, was born in that city, of a noble family, in 439 (according to others 438). He received an education for the priesthood under the special superintendence of St. Crispin, bishop of Pavia. He was consecrated subdeacon in 456, deacon in 458, and on the death of Crispin in 456, he was unanimously chosen bishop by the clergy and people. He had long been noted for his rigid asceticism, and after his election his rigor greatly increased. He took only one meal a day, abstained altogether from wine and meat, never used a bath, and was present at divine service with feet locked together. At that time the West Roman empire was falling to pieces, and a prey to the incursions of northern tribes. During these disturbances, bishop Epiphanius seems to have gained to a high degree the esteem and the confidence of all the rulers. He mediated a peace between emperor Anthemius and his son-in-law Ricimer. In 474 he was sent by the emperor Nepos as envoy to Eurich, king of the Visigoths. In 476 king Odoacer conquered Pavia, and gave the city up to plundering, on which occasion the cathedral was destroyed. Epiphanius rebuilt the cathedral, and prevailed upon the king to exempt the city for five years from all taxes. During the war between Odoacer and Theodoric, king of the Ostrogoths, he gained the confidence of both parties. Theodoric, who in 493 became the master of Italy, granted, upon the intercession of Epiphanius, an amnesty to all who had borne arms against him. Theodoric then (494) sent Epiphanius on a mission to Gundobald, king of the Burgundians, to treat with him for the release of the Ligurian prisoners, who were to re-people the desolated districts of Italy. The mission was successful, and Theodoric subsequently remitted to the Ligurians two thirds of the taxes. Epiphanius died in Pavia, Jan. 21, 497. In 962 the emperor Otho had his relics transported to Hildesheim, in Germany. The Church of Rome commemorates him as a saint on Jan. 21.—Butler, *Lives of Saints*, i, 191; *Acta Sanctorum*, Jan. 21 (biography by his successor Ennodius); Neander, *Light in Dark Places* (New York, 1853), p. 97; Hoefler, *Nouv. Biogr. Générale*, xvi, 161; Herzog, *Real-Encyclop.* iii, 100. (A. J. S.)

**Epiphanius, SCULASTICUS**, an ecclesiastical writer of the Latin Church, lived at the beginning of the 6th century, and is supposed to have been an Italian by birth. At the request of his friend Cassiodorus (q. v.) he translated from Greek into Latin the works of the Church historians Socrates, Sozomen, and Theodoret. Cassiodorus revised the translation, and made out of the three works one, which, under the name of *Historia Tripartita*, remained throughout the Middle Ages one of the standard historical works. Likewise, at the request of Cassiodorus, Epiphanius translated several other works, as the *Codex Encyclicus* (a collection of synodal epistles to the emperor Leo I in defence of the Council of Chalcedon); a Commentary of bishop Epiphanius of Cyprus on the Song of Songs; a Commentary of Didymus on the Proverbs and the catholic epistles.—Cave, *Hist. Lit.* (Genev. 1720), i, 320; Hoefler, *Nouv. Biogr. Générale*, xvi, 162; Herzog, *Real-Encyclop.* iv, 100.

**Epiphany** (ἐπιφάνεια, τὰ ἐπιφάνια, the "mani-
